**PILOTAGE:** The pilot station is situated at the Southern side of Piun Do (Hiyo To) Island the correct position of which is at 35° 56′ N. and 126° 27′ E.

The boarding point near Piun Do is about 14 miles from Kunsan. Pilot to be ordered at least 24 hours in advance. Pilots cannot board in rough weather. Due to constantly changing bottom conditions, vessel should not attempt to enter without Pilot.

**ANCHORAGE:** Outer anchorage about 5½ miles west of Kunsan for vessels drawing up to 28 ft.

Inner anchorage off Kunsan suitable for vessels of 21 ft. draft.

**RADIO:** Kunsan Radio, call sign HLN operating on 500 and 484 k

**MAX. SIZE:** Draft 18 ft. to 27 ft. dependent on height of tide.

**TUGS:** 5 tugs with respective capacity of 300 h.p. (1) 150 h.p. (2) a 80 h.p. (2) are available. One floating crane with capacity of 30 t owned and managed by the Korea Dredging Corp. is available.

**BERTHING:** The port is controlled by Kunsan District Ma Bureau and all vessels come under jurisdiction of Kunsan Cus House. The anchorages in stream inner harbour can accommod one or two vessels less than 1,000 gross tons, and outer anchor (Yubudo Anchorage) accommodates one ocean going vessel dr ing about 28 ft. There are 5 pontoon piers (3 for Kunsan and 2 Changhang) each of which can accommodate an ocean-going ves with maximum draft of 27 ft.

**STEVEDORES:** There is one stevedoring company with 14 woo barges, 3 steel barges and 3 tug boats. Discharging capaci average records per day of 24 hours: coal 1,500 tons; grain a wheat 1,600 tons; fertilizer 1,300–1,400 tons; cement 1,000–1,100 to lauan log 500,000 B/F. Daytime only.

**MEDICAL:** Crew members should be in possession of health ce ficate showing vaccinations for smallpox and typhoid. In case hea certificate has expired, the person(s) will be vaccinated/inocula by a quarantine doctor.

**CURFEW:** In Korea the curfew is still effective from 2400 to 0 every day.

**TIME:** Korean Standard Time, GMT plus 9 hours.

**HOLIDAYS:** Public Holidays – New Year (January 1–3); Indep dence Movement Day (March 1); Labour Day (March 10); Arbor D (April 5); Memorial Day (June 6); Constitution Day (July 17); Libe tion Day (August 15); Nation's Foundation Day (October 3); Natio Alphabet Day (October 9); United Nations Day (October 24); Chri mas Day (December 25). (Can be worked if requested.)

Local Holidays. Work cannot be carried out on Lunar New Yea Day and the Moon Festival, about 15th August.

**SHORE LEAVE:** Crew shore passes will be issued by Port Imm gration Office.

**AUTHORITY:** Kunsan Maritime Bureau.

## MASAN: 35.11 N. 128.33 E.

**DOCUMENTS:**

6 copies Report (Ent/Departure).
6 copies Crew List.
6 copies Passenger List.
2 copies Crew Personal Effects List.
2 copies Store List.
9 copies Manifest (dis./loading only).

**PILOTAGE:** Not compulsory, but inadvisable to enter with Pilot. Pilots available at Pusan, to be ordered by Agent at le 24 hours in advance. Pilot station at Kaduk Do. A berthing/unberth pilot available at Masan.

**NOTICES:** All vessels bound for Korean ports should give ETA the local Agents 27 hours prior arrival. This is essential to enable t Agents to notify the Port Authorities and arrange a Pilot if nece sary.

**MAX. SIZE:** The maximum draft admissible for entrance is 26 f

**TUGS:** 2 tug boats of 1,000 h.p. and 350 h.p. owned and managed Masan District Marine Bureau available.

**ANCHORAGE:** Mooring capacity at anchorages: A–1, A–2, A Depth 30 ft.; A–4, A–5, A–6 Depth 24 ft.; A–7, A–8 Depth 23 Quarantine Station A Depth 36 ft.

**BERTHING:** Pier No. 1 provides 2 berths for ocean-going vess and pier No. 2 only for vessels less than 800 gross tons due to i sufficient water. Wharf capacity: Pier berth No. 1 and 2, length ft. depth 24 ft. Pier berth No. 3 and 4 length 660 ft. depth 26 ft. Diffe ence between high water and low water at spring only 9 ft. Pier No berth length 180 ft., depth less than 12 ft. Warehouse belongs Masan Marine Bureau, capacity 10,000 cubic ft. located No. 1 pier front of the ship alongside.

**STEVEDORES:** Korea Express Co., 8 barges (1,000 tons), 1 t (145 h.p.); Hyopshin Stev. Co., 6 barges (1,000 tons), 1 tug 180 h.p

Discharging capacity – average records per day (24 hours).

| | | |
|---|---|---|
| Coal | in bulk | 1,000 tons |
| Cement | in bags | 1,000 tons |
| Grain & Wheat | in bulk | 1,000 tons |
| Fertiliser | in bags | 1,000 tons |
| Steel Scrap | in bulk | 750 tons |

**MEDICAL:** Crew members should be in possession of hea certificate showing vaccinations for smallpox and typhoid. If t health certificate has expired, the person(s) will be vaccinat inoculated by a quarantine doctor.

**CURFEW:** In Korea the curfew is still effective from 2400 to 0 every day.

**TIME:** Korean Standard Time GMT plus 9 hours.

**HOLIDAYS:** Public Holidays:
New Year (January 1–3); Independence Movement Day (March Labour Day (March 10); Arbor Day (April 5); Memorial Day (June Constitution Day (July 17); Liberation Day (August 15); Natio Foundation Day (October 3); National Alphabet Day (October United Nations' Day (October 24); Christmas Day (December

**SHORE LEAVE:** Crew shore passes will be issued by Port Imm gration Office. Extension of shore passes should be made every hours.

**AUTHORITY:** This port is controlled by Masan District Mar Bureau, under jurisdiction of Masan Custom House.

## MOKPO: 34.37 N. 126.23 E.

**DOCUMENTS:**

6 copies Report (Ent./Departure).
6 copies Crew List.
6 copies Passenger List.
2 copies Crew Personal Effects List.
3 copies Passenger Luggage List.
2 copies Stores List.
9 copies Manifest (Dis./Loading only).

**PILOTAGE:** Pilots stationed at Kasado Island, 34° 27′ N. 125° 02′ E. 30 miles from Mokpo. Twenty-four hours notice to Agent required to arrange Pilot. Although not compulsory, vessels strongly recommended not to enter without Pilot.

**NOTICES:** All vessels bound for Korean ports should give an ETA to the local Agents 27 hours prior to arrival. This is essential to enable the Agents to notify the Port Authorities and arrange a Pilot if necessary.

**RESTRICTIONS:** Mokpo is located at the South-western end of the Korean peninsula. The port is at the mouth of the Yungsan River which flows through the Yungsan peninsula. Kasako Island protects this port from heavy winds and swell. The Yungsan River provides 5 anchorages where 5 vessels of Liberty type can berth at a time. The port is 30 miles from the pilot station off Ksasdo Island, in position 34° 27′ 20″ N. and 125° 02′ 05″ E.

Tide Information: maximum tide level at high water 4·5 metres; minimum tide level at high water 2·8 metres; average tide level at high water 3·5; Maximum tide level at low water 0·5 metres; Minimum tide level at low water 1·3 metres; Average tide level at low water 0·7 metres.

**ANCHORAGE:** Five anchorages in depths from 11 metres to 20 metres. Anchorage Nos. 2, 3, and 4 are better than No. 1 and 5 for discharging cargo because No. 1 is sometimes very dangerous due to strong tidal currents.

**TUGS:** Three tugs available, up to 150 h.p.

**RADIO:** Mokpo Radio. Call sign HLM operating on 500 and 484 kc/s.

**BERTHING:** Sam Hak Do Pier, length 168 metres and width 18 metres, where only one 8,000 ton ocean-going vessel can operate in 13 metres depth.

**STEVEDORES:** There are 3 stevedores companies with 28 wooden barges (1,680 tons), 7 steel barges (1,200) tons and 3 tug-boats.

**MEDICAL:** Crew members should be in possession of Health Certificate showing vaccinations for smallpox and typhoid. In case the Health Certificate has expired, the person(s) will be vaccinated/ inoculated by a quarantine doctor.

**FRESH WATER:** Available at rate of 150 tons per day. Twenty-four hours notice required.

**CURFEW:** In Korea, the curfew is still effective from 2400 to 0400 every day.

**TIME:** Korean Standard Time, GMT plus 9 hours.

**HOLIDAYS:** Public Holidays: New Year (January 1st–3rd); Independence Movement Day (March 1st); Labour Day (March 10th); Arbor Day (April 5th); Memorial Day (June 6th); Constitution Day (July 17th); Liberation Day (August 15th); Nation's Foundation Day (October 3rd); National Alphabet Day (October 9th); United Nations Day (October 24th); Christmas (December 25th). Work can be arranged on all above holidays. Local Holidays: No work can be done on Lunar New Year or on the Moon Festival about August 15th.

**SHORE LEAVE:** Crew shore passes will be issued by Port Immigration Office. Extension of shore passes should be made every 72 hours.

**AUTHORITY:** Mokpo District Marine Bureau.

## MUKHO: 37.33 N. 129.27 E.

**DOCUMENTS:**

6 copies Report (ent/departure).
6 copies Crew List.
6 copies Passenger List.
2 copies Crew Personal Effects List.
3 Passenger Luggage Lists.
2 copies Store List.
9 copies Manifest (dis./loading only).

**PILOTAGE:** Compulsory. Pilotage area from quarantine station to inside boundary line of harbour limits.

**RESTRICTIONS:** Vessels bound for this port should anchor at the out-harbour awaiting for Quarantine Inspectors, and are required to radio the Harbour Master (6MF2/500 kc/s) the following, free of charge, at least 12 hours prior to the ship's arrival at the Quarantine Station, viz.: 1. Name and nationality of vessel; 2. Exact ETA at out-harbour (Quarantine or Pilot Station); 3. Maximum draft on arrival; 4. Description and quantity of cargo and the number of passengers, and so on.

**ANCHORAGE:** In Outer Harbour with max. draft 40 ft., 20,000 to 30,000 G/tonners, possible anchor near Quarantine Station, however, cargo work not possible due to no cargo gear and bad weather except under special circumstances.

**TUGS:** Two tugs available of 320 h.p. and 650 h.p.

**BERTHING:** Central Pier depth 18 ft. 05 in.; Coal Pier Conveyor A depth 21 ft. 00 in.; Conveyor B depth 21 ft. 09 in.; Stream berth depth, 21 ft. 00 in.; Ssangyong Pier depth 26 ft. 10 in; Ssangyong Pier depth 31 ft. 05 in.

Generally speaking, the loading berth at Coal Pier, Central Pier and Ssangyong Pier, is determined by ship's arrival order. However priority is often given to local vessels carrying domestic coal when domestic coal transportation is urgently required which could cause a rather prolonged wait. Therefore, all vessels bound for this port for coal/graphite/cement are recommended to contact Agents well in advance to ascertain the port conditions.

**STEVEDORES:** One stevedoring company: Korea Express Company Limited.

**MEDICAL:** Crew members should be in possession of health certificate showing vaccination for smallpox and typhoid. In case health certificate has expired, the person(s) will be vaccinated/ inoculated by a quarantine doctor.

**FUEL:** Nearest supply point is Ulsan, 140 miles away.

**CURFEW:** In Korea the curfew is still effective from 2400 to 0400 every day.

**TIME:** Korean Standard Time – GMT plus 9 hours.

**HOLIDAYS:** Public holidays:
New Year (January 1–3); Independence Movement Day (March 1); Labour Day (March 10); Arbor Day (April 5); Memorial Day (June 6); Constitution Day (July 17); Liberation Day (August 15); Naton's Foundation Day (October 3); National Alphabet Day (October 9) United Nations Day (October 24); Christmas Day (December 25) Work can be done.

Local Holidays: No work can be done on Lunar New Year's Day and on the Moon Festival about August 15th.

**SHORE LEAVE:** Crew shore passes will be issued by Port Immigration Office. Extension of shore passes should be made every 72 hours.

**AUTHORITY:** District Marine Bureau.

## POHANG: 36.02 N. 129.23 E.

**DOCUMENTS:** See "Pusan".

**PILOTAGE:** Compulsory, two licensed pilots available.

**ANCHORAGE:** In roadstead, open to N.W. in depth 36–40 ft. Good holding ground for cargo operations.

**TUGS:** Two tugs available of 250 h.p.

**BERTHING:** New pier for discharging iron ore cargoes. One berth for bulk carriers up to 50,000 dwt. and one berth for smaller vessels up to 5,000 dwt. Total length of pier 2,340 metres. Operated by Pohang Composite Iron and Steel Works.

**FRESH WATER:** Small amounts up to 50 tons, may be barged from Ulsan, 56 miles away.

**SHIPMASTERS REPORT:** *Pilot:* Usually boards the vessel after anchoring in position 36.03 N., 129.26 E.

*Anchorage Position for Quarantine Clearance:* Same as for Pilot.

*Berthing:* Entry and departure are only remissable during daylight hours, vessels are not allowed to berth at night.

*Fresh Water:* Available at all times ex wharf without limit on quantity taken.

**AUTHORITY:** Pohang District Marine Bureau.

## PUSAN: 35.07 N. 129.02 E.

**DOCUMENTS:**

9 Cargo Manifests.
3 Transit Cargo Manifests.
8 Crew Lists.
8 Passenger Lists.
4 Passenger Baggage Lists.
4 Mail Lists (forms supplied by Agent).
5 Parcels Lists (forms supplied by Agent).
2 Arms-Narcotics Lists.
2 Tobacco Lists.
2 Currency Lists.
4 Stores Lists.
4 Crew Personal Effects Lists.

Immigration: All Seamen's Books examined and shore passes made out. These passes to be carried at all times when ashore. Strict curfew from 0000 hours to 0400 hours.

**CERTIFICATES:**

Derat. Certificate or Exemption.
Inoculation and Vaccination Certificates for all crew members.

**PILOTAGE:** Professional pilot service is available at Pusan and contact can be made by telephone No. 6–1346 or 6–1743. Necessary for arriving vessel to notify Pilots of arrival 24 hours in advance. VHF unavailable. Formal address is: 73 2-Ka, Choong-Gu Taigyo-Ro, Pusan, Korea. Blast signal from vessel used to call Pilots. Pilot station position 35° 05′ 5″ N. 129° 05′ E.

Pilotage is compulsory and available day and night. Pilot boards off the entrance to the outer harbour. Pilot boat is white launch with pilot signals. Tugs cannot be employed unless Pilot is on board.

**PRATIQUE:** Pratique granted to vessels anchored in a circular quarantine anchorage located in outer harbour. Quarantine inspection can be arranged by day or night if sufficient advance notice given although regular hours are sunrise to sunset. Valid smallpox and cholera certificates required. Innoculations against typhoid and typhus may be required depending on prevalent conditions.

**ANCHORAGES:**

| *Designation* | *Depth* | *Capacity* |
|---|---|---|
| S-anchorage | 8–9 m. | 6 vessels of 300–2,000 t. |
| E-anchorage | 11–12 m. | 6 vessels of 8,000–12,000 t. |
| N-anchorage | 7–10 m. | 18 vessels of 500–6,000 t. |

**RESTRICTIONS:** Vessel having called at Communist ports within six months of contemplated entry of Pusan needs to obtain permission of authorities.

**MAX. SIZE:** No restrictions on length or breadth of a vessel. Draft should be less than 10 m. when vessel is alongside a pier, or 12 m. when anchored at an anchorage.

**RADIO:** Pusan Harbour Radio Station: call sign, HLP. Frequency, 500, 434 kc/s. operation round the clock.

Cable Harbour Master 12 hours in advance, advising ETA, last port and maximum draft. If name of Agent is included, the Harbour Office will inform Agents.

VHF is now available. Calling Channel 16. Working Channel 14. Call sign "Harbour Control". Range about 12 miles.

A radar has been sited at the Harbour Office to help vessels approaching in poor visibility.

**TUGS:** Tugs join an arriving vessel at immediate interior to breakwater, Pusan Harbour. Ship's own lines are used.

**BERTHING:** Normally in daylight only.

| | *Length* | *Beam* | *Draft* |
|---|---|---|---|
| Pier No. 1 | 407 m. | 115 m. | 28 ft. |
| Pier No. 2 | 407 m. | 116 m. | 28 ft. |
| Quay way No. 2 | 645 m. | — | 27 ft. |
| Pier No. 4 | 556 m. | 145 m. | 29 ft. |

**STEVEDORES:** On basis using full gangs per day, the capacity is: 1,000 L/tons on general cargo; 1,200 L/tons on grains; 1,500 L/tons on anthracite or coal.

**TANKERS:** A T-head oil pier extends about 700 ft. on the S.E. side of the north harbour. Least depth at pier head is 32 ft. Used by tankers servicing Korea Oil Corporation.

**DEVELOPMENTS:** Dredging of the approach channel to piers to about 36 ft. Dredging northern section of harbour to 29 ft.

**MEDICAL:** Service is available at short notice.

**FRESH WATER:** Available. Rate of water supply, 80 L/tons per hour. Supplied at pier, or by barge.

**FUEL:** Availability on Bunker "A", Bunker "C", LRFO, LO and diesel oil.

**FIRE PRECAUTIONS:** Port has separate anchorage for tankers. Port requests for compliance with regulation not to contaminate waters with inflammable substances, e.g. petroleum products. Tankers are prohibited to clean tanks in port.

**GANGWAY/DECK WATCHMEN:** This service is available.

**OPENING/CLOSING HATCHES:** Usually carried out by stevedores.

**CUSTOMS ALLOWANCES:** One carton cigarettes or 1 lb. of tobacco, and one bottle wine or spirits allowed, each man.

**IDENTIFICATION CARDS:** Crew required to carry valid identification cards at all times.

**CONSULS:**

| | |
|---|---|
| Consul, Republic of China (Formosa) | Tel. 4–0276 |
| Consul, Japan | 22–0135 |

**REPAIRS:** All repairs can be effected.

**DRY DOCKS:**

| *Name of facility* | *Capacity* | *Location* |
|---|---|---|
| Korea Ship Building Eng. Corp. No. 1 | 5,000 | Pusan |
| Korea Ship Building Eng. Corp. No. 2 | 10,000 | Pusan |
| Korea Ship Building Eng. Corp. No. 3 | 100,000 | Pusan |
| Dae Sun Ship Building Corp. | 4000 | Pusan |

**REPATRIATION:** No facilities.

**AIRPORT:** Airport is at Suyeng about 12 km. from Pusan. Japan-bound plane takes off once a day.

**TIME:** Korean Standard Time. 9 hours ahead of GMT. No alterations during year.

**HOLIDAYS:** 1st–3rd January; 1st March; 10th March; 5th April; 6th June; 17th July; 15th August; 3rd October; 9th October; 24th October; 25th December.

On above holidays vessels can be discharged and loaded with permission to work granted by the Customs Authority on request.

Local holidays when no work may be performed are: New Year's Day in Lunar Calendar, and the Moon Festival (15th August) in Lunar Calendar.

**POLICE/AMBULANCE/FIRE:** Police, 22–0863/2497; Ambulance, Pusan Quarantine Station, 6–1371, 4–5736.

**TELEPHONES:** "Port Telephone Service" operates for purpose of serving communication on board-shore.

**SERVICES:** Adjustment of compass, available.

**SHORE LEAVE:** Allowed.

**DELAYS:** Port congestion is experienced occasionally.

**AUTHORITY:** Pusan District Marine Bureau. Tel. 4–0041/0043 or 6–0357.

## ULSAN: 35.27 N. 129.23 E.

*Korea Oil Corp. Single Buoy Moorings.*

**DOCUMENTS:**

3 copies of Manifested Parcels on Board.
3 copies of the Store List.
3 copies of List of Narcotics on Board.
3 copies of List of Arms and Ammunition on Board.
3 copies of List of Vessel's Foreign Currency.
3 copies of List of Crew's Foreign Currency.
3 copies of List of Vessel's Tobacco, Cigarettes, Spirits, etc.
13 copies of the Crew List.
3 copies of List of Crew's Personal Effects, Tobacco, Cigarettes, Spirits, etc.
Crew's Vaccination Certificates.
Deratisation Exemption Certificates.
Clearance from Last Port.
10 copies of List of Landing Passengers, if any.
10 copies of List of Passengers in Transit, if any.
3 copies of List of Passengers' Baggage.

**PILOTAGE:** The seaward approaches to the Imodco Termin mooring site are free of underwater obstructions and existing lan marks and navigation aids are adequate. Depth of water not less tha 65 ft. in approaches. The Imodco Terminal can be approached wi the summit of Pongdae San bearing 333° true. When in position t following navigation fix will obtain at the mooring site:

| | | | | |
|---|---|---|---|---|
| Pongdae San (summit) | bearing | 333° true | distance | 2,915 yd. |
| Pongjin Hang Light (end of breakwater) | ,, | 053° true | ,, | 4,770 yd. |
| Chuck To (centre cut) | ,, | 255° true | ,, | 3,800 yd. |

A good radar echo will be obtained from the tanks ashore approximately 20 miles, the Imodco buoys at a distance of 8 miles and the small buoys, marking the floating hose heading off t Imodco buoy, at 1·5 miles.

Lights ashore, lights on the Imodco buoys and on the small buoy appear to be unreliable.

After clearing Customs a harbour Pilot will board the vessel direct it to the buoy and conduct the mooring operations if require There is no night mooring. However, unmooring is carried out durin darkness as well as in daylight.

**ANCHORAGE:** Anchor the vessel about 1 mile South-east of th buoy, if the weather permits. In this location it is less difficult t find vessel, when in fog. Do not anchor less than 1 mile from buo and under no circumstances can the anchors ever be used o approaching the buoy terminal, chain cables and pipe-lines a located at this site and anchoring is strictly prohibited.

**HEALTH:** Entry prediction to be supplied to quarantine authoritie by vessel's Agent 24 hours before arrival. Master required to com plete Health Declaration when officer boards on arrival. Free pratiqu is automatic when coming from another Korean port.

**RADIO:** There is no marine radio telephone at Ulsan to commun cate with on radio telephone frequency. A small transreceiver o shore can communicate with attendant launch.

**BERTH DESCRIPTION:** Two berths at single buoy moorings.

**No. 1 Imodco Buoy**

*Position:* Latitude 35° 27′ 15″ North, longitude 129° 23′ 30″ East.

*Description:* A 12·5 metres red and white vertically striped buoy.

*Lights:* On buoy; alternate flashing red and white every 12 seconds visibility 5 miles or more. Duration of each flash 4 seconds.

On hose; there are 3 red flashing marker lights equally spaced along 675 ft. hose, visible for 2 miles.

All of the above lights are activated by photoelectric cells.

*Radar Reflector:* On buoy's mast.

*Foghorn:* A two-second blast, period 20 seconds, range one mile Must be turned on at the buoy.

*Soundings:* Eleven fathoms in buoy area.

**No. 2 Imodco Buoy**

*Position:* Latitude 35° 26′ 44″ North, longitude 129° 23′ 20·5″ Eas

*Description:* A 12·5 metres red coloured buoy.

*Lights:* On buoy; has a range of at least 5 miles, on hose; as fo No. 1 Imodco buoy.

*Foghorn:* A battery powered foghorn with a range in excess o ½ mile.

**DRY CARGO BERTHS:**

Commercial harbour mainly serves export of chemicals, fertiliser and by-products of the refineries. The harbour lies about 4 miles i from the sea and there are four berths available with depths up t 33 ft.

Quarantine/Pilot station situated in position 35° 27′ 26″ N., 129 24′ 30″ E.

Entrance at night is not permitted. Only one tug is available. Wate is available. No VHF. Maximum tide in harbour is one foot.

**BERTHING:** Two launches are in attendance during mooring an unmooring operations. One launch will keep the hoses clear an the other handles the mooring rope. Both bow anchors are to b hove well up in the hawse pipes and properly secured before reaching the buoy. Anchors are never to be used while on the buoy, they can foul buoy cables and pipe-line on the bottom if released.

*No. 1 Buoy.* The vessel will be moored with 4 to 5 ropes off the bow No rope used from the well decks. One rope will be run single to th buoy to heave the vessel in proper position, all other lines will b used double by sending one end out through the port or starboar bow chock and hove back through the opposite side of the bow chock, sufficient slack is brought on board so that a complete set o turns can be securely placed on the bollard. A good messenge rope about 3½ in. to 4 in. circumference, at least 400 ft. in length will be required to heave the lines around the mooring arm on th mooring and back on the vessel. The first line used single will b doubled up last.

*No. 2 Buoy.* The vessel will be moored with two nylon lines, 250 f in length, floating off the buoy. Two of the ship's mooring ropes wi be run to the buoy to heave the vessel in proper position. At abou 40 yd. distance from the buoy a good messenger rope will be required to pick up the floating ropes one by one. When the floatin ropes are made fast on board, one of the two ship's ropes sent t the buoy will be doubled up.

**HOSES:** *No. 1 Buoy.* There are two sets of 12 in. hoses and one se of 8 in. hose. The two 12 in. hoses are for crude oil and the 8 in. hose for gas oil. The hoses are 675 ft. in length from the buoy manifol and are floating in plastic doughnut shaped floats. The hose connections are always made to the port manifold, and are lifted one a a time to the ship's manifold. Each hose, when full of cargo an equipment, is over 1½ tons in weight.

*No. 2 Buoy.* There are two strings of 16 in. hoses, each 945 ft. i length. The final 70 ft. of hose is reduced to 12 in. to permit lifting by the tanker's lifting gear. The hose connections are made to the starboard manifold of the vessel.

**BUNKERS AND WATER:** Available by barge only.

**BALLASTING:** After the vessel has been somewhat more than half discharged, the vessel should be ballasted to a safe margin, to draw not less than 12 to 13 ft. forward. This will avoid the vessel yawing widely on the buoy with strong winds and assist in avoiding contact with the buoy and hoses. Vessel will moor about 120 ft. from buoy.

**CUSTOMS ALLOWANCES:** One carton cigarettes or 1 lb. of tobacco, and one bottle wine or spirits allowed, each man.

**IDENTIFICATION CARDS:** Crew required to carry valid identification cards at all times.

**REPATRIATION:** Nearest facilities for crew change or repatriation are at Pusan.

**TIME:** Korean Standard Time, 9 hours ahead of GMT. No alterations during year.

**HOLIDAYS:** 1st January; 1st March; 5th April; 6th June; 17th July; 15th August; 3rd October; 9th October; 24th October; 25th December.

**SHORE LEAVE:** Allowed up to midnight.

**GENERAL:** Vessels arriving at Ulsan should radio to Agent at Pusan four days in advance information on size of vessel's manifold connections, as the adapters, if required, will have to be made by the Korea Oil Corp. This applies mainly to vessels arriving at Ulsan for the first time or in case there has been any alteration to the manifold since the last arrival.

While on the buoy the vessel will be required to provide sleeping quarters and linen for about eight to ten men; this includes the discharging Master and his apprentice. The standby men include launch-men and riggers; these men connect and disconnect hoses and are mainly kept on board for emergency.

The discharging Master will remain with the vessel during its entire operation on the buoy. Under certain conditions, should it become necessary, they may ask the vessel for meals; however, food for standby men is generally furnished from ashore.

The ship's engines must remain ready for immediate use.

**AUTHORITY:** Korea Oil Corporation, Ulsan.

## YOSU: 34.51 N. 127.47 E. (See Plan)

(a) *HONAM OIL REFINERY SINGLE BUOY MOORING.*
(b) *HONAM OIL REFINERY PRODUCT WHARF TERMINAL.*
(c) *DRY-CARGO PORT.*

**DOCUMENTS:**

Last Port Clearance.
Register.
12 copies of Crew List.
12 copies of Passenger Manifest.
3 copies of Store List.
3 copies of Bonded Store List.
3 copies of Arms and Ammunition List.
3 copies of Livestock List.
1 copy of Vaccination List showing dates of last smallpox and yellow fever vaccination, etc.

**PILOTAGE:** The approach to Yosu Gulf from the South is open and clear of dangers until vessel approaches "Tae Do" near which the pilot station is located. The depths of water vary from 40 metres off "Cah-To" to 20·5 metres in the vicinity of Tae Do.

From Tae Do the channel narrows and changes direction to the West North-west towards the town of Yosu. Off the South-west extremity of Namhae, where the channel is about 1·25 miles wide, course is altered to North by West into Yosu Gulf. The land on each side is mountainous and rises to an average height of 450 metres. The highest peak in the area is Mangun San, situated in the Northern part of Namhae and rises to an elevation of 785 metres.

In approximate latitude 34° 47′ N. are located 5 buoys and 1 lighthouse beacon to mark the narrowest part of the Channel. The buoys are numbered 1 to 5 with black buoys having even numbers. Vessels course is mid-way between the buoys. About ¾ mile from the Imodco Buoy a 13 metres patch is marked by a buoy.

There are numerous fishing nets at the approach and in the Gulf of Yosu, marked by wooden poles. Vessels should keep a sharp look out for these nets. Any damage sustained would result in a substantial fine to the vessel.

Pilotage is compulsory.

**NAVIGATIONAL AIDS:**

### (a) HONAM OIL REFINERY SINGLE BUOY MOORING.

**RESTRICTIONS:** Channel depth minimum 63 ft. The channel area to Yosu has been hydrographic surveyed and wire dragged North of latitude 34° 35′ 30″. A channel about 2½ miles wide and 15 miles long has been wire dragged South of latitude 34° 35′ 30″. The Western extremity of this channel is located about 3¼ miles East of Chock-To Island. Daylight berthing only at the buoy terminal.

**READINESS:** Honam Oil will make every effort to discharge vessels upon arrival, or as promptly as berth is available.

Notice of Readiness will be tendered and accepted as the time of the vessel is in all respects ready to discharge.

**MAX. SIZE:** The Terminal is designed and constructed to provide a safe mooring for tankers of up to 100,000 dwt. under the following environmental conditions:

| | |
|---|---|
| Wind velocity | 50 knots |
| Water depth (LLW) | 112 ft. |
| Average wave and swell height | 6·0 ft. |
| Tidal rise | 16·4 ft. |
| Current | 3·0 knots |

Although designed for 100,000 dwt. tankers to the above stated conditions, larger tankers can be accommodated as follows:

| *Ship size (dwt.)* | *Max. wind conditions* |
|---|---|
| 100,000 | 50 knots |
| 130,000 | 47 knots |
| 150,000 | 44 knots |
| 175,000 | 41 knots |
| 200,000 | 37 knots |
| 250,000 | 33 knots |
| 300,000 | 29 knots |

**ANCHORAGE:** Depth 14 fathoms. It is prohibited to anchor within 1 mile of buoy mooring.

**HEALTH:** Entry prediction to be supplied to quarantine authorities by vessel's Agent 24 hours before arrival. Master required to complete Health Declaration when officer boards on arrival. Free pratique is automatic when coming from another Korean port.

**RADIO:** Pusan Radio. There is at Yosu a non-commercial radio station with call signal 6 MY operating and listening on 500 kc/s. Manned by two operators with 24 hours service. The station is located at the Yosu Marine Bureau for the benefit of the port authorities, including the Pilot. The range of the station is about 100 nautical miles, and it is recommended that Masters communicate with this station giving their ETA at the pilot station. The communication from tanker to shore when moored at the Imodco buoy is by VHF transreceiver and is handled by refinery personnel on board. Messages should therefore be relayed to the refinery representatives.

**TUGS:** Two tugs available each of 1,000 h.p.

**BERTHING:** The approach to the buoy is made with minimum headway on the tanker and the first synthetic line to the buoy is supplied by the vessel, and by using this line the vessel is brought approximately 150 ft. from the buoy, when two 15-in. synthetic lines from the buoy are brought up to the ship and made fast. During the discharge operations engines must be ready on a moment's notice and sufficient officers on duty to man the bridge and the engine-room. In order to avoid riding up on the buoy and the cargo hoses stern movements with the engine may be required. On turbine vessels where the chief engineer is unable to completely stop his engines, the r.p.m. must be kept at a minimum. Vessels which are not able to conform with these regulations should advise Honam Oil representative in writing.

Honam Oil maintain a boat to bring the cargo hoses alongside and crew for connecting of same. The tanker's crew is, however, responsible for adjusting the boom and the gear necessary for this operation. The same procedure takes place upon completion of cargo.

The vessel is required to have two 12 in. ASA type flanges to her manifolds, rig starboard derrick in double before arrival at the buoy and a standby derrick operator and responsible ship's officer at her manifolds upon finishing the mooring.

A team will board the vessel from working boat with hose connection gear and the floating cargo hoses will be lifted by vessel's derrick.

**BALLAST:** There are no facilities for reception of dirty ballast. It is the ship Master's responsibility to see that no oil or oily ballast is spilled or pumped overboard from his ship. Drip-pans must be used at all times and all scuppers must be plugged. The waters in or adjacent to the terminal must not be polluted and only oil-free bilgewater may be discharged at the terminal. If, during inspection or during progress of discharging, it is revealed that the vessel's tanks are not oil-tight, she will be refused further discharging, if so determined by the refinery representative.

**SAFETY:** Sufficient officers and crew personnel must always be on board to attend to the vessel and to cargo. Power must be available at all times on deck winches and windlass while the vessel is in the moorings. The presence of unauthorised craft alongside is extremely hazardous, and Masters are requested to require all unauthorised craft to clear the vessel's side prior to commencement of cargo discharging. Master should shut down all cargo operations during severe electrical storms and under any circumstances which imperil the cargo operation.

**DISCHARGING:** SBM Terminal receiving facilities have a working pressure of 225 p.s.i. and a 7 : 1 safety factor, but on discharging pumping pressure will commence at 6 $kg/cm^2$ and then pressure should be raised up to 15 $kg/cm^2$ at ship's manifold.

**FUEL:** Marine fuels, such as bunker fuel, marine diesel and light residual fuel oil are available.

Deliveries are made by barges from *Bunkering Agent of Honamoil.* The Master should cable in advance his requirements to the Agent.

While bunkering barge is alongside the crude tanker, it is required that ship's Master shall check mooring lines, fenders or engines of bunkering barge.

**MEDICAL:** There are medical facilities in Yosu town. Inoculations and vaccinations can be arranged by the quarantine doctor.

**SHORE LEAVE:** Shore leave for ship's personnel is arranged through ship's Agent and local authorities. Nearest town is Yosu which is about 45 minutes journey by boat, which is arranged by ship's Agent.

**REPAIRS:** Minor facilities only available.

**FRESH WATER:** Not available.

**SUPPLIES/LAUNDRY:** Vegetables, fresh fruit, dry goods, etc., can be arranged through ship's Agent in conjunction with ship chandler at Yosu, subject to 48 hours' notice of requirements.

**AUTHORITY:** Yosu Office, Honam Oil Refinery Co. Ltd., Yosu Refinery, PO Box 7, Yosu Chollanamdo Korea.

Seoul Office, Honam Oil Refinery Co. Ltd., IPO Box 2467, Seoul, Korea. Cable address: "Honamoil Seoul".

### (b) HONAM OIL REFINERY – PRODUCT WHARF TERMINAL SAM IL PORT YOSU

**BERTHS:** The 4 products berths located in approximate position 34° 51′ 38″ North, 127° 44′ East, in East–West direction and is designed to accommodate 4 tankers simultaneously viz. No. 1 and No. 4 berths for about 5,000 dwt. tankers, No. 2 for 3,000 dwt. and No. 3 for 20,000 ton tankers respectively. The Honam Oil Product wharf is designed to moor and unmoor tankers on a 24-hour basis, depending on the condition prevailing at the time and the Master's judgement. The wharf is well and sufficiently illuminated for night work. A signal mast with yard-arm is under operation and situated on the end of the East mooring dolphin with the following signals to indicate ebb and flood tide, viz.

| | |
|---|---|
| 2 white lights indicate | Ebb tide |
| 1 white ball indicates | Ebb tide |
| 2 red lights indicate | Flood tide |
| 1 red ball indicates | Flood tide |
| No light or no ball indicates | Slack water |

International code flags 1–2–3–4 indicate what berth the tankers will occupy.

These signals are meant to assist vessels Master and or Pilots in determining what approach should be made to the various berths. However Honam Oil Refinery Co. Ltd. cannot assume any responsibilities or liabilities from negligence and fault of their employees or contractors in displaying wrong signals from the yard-arm. Masters and/or Pilots should in addition consult their tide tables and use their judgement.

Minimum mooring line requirements:

| Forward: | Aft: |
|---|---|
| 3 head lines | 3 stern lines |
| 1 spring line | 1 spring line |
| 1 breast line | 1 breast line |

In strong wind 1 more head and stern line.

The direction of the tidal stream in the vicinity of the products wharf is nearly rectilinear and parallel to the berths, the flood running in a 172° direction and the ebb in an 084° direction. The maximum velocity is $2\frac{1}{2}$ knots. The duration of the ebb stream is about $6\frac{3}{4}$ hrs., and the flood stream $5\frac{1}{2}$ hrs.

**CONNECTING HOSES:** It is the policy of the Honam Oil Refinery Co. Ltd. that the ship's crew shall be responsible for the connecting and disconnecting of the cargo hoses of the ships manifold. The wharf crew will operate the cargo hose winches.

**LOADING:** The refinery can furnish loading at 5,000 barrels an hour or more. The Chief Officer should, however, state the loading rate he requires which should be maximum consistent with safety at all times. A qualified deck officer should, however, be on deck during the entire loading operation. The international code flag "B" shall be displayed from the signal yard-arm during daylight hours. A red light shown during hours of darkness.

Lines loading and deballasting for each berth are as follows:

| *No. 3 Berth* | in. | *(East)* | *No. 4 Berth* | in. |
|---|---|---|---|---|
| Kero. | 8 | | Kero. | 6 |
| JP–4 | 8 | | JP–4 | 6 |
| Naph. | 8 | | Naph. | 6 |
| Pre-gas | 8 | | Pre-gas | 6 |
| Solvent | 8 | | Solvent | 6 |
| LRFO | 8 | | LRFO | 6 |
| Diesel | 4 | | Diesel | 4 |
| BFO | 4 | | BFO | 4 |
| Reg-gas | 8 | | Reg-gas | 6 |
| BFO | 8 | | BFO | 6 |
| Ballast | 8 | | Ballast | 6 |
| BFO | 8 | | BFO | 6 |
| Diesel | 8 | | Diesel | 6 |
| BFO | 8 | | LPG | 6 |

| *No. 1 Berth* | in. | *(East)* | *No. 2 Berth* | in. |
|---|---|---|---|---|
| BFO | 8 | | BFO | 6 |
| Solvent | 6 | | Solvent | 6 |
| BFO | 8 | | BFO | 6 |
| LRFO | 8 | | LRFO | 6 |
| Diesel | 4 | | Diesel | 4 |
| Ballast | 8 | | Ballast | 6 |
| BFO | 4 | | BFO | 4 |
| Reg-gas | 8 | | Reg-gas | 8 |
| Kero. | 4 | | Kero. | 4 |
| Diesel | 8 | | Diesel | 6 |
| Naph. | 8 | | Naph. | 6 |
| Kero. | 8 | | Kero. | 6 |
| JP–4 | 8 | | JP–4 | 6 |
| Pre-gas | 8 | | Pre-gas | 6 |

**FRESH WATER:** Every berth has fresh water supply line. Vessels requiring fresh water will request required amount of water to wharf operator. After completion of supply, ships have to sign to the form issued.

**REPAIRS:** There are no repair facilities and also repairs are not allowed on the product wharf. In the event of emergency cases, Honam Oil will assist in carrying out repairs under the supervision of refinery's safety personnel to expedite from the wharf and a quick turn around.

### (c) DRY CARGO PORT:

**PRATIQUE:** A quarantine anchorage has been designated within an area bounded by a circle having a radius of 750 yards centred at approximate lat. 34° 45′ 12″ N. long. 127° 46′ 15″ E.

**RESTRICTIONS:** Least depth in channel to Pier No. 3 is 24 ft. near the North Harbour entrance.

The South Harbour entrance has a depth exceeding 40 ft. gradually decreasing towards the head of the harbour.

**MAX. SIZE:** Alongside Pier No. 3. Max. draft 26 ft. At anchor draft up to 33 ft.

**ANCHORAGE:** Vessels can anchor as convenient in the North Harbour or in depths of $4\frac{1}{2}$–9 fathoms, mud bottom, in the sea southward of the breakwater, linking the mainland with Odong Do.

**TUGS:** Three tugs available, up to 655 h.p.

**BERTHING:**

South Harbour: used by fishing and coastal vessels only.
North Harbour: Pier No. 2 depth alongside 21 ft.
Pier No. 3 depth alongside 27 ft.

**MEDICAL:** There are Medical facilities in Yosu Town. Inoculation and vaccination can be arranged with quarantine doctor. Deratisation Certificates can be arranged. Vessels requiring emergency medical assistance should contact agent immediately.

**DENSITY:** 1025.

**FRESH WATER:** No fresh water is available for delivery to ships.

**FUEL:** Bunkers available by barge subject to advance notice being given.

**REPAIRS:** There are no repair facilities in Yosu, except for small jobs.

**CUSTOMS ALLOWANCES:** One carton cigarettes or 1 lb. of tobacco, and one bottle wine or spirits allowed, each man.

**IDENTIFICATION CARDS:** Crew required to carry valid identification cards at all times.

**REPATRIATION:** Crew changes or repatriation can be arranged.

**TIME:** Korean Standard Time, 9 hours ahead of GMT. No alterations during year.

**HOLIDAYS:** 1st January, 1st March, 5th April, 6th June, 17th July, 15th August, 3rd October, 9th October, 24th October, 25th December.

**SHORE LEAVE:** Shore leave for ship's personnel is arranged by ship's Agent and the local authorities. The nearest town is Yosu, 40 min. boat ride from the terminal, which should be arranged by the Agent. Caution: Sufficient personnel must be on board at all times for letting go lines and clear the buoy immediately.

**AUTHORITY:** Honam Oil Refinery Co. Ltd., Yosu Refinery, PO Box 7, Yosu Chollanamdo, Korea.

# Kuwait

## KHOR-el-MUFATTA: 28.39.17 N. 48.23.26 E.

**DOCUMENTS:** The only document required for this port is copy of the Cargo Manifest.
**PILOTAGE:** No pilotage available.
**ANCHORAGE:** Vessels anchor to seaward side of black and white conical shaped buoy which is situated 2 miles to the East of the Khor. Mufatta is some 55 miles by sea from the port of Kuwait. The flashing lights marked on the charts at the entrance to the Khor have been discontinued.
**HEALTH:** Before arrival vessels required pass following items to Agent (about three or four days prior to ETA). Name of vessel, Nationality, ETA, Last port of call, tonnage, quarantinable disease on board (if any) infectious disease (if any), sick persons, death, and any requirements.

ETA should be notified again 24 hours before arrival.

**RADIO:** No separate radio service for this port and all communication to Agent to be made through Kuwait Radio 9 KK.
**TUGS:** None.
**BERTHING:** Ship discharged in open roadstead.
**STEVEDORES:** Sent from Kuwait. At least 48 hours notice required.
**MEDICAL:** Facilities available only at Kuwait.
**DENSITY:** Salt water.
**FRESH WATER:** Not available.
**BUNKERS, LUBOIL ETC:** Can be arranged at Mina Abdulla. Mina-al-Ahmadi.
**FIRE PRECAUTIONS:** No equipment for fire-fighting.
**WATCHMEN:** Can be arranged through Agent.
**CERTIFICATES:** All usual documents such as Ship's Manifest, Bill of Health, Crew List, Clearance from last port, Store List, Bonded Store List, etc.
**CUSTOMS ALLOWANCE:** (Tobacco) No restrictions. (Wine and/or Spirits) Alcoholic beverage strictly prohibited to be held out of bond. Master allowed keep limited quantity in cabin.
**CARGO GEAR:** Ship's gear used for discharging.
**IDENTIFICATION CARDS:** Not needed.
**REPAIRS:** None.
**REPATRIATION:** Can be arranged via Kuwait.

Seamen arriving Kuwait Airport to join vessels at Partitioned Zone ports can obtain transit visa at airport, if Agents arrange to submit necessary guarantee to Immigration Authorities confirming that they are in transit and joining vessels calling at Kuwait and/or Partitioned Zone. In order to meet the crew at airport and arrange transit visa, cables confirming their arrivals and flight numbers are to be sent to Agents to reach them at least 24 hours before arrival of crew.

Marine Superintendent of Owners, or Owners' representatives and businessmen visiting Kuwait must have valid visas. Such visas can be obtained from Kuwait Government's diplomatic missions abroad.

**AIRPORT:** Kuwait Airport served by regular airlines.
**TIME:** GMT plus 3 hours.
**HOLIDAYS:** New Year's Day; Eid al Fitr; Accession to the Throne; Eid al Haj; 1st Muharram; Prophet's Birthday; Rajab.
**TELEPHONE:** Cannot be arranged on board.
**PROVISIONS:** Foodstuffs, beverages, tobaccos, etc., available from ships chandlers in Kuwait in limited kinds and quantities. Prices more expensive than town of Kuwait due to long transportation. Ships Agent should be advised by cable well in advance.
**SPECIAL SERVICES:** Swedish Welfare for Seamen, Lloyds Surveyor, Butterworth tank cleaning machines and equipment, and under-water cleaning.
**SHORE LEAVE:** Not limited.

**AGENT:** See "Shuwaikh."

## MINA ABDULLA:

**LOCATION:** Mina Abdulla bounded on South by parallel of latitude 28° 55′ N. on the East by longitude 48° 18′ E. and on North by a line joining following points:

| | | |
|---|---|---|
| (1) | 29° 01′ 45″ N. | 48° 09′ 25″ E. |
| (2) | 29° 01′ 45″ N. | 48° 10′ 06″ E. |
| (3) | 29° 02′ N. | 48° 10′ 18″ E. |
| (4) | 29° 02′ N. | 48° 18′ 00″ E. |

**FLAG:** Every merchant ship when entering or leaving port between sunrise and sunset shall fly her national flag and national flag of Kuwait and, when entering port, shall fly her signal letters. All vessels required to fly Kuwait flag on foremast during day-light hours. Flags may be obtained from Agent.
**APPROACHES:** Two oil-loading berths supplied by three pipelines are situated here. A number of large tanks define tank farm area. A refinery stands to South-west of tank farm. The flare is conspicuous. Other conspicuous objects in area are the radio tower, Mosque Minaret and the four leading beacons for two berths. These are lit for night berthing by three white lights on each beacon in the form of triangles, the beacon lights for Berth No. 1 are occulting every 5 seconds, the lights of No. 2 Berth are fixed.

When a vessel is ready to enter at the same time as another vessel is ready to leave the port, the outgoing vessel shall have priority over the incoming vessel, subject always to the provisions of the International Regulations for Preventing Collisions at Sea and to the requirements of safe navigation.

**DOCUMENTS:** Before leaving Kuwait the Master shall be responsible for obtaining a Port Clearance Certificate. The documents necessary for vessels to enter and leave Mina Abdulla are:

*Enter*
Ship's Manifest.
Bill of Health.
Crew List.
Clearance from Last Port.
Light Dues Certificate.
*Clear*
Register.
Load Line Certificate.
Radio Certificate.
Safety Certificate.
Last Port Clearance.

Masters and Agents of vessels shall, when called upon by a Customs Officer or Marine Officer, produce any documents relative to the landing or shipment of their vessel's cargo in the port. The Master or his representative is required to hand to the Company a written Notice of Readiness to load.

Discharging certificates of oil cargo loaded from Kuwait and Partitioned Zone ports are to be sent to vessels' local Agents immediately duly attested by the Customs Authorities and Arab Consulate covering full quantity as per Bill of Lading.

If a vessel, which has not submitted the certificate for the previous voyage, calls for the second time, she will be allowed to load and sail only after paying a cash deposit of KD 2,000.

In order to avoid delay in berthing, loading and outward clearance for vessels, all owners must give instructions to Agents at discharging ports to forward relevant cargo discharge certificates to Agents at loading ports without delay.

**PILOTAGE:** Mooring Master normally meets vessels within one-and-a-half-miles of terminal sea berths and will act as Pilot and as Company's Representative and remain on board during vessel's stay in port. Vessels requested to have pilot ladder of an approved pattern, safely and securely rigged, ready for immediate use, and long enough to reach Mooring Master's launch. When it is necessary for a vessel to anchor before being berthed she should do so in the recommended anchorage area. Two 45 ft. tugs painted blue with white superstructure assist berthing by running mooring lines to stern buoys. The pilot boat has a blue hull and white superstructure and is radar equipped. The name "Independent" is on each bow and stern.

Vessels with a Mooring Master on board shall display International Code Flag "H" in a prominent position whilst manoeuvring under his advice, and shall, if so instructed by Mooring Master, display a flag indicating berth to which vessel is proceeding.

**ANCHORAGES:** Vessels requiring anchor for any reason in port limits should do so within area enclosed between positions:

| | |
|---|---|
| 29° 02′ N. | 48° 14·3′ E. |
| 29° 02′ N. | 48° 15·1′ E. |
| 29° 01·2′ N. | 48° 15·1′ E. |
| 29° 01·2′ N. | 48° 14·1′ E. |

or within reasonable proximity to the East if congestion arises in anchorage area.

All vessels and craft within the port shall be navigated with care and caution at a speed and in a manner which shall not endanger the safety of other vessels or craft. In particular, special care and caution is to be observed in passing vessels or craft of the following category: weight-lifting or deeply-laden craft, vessels which are mooring or moored at terminal buoys, vessels or craft in tow and vessels or craft engaged on diving, dredging, grabbing, pile-driving or construction work, survey operations or the removal of obstructions.

All vessels within the port shall anchor, or moor and unmoor, when and where required by the Marine Officer, and shall be moved from place to place as required and by such means or appliances as may be ordered by the Marine Officer.

Vessels or craft shall not anchor near any submarine lines within the port limits, unless engaged on work which, in the opinion of the Marine Officer, necessitates their doing so.

**MAX. SIZE:** Vessels of unlimited length can be accommodated. Approximately 90,000 dwt. tankers fully loaded up to a maximum draft of 46 ft. on arrival, calling for bunkers only, can be accommodated. Vessels in the 200,000 dwt. class can be accommodated arriving in ballast condition for loading part cargoes up to a maximum sailing draft of 51 ft. or for normal bunkering requirements when remaining in ballast.
**HEALTH:** Quarantine regulations administered by Kuwait Government's Quarantine Medical Officer. Pratique granted at anchorage or berth.

Vessels calling at Mina Abdulla are requested to send following information to "Health Minahmadi Port":

(1) Name of vessel
(2) Last port of call
(3) Health condition of crew
(4) Validity of Smallpox and Cholera Certificates
(5) Request for Free Pratique

No craft, other than one having on board the Mooring Master or Port Health Officer, may approach any vessel entering the port and no other person may board any such vessel until free pratique has been granted.

Adequate covers shall be placed over all overside discharges.

Masters shall be responsible for ensuring that no unhealthy or offensive matter is deposited from their vessels on port premises. Any such matter so deposited that is, or becomes offensive, or, in the opinion of the Port Health Officer, injurious to health, may be removed, confiscated or destroyed and the place of deposit cleaned or disinfected on the direction of the Marine Officer at the expense of the Master responsible.

Any vessel, having on board offensive goods, or goods which, in the opinion of the Port Health Officer, are injurious to health, may be ordered to leave the port by the Marine Officer.

No ashes, refuse or other objectionable matter shall be thrown overboard from any vessel either on to any premises or into any waters of the port.

**TIDE:** The maximum tidal range is 10 ft. 6 in. and velocity of tide is from ½ to 2 knots.

**DENSITY:** Water density is 1025 oz.

**MOORING:** Mooring Masters may decline to moor any vessel if in his opinion it is not equipped with satisfactory mooring facilities, lines and gear, etc.

Vessels shall provide such tackle as may be required for loading or discharging cargo.

Vessels berthed at sea terminals shall provide not less than six good quality mooring ropes and/or wire hawsers aft, each not less than 120 fathoms in length. An eye shall be spliced in ends of ropes to secure lines to pelican hooks on buoys. Two insurance wires are provided in each berth. Ships must have both anchors ready for immediate use each with minimum of chain as follows:

Below 10,000 dwt, 8 shackles. Between: dwt. 10,000–20,000, 9 shackles; 20,000–30,000, 10 shackles. Above: dwt. 30,000, 11 shackles; 40,000, 12 shackles. Above 60,000, 13 shackles; and above 80,000, 16 shackles. The term shackles is to be interpreted as a length of 15 fathoms. Masters shall be responsible for seeing that a strict watch is kept on their vessel's moorings to prevent ranging.

**BALLAST:** As soon as practicable after arrival, all vessel's tanks will be inspected for evidence of oil in ballast. During discharge of ballast, similar inspections will continue. If evidence of oil appears at any of these inspections, the ship must return at once to a point not less than 100 miles from the coastline and there completely discharge all oily or dirty ballast.

Masters will be required to sign a declaration certifying that any water ballast intended for discharge from vessel is clean and free from oil. Arrangements are being made by the Company for dirty ballast disposal facilities to be supplied in the future, if and when required, by vessels in this port.

**POLLUTION:** Cases of discharging dirty ballast or oil spillages will be investigated and vessels are liable to fines and/or detention. Vessels shall not discharge into the water of the port any part of the content of their cargo, slop, or ballast tanks or bilges which is liable to pollute these waters. Masters shall ensure that pipe-line and equipment are clean before using them for discharging anything into the water of the port. Scuppers shall be plugged effectively and no leakage or spillage of petroleum on board shall be allowed to leak or be swept overboard.

The State of Kuwait has stringent laws in force concerning the pollution of the sea by oil. The following are two amended paragraphs of this law:

*Paragraph 1, Art.* 4. "A person responsible for any pollution as described in Articles 1 and 2 shall be punished by a fine of not less than one thousand and five hundred and not more than six thousand Dinars. In the event of his committing a similar crime within a period of one year from the date of his conviction, such a person shall be punished by a fine of not less than three thousand and not more than six thousand Kuwaiti Dinars, and in the event of his committing yet another crime within a year from this last conviction he shall be punished by a fine of six thousand Kuwaiti Dinars."

*Paragraph 3, Art. 6.* "The person responsible for pollution may suspend the detention order against the ship on payment, as a cash guarantee, of six thousand Kuwaiti Dinars to the official entrusted with the execution of such order."

**BERTHING:** Master shall, before berthing, advise Marine Officer of any special damage or disability to the vessel. No. 1 Berth lat 29° 01′ 16″ N. Long. 48° 11′ 52″ E. approximately, situated about 2 miles offshore in 43 ft. water LWOST over sand and coral with fair holding ground. A spar-buoy painted yellow with black bands marks end of submerged steel pipe-lines. A common bunker line to the berths, off-branches approximately 1,000 ft. South of Berth No. 1 and runs in to meet the direct line from shore to this berth. Ends of attached loading hoses marked by can-buoys on either side of the Spar. Four mooring buoys in Berth No. 1 and five in Berth No. 2 painted red and silver located in an arc, 1–2 cables approximately E.S.E. through South of S.S.W. from spar-buoys for vessel's stern moorings. Ship's anchors only are used forward No. 2 Berth (situated approximately half a cable South and nine cables East of Berth No. 1); Lat. 29° 01′ 0″ N. Long. 48° 12′ 51″ E. approximately. Depth of water in Berth No. 2 is 56 ft. LWOST over mud and clay which is excellent holding ground.

**LOADING:** Terminal has facilities to load at maximum rate of 1,500 tons per hour in Berth No. 1 and 2,800 tons per hour in Berth No. 2, but this loading rate can be achieved only when vessel is furnished with appropriate equipment.

*Caution:* The incoming oil stream is pumped from shore and it is extremely dangerous to close a ship's valve against the incoming oil stream. Such a procedure creates an excessive pressure, which may damage submarine lines, ship's pipe-lines or the terminal facilities. Vessels will be held liable for damages resulting from failure to observe this precaution.

Raising, connecting, disconnecting and lowering of submarine hoses will be performed by shore crew as advised by Mooring Master who will remain on board while ship is mooring, loading or discharging and unmooring. Vessels will provide winch drivers and remove such manifold blanking flanges and fit reducing pieces as required.

Deck hose connections from submarine lines as follows:

*Cargo:* 10 in. ID, working pressure 150 PSI, fitted with 150# ASA steel flanges. Bunker flanges 8 in. ID, working pressure 150 PSI fitted with 150# ASA steel flanges.

Loading and discharging of petroleum vessels shall not be undertaken without permission of Marine Officer.

Loading and discharging of petroleum vessels shall not commence until:

(1) Master or Chief Officer has certified to Marine Officer that all necessary valves are open and that vessel is in proper condition to receive or dischage cargo.

(2) Master or Chief Officer has certified to Marine Officer that all ship's sea valves are closed or blankflanged except those required for water circulation purposes, and that these regulations are being and will be observed.

(3) Ship's tanks have been inspected by an authorised inspector and passed as suitable for loading.

Throughout period of loading and discharging operations, following conditions shall be observed:

(1) A responsible ship's officer shall be on watch on board at a point near tanks which are receiving oil during process of loading. The company's staff have received instructions to stop loading immediately whenever this rule is disregarded.

(2) A capable member of ship's crew shall be stationed by ship's tank valves which are receiving oil during loading.

(3) All pipe-lines and hoses shall, while rigged for loading or discharging petroleum, be directly and continuously earthed and kept constantly under supervision.

(4) No petroleum shall be allowed to escape or overflow.

(5) The following signals will be observed, as well as the radio communications, between ship and shore:

| *Signal Flag*<br>*by Day* | *Starting* | *Light Signal*<br>*by Night* |
|---|---|---|
| 1 Red Flag | Slow Speed | 1 Red Light |
| 2 Red Flags | Full Speed | 2 Red Lights |
| | *Stopping* | |
| 1 Red Flag | Slow Speed | 1 Red Light |
| All Flags Down | Stop | No Lights |

(6) When normal ship-to-shore communication fails, the emergency signal to stop the oil flow will be a continuous blast on the ship's whistle until the oil ceases to flow. Steam or air should never be shut off from whistle during loading. When practical, means should be provided for blowing the whistle from the after section of the cat walk. Whenever an Emergency Whistle Signal is used, all loading operations in the berths will be shut down until normal communication is restored. For this reason it is requested that ships in the area refrain from using ship's whistle for other than essential purposes.

*Load Lines:* Masters are warned that their load lines are subject to scrutiny by the port officer from Mina-al-Ahmadi on completion of loading or bunkering. It is in their own interest therefore, to observe the regulations, as vessels are liable to be delayed and have to pump ashore or be fined if overloaded, and Port Clearance withheld.

**RADIO:** Master shall inform Marine Aminoil at least 72, 48 and [illegible] hours notice of time of arrival via Kuwait Government Coastal Radio Station, call sign "9KK".

**MEDICAL:** Patients will in normal course of events be treated by Quarantine Medical Officer on board. Neither medical nor hospital facilities are provided by the Company. However, in cases of emergency those requiring urgent hospitalisation may be taken by vessel's Agent.

**FUEL:** Fuel oil bunkers can be loaded in either berth at a maximum rate of 500 tons/hour, thus raising the maximum loading rate of either berth by 500 tons per hour for fuel oil cargoes only.

**FRESH WATER:** Cannot be supplied at Mina Abdulla. In case of utmost need Agent may hire a barge with a capacity of 100 tons of fresh water from Kuwait, and send to Mina Abdulla.

**CUSTOMS:** Import of firearms and ammunition is forbidden. Under Kuwait Law No. 46, it is an offence to sell or trade liquor within the State of Kuwait. Any person convicted for selling, purchasing, giving away, accepting or acquiring in any manner, liquor or any intoxicating drinks for the purpose of trading and marketing shall be punished by a maximum 3 years imprisonment and a maximum fine of KD 300 or by only one of the two aforesaid penalties. Alcoholic beverage is strictly prohibited to be held out of bond. Master allowed to keep limited quantity in his cabin.

**CONSULS:** See "Shuwaikh". The American Consulate is situated just outside Kuwait town, some 30 miles from the terminal.

**REPAIRS:** No facilities.

**REPATRIATION:** Seamen arriving Kuwait Airport to join vessels at Kuwait ports can obtain transit visa at airport, if Agents arrange to submit necessary guarantee to Immigration Authorities confirming that they are in transit and joining vessels calling at Kuwait. In order to meet the crew at airport and arrange transit visa, cables confirming their arrivals and flight numbers are to be sent to Agents to reach them at least 24 hours before arrival of crew. Marine Superintendent of Owners, or Owners Representatives and businessmen visiting Kuwait must have valid visas. Such visas can be obtained from Kuwait Government's diplomatic missions abroad.

**AIRPORT:** Kuwait.

**TIME:** GMT plus 3 hours.

**PROVISIONS:** Aminoil does not provide any chandling facilities. Masters of vessels calling at Mina Abdulla must arrange for supplies through ship's Agent. Foodstuffs, beverages, tobaccos, etc., are available from ship chandlers in Kuwait in limited kinds and quanties. Prices a little more expensive than in Kuwait due to long transportation. Ship's Agent should be advised by cable well in advance.

**CERTIFICATES:** See "Documents". There is no organisation for dealing with Deratisation Certificate at Mina Abdulla. Agents are responsible for presentation of oil-discharging certificate to Customs authorities as guaranteed by them. All cargo discharge certificates duly attested by the Arab Consulate are to be sent to Agents directly.

**SHORE LEAVE:** At present, crews not allowed ashore at Mina Abdulla, and this rule will be strictly adhered to.

**REGULATIONS:** Main engines shall always be kept ready for immediate use. Steam pressure shall be maintained at minimum necessary to operate auxiliaries and to manoeuvre in case of need. Deck steam is to be maintained at all times.

Engine repairs which may prevent working of main engines may only be undertaken with written permission of Marine Officer.

Master shall at all times retain on board sufficient crew to work vessels.

Vessels shall have both anchors ready for immediate use on arrival and departure.

Vessels berthed at sea terminals shall not carry out engine trials without permission of Marine Officer.

Vessels berthing during hours of darkness must if available provide a portable light of an approved gas-tight pattern capable of being placed on either quarter of vessel to illuminate vessel's mooring ropes sufficiently for mooring boat.

Vessels shall provide an efficient accommodation ladder and boat rope for port authorities and, during hours of darkness, shall install adequate approved lighting for same. Failure to comply with this may lead to inward clearance being delayed by authorities, thus incurring delays to vessel.

No swimming in vicinity of vessels or from vessels in berth is allowed.

**AUTHORITY:** American Independent Oil Company, Kuwait Office: Post Box No. 69, Kuwait, Arabian Gulf. Telegrams: Aminoil Kuwait. Tel. Kuwait 84201.

**AGENTS:** See "Shuwaikh".

## MINA-AL-AHMADI

**OPERATORS:** Kuwait Oil Company Ltd.

**LOCATION:** Port of Mina-al-Ahmadi is open roadstead situated on Western shore of Arabian Gulf.

**PORT LIMITS:** From the shore at lat. 29° 02′ 50″ N. Eastward to long. 48° 09′ 42″ E. Thence in a S.E. direction to position lat. 29° 02′ 45″ N. long. 48° 09′ 47″ E. then in an easterly direction towards long. 48° 11′ 30″ E. and the Northerly limit 29° 10′ 00″ N. from the shore to 48° 11′ 30″ E.

**FLAG:** National flag of Kuwait is to be flown at foremast head during vessel's stay in port.

**NAVIGATIONAL AIDS:**

Current hydrographic information may be obtained by radio from the "Middle East Navigation Aids Service, Bahrain".

*Lights and Fog Signals*

A fog signal on the extreme South end of South Pier with characteristics of one 3-second blast every minute. Approx. position Lat. 29° 04′ 05″ N. Long. 48° 10′ 00″ E.

A fog signal situated on the North Pier with a characteristic of 2·5-second blast, 3-second silence, 2·5-second blast, 3-second silence, 2·5-second blast, 46·5-second silence, Approximate position 29° 07′ 24″ N. 48° 09′ 00″ E.

A fog signal situated on the Sea Island with a characteristic of 2×3 second blasts every 90 seconds. Approximate position 29° 06′ 48″ N. 48° 17′ 29″ E.

**DOCUMENTS:**

1. To obtain clearance inwards, following documents required by Agents:
   - (i) Ship's Register.
   - (ii) Safety Equipment Certificate.
   - (iii) Safety Radio Certificate.
   - (iv) Load Line Certificate.
   - (v) Last Port Clearance.
   - (vi) Two copies of Crew List showing names, nationalities and passport/seamen's book numbers.

Items (i) to (v) are returned to Master together with Port Clearance (valid 24 hours only) prior to sailing.

2. Customs boarding officers require following:
   - (a) One Copy of Crew List.
   - (b) Log Books covering period from last visit.
   - (c) Completed Customs Declaration Form (supplied by boarding officer).
   - (d) List of Ports visited with arrival and departure dates since last visit (form also supplied by boarding officer.)
   - (e) Completed Ballast Form (form also supplied by boarding officer).
3. Immigration officials require the following:
   - (a) Valid Passport or Seamen's Book – the latter is preferable for landing.
   - (b) Letter of Guarantee from Agents (iv above).
   - (c) Two copies of Crew Lists.
4. Early Departure Procedure. KOC Documents Section are now operating an Early Departure Procedure to cut down delays in documentation. Masters may opt to use this scheme, full details of which can be obtained from KOTC.
5. Discharge Certificates: Discharging certificates of oil cargo loaded from Kuwait and neutral zone ports are to be sent to vessels' local Agent immediately, duly attested by Customs authorities and Arab Consulate covering full quantity as per Bill of Lading.

If a vessel, which has not submitted the certificate for the previous voyage, calls for the second time, she will be allowed to load and sail only after paying a cash deposit of KD 2,000.

In order to avoid delay in berthing, loading and outward clearance for vessels, all owners must give instructions to Agent at discharging ports to forward relevant cargo discharge certificates to Agent at loading ports without delay.

**PILOTAGE:** Vessels should arrive with sufficient clean ballast for safe manoeuvring under prevailing weather conditions. Under certain conditions the Pilot, after consulting the Harbour Master, may require additional ballast to be run in before berthing.

All berthing, unberthing and manoeuvring of vessels within the port limits, restricted area and prohibited anchorage must be done under the supervision of a KOC Pilot.

It is the duty of the Master to inform the Pilot of any special conditions, difficulties, or peculiarities whatsoever pertaining to his vessel which might impose hazards in connections with the handling, mooring, unmooring, loading or discharging of the vessel.

**ANCHORAGES:** The suggested anchorages in the port of Mina-al-Ahmadi have been laid out to facilitate shipping in general. These anchorage areas are outside of the port limits and clear of the prohibited anchorage and restricted areas. Depths in the anchorages range from 10 to 15 fathoms, the seabed is of sand and soft coral with mud patches and affords good holding ground.

Incoming vessels are assigned berths by the Harbour Master in accordance with time of arrival, type of cargo required, size of vessel and loaded draft. Endeavour is made to berth vessels on arrival and Masters will be advised prior to arrival of the pier at which they will berth. If a berth is not available, vessels will be requested to anchor in one of the three anchorages as follows:

1. To the North-east of the Sea Island and outside of the restricted area.
2. To the East of the North Pier, outside of the port limits and to the North of the prohibited anchorage.
3. To the East of the South Pier, outside of the port limits and between the Southern limit of the prohibited anchorage and the Northern port limit of Shuaiba Port.

To the East of the port limits exists a prohibited anchorage and a restricted area which embraces the Sea Island and submarine-feeder pipe-lines.

Positions of these areas are:

| | | | |
|---|---|---|---|
| Prohibited anchorage | 29° 05′ 00″ N.<br>48° 11′ 30″ E.<br>29° 07′ 00″ N.<br>48° 11′ 30″ E. | to | 29° 05′ 00″ N.<br>48° 15′ 00″ E.<br>29° 07′ 00″ N.<br>48° 15′ 00″ E. |
| Restricted area | 29° 05′ 00″ N.<br>48° 15′ 00″ E.<br>29° 09′ 00″ N.<br>48° 15′ 00″ E. | to | 29° 05′ 00″ N.<br>48° 20′ 00″ E.<br>29° 09′ 00″ N.<br>48° 20′ 00″ E. |

**HEALTH:**

Vessels calling at Mina-al-Ahmadi are requested to radio the following information to "Health Minahmadi Port":

(1) Name of vessel
(2) Last port of call
(3) Health condition of crew
(4) Validity of Smallpox and Cholera Certificates
(5) Request for Free Pratique

Free pratique will be considered at the discretion of the Quarantine Officer, and vessels must hoist the yellow flag unless they are informed by Agent or Harbour Control that free pratique has been granted.

*Regulations.*

- (i) All vessels must exhibit quarantine signals until quarantine formalities are completed or free pratique granted. By day, International Code Flag "Q"; by night, red light over white light. No person other than the Pilot is allowed to board any vessel either alongside pier or at anchorage until pratique has been granted.
- (ii) Valid smallpox Vaccination Certificates for all crew members and passengers are required. Valid Cholera Certificates will be required from travellers coming from infected areas with the exception of children under one year.
- (iii) Ratguards must be fitted to all moorings – this is being rigidly enforced.
- (iv) Maritime Declaration of Health Form (supplied by boarding quarantine officer) to be completed.
- (v) One copy of Crew List containing dates of vaccination and inoculation is required.
- (vi) International Certificates of Vaccination and Inoculation to be available for inspection if required.
- (vii) Details of air-conditioning available in vessel (form supplied by boarding officer).
- (viii) A valid Deratisation Certificate must be produced. Facilities are available locally for renewal.

**RADIO:**

1. *Station:* All radio communications to the Company should be quoted in Greenwich Mean Time and should be routed through Kuwait Coast Station 9KK, details of which are given below:

412G Al Kuwait (9KK) 29° 10′ 09″ N. 47° 45′ 42″ E.

| *Frequency* | | | *Hours* |
|---|---|---|---|
| (9KK) 430,* 450, 500 | A1, A2 | 2 kW. | 0300–2100 |
| (9KK2) 4,287 | A1 | 0·75 kW. | On request |
| (9KK3) 6,370 | A1 | 0·75 kW. | On request |
| (9KK4) 8,525 | A1 | 0·75 kW. | 0300–2100 |
| (9KK5) 12,895 | A1 | 0·75 kW. | 0300–2100 |
| 2,182, 2,200, 2,750 | A3 | 0·1 kW. | 0300–2100 |

* On request.

Procedure: Transmits traffic lists on 450 kc/s. each even hour; 8,525 and 12,895 kc/s. each odd hour plus 35, listens for 30 mins. thereafter: 2,750 kc/s. each odd hour plus 05.

2. *ETA:* 96 hours before arrival Masters should transmit to Kuoco through Al Kuwait Radio (9KK) the following information required by Kuwait Oil Company.

1. ETA.
2. Cargo and Bunkers required.
3. Notice of any repairs which may immobilise vessel.
4. Any special requirements regarding cargo documents.
5. Max. loading rate and ballast discharge time, special loading instructions if any.

The ETA should be confirmed 24 hours before arrival. The Master should also provide Agent with following information prior to arrival:

1. ETA.
2. Last port of call.
3. Any sickness on board.
4. Number of crew members unprotected against smallpox.
5. Number of crew to see doctor or dentist.
6. All requirements – provisions, supplies, lubricating oils, repairs, stores, machinery for landing, crew repatriation, etc.

3. *Radio Beacon:* A low power radio beacon call sign "9KU" frequency 312·6 kc/s. is situated at Lat. 29° 04′ 13·4″ N. Long. 48° 08′ 27·5″ E. Code transmissions are repeated every 20 minutes commencing on the hour throughout the 24 hours as follows: 9KU repeated 3 times for a period of 20 seconds followed by a dash for 20 seconds alternatively for a whole period of two minutes.

**VHF:** A short range VHF radio telephone Port Control system is in operation and continuous watch is maintained on International Channel 16. Port Working Channels are:

| *Channel* | *Function* |
|---|---|
| 11 | General Port Working |
| 12 | Pilot and Tugs North/South Pier/Sea Island |
| 13 | Sea Island Loading |
| 14 | Pilot and Tugs North/South Pier/Sea Island |
| 26 | Public Correspondence |
| 27 | ,, ,, |

Vessels bound for Mina-al-Ahmadi should contact Port Control calling "Mina South Pier signal" on Channel 16 a few hours before arrival.

N.B. As Channel 16 is reserved for Calling, Safety and Emergency, vessels should refrain from using this channel unnecessarily.

**NOTICE OF READINESS:** (*a*) *Vessels Berthing Direct from Sea:* The vessel will be advised by VHF or signal lamp. "Berthing on arrival" and the "Notice of readiness time" will be taken as the time the Pilot boards the vessel.

(*b*) *Vessels Anchoring and Awaiting Berth:* When a berth is not available, or in the absence of any communication from the shore the time of NOR is taken as the time the vessel anchors in the roads. Time of anchoring, together with position relative to South Pier Control, should be advised to the Harbour Master by VHF or through 9KK as soon as possible. All vessels at anchor are required to be ready to berth on receipt of one hour's notice from the shore; this notice will be given by VHF or lamp and vessels should ensure an efficient watch is maintained to receive this notice.

(*c*) *Cancellation of NOR:* If after receiving one hour's notice a vessel is not ready to berth when Pilot boards, at the expiry of that notice the original NOR will be cancelled and the Pilot withdrawn. The new NOR will be the time the vessel indicates to the shore that she has rectified the defect that originally prevented her from berthing. As vessels are normally berthed in strict order to NOR time a vessel could lose considerable time through not being ready, and Masters should ensure that delays of this nature do not occur.

**TUGS:** KOC maintain six diesel tugs for port use. Four of 1,500 h.p. with a bollard pull of 24 tons, and two of 2,500 h.p. with a bollard pull of 30 tons. Four tugs normally maintained on duty at all times. Hire charges for the services of Pilots, tugs and rope launches are covered by comprehensive port charges. Under normal operating conditions, no tug or other craft will come alongside the vessel before the Pilot boards; ship's personnel must not signal for tugs or other boats to come alongside.

**MOORINGS:** When at berth, vessels must be moored to entire satisfaction of Pilot. Vessels must be ready at all times to put out extra moorings as requested by pier personnel or dictated by weather changes.

Mina-al-Ahmadi is subject to sudden fierce squalls; winds of 70 knots have been recorded, therefore vessel's mooring lines must be checked frequently to prevent excessive movement of vessel in berth. Experience has shown that wholly synthetic moorings have too much elasticity and allow vessel to range or drift away from the berth during periods of adverse weather. Whilst these moorings are acceptable as head/stern ropes, it is felt that the ideal breast moorings should be of wire or a wire rope combination with the end being sent ashore fitted with a synthetic pennant or tail. This type of mooring provides the necessary elasticity while still being able to hold the vessel in position. All vessels moored with automatic tension winches must set the manual brakes on these winches.

**BERTHING:** Vessels can berth any time of the day and nigh Berths are allocated depending on shipping position and size vessel and the berthing position is advised by VHF. All vessels mu establish contact with Signal Station or Sea Island Control befo anchoring to ascertain position indicating the NOR time. Vesse should remain at one hour notice for berthing at all times a maintain an efficient watch on VHF.

There are two piers, 6 buoy moorings (seaberths) and a Sea Islan

*South Pier.* The South Pier is connected to the shore by an approa trestle, this trestle leaves the shore in position 29° 04′ North, 48° 09′ E and runs seaward in an 071° 26′ direction for a distance of 4,200 (1,280 m.). The "T" head is formed by the oil pier running Northwar in a 341° 26′ direction for 2,805 ft. (655 m.) and the general cargo pier running southwards in a 174° 26′ direction for 1,076 ft. (328 m The pier is a steel piled structure with a wooden deck, 24 ft. abo LWOST. The South Pier has 6 oil-loading berths, plus 2 berth which can be used for general cargo or L.P.G. loading; details these berths are as follows:

*Limiting Depths and Berth Lengths*

| *Berth* | *Depth at LWOST* | *Nominal length* |
|---|---|---|
| 1 | 48 ft. | 660 ft. |
| 2 | 47 ,, | 675 ,, |
| 3 | 47 ,, | 705,, |
| 4 | 50½ ,, | 765 ,, |
| 5 | 41½ ,, | 765 ,, |
| 6 | 43½ ,, | 705 ,, |
| 9 | 44 ,, | 615 ,, |
| 10 | 49 ,, | 1,050 ,, |

All berths except Nos. 1 and 10 are equipped with 10 in. car lines and 8 in. bunker lines. No. 1 and 10 berths are equipped loading LPG each comprising a 16 in. loading line and a 10 in. vapo return line and a 6 in. circulating line. No. 9 is only equipped bunkers and dry cargo.

*North Pier.* The North Pier is situated 3·5 nautical miles North the South Pier and connected to the shore by an approach trest which runs seaward from 29° 07′ 04″ N. 48° 08′ 10″ E. in a direction 071° for a distance of 4,754 ft. (1,449 m.); the head is formed by th oil pier which runs Northward in a direction of 341° for a distance 2,304 ft. (702 m.). The pier is a steel piled structure with a woode deck, 20 ft. above LWOST. The North Pier has 4 oil-loading berth details of which are:

*Limiting Depths and Berth Lengths*

| *Berth* | *Depth at LWOST* | *Nominal length* |
|---|---|---|
| 11 | 59 ft. | 1,008 ft. |
| 12 | 58 ,, | 1,296 ,, |
| 15 | 57 ,, | 792 ,, |
| 16 | 57 ,, | 740 ,, |

Berths 11 and 12 each have 4 × 12 in. cargo hoses, 1 × 12 in. Chiksa arm for naphtha loading and 2 × 8in. bunker hoses. Berths 15 and 1 each have a Chiksan loading unit consisting of 4 × 12 in. cargo arm and 2 × 8 in. bunker arms. To facilitate the connecting of hoses Berths 11 and 12, North Pier vessels are requested to retain sufficie ballast so that their manifold height above zero ft. tide does n exceed 60 ft.

*Sea Island Terminal.* The loading platform of this new terminal located in position 29° 06′ 48″ N. 48° 17′ 29″ E., approximately 7 miles East of the North and South Piers. This terminal is a ste piled structure in 94 ft. of water (LWOST). It consists primarily a central loading platform with control tower, six mooring and fo breasting dolphins, all interconnected by catwalks. The termina which lies in 330°–150° direction, is some 1,620 ft. in length. Th height above datum of the loading platform is 44 ft.

Control Room on this terminal is about 90 ft. above water level.

Two vessels can berth at the same time but loading is possib one at a time, and the crude oil is fed by a 48″ and heavy fuel o bunkers by a 20″ submarine pipe lines from shore. Navigation lighted buoys lettered A, B and C have been installed to mark th run of these pipelines. Other than heavy fuel oil no other bunke available. Light fuel, marine diesel are not available at the Sea Islan Terminal. Therefore vessels berthing at Sea Island requiring ligh fuel oil and marine diesel should inform Sea Island Control pri berthing to avoid any possibility of delays. Sea Island berths eac fitted with 4 × 16″ cargo lines and 2 × 12″ bunker lines.

*Sea Berths:* These berths are no longer in use and the buoys an moorings have been withdrawn.

*Manifold Loading Connection Sizes.* North Pier cargo flanges ar 12 in. and bunker flanges 8 in. standard 150#ASA. South Pier carg flanges are 10 in. and bunker flanges 8 in. standard 150#ASA. Se Island Terminal cargo flanges are 16 in. and bunker flanges 12 i standard 150#ASA.

*Reducers.* All vessels using the port of Mina-al-Ahmadi, shou be equipped with reducing spools to fit these loading connectio These fittings should be in place prior to berthing to help expedi the vessel's turn-around time.

*Slops.* A 6 in. slop-line is available on all berths on North and Sou Piers for reception of slops. For first 3 hours use of this facility free, for each additional hour or part thereof, a charge is made. Re ception of slops is necessarily slow and a vessel may be conside ably delayed in having to pump slops ashore. Vessels are therefo expected to arrive with clean ballast and Masters are asked to cert that all tanks and lines have been thoroughly washed unless "loa on top" techniques are being operated.

**CRUDE/PRODUCT LOADING RATES:** The following tab shows the crude products available at each berth and the nomin loading rates:

| Cargo | Available at berths | Nominal tons per hr. | Maximum potential |
|---|---|---|---|
| Crude Oil | Sea Island 20 and 21 | 15,000 | |
| Crude Oil | 11, 12, 15 and 16 | 7,200 | 12,000 |
| Crude Oil | 2, 4 and 5 | 3,800 | 7,000 |
| Crude Oil | 3 and 6 | 3,200 | 5,000 |
| Crude Oil | 1 and 10 | 2,800 | 2,800 |
| Heavy Fuel Oil | 11, 12, 15 and 16 | 2,000 | |
| Heavy Fuel Oil | 4, 5 and 6 | 2,700 | |
| Heavy Fuel Oil | 3 | 1,100 | |
| Heavy Fuel Oil | 1, 2, 9 and 10 | 500 | |
| Light Fuel Oil | 11, 12, 15 and 16 | 600 | |
| Light Fuel Oil | 3, 4, 5 and 6 | 1,100 | |
| Light Fuel Oil | 1, 2, 9 and 10 | 500 | |
| Admiralty FO | 3, 4, 5 and 6 | 1,200 | |
| Diesel Oil | 11, 12, 15 and 16 | 250 | |
| Diesel Oil | 1, 2, 3, 4, 5 and 6 | 500 | |
| Diesel Oil | 9 and 10 | 250 | |
| Gas Oil | 1, 3, 4, 5 and 6 | 1,500 | |
| KLD | 1, 2 and 4, 11 & 12 | 1,400 | |
| PPO | 1 and 2 | 300 | |
| KNG | 1, 2 and 4, 11 & 12 | 1,400 | |
| Bulk LPG | 1 and 10 | 1,000 | |

Note: All blended cargoes containing crude oil as one of the components can be loaded at any berth.

**FUEL:** Heavy, light and diesel fuel can be supplied on all berths except the Sea Island, where only heavy fuel is available. Approx. Specifications:

| | *API* | *Viscosity* | *Sulphur content* |
|---|---|---|---|
| Heavy Fuel | 15·2–15·8 | 2,900–3,400 | 4·0 or less |
| Light Fuel | 19·0–20·0 | 600 | 3·5 or less |
| Diesel Fuel | 35·5–36·5 | 36 | 1·5 or less |

**LUBRICATING OILS:** The stock of marine products of BP, Shell and Gulf Oil are maintained at Mina-al-Ahmadi and requests indicating the quantities are to be made in advance. All drums are to be handled during deballasting or before loading. Vessels will not be allowed to load more than 9 drums after loading unless under special circumstances and depending on shipping congestion. No bulk luboil delivery service available in Kuwait.

**DRY CARGOES:** Dry cargo vessels will either discharge into lighters in the anchorage or alongside South Pier at berths No. 9 or No. 10, subject availability of berths.

*Cargo Cranes.* Portal cranes of 5 tons capacity on berths 9 and 10, also a stiff-leg derrick with a lift of 54 tons on berth No. 10A. However, vessels are expected to have their own cargo equipment ready for use in case this gear is required.

*Explosives.* Cargo vessels carrying explosives are not allowed alongside piers.

*Barges.* Company barges available for use in discharging dangerous cargoes or other cargo in the anchorage.

*Stevedores.* Agents will arrange stevedores to work cargo whilst KOC will provide launch, barge and shore labour.

**MEDICAL:** Patients will normally be treated at State Quarantine Clinic, where doctors are on duty between 0800–1200 hours and 1500–2000 hours daily. In emergencies doctors are available any time. Patients requiring hospital treatment will be transported by Agents to either KOC hospital in Ahmadi or to State hospital in Kuwait. Dental treatment can be arranged by Agents.

**FRESH WATER:** Fresh water is not normally available except in emergency cases but in the summer it will be difficult to obtain. However, vessels must send in their requirements well in advance to ascertain possibility of supply from Shuwaikh anchorage. This will be subject to draft restrictions, deviation, delay depending on availability of suitable barges and previous port commitments to other shipping and additional port charges.

**DEEP WATER DEPARTURE CHANNEL:** A comprehensive survey was carried out to determine the route of the departure channel for the larger and deep draft vessels leaving the port of Mina-al-Ahmadi in a loaded condition. This channel is some 28 miles in length; it extends from the Sea Island Terminal to Madaira Reef and is marked by 21 light buoys and 2 light beacons, one established on Taylor Rock and the other on Madaira Reef. In addition to the above aids, Madaira Reef Light Vessel has been re-positioned further to the East and renamed Ahmadi to act as a fairway mark. Water depth in the departure channel is from 91 ft. to 100 ft. and above. Two shallow patches, one is about 9 miles from Sea Island with a minimum 91 ft. and the second is 14 miles from Sea Island with 92 ft. minimum water. Vessels which by reason of their draft are confined to this deep water channel and consequently hampered in their freedom to manoeuvre, will exhibit the following signals:

(i) *By day.* A black cylinder 4 ft. long by 2 ft. in diameter exhibited where it can best be seen.

(ii) *By night.* Four red lights vertically disposed spaced 3 ft. apart with an all round visibility of 4 miles exhibited where they can best be seen.

The exhibition of these signals in no way absolves any vessel from taking all appropriate action to avoid collision as required by the International Rules and Regulations for Preventing Collisions at Sea, but if a deep draft vessel is in doubt that an approaching vessel is not giving her sufficient room to manoeuvre she should indicate such doubt by giving at least five short and rapid blasts on her whistle.

Vessels having less draft should when able to do so give way to vessels exhibiting and sounding these signals and indicate this intention by giving one short blast followed immediately by one long blast on the whistle. Normal sound signals for vessels in sight of another should then follow.

Anchoring and fishing are forbidden within the deep water departure channel.

The departure channel is marked by the following buoys and beacons:

| Number/ letter | Type | Position | | Character | Port star-board/ middle ground | Vis. (0·85) (miles) |
|---|---|---|---|---|---|---|
| | | N/lat. | E/long. | | | |

**CUSTOMS:** Customs officials will board vessels to inspect log books to ascertain violation of Israeli Boycott Rules and seal the liquor bond during stay in berth. An accurate list of alcoholic drinks in *Bonded Store* only is to be presented to the officials sealing the bond and the seal is not to be broken until vessel leaves the port.

(i) Personal effects mainly required for personal use and not for re-sale or purpose of commercial gain are allowed free of duty. However, all other goods are subject to a 4% ad valorem duty (CIF value). Suppliers invoices and Certificate of Origin are required for clearance.

(ii) Importation and the sale of alcoholic beverages is strictly prohibited.

(iii) All goods for landing from tankers must be declared to boarding Customs Officer and necessary documentation completed.

(iv) Israeli goods, goods made by companies having interest or branches in Israel, Israeli vessels and vessels trading with Israel are boycotted and not allowed entry into Kuwait.

**IMMIGRATION:**

(i) Nationals of all friendly countries normally allowed to land. Israelis forbidden entry into Kuwait.

(ii) Transit visas should be obtained from Kuwait Embassies and Consulates abroad. However, in emergencies entry visas can be arranged at airport.

(iii) Transit passengers having valid connecting airline ticket to next port are allowed to land without visas up to 24 hours, extendable to 48 hours if required.

(iv) Seamen of all friendly countries normally allowed to land in transit to join vessels, without visas but on Agents guarantee. Advance information regarding names, nationalities, age, sex, etc. is required by Agents in order to facilitate reception and immigration clearance. *N.B.* Thursdays and Fridays are Company holidays.

(v) Seamen allowed to land for hospitalisation, repatriation, transfer, etc., on a written undertaking that all expenses are met by Agents on behalf of Owners.

(vi) Passports must be valid for Kuwait for citizens of all countries. Stateless persons are required to have a visa before arrival in Kuwait.

**CONSULS:** Most friendly countries maintain Embassies or Consulates in Kuwait Town.

**TIME:** Kuwait State bases local time on the 45th meridian (GMT plus 3 hours). This time is in force the whole year.

**SERVICES:** To avoid delay all vessels advised to cable Agent of all their requirements in advance, giving full details:

*Repairs*

(a) *Ship Repair.* All running repairs are undertaken through local contractors.

(b) *Radar/Radio and Electronic Equipment.* Maintenance service of this equipment is available through KOTC whose engineers/technicians are available for service on request.

*Supplies.* Supply of chemicals, paints, spare parts and provisions are available through local Agents.

*Laundry.* Laundry service is available on advance notice.

*Oil Inspection.* E. W. Saybolt & Co. maintain an independent inspection service.

*Seamen Centre.* This service is now centred only on South Pier, open to visiting seamen from 0700–2200 hours daily. Film exchange facilities are available at the South Pier.

*Classification Societies.* Lloyds Register of Shipping has a Resident Surveyor in Kuwait and maintains an office with Kuwait Maritime & Mercantile Co., who attend marine and non-marine work. Other societies have non-exclusive surveyors and their services can be obtained through KOTC.

*Divers.* Divers services are available, including underwater hull cleaning service, through KOTC.

**SHORE LEAVE:** Ship's personnel and passengers not permitted ashore for any purpose whatsoever until pratique granted. All shore leave is contingent upon compliance with quarantine regulations and, under limited conditions and hours, shore leave may be granted. Masters should consult Agents to obtain the necessary passes.

**REGULATIONS:**

(*a*) *Local laws.* The laws of Kuwait are in force at the port of Mina-al-Ahmadi. Masters and crew members are advised for their own protection to abide by them. Comprehensive regulations governing the use of the port are promulgated in Law No. 21 of 1961. Masters of visiting vessels should acquaint themselves with this law.

(*b*) *Pollution.* The State of Kuwait has stringent laws in force concerning the pollution of the sea by oil. The following are two amended paragraphs of this law:

Paragraph 1, Art. 4. "A person responsible for any pollution as described in Articles 1 and 2 shall be punished by a fine of not less than one thousand and five hundred and not more than six thousand Dinars. In the event of his committing a similar crime within a period of one year from the date of his conviction, such a person shall be punished by a fine of not less than three thousand and not more than six thousand Kuwaiti Dinars, and in the event of his committing yet another crime within a year from this last conviction he shall be punished by a fine of six thousand Kuwaiti Dinars".

Paragraph 3, Art. 6. "The person responsible for pollution may suspend the detention order against the ship on payment, as a cash guarantee, of six thousand Kuwaiti Dinars to the official entrusted with the execution of such order."

(*c*) *Certificates.* All vessels must comply with International Safety Regulations and ensure that ship's certificates, i.e. Safety Radio, Safety Equipment and Load Line are valid. Facilities are available for renewal or extension providing proper notice is given. At least 48 hours should be allowed *excluding* Thursday, Fridays or other local holidays.

(d) Load Line Regulations are strictly enforced, vessels overloaded will not be allowed to sail and subject to lengthy delay awaiting suitable facilities for pumping ashore. No facilities for pumping cargo ashore from Sea Island are available.

(e) A Cargo Discharge Certificate for cargo loaded from Kuwait each voyage is to be presented to the Customs and Ports in Kuwait through the agents within 4 months from sailing and these certificates are to be signed and stamped by local Customs officials and authenticated by an Arab Embassy or Consulate in the country of discharge.

**PORT TAX:** New tax introduced by the State of Kuwait at the rate of 45.25 fils (KD. 0.4525) calculated on ship's grt, and outward clearance is subject to payment of their dues before departure.

Declaration of grt. and nrt. details essential to avoid overcharge.

*Early Departure Procedure:*

EDP Cargo Documentation System is offered to all ships. Those vessels not accepting this system of documentation are unberthed to anchorage to await documentation and therefore subject to delay in sailing until documents are ready and delivered on board by launch. Weather conditions may prolong such delays on occasions.

**AGENT:** For all tankers loading/discharging or sundry errands on a sole agency basis. Address: Kuwait Oil Tanker S.A.K. (Agency Branch), P.O. Box Fahaheel No. 7055, Kuwait. Telex: 4201, 4202. A/B MINATANK KWT. Tel. 911753/5; 911758/9; 911811. Cables: "Minatank Kuwait."

KOTC Agency is also connected with direct short range telephone VHF system and continuous watch is maintained on Channel 16. Working channels are and can be reached by calling "Minatank". Channel 16, calling only. Channel 26, Agency working. Channel 27, Agency working.

## MINA SAUD: 28.45 N. 48.24E (See Plan)

**LOCATION:** Mina Saud located just South of Ras Az Zaur approximately 24 miles 244° from Madaira Light Vessel. Terminal connected to field and production centre at Wafra, 31 miles to NW, by 16-in, and 10-in. oil pipe-lines, and 8-in. gas line.

The most conspicuous object at the terminal is the refinery flare, in position 28° 44′ 13″ N. 48° 23′ 19″ E. Other objects conspicuous to the navigator are: Northern Radio Mast, Lat. 28° 44′ 32″ N. Long. 48° 23′ 38″ E. surmounted by a fixed red light at night; Az Zaur Beacon 28° 44′ 28″ N. 48° 23′ 40″ E. a 30 ft. high frame exhibiting flash every 5 seconds.

**OPERATORS:** Mina Saud Marine Terminal operated by Getty Oil Company (hereinafter referred to as the Company) seven days a week. Weather and other circumstances permitting, ships will be loaded, moored and unmoored at all hours of the day. Company representatives available at all times to discuss with Master any problems affecting vessel turnaround.

**FLAG:** All vessels required to fly Kuwait flag at foremast during daylight hours. Flags may be obtained from Agents.

**APPROACHES:** Vessels on passage direct to Mina Saud up Gulf should pass about one mile South of Madaira Reef light-vessel, thence make good a course of 242° to an anchorage off Mina Sau 9 fathoms.

**DOCUMENTS:**

Ship's Manifest.
Bill of Health.
Crew List.
Clearance from Last Port.
Passengers Manifest, if any.
Store List.
Bonded Store List.

Agents are responsible for presentation of oil discharging cer cate to Customs authorities as guaranteed by them. All cargo d charge certificates duly attested by Arab Consulate to be sent to Agents directly.

Cargo documentation carried out by Terminal. Masters will grea assist Terminal Staff by prompt provision of ship's tank ullages completion of loading.

**PILOTAGE:** Vessels boarded by Mooring Master either on a proach or at anchorage. Mooring Masters are Licensed Maste Foreign Going. They act in an advisory capacity to Master and ha expert knowledge of local conditions.

Mooring Master will pilot the vessel into the berth, supervise mooring and unmooring, and advise Master with respect connecting and disconnecting submarine hose. A ship's de officer must be on the bridge at all times while ship is manoeuvrin and deck officer must direct ship's crew in all hose handling. Duri loading operations Mooring Master will act as Company's represe tative.

**ANCHORAGE:** Centre of anchorage area recommended is position 090° from Flare 4·3 miles, which has good holding grou with mud and sand bottom.

Prohibited anchorage area defined as follows: beginning refinery flare 060° 3.5′ thence 180° 1.75′ thence 270° 3.0′ to refine flare.

**WEATHER:** In summer months of June, July and August light moderate Northerly and North-westerly winds are general rule Mina Saud. Occasional strong N.W. winds of force 5/6 Beaufo scale. Strength and duration governed by strength of S.W. monsoo blowing outside Gulf.

During autumn and early winter months fine weather is genera experienced associated with moderate N.E. monsoon prevailin outside Gulf. Occasional 'Shamals' (N.W. winds) occur.

In late winter period and spring, strong S.E. winds with moderate heavy seas frequently experienced at Mina Saud. These are due approach of low pressure systems from Atlantic and Mediterrane Sea spreading Eastwards across Levant and Iraq.

**TIDES:** Tide cycle is combination of diurnal and semi-diurnal tide giving a higher High, Lower High, Higher Low and Lower Low wate during a 24 hour period.

Range of tide is average 9 feet at Springs and 5 feet at Neaps.

Commencement of ebb stream (direction 190°) after Higher Hi water may be taken as 1 hour and 20 minutes before predicted time Higher High water at Mina-al-Ahmadi published in Admiralty Tid Tables. Chart datum and zero of Predictions at Mina Al Ahmadi ha been transferred to Mina Saud Tide Gauge datum.

Main direction of flood and ebb streams 010° and 190° is extreme variable between Lower High Water and Higher Low Water perio Average direction during this period about 045°.

Tides subject to meteorological conditions and may be affected height by plus or minus 2 feet. Times of High and Low water may b considerably affected.

The Mooring Masters have access to information from the Marin Meterological Station at Mina Saud.

**MAX. SIZE:** See "Berthing".

**HEALTH:** Vessels calling at Mina Saud requested send followin information to "Health Shuaiba Port":

(1) Name of vessel
(2) Last port of call
(3) Health condition of crew
(4) Validity of Smallpox and Cholera Certificates.
(5) Request for Free Pratique.

Free pratique will be considered at the discretion of the Quara tine Officer and vessel must hoist the yellow flag unless informe by Agent or Harbour Control that free pratique has been granted

**RADIO:** W/T messages routed via Kuwait Radio, call sign 9KK o 500 kHz. Kuwait Radio transmits traffic lists on 450 kHz at 25 minute past every even hour and on 8525 kHz and 12895 kHz at 35 minute past every odd hour.

Radio-telephone service also maintained by Mina Saud Radi from 0400 to 2000 GMT on following frequencies:

Listening watch on 2182 kHz, working frequency 2582 kHz. Add tional voice communications Channels 2192, 2638 and 2738 kHz.

VHF Service maintained by Mina Saud Marine. Listening o Channel 16 (156·8 mHz) working channels 10, 13, 14 and 22. Operatin hours: 0730 to 1130 and 1300 to 1630 local time.

Masters are requested to advise ETA 72 hours before arriva Mina Saud, and to confirm this when 24 hours distant from the Po

It will assist if the following information is passed to Gettyma Mina Saud before vessel's arrival at ETA Mina Saud:

Bunker fuel and cargo requirements in long tons or U.S. barre at 60° F.

Confirmation that only clean ballast is to be discharged.

Details of any cases or suspected cases of infectious diseases o board during the last four weeks.

ETA should be confirmed 24 hours before arrival.

When berthed at Mina Saud contact with the shore is maintaine by VHF R/T portable units supplied by the Company. Both batte and mains operated sets are provided to meet all emergencies.

**TUGS:** None.

**READINESS:** Notice of Readiness will be accepted by Company within terms of Charter Party or Contract when known, otherwise during ordinary business hours, which shall be between 0700 and 1800 local time except on Fridays and Public Holidays.

Laytime to commence six hours after time of acceptance or upon commencement of loading, whichever occurs first, except that when Notice of Readiness received before 1600 local time the six hours shall be continuous, but if received after 1600 then such six hours shall be daylight hours, daylight hours for such purpose being between 0600 and 1800 local time.

If after giving Notice of Readiness, vessel delayed in getting into berth or in loading, such delay shall not count as used laytime unless delay shall be due to default of Company. On completion of loading, laytime shall cease upon disconnecting cargo hoses.

Should Company Mooring Master be handed a Notice of Readiness out of business hours and before commencement of loading he will note it as "Received" at that time, for acceptance by the Company at earliest recommencement of business hours, or at time of commencement of loading, whichever shall be first.

If Notice of Readiness given after latest accepted nominated lifting date, laytime shall not commence before commencement of loading.

**BALLAST:** Vessels must have enough clean ballast to permit safe manoeuvring under any conditions. No shore tanks for disposal of dirty ballast.

Mooring Master will advise when ballast discharge may commence. Inspection of ship's tanks for suitability to receive cargo carried out by Mooring Master or by qualified petroleum inspectors if required.

**GEAR:** For handling 12 in. and 10 in. strings of hoses ship's derrick should have a minimum safe working load of at least 5 tons. Outreach overside should be at least 5 ft.

Two lengths of 3 in. or 3.5 in. circumference good quality manilla rope each of 50 fathoms in length should be available for use as guys to lead forward and aft for north and south flexible hoses.

Reducers should be available for connection of hoses to ship's manifold and to ship's bunker line connection.

Company provides snub lines of manilla and wire rope for hanging off hoses.

In the event that ship's derrick gear is inadequate for loads required, a work barge can be made available. Charge for this barge, including positioning and personnel, is equivalent of 150 U.S. Dollars per hour (approx.).

**BERTHING:** There are two loading berths with conventional sealine mooring which are connected by a common 20 in. submarine line for cargo and a separate 12 in. submarine line for bunker fuel. Each berth has one 12 in. and 10 in. cargo hose, and 8 in. hose for bunkers.

The outer berth, 073°-2·6 miles from refinery flare, is equipped to take vessels of up to 120,000 tons dwt or larger if part loaded and has a minimum depth of 55 ft. at the lowest low water. Maximum draft allowed is 52 ft. at LLW.

The inner berths, 073°-2·0 miles from refinery flare, has a minimum depth of 44 ft. at lowest low water and can accommodate vessels up to 800 ft. in length. Maximum draft allowed is 41 ft. at LLW.

Oil cannot be pumped from ship to shore under existing arrangements.

**MOORING:** (*a*) Port is an open roadstead and ships must be prepared to use main engines, unmoor and leave at any time.

(*b*) Mooring and unmooring carried out during day or night, as required. Except mooring at Berth 1, during daylight only.

(*c*) Vessels moored to ebb tide stream at both inner and outer berths.

(*d*) At outer berth latest resilient type mooring method is employed. Resilience in mooring achieved by weight of clump anchor and catenary of chain cable. A quick release hook of 65 tons capacity connects ship's ropes to the buoy.

(*e*) Both port and starboard anchors should be lowered clear of hawse pipes and ready for instant letting-go from brakes.

Spar buoys established to mark starboard and port anchor dropping positions.

(*f*) Six good quality natural or synthetic ropes should be flaked ready for running from the stern. After anchoring, as vessel proceeds astern in Berth, quarter lines are run by Company launch and secured to quick release hooks on quarter buoys. 5 in. circumference steel wire rope are run to ship from mooring buoys.

(*g*) When securely moored in correct position for handling hoses, each anchor should have about 8 shackles out and it is advisable that tankers using these submarine berths be provided with not less than ten 15- fathom lengths of cable on each anchor.

(*h*) Masters requested ensure that power to deck machinery and sufficient seamen to operate it are immediately available at all times when in berth.

**LOADING:** Submarine line marked by permanent buoy at each berth, and marker buoys fitted to all hoses.

Recovery of flexible hoses is by fleeting by ship's tackle making use of beckets fitted to recovery chain.

"Ship's Stop" is invariable rule except in an emergency. Ship must give reasonable stand-by time to Mooring Master, 15 to 20 minutes, to alert Terminal staff on shore for closing gauges.

Loading rate at present averages 1,500 tons per hour. Maximum 2,000 tons per hour.

**MEDICAL:** Medical attention to ship's crew members available from Company Medical Officer. Agent must invariably arrange for landing permit for any crew member visiting doctor on shore. When Medical Officer required to attend on board, an additional fee is charged. X-ray facilities available on shore. Cost of drugs and medicines supplied by the Company is also charged to vessel concerned.

**FRESH WATER:** Not available but in emergency can be arranged from Kuwait.

**FUEL:** Bunker fuel type "C" at loading berths through 12 in. submarine line with single 8 in. flexible hose, at berth 1, and 10 in. hose at Berth 2.

**FIRE PRECAUTIONS:** Masters are responsible for enforcing "No Smoking" regulations for their vessels and Mooring Master will stop loading if he considers them to be inadequate or if they are not being obeyed. Smoking in Company craft in the berths is forbidden.

**CUSTOMS:** Alcoholic beverages strictly prohibited to be held out of bond. Master allowed to keep limited quantity in his cabin.

Liquor must not be supplied to subjects of Saudi Arabia nor to any unauthorised persons.

It is important to remind owners and Masters that all goods, either landed or embarked, must be cleared by Agent through local Kuwait Government Customs.

Import of firearms and ammunition forbidden.

**CONSULS:** See "Kuwait."

**REPAIRS:** No regular repair facilities available. However, a fully qualified diver is available from Terminal. Underwater cutting gear and welding equipment available.

Services of diver who operates this equipment available at rates to be arranged for the job and agreed by Superintendent of Marine and Terminal Operations, Mina Saud.

Repairs to main engines must not be carried out in the berth without permission of Superintendent of Marine and Terminal Operations. Normally vessels requiring to immobilise engines will be anchored well clear of other ships.

**REPATRIATION:** Crew changes normally effected through Kuwait.

Seamen arriving at Kuwait Airport to join vessels at Partitioned Zone ports can obtain transit visa at the airport, if Agents arrange to submit the necessary guarantee to the immigration authorities confirming that they are in transit and joining vessels calling at Partitioned Zone. In order to meet the crew at airport and arrange transit visa, cables confirming their arrivals and flight numbers are to be sent to Agents to reach them at least 24 hours before the arrival of the crew.

Marine Superintendent of Owners, or Owner's representatives and businessmen visiting Kuwait must have valid visas. Such visas can be obtained from Kuwait Government's diplomatic missions abroad.

**TIME:** GMT plus 3 hours. Permanent.

**STORES:** Provisions and stores are available from Kuwait. Requirements should be arranged with Agents through Kuwait Radio prior to arrival at Mina Saud.

**SHORE LEAVE:** Not permitted.

**AUTHORITY:** Getty Oil Company, Saudi Arabian Division, Mina Saud, via Dhahran, Saudi Arabia.

Kuwait Office, PO Box 187, Kuwait, Arabian Gulf. Cable Address: "Gettymar – Kuwait".

**AGENTS:** See "Shuwaikh."

Communication is by road by personal visit of agency staff. Distance about 50 miles.

## SHUAIBA: 29.02 N. 48.08 E.

All vessels should hoist the Kuwait flag.

**PORT LIMITS:** Shuaiba port limits defined as follows:

*North:* This separates port of Shuaiba and Mina-al-Ahmadi and is defined by the point of intersection of the coast line with lat. 29° 02′ 50″ N. in an Easterly direction until it intersects long. 48° 09′ 42″ E. Thence in a South-easterly direction to the intersection of lat. 29° 02′ 45″ N. and long. 48° 09′ 47″ E. Thence in an Easterly direction along lat. 29° 02′ 45″ N. seawards to long. 48° 15′ 07″ E.

*East:* Long. 48° 15′ 07″ E.

*West:* Coast line.

*South:* This separates port of Shuaiba and Mina-al-Abdullah and is defined by the point of intersection of the coast line with lat. 29° 01′ 45″ N. Extends due East till long. 48° 09′ 59″ E. and runs on 45° direction to lat. 29° 02′ 00″ N. then due East on that line until long. 48° 15′ 07″ E.

**DOCUMENTS:** 10 copies of Cargo Manifest (3 copies duly signed by Agent at loading port) and one copy each of hatch list and stowage plan. Also 2 copies of Crew List to be presented to Customs Office.

N.B. A copy of complete set of Inward Manifests and a copy of the Stowage Plan covering cargo for discharge at Shuaiba has to be passed to Authorities by Agents at least 24 hours before vessels expected time of arrival, otherwise berthing likely to be delayed.

**PILOTAGE:** Pilotage compulsory and request for Pilot should be made to Port Signals Station, or to look-out Signal Station when in use.

**ANCHORAGE:** Lat. 29° 02′ 02″ N., long. 48° 12′ 15″ E. Depth is 18·5 metres with good holding ground.

**MAX. SIZE:** See "Berthing".

**HEALTH:** Vessels calling at Shuaiba are requested to send the following information to "Health Shuaiba Port".

(1) Name of vessel
(2) Last port of call
(3) Health condition of crew
(4) Validity of Smallpox and Cholera Certificates
(5) Request for Free Pratique

Free pratique will be considered at the discretion of the Quarantine

Officer, and vessels must hoist the yellow flag unless they are informed by harbour control that free pratique has been granted.

**RADIO:** Give ETA well in advance and confirm ETA 24 hours before arrival through Kuwait Coast Station 9KK. A shore station at Shuaiba has been established and operates on following frequencies: 156·80 mc/s. PS: Channel 16, int'l and safety channel. 156·65 mc/s. PS: Channel 13, port and operations channel. 156·45 mc/s. PS: Channel 9, berthing operations channel.

**TUGS:** Three tugs available, each of 2,100 h.p.

**BERTHING:** Vessel has to give arrival time and fore and aft draft to Harbour Master. Normal official hours for berthing and departure on Saturdays through Wednesdays, count from 0700 to 1600, on Thursdays from 0700 to 1200.

The port consists of 3 main parts as follows:

*Small Craft and Barge Harbour:* Situated at the South-west direction from the Main Quay; consists of 3 berths accommodating vessels of less than 4 metres draft:

| | | |
|---|---|---|
| (i) Berth No. 1 | length | 100 m. |
| (ii) Berth No. 2 | ,, | 200 m. |
| (iii) Berth No. 3 | ,, | 175 m. |

*Main Cargo Quay Mole:* Allows berthing of ships on both sides. The Eastern side consists of two berths Nos. 4 and 5 having a total length of 350 metres. The Western side consists of three berths: Nos. 1, 2 and 3 having a total length of 500 metres.

| | | |
|---|---|---|
| Berth No. 1 | Maximum allowable draft | 9·1 m. |
| Berth No. 2 | ,, ,, ,, | 10·3 m. |
| Berth No. 3 | ,, ,, ,, | 10·3 m. |
| Berths No. 4 and 5 | ,, ,, ,, | 6·7 m. |

Usage of berths 4 and 5 is restricted to good weather conditions only.

Harbour Control Offices (Harbour Master's building) and signal station are situated at the beginning of the main quay. Meteorological Centre, Passport and Immigration Office, Customs Office and Health Office are also at the beginning of the main quay.

*Oil Pier:* Situated in deep water due East from the main quay. Oil Pier is connected with the main quay by a causeway carrying pipes of 1,000 metres length. At present it consists of an Eastern-side berth (No. 1) with a length of 300 metres allowing tankers of maximum 13·7 metres draft and a Western-side (No. 2) berth with length of 270 metres allowing tankers of maximum 12·8 metres draft.

At a distance of 40 metres from the Northern end is a newly constructed dolphin to facilitate berthing of bigger tankers without any difficulty. Work is in progress for an extension of the oil pier from the southern side with two more berths and an additional dolphin south of them.

Oil loading connections are at the middle of each berth and comprise of: 3×16 in., 2×12 in. and 1×8 in. lines. The bunker line is 8 in. and fresh water line 4 in.

**SHORE FACILITIES:** Main cargo quay mole: Berths 1, 2 and 3 are equipped with 5 travelling electric cranes of 3 and 5 tons capacity. Services of 10 ton mobile cranes are also available on the main quay. All berths are fitted with bunker lines for fuel and fresh water.

*Allocation of Berths:*

| *Berth No.* | *Allocation* |
|---|---|
| 1 | Discharging |
| 2 | Loading |
| 3 | Optional – Discharge/Load |
| 4 | Optional – Discharge/Load |
| 5 | Optional – Discharge/Load |

The allocation of an optional berth is at the solediscrection of the Harbour Master and Traffic Manager.

A vessel arriving at the port to load may berth at No. 1 and similarly a vessel wishing to discharge may berth at No. 2, but it must be clearly understood that any vessel so doing is only berthed at that berth on sufferance and will be required to vacate the berth if a vessel arrives which has a claim to it.

**STEVEDORES:** Stevedores aboard ship will be provided by ship's Agent. Labourers in barges and ashore will be provided by port of Shuaiba but under ship's responsibility for breakage, pilferage, etc. Vessels will be required to maintain a minimum daily tonnage dependent on the type of cargo they are carrying. Ships failing to achieve the average daily rate laid down will be liable for a penalty charge, for every day or part thereof, they remain on the quay over the prescribed period.

*Minimum Daily Rates.* Cement, 1,700 tons; fertiliser, 1,700 tons; charcoal, 800 tons; general cargo, 400 tons.

Shore cranes are available for ships to enable them to achieve these rates and ships Agents, importers and exporters are expected to make use of them.

No cranes over 20 tons lifting capacity available. Regarding landing of heavy lifts on quay, permission has to be obtained from the Port Authorities each time in advance. On the quay pieces up to 300 tons have been discharged.

**MEDICAL:** Advance notice required if medical attendance needed on board.

**DENSITY:** 1025.

**FRESH WATER:** All berths fitted with fresh water connections. No water barge available. Vessels can obtain water according to requirement.

**FUEL:** The Kuwait National Petroleum Co. KSC, Kuwait, supply marine fuel and diesel oil at cargo wharf and oil jetty at Shuaiba. Specifications as under:

| | *FO 1500* | *MDO* |
|---|---|---|
| Ash % wt. max. | 0, 5 | 0, 01 |
| Pour point degs. C (degs. F.) max. | 10 (50) | 2 (35) |
| Specific Gravity 60/60 degs. F. max. | 0·99 | – |
| Sulphur % wt. max. | 3·7 | 1·8 |

Bunker nomination is to be arranged through Kuwait Nation Petroleum Co. (U.K.) Ltd., 25 St. James Street, London S.W. cables: "Kunpetco", London S.W.1. Telex: 261998. At least 3 da notice required.

Facilities on main quay mole for bunker fuel, gas oil and mari diesel oil in berths 1 through 5. No barges.

**DEVELOPMENTS:** The port of Shuaiba, mainly intended t exports, will be extended by adding another finger jetty able t accommodate 3 more ocean-going vessels. This is a 5-year plan.

Construction works are in progress for the extension of the existi Oil Pier at the Port of Shuaiba.

The existing Oil Pier will be extended Southwards along its li of direction of 153°/333° for a total distance of 446 metres.

The extension will consist of a piled trestle of 108 metres in lengt which will incorporate a mooring dolphin, a piled berthing structu of 282 metres in length providing one berth on its seaward side an one berth on its landward side and a piled trestle and moorin dolphin at the southern end of 56 metres in length.

These works will be in progress throughout 1974 until completi in 1975.

**GANGWAY/DECK WATCHMEN:** Not necessary in port area.

**OPENING/CLOSING HATCHES:** Opening and closing of hatche normally carried out by stevedores on liners, and by ship's crew o charter vessels.

**CERTIFICATES:** All usual documents such as:

Ship's Manifest.
Bill of Health.
Crew List.
Clearance from Last Port.
Passenger Manifest, if any.
Store List.
Bonded Store List.
Safety Radio Certificate.
Bill of Measurements, etc.

**CUSTOMS ALLOWANCES:** Tobacco. No restrictions. Win and/or spirit. Alcoholic beverage strictly prohibited to be held ou of bond. Master allowed to keep limited quantity in his cabin.

**CARGO GEAR:** Ship's gears and shore cranes used for dischar ing; slings and pallets can be hired from the port. Shore crane capacity 3–5 tons.

**IDENTIFICATION CARDS:** Passport or seamen's book neces sary.

**CONSULS:** See "Shuwaikh".

**REPAIRS:** Small repairs can be arranged if sufficient notice i given.

**DRY DOCK:** No dry dock available.

**REPATRIATION:** Can be arranged. Entry visa regulations hav been enforced in Kuwait, and the following is roughly the procedur in respect of crew changes:

1. Seamen arriving at Kuwait Airport to join vessels at Kuwait and Partitioned Zone ports can obtain transit visa at Airport, if Agent arrange to submit necessary guarantee to Immigration authoritie confirming that they are in transit and joining vessels calling at Kuwai and/or Partitioned Zone. Order meet crew at airport and arrang transit visa, cables confirming their arrivals and flight numbers an to be sent to Agents to reach them at least 24 hours before arrival o crew.

2. Marine superintendent of owners, or owners' representative and businessmen visiting Kuwait must have valid visas. Such visas can be obtained from Kuwait Government's diplomatic missions abroad.

**TIME:** GMT plus 3 hours.

**HOLIDAYS:** New Year's Day, Eid Al Fitr, Accession to the Throne Eid Al Haj, 1st Muharram, Prophet's Birthday, Rajab. Dates are subject to alteration.

**TELEPHONES:** Telephone sockets fitted on North side of Main Quay Mole for convenience of vessels requiring a telephone on board.

**SPECIAL SERVICES:** Swedish Welfare for Seamen; Lloyd's surveyor; Butterworth Tank Cleaning Machines and Equipment; and also underwater cleaning, compass adjusting, d/f calibration and adjusting services are available through the Port Authority.

**SHORE LEAVE:** Permitted.

**PORT REGULATIONS:** Masters are required to observe the following regulations:

Fire fighting appliances to be kept in readiness for immediate use.

Pumping or discharging in any way into the sea oil fuel tanks bilges, dirty ballasts, etc., is prohibited.

Disposal of garbage over the side of the ship into the harbour is prohibited.

The presence of a Pilot on board a vessel shall not relieve the Master of his reponsibility regarding the safety of the vessel. The harbour authority shall have the right to claim against a vessel for any damage caused by that vessel to berths, shore installations tugs, buoys, etc.

The Harbour Master or his deputy may order a vessel to leave the berth at short notice in the case of emergency, bad weather, etc.

Vessels carrying explosives or dangerous cargoes must declare quantities and categories or same when they report their ETA.

Crew members are prohibited from swimming within the harbour.

Lowering into the water of ship's life-boats, launches or life-rafts is prohibited without the written approval of the Harbour Master or his deputy.

Mooring of ships' life-boats, launches or life-rafts on navigational marks and buoys is prohibited.

Due regard shall be given to the safety of divers when they are working within the harbour area. Engines should be stopped when approaching their working area at a circle of 150 metres. The launch attending divers displays the International flag letter "ABLE" during diving operations.

**AGENT:** For dry cargo vessels only: International Shipping Agency Limited, POB Safat No. 20637, KIC Building, Safat Square, Kuwait. Tel. 205 07, 269 08, 228 41. Telex: 2208 (answer back "Isaship KWT"). Cables: "Shipagent, Kuwait".

## SHUWAIKH (Kuwait Harbour): 29.21 N. 47.55 E.

**DOCUMENTS:**

*Customs:*
2 Copies of Crew List and passengers, with their nationalities.
1 copy of Store List.
1 copy of Crew Personal Property List.
Deck Log Book (if vessel calling first time, then all the log books which are available on board).
1 copy of Customs form (which will be given by Customs).

*Immigration:*
2 copies of Crew List with their nationality.
2 copies of Passenger List (if passengers on board), with their nationality.
All seamen's books or Passports.
A certificate signed by the Master, stating that there are no stowaways on board.

*Quarantine:*
1 copy of Crew List.
1 Copy of Vaccination List.
All Vaccination Books.
1 set Quarantine Forms (which will be given by Quarantine Officer).

*Port Clearance:*
Ship's Registry.
Load Line.
Safety Equipment Certificate.
Safety Radio Certificate.
Last Port Clearance.

*Port Surveyor:*
Valid Liferaft Certificate (with annual renewal and survey).

*Cargo Dept.:* The listed documents below, should be handed to the cargo Department, at least 48 hours before the ship's arrival.
6 copies of the Cargo Manifest, three copies duly signed by the Agent at loading Port.
1 copy of the Cargo Stowage Plan.
1 copy of Cargo List, in detail.
2 copies of Dangerous Cargo List.

**PILOTAGE:** Pilotage service available and request for Pilot should be made to Port Signals Station, or to look-out Signal Station when in use. Ships proceeding through the dredged channel to Shuwaikh are boarded by the Pilot in the anchorage.

**ANCHORAGE:** Vessels anchor without Pilot in position 29° 25.6′ N., 47° 59.4′ E.

**MAX. SIZE:** Max. draft at berths nos. 1 to 8, 31 ft. 6 in. (32 ft. at Spring tides), and 27 ft. at dolphins. These drafts allow 2 ft. of water under the keel. Tidal range is about 2·8 metres (9 ft.). Berthing draft dependent upon tidal conditions at time of arrival, and vessels exceeding 27 ft. have to wait for tide.

**HEALTH:** Vessels calling at Kuwait Harbour must send the following information to "Health", Shuwaikh Port:
(1) Name of vessel
(2) Last port of call
(3) Health condition crew members
(4) Validity of Smallpox and Cholera Certificates
(5) Request for Free Pratique

Free pratique will be granted at the discretion of the Quarantine Officer, and vessels must hoist the yellow flag unless they are informed by Agent or Harbour Control that free pratique is granted.

**RADIO:** Kuwait Radio call sign 9KK. ETA messages and draft (fore and aft) should be sent via Kuwait Radio simultaneously to Harbour Master Port of Kuwait, and to Agent, at least 24 hours prior arrival. The cables should be received by the port at least 12 hours prior to arrival. Should the vessel fail to give this notice, the port will only decide on her turn of berth the following morning. Thus an unnecessary delay of 24 hours might occur.

Vessels arriving at Kuwait Anchorage must not use radio telephone or VHF for calling other vessels and/or any other destination. The equipment should be used only for calling Kuwait Port Control. It is also forbidden to use radio equipment when vessel is alongside.

All ships calling at Shuwaikh port must notify the Harbour Master by VHF as soon as they enter the Kuwait territorial waters.

Communications must be made via Kuwait Coast Station (9KK), which is now situated at a new combined lookout signal station at Ras-Ajuza (lat. 29° 23.40′ N., long. 47° 59.78′ E.), which operates a 24-hour basis.

All ships arriving should establish contact with the signal station as soon as possible, either by VHF or visual signals. The service, operating on Channel 16 for calling, and on Channel 12 for working; restricted to messages relating to the movements and safety of ships. You may call Coastal Station through Kuwait Radio (RT 2182).

All ships arriving or leaving Shuwaikh port may only anchor in the specified outer anchorage, the centre of the area is lat. 29° 25.6′ N., long. 47° 59.4′ E.

Masters are advised that it is forbidden to anchor in Kuwait territorial waters, other than in cases of emergency when they should inform the signal station/Kuwait Radio of the reason for stoppage.

Whilst at anchor, a proper watch must be maintained all the time and no unauthorised craft should be allowed alongside. The signal station will report to the Coast Guard all craft seen approaching or going alongside vessels in the anchorage.

**REGISTRATION PROCEDURE** (To register turn for berth before proceeding to another port).

1. Prior to arrival Master to telegraph Harbour Master, Kuwait, stating his wish to register, stating draft fore and aft, ETA, and that all Kuwait cargo is clear to discharge.
2. If Master does not request confirmation of registration, the signal station and the port takes it for granted that vessel awaits her turn staying in the anchorage, and will usually not confirm the registration for turn.
3. On arrival Kuwait anchorage Master to contact signal station by VHF or visual signals requesting confirmation of registration.
4. The vessel should not leave until such confirmation is received. Confirmation will only be given by the signal station, which accepts registrations during 24 hours.
5. Upon receipt of confirmation the vessel can leave at once. Agents will cable via Kuwait Radio the return date given by port, that is the time the vessel should be back in Kuwait.
6. A stowage plan must be shown to the port within 24 hours after registration.

**TUGS:** Join vessel entering dredged channel. Tug's lines used. The use of tugs by ships manoeuvring within Shuwaikh port limits under direction of Harbour Master or Pilots. Number of tugs used for each movement: (*a*) Two tugs for ships exceeding 400 ft. in length. (*b*) One tug for ships between 250 ft. and 400 ft. in length.

Five tugs available, two of 750 h.p., one of 1,000 h.p. and two of 1,140 h.p. Use of tugs is compulsory.

**BERTHING:** Eight deep-water berths available, plus two dolphin berths (also see "Developments"). The Grain Silo is at berth no. 2, capacity about 150 tons per hour, berth nos. 1 to 7 are general cargo berths, and no. 8 is the passenger berth.

Berth turn is decided at a port meeting, held in the morning on all port-working days. With the exception of the dolphin berths, berthing takes place any hour, day or night.

1. Notification of vessels arrival. According to port regulations a questionnaire issued by the Harbour Master, duly filled in and signed by the Captain of the vessel, is to be submitted to the port prior to berthing. In many cases vessels arrive and obtain berth immediately and thus there is no possibility of presenting the questionnaire to Authorities in time. In order avoid berthing delays Masters should cable following information to the Harbour Master directly, 48 hours before arrival:
   (*a*) ETA.
   (*b*) Total cargo for discharging Kuwait.
   (*c*) Distribution quantity each hatch.
   (*d*) Declaration hazardous, inflammable and explosives cargo, and guns and ammunition.
   (*e*) Declaration all vessels winches in good working condition and cargo clear for discharging at Kuwait.
   (*f*) Draft fore and aft.

   We quote below specimen cable covering the above:
   "Vessel XXX ETA Kuwait 21/8 0600 local quantity discharging 1,400 tons general hatch one 300 hatch two 300 hatch three 250 hatch four 300 hatch five 250 no hazardous, inflammable explosives guns ammunition stop All winches derricks good working condition draft fore 24 ft. Aft 27 ft.".
   The above cable sent to the Harbour Master will facilitate berthing vessel on time. ETA to be reconfirmed before 24 hours, if any change.
2. Vessels with a cargo of up to 400 measurement tons will be given priority alongside pier.
3. Vessels carrying up to 500 tons weight will be given priority to discharge at the buoys providing heavy lifts do not exceed 20 tons, or vessel does not carry reefer cargo.
4. A vessel that intends to stay in the anchorage in Kuwait until her turn will be allowed to shift over-stowed cargo while waiting.
5. Liners carrying cement in bags will still be considered as liner ships. Thus they will not be taken out to wait their turn at the cement berth.

**STEVEDORES:** Aboard ship will be provided by the Agent. Labourers in barges and ashore will be provided by the Port of Kuwait but under ship's responsibility as for breakage, pilferage, etc. Small number of mobile cranes with lifting capacity up to 90 tons. However mobile cranes can only be used in port area for discharging barges alongside. Cranes are too small to be used for discharging from liner vessels and therefore, pieces over 6 tons to be discharged by vessels own gear. One floating crane of 100 tons capacity available.

Other cranes available are as follows:

| | |
|---|---|
| Berth No. 1 | One 6-ton, three 3-ton |
| Berth Nos. 2 to 5 | Four 6-ton, twelve 3-ton |
| Berth Nos. 6 and 7 | Two 6-ton, seven 3-ton |
| Berth No. 8 | One 6-ton, three 3-ton |

*Working hours:* Summer 0600–1300, 1500–2230; Winter 0700–2130.

**DISCHARGE RATES:** Allowing for stoppages, non-working periods, etc. and, considering 4 or 5 gangs employed, the average discharging rates are as follows:

| | |
|---|---|
| Tanker cargo (fuel oil) | 300 tons/hour, 7,200 tons per day. |
| Bulk cargoes (grain) | 150 tons/hour. |
| General cargo | 300–400 tons per day. |
| Cement | 1,750–2,000 tons per day. |
| Bag cargoes | 800–1,000 ,, ,, ,, |
| Steel (bundles) | 600–750 ,, ,, ,, |
| Timber (soft wood) | 500 tons per day. |
| ,, (Teak wood) | 400 ,, ,, ,, |

**MEDICAL:** Masters to radio prior arrival if medical attendance required on board.

**DENSITY:** Salt water.

**FRESH WATER:** Berths Nos. 1–7 have fresh water connections and water can be supplied by pipe-line.

Berth No. 8, dolphins and anchorage – fresh water to be supplied by water barge. Capacity of barges 100 and 200 tons, 48 hours notice required.

**FUEL:** No coal bunkers are available.

In addition to the full facilities afforded at Mina-al-Ahmadi and Shuwaiba, light bunker fuel oil specific gravity 0.9339 – viscosity 570 sec. (300 tons/hr.), and marine diesel oil, specific gravity 0·8448 (200 tons/hr.), can be supplied alongside the deep water berths Nos. 1 to 7, while vessels are discharging, and provided nomination for supply has been made to K.N.P.C. London Office, B.P. Trading Ltd., or Gulf Eastern Co., London.

Gas oil, specific gravity 6·83, (25 tons/hr.) will be available on the No. 6 and No. 7 berths.

Small quantities of gas oil may be supplied by tanker truck to the berths and oubrication oils are available.

**FIRE PRECAUTIONS:** Kuwait Fire Brigade is responsible for all fire fighting in port areas and a new fire station is being built at Shuwaikh to cover the new port area and port storage areas. There is also a fire station situated in Kuwait Small Boat Harbour area. A salt water main for the fighting services is laid-on at the new deep water berths at Shuwaikh. The Kuwait fire service also maintain two 90 ft. fire fighting tenders each of which is capable of pumping 5,000 gallons of water per minute from four nozzles. In addition they can pump 900 gallons of foam per minute. These modern fire-fighting units are equipped with radio, radio telephone, radar and echo sounding.

**DEVELOPMENTS:** The Western extension of the port is under construction and berths Nos. 12 and 13 are almost completed – have now been used for berthing vessels carrying cargo for discharging direct into receiver's trucks (e.g. livestock, bananas, steel, etc.).

A further ten berths are to be constructed, with depths alongside up to 33 ft. These will be dry cargo, refrigerated cargo and container cargo berths.

**GANGWAY/DECK WATCHMEN:** Available, but not necessary in port area.

**OPENING/CLOSING HATCHES:** Opening and closing of hatches is normally carried out by the stevedores on liners, and by ship's crew on charter vessels.

**CUSTOMS ALLOWANCES:** Tobacco: No restrictions. Wine and/or spirit allowance: Alcoholic beverage is strictly prohibited to be held out of bond. Master allowed to keep limited quantity in his cabin.

**CERTIFICATES:** A survey of life rafts may be carried out unless vessel's safety certificates indicate that life rafts were surveyed less than 12 months previously.

**CARGO GEAR:** Ship's gear and cranes used for discharging. Slings can be hired from the port.

**IDENTIFICATION CARDS:** Passport or seaman's book necessary.

**CONSULS:**

**TELEPHONES:** Cannot be arranged on board.

**PROVISIONS:** All kinds of food available at reasonable prices.

**SERVICES:** Swedish Welfare for Seamen. Lloyd's Surveyors Butterworth Tank Cleaning Machines and Equipments and also under water cleaning.

**SHORE LEAVE:** Permitted.

**REGULATIONS:** The State of Kuwait has stringent laws in force concerning the pollution of the sea by oil. The following are the amended paragraphs of this law:

Paragraph 1, Art. 4. "A person responsible for any pollution as described in Articles 1 and 2 shall be punished by a fine of not less than one thousand and five hundred and not more than six thousand Dinars. In the event of his committing a similar crime within a period of one year from the date of his conviction, such a person shall be punished by a fine of not less than three thousand and not more than six thousand Kuwaiti Dinars, and in the event of his committing yet another crime within a year from this last conviction he shall be punished by a fine of six thousand Kuwaiti Dinars".

Paragraph 3, Art. 6. "The person responsible for pollution may suspend the detention order against the ship on payment, as a cash guarantee, of six thousand Kuwaiti Dinars to the official entrusted with the execution of such order."

The Master shall advise the Harbour Master and/or Pilot of any special damage or disability to the ship under his command before berthing or unberthing.

A vessel in the outer anchorage receiving a Movement Order in writing, by signal or VHF, and awaiting the Pilot, shall carry:

*By day:* "G" Flag, over a black ball or shape.

*By night:* A white light over a red light.

Ships that receive instructions to berth at specified hours and not adhering to these instructions could lose their turn and be liable to pay charges for the time lost at the berth, and facilities arranged for and not used due to such delay.

Ships that receive instructions to unberth at specified hours and not adhering to these instructions, i.e. retarding the movement of incoming ship, will be liable to pay charges for time lost at the berth and the facilities for the incoming ship, and not used, due to such delay.

Ships unable to comply with the berthing or unberthing instructions should notify the Harbour Master in ample time of their inability to so do by VHF, visual signals, personally or through Agent.

A ship entering or navigating within the dredged channel or inner basin shall have at least one anchor ready for immediate use.

The Master of a ship alongside Shuwaikh wharf or dolphin berth shall ensure that:

(*a*) A safe and proper accommodation ladder to the quay is provided, adequately lit during the hours of darkness.

(*b*) A Quartermaster or watchman is stationed on deck, in charge of the ship's gangway, who shall inform the Master or the Duty Officer whenever required by the Port Authority Officials, and shall check that no authorised persons will enter the officer's or crew's accommodations.

(*c*) The crew or watchman to attend the mooring ropes and lines and shall cause their adjustment from time to time, as necessary on the rise and fall of the water.

(*d*) That no substance, matter or material is thrown overboard either into the water or on to the wharf.

(*e*) That no engine repairs are undertaken which would prevent the movement of the vessel under her own power, without first obtaining the permission of the Harbour Master.

(*f*) That all pipe discharges on that side of the ship nearest to the wharf are either adequately and properly covered to prevent their effluent falling on to the wharf, or their use discontinued while the ship remains alongside.

(*g*) It is forbidden to jettison or ballast other than clean water or pump out the bilges or oil of any description within the port limits.

(*h*) All ships loaded with petroleum or crude oil at the wharf shall have the end of a steel hawser of sufficient strength, paid out to the water edge, at the offshore bow and quarter, to enable tugs to take the vessel to place of safety with the least possible delay.

(*i*) The Master shall at all times retain on board sufficient crew to work his ship.

The Master shall not shift his vessel while alongside the wharf prior to receiving permission from the Harbour Master or Berthing Master.

The Master shall not connect water hoses to the water supply points and take water on board before receiving permission from the person in charge of water distribution.

The Master shall report to the Harbour Master or Berthing Master any incident, accident or unusual happening on board his ship.

The Master not complying with the above-stated Port Rules, shall be liable to suffer the penalties prescribed for contravention.

*Warning:* Port tugs are supplied with nylon and polypropeline hawsers, which require particular attention when securing to ship's bollards, in order that they do not slip. Extra turns than normal on the bollards are recommended.

**TIME:** GMT plus 3 hours.

**AUTHORITY:** Government of Kuwait, Ministry of Finance and Oil, Customs and Ports Affairs, P.O. Box 16, Tel. 812522/3.

**AGENT:** International Shipping Agency Limited, POB Safat No. 20637, KIC Building, Safat Square, Kuwait. Tel. 441860, 441861, 441862. AO 424807, 432663. Telex: 2208 (Answerback "ISASHIP KWT"). Cables: "Shipagent Kuwait".

## Lebanon

### BEIRUT (Beyrouth): 33.54 N. 35.30 E.

**DOCUMENTS:**
Manifests should be visaed by Lebanese Consul at ports of shipment, or at any port *en route* where there is a Lebanese Consul. If on account of non-existence of Lebanese Consul at ports of shipment or at any of these *en route* the manifests are not visaed, then such consular visa dues are collected at Beirut.

5 Copies of Cargo Manifests.
2 Store Lists.
5 Passenger Lists.
2 Lists of Cigarettes and Tobacco. (See "Customs Allowances").

**PILOTAGE:** Agent arranging Pilot via Harbour Master. Agent therefore to be kept well informed of ETA, 48 hours and 24 hours prior arrival. Pilot boat white with red funnel. Sound signals, two long and one short or via VHF to Harbour Master. Pilot boarding outside main breakwater. Assistance of Pilot outside daily normal hours, Sundays and official holidays, will be cost calculated at 100% more. Official normal working hours for pilotage station as follows: from 1st October up to 30th April, 0700 till 1700 hrs.; from 1st May up to 30th September, 0700 till 1800 hrs. For tankers outside harbour, the pilotage dues will be 100% more.

**ANCHORAGE:** In roads outside breakwater.

**RESTRICTIONS:** No particular restrictions. Pilot available between sunrise and sunset otherwise by special agreement with Pilot.

**MAX. SIZE:** Maximum draft in port 13 metres. No limitation to breadth or length.

**HEALTH:** Health authorities boarding in roads. Health form obtainable from Agent or doctor. Smallpox and yellow fever certificates for ships coming from Far East and Red Sea. Owners should check with Agents respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for crew members.

**RADIO:** Cables via Beirut Radio to and from Agent.

**VHF:** VHF over Channels 13 and 16, Frequency 156·6 and 156·7.

**TUGS:** Tugs of 1,000 h.p. joining vessel inside port when necessary. Ship's lines to be used.

**BERTHING:** If port congested priority given to vessel already registered. Passenger-tourist vessel and cargo for army have priority. Harbour capable of berthing simultaneously 24 ships and three moored on buoys, discharging into barges. All discharging is by ship's gear.

*Dock No. 1.* Surrounded by quays nos. 1, 2, 3. Depth of water varies between 3 and 8 metres. Parts of quay no. 1 and quay no. 2 with 3 metres depth of water are reserved for floating units of port company and for launches of Harbour Master and pilotage service. Slipway of 1,000 tons capacity and workshops.

*Dock No. 2.* Surrounded by quays nos. 4, 5, 6, 7, with water depths varying between 8 and 10·5 metres. On quay no. 5 berthing priority is given to passenger ships, while the other quays are for cargo vessels.

*Dock No. 3.* Surrounded by quays nos. 8, 9, 10, 11, with depths varying between 10·5 and 13 metres. All these quays can berth ships bringing general cargo. At quay no. 8 of 13 metres depth, priority of berthing is given to grain ships.

*Grain Silo.* At the present time bulk grain ships are unloaded by means of removable suction machines, which can be installed on the ships and deliver the grain to lorries for direct transport. Under construction is a 60,000 metric tons capacity silo, expected ready 1973. Ships will be unloaded by means of two gantry type suction machines, mobile on rails with a capacity of 6×100 tons per hour. An eventual extension is already designed which would increase capacity of silo to 105,000 tons.

**STEVEDORES:** Ordered by Agent. No ETA to Stevedores necessary. Working hours, 0800–1200, 1300–1600. Otherwise overtime incl. on Sundays and on official holidays.

**MEDICAL:** Master to advise Agent by cable prior to arrival if medical attendance required.

**DENSITY:** 1025.

**FRESH WATER:** The port company has equipped all quays with hydrants. Berthed ship can be supplied with water while loading and unloading. Ships moored on buoys can also be supplied with water from cistern barge. By shore installation or by barge. Delivery rate 20/25 tons per hour. Outside harbour double price per barge.

**FUEL:** Fuel, gas oil, diesel obtainable. 48 hours notice required.

**FIRE PRECAUTIONS:** Special berths for tankers. No smoking.

**DEVELOPMENTS:** Discussions about a fourth basin.

**GANGWAY/DECK WATCHMEN:** Available and recommended.

**OPENING/CLOSING HATCHES:** For liners by stevedores, otherwise per agreement.

**CUSTOMS ALLOWANCES:** (Tobacco) 40 cigarettes per crew member. Customs very strict, checking crew cabins. Regulations are as follows:

1. That the quantity of tobacco to be allowed on board vessels upon their arrival at a Lebanese port, will be fixed on the basis of two packets per crew member, passenger per day and to be calculated on a maximum period of four months, if the vessel emanates from an American, Asian or African port – not central Africa; and for two months if the vessel last port of call is in Europe, Central Africa or Mediterranean, which will be deducted from the quantity, and, on the same basis the consumption by the crew members and passengers during their trip, and this to start from the last port of call until arrival at a Lebanese port. That the number of passengers to be taken into account on a tourist vessel, will be the number of berths the vessel can accommodate and not the number of passengers actually on board. As to cargo vessels, the actual number to be accounted for will only be the crew members and the Master of the vessel.

2. In the event that it is the first call of the vessel at a Lebanese port and not aware of such regulations, and it was found onboard her an excess quantity to the actual one allowed, as indicated above, a Proces Verbal will be established for the excess quantity found and the cigarettes placed under seal. An undertaking is also to be obtained from either the Owners and/or her Agents to the effect that they will submit a certificate, within one month, to be issued by the relevant Customs Authorities of the next port of call of the vessel after a Lebanese port. While the seizure on the vessel will be lifted when a Bank Guarantee equalling the amount of fine and dues is placed, or a personal guarantee from the Agent – if solvable – and in the event that the undertaking is not fulfilled the usual penalties will be inflicted according to the Law.

3. In the event the vessel is aware of such restriction, and for one reason or another, she is carrying an excess quantity, this excess must be, as per official regulations, shown on the manifest legalised and issued at the last port of call touched by the vessel prior to Beirut. Any excess found over and above such declaration will be considered as smuggling and the law will be applied.

Wine and/or Spirits: One bottle per crew member. Captain allowed 3/4 bottles.

**CARGO GEAR:** Ship's gear to be used but mobile cranes can be hired. Shore cranes except from mobile cranes only available at quay No. 9 and 11. Floating crane of 120 tons available.

**IDENTIFICATION CARDS:** Shore pass given to each crew member. Passport and seaman's book to remain in Captain's care.

**CONSULS:** Most countries have consulates.

**REPAIRS:** Most types of repairs carried out.

**DRY DOCKS:** None except for 500/1,000 tonner.

**REPATRIATION:** Very good facilities for repatriation.

**AIRPORT:** About 10 km. distant, served by regular airlines.

**TIME:** GMT plus 2 hours. Summertime, GMT plus 3 hours.

**HOLIDAYS:**

| *Holidays* | *Date* | *Days* |
|---|---|---|
| New Year's Day | January 1 | 1 |
| Al-Adha (Kurban Bairam) | Varies | 2 |
| Ashoura | ,, | 1 |
| New Year (Islamic) | ,, | 1 |
| Arab League Day | March 22 | 1 |
| Good Friday | Varies | 1 |
| Easter Monday | ,, | 1 |
| Good Friday (Orthodox) | ,, | 1 |
| Easter Monday (Orthodox) | ,, | 1 |
| Labour Day | May 1 | 1 |
| Martyr's Day | May 6 | 1 |
| Ascension Day | Varies | 1 |
| Mohamed's Birthday | ,, | 1 |
| Assumption Day | August 15 | 1 |
| All Saints' Day | November 1 | 1 |
| Independence Day | November 22 | 1 |
| Ramadan | Varies | 2 |
| Christmas Day | December 25 | 1 |

Port closes completely: New Year's Day, Al Adha, Easter Monday, Labour Day, Independence Day, 1st day of Ramadan and Christmas Day. On other holidays, day work in port carried out against overtime payment.

**POLICE/AMBULANCE/FIRE:** Telephone numbers: Police 16, Ambulance 18, Fire 17.

**TELEPHONES:** On request by shipping agency, berthed ships can be connected to telephonic network of city.

**SERVICES:** Tank-cleaning equipment. Facilities for discharge of tank-washings, compass adjusting, laundry, etc., available.

**SHORE LEAVE:** Crew allowed onshore.

**DELAYS:** 1. Unavailability of berth or barges due congestion mainly during winter months (December to April). 2. Vessel already registered will lose turn if not back to port in time. 3. Barge ordered for bunkering might be occupied if vessel's arrival delayed.

**AGENT:** Gulf Agency Co. (Lebanon) Ltd., PO Box 4392, Beirut, Lebanon. Cable address: "Gacship". Telex 20906 (answerback "GAC" 20906 LE). Telephones, 296733, 256516 AO 307802, 281095. Office in El Arz Street, Modern Building.

## CHEKAA: 34.20 N. 35.43 E.

Port is used for cement loading and discharge of sulphates.
**ANCHORAGE:** Safe anchorage in Chekaa Bay.
**MAX. SIZE:** Draft up to 26 ft. 6 ins. (in calm weather) alongside quay. In event of swell, vessel required to leave quay and anchor in bay.
**LOAD/DISCHARGE:** 800/1,000 metric tons per 24 hours.

**AGENT:** See "Beirut".

## RAS SELAATA: 34.16 N. 35.39 E.

Port is used for discharge of sulphates and sulphuric acid.
**MAX. SIZE:** Up to 21 ft. draft (in calm weather) alongside pier which has two cranes.
**AGENT:** See "Beirut".

## SIDON: 33.30.04 N. 35.20.31 E. (See Plan)

**OPERATORS:** Trans-Arabian Pipe-line Company, Sidon Terminal. The Company transports crude oil from Saudi Arabia via pipe-lines and exports from terminal South of Sidon (Saida). Terminal operates 24 hours a day, seven days a week.
**FLAG:** All vessels required fly Lebanese Ensign on foremast during daylight hours. Lebanese flags may be obtained from ship's Agent.
**LOCATION:** Sidon Terminal is open, unsheltered roadstead, situated immediately North of Zahrani River, about 5 miles South of city of Sidon (Saida), Lebanon. It is approximately 35 miles South of Beirut, and 17 miles North of Tyre.
**DESCRIPTION:** Terminal's Tank Farm consists of 23 storage tanks situated East of terminal at 360 ft. (average) above sea level. Marine and administrative offices, a laboratory for testing stocks, three large and three small storage tanks all located within area just above sea level. An "L"-shaped pier for harbouring Company's marine craft extends approximately 1,000 ft. from shore near Southern end of berthing area.
**NAVIGATIONAL AIDS:** Terminal sea buoy approximately one mile westward of mooring berths in 98 ft. of water. Position 33° 32′ 02″ N.; 35° 19′ 16″ E. Buoy painted white and exhibits flashing white light every four seconds (flash 0·3 seconds, eclipse 3·7 seconds). Lantern 11 ft. above water and visible 8 miles. Mooring Master will board vessels within two miles to Westward of this buoy. Vessels should not enter inside restricted area described by a line joining South-west buoy and North-west buoy with terminal sea buoy unless so directed by Mooring Master.

Radio beacon tower located 1,200 ft. back from beach, South-east of moorings. Occulting red light (about 30 flashes per minute) mounted on top, elevation 184 ft. above sea level; position 33° 30′ 04″ N.; 35° 20′ 31″ E. Tower also marked with two sets fixed red lights located respectively 45 and 90 ft. below occulting red light. Radio beacon is automatic and operates on 24 hour basis on frequency of 296·5 kc/s, with "SAD" as the identifying call sign. It will signal two times over a 10-second period and then give a constant 1,000 cycle tone for 72 seconds. Tower is of cage-type construction, painted red and white. About 2½ miles South-west of terminal sea buoy and approximately 2 miles offshore is rocky shoal with approximately 32 ft. of water over it. Outside this shoal is a lighted buoy, painted red, in 51 ft. of water, showing flashing red light every 4 seconds (flash 0·3 seconds, eclipse 3·7 seconds). This buoy moored in 33° 30′ 21″ N.; 35° 18′ 04″ E. Lantern 11 ft. above water and visible 5 miles. Vessels approaching from Southward should keep offshore until radio beacon tower bears 100° true before hauling-in.

"Sailing Directions for the Mediterranean" (U.S. Navy Hydrographic Office Publication No. 154A Vol. IV) reads in part:

"*Caution:* As the coast between Saida and Tyre, 20 miles South-South-westward, is bordered in places by rocks and shoal water extending as far as one mile offshore, it should not be approached closer than 1½ miles, nor within depths of less than 16 fathoms."

Unlighted, white painted spar buoys mark North-west and South-west corners of restricted area. North-west buoy in 78 ft. of water and located approximately 33° 33′ 35″ N.; 35° 21′ 13″ E. South-west buoy in 57 ft. of water and located approximately 33° 30′ 20″ N.; 35° 19′ 36·5″ E. During darkness terminal range lights and mooring buoy marker lights may be visible. These lights are located inside the restricted area.

A conspicuous water tank (painted in black and white vertical bands) on a tower located 33° 29′ 27″ N.; 35° 21′ 10″ E., the top of which has elevation of 460 ft. above sea level. Location is seaward of centre oil storage tanks.

There are a number of smaller radio towers to North-west and South-west of beacon tower. South of terminal, at Medreco Refinery, is a conspicuous black stack located 33° 29′ 31″ N.; 35° 20′ 08″ E. A little farther North-west from this stack is a tall pipe painted aluminium with a flare on top at 33° 29′ 35″ N.; 35° 20′ 03″ E.

**DOCUMENTS:**

Health Declaration: International Health Form to be filled out by Master on arrival.
Cargo Manifest: No cargo arrival manifest required, as same usually prepared by local Agent.
Clearance: No clearance required.
Crew List: 4 copies required on arrival.
Passenger Manifest: If any passengers on board.
Store List: 2 copies.
Bonded Store List: 2 copies. Present regulations at Sidon Terminal allow each seaman to retain in his possession a maximum of 40 cigarettes or the equivalent weight of tobacco or cigars. The balance of all smoking items must be collected and carefully listed prior arrival. This list will be checked by Customs bef sealing lockers. If any discrepancies, vessel subject to a fine.

**PILOTAGE:** Vessels to be moored at Sidon will be boarded Mooring Master of Company within 2 miles to seaward of termi sea buoy. Mooring Master will advise Ship's Master on approach to berth, mooring, unmooring, connecting and disconnecting s marine hoses and in all other operations within berthing area. A manoeuvring of ships within berthing area shall be done only accordance with advice of a Tap-line Mooring Master, subject to understanding that in all cases and circumstances Master of vessel being manoeuvred shall remain solely responsible, on beh of vessel's owner, for safety and proper manoeuvring of vess Ship's Master or qualified deck officer must be on bridge at all tim while ship is manoeuvring.

Vessels must have a pilot ladder safely and securely rigged, a all vessels over 45,000 dwt. should have an accommodation lad rigged in combination with pilot ladder for safe boarding of Moori Master and Government officials. Pilot ladder should be abaft a close to accommodation ladder so that Mooring Master, after clim ing a few steps, can use accommodation ladder for remaining clim Since hoses handled on port side at Sidon, it is advisable to ladders on starboard side. If at night, adequate lighting must rigged over-side for Mooring Master to approach side of ship a climb ladder safely.

*Note:* Vessels having special rigs, such as hoisting equipment short sections of pilot ladder, are not required to rig pilot/acco modation ladders per the above.

**ANCHORAGE:** For vessels awaiting berth, good anchorage j W.S.W. of terminal sea buoy in 16 to 20 fathoms, sandy botto Vessels should under no circumstances anchor North of termi sea buoy as depths are excessive for safe anchoring.

**MAX. SIZE:** Berths Nos. 1 and 4 depths 47 ft., and berths Nos. and 3 depths approximately 67 ft. Tankers up to 150,000 dwt. approximately 55 ft. draft are considered maximum size which shou be handled during winter months at Sidon, and then only if vess meets all of below recommended requirements. Otherwise, vesse of over 100,000 dwt. should not be nominated for liftings at Sid during period November–March.

Based on previous experience, sudden and severe storms of lo duration are not expected from April through October. Vessels o 150,000 dwt. may, therefore be accommodated during this perio However, prior to acceptance of nomination of vessels over 150,0 dwt. Tapline requires advance information regarding maximu draft, vessel's equipment and location of manifold in reference distance from stern of vessel which should not exceed 450 ft. Acce tance or rejection will be made after evaluation of above data Sidon Marine personnel.

*Summary of Recommendations for Vessels over 40,000 dwt.*:

1. Capable, efficient and reliable anchor windlass(es).
2. Fifteen shots on starboard chain – thirteen shots on port cha are satisfactory.
3. Mooring wire winches, one on aft well deck, three on poop dec 200 fathoms wire on each, with adequate number of manila synthetic ropes to double up as needed.
4. Capability of lifting 16 in. hose string – 6·5 tons static weight.
5. Suitably located hang-off bitts.
6. Capability of keeping vessel in a reasonably safe ballast conditi (November–March) by permanent ballast or loading while deba lasting, or a combination of both.
7. Ship's manifold located not more than 400 ft. from stern.

**HEALTH:** Rules governing quarantine of vessels are same as fou in other ports.

**RADIO:** (*a*) *Facilities.* Tapline has own ship-to-shore radio te graph, and VHF radio telephone station at terminal. This station not open to commercial traffic. Services limited to traffic betwe Tapline and tankers within three days' sailing time from termin Messages to or from tanker agents classed as "Commercial" a must be routed via Radio Orient, a commercial radio station. call sign is ODR.

Sidon Radio, call sign ODA 3, transmits (CW) on 8502·5 kHz 0700, 1100 GMT, the traffic list; 12840 kHz at 0730, 1130 GMT, the tra list; 424 kHz for traffic upon request. Listens on 8534–8374 kHz replies and calls and on 8374 for traffic. Will listen on 8476 kHz traffic upon request; 12531–12561 kHz for replies and calls; 425, 4 468 and 480 kHz upon request. Keeps watch only between 0500–13 GMT on 500 kHz.

Radio Orient Beirut, call sign ODR, transmits (CW) on 8702 k and 13101 kHz simultaneously half-past each hour beginning at 0 until 2130 GMT, the traffic list; 524 kHz each hour beginning at 0 until 2100 GMT, the traffic list. Listens on 8534–8374 kHz and 125 12561 kHz for replies and calls each hour from half-past the ho until the hour; 500 kHz 0600 to 2200 GMT and 425, 454, 468 and 4 kHz from the hour until half-past the hour for replies and calls. Kee watch only between 0600–2200 GMT on 500 kHz.

(*b*) *Advice of Arrival* It is important that ships establish radio co tact with Tapline Station ODA3 when three days distant from Sid and maintain this contact at regular intervals until just prior arrival at the terminal. All ships should send a 72-hour ETA messa to Tapline, giving the best estimate of ship's arrival time, a stateme of bunker requirements and other relevant information. Shor notice may result in berthing delay. Further ETA messages shou be sent when vessel is 24 hours and 12 hours distant and to co any other time changes occurring in the original ETA or those su sequent thereto. The 12-hour ETA should include a stateme regarding "ship's readiness to load" on arrival, and time required discharge clean ballast after ship is moored. A further contact wh 4 hours away is desirable for exchange of weather data and moor schedule. Vessels failing to give minimum of 12 hour arrival notice may be subject to delays in acceptance.

(c) *Ship-to-Shore Communications*. Ship-to-shore communications, while ships are in moorings, will be by portable VHF radio units used by the Mooring Master only. The use of the ship's radio station (except Channels 16–14) and/or battery charging equipment is prohibited for safety reasons during cargo transfer operations.

In the event of normal ship-to-shore communications failure, the (ship's) emergency whistle signal should be used.

(d) *Radio Message*. Upon first contact with inbound tanker, ODA3 will transmit a detailed message of advice.

It is important that a reply to this message be sent soonest after receipt. Also requested that all vessels forward their local weather observations to this station while approximately 100 miles and again 50 miles Westward of Sidon when approaching and also upon departure during period November 1 to March 31. This data is used to assist in preparation of terminal weather forecasts and radio contact may be useful in event Tapline needs to furnish any information to vessel after its departure.

**VHF:** Tapline VHF radio telephone system operates on international Channels 14 and 16, 156·7 mc/s and 156·8 mc/s respectively. Channel 16 used to establish contact while all traffic handled on Channel 14. Tapline guards these channels on a 24 hour basis, and contact can generally be made at distances up to 100 miles from terminal. Conversations on these channels will be carried out in English language only.

Mooring Master only will be in direct charge of portable VHF ship-to-shore radio communications.

**BERTHING:** Five buoys in berth No. 1 and seven buoys in each of berths No. 2, 3 and 4. During winter months vessels over 40,000 dwt. usually moored in berths No. 2 or No. 3. These berths approximately 1 mile to 1½ from shore. Berths numbered 1 to 4 from South to North. Vessels moored on one heading (West) basis using both bow anchors with maximum possible spread of anchors to increase ship's anchor beam holding components. Ship's stern moored to cylindrical buoys fitted with release hooks, using seven ropes (or wires) to respective mooring buoys. Permanent moorings consist of 7 steel cylindrical buoys in each berth. (Five buoys in No. 1 berth.)

Certain mooring buoys in all berths fitted with 1½ in. diameter preventer wires, one end of which is secured to mooring buoys. When required, other end is brought on board vessel by a messenger line after ship moored in position. Preventer wires supplemental to ship's regular moorings during adverse conditions. Ships should have chain stoppers for handling these wires.

**BALLAST:** Masters are warned that no dirty ballast or bilge water may be discharged within an area extending 100 nautical miles seaward of the Lebanese coastline. All pipe-lines, sea suctions, strainers and pumps that are to be used for the discharge of clean ballast must be flushed clean prior to entering the 100 mile zone. Except for oil retrieved under "load-on-top" procedures, Masters must assure themselves that all oil tanks, pipe-lines and pumps are free of all traces of oil.

The terminal has no facilities for receiving oily ballast. A vessel must have sufficient ballast for safe manoeuvring. However, by carefully watching the weather, especially in the Summer months, by frequent interchange of weather information and berthing instructions, and, by a knowledge of the behaviour of his own vessel, a Master may desire to arrive at the terminal with minimum ballast thereby lessening any possibility of infringement of the pollution restrictions of this section, and also reducing time in berth.

As soon as practicable after arrival and prior to acceptance, all the vessel's tanks will be inspected for evidence of oil in ballast tanks. Inspection will continue during discharge of ballast. If evidence of oil appears at either of these inspections, the ship must return at once to a point not less than 100 miles from the coastline and there accomplish the necessary tank cleaning. Any vessel required to return to a position at least 100 miles offshore for the purpose of discharging dirty ballast, cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness already tendered, and at the same time loses any priority held for loading. On return from sea, vessel will be entered for loading at the time of the second arrival, when a new Notice of Readiness will be tendered.

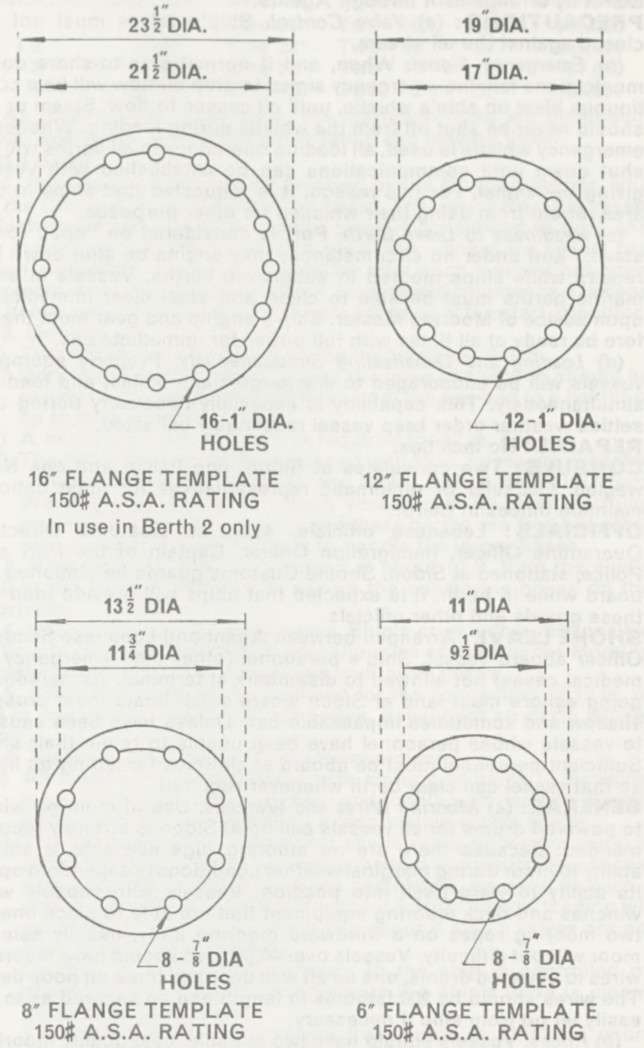
Vessels discharging dirty ballast within the prohibited 100 mile zone may be subjected to action by the Lebanese Government. In addition, ship's owners and charterers will be promptly notified of any violation.

Masters are also warned that ship's garbage or trash should not be dumped within 50 miles from the Lebanese coast.

**LOADING:** (a) *Readiness:* Tenders to load will normally be accepted and berths assigned to vessels in order of arrival, provided vessels have nominations for cargo valid at the time, carry clean ballast and in all respects equipped and ready to moor. In event berthing delayed on account weather, vessels will ordinarily keep their loading priority in order of arrival. Vessels required to leave port area on account of weather (port closed), should keep in contact with terminal via radio in order that they will be available when weather moderates. Company will make every effort to load vessels on arrival, or as promptly as berth is available, weather permitting. Notice of readiness will not be accepted unless vessel ready to load. Arrival time will be considered as time Mooring Master boards vessel underway or time vessel anchors, whichever occurs first.

(b) *Connecting-up*. Ships loaded by means of submarine pipe-lines. Weight of the 16 in. hose in No. 2 berth about 6·5 tons; weight of 12 in. hose in No. 3 berth about 5 tons; and weight of 12 in. hoses in No. 1 and No. 4 berths about 4 tons. Hoses lifted by ship's gear on port side. Detail of flange templates shown in drawings below. Ships should provide manifold fittings to allow connection of flanges shown.

DETAIL OF 16", 12", 8" & 6" HOSE CONNECTIONS FROM SUBMARINE HOSE TO SHIP



Mooring Master advises ship's personnel in lifting, connecting, disconnecting and lowering of hoses. A ship's deck officer must be present, and must direct ship's crew in all hose handling. There must be sufficient crew on deck to perform this work.

(c) *Rates:* Loading is by gravity flow from tank farm which is approximately 360 ft. above sea level. Loading rates as follows (approximate maximum):

| | *Rates (BPH* | |
|---|---|---|
| *Berth* | *With 1 Hose* | *With 2 Hoses* |
| 1 | 17,000 | 29,000 (12 in. hoses) |
| 2 | 40,000 | 70,000 (16 in. hoses) |
| 3 | 27,000 | 43,000 (12 in. hoses) |
| 4 | 25,000 | 37,000 (12 in. hoses) |

Order save ship's time and to ballast vessel as quickly as possible, as well as to make berth available for others, it is requested that ships receive oil as fast as it can be delivered, with due regard for safety. The removal of any restrictions, such as strainers, etc., is recommended.

**MEDICAL:** Neither medical nor hospital facilities provided byTapline. Private doctors and hospital facilities available at Sidon and Beirut. Agents acquainted with situation and can make necessary arrangements.

If unable make radio contact, then vessels requiring emergency medical assistance should hoist International Code Flag "W" in daylight, and at night, send "W" ( ·— — ) on blinker light to attract immediate attention, the same signal "W" ( ·— — ) should be given on ship's whistle in either day or night hours. Signal should be repeated until acknowledged visually by either another ship in berth; from shore station or from Company launch. As soon as signal is received, terminal officials will advise ship's Agent as soon as possible of the emergency medical aid required.

**DENSITY:** Salinity of the sea is same as open Atlantic Ocean. Temperature ranges from 60°F. to 85°F. (15·6°C to 29·4°C.) depending on season.

**FRESH WATER:** Not available.

**FUEL:** Bunker fuel loaded at rate of 3,000–5,000 bph through 8 in. deck hose. Bunker connection should be located near ship's cargo manifold. Ships calling at Sidon to load crude oil should arrange for bunker fuel nominations through one of the offtaker companies well in advance of arrival. Bunker fuel will not be delivered until Tapline has received a firm nomination. Bunker fuel will be loaded as promptly as circumstances permit, but Tapline assumes no liability for any delays incurred by a vessel in berthing or loading bunker fuel. Maritime lubricants available, through marketing representatives in Beirut by arrangement through Agents.

**PRECAUTIONS:** (a) *Valve Control.* Ship's valves must not be closed against the oil stream.

(b) *Emergency Signal.* When, and if normal ship-to-shore communications fail, the emergency signal to stop oil flow will be a continuous blast on ship's whistle, until oil ceases to flow. Steam or air should never be shut off from the whistle during loading. Whenever emergency whistle is used, all loading operations in all berths will be shut down until communications can be established with vessel giving the signal. For this reason, it is requested that ships in the area refrain from using their whistles for other purposes.

(c) *Readiness to Leave Berth.* Port is considered an "open roadstead," and under no circumstances may engine be shut down for repairs while ships moored in submarine berths. Vessels in submarine berths must be able to clear, and shall clear immediately upon advice of Mooring Master. Ship's engine and gear must therefore be ready at all times with full power for immediate use.

(d) *Loading and Deballasting Simultaneously.* Properly equipped vessels will be encouraged to discharge clean ballast and load oil simultaneously. This capability is especially necessary during unsettled weather order keep vessel reasonably ballasted.

**REPAIRS:** No facilities.

**CONSULS:** Two consulates at Sidon, one Italian and one Norwegian. Consular or diplomatic representatives for most nations maintain offices in Beirut.

**OFFICIALS:** Lebanese officials, such as Customs Director, Quarantine Officer, Immigration Officer, Captain of the Port and Police, stationed at Sidon. Should Customs guards be stationed on board while in berth, it is expected that ships will provide food for these guards and other officials.

**SHORE LEAVE:** Arranged between Agent and Lebanese Security Officer aboard vessel. Ship's personnel (other than emergency or medical cases) not allowed to disembark at terminal. All personnel going ashore must land at Sidon where small boats must cross a shallow and sometimes impassable bar. Delays have been caused to vessels whose personnel have been unable to rejoin their ship. Sufficient personnel must be aboard at all times for letting go lines so that vessel can clear berth whenever required.

**GENERAL:** (a) *Mooring Wires and Winches.* Use of mooring wires to powered drums for all vessels calling at Sidon is strongly recommended. Because there are no mooring tugs available, a ship's ability to moor during marginal weather conditions is dependent upon its ability to warp itself into position. Vessels with capable wire winches and deck mooring equipment that are able to place one or two mooring ropes on a windward mooring buoy, usually able to moor without difficulty. Vessels over 40,000 dwt should have mooring wires to powered drums, one on aft well deck and three on poop deck. The wires should be 200 fathoms in length and so secured as to be easily let go from ship if necessary.

(b) *Ropes.* Vessels should have two suitable, best quality mooring ropes of 200 fathoms each located on aft part of after well deck for use on either port or starboard side, three (minimum) suitable, best quality mooring ropes of 200 fathoms each and three additional ropes of 150 fathoms each on poop deck plus properly located warping winches and bitts. Vessels equipped with mooring wire winches on poop deck may reduce required "additional" ropes accordingly. Wires are not used on port side of aft well deck due to possible fouling of wire with hose or pipe-line underwater facilities. In this position a suitable, best quality mooring rope must be used. Two ropes of 200 fathoms each recommended, to be used on either side while mooring, and used on port side only for securing ship in berth.

**AUTHORITY:** Trans-Arabian Pipe-line Company. Company maintains offices at following addresses: (a) *Beirut Office:* PO Box 1348, Beirut, Lebanon. Cable Address: Tapline Beirut. (b) *Sidon Office:* PO Box 28, Sidon Lebanon. Cable Address: Tapline Beirut. (c) *New York Office:* 505 Park Avenue, New York, New York 10022, United States of America. Cable Address: Taplineco New York.

**AGENTS:** Gulf Agency Co. (Lebanon) Ltd., Sidon, Lebanon. Cables: "Gacship", Sidon. Tel. 720715. AO 720168, 281095, 307802. Telex: 20906 Beirut.

For communication and operational reasons address all your correspondence and cables to head-office in Lebanon: Gulf Agency Co. (Lebanon) Ltd., POB 4392, Beirut, Lebanon. Telephones: 256516, 296733. Cables: "Gacship", Beirut. Telex: 20906 (answer back: GAC 20906 LE.).

## TRIPOLI: 34.28 N. 35.49 E.

(a) DRY-CARGO PORT.

Manifests should be visaed by Lebanese Consul at ports of shipment, or at any port *en route* where there is a Lebanese Consul. If on account of non-existence of Lebanese Consul at ports of shipment or at any of these *en route* the manifests are not visaed, then such consular visa dues are collected at Beirut.

**DOCUMENTS:**

1 Legalised copy of Cargo Manifests.
5 copies of Cargo Manifests.
2 Store Lists.
5 Passenger Lists.
2 Lists of Cigarettes and Tobacco (see "Customs allowances").

**PILOTAGE:** Agent arranges with Harbour Master, therefore keep Agent closely advised ETA. Harbour Master may also be contacted on VHF Channels 13 (frequency 156·6) and 16 (frequency 156·7).

**ANCHORAGE:** Good anchorage.

**MAX. SIZE:** Depth at entrance 22·5 ft. Max. draft alongside b 22 ft. 6 in.

**HEALTH:** Health authorities boarding in roads. Health f obtainable from Agent or doctor. Smallpox and yellow fever ce cates for ships coming from Far East and Red Sea. Owners sh check with Agents respecting any recent imposition of anti-epide regulations and requirements for addition injections for crew me members.

**RADIO:** Cables via Beirut Radio to and from Agent.

**BERTHING:** New pier about 600 metres length. Two berths. 4 s cranes suitable for vessels up to about 7,000 tons only. Two he lift cranes, capacities 25 and 50 tons. Lighters available for discha ing alongside vessel. Ship's gear often used for discharging.

**STEVEDORES:** Ordered by Agent. No ETA to stevedores nec sary. Working hours, 0800–1200, 1300–1600, otherwise overt included on Sundays and on official holidays.

**MEDICAL:** Master to advise Agent by cable prior to arrival if me cal attendance required.

**DENSITY:** 1025.

**GANGWAY/DECK WATCHMEN:** Available and recommend

**OPENING/CLOSING HATCHES:** For liners by stevedores, ot wise per agreement.

**CUSTOMS ALLOWANCES:** Tobacco. 40 cigarettes per c member. Customs very strict, checking crew cabins. Regulati are as follows:

1. That the quantity of tobacco to be allowed on board vessels u their arrival at a Lebanese port will be fixed on the basis of packets per crew member, passenger per day, and to be calcula on a maximum period of four months, if the vessel emanates from American, Asian or African port – not central Africa; and for months if the vessel last port of call is in Europe, Central Africa Mediterranean, which will be deducted from the quantity, and on same basis the consumption by the crew members and passeng during their trip, and this to start from the last port of call until ar at a Lebanese port.

That the number of passengers to be taken into account o tourist vessel will be the number of berth the vessel can acco modate and not the number of passengers on board. As to ca vessels, the actual number to be accounted for will only be the c members and the Master of the vessel.

2. In the event that it is the first call of the vessel, at a Leban port and not aware of such regulations, and it was found on bo her an excess quantity to the actual one allowed, as indicated abo a Proces Verbal will be established for the excess quantity found the cigarettes placed under seal. An undertaking is also to obtained from either the Owners and/or her Agents to the effect they will submit a certificate, within one month, to be issued by relevant Customs Authorities of the next port of call of the ves after a Lebanese port. While the seizure of the vessel will be li when the Bank guarantee equalling the amount of fine and due placed, or a Personal Guarantee from the Agent – if solvable - in the event that the undertaking is not fulfilled, the usual penal will be inflicted according to the law.

3. In the event the vessel is aware of such restriction, and for reason or another she is carrying an excess quantity, this exc must be, as per official regulations, be shown on the manifest le ised and issued at the last port of call touched by the vessel prio Beirut.

Any excess found over and above such declaration will be c sidered as smuggling and the law will be applied.

Wine and/or spirits: One bottle per crew member; Cap allowed 3/4 bottles.

**CARGO GEAR:** Ship's gear to be used. A floating crane maxim lift 50 tons is available.

**IDENTIFICATION CARDS:** Shore pass given to each crew me ber. Passport and seaman's book to remain in Captain's care.

**CONSULS:** Most countries have consulates in Beirut.

**AIRPORT:** Beirut.

**TIME:** GMT plus 2 hours. Summertime, GMT plus 3 hours.

**HOLIDAYS:**

| *Holidays* | *Date* | *Days* |
|---|---|---|
| New Year's Day | January 1st | 1 |
| Al-Adha (Karban Bairam) | Varies | 2 |
| Ashoura | ,, | 1 |

**AGENT:** Gulf Agency Co. (Lebanon) Ltd., Customs Street, Tri Lebanon. Cables: "Gacship", Tripoli/Lebanon. Telephone: 625 Telex: 20906 Beirut. Head Office: Beirut (which see).

(b) OIL TERMINAL.

**OPERATORS:** Iraq Petroleum Company.

**DOCUMENTS:** See "Section A – Dry-cargo Port".

**PORT LIMITS:** Iraq Petroleum Company Limited have pla three spar-buoys to indicate the limits of the Company's Sea. Terminal boundaries.

The location of these buoys is as follows:

1st, Lat. 34° 30′ 03″ N. Long. 35° 52′ 30″ E.
2nd, Lat. 34° 29′ 42″ N. Long. 35° 52′ 26″ E.
3rd, Lat. 34° 29′ 03″ N. Long. 35° 51′ 04″ E.

**PILOTAGE:** The company's Mooring Masters will meet tankers two miles North-east of Tripoli Breakwater Head. Tankers of 40,000 dwt and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft. above water. This can be adjusted to suit conditions. A pilot ladder should be rigged immediately abaft the accommodation ladder, to within 2 ft. above the water. This will enable Pilot to ascend pilot ladder clear of launch and then step on to the lower platform of the accommodation ladder. United Kingdom Merchant Shipping (Pilot Ladders) Rules are relevant.

**ANCHORAGE:** Good anchorage immediately West North-West of No. 4 sea berth buoys.

**MAX. SIZE:** Least depth of water available in berth, and swinging circle, after deducting 6 ft. for the height above sea bed of the sea line and cradle is as follows: No. 1 Berth, 62 ft.; No. 2 Berth, 66 ft.; No. 3 Berth, 53 ft.; No. 4 Berth, 38 ft. The swinging circle is defined as 1½ ship's lengths from dropping position of ship's inshore anchor. The approximate draft limits quoted are based on an underkeel clearance, in the berths, of 6 ft.

VLCC's will be handled in Berth No. 2 and loaded to a draft of 60 ft. During the period April to October, and subject to the Master and Mooring Master being satisfied that weather conditions permit loading to a reduced under-keel clearance of 4 ft., then the loaded draft may be increased to 62 ft.

**HEALTH:** See "Section A – Dry-cargo Port".

**RADIO:** The Iraq Petroleum Company Limited, must be informed 48 hours prior to arrival of a vessel's ETA, quantity of cargo required, maximum loading rate, SWL of derrick for lifting hoses and confirming that the ballast for discharge in port waters is clean. Communication with Iraq Petroleum Company, Limited, should be by cable addressed to "Petriraq, Tripoli, Lebanon", or direct to Tripoli Terminal Radio Station.

*Tripoli Terminal Radio Station.* Call Sign – ODC 8.

| *Waveband* | *Hours (GMT)* | *Watch Details* |
|---|---|---|
| High Frequency | 0800–0830 | ODC 8 Broadcast Traffic List and calls ships on 8514 kc/s. Listens on 8354–8374. |
|  | 1200–1230 | Will transmit on 12831 kc/s. on request. |
|  | 1600–1630 |  |
|  | 2230–2300 |  |
| Medium Frequency | 0000–2400 | Monitor 500 kc/s. for calls and answers only. |

|  | 2202–2230 | Transmit Traffic List on 442 kc/s., receive on normal ship frequencies – 425, 454, 468, 480 and 512 kc/s. |
|  | 2232 | Broadcast call QSY QSX 500 kc/s. |

Cables to Agents may be routed through Beirut radio.

**VHF:** Tripoli:

*Equipment:* Fixed Station sited in Terminal Building and used by Control Room.
*Call sign:* Tripoli Control.
*Range:* Approximately 15 miles.
*Frequency:* Transmitting on 163·6 mc/s.
Receiving on 159·1 mc/s.
*Watches:* Continuous.

Mobile Station

*Equipment:* Portable, battery operated, carried aboard vessel with Mooring Master.
*Call sign:* Ship's name (before mooring). or Berth No. (after mooring).
*Range:* Approximately 8 miles.
*Frequency:* Transmitting on 159·1 mc/s.
Receiving on 163·6 Mc/s.
*Watches:* Continuous, whilst Mooring Master on board.

Notes

1. Tripoli also keeps a continuous watch on the international calling frequency of 158·8 Mc/s. This has a range of approximately 15 miles and its call sign is "Tripoli Control".
2. The VHF System is not connected to the main telephone switchboard and only selected shore stations have access to it.

**TUGS:** There is no tug at Tripoli.

**BERTHING:** *Sea Line Berths.* Four berths numbered from North-east to South-west. Specifications as follows:

| *Berth No.* | *Max. TPH* | *Fixed Sea Line* | *Strings of Flexible Hoses* |  | *Approximate Limits Draft* | *Approximate Limits Deadweight* |
|---|---|---|---|---|---|---|
| 1 | 5,000 | Two 24″ | Two | 16″ | 56′ | 140,000 |
| 2 | 7,000 | One 32″ | Two | 16″ | 60′ | 250,000 |
| 3 | 6,000 | One 32″ | Two | 16″ | 47′ | 87,000 |
| 4 | 1,500 | Two 12″ | Two | 12″ | 32′ | 25,000 |

As loading is by gravitation, the maximum rates are dependent upon availability of suitable shore tanks and loading lines.

**LOADING:**

1. *Readiness to Load*, will be received by the Mooring Master, who is the Company Representative on board. The advice from the vessel which states she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard the vessel has been completed. As soon as possible after such a signal has been received, and without further advice, loading will commence. Damage to hoses can occur if ship's valves are not open at the start of loading.

2. *Derricks*

(*a*) Two hoses are connected on the port-side amidship.
(*b*) Derricks or cranes reaching over the hose connection should be capable of lifting the flexible hose from the sea-bed to a height of up to 30 ft. above the deck.
(*c*) A minimum SWL of 5 tons is required for 12 in. hoses.
(*d*) The faster loading berths equipped with 16 in. hoses are available only to vessels with derricks and tackle with a minimum "Safe Working Load of 7 tons". Such vessels will be given berthing priority when queuing occurs and these berths are free but other vessels have not the capacity to handle the larger hoses.

3. *Hose Hang-off Bitts* are required at about 10 ft. from the ship's rail at the loading manifold to secure the submarine hoses on the portside.

4. *Hose Connection/Disconnection.* Ship's crew with a responsible officer in charge to perform all operations as advised by the Mooring Master, to lift, connect, disconnect and lower hoses.

5. *Ship's Manifold* – to be prepared for the connection of 12 in. or 16 in. hoses with flanges of 150 series, dependent on berth allocation.

6. *Loading – Supervision and Commencement*

(*a*) All operations in connection with starting of loading, discharging, switching of tanks on board and topping-off must be directly and personally supervised by a responsible ship's officer.
(*b*) The advice from the vessel that she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard the vessel has been completed. As soon as such a signal has been received, and without further advice, loading will commence. Damage to hoses can occur if ship's valves are not open at the start of loading.

*Caution:* The oil loading stream to the ship is controlled on shore and it is extremely dangerous if a ship's valve is closed against the flow of oil.

To prevent excessive pressure from surge in ship and shore lines, ship's valves must not be shut-off against the stream, and when switching tanks, ship's valves must be closed slowly. Vessels will be held liable for damages resulting from any maloperation of valves on board.

7. *Tank Dips.* During loading frequent checks should be made by the responsible ship's officer to ensure that cargo is entering the designated cargo tanks only and that there is no escape of oil into pump-rooms or through sea and overboard discharge valves. Particular care must be exercised by ship's personnel in "topping-off" tanks and towards completion of loading to ensure that the terminal is given timely advice of any decrease in loading rate required. Adequate "standby" notice must be given before the final "stop".

8. *Loading Operations*

(*a*) The Mooring Master will not transmit any loading instructions to the shore until the responsible ship's officer is satisfied that the hoses are connected correctly and that all valves have been set for receiving cargo.
(*b*) Loading rates requested by the vessel or quoted by the terminal will be the peak or maximum rate at any time during the loading period.
(*c*) While in berth, ships should be ready to move under their own power in the event of their breaking adrift, catching fire, fire in adjacent berths or other emergency. No repair should be carried out while in berth which would immobilize the ship or impair her fire-fighting efficiency.

Failure to vacate the berth on completion of loading may result in delays to other vessels, demurrage, and loss of throughput which shall be accountable to the vessel.

(*d*) The Mooring Master will advise the Master of the ship as to any signals needed for local requirements.
(*e*) The Mooring Master brings a portable radio on board for ship to shore communication.

**DENSITY:** 1025.

**FRESH WATER:** May be available at anchorage before berthing, but it is expensive.

**FUEL:** Fuel oil is available at Berths 2 and 3. The 12 in. bunker hose is raised on the port side of the vessel. Bunkering rates are 300 to 400 tph.

**CUSTOMS ALLOWANCES:** See "Section A – Dry-cargo Port".

**GENERAL:**

1. *Ballast*

(*a*) Vessels should arrive with sufficient clean ballast for safe handling of vessel under prevailing weather conditions.
(*b*) Ballast water must be clean and a declaration signed by the Master and delivered to the terminal to this effect. Vessel's

scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard.

(*c*) *Pollution of the sea – warning.* It is an offence to discharge dirty ballast or pump out bilges. The authorities are very strict and your attention is drawn to the Lebanese Notice to Mariners No. 23/1 of 29th July 1965, and to the volume entitled "International Conference on Prevention of Pollution of the Sea by Oil", issued by IMCO London.

In the event of your vessel discharging dirty ballast or spilling oil, cost for cleaning the pollution, third party claims and port fines shall be borne by the vessel.

It is recommended that vessels carry an adequate amount of dispersants with means of application in case of oil spills.

2. *Gear to be provided by the ship*

(*a*) Anchor to be fitted with marker buoys and 20 fathoms line.

(*b*) Four good mooring lines of not less that 150 fathoms each and of suitable size for the vessel. Two additional 150 fathoms lines securely tailed to the first lines for cases where 150 fathoms may not reach to the stern buoys initially.

(*c*) For vessels of 50,000 dwt. and larger, powered mooring winches with 200 fathoms of wire rope.

(*d*) Four suitable rope stoppers to be available aft.

(*e*) Two good chain stoppers for use on 5½ in. circumference wires (preferably carpenter's patent stoppers).

(*f*) Two good 4½ in. circ. boat ropes 200 ft. long placed one on each side of the vessel.

(*g*) Two good ropes, 15 fathoms × 3½ in. circ. and two heaving lines for lowering hoses.

3. *Lighting.* Manifold and poop mooring areas should be adequately lit to enable night mooring and loading operations to be carried out with safety. Sea area around the ship to be illuminated.

4. *Deck Watch.* A deck watch must be maintained at all times the vessel is in berth. In addition to its normal duties, the watch must inspect the hose connections and area around the ship against oil spillage, pollution, and prevent unauthorised persons from boarding your vessel.

5. *Boarding of vessel.* The control of persons boarding your vessel is the ship's responsibility. Boarding should be restricted to Company employees on duty and to persons authorised by the Port Authorities as advised by your Agents.

6. *Stores/Provisions* or other items should not be received or discharged whilst loading is in progress. Launches other than the Company's mooring launch, should not lie alongside the vessel.

7. *Tanker Safety.* Masters are at all times responsible for the application of all safety precautions as prescribed in the International Oil Tanker and Terminal Safety Guide.

8. *IOTTSG Safety Check List.* The Tanker Safety check list must be completed after inspection of each item prior to commencement of and during loading. The Mooring Master is authorised to stop all loading operations should he consider that the safety of lives and property is endangered by the infringement of safety rules.

9. *Action in case of Emergency.* In the event of a fire, oil spillage or other emergency on the vessel,

The Emergency Signal is:—

Three or more blasts of not less than ten seconds duration each on whistle or siren supplemented by a continuous ringing of the general alarm bells.

**AGENT:** Gulf Agency Co. (Lebanon) Ltd., Customs Street, Tripoli, Lebanon. Cables: "Gacship", Tripoli/Lebanon. Telephone: 62 52 54. Telex: 906 Beirut. Head Office: Beirut (which see).

**HOLIDAYS:** 1st January; Good Friday; Easter Monday; Labour Day (1st Monday in May and no work is possible); Whit Monday; August Monday; Carnival Holiday (Tuesday following August Monday); State Day (1st November); Christmas Day; Boxing Day; H.M. Queen's Official Birthday observed either first or second Saturday in June.
**POLICE/AMBULANCE/FIRE:** Police 20045, Ambulance 20251, Fire 999.
**SHORE TELEPHONE CONNECTION:** Available.

**AGENT:** Geo. W. Bennett, Bryson & Co. Ltd., PO Box 162, St. John's, Antigua. Telegraphic address "Bennett". Tel. 21200. Estate & Shipping Agents, Liner Agents, General Commission Merchants, Insurance Agents, Travel Agents, Stevedores.

## Liberia

**COURTESY FLAG:** Masters of vessels should check with the Pilot the correct times for raising and lowering the courtesy flag as heavy fines are imposed if raising and lowering is carried out at the wrong time. It is also advisable to carry a spare courtesy flag aboard the vessel.

### BUCHANAN: 05.54 N. 10.04 W.

**DOCUMENTS:**
1 copy Clearance of last Port of Call.
1 copy Health Declaration.
6 copies Number of Passengers.
6 copies Cargo Manifest (even in ballast).
6 copies Crew List.
3 copies Store List (ship).
3 copies Personal Effects List.
1 copy Vaccination List.
**PILOTAGE:** The ship shall be considered to have arrived at Port of Buchanan when she cuts a circle with a three nautical miles radius from the beacon on the main breakwater head (Fl "G" 3-sec.). Lamco provides pilotage. Pilot boarding approximately 1½ miles off the main breakwater, bearing 095°/110°. Pilot ladder on port side.
**ANCHORAGE:** If waiting Pilot, anchor 2 miles off main breakwater.
**RESTRICTIONS:** Harbour traffic hours – towage and pilotage (ore ships), 0600–0100. General cargo ships (tankers), 0600–1630.
**MAX. SIZE:** Ore carriers up to 42 ft. draft.
**RADIO:** Dakar Radio, or when within 200 miles Buchanan Harbour Radio. Communications with ore ships per HF, call 2182 kc. Traffic, 2638 kc, 2738 kc. VHF, call Channel 16. Traffic, Channels 9, 11, 12 & 14.
**HEALTH:** Customs, health and passport inspection normally takes place at the berths. Quarantine signal must not be hauled down before "Free Pratique" is received. If diseases are suspected on board contact the Port Authorities or Agents by radio for instructions. After call at other Liberia ports where free pratique has been granted, Port Health will not board here.
**TUGS:** Lamco provides towage with two tugboats 1,640 h.p. and 3,300 h.p. Tugs join vessel about one mile N.W. of red buoy.
**STEVEDORES:** As early as possible advance notice of ETA required latest by 1500 hours on day preceding arrival if a weekday. Or Saturday before noon if arrival on Sunday. Shore working hours: Ore handling: 0700–2400 with two 1-hour mealbreaks; general cargo handling, 0700–1200, 1300–1500, and overtime 1500 to 2300.
**BERTHING:** Port provides nylon springs for mooring at $5 per day each. Number of berths for sea going vessels, 5. Length of quays, 2,800 ft. with 50–100 tons bollards and properly fendered. Depth conditions, 42 ft. at ore-loading quay (at MLWS), 33 ft. at commercial quay (at MLWS). Ore loading capacity, 6,000 tons per hour.
**MEDICAL:** Hospital and medical care is provided; advance notice should be given in serious cases. Smallpox, yellow fever inoculations are required to enter the Republic. Yellow Vaccination Book is required.
**TANKERS:** One tanker berth for discharging only. Hose connections are: 6 in. and 10 in. Max. draft 30 ft.
**DENSITY:** Varying but around 1020/25.
**FRESH WATER:** Fresh water is available, ex-quay only, rate is 20 tons/hour. Subject to availability, max. 100 tons per ship.
**FUEL:** No bunker facilities available.
**GANGWAY/DECK WATCHMEN:** Available.
**OPENING/CLOSING HATCHES:** Performed by stevedores.
**REPAIRS:** No commercial facilities available. In cases of emergency Lamco might assist with minor repairs.
**CUSTOMS ALLOWANCES:** Direct sales of Liquors, cigarettes, foodstuff, etc. from ships are strictly forbidden.
**IDENTIFICATION CARDS:** Not required.
**CONSULS:** Swedish Vice-Consul only; however, most countries are represented either by Embassy or Consul at Monrovia.
**REPATRIATION:** Can be arranged.
**AIRPORT:** Roberts International Airport about 1 hour ride by car; several connections to the rest of the world.
**TIME:** GMT; no alterations during the year.
**HOLIDAYS:** January 1st; January 7th; February 11th; Second Wednesday in March; March 15th; Second Friday in April; May 14th; July 26th; August 24th; First Thursday in November; November 29th; December 1st; December 25th. Special holidays as proclaimed from time to time by the Liberian Government. No work will be performed on January 1st, July 26th and December 25th.
**GENERAL:** Two Customs officers stay on board the ship during ship's entire stay and they should be given meals in the Officers' Mess and if necessary night quarters.
**POLICE/FIRE/AMBULANCE:** No phone available; however the Lamco Plant Protection Force should be contacted; one officer is normally assigned to each quay/gate.
**SHORE LEAVE:** Apart from South African, Portuguese and Rhodesian Citizens, who are not allowed ashore, no restrictions.
**DELAYS:** Generally, no major delays have occured. For ore loaders and tankers the tide may occasionally involve 24/36 hours waiting time depending on the size of ships expected to load; general cargo ships: no delay.
**AUTHORITY:** Port Operators: Lamco J. V. Operating Company, Buchanan, Roberts International Airport, Liberia. Telex: 203, Lamco Monrovia, Cable: Lamco Monrovia.

**AGENTS:** All ore carriers must employ LJVOC as their Agent.
*Other vessels;*
Scanship (Liberia) Inc., PO Box 168, Buchanan, Tel. 95.30/39. Telex via Monrovia.

### MONROVIA: 06.20 N. 10.50 W.

**DOCUMENTS:**
6 Crew Lists.
5 Passenger Lists or 5 Statements "Nil" if none aboard.
5 Manifests for Customs. This should state S.W. Ballast if no cargo aboard.
5 Lists of Ports of call from commencement of voyage with date of calls.
1 International Health Declaration.
1 List of Crew with dates of smallpox and yellow fever vaccination.
5 Store Lists.
2 Crew Custom Declarations.
Immigration now stamp all seamen's discharge books or passports.
**PILOTAGE:** Order Pilot through local Agents. Monrovia Freeport Pilot station equipped with R/T and VHF radio and on continuous listening watch from 0645 GMT to 2245 GMT. R/T 2182 kc/s, range 300–500 miles VHF Channel 16 range–30 miles.

Pilot comes out from inside breakwater by launch displaying H. flag. Vessels should approach to approx. 7 cables off entrance and should anchor clear of fairway channel as very large iron-ore carriers sail on deep draft. Anchorage lies S.W. of Leading Line from 7 cables to 10 cables from Southern breakwater end.
**ANCHORAGE:** Good unlimited anchorage space available on roadstead S.W. of Leading Line, depth 7 to 10 fathoms. Anchorage safe but subject to moderate South-westerly swell during rainy season, April to October.
**RESTRICTIONS:** Pilot service given day and night. Loaded oil tankers berth in daylight hours only. Only deep-loaded vessels restricted to tide for berthing or sailing.

Channel outside breakwater being dredged to 49 ft. MLW. Channel to iron-ore piers dredged to 45 ft. MLW.
**MAX. SIZE:** Vessels up to 850 ft. length and 45 ft. draft can be accommodated at iron-ore piers. No restrictions on beam except that carriers with a beam in excess of 126 ft. may experience difficulty in loading with present loading gantries. Maximum draft for berthing at Marginal General Cargo Wharf is 30 ft.

Tankers discharging at crude oil pier; maximum length 700 ft., maximum draft 40 ft. Maximum draft for berthing at Bunkering Pier is 35 ft.
**HEALTH:** Vessels entering must fly International Code flag "Q". Port Health Officials board upon berthing. Pratique automatic for vessels having cleared at other Liberian ports, but vessel must still clear Customs.
**RADIO:** ETA cables should be routed to Agents through Government radio station ELC or via land cable (French Cables) through Dakar or Abidjan. Pilot R/T station will pass on messages to Agents free of charge.
**TUGS:** 3 tugs of 1700 h.p. available. Join vessels just inside breakwater entrance. For berthing, tug lines used; for sailing, ships lines used; no charges for tug lines.
**BERTHING:** Day and night, except loaded tankers not berthed during hours of darkness. Tankers arriving must enter breakwater by 1730 hours. Fishing boats are moved to or from fishing pier situated on North Breakwater during darkness.
**STEVEDORES:** Engaged by Agent. Several stevedoring companies. Port Management handles all cargo on shore and accepts cargo ex-ship's hook only.
**MEDICAL:** Whenever possible Masters should cable Agents if require medical attention especially when arriving week-ends or

during night. Hospital facilities available. Port Health require smallpox and yellow fever vaccinations for crew members.

**TANKERS:** One bunkering and oil-loading pier, and one crude-oil discharge pier. At Crude Oil Pier discharge by means of floating 10 in. pipe-line.

**DENSITY:** Density varies with the tide. Also varies during rainy season as river flow increases. Varies from 1009 to 1024 oz. per cu. ft. with average of approx. 1019 oz. per cu. ft.

**FRESH WATER:** Available only on marginal wharf and three Iron-ore Piers by means of hoses from shore. Average rate of delivery approx. 20 tons per hour.

**FUEL:** Light diesel oil and heavy fuel oil available and these can be blended to specification by supplying oil company Diesel only available on bunkering pier. Fuel oil available by barge and on bunkering pier.

**GANGWAY/DECK WATCHMEN:** Supplied by Agent, and recommended. Customs also place one gangway officer aboard and this officer is supplied with food by ship.

**OPENING/CLOSING HATCHES:** Normally done by stevedores.

**CUSTOMS ALLOWANCES:** Tobacco, reasonable quantities for consumption while in port. Wine and/or Spirit, as tobacco.

**IDENTIFICATION CARDS:** Not required, but seamen's books are endorsed aboard by Immigration.

**CONSULS:** Majority of foreign countries have Consuls.

**REPAIRS:** Limited deck and engine repairs can be carried out by two private companies.

**DRY DOCKS:** One very small floating dock capable of lifting 300 tons with max. draft of 8 ft. This dock is used for small coastal craft and only accepts very limited outside work.

**REPATRIATION:** Repatriation of crews is possible.

**AIRPORT:** Roberts Field International Airport 45 miles distant. Served with daily international flights to Europe and America.

**TIME:** GMT.

**HOLIDAYS:** Many official holidays during year but cargo work carried out those days on overtime rates. Port closes three days per year: 26th July (Independence Day), Christmas Day and New Year's Day.

**POLICE/AMBULANCE/FIRE:** Port Management have own Security Force and Fire Service. Situated in port area.

**TELEPHONES:** There are no facilities for telephones on board.

**GENERAL:** Stevedores gangs have to be ordered the day before required, therefore essential for Agents to receive ETA messages in sufficient time.

**SERVICES:** Hull, deck and engine surveys can be obtained through Lloyd's, German Lloyds, B.V., Norske Veritas, America Bureau Agents.

**SHORE LEAVE:** No restriction on shore leave.

**AUTHORITY:** National Port Authority, POB 14, Monrovia. Cables: Naportauth Monrovia.

**AGENT:** Scanship (Liberia) Inc., PO Box 209. Tel. 22–832, 21–612. Telex 4281. Cables: "Scanship Monrovia".

# Libya

**GENERAL:** All ports:

Circular to all ships (Issued by the Libyan Port Authorities):

1. Hoist the Libyan national flag while sailing in Libyan territorial waters. Remain in contact with the Libyan radio station.

2. Give notice of ETA 24 hours before arrival, including all information about the ship, her cargo, and abnormal illness.

3. All ships, whilst in Libyan territorial waters or harbours, shall comply with the rules of road, lights and signals, suitable to her case.

4. Entering and sailing from the ports is forbidden without a Pilot. When the Pilot is staying on board for a reason the ship shall pay all the expenses for his residence, food and repatriation to his port, by air, sea or land (1st class) plus any extra expenses, in complying with the law.

5. Any movements inside the port (anchor area or for securing at the buoys) are forbidden without the permission of the Port Authorities – Master is responsible for any movements, even if Pilot is on board.

6. It is forbidden for any person to board or leave the ship before free pratique has been granted.

7. It is necessary to show the marine inspection department all ship certificates during the first 24 hours of arrival.

8. At all times, sufficient crew (watches) should be on board looking after the work and enforcing any constructions for movements at any time.

9. The following are forbidden whilst the vessel is in port:

(*a*) Moving the propellers for any reason without permission of the Port Authorities.
(*b*) Dismantling the engine for any repairs without permission of the Port Authorities.
(*c*) Lowering the life-boats for use in the port.
(*d*) Discharging overboard into the sea garbage, oil, oily mixtures and other substances.
(*e*) Any other scrapings or chippings.
(*f*) Using ship's radio in port.
(*g*) Presenting or offering alcoholic drinks to any person who is not a crew member, as per Custom's rules.
(*h*) Permitting any person to board the ship except for official work.
(*i*) Transferring of crew members between ships for visits wit permission.
(*j*) Swimming or diving in the port for any reason.
(*k*) Whistling without reason and without permission on special occasions.
(*l*) Making of thick smoke from the funnel.

10. All ships alongside the quay must be sure that the moo ropes and wires are suitable for the weather and ratguards mus placed.

11. All ships when entering or sailing have to show a list of ca quantity and destination to the Port Aurhorities.

12. All tankers:

(*a*) To comply with the International Oil Tanker and the Termi Safety Guide, or any book including the same instructions
(*b*) Gas-free all tanks before entering the port.
(*c*) Have ready the emergency fire wires for towing off (situ fore and aft with big shackles).
(*d*) Taking care to avoid fire for safety of ships.
(*e*) Smoking is strictly forbidden at all times on deck or on quay.
(*f*) Hoisting red flag during the daylight and red light at n whilst in the port and in the Libyan territorial waters.

*Notice:* All vessels proceeding to the Gulf of Sirte are reque to contact Tripoli Radio before entering. Entering Libyan territ waters without contacting Tripoli Radio is forbidden as permis to enter is required from Libyan Navy at Tripoli. Message to Navy should state name of vessel, flag, last port of call and desti tion.

## BENGHAZI: 32.06 N. 20.03 E.

**DOCUMENTS:**

Crew Lists, 7 copies.
Passenger Lists, 6 copies.
Crew Declaration including currency, cigarettes and gifts.
Stores List, in triplicate.
Health Declaration.
Cholera and Smallpox Certificate.
Manifests, 8 copies.
Bill of Lading – 8 copies for the Shipping Agent.
Registration Certificate, Log Book, Health Certificate.
All Certificates according to International Sea Conventions- record book.

N.B.: Port Authorities at Benghazi will insist upon the follo details to be inserted on Manifests:

(*a*) Bill of Lading number.
(*b*) Shipper's name.
(*c*) Receiver's name.
(*d*) Marks and Numbers.
(*e*) Quantity of Cargo and Kind.
(*f*) Description of Cargo.
(*g*) Weight of Cargo.
(*h*) Measurement of Cargo.

**PILOTAGE:** Compulsory. The Port Manager of Benghazi stro recommends all Agents operating in Benghazi to advise their pri pals that this port should never be entered without a Pilot on bo

In case there is any vessel entering the port without a Pilo board, the owners have to bear all responsibility for eventual dama and for settlement of these and consequent fines.

Harbour Pilots will not come out farther than one mile off-sh Vessels anchored outside this limit cannot expect to receive a P International code signals used to call Pilot.

**RESTRICTIONS:** Vessels are not permitted to enter harb between sunset and sunrise.

**MAX. SIZE:** Max. draft for entering harbour is 27 ft. in winter 28 ft. in summer time. Max. length 550 ft.

**HEALTH:** Quarantine Flag should be hoisted until doctor has b on board and free pratique granted, there is no automatic "F Pratique" for a vessel arriving from another port of Libya.

**RADIO:** Messages to Agents, Receivers, etc., normally thro Malta Radio. Due to difficulty of communications, Masters advised to maintain radio watches while anchored off port.

When sending ETA telegram include details of kind of carg each hatch and total tonnage in each hatch. R/T 2182 and Channel 16.

**TUGS:** Available, join immediately after Pilot boards.

**BERTHING:**

| | | |
|---|---|---|
| Berth No. 1 | length 1,050 ft. | draft 28 ft. |
| Berth No. 2 | length 920 ft. | draft 28 ft. |
| Berth No. 3 | length 550 ft. | draft 28 ft. |
| Berth of Libya No. 1 | length 150 ft. | draft 18 ft. |
| Berth of Libya No. 2 | length 420 ft. | draft 18 ft. |
| Berth of Libya No. 3 | length 450 ft. | draft 18 ft. |

**TANKERS:**

| | | |
|---|---|---|
| Oil berth | only for 1 tanker | draft 24 ft. |
| Floating berth | for 2 tankers | draft 18 ft. |

**MEDICAL:** Doctor available, also hospital facilities.

**FRESH WATER:** Available at anchorage and all berths.

**FUEL:** Suppliers need at least 48 hours' notice of bunker requ ments. Advisable for Chief Engineers to check what grades available before ordering.

**GANGWAY/DECK WATCHMAN:** Compulsory, provided Port Authority.

**OPENING/CLOSING HATCHES:** To be done by crew.

**CUSTOMS ALLOWANCES:** 200 cigarettes for each crew m ber. Wines and Spirits – 1 litre for each crew member.

**IDENTIFICATION CARDS:** Identity cards, Passport, Discharge Book or Seaman's Book required.

**REPAIRS:** Minor repairs are possible.

**DRY DOCK:** There are no dry-docking facilities.

**REPATRIATION:** Facilities exist without difficulty.

**CONSULS:** Following countries are represented – France, Germany, Greece, Italy, Tunisia, United Kingdom, U.S.A., U.A.R., and Syrian Arab Republic.

**AIRPORT:** Benina Airport situated 29 km. away.

**TIME:** GMT plus 2 hours.

**HOLIDAYS:** 22nd February, 23rd July, 28th September, 25th May, 1st September, 21st November. Id Al Adha (4 days). Id Al Fitr (3 days). Cargo can be worked during holidays on an overtime basis except Id Al Adha, 1st September, 28th September and Id Al Fitr.

**POLICE/AMBULANCE/FIRE:** Police 99; Ambulance 2131/2132/2281; Fire 5555/5599.

**GENERAL:** Radio transmitters will be sealed by Port Authority whilst vessel in harbour. The bond seals must remain unbroken if vessel is proceeding to another Libyan port.

**SHORE LEAVE:** Allowed, alongside the quay and at anchor. Shore passes are delivered to vessel in exchange for the Discharge Books and Vaccination Certificates of the crew members.

**HEAVY LIFT CRANES:** 2 floating cranes, 100 tons each and several shore cranes, max. lift 27 tons.

**PORT REGULATIONS:** Ship's lifeboats not to be used without permission of the Port Authority. No engine repairs without permission of the Harbour Master.

Vessels should advise their ETA 24 hours before arrival.

**DELAYS:** Vessels usually have to wait 1 to 2 days for a berth.

**AUTHORITY:** The Port and Lights is a Department of the Ministry of Communications which controls the operations of all Ports of Libya. Tel.: 2983.

## DERNA: 32.45 N. 22.40 E.

**DOCUMENTS:**

7 Crew Lists.
6 Passenger Lists.
3 Crew Declaration of Bonded Stores.
3 Stores Lists.
3 Currency Lists.
Health Declaration.
Cholera and Smallpox Certificates.
8 Cargo Manifests.
2 Bills of Lading.
Registration Certificate.
Log Book.
Health Certificate.
Radio Certificate.

**PILOTAGE:** Compulsory.

**RESTRICTIONS:** Vessels are not permitted to enter harbour between 2100 and 0600 hours.

**MAX. SIZE:** Max. draft 12 ft.; max. permissible length 370 ft.

**HEALTH:** Quarantine flag should be hoisted until doctor has been on board and free pratique granted, there is no automatic free pratique for a vessel arriving from another Libyan port.

**RADIO:** Recommended that radio messages for Agent be sent via Malta Radio or Alexandria Radio.

**TUGS:** Normally join vessels in the roads.

**BERTHING:** One berth, length 415 ft., max. draft 11 ft. (forward), 12 ft. (aft).

**CRANES:** 2 shore cranes 10 tons each.

**MEDICAL:** Medical and hospital facilities available.

**FRESH WATER:** Can be obtained from Port Authority when alongside quay.

**FUEL:** Supplier needs at least 24 hours' notice of bunker requirements. Advisable for Chief Engineer to check what grades are available before ordering.

**GANGWAY/DECK WATCHMEN:** Compulsory. Provided by Port Authority.

**OPENING/CLOSING HATCHES:** To be performed by ship's crew.

**CUSTOMS ALLOWANCES:** 200 cigarettes and one litre wine/spirits per man.

**REPAIRS:** Minor repairs are possible.

**REPATRIATION:** Facilities exist via Benghazi.

**GENERAL:** Radio transmitters will be sealed by port authority while vessel in harbour. Bond seals must remain unbroken if vessel is proceeding to another Libyan port.

**SHORE LEAVE:** Shore passes are delivered to vessel in exchange for the discharge book and vaccination certificates of crew members.

**REGULATIONS:** Ship's lifeboats not to be used within harbour limits. Wine and spirits not to be taken ashore. Foreign currency not to be taken ashore. No engine repairs to be carried out in port whilst alongside without prior authority of Harbour Master.

**AUTHORITY:** Ports and Light Department, Ministry of Communications.

## ES SIDER: 30.38 N. 18.22 E.

**DOCUMENTS:** The Libyan Federal Police require a list of the crew with a declaration on their personal belongings, a list of tankers stores and a list of passengers. Also 1 copy of the cargo manifest for cargo in transit, and six copies of a cargo manifest whenever discharging is performed.

A certificate attesting the discharging of her total cargo in the port of discharge duly signed and legalised by the customs is requested by the Libyan Authority.

**PILOTAGE:** 72 hours before the Master expects to arrive at Es Sider to receive a Mooring Master on board, he shall notify the terminal by cable addressed to Oasisoil Pipeline Tripolibya, providing the following information:

(*a*) Name of tanker.
(*b*) Precise estimated time of arrival at Es Sider.

This information is to be repeated 24, 12, and 4 hours before arrival. Coastal landmarks in the area are as follows:

(*a*) The most prominent landmark is a water tower in the terminal area which is painted white and is 180 ft. above sea level. This water tower is located at 30° 38′ 00″ North Latitude and 18° 21′ 01″ East Longitude.

(*b*) A radio antenna tower which is 624 ft. above sea level is located at 30° 35′ 48″ North Latitude and 18° 24′ 12″ East Longitude. At night the tower is lighted with five red lights, vertically arranged. The top light and the fouth from the top flash simultaneously every second. Lights two, three and five are fixed.

(*c*) A radio antenna tower which is 770 ft. above sea level is located at 30° 36′ 30·5″ North Latitude and 18° 17′ 24″ East Longitude. At night the tower is lighted with four red lights, vertically arranged. The top light and the third from the top flash alternately every second. Lights two and four are fixed.

(*d*) Marble Arch is an archway along the coastal highway. It rises approximately 100 ft. above the roadway and its highest elevation is 171 ft. above sea level. Marble Arch is located at 30° 27′ 42″ North Latitude and 18° 24′ 12″ East Longitude.

Vessels to be moored, anchored or manoeuvred at Es Sider will be boarded within the recommended anchorage area. The Mooring Master will advise the Master on approaches to berths, mooring, unmooring, connecting and disconnecting the hoses and in all operations within the anchorage or berthing area.

**ANCHORAGE:** Recommended anchorages at Es Sider within the seaward perimeter of a circle having a radius of 3,000 ft. centred at 30° 40′ 00″ North Latitude and 18° 24′ 00″ East Longitude. The anchorage area has a sandy bottom with a depth ranging from approximately 70 to 100 ft.

**MAX. SIZE:**

| | *Length* | *Beam* | *Draft* |
|---|---|---|---|
| No. 1 Berth | 900 ft. | None | 52 ft. |
| No. 2 Berth | 900 ft. | None | 54 ft. |
| No. 3 Berth | 1100 ft. | None | 62 ft. |

**RADIO:** Oasis maintains direct communication with Malta Radio, details of which are shown in publication 205 of the U.S. Hydrographic Office and are included in the Berne Lists. Oasis also maintains a VHF station at Es Sider Terminal.

Cables should be addressed to: Oasisoil Pipeline Tripolibya. Cables addressed in this manner will be received directly by the Oasis communications centre in Tripoli and relayed immediately by voice radio or teletypewriter to the terminal at Es Sider.

If the tanker is equipped with an FM radio-telephone in the 156–162 mc/s band, communications may be established with the Es Sider terminal dispatcher by calling on Channel 16, 156·8 mc/s. This frequency is monitored continuously. The range of the terminal station is approximately 100 miles. After initial contact, further conversation should be conducted on either Channel 12, 156·6 mc/s or on Channel 14, 156·7 mc.

**HEALTH:** Tankers shall fly "Q" on arrival by day and disolay a red light over a white light at night to indicate quarantine conditions.

**TUGS:** Not required. Oasis maintains launches to assist in berthing tankers. These are under the direct supervision and control of the Mooring Master.

**BERTHING:** Three open roadstead submarine sea loading berths are available for loading crude oil at flow rates up to 40,000 barrels per hour. These berths are of the seven-buoy type. The berth headings are North and ships should pick up hoses on the port side.

The central spar buoy of the Easternmost loading berth at Es Sider is located at 30° 38′ 58″ North Latitude and 18° 22′ 43″ East Longitude. The middle of the three loading berths at Es Sider is located at 30° 39′ 06″ North Latitude and 18° 22′ 06″ East Longitude. The Westernmost loading berth at Es Sider is located at 30° 39′ 35″ North Latitude and 18° 21′ 53″ East Longitude. All berths are approximately one mile from shore and in approximately 65 ft. of water.

After the tanker is securely berthed, the submarine hose shall be lifted amidships on the port side. The base lift may weigh up to five tons. Hoses shall be lifted and connected by the tanker crew. The Mooring Master shall advise the tanker's officer-in-charge concerning lifting techniques; however, the responsibility for all operations shall remain with the officer.

**BALLAST:** A tanker shall have sufficient ballast for safe handling. Careful watch of the weather, frequent interchange of information between the tanker and the terminal and the knowledge of the behaviour of his tanker may permit the Master to bring his tanker to the terminal with a minimum of ballast and thereby reduce the possibility of violating sea pollution requirements.

There are no facilities at the port of Es Sider for the discharge of dirty ballast, and vessels arriving with dirty ballast will not be authorised to de-ballast in the vicinity of the port. Any tanker rejected because of dirty ballast or sea pollution will automatically nullify its notice of readiness and thereby relinquish any right to priority of loading position.

**MEDICAL:** First aid only, available.

**FRESH WATER:** Not available.

**FUEL:** Not available.

**REPATRIATION:** No facilities exist for crew change or repatriation.

**REPAIRS:** When a tanker is in or near the berth, its engines shall remain ready with full power for immediate use. Engine repairs shall not be performed near any berth.

**WATCHMEN:** Not less than one capable deck officer and three able seamen shall be available on the deck at all times. No person under the influence of alcohol shall be allowed on deck. The Mooring Master's opinion on the sobriety of an individual shall be final.

**CUSTOMS ALLOWANCES:** Cigarettes, cigars, tobacco,, spirits, wines, beers, perfume, arms, ammunition, saccharine, and certain other items shall be placed under Libyan Customs seal from the time of arrival in port until such time as the tanker has left territorial waters. Each officer and crewman is allowed the following ration for each day the tanker is in port: (*a*) 25 cigarettes per day, or 25 grammes of tobacco or 25 grammes of cigars. (*b*) One litre of beer or one-half litre of wine. (*c*) Special provisions are sometimes made for the Master.

**CONSULS:** Consulates are located in Tripoli, which is approximately 650 kilometres by road from Es Sider. Some countries having consulates are: Denmark, France, Germany, Greece, India, Italy, Netherlands, Norway, Russia, Spain, Turkey, United Arab Republic, United Kingdom, United States of America, and Yugoslavia.

**GENERAL:** When a Mooring Master and his assistants (launch crews and possibly apprentice Mooring Masters) are assigned to a tanker, the tanker shall supply them with meals at the same time and in the same manner as comparable personnel of the tanker. No special meals or special foods shall be required. The terminal will keep this item to a basic minimum. The intent is that the furnishing of meals to Oasis personnel be kept to the minimum.

**SHORE LEAVE:** None of the officers and none of the crew of any tanker shall be permitted shore leave at Es Sider.

**AUTHORITY:** The Port of Es Sider is the marine terminus of the Sidrah Pipe-line System, which is operated by Oasis Oil Company of Libya, Inc. The terminal and port facilities of the Sidrah Pipe-line System are owned by Ameradapetroleum Corporation of Libya, Continental Oil Company of Libya, Marathon Petroleum Libya, Ltd., Esso Sirte, Inc., Libyan-American Oil Company, and W. R. Grace & Company.

## MARSA AL HARIGA: 32.04 N. 24.00 E. (See Plan)

**LOCATION:** Marsa al Hariga Oil Terminal is located on the South side of the harbour of Tobruk, approximately one mile Eastward of Marsa al Hariga.

**OPERATORS:** Arabian Gulf Exploration Company.

**APPROACHES:** Vessels bound for the terminal should approach the harbour of Tobruk from the North-east with the lighthouse on Tobruk Point bearing 238° (true). In daylight this lighthouse should be kept in line with the conspicuous German War Memorial on the South side of the harbour.

When about four miles from Tobruk Point, course should be altered to 224½° (true) to bring the leading lights on Marsa Umm esc-Sciausc in line. This course should be maintained until the vessel is close to the outer buoy, where one of the company's Berthing Masters will board.

Deep-drafted vessels sailing from the terminal should avoid navigating North-westward of the leading line from Marsa Umm esc-Sciausc, owing to the presence of shoal water off Tobruk Point.

**DOCUMENTS:**

A. Customs' Requirements. On the arrival of a vessel, the Tobruk Customs Authorities will require from the Master of the vessel:

4 copies of a Crew List.
2 copies of a List of Ship's Stores.
2 copies of a Declaration of the Crew's Personal Belongings, including currency, cigarettes, gifts, etc.
4 copies of a Passenger List.

B. Harbour Master's Requirements. On the arrival of a vessel, the Tobruk Harbour Master will require from the Master of the vessel:

1 copy of a Crew List.
1 copy of a Passenger List.
1 copy of the Ship's Manifest.
1 copy of a Port Declaration (form will be made available to each vessel on arrival).

**PILOTAGE:** Vessels coming to and departing from the Terminal will be berthed and unberthed by Berthing Masters provided by the company, subject to the understanding that in all circumstances the Master shall remain solely responsible on behalf of his Owners for the safety and proper navigation of his vessel.

Berthing Masters will board at the Outer Buoy.

**ANCHORAGES:** If a berth is not immediately available on a vessel's arrival off the harbour of Tobruk, the vessel will be advised by the company where she is to anchor.

**MAX. SIZE:** Two berths are located at the end of a T-head jetty which extends some 700 ft. from the shore. There is a minimum depth alongside of 60 ft. and approach to and departure from the berth can be made in not less than this depth of water.

A buoy berth is situated some 1,200 ft. from the shore approximately 1,800 ft. West of the Jetty Berth No. 2. There is a minimum depth in the buoy berth and its approaches of 49 ft.

**PRATIQUE:** The Libyan Authorities will grant clearance by radio of a vessel coming to the terminal. Radio messages requesting clearance should be sent not earlier than 48 hours prior to vessels arrival off the harbour of Tobruk and should give the details required in the Maritime Declaration of Health which must also be completed.

**COURTESY FLAG:** On entering the territorial waters of the Libyan Arab Republic which commence six miles off the coast of Libya, vessels should if possible, hoist the Libyan flag, and in any event the Libyan Flag must be hoisted before entering the harbou Tobruk. Should a vessel arrive without a Libyan Flag on board, may be obtained from the Company's Berthing Master whe boards at the Outer Bay.

**ARRIVAL MESSAGES:** In addition to their arrival messag Agent, vessels must pass an arrival message to the terminal vi company's radio station giving at least 72 hours notice of ETA advising their estimates of:

(*a*) the quantity of cargo (in long tons) to be loaded at the term
(*b*) The cargo loading rate (in long tons) per hour.
(*c*) The quantity of ballast (in long tons) to be discharged at the terminal.
(*d*) The ballast discharge rate (in long tons).

If, subsequent to advice of their ETA there is any material cha a further ETA message must be passed via the company's station.

**RADIO:** Tobruk Radio 5 AL (MF & HF). Position: 32° 02′ N. 00′ E. Frequency: 420, 500 AI, A2, 0–5 kW. 4241, 8480, 16963 A1 kW.

*Note:* Station owned by Arabian Gulf Exploration Company. C pany telegraphic address: "Injaz Tobruk". All times given are G Station keeps watch on 500 kc/s during 24 hours.

**TUGS:** For berthing and unberthing at the terminal, vessels wi required to use the two diesel tugs which are available at the term Each of these diesel tugs has a bollard pull of approximately 25 t

**BERTHING:** *Jetty:* Vessels will berth on the jetty either alongside, depending on the prevailing weather conditions, tho starboard side alongside is preferred. Each berthing head is shaped and is protected by four breasting dolphins.

All moorings, except the backsprings to the outer breas dolphins at Jetty Berth No. 1, attached to quick release hooks addition to the vessel's moorings, the permanent mooring w provided by the company must, at the berthing master's discret be utilised and vessels must be moored to the satisfaction of company.

*Buoy Berthing:* Berthing/unberthing in daylight only.

Vessels will berth heading East or West depending on the vailing weather conditions, though head East is preferred. moorings consist of four buoys, one buoy being on each bow one buoy on each quarter.

In addition to the vessel's mooring of two ropes to each buoy mooring wires provided by the company to each buoy must utilised and vessels moored to the satisfaction of the company.

The company's Berthing Master will remain on board the ve whilst the vessel is in the buoy, to supervise and co-ordinate ballast discharging and loading operations.

**HOSES:** *Jetty:* Ship-shore connections, four flow booms suspended rubber hoses, diameter of hoses 12 in. Flange size rating 12 in. ASA 150, Full range of standard adapters available.

*Buoy Berth:* Ship-shore connections, three flexible hoses, crude oil loading, one ballast discharging, diameter of hoses 12 Max. lift from ship's equipment 5 tons. Flange size and rating 12 ASA 150.

**PNEUMATIC OIL BARRIER:** Although it is emphasised tha precautions must be taken by vessels to avoid any leakage or spill of oil into the harbour the berths are each protected by a pneum oil barrier to contain any oil which may, due to unavoidable circ stances, get into the harbour waters.

A pneumatic oil barrier consists of a pipe-line which is laid on harbour bed around the berth. Through this pipe-line is pum compressed air which escapes from the pipe-line via small holes it. As a result of this escape, the surface of the water above pipe-line is forced upward to form a "mound" of water which enclo the berth and prevents any spillage from spreading.

While vessels are berthing and unberthing the barrier will be in operation and the disturbance on the surface of the water indicate the position of the pipe-line. To avoid damage to the p line, it is essential that vessels do not drop their anchors in vicinity.

**BALLAST:** Vessels should make every effort to arrive at the term with clean ballast and with the minimum quantity for safe hand under prevailing weather conditions.

All ballast must be discharged into shore tanks provided by company, unless it is clean ballast, carried in tanks which completely isolated from the vessel's cargo system. However, discharge of such ballast into harbour waters must not be c menced until the ballast has been inspected by a company offi and he has certified that it is in order to commence discharge.

Ballast can be accepted into the company's store tanks at ra up to 6,000 tons per hour from the jetty berths and 1,500 tons hour from the buoy berth. Ballast is discharged ashore over the by way of a loading boom. Ballast is discharged ashore from buoy berth through a separate 24-in. ballast discharge line c nected to a 12-in. flexible hose. Maximum quantity 35,000 tons.

**LOADING:** Cargo loading at each jetty berth is by means of 16-in. flow booms to which 12-in. flexible hoses are attached. C loading at the buoy berth is by means of a 34-in. submarine lin which two 12-in. flexible hoses are attached.

This system permits a maximum loading rate of approxima 8,000 tons per hour over each jetty berth, and 4,000 tons per h through the buoy berth. The actual loading rate for a partic vessel will be determined prior to the commencement of load by agreement between the Master and the Company.

The following signals will be exhibited by a vessel whilst in buoy berth to indicate the nature of the operation taking place, to provide a second channel of communication should VHF com be broken between ship and shore.

| | Day | Night |
|---|---|---|
| Deballasting | Code Flag N | 1 green light |
| Slow Loading | 1 red flag | 1 red light |
| Full loading | 2 red flags | 2 red lights |
| Stop | flags lowered | lights out |
| Require launch | Code Flag L | signal lamp |
| Fire emergency | Continuous sounding of short blasts on whistle or siren | |

These signals will also be repeated ashore from a mast situated on top of the main administration office building, which is situated opposite the buoy berth.

*Jetty:* Method: gravity loading, maximum head 360 ft. rate regulated to requirements. Loading rates: two lines each 4,000 tons/hour. Two 8,000 tons/hour maximum.

*Buoy Berth:* Method: gravity loading, max. head 350ft. rate regulated to requirements. Loading rate: 4,000 t.p.h.

**SAFETY:** A copy of the Regulations will be given to Master when Company's Berthing Master boards at outer buoy. Masters should make themselves thoroughly acquainted with these Regulations, strict observance of which is required by the Company.

In the event of any infringement of the Regulations, operations may be stopped and, if so, will not be recommenced until the Company is satisfied that appropriate action has been taken by the Master to comply with all the Regulations. The Company also reserves the right to unberth a vessel in the event of a continued or blatant disregard of any of the Regulations. Any loss or expense to the Company resulting from an infringement of the Regulations and, in particular, in the event of an infringement leading to an interruption of operations and/or unberthing of a vessel, will be for the account of the Owners.

**FRESH WATER:** Not available.

**FUEL:** Not available.

**REPAIRS:** No shore facilities for carrying out repairs to vessels either at the terminal or at Tobruk.

**CONSULS:** No Consulates at Tobruk and the nearest locations of Consular officials are as follows:

Benghazi – 445 kilometres from Tobruk: France, Germany, Greece, Italy, Saudi Arabia, Tunisia, United Arab Republic, United Kingdom of Great Britain and Northern Ireland, United States of America, U.S.S.R.

Derna – 175 kilometres from Tobruk: Turkey.

El Berda (Beida) – 260 kilometres from Tobruk: Belgium, United States of America.

**CUSTOMS ALLOWANCES:** Cigarettes, cigars, tobacco, matches, spirits, wines, beer, perfume, arms, ammunition and saccharine have to be locked up under Customs' seal from time of vessel's arrival in harbour of Tobruk until time of departure.

Whilst in harbour, each member of crew allowed following: 200 cigarettes (the Master will be allowed 400); ½ bottle spirits (the Master will be allowed 1 bottle); 4 bottles of beer or wine per man per day.

No fixed allowances for cigars and tobacco.

Libyan law prohibits vessels from having on board any goods or containers of Israeli origin. Any vessel having such goods or containers on board on arrival in the harbour of Tobruk will be liable to a heavy fine and confiscation of the goods or containers. The Libyan Authorities may, moreover, refuse to clear the vessel.

**REGULATIONS:**

1. *Ships' Garbage.* Whilst within limits of harbour of Tobruk the throwing overside of ships' garbage is prohibited.
2. *Ships' Radio.* Once vessel berthed at Terminal the use of her radio will not be permitted.
3. *Ships' Boats.* Use of ships' boats not permitted within limits of harbour of Tobruk.

## MARSA EL BREGA: 30.25 N. 19.34 E.

**DOCUMENTS:** Customs and Immigration officials may not always board the vessel. All relevant documents are supplied by the Mooring Master and on completion of mooring the Master will fill in, sign and stamp the papers. These will be dispatched ashore and clearance granted by the officials on sighting all documents.

A. 2 copies Port Declaration, Form PC7. B. 3 copies Inward Report (title in Arabic), Form CL128. C. 3 copies Cargo Manifest Inward, Form CL1. D. 3 copies Report Outwards, Form CL4. E. 2 copies Crew Manifest Inwards, Form CL31.

Required when ships clear inwards, lists each member of the crew and all goods held (e.g. liquor, cigarettes, cameras, money, etc.) with crew members' signature opposite name or rank. This form is ordinarily supplied in advance so that it may be completed prior to arrival at Brega.

F. Cargo ships also require Ship's Cargo Manifest Form (3) with same information as C.

*Ships' forms required by Customs*

A. 6 copies Crew List, ships' form. B. 2 copies Stores List, ships, form. C. 1 copy Clerarance from Last Port, port's form.

*Forms required of cargo ships*

A. Report of Cargo and Ship's Ullages (original). B. Tanker Time and Loading Report (original). C. 3 copies Certificate of Cargo Discharge.

Master signs and stamps one copy at bottom of form. Other two copies are completed by Master at port of discharge, stamped and signed by Customs authorities, and then are mailed to Controller of Customs, Benghazi, Libya.

*Information required by Esso Standard Libya Inc. prior arrival*

The Owner, Charterer or Agent should airmail or cable following to Esso Standard Libya Inc., PO Box 385 (Field), Tripoli, cable address Essoship Tripoli:

(1) Name and flag of vessel.

(2) Dimensional characteristics, e.g. overall length, beam and maximum draft.

(3) Total tonnage, number and type of products or cargo on board.

(4) Number and size cargo hose connections on either side and distance in feet of each from the bow.

(5) Safe working load of derricks in vicinity those connections.

(6) Number of shackles of chain (90 ft. shots) on each anchor.

Information concerning dimensional characteristics need not be included in letter or cable after first call.

**LOCATION:** Marsa el Brega is located in the South-Eastern part of the Gulf of Sirte in Lat. 30° 25′ 0″ N., Long. 19° 34′ 3″ E. It is an open bay contained between Ras Magdar and an unnamed headland some 3 miles to the West.

The Brega sea buoy is located in Lat. 30° 27.55′ N., and Long. 19° 35.1′ E. A bow mooring oil loading fixed structure is located in Lat. 30° 26.0′ N., and Long. 19° 33.9′ E., with a fixed red light exhibited at a height 93 ft. above mean sea level. In addition, the structure is lighted by floodlights. Brega is radar controlled with the shore installation scanner in position 30° 25′ 02.5″ N., and 19° 34′ 55.6″ E. The height of the scanner tower is 112.2 ft. The Radio Beacon is located in Lat. 30° 25′ 00″ N., and Long. 19° 34′ 14″ E. The call sign is "M.B." and it operates continuously on a frequency of 403 kc/s.

A single point mooring is located in position Lat. 30° 26′ 45.26 N., and Long. 19° 34′ 01.40″ E. A single flare is located in position 30° 24′ 31.9″ N., and 19° 35′ 49.7″ E. Two other flares are located approximately 700 ft. to the West and South-west. The flares when burning can be seen at extreme distances. Numerous lighted and unlighted navigational and mooring buoys are located within the restricted area shown on BA Chart.

**PILOTAGE:** The services of a Pilot/Mooring Master are provided without charge. He will normally board the vessel in the vicinity of the Brega buoy and will advise the Master on approaches to the berths, mooring and unmooring, connecting and disconnecting cargo hoses, and all other operations within the berthing area. Vessels are cautioned not to enter the restricted area mentioned above without the services of a Brega Pilot/Mooring Master. Pilot ladder must conform to international safety standards.

**PRATIQUE:** Quarantine signals must be displayed upon entering Brega port limits in accordance with international practice and shall be continuously displayed until pratique is granted. The Libyan flag must be flown from the foremast when inside territorial limits.

**ANCHORAGE:** Anchorages located ½ mile East or South-east of Brega buoy in 12 to 18 fathoms. *Vessels should not remain at anchor in bad weather.* Vessels not permitted to anchor within ½ mile of the channels into the bay and inner harbour.

**RADIO:** Vessels bound Marsa el Brega not required call Tripoli for inward or outward clearance. Radio messages should be sent through Tripoli (via Malta if beyond communication range of Tripoli) and ETAs should be sent at least 48 hours but preferably 72 hours in advance. Master should state whether ETA in GMT or local time.

As cable office closed between midnight and 0800, allowance for delays in receipt of radio messages due to this and other causes should be made when sending ETAs and other urgent traffic.

Ships can communicate direct with Brega via the tug Simpson, call sign PHMV, operating on 500 kHz, range 200 miles. Berthing instructions and information concerning facilities and customs documents is available from tug Simpson.

Esso Standard Libya Marine Terminal equipped with short-range Radio/VHF Telephone Port Control System. The following procedure should be adhered to: Vessels approaching Brega and equipped with VHF should call Port Captain's office on Channels 16 and 12. Channel 16 is reserved for "Calling,", "Safety", "Emergency". When contact made, vessel will be allocated one of the four working channels: Channel 13, Channel 12, Channel 9, Channel 6. Esso Libya's Pilot launch is equipped operate on these channels. Portable radio sets available for vessels not fitted with VHF.

**TUGS:** Esso Standard Libya Inc. maintains tugs and mooring launches to assist vessels to moor and unmoor.

**BERTHING:** Tankers calling at Brega to load at the crude sealine berths should be equipped with a minimum of eight 10 in. circ. fibre or synthetic mooring ropes in good condition, not less than 120 fathoms in length. Mooring wires or equivalent strength are acceptable. A fibre or synthetic mooring rope in good condition must be available for towing vessels into berths by tug.

*Crude Tanker Sealine Berths Nos. 1 and 4:*

Berths 1 and 4 are now out of service. Ground chains and clumps for the mooring buoys, and the loading lines are still in position.

*Crude Tanker Sealine Berth No. 2:*

The least depth of water in this berth is 44 ft. The 30″ crude line is approx. 8,000 ft. long with two hose strings. Crude oil is loaded by gravity or pumps and rates up to 39,000 bbls. per hour can be obtained. When berthed the tanker is heading 330° true with both anchors out forward, and 6–700 ft. of chain on each anchor. The stern is secured to 5 mooring buoys fitted with quick-release hooks. The submarine hoses are picked up amidships on the port side of the tanker and the vessel's derricks should have a safe working load of 5 tons.

A naphtha line with a single 12 in. connection will shortly be laid in this berth, the shore line being 24 in. In the event that a vessel loads naphtha, then both crude hoses will be taken on board first before connecting the naptha hose. In good weather, Berth No. 2 can safely accommodate a 65,000 dwt tanker with the following principal dimensions: 65,000 dwt; length, 800 ft.; beam unrestricted, up to 42 ft. draft in good weather. Gravity of sea water about 1030.

*Crude Tanker Sea-line Berth No. 3 – bow mooring*

The bow mooring is located in approximately 95 ft. of water, and consists of a fixed pylon surmounted by a revolving boom from which hangs a submerged oil-loading pipe arm. The main structure has a diameter of 130 ft. and is 97 ft. above mean sea level at its highest point. The pylon is surrounded by a fender ring which is mounted on vertical steel piles. The revolving boom is 76 ft. in length from the centre of the pylon to the end. The loading arm hangs from a ball joint at the end of the boom and is approximately 560 ft. in length, terminating in a hose handling platform on the outer end. The hose platform is kept at the level of the ship's deck by means of a compressed air ballasting and deballasting system. Four 12 in. hoses hang from the platform. Vessels are normally berthed port side to the platform. Derricks should have a safe working load of 5 tons. A maximum loading rate of 65,000 bbls. per hour may be realised with the loading pump in operation.

Vessels are moored in position using two head ropes to the bollards on the boom and with a 6 in. nylon back spring mooring line to the hose-handling platform. In addition, a 4½ in. nylon snubber line is used to keep the platform alongside the ship. Vessels with the following principal dimensions can be accepted: 100,000 dwt., overall 1,000 ft., beam unrestricted, draft 48–49 ft., bow to manifold not to exceed 434 ft. Larger vessels may be accepted with prior approval.

*Crude Tanker Sealine Berth No. 5 – Single Point Mooring:*

No. 5 SPM is located in approx. 140 ft. of water and is in position 30° 26′ 47″ N., 19° 34′ 01.4″ E. The mooring consists of a monobuoy to which are attached 2×15 in. synthetic lines. These are shackled to a single 3 in. chain partly around which is a flotation cover. On the end of the chain is a 9 in. polypropolene line.

Mooring is effected by heaving the polypropolene through the bow as near the centre lead as possible until the chain is on board, and then shackling two 12 in. perlon strops to open links in the chain. The strops and shackles will be placed on board with the Pilot and vessels are advised to have the port derrick ready to hoist the gear on board at that time. The vessel is also required to have a good 3½ in. to 4 in. messenger line of at least 75 fathoms in length, ready for use on the fo'c'sle head.

The 48 in. pipe-line is approx. 11,850 ft. long, terminating at the underbuoy structure on the seabed. Crude is loaded through one string of self-floating 24 in. hose with one 16 in. over-the-rail hose to the ship's manifold. Vessel's derricks should have SWL of 10 tons and if necessary be double rigged. The weight of a normal lift for connection to the ship's manifold amounts to less than 5 tons. This is for a hose free of oil, which is usually the case. Vessels with the following principal dimensions can be accepted in this berth: 300,000 dwt. Length beam and draft unrestricted. Flow rate 48,000 bbls/hr.

*Berths Nos. 3 and 5:*

Vessels entering the restricted area on the approach to, mooring and leaving, these two berths must at all times have their anchors firmly secured. No anchor work may be carried out at any time whilst a vessel is in this area.

*Product and Asphalt Tanker Berth*

Small tankers delivering refined petroleum products and asphalt to Marsa el Brega will be berthed at the product dock. Products will be discharged through a number of small pipe-lines approximately 2,000 ft. long. 3 in. or 6 in. hoses are provided according to the grades of oil being discharged. Asphalt will be discharged through one 10 in. pipe-line. Vessels assigned to discharge at this berth must be suitably equipped with mooring ropes and have derricks capable of lifting 2 tons.

Vessels cannot be berthed or remain alongside the breakwater except in fine weather. The breakwater is equipped with resilient fendering and ample mooring points. Tankers will be berthed by an Esso Standard Libya Pilot/Mooring Master. Two tugs are available, and a launch will run the mooring lines. In good weather vessel with the following principal dimensions can be accepted: Overall 500 ft., beam unrestricted, draft 26 ft. maximum.

*Dry Cargo Dock.*

Vessels assigned to discharge dry cargo at Marsa el Brega will be berthed alongside the dry cargo dock by an Esso Standard Libya Pilot/Mooring Master. The minimum depth alongside and in the approach is 30 ft. Two tugs are available. A mooring launch will be available to run mooring lines. The dry cargo dock is fitted with resilient fendering and ample mooring points. During winter it may be necessary to leave the berth during bad weather, and the Master is responsible for requesting the removal of the vessel under his command. He will also be held responsible for any damage sustained by the jetty and/or his vessel. A Pilot/Mooring Master will be standing by at all times.

All mooring ropes should be in good condition and none should have more than one short splice in the useable length. Crew shall keep the moorings tendered and properly lighted day and night.

Ships shall provide their own gangways and the crew shall keep them lighted and tendered, day and night. Ships must be equipped with adequate unloading gear. All cargo will be off-loaded with the use of ship's gear. When weather permits, derricks should be topped at sea prior to arrival.

The length of the dry cargo dock is 650 ft. The maximum size ship which can be accommodated is 500ft. overall, beam unrestricted, *maximum draft 26 ft.* Slightly deeper drafts may be acceptable depending on weather conditions.

**MEDICAL:** There are limited medical and no dental facilities at Marsa el Brega. Personnel requiring urgent medical treatment may obtain it, but this will only be undertaken in serious cases. Masters of vessels arriving at Marsa el Brega who require medical treatment should give advance notice of their requirements by radio.

**FRESH WATER:** No fresh water is available.

**FUEL:** No bunkers are available.

**REPAIRS:** No repairs are allowed to ship's engines while ve are moored in the berths. Ship's engines should be ready for us short notice in case the vessel has to vacate the berth sudd because of bad weather. There are no repair facilities for s available at Brega.

**REPATRIATION:** Crew members cannot pay off or leave vessel at Marsa el Brega except in cases of emergency. Even i emergency, it should be noted that seamen's Books are not under the Libyan law. A valid passport is required, and with quate notice by radio it is possible to obtain an exit visa for a member leaving in an emergency.

**SHORE LEAVE:** Passengers and crew members are not mitted to land for reasons other than emergencies.

**AUTHORITY:** Esso Standard Libya Inc.

## RAS LANUF: 30.31 N. 18.35 E.

### Sirtica Terminal

**DOCUMENTS:** Customs will require:

1 Crew List.
1 Crew Declaration of personal belongings (including cigare etc.)
1 Store List.
1 Passenger List.

Crew Lists and Crew Declaration of personal belongings must b the approved Libyan Government Documents. Vessels are adv on their initial visit to the port to obtain sufficient forms for fu visits. Also required are:

6 copies of Cargo Manifest for Ras Lanuf Discharge.
1 copy of Cargo Manifest for transit cargo with a summary.
1 Copy of Passenger Manifest.

Clearance from the last port of call will be required by the Gov ment authorities. The police will require 4 copies of a Crew List a Passenger Manifest if any passengers on board.

**PILOTAGE:** It is most important that ships establish commun tions with the terminal not less than 72 hours prior to arrival, gi estimated time of arrival. Further ETA signals should be sent w the vessel is 24 hours, 12 hours and 4 hours distant or any tim change of one hour in original ETA occurs. These messages sho state specifically whether ETA is given in GMT or local time. T 72-hour signal should include the following: ETA, last port of ca any sickness on board and if vessel has clean bill of health. Ca quantity and grades expected to be lifted in net long tons at 60°F. T 12-hour signal should include definite indication as to whether vessel is ready to load or not and should also include informa on the time she will require to discharge ballast after arrival. Prec time of arrival should be given when the ship is 4 hours distant fr the terminal.

Vessels to be moored, anchored or manoeuvred at Ras Lanuf be boarded by Mooring Master in the close vicinity of the sugges anchorage area mentioned below. The Mooring Master will adv the Ship's Master on approaches to berths, mooring, unmoor connecting and disconnecting the hoses and in all operations wi the anchorage or mooring area.

Terminal sea buoy, colour red with radar reflector and bel located in approximately Latitude 30° 32′ 40″ North, Longitude 34′ 38″ East. Vessels in the vicinity of the port should not navig or anchor inside of a bearing 120°–300° running through this bu position.

**ANCHORAGE:** Suggested anchorage area is within a 3,000 radius of position Latitude 30° 33′ 00″ North, Longitude 18° 35′ East in approximately 90 ft. of water.

**MAX. SIZE:** Conventional berths: up to 60 ft. draft; up to 130,0 tons dwt.

Single Point Mooring: up to 75 ft. draft, up to 265,000 tons dw

**HEALTH:** By day – fly flag "Q" and by night display red light o white light for Quarantine Service.

Libyan Customs, Federal Police and Immigration Officials w board the vessel as soon as possible after arrival to give inw clearance and "pratique" services. Libyan Government Regulatio are strictly enforced. The vessel should have a clean Bill of Health equivalent document from the last port of call. The vessel's Mas and all members of the crew shall possess International Certifica of Health showing valid smallpox Vaccination Certificates.

**RADIO:** Direct communication by radio between ship and shore by VHF International Maritime Mobile Radio-telephone Service Ras Lanuf Oil Movements Control Centre. All communica between ship and terminal should be by way of this station. ET messages to Mobilpro, Tripoli, Libya, via Malta Radio (call si VPT). Ras Lanuf Oil Movements Control Centre keeps continuo watch on VHF Radio-telephone Channel 16 (156·80 mc/s), Chan 14 (156·70 mc/s) and Channel 11 (156·55 mc/s). Vessels approach the port should make contact on Channel 16 when shore will requ her to switch to Channel 14. This channel will also be used by termi Marine Section for internal use and tanker mooring control. Chan 11 is reserved for communications between ships in mooring a Terminal Oil Movements Control Centre and should only be us for general purposes after obtaining clearance from Oil Movem Control on Channel 16. This is a safety measure since oil flow ships is controlled through Channel 11 and therefore it must be cl at all times in case of need to stop oil flow for any cause. Chan 16 is for calling and safety use only.

**TUGS:** Not required. The company maintain launches to assis mooring and unmooring vessels. These are under the direct supervision and control of the Mooring Master.

**BERTHING:** There are four submarine loading pipe-lines which terminate in the following approximate positions which are each marked by an unlit white spar buoy.

Berth No. 1: Latitude 30° 31′ 35″ North, Longitude 18° 34′ 37″ East, from which a submarine pipe-line runs to shore on a bearing of approximately 224°. Depth of water at spar buoy 70 ft.

Berth No. 2: Latitude 30° 31′ 55″ North, Longitude 18° 33′ 58″ East, from which a submarine pipe-line runs to shore on a bearing approximately 197°. Depth of water at spar buoy 70 ft.

Berth No. 3: Latitude 30° 32′ 18″ North, Longitude 18° 33′ 19″ East, from which a submarine pipe-line runs to shore on a bearing of approximately 198°. Depth of water at spar buoy 73 ft.

*Berth No. 4:* Lat. 30° 31′ 35″ N. Long. 18° 33′ 00″ E. – a Single Point Mooring buoy in 95 ft. of water.

Raising, lowering, connecting and disconnecting of submarine hoses, as well as all other labours and duties on shipboard, will be performed by the ship's crew under direction of the Mooring Master.

**LIFTING HOSES:** After the vessel is securely moored the submarine hose will be hoisted on the port side. Berths No. 1 and 2 are each equipped with 2×12 in. loading hoses, the weight of each hose lift being approximately five long tons. Berth No. 3 is equipped with 2×12 in. loading hoses the weight of each hose lift being approximately 5.75 long tons. Therefore, all lifting equipment and tackle should have a safe working load of at least 6 long tons. Hoses are lifted by ship's gear and crew, and all connecting of hoses will be done by them. The lifting derrick, equipment, tackle, etc., should be topped off and ready on arrival.

The SPM is equipped with two 16-in. loading hoses, ending in 12-in. reducers.

**MEDICAL:** No medical services (except in case of emergency and subject to a doctor being available) or other services are to be expected at Ras Lanuf.

**FRESH WATER:** Not available.

**FUEL:** Not available.

**REPAIRS:** When a ship is in the moorings or vicinity, its engines must remain on standby with full power for immediate use. Deck machinery shall be kept in instant readiness. *Positively no repairs of any sort will be permitted in the moorings.*

**CUSTOMS ALLOWANCES:** Cigarettes, cigars, tobacco, matches, spirits, wines, beers, perfume, arms, ammunition, saccharin and possibly other items have to be locked up under Customs seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed 25 cigarettes per day of stay or 25 grams of tobacco or cigars in lieu. Each man is allowed one litre of beer or half litre of wine per day. Special allowances are made for Master under special circumstances.

**CONSULS:** The only Consulates are located in Tripoli which is 670 kilometres by road from Ras Lanuf. These consist of U.S.A., British, Danish, Dutch, United Arab Republic, French, German, Greek, Indian, Italian, Norwegian, Spanish, Russian (U.S.S.R.), Turkish, Yugoslavian.

**REPATRIATION:** Crew members cannot pay off or leave the vessel at Ras Lanuf except in cases of extreme emergency. Even in an emergency it should be noted that Seamen's Books are not valid under the Libyan law. A valid passport is required.

**BALLAST:** Positively no provision is made for dirty ballast. Any ship arriving with dirty ballast will be rejected and all costs accruing therefrom will be to the ship's account. Notice of readiness shall not be accepted until vessel returns with clean ballast and tanks fit to receive cargo. She will on second arrival tender a new notice of readiness to load.

**TIME:** Libyan local time is GMT plus 2 hours.

**GENERAL:** No stores, foodstuffs or goods whatsoever of Israeli origin may be on board any ship calling at Ras Lanuf.

Penalties: Fine, confiscation of goods and possibly more. The Libyan Government strictly enforces this law.

Whilst arriving fly the Libyan Ensign (red side up).

Due to the existence in these waters of the fish commonly called "Weaver" fish, ship's crews are urged to exercise extreme caution in fishing whilst lying off the port area. There have been several cases of poisoning by these fish, all of which were distressingly painful, caused by contact with the fins.

When a Mooring Master and his shore crew, which includes launch crews, are assigned to a ship on business, it is expected that the ship will supply them with meals at the same time and in the same manner as comparable personnel of the ship. No special meals or special foods will be required. The terminal will keep this item to a basic minimum. The ship will also provide shelter and smoking facilities in the same manner as meals. All communications between shore personnel assigned to a ship and ship's personnel should be through the Mooring Master.

**SHORE LEAVE:** Not allowed.

**AUTHORITY:** Mobil Oil Libya Limited, Sciara Giama al Magarba, PO Box No. 690, Tripoli, Libya. Telephone: 30081. Cable address: Mobilpro, Tripoli.

## TOBRUK: 32.04 N. 24.00 E.

**DOCUMENTS:** A. Customs Requirements; on the arrival of a vessel, the Tobruk Customs Authorities will require from the Master of the vessel:

4 Crew Lists.
2 Ship's Stores Lists.
2 Declarations of Crew's Personal Effects, including currency, cigarettes, gifts, etc.
4 Passenger Lists.

B. Harbour Master's Requirements: on the arrival of a vessel, the Tobruk Harbour Master will require from the Master of the vessel:

1 Crew List.
1 Passenger List.
1 Ship's Manifest.
1 Port Declaration (form will be made available to each vessel on arrival).

**BERTHING:** Berths in Tobruk Harbour:

Quay No. 3: Length 82 ft. draft 11 ft.
Quay No. 4: Berth 1: Length 560 ft. draft 20 ft.
Berth 2: Length 395 ft. draft 28 ft.
Berth 3: Length 410 ft. draft 30 ft.

**TANKERS:** Refer to "Marsa Al Hariga".

**FRESH WATER:** Not available.

**FUEL:** Not available.

**REPAIRS:** No shore facilities for carrying out repairs.

**CONSULS:** No consulate at Tobruk and the nearest locations of consular officials are as follows:

Benghazi, 445 kilometres from Tobruk: France, Germany, Greece, Italy, Saudi Arabia, Tunisia, United Arab Republic, United Kingdom, United States of America, U.S.S.R.

Derna, 175 kilometres from Tobruk: Turkey.

El Berda (Beida), 260 kilometres from Tobruk: Belgium, U.S.A.

**CUSTOMS ALLOWANCES:** Cigarettes, cigars,tobacco,matches, spirits, wines, beer, perfume, arms, amunition and saccharine have to be locked up under Customs Seal from time of vessel's arrival in harbour of Tobruk until time of departure.

Whilst in harbour, each member of crew allowed following: 200 cigarettes (Master allowed 400), ½ bottle spirits (Master allowed 1 bottle), 4 bottles of beer or wine per man per day. No fixed allowance for cigars and tobacco.

Libyan law prohibits vessels from having on board any goods or containers of Israeli origin. Any vessel having such goods or containers on board, on arrival in the harbour of Tobruk, will be liable to heavy fine and confiscation of the goods or containers. The Libyan Authorities may, moreover, refuse to clear the vessel.

## TRIPOLI: 32.54 N. 13.13 E.

**PORT LIMITS:** The water area existing inside the actual breakwater and that which may fall within any new breakwaters eventually constructed in accordance with the Port Developments Project

The outer water area known as the navigational channel commencing as from the harbour entrance along the distinguishing marks of the channel for a distance of 2 kilometres.

**DOCUMENTS:**

7 copies, Crew Lists.
6 copies, Passenger Lists.
Documents required by Customs: Crew Declaration on Bonded Stores. Stores List. Provisions List. Currency List.
Health Documents required: Health Declaration. Cholera and Smallpox Certificates.
8 copies, Manifests.
Bill of Lading – only for the Shipping Agent.
Ship's papers – Registration Certificate, Log Book, Health Certificate, and all Certificates according to the International Sea Conventions – oil record book.

**PILOTAGE:** By cable or VHF or radio, half an hour notice of ETA required. Possible to contact by international radio frequency 500 kc. Harbour Master via (VHF) Channel 16 frequency 500 kc. Pilot boat flies "H" flag. Pilot boat could be requested by three continuous long whistles. Pilot boat will meet ships outside the harbour. Ships waiting Pilot anchor outside the harbour if weather is good. In case of bad weather ships could enter harbour at their own risk and anchor inside. After getting permission from Harbour Master by radio or any other way. In case Pilot could not board, vessel should contact Harbour Master via radio station for instructions.

Compulsory regardless of tonnage.

**RESTRICTIONS:** All ships can enter the harbour between sunrise and sunset, otherwise, special arrangements should be made with the Harbour Master after 2300 hrs.

Vessels built before 1950 will not be allowed to enter the port of Tripoli for the purpose of discharging cement cargoes. The draft for cement carriers should not exceed 22 ft.

**CLEARANCE:** Master required radio Agent/Port Authority before arrival advising the loading port, Master's name, vessel's net and gross registered tonnage, vessel's length and draft fore and aft, ETA, quantity and quality of any dangerous cargo on board, number of crew and passengers, and health situation.

**HEALTH:** Quarantine Flag should be hoisted until the doctor has been onboard. There is no automatic "free pratique" for a vessel arriving from another port of Libya.

**MAX. SIZE:** All types of ship of less than 27 ft. draft are safe in port. Tide does not exceed 2 ft.

**RADIO:** Tripoli Radio operates H/F, W/T and R/T service. Continuous watch from 0800 z to 1400 z daily. Traffic lists are transmitted every hour on the half hour on 8745 kHz during working periods. The station searches from 8350 to 8500 kHz during working periods and after traffic list. The station accepts traffic for Libya and abroad. R/T–H/F service on 4383·4 kHz but after prior request on H/F or M/F.

It is imperative that vessels contact the wireless station Tripoli port from a distance of 30 miles from the port. Giving the vessel's position. The wireless station operates from 0700 to 2000 on the following frequencies: 500 Mz., 2182 Mz. and Channel 16 VHF. Call sign "Tripoli Port Radio".

**TUGS:** Tugs are available immediately when the Pilot boards the ship.

**BERTHING:**

*Main Port:*

Quays no 6 to 14; depths alongside 22 ft.

*Karamanli:*

| | |
|---|---|
| Berth no. 1; | max. depth alongside 27 ft. 6 in. |
| " no. 2 and 3; | " " " 22 ft. |
| " no. 4; | " " " 15 ft. |

Buoy Berth no. 4; depth 27 ft. 6 in.

Other buoys: depth 23 ft.

**CARGO HANDLING:** No special equipment for handling bulk cargoes beside mobile elevators owned by a private mill company for the discharging of their own wheat consignments.

No special berths equipped for containers or roll-on/roll-off traffic which is handled on the usual available quays.

A floating crane is available and has lifting capacity of 100 tons.

**MEDICAL:** All facilities available. Doctors require 12 hours notice.

**TANKERS:** Berths at Karamanli Mole, 27 ft. draft.

**FRESH WATER:** Fresh water available. Should be obtained from the Port Authority.

Supplied alongside wharf, also supplied by barge.

**FUEL:** Suppliers need 24 hours notice of bunker requirements. Advisable for Chief Engineer to check what grades are available. before ordering.

**OPENING/CLOSING HATCHES:** This is required to be done by crew.

**CUSTOMS ALLOWANCES:** 200 cigarettes for each crew member. Wines and spirits, 1 litre for each crew member.

Captains are requested to declare on arrival all quantity of alcohol, cigarettes and money in the possession of each crew member by filling in the Crew Declaration Form put forth for that purpose. The Master and his crew are strictly forbidden to offer alcoholic drinks to workers, employees and authorities having any business relation with the vessel.

No extra alcoholic drink is to be kept exceeding the quantity legally restricted to each crew member.

No crew member is allowed to take gifts out of his ship.

**IDENTIFICATION CARDS:** Identity cards, Passport, Discharge Book or Seaman's Book required.

**REPAIRS:** No repairs are possible in Tripoli.

**REPATRIATION:** Crew changes are possible as a number of major air lines operate to and from Tripoli.

**AIRPORT:** Tripoli Airport is about 27 km. from the city centre. There is a daily service to Europe.

**DEVELOPMENTS:** Expected draft increase up to 35 ft. Completion around 1975.

**WATCHMEN:** Available on request.

**CONSULS:**

**TIME:** 2 hours ahead of GMT. No alterations.

**HOLIDAYS:** Revolution Day (1st September of each year); Evacuation Day (31st March of each year); Eid El-Fitr (3 days around January); Eid El-Adha (3 days around March); New Year (Heja) (1 day around April); Prophet's Birthday (1 day around June); Ashoura (½ day around April); Rajab (½ day around October); Shaban (½ day around November).

6th May, Sudan Revolution Day; 6th June, Libyan Evacuation Day (2nd Day); 23rd July, RAU Revolution Day.

**POLICE/AMBULANCE/FIRE:** Main Port call telephone 31808, 39111. Karamanli Wharf call telephone 30378.

**GENERAL:** Radio transmitters will be sealed by Port Authority whilst vessel in harbour. The Bond seals must remain unbroken if vessel is proceeding to another Libyan Port.

**SHORE LEAVE:** Allowed if ship berthed alongside a quay and after clearance from police. Shore passes delivered to vessel, in exchange for the Discharge Books and Vaccination Certificates of the crew members.

**REGULATIONS:** Ship lifeboats are not to be used within harbour limits.

Wines and /or Spirits are not be taken ashore.

Foreign currency not to be taken on shore.

No engine repairs to be carried out in port whilst alongside without the prior authority of the Harbour Master.

Every vessel calling at Libyan Ports, should have on board full sets of cargo documents, copies covering consignment, such as commercial invoice, certificate of origin, Bill of Lading, etc. This procedure will facilitate vessel's berthing, quick discharging and cargo withdrawal from the Customs Area, and in particular cargoes under direct delivery regime and heavy lift parcels. The dischar operations shall continue *until midnight*, and it is shortly expe that at a later date these operations will be performed during the 24 hours of the day. It is strictly prohibited to discharge heavy lifts on quays whatever the motive or the cause.

Vessels to contact Tripoli Port Radio when 30 miles from harbour.

**BERTHING PRIORITY:** The authorities have introduce berthing priority scheme as follows:

(*a*) Vessels carrying fruit, vegetables, trees and animals' feed
(*b*) Regular liner vessels carrying general cargo stowed prope
(*c*) Palletised cement vessels.
(*d*) Bundled timber vessels.
(*e*) Vessels provided with modern and working winches.

**DELAYS:** Vessels usually have to wait 1 to 2 days for a berth.

**AUTHORITY:** Directorate General of Ports, PO Box 648, Tri Libya. Telephone 33100.

## ZUEITINA: 30.51 N. 20.00 E.

**LOCATION:** The Terminal Light Float, moored in position 30° 00″ N. 20° 00′ 00″ E., has a red hull with a black and white vertic striped tower; it shows at night a white light flashing every seconds. A prominent landmark is the radio mast (height 451·5 above sea level) in position 30° 49′ 57.6″ N. 20° 03′ 05.5″ E.; it displ at night three red lights in a vertical line – the top light flashing, two lower fixed. The top light is on top of the mast (which is 40 above the base), the middle light is 226 ft. above the base, and lowest light is 133 ft. above the base. At night flares at the Liq Petroleum Gas Plant, in position 30° 54.2′ N. 20° 05.4′ E., can be se from a considerable distance; by day a column of smoke emanat from this position is also conspicuous. Fourteen large oil tan painted white, near the foot of the Radio mast, are prominent la marks.

**DOCUMENTS:** Soon after vessel's arrival, a Custom's official board, accompanied by a Company employee, who will act on beh of the ship and it's Agent, as well as on behalf of the Company, the execution of essential ship's business. The following documen signed by the Master and stamped with the ship's official stamp, required by the Customs official for the Customs and Immigrat Departments and for the Port and Lights Authority:

2 Entering and Leaving Territorial Waters Certificates.
2 Report Inwards Certificates.
2 Crew Declarations of Dutiable Goods.
2 Report Outwards.
3 Boycott Certificates.
2 Stores Lists.
5 Crew Lists.
1 Clearance from Last Port of Call.
2 Tanker Characteristics Certificates.

With the exception of the Crew Lists and the Stores Lists and clearance from the Last Port, the above forms will be provided by Company's representative.

**PILOTAGE:** Es Zueitina Terminal is situated on the Libyan coa in the Gulf of Sirte, 72 miles distant from Benghazi. The terminal s buoy, painted black and white vertical stripes and at night show one flash (white) every 10 seconds, is located in position Lat. 30° 39″ N. Long 19° 58′ 00″ E. A radio tower, in position Lat. 30° 49′ 5 N. Long. 20° 03′ 05·6″ E., the height of which is 451·5 ft. above sea lev is a prominent landmark. It displays at night three red lights in vertical line, the top light flashing, the lower two fixed.

A Mooring Master will board the vessel ½ to 1 mile W.N.W. terminal sea buoy and advise Master on all manoeuvres relative berthing, connecting and disconnecting the hoses.

Vessels of 40,000 tons or over are requested to have a pilot lad long enough to reach Mooring Master's launch rigged alongside accommodation ladder, in order that the Mooring Master may tran fer to it after 7 or 8 ft. Adequate lighting should be provided a vessels should make a lee.

Vessels of 40,000 tons dwt. and upwards which are not fitted w a mechanical pilot hoist should have a pilot ladder long enough reach the Mooring Master's launch rigged alongside the acco modation ladder, in such a manner that the Mooring Master c transfer to the accommodation ladder when about 10 ft. from s level. Ladders must be strong, clean, and in good state of repair a well secured. A good lee should be made, to allow the launch come alongside and the Mooring Master to board safely.

**ANCHORAGE:** Vessels awaiting the Mooring Master should hea to in the close vicinity of the terminal sea buoy. If they are obliged instructed to anchor, they should do so in the recommended anch age, which is within the radius of a circle centred in position La 30° 55′ N., Long 20° 01′ E. Under no circumstances should th anchor South of the 30° 54′ 00″ parallel.

**RADIO:** 72 hours prior to arrival at Es Zueitina, vessels should adv Occidental of their estimated times of arrival by cables sent Tripoli Radio (Cable address: "Oxyport", "Oxylibya" Tripolilib They should also confirm or amend them when they are 48 hours a again when 24 hours distant from the port.

In addition to cabling via Tripoli Radio, vessels may inform "O port Oxylibya" of their ETA by cables. Vessels equipped w VHF radio-telephone should contact "Zueitina Marine" on Chann 16 or 13 when they are within range and request berthing instructio

All vessels entering the Gulf of Sirte bound for Zueitina oilp must cable "Arkcomar Benghazi" at the earliest opportunity questing permission to enter Libyan territorial waters.

The cable must also show: Ship's name, flag, ETA Zueitina, last port, number of crew, health situation. This message will then be passed to the port and naval authorities at Zueitina. Vessels do not usually receive a reply.

**PRATIQUE:** Pratique will be granted by the Custom's official. He will examine the ship's logbook, and will inspect and seal the bonded stores rooms. Each member of the crew is allowed 25 cigarettes or 25 grammes of tobacco, one litre of beer or half a litre of wine for every day of the vessel's stay in port. Other tobacco and cigarettes, wines, beers and spirits, as well as matches, arms and ammunition and saccharine will be retained under seal whilst the ship is in Libyan waters.

**TUGS:** No tugs available to assist berthing.

**BERTHING:** The sea terminal consists of five berths, two of which – "Bravo" and "Delta" – are conventional buoy moorings, and the others – "Alpha" "Charlie" and "Echo" – are "single-point moorings", or "mono-buoys". Conventional buoy moorings "Bravo" and "Delta" are approximately 2½ miles off shore, with an average depth of 70 and 80 ft. respectively. 42 in. (ID) submarine lines connect the berths to the shore installations. Two 12 in. hoses connect the header at the end of the submarine line to the ship's manifold. They are taken up on the port side. The weight to be lifted on each string is approximately 6 tons.

Single-point Moorings "Alpha", "Charlie" and "Echo" are all approximately 3 miles off shore, in an average depth of 100 ft. of water. As in the conventional buoy berths, the hoses are always taken up on the port side, and the connection to the ship's manifold is by a 12 in. ASA flange. The weight of each string to be lifted is approximately 3 tons.

*Single-point Moorings.* The "Mono-buoy" is a large cylindrical buoy (weight 106 tons), divided by steel bulkheads into four watertight compartments, through the centre of which emerges the loading hose. The perimeter of the buoy, to which the buoy-to-ship moorings are attached, is a turntable which revolves on bogies round the centre – hose-supporting – section, in such a manner that the vessel berthed on the buoy will always lie head to wind. The minimum depth of water within the swinging radius of the largest ship envisaged at the buoy is approximately 95 ft.

The port approach rope, a 600 ft. length of 10 in. plaited polypropylene, is taken up first, and the ship is hove steadily towards the buoy. The starboard approach rope – 330 ft. of 10 in. plaited polypropylene – is also brought aboard when within range, and both lines are hove on until the chafing chains lie across the fairleads.

*Loading.* Rate of loading is between 32,000 and 50,000 bph.

*Conventional Buoy Moorings.* In berths "Delta" and "Bravo" the ship is berthed with two anchors ahead and seven mooring lines to buoys round the stern. As the mooring buoys are at distances of from 500 to 650 ft. when the ship is in position, vessels should have ropes of 200 fathoms ready for running out on each side of the after deck to warp ship into position. Where vessels are not so equipped, two ropes (of such length as to have the eye splice inboard when in position) should be married together and flaked out on deck clear of all obstructions and ready for running. Lifting, lowering, connecting and disconnecting hoses will be performed by ship's personnel under the direction of the Mooring Master.

In the conventional buoy moorings, in order that ships may be securely moored against beam winds and the chain sufficient leading ahead to ride out heavy swells, we recommend that they be equipped with ample chain on both bower anchors. Experience gained in sea berths suggests that the chain required should be more than the length of the ship. In vessels of 100,000 tons dwt., for which the berths were designed, we recommend that there should be 14 shackles (1,260 ft.) of chain on each anchor. A minimum acceptable amount of chain is 150 fathoms (10 shackles) for the safety of the ship and the company's installations. Anchor marker buoys should be used.

**HOSES:** Ship's derricks and deck winches should be capable of operating with a safe working load of 7½ tons and preferably 10 tons. Vessels with inadequate hose-lifting equipment will be rejected. All derricks should be fitted with "preventer-guys" in addition to normal guy tackles. The port derrick must be rigged and ready for use on arrival. In addition ships leaving SPM should have the starboard derrick ready, too, in order to facilitate the discharge of the mooring gear on the lee side.

**CARGO:** The principal cargo loaded at Es Zueitina Terminal is Occidental Field Blended Crude Oil, average API 40·0 – average loading temperature on board 108°F. Also loaded is Occidental Premium Crude Oil – average API 43·5, average loading temperature on board 108°F.

Care must be taken not to overload, as there is no provision whatsoever for cargo to be pumped back ashore.

*"Agip" Crude – Specifications and Characteristics:*

At 160° Fahr., API Gravity = 44·0; specific gravity = 0·8063. At 150° Fahr., API Gravity = 52·0; specific gravity = 0·7711. Pour Point = plus 104° Fahr. – could reach 115°. Cloud Point = 158° Fahr. Wax content = 37%.

If the temperature is allowed to fall below 130°F., it is anticipated that the wax will be deposited in the inner surfaces of pipes and tanks. Below 115° it will start to solidify, and below 100° F. it is solid.

**LPG MARINE FACILITIES:** *Arrival.*

The Mooring Master will board the LPG tanker in the vicinity of the Terminal Light Float. Pratique and Customs formalities will be completed prior to the vessel berthing.

The Mooring Master will leave the vessel when she is safely moored in the berth.

*Berth:* The LPG berth is S.S.W. of the Small Craft Harbour, inside the Tre Scogli reef. It is designed for vessels of approximately 550 ft. in length with a cargo capacity of 1,500 cubic metres; the maximum loaded draft permissible is 36 ft. Permissible draft at LW springs 28 ft. 6 in. Minimum depth alongside dock 36 ft.

The berth comprises of loading platform and control tower, with a breasting dolphin 125 ft. on each side of the loading point. There are four mooring buoys, one on each bow and one on each quarter; the length between them is 1,090 ft. and the thwartship distance is 315 ft. In addition, there are two mooring dolphins, 190 ft. on each side of the loading point and 135 ft. on the centre line of the berth.

The berth heading is 285° (T).

The loading platform is of structural steel, supported on concrete piles. From a control tower, two continental Emsco Cema type II loading arms are operated, one for liquid petroleum gas and one for vapour return. Connections to the ship's manifold are 12-in. ASA.

The maximum loading rate is 10,000 barrels per hour.

*Loading procedure:* "Occidental" will advise the ship on the characteristics of the cargo such as temperatures, loading rates, etc. The Master must advise in writing the loading rates that can be accepted.

Inert gas is not provided at Zueitina Terminal. The vessel must provide inert gas for purging previous cargoes other than propane or butane. The ship will not be loaded if the air has not been purged until a maximum oxygen content of 5% has been reached.

**MEDICAL:** Medical facilities are restricted to treatment of emergency cases only.

**FRESH WATER:** No fresh water available.

**FUEL:** No bunkers available.

**REPAIRS:** There are no engineering repair shops.

**REPATRIATION:** Only in an emergency can any crew member be paid off. Seamen's discharge books are not recognised in Libya. Crew members are advised to have a valid passport in their possession in case of emergency.

**CUSTOMS ALLOWANCES:** Each member of the crew is allowed 25 cigarettes, or 25 grammes of tobacco, one litre of beer, or half a litre of wine, for every day of the ship's stay in port. Other tobacco and cigarettes, wines, beers, and spirits, as well as matches, arms and ammunition, and saccharine, must be locked under seal from the time of arrival until the time of departure from territorial waters.

**CONSULS:** There are consulates in Benghazi for most of the maritime nations. Those nations not represented in Benghazi are represented in Tripoli.

**BALLAST:** As there are no ballast discharging facilities at Zueitina, vessels must arrive at the terminal with clean ballast ensuring that all pipelines, pumps and strainers have been flushed out prior to arriving and not within 100 miles of the Libyan coast.

**GENERAL:** Vessels are advised not to have on board any articles whatsoever of Israeli origin. All ships must fly the Libyan flag when inside Libyan territorial waters. Being an open roadstead, vessels must keep engines on stand-by during their stay in the moorings. No repairs to main engine may be undertaken in berth. Steam must be kept on deck in case adjustments to anchor cables or mooring lines are found necessary.

**SHORE LEAVE:** No shore leave is permitted.

**AUTHORITY:** Occidental of Libya Inc.

# Madeira

## FUNCHAL: 32.38 N. 16.55 W.

**DOCUMENTS:**

Maritime Declaration of Health Form.
5 Crew Lists.
12 Lists of Passengers finally landing.
5 Lists of Passengers in transit.
1 List of Stores and Provisions, including Deck and Engine Stores.
1 List of Contents of shops on board.
6 copies of Manifest of Cargo for discharge.
2 copies of each B/Lading of Cargo for discharge.
1 copy of Manifest of Cargo in Transit.
1 List of Passengers finally landing, visaed by Portuguese Consul at original port.

All other entry and clearance documents are arranged by the Agents.

**PILOTAGE:** Vessels should radio their ETA to Agents who order Pilot. 24 hours notice requested. Pilot launch flies "H" flag during day. Exhibits bright white light over red at night. To request Pilot on approach by day fly international "G" flag, or give 2 long and 1 short blast on whistle. At night flash 2 long 1 short. For vessels berthing alongside Pilot boards in bay; for vessels anchoring Pilot does not board but pilot launch indicates where vessel should anchor. Pilot boat equipped with radio telephone on 2182 and 2341 kHz.

Also VHF, Channel 16 (calling) and Channel 6 (working).

**ANCHORAGE:** Permitted anchorage within 800/900 metres East from end of breakwater or 300/350 metres South of breakwater within a limit of 400 metres from shore.

**RESTRICTIONS:** None.

**SIZE OF VESSEL:** No limit to size of vessels which can anchor, but all anchorage positions should be indicated by pilot launch. For vessels berthing alongside quay maximum permissible length 990 ft. maximum draft 36 ft. Oil carriers discharge at buoys at Praia Formosa 3 miles to West of Funchal. Maximum length of oil tankers that can berth at oil discharge buoys 665 ft. maximum draft 36 ft.

**HEALTH:** Free Pratique may be arranged by Master sending wireless message addressed "Port Doctor Funchal" – "Request free pratique arriving . . . from . . . sailing to . . . number passengers . . . landing . . . number passengers in transit . . . number of crew . . . all well. Master."

In event suspected disease or fever on board Master should wireless either Port Doctor direct or to ship's Agents, who will inform Port Doctor. The Master will then be instructed what further action he is to take.

When vessel other than of national flag arrives after calling at another port in same country usual procedure applies, i.e. Masters radio for free pratique or pratique granted by Doctor visiting in bay.

**RADIO:** Madeira Radio Station call sign CUB 500 k/cs. Same station normally used by Agent when communicating with vessel.

**TUGS:** Two tugs each of 1,000/1,100 h.p. – bollard pull 18 tons – are available.

N.B. Vessels up to 2,000 gross tons are not obliged to use tugs.

Vessels of between 2,000 and 15,000 gross tons are obliged to use one tug.

Vessels over 15,000 gross tons are obliged to use two tugs.

**BERTHING:**

| | |
|---|---|
| *Quay No. 1* | Length 139 metres, depth 6 metres. |
| | Length 41 metres, depth 7 metres. |
| | Length 19 metres, depth 8·5 metres. |
| *Quay No. 2* | Length 425 metres, depth 11 metres. |
| *Quay No. 3* | Length 347 metres, depth 11 metres. |

**STEVEDORES:** When ships require labour, Agents must be notified before 1600 on working days and on Sundays and holidays before 1100, after these hours labour not available for last minute engagement. On Christmas Eve works stops at noon even if ships loading or discharging. No labour available Christmas Day, New Year's Day or Easter Sunday.

Grain cargoes can only be worked from 0800 hrs. to 2000 hrs. daily including Sundays, and a maximum of 4 gangs only can be worked simultaneously.

Bulk cargoes such as potash and fertilizers need to be bagged on board. Receivers supplying the bags – and this generally applies to grain. Bulk cement, clinker and granulated plaster is discharged by grabs.

**MEDICAL:** Advance notice is required by Agents for any medical attention required. Hospital facilities available. No inoculations required.

**TANKERS:** Diameter of connection of discharge lines 8 in. into pipe-lines of 12 in. diameter for black fuel and 10 in. diameter for white fuel. 1 anchorage buoy berth with maximum draft of 36 ft.

**DENSITY:** Salt water.

**FRESH WATER:** Available at anchorage and ex quay.

Three barges available, with total capacity of 450 tons. Delivery hoses ex barge or ex quay are of 2½ in. diameter, and there are nozzles of various sizes. Rate of delivery ex barge – 50 tons per hour per barge. Delivery ex quay, said to be about 60 tons per lead per hour, but this can be slow, according to the number of ships being supplied, and the amount of water in the city storage tanks and may require to be supplemented ex barge in case of big quantities or supplies required within limited time.

**FUEL:** Fuel oil available from 3,500 seconds Redwood 1 to 200 seconds Redwood 1. Also marine diesel and gas oil. 12 hours (minimum notice) required.

**FIRE PRECAUTIONS:** At discharging buoys usual non-smoking precautions.

**GANGWAY/DECK WATCHMEN:** Gangway watchmen recommended.

**OPENING/CLOSING HATCHES:** Normally carried out by crew.

**CUSTOMS ALLOWANCES:** Tobacco, Wine and Spirits: Moderate supplies allowed for personal use during ship's stay.

**CARGO GEAR:** No specific local safety regulations. Vessels discharging must provide strops, slings and nets. Lifts over five tons must be effected by ships gear.

Six mobile cranes are available.

1 crane – 6 tons at 12 m., 3 tons at 24 m.

2 cranes – 5 tons at 20 m.

3 cranes – 3 tons at 12 m.

A floating crane is available which can lift up to 27 tons from the water line up to 8 m. This same crane can lift up to 20 tons from the water line to 12 m.

**IDENTIFICATION CARDS:** Required.

**CONSULS:**

## TAMATAVE: 18.08 S. 49.22 E.

**DOCUMENTS:**
*Health* International Maritime Certificate of Health.
List of Passengers disembarking.
Crew List.
*Police* List of Passengers disembarking.
Crew List.
*Customs* Ship's Register.
Three sets Cargo Manifests.
Crew List.
Two Stores Lists.
Two Lists of Crew disembarking.
Two Lists of Crew transitting.
Two Lists of Passengers disembarking.
*Port* Two sets Cargo Manifests.
*Agents* One set Cargo Manifests.
List of Passengers disembarking.
Crew List.

**PILOTAGE:** No telegraphic address. Ships advise Agents hour of ETA. Pilots informed by Agents. Due to the breakwater being extended the South Pass is temporarily closed to all traffic. When completed, the extension will render the Pass so narrow that only small coastal vessels can use it.

The East Pass is now permanently in use for large vessels. The pilot-boat waits on the East Pass range approximately 3·3 miles S.S.E. of Prunes Island Lighthouse. The pilot-boat is fitted with a small, portable VHF set (Channels 16 and 27) but its effective range is only about 5 miles.

**ANCHORAGES:** No special anchorage. If no berth available on ship's arrival, Pilots put ships at best anchorage, according to draft and length of ship, between Reef and shore.
**RESTRICTIONS:** No restrictions. Ships enter and sail day and night at any time. Maximum tide only 3 ft.
**MAX. SIZE:** For roads, max. length about 200 metres (concerns only passenger ships). For cargo vessels max. length 180 metres; max. draft 31 ft. 2 in. (9·5 metres).

For tankers, max. length 572 ft. (205 metres); max. draft 35 ft. (10·70 metres).

**HEALTH:** Quarantine message sent to Agents who inform health service. "Q" flag must be hoisted if health satisfactory. Captain presents maritime declaration of health.
**RADIO:** Tamatave Radio, call sign 5RS. VHF frequency (16) 156·80 – (26) 161·90 – 168·95.
**TUGS:** One tug of 1,750 h.p. and two tugs of 250 h.p. available to assist berthing.
**BERTHING:** Three berths for deep-sea ships and two berths for coastal ships. Ships moored at berth in order of arrival and according length and draft. Mooring has to be very strong, due to swell that may sometimes enter harbour when South-east trade winds are strong, or if cyclone in vicinity. Mooring by two chains and special nylon lines furnished by harbour. Swell is so dangerous that ships have to go to anchorage or put to sea until weather improves.
**STEVEDORES:** ETA to Agents must give hatches, tonnages, and all information about cargo.
**MEDICAL:** Preferable to inform Agents in advance. All hospital facilities available – smallpox vaccinations.
**TANKERS:** One refinery imports crude oil and exports fuel and refined oils. Tankers moored using anchors forward, and moorings aft.

Diameter of lines 12 inches. No slop discharge facilities. If tanks are to be washed, slops must be discharged outside harbour.

**DENSITY:** 1023·5.
**FRESH WATER:** Delivered by water-boats at rate of about 100 tons/hour.
**FUEL:** Available alongside. Gas oil and diesel oil at 70 tons per hour. Fuel oil at 110 tons per hour.

Vessels at anchorage may be serviced by fuel barge of 250 tons.

**FIRE PRECAUTIONS:** One fire-boat stationed near tankers.
**GANGWAY/DECK WATCHMEN:** Recommended. Very low cost.
**OPENING/CLOSING HATCHES:** Booms always operated by crew. If hatches are Macgregor type, by crew; otherwise by stevedores.
**CERTIFICATES:** Safety certificates (three), Derating or Exemption Certificate, Register, Load Line Certificate.
**CUSTOMS ALLOWANCES:** 200 cigarettes. Wine/Spirits. One opened bottle.
**IDENTIFICATION CARDS:** Only seaman's papers required.
**CONSULS:**

| | |
|---|---|
| France 2721 | Dutch 2632 |
| Great Britain 2680 | Swedish 2136 |
| Norway 2549 | Danish 2615 |

**REPAIRS:** Only small repairs possible.
**REPATRIATION:** Possible, arranged by Agents.
**AIRPORT:** Served by regular airlines. One flight a day by Air Madagascar to Tananarive and 4 to 6 flights a week from Tananarive to Africa and Europe.
**TIME:** Local time GMT plus 3 hours.
**HOLIDAYS:** 13 holidays per year. Cargo work cannot be arranged on holidays but can be on about every second Sunday.
**TELEPHONES:** Two connections at two berths used for passenger ships, but may be requested by other ships.
**GENERAL:** Fourteen cranes of three tons each. One floating crane for maximum 120 tons weight. Small tugs and lighers for ships operating on roads. One port launch and some private launches for crews of ships at anchor.
**SHORE LEAVE:** Permitted.
**DELAYS:** Not fixed. When all berths occupied, ships wait at anchorage.
**AUTHORITY:** Port Autonome de Tamatave, POB 492, Madagascar.

**AGENT:** SCAC Madagascar, Rue du Capitaine-Shoel, BP 411, Telex: 55610. Tel. 320–48; 320–49; 326–80; 326–81. Cables: "Freight Tamatave".

# Malaysia

## DUNGUN, Malaya: 04.47.30 N. 103.27 E.

**DOCUMENTS:**
Register.
Last Port Clearance.
10 copies Crew List.
6 ,, Passenger List (if any).
6 ,, Stowaway List (if any).
2 ,, Stores List (including Firearms and ammunitions).
2 ,, Dutiable Liquor and Tobacco List.
2 ,, Crews Declaration List (cameras, radios, etc.).
2 ,, Cargo Manifests.

**PILOTAGE:** Extra charge for pilotage outside normal office hours and holidays. Ocean vessels should anchor about 0·8 miles S.E. of Tg. Dungun Lighthouse.
**ANCHORAGE:** On arrival vessels required anchor about one mile outside berthed ships to obtain pratique. Accommodation ladder must be rigged on lee side to allow Port Authorities to board.
**CUSTOMS:** Customs Office hours 0830 to 1630 (Thursday afternoons, Fridays and holidays excepted).
**IDENTIFICATION CARDS:** Every member of crew must produce Identity Document or Shore Leave Pass at Customs House when landing and again when returning to vessel.
**SHORE LEAVE:** No seaman may proceed more than three miles from Dungun Customs House. The Officer in Charge Customs, as acting Immigration Officer, has authority to limit or prohibit Shore Leave in all cases.

## KOTA KINABALU, (Jesselton), Sabah: 06.00 N. 116.05 E. (See Plan)

**DOCUMENTS:**
Documents to be produced on arrival:
Port Clearance from Last Port.
6 copies Inward Cargo Manifests.
2 copies Hatch List, *or*
1 copy Stowage Plan.

* To be supplied by Agent.

If vessel departs to a port outside Sabah, 2 copies outward crew list are also required for Immigration.

**PILOTAGE:** Pilot normally available between 0600 and 1800 only, Written application must be submitted 12 hrs. in advance.
**ANCHORAGES** (Also see "Health"):
*Special Anchorages and Prohibited Areas*

(1) *Prohibited anchorage:* No vessels shall anchor as to swing within 3,000 ft. of the F.R.G. light on the N.N.E. end of the Authority wharf in approximate position Latitude 05° 59′ 51″ N. Longitude 116° 04′ 30″ E. Vessels under 150 ft. in length may anchor within this

area, East of a line joining the F.R.G. light and Gueritz shoal light beacon.

(2) *Prohibited Area:* Except with the previous permission in writing of the Authority, no logs or timber shall be allowed to lie afloat within the area – Eastward of a line drawn in a 172° direction from Grieve Reef Beacon.

(3) *Explosives and Dangerous Goods Anchorage:* Vessels having explosives and Dangerous Goods on board shall anchor within a line drawn from a position in Latitude 06° 01′ 21″ N. Longitude 116° 05′ 45″ E. thence in a 360° direction for 6·5 cables thence in a 270° direction for 10 cables thence in a 180° direction for 6·5 cables thence in a 090° direction for 10 cables to the starting point.

(4) *Dangerous Petroleum Anchorage:* A vessel having dangerous petroleum on board shall anchor within a line drawn from a position in Latitude 06° 00′ 42″ N., Longitude 116° 05′ 45″ E. thence in a 270° direction for 10 cables thence in a 360° direction for 6·5 cables thence in a 090° direction for 10 cables thence in a 180° direction for 6·5 cables to the starting-point.

(5) *Quarantine Anchorage:* A vessel which is required to proceed to a quarantine anchorage shall anchor within an area bounded by a radius of 3 cables from a position in Latitude 06° 01′ 34″ N. Longitude 116° 03′ 46″ E.

**RESTRICTIONS:**

1. Entering. Vessels with dangerous cargo such as benzene are not allowed to stay alongside wharf or to berth after 6 p.m. Vessels arriving from any port within hours of day-light not allowed to berth until they see the signals at the Customs House directing them. This applies equally to vessels arriving on schedule as well as unscheduled vessels and any infringement of these regulations can have very serious consequences.

Master of ship not sailing within 48 hours after port clearance to report to Harbour Master reason for not sailing, and, if so required obtain a fresh port clearance.

2. Shifting. The Authorities must be informed prior to shifting.

3. Immigration. No person may leave ship before clearance has been given by Customs/Immigration officers.

4. Currency. There is no restriction on amount of currency which can be brought into this State but maximum amount allowed to be taken out is Mal $100. Foreign exchange must be conducted through recognised banks.

**HEALTH:** (Also see "Regulations"). (*a*) Sabah Government are signatories to WHO convention on Quarantine regulations. Port Health Doctor will not board unless vessel comes from infected port. Instead, Maritime Declaration of Health to be filled-out and handed to Boarding Officer of Health Department who will require one copy of crew list and one copy of passenger list. Vessels should cable Agent prior arrival advising last port of call and whether vessel is healthy. Pratique normally cabled to ship but if unreceived, vessel need not proceed to Quarantine anchorage unless coming from infected port.

(*b*) Vessels arriving from ports outside the State will anchor until boarded by Authorities unless previously instructed by telegram to come alongside.

**RADIO:** (Also see "Health"). Information required before ship's arrival: Manifest, stowage plan, number of gangs required, amount of water required, pilot requirements. Local radio call sign "Control K.K.".

**TUGS:** Tug 280 h.p. available to assist vessels berthing and unberthing without a pilot at inner berth. Ship's lines used.

**BERTHING:** Wharf T-shaped; outer berth 647 ft. long with minimum depth of 25 ft. Inner berth 475 ft. long with minimum depth of 21 ft.; 2 go-downs 28,000 and 30,000 sq. ft. floor area respectively. Sabah Ports Authority operates one 10-ton crane, 12 towing tractors, 18 6,000-lb. forklifts, one 7-ton forklift, 46 trailers of capacity ranging from 3 to 6 tons. Heavy Lifts up to 6 tons received into Sabah Ports Authority trailers, up to 17 tons could be received into railway wagons, beyond 17 tons overside discharge into landing craft. Sabah Ports Authority landing ramp capable of accepting loads of up to 30 tons. Bulk handling limited to petroleum and bitumen into private installation by pipe-line.

**STEVEDORES:** Stevedores provided SPA; labour supplied for working in ships' holds and on ships' winches (if required). For cargo delivered direct ex-wharf consignee provides labour; cargo for Sabah Ports Authority godown labour provided by Sabah Ports Authority.

Working hours/days: Ships can be worked on all days except for 11 state and national holidays when port closed completely. Working hours 0730 to 1130; 1300 to 1700; 1800 to 2200 hours. Work beyond these hours possible by application. Additional charges payable.

Deliveries 0730 to 1630 hours except Sunday.

Loading/discharging rate: General cargo excluding vehicles and liquid cargo 17·60 B/L tons per gang hour. Palletised (unit-load) cargo 27·4 B/L tons per gang hour.

**CARGO:** (Also see "Berthing").

1. Tally: The Agent can provide tally clerks at ship's expense.

2. Inward cargo: Ship's responsibility ceases as soon as consignees take delivery ex-sling.

3. Transhipment cargo: Transhipment cargo is handled via Port Authority Godown.

4. Outward cargo: All cargo is brought to the ship alongside wharf either by tractors and trailers.

5. Special cargo regulations:

(*a*) *Dangerous cargo.* Vessels carrying explosives as cargo: All vessels arriving at, or remaining within the limits of, any port with explosives on board shall fly the gunpowder flag at the fore mast.

No vessel having explosives on board shall, without the permis in writing of the Harbour Master, come or remain within 500 yard the shore or of any other vessel:

Provided that such a vessel may, with the written permissio the Harbour Master, come and remain within such limit where:

(i) such explosives are wholly and exclusively of Class V ( minate) or Class VI (Ammunition) or both such classes in second schedule; and

(ii) the total quantity of such explosives does not exceed thousand pounds; and

(iii) such explosives are carried in a properly constructed magaz duly certified as such by a British Board of Trade Surve or by an officer fulfilling similar functions appointed b Government of any British possession or the vessel ha certificate from one of Her Majesty's Inspector of Explos or from an Officer fulfilling similar functions appointed by Governments of Singapore, the Federation of Malaysia Hong Kong and approved by the Governor that all the ex sives on board such vessel have been properly stored and Master of such vessel further certifies in writing that no ot dangerous cargo is carried by the vessel; or where:

(iv) such explosives are wholly and exclusively explosives of or any of Class III (Nitro-compound), Class IV (Chlo mixture) or Class VII (Firework); and

(v) the total quantity of such explosives does not exceed th thousand pounds.

No such explosive shall be landed, shipped or transhipped tween sunset and sunrise without the previous permission in wri of the Harbour Master. Any Master of a vessel offending against provisions of this section shall be liable to a fine of one thous dollars.

| Quarantine (not received pratique) | Nil | A red light over a white light six ft. apart hoisted vertically where best seen. |
| Request Police Assistance | International Code Signal "S T" | A green over a white light, six ft. apart hoisted vertically where best seen. |
| Request Medical Assistance | International Code Signal "W" | A red light over a green light, six ft. apart, hoisted vertically where best seen. |

(c) Priority. First come first served.

A new wharf is being built at a new location approximately a quarter of a mile Northward of the present wharf. The new facilities will include an island wharf containing 4 berths measuring a total of 1,720 ft. with 30 ft. of water alongside. The wharf will be connected to the shore by 2 access bridges. A transit shed with a storage area of 72,000 square ft. will be constructed on the structural deck of the wharf. A multi-storey Headquarters Building with training school and library will also be built at the same location. The whole project is expected to be completed by mid 1975.

**AUTHORITY:** Sabah Ports Authority, PO Box 1430, Kota Kinabalu. Tel. 55233.

**AGENT:** Harrisons & Crosfield (Sabah), Limited. Telegraphic address "Crosfield". Tel. Shipping Department 52876; Vessels at wharf 52300–54400.

## KUCHING, Sarawak: 01.34 N. 110.21 E.

**DOCUMENTS:**

Port Clearance to be surrendered to Customs when boarding.

Crew Lists and Passenger Lists, 2 copies for Immigration Department, 2 copies for Kuching Port Authority, 2 copies for Customs, 1 copy for Port Health Officer.

List of Ship's Stores (2 copies for Customs).

List of Ammunition (2 copies for Customs).

Health Documents (Vaccination Certificates and Cholera Inoculation Certificates to be examined by Health Inspector.

Manifests (2 sets for Customs, 3 sets for Kuching port Authority).

**PILOTAGE:** Pilot can be applied for through Agents or by direct cable Marine Dept. giving at least 24 hours notice of ship's arrival time at Tanjong Po. Telegraphic address, Shipping, Kuching. Location of anchorage for vessel awaiting Pilot at 045°, one mile from Tanjong Po. Pilot boat "Alor" equipped with VHF.

In rough weather it may be necessary for a ship to follow or meet the pilot launch at the junction of Embang and Senari leads. Pilots for the Batang Lupar, Triso or Lingga Anchorages are also normally embarked off Tanjong Po by arrangement.

**APPROACHES:** The seaward approach to Kuching port is restricted by the presence of two bars; Outer Bar at a depth of 16 ft. below datum, and the Inner Bar at 15 ft. below datum. The maximum depth of high water over the Bar, which occurs at springs, is about 31 ft., whilst at neap high waters this decreases to approximately 28 ft. The tidal range is 5 to 17 ft. There are also numerous rocks and shoals in the river.

**ANCHORAGES:** (*a*) Tanjong Po Anchorage: 045° one mile from Tanjong Po line. Area of safe anchorage is $\frac{1}{4}$ mile radius. Depth 6 fathoms. (*b*) Sijinkat Anchorage: For vessel up to 550 ft. long with maximum draft 25 ft. (*c*) Pending Anchorage: For vessel up to 350 ft. long with maximum draft 22 ft. See "Developments".

**RESTRICTIONS:** Tide restriction and maximum draft 17 ft. at high tide. Not advisable to enter port at Tanah Puteh at night.

**MAX. SIZE:** Maximum permissible length overall for vessel entering port at Tanah Puteh is 435 ft. and maximum draft 17 ft. Maximum overall length for oil carriers proceeding to oil installation at Biawak Wharf, Pending Point, is 435 ft., and maximum draft 22 ft.

**RADIO:** ETA cable to ship's Agent can be sent to Department of Communications, Kuching. Code words, Kuching Radio.

VHF direct communication with Port Authority, Channel 16, calling and safety, Channel 20 port operations, Channel 26 public correspondence. Pilot boat and Marine Department also equipped with VHF. Range 25 to 30 miles from Kuching port.

**TUGS:** Two 1000 h.p. tugs available.

**BERTHING:** Application for berth must be made by Agents at least 24 hours before berthing.

**STEVEDORES:** Gangs required for working vessel for weekdays must be ordered by Agents before 1530 prior to ship's working the following day. Gangs required for working vessel on Sundays or public holidays must be ordered before 1000 prior to ship's working on Sundays and public holiday.

**MEDICAL:** Necessary for Agents to receive advance notice of required medical attention at least 24 hours before arrival. Hospital facilities available. Crew should possess Cholera inoculation and Vaccination Certificates.

**TANKERS:** Tankers berth at Biawak Wharf, Pending Points, for discharge of their oil. Diameter of pipe line 6 in. Only one tanker can berth at a time and maximum draft is 25 ft.

**DENSITY:** 1008 oz. per cubic ft.

**FRESH WATER:** Available and can be supplied to vessel alongside Authority's Wharf by hose about 25 tons per hour.

**FUEL:** High-speed diesel fuel oil can be supplied to vessel by making arrangement with either Shell or Esso Oil installation at Biawak.

**DEVELOPMENTS:** Port expansion project at Pending Point, to accommodate vessels up to 25 ft. draft. Facilities include one wharf 860 ft. long, designed for mechanised systems of cargo handling. Containers on a feeder basis, ships provide own cargo working gears. Due for completion early 1975.

**GANGWAY/DECK WATCHMEN:** Not usually available. Ship should provide own watchmen.

**OPENING/CLOSING HATCHES:** Normally carried out by stevedores.

**CERTIFICATES:** Ships should possess all relevant certificates on board in case required for reference.

**CUSTOMS ALLOWANCE:** Tobacco: 1 oz. tobacco or 25 cigarettes permitted for each crew member daily. Up to three days ration in port. Wines and/or Spirits, $\frac{1}{8}$ qt. bottle is permitted for each crew member daily. Up to three days ration in port.

**CARGO GEAR:** Ship provides own gear especially for handling heavy lifts, vehicles, etc. Rope slings, pallets and safety nets, etc., will be provided by the Authority at Tanah Puteh Wharf.

**IDENTIFICATION CARDS:** Required.

**CONSULS:** British, American and Norwegian.

**REPAIRS:** Minor repairs to vessels only.

**DRY DOCKS:** Not suitable for sea-going vessels. Coastal vessels up to 220 ft. long.

**REPATRIATION:** Facilities available.

**AIRPORT:** Airport about 6$\frac{1}{2}$ miles from port at Tanah Puteh. It is served by regular airlines which operate two flights daily except on Tuesday, Thursday and Friday when one flight only.

**TIME:** Local time eight hours ahead of GMT.

**HOLIDAYS:** Port work can be arranged on all official holidays on overtime rates except Chinese New Year Day, Hari Raya Puasa Day, International Labour Day, (1st May), Dayak Festival Day (1st June), and Christmas Day, during which port at Tanah Puteh will be closed.

**POLICE/AMBULANCE/FIRE:** For emergency call, tel. 999 is applicable to all these three services. Individual call: Central Police Station, 21222; General Hospital, 23151; Fire Station, 21033.

**TELEPHONES:** Telephones can be provided free of charge on board vessel occupying Authority's berths at Tanah Puteh Wharf.

**SHORE LEAVE:** Crew members are allowed ashore provided permission is granted by Immigration Department.

**REGULATIONS:** Refer to Sarawak Merchant Shipping Ordinance and Kuching Port Authority's Ordinance and Bye-laws.

**DELAYS:** Waiting for wharf berths when Port is congested, up to 3 days.

**AUTHORITY:** Kuching Port Authority, Tanah Puteh, Kuching, Sarawak, East Malaysia. Tel. 22291 (five lines).
Cables: "Kuport Kuching."

## KUNAK, Sabah: 04.41 N. 118.15 E. (See Plan)

*Sabah Government Requirements*

(*a*) Customs will treat port as sufferance wharf as defined in Section 2 of Customs Ordinance (Cap. 33), with control from Lahad Datu. Agent will be required to make application to Customs for sufferance facilities in respect of each vessel, on appropriate form. Officer-in-Charge of Customs, Lahad Datu will arrange to send a supervising officer with ship; this officer will attend vessel's inward and outward Customs clearance. Transport, food and shelter of Customs officer are for vessel's account, though it is envisaged that his transport can be concurrent with boarding and departure of the Pilot, i.e. per Marine Department launch.

(*b*) Immigration requires that vessel shall be cleared inwards and outwards in Lahad Datu. As Marine Department launch will be required to run mooring lines at Kunak, it will not be available to transport Immigration Officer who will *not* accompany vessel. His transport will therefore be a matter for Agent to arrange.

(*c*) Medical will grant pratique by radio by Medical Officer, Lahad Datu: whose right to carry out full inspection is not affected thereby. This will only be exercised, it is anticipated, when vessel has called at an infected port within prescribed period. Radio messages should therefore give this information, e.g. "Malay Maru Hongkong Twentieth Tokyo Thirtieth Manila Second All Well Request Pratique Master".

(*d*) Marine Dept. in the case of a vessel arriving from foreign ports will ultimately place a Pilot on board in Lahad Datu, if requested.

(i) Pilot will receive vessel's arrival report and sight her last port clearance. Pilotage will commence at any such point on route as Master may request, at rates laid down in the Merchant Shipping (Fees) Regulations, 1961. The pilot launch carrying berthing crew will arrive in advance of vessel at Kunak and assist in making fast.

(ii) As there is no accommodation available at Kunak, the Pilot it is hoped, can be accommodated on board ship during her stay.

(iii) Return to Lahad Datu will follow as in sub-para (i) with the Pilot issuing Port Clearance on completion of Immigration formalities.

(iv) Requests for Pilot should be made *at least* 24 hours in advance to Marine Sandakan via Sandakan Radio, 9WHZ1. Initially this service will be offered from Sandakan, and ships proceeding Kunak from there will retain the Pilot on board. Ships from foreign ports will be served by air; charges to their account. There is now a Pilot based at Tawau, who will berth vessels at Kunak.

For information the port limits of Lahad Datu are "a line drawn from Tanjong Melandong on the South-west point of Darvel Peninsula to the most Westerly point of Sakar Island and thence to the mainland, etc." From this it can be seen that large vessels need not enter the narrow waters of the inner bay.

**BERTHING:** 1. Wharf consists of,
(*a*) A raised cement platform 30 ft. × 30 ft. on wooden piling.
(*b*) Three lazy piles with rubber fendering situated 20 ft. from the front edge of the platform and 125 ft. in each direction from the centre of the platform.
(*c*) Two cement mooring dolphins 20 ft. × 20 ft. situated 350 ft. each side of the platform and 50 ft. from the rear edge of the platform.
(*d*) A metal jetty approach 10 ft. wide × 350 ft. long.
(*e*) A coral bund 24 ft. wide at the base and approximately 16 ft. wide at the top.
(*f*) Mooring Buoy placed 600 ft. off head of jetty.

2. Depth of water alongside: Minimum depth of water outside the lazy piles is in excess of 35 ft. datum.

3. Bulk oil will be pumped from installation along a metal pipe via coral bund and metal jetty. At a point approximately 15 ft. before cement platform the pipe bifurcates and the two terminals are situated two-thirds the way along each side of platform. To these terminals will be attached a flexible steel hose for connection with ships. Hose will be provided by shippers, and is 400 ft. long if required.

4. Pumping capacity. Maximum overall rate of pumping palm oil will be 100 tons per hour. Palm oil pipe is of 6 in. diameter.

**AUTHORITY:** Port Manager, Tawau.

**AGENT:** Harrisons & Crosfield (Sabah) Ltd., PO Box 131, Sandakan, Sabah, Malaysia. Telegraphic address "Crosfield Sandakan". Tel. 2141. Code-Bentley's Second Phrase.

## **LABUAN**, Sabah: 05.17 N. 115.15 E.

Island of Labuan is 12 miles long and 7 miles wide lying off North-west coast of Borneo at entrance to Brunei Bay. It is part of State of Sabah and is only 4½ miles from mainland and some 77 miles from the State Capital of Kota Kinabalu.

**DOCUMENTS:**

(*a*) On arrival, when vessel has arrived from ports outside Sabah, Health Officer, Boarding Officer, Customs and Immigration or their representatives will board vessel. Agent cannot board until ship has been cleared.

(*b*) Health Officer will require Maritime Declaration of Health duly completed together with one copy of passenger list and one copy of crew list whenever vessel's last port or call has been outside State of Sabah.

(*c*) Boarding Officer will require one copy of Shipping Arrival Report, one copy of passenger list and one copy of crew list. He will also inspect various Certificates such as Load Line, Life Saving Equipment etc.

(*d*) Following is summary of documents required:

| | *Customs* | *Immi-gration* | *Boarding Officer* | *Agent* | *M.O.* |
|---|---|---|---|---|---|
| Passenger List | 2 | 2 | 1 | 1 | 1 |
| Crew List | 2 | 2 | 1 | 1 | 1 |
| Store List | 2 | — | — | 1 | — |
| Maritime Declaration of Health | — | — | — | — | 1 |

(*e*) To be supplied before Departure:
Manifests as necessary.
Captain's copies of Bills of Lading.
Port Clearance.
Customs Clearance.
Certificate of (*a*) Buoys and Lights Dues and (*b*) Port and Harbour Dues.

**PILOTAGE:** Pilot available if adequate notice given but pilotage not compulsory. Vessels normally berth between 0600 and 1800, unberthing at any hour, day or night, provided that notice of such movements received between 0800 and 1600.

**ANCHORAGES:** Good anchorage for large vessels in a least depth of five and three-quarters fathoms South and South-east of No. 6 Beacon.

*Quarantine.* Vessels arriving from an unhealthy port should proceed to quarantine anchorage for pratique. This anchorage is bounded on North by a line drawn 090° from Harbour Shoal Beacon to Eastern Harbour Limit; on South by a line drawn between South-west point of Papan Island and Enoe Beacon; on West by Eastern Boundary Limit of Explosives Anchorage (as under). If vessels arriving from healthy port and healthy themselves, they need not proceed to Quarantine Anchorage.

*Explosives.* No vessels having explosives on board may come or remain within 500 yards of shore or of any other vessel; such vessels shall fly Gunpowder Flag at foremast, and should anchor in Explosives Anchorage which is within a line drawn from Enoe Beacon to Harbour Shoal Beacon thence in 090° for 6 cables thence in 180 degrees direction until it joins line between South-west point of Papan Island and Enoe Beacon.

*Dangerous Petroleum.* A vessel having dangerous petroleum on board shall anchor within a line drawn from Harbour Shoal Light beacon in a 360° direction for 2,500 ft., thence in a 090° direction for 3,600 ft., thence in a 180° direction to join Northern boundary limit of Explosives Anchorage.

*Prohibited Anchorage.* No vessel shall anchor within 1,700 ft. fr F.R.G. Light – Liberty Pier.

**RESTRICTIONS:** Tides. Subject to diurnal inequalities b usually one high water and one low water a day. Average high wa is 6·5 ft. and low water 3 ft. above datum of soundings.

Clearance. Port is open from 0600 to 1800 although vessels can cleared later than 1800 on application provided they are sight from Papan Lighthouse at 1800.

**HEALTH:** See "Regulations" and "Anchorages".

**RADIO:** Information required before ship's arrival. ETA Labua with as much prior notice as possible. Number of gangs require Quantity of fresh water required. Whether Pilot required for berthin

Labuan has no radio facilities and messages are received Kota Kinabulu, Miri, Singapore, etc.

Port VHF Service operates on Channels 16 and 12, between 06 and 2000 hours.

**TUGS:** No tugs available.

**BERTHING:** 1. Wharves.
(*a*) Liberty Wharf – A wharf with wooden piles and concrete deckin measuring 400 ft. with dolphins 100 ft. off each end – least dep of water is 26 ft.
(*b*) Victoria or Small Ships' Wharf (marked on Chart as H. & C Wharf). A wooden structure – length 270 ft. with minimum dep of 12 ft. No longer usable except by kumpits. No vehicles allow on wharf.
(*c*) New Shell Installation Wharf. Concrete jetty 170 ft. long with tw dolphins at each end with a total length between of 700 ft., lea depth of water 31 ft.

2. Buoys: No mooring buoys in Labuan.

3. Monsoons. North-east monsoon prevails from December t April and South-west monsoon from middle of May to middle October. Harbour is well sheltered from both monsoons.

4. Flags and Berthing Signals:

(*a*) When entering port vessel should fly Signal Letters, Mail Fla if applicable, and "G" flag if requiring Pilot, and also Quarantine Fla

(*b*) Berthing Signals. Following berthing signals will be used Labuan and will be displayed from Flagstaff in Harbour Office vicinity of Liberty Wharf, Victoria Harbour. A red and white chequere flag and International Code numbered pendant will indicate ber number allocated. Berth numbers have been allocated as follows:

(*c*) Berth and Pendant No.
1. Liberty Wharf S.E. section of seaward frontage.
2. " " N.W. " " "
3. " " S.E. " inside frontage.
4. " " N.W. " " "
5. Repair and Slipway Wharf. (Marine jetty.)
6. Victoria Wharf (small ships) S.E. Section.
7. Landing Craft Hard (New Beach) (300 ft. N.W. of Victori Wharf).
8. Landing Steps Liberty Wharf.
9. Shell Installation Jetty.
0. Anchor.

On receipt of berthing signal, vessel should acknowledge in th usual manner with the answering pendant and proceed to berth.

(*d*) Tidal Signal. A tidal signal consisting of a cone and ball hoisted in conjunction with berthing signal showing state of tide berth indicated. A cone point down signifies flood tide (West-going a cone point up ebb tide (East-going), a ball slack water.

(*e*) Facilities. Maximum single load without special precautions o Liberty Wharf is 25 tons. Any load over this figure will require to b distributed over two or more panels of 10 ft. by 10 ft., each accordin to weight. However, special arrangements must be made prior t discharge, and Agent should be consulted in advance.

**STEVEDORES:** Supplied by Contractors as arranged by Agent Working hours 0800–noon, 1300–1700. Working outside these hour on Sundays and Public holidays is overtime.

**CARGO:** 1. Inward. Inward cargo is tallied out of ship on to wharf o into lighter. Damaged cargo is surveyed on the spot, otherwise n liability of the vessel is acknowledged. Discharge is carried out afte permission has been obtained from Customs after manifest o inward cargo has been deposited. Cargo is delivered to consignee against production of relative Bill of Lading. Ship's responsibili to consignees ceases at ship's side but, in the case of shortlande cargo, reasonable proof must be given to Customs that the carg has not been landed. A shortlanded Memo certified by the Chie Officer is usually accepted as proof.

2. Transhipment. After discharge of cargo from the 1st carrie transhipment cargo is placed under supervision of Customs, unless it is possible to arrange direct transhipment into small coastal vesse Customs do not accept responsibility for cargo in Customs Bond.

3. Refrigerated. Only small quantities of refrigerator cargo loade or discharged.

4. Explosives. Explosives must be discharged into lighters unde police escort and transported to an approved police store. A licence for their Importation must be obtained from the police prior to arriva of cargo, and harbour and police authorities must be informed o arrival of explosives in port either for discharge or as through carg

**MEDICAL:** Hospitals. Not possible for Government Medical Office to visit ships but patients can be sent to Cottage Hospital. 4 1st class beds, 10 2nd class beds, 46 3rd class beds.

Dentist. A Government Dental Clinic, located in town area. In addition, a Chinese dentist is available in town.

**TANKERS:** See "Berthing".

**FRESH WATER:** Only available in small quantities (usually 30 tons maximum) and at restricted hours.

**FUEL:** Bulk furnace oil and high speed diesel usually available but 48 hours notice of requirements must be given.

**FIRE PRECAUTIONS:** In case of fire, the Harbour Master, OCPD, and Agent should be telephoned immediately. A mobile gas turbine fire pump is available.

**CONSULS:** None.

**REPAIRS:** Slipways of up to 500 tons displacement, and Marine Department can undertake minor repairs.

**POLICE/AMBULANCE/FIRE:** Medical Officer 224; Asst. Commissioner of Customs 201; OCPD 400; Police Station 297; Hospital 222.

**GENERAL:** *Surveyors.* Harrisons & Crosfield are Lloyd's Sub-Agents in Labuan and may appoint a surveyor as necessary.

*Ship Chandlers.* Fresh fruits, vegetables and fish available and price list can be obtained from ship chandler through Agent. Cold storage with limited supplies.

*Recreation Facilities.* If owners pay a monthly subscription to the Labuan Recreation Club, ships crew are automatically members. Football and cricket, etc., can usually be arranged on application to Agent. Two cinemas in town which show American, English, Chinese, Malayan and Indian films.

Good beaches all round island, however, it is strongly recommended that bathers should remain in shallow water. It is not considered safe to bathe from the ship.

Victoria Hotel situated in town. All rooms air-conditioned and have private bathrooms or showers attached. Lodging house accommodation available in town for Chinese crew members.

**REGULATIONS:** (*a*) Arrival and departure. 1. The Owner or Agent of every vessel other than a small ship intending to call at a port shall, as soon as possible, and in any case not later than thirty-six hours prior to the estimated time of arrival of the vessel, give notice in writing to the Authority of such arrival and, if so desired, the requirement for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribed by the Authority and shall contain full particulars regarding the cargo to be discharged and loaded, the embarkation and disembarkation of passengers, heavy lifts, special or perishable cargo, hazardous and dangerous goods (whether to be discharged at the port or not), and any other matters of importance relating to the working or safety of the vessel in the port.

3. The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted the national colours and the signal letters, if any, of the vessel. The national colours shall be exhibited from 0800 to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State of Sabah shall exhibit the Immigration and Quarantine signals contained in the First Schedule and shall also at the request of a customs officer hoist the Customs signals. Such signals shall remain exhibited until the appropriate officer has given permission for them to be lowered.

5. No vessel shall approach within six hundred ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from any vessel until the vessel is cleared inwards and the Immigration, Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficiently secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessels shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

(*b*) Special signals.

| *Significance* | *By Day* | *By Night* |
|---|---|---|
| Immigration (for ships not carrying passengers) | International Code Signal "2 5" | Two green lights, six ft. apart, hoisted vertically where best seen. |
| Immigration (for ships carrying passengers) | International Code Signal "3 4" | Two green lights, six ft. apart, hoisted vertically where best seen. |
| Quarantine (vessel is Healthy request pratique) | International Code Signal "Q" | Nil |
| Quarantine (vessel is suspect) | International Code Signal "Q Q" | A red light over a white light and a separate hoist of red light over a green light and hoisted vertically six ft. apart where best seen. |
| Quarantine (vessel is infected) | International Code Signal "Q L" | |
| Quarantine (not received pratique) | Nil | A red light over a white light six ft. apart hoisted vertically where best seen. |
| Request Police Assistance | International Code Signal "S T" | A green over a white light, six ft. apart hoisted vertically where best seen. |
| Request Medical Assistance | International Code Signal "W" | A red light over a green light, six ft. apart, hoisted vertically where best seen. |

**DEVELOPMENTS:** A replacement wharf, 800 ft. length is to be built close to the existing Liberty Wharf in 1974/1975.

**AUTHORITY:** Harbour Master, Tel. 251.

**AGENT:** Harrisons & Crosfield (Sabah) Limited, PO Box No. 7, Labuan, Sabah, Malaysia. Telegraphic Address "Crosfield". Tel. 218, 219.

## LIMBANG, Sarawak: 04.48 N. 115.05 E.

Limbang is the principal town of the Fifth Division and is situated eight miles above the entrance of the Limbang River. There is an anchorage for ocean-going steamers, five miles below the Limbang bar buoy with a least depth of 26 ft.

Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during day-light hours, for at least twelve hours before the vessel is due to sail, or if the vessel is in port for less than twelve hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the Port Clearance.

(2) The Port Clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any whilst under way.

## MALACCA, Malaya: 02.15 N. 102.15 E.

**DOCUMENTS:**

1. *Harbour Master's Office or Marine Department*

(*a*) "Report of Arrival of Vessel" on prescribed Form (Marine 28) obtainable from Harbour Master's Office on arrival.

(*b*) One copy Passenger List, specifying names and nationalities and required to report any casualties, accidents, births or deaths that have occurred during the voyage to the passengers, crew, ship or cargo.

(*c*) Port Clearance from last port and copy of Manifest of Cargo to be discharged.

(*d*) List of all arms and explosives on board.

(*e*) In the case of a British or Malaysian vessel and vessels belonging to a nation not having a Consular Officer at the port produce to Port Officer the Certificate of Registry and ship's Articles.

(*f*) All ship's certificates such as Safety Equipment Certificate, Radio Certificate, Load Line Certificate, Safety Construction Certificate, Ship's Registry, Passengers' Certificate, Derating Certificate and all Certificates of Competency of all Officers on board.

(*g*) Crew List.

2. *Immigration Authorities*

(*a*) Crew List (3 copies).
(*b*) Passenger List (3 copies).
(*c*) Produce all passengers passports/visas.
(*d*) Produce all seamens cards.
(*e*) Forms A and B – "Immigrant and Emigrant" obtainable from Immigration Department on arrival.

3. *Port Health*

(*a*) Crew List showing last date of vaccination.
(*b*) Passenger List, showing the last date of vaccination.
(*c*) Produce all seamen and passengers' vaccination cards.

4. *Customs Department*

(*a*) Crew List (2 copies).
(*b*) Passenger List (2 copies).
(*c*) Personnel Effects List (2 copies).
(*d*) Cargo Manifests (2 copies).
(*e*) Last Port Clearance.
(*f*) Bonded Stores List (2 copies).
(*g*) Full and correct statement of dutiable goods carried as ship's stores (2 copies).
(*h*) Customs Form CD 15 obtainable from Customs Department on arrival.

**APPROACHES:** No difficulty from North or South. No sand bar at river mouth. Harbour open all year round.

**PILOTAGE:** None.

**ANCHORAGES:** For ocean-going and costal vessels anchorage between 1–1½ miles off Malacca harbour. Between 3–6 fathoms depth. No specific prohibited anchorage.

**TUGS:** None.

**BERTHING:** None. Discharging into lighters at anchorage.

**STEVEDORES:** Discharging cargo capacity per day – 1,000 tons.

**MEDICAL:** Modern Government hospital. All surgical and medical facilities available.

**FRESH WATER:** None.

**FUEL:** None.

**DEVELOPMENTS:** Proposed provision of deepwater berths.

**CUSTOMS ALLOWANCES:** Tobacco, cigarettes 25 in number per man per day, or cigars, 8 in number per man per day, or Tobacco, 1 oz. per man per day, or snuff, 1 oz. per man per day.

Wine and/or Spirit, Spirit, $\frac{1}{8}$ qt. per man per day, or wines, 1 qt. per man per day, or beer or stout, $\frac{1}{8}$ qt. per man per day.

**REPAIRS/DRY DOCKS:** None.

**HOLIDAYS:** Official holidays in the state as follows: New Year's Day, 1 day; Chinese New Year's Day, 2 days; Muslim New Year's Day, 2 days; Wesak's Day, 1 day; His Majesty's Birthday, 1 day; Prophet Mohammad's Birthday, 1 day; His Excellency Governor's Birthday, 1 day; Malaysia Day, 1 day; Deepavali, 1 day; Hari Raya Huji, 2 days; Christmas Day, 1 day. No cargo is worked on any of the above gazetted public holidays – port closed.

**AIRPORT:** Batu Berendam, 6 miles from port – commercial airlines daily.

**AUTHORITY:** Marine Department, Office of the Harbour Master, Malacca and Port Dickson, Melaka, Malaya.

## MIRI, Sarawak (incl. Lutong): 04.26.30 N. 113.55.30 E.

Miri Roads is an open roadstead in a shallow bay, bounded at North by Tanjong Baram and at South by Tanjong Lobang.

**PORT LIMITS:** Outer: within an area to Northward of Lat. 04° 22′ N., Eastward of Long. 113° 55′ 30″ E. and Southward of Lat. 04° 31′ N.

**DOCUMENTS:** (*a*) *Health*. Vessels exempted from inspection (see "Health") should deliver to Berthing Master on arrival, a Declaration of Health, Last Port Clearance and 2 Crew and Passenger Lists.

(*b*) *Inward Clearance* (also see "Anchorage"). All vessels calling Miri Roads for passengers or cargo must be cleared by Immigration and Customs and, if necessary, by Port Health.

Inward clearance effected only between 0600 and 1800 and following signals must be shown: if passengers carried, flags "3" and "4"; if no passengers carried, flags "2" and "5"; if free pratique requested, flag "Q".

Following papers will be required on arrival for inward clearance:

*Port Health:*

Declaration of Health.

1 Crew List.

1 Passenger List, inward and through.

*Customs Boarding Officer:*

as above, if not boarded by Health Officer, and 2 Inward Cargo Manifests.

(*c*) *Outward Clearance*. For vessels that have called to lift bunkers only at Lutong Moorings, clearance will be issued by Berthing Master.

Other vessels will be issued a Port Clearance by Customs Officer on board who will require: 1 Outward Manifest and, if any embarked, 1 Outward passenger list.

**APPROACHES:** The loom of gas flares on Seria Oilfields thirty miles North-eastward of Miri are a general guide at night but should not be used as a bearing because flares movable within area of oilfield and liable to be extinguished at any time. Following bearings exist. By night, three lighthouses:

(*a*) *Tanjong Baram* 04° 35′ 47″ N. 113° 58′ 25″ E. white single light 680,000 candle power, visibility 17 miles, elevation 120 ft. in grey steel lattice tower, group flash three every twenty seconds.

(*b*) *Lutong* 04° 28′ 30″ N. 113° 59′ 46″ E. white single light, 13,500 candle power, visibility 10 miles, elevation 80 ft. in grey steel lattice tower, group flash two every ten seconds.

(*c*) *Tanjong Lobang* 04° 21′ 48″ N. 113° 57′ 36″ E. white single light 20,150 candle power, visibility 18 miles, elevation 155 ft. in grey steel lattice tower, 60 ft., flash one every ten seconds.

By day, above lighthouses difficult to distinguish and following may be used for day-time bearings:

(*a*) Lutong radio mast FR 210 ft., position 04° 26′ 25″ N. 113° 59′ 54″ E.

(*b*) Tanjong Lobang radio masts as marked on chart.

**PILOTAGE:** No official Pilot stationed at Miri but Shell Company provide Berthing Masters to moor vessels at their Lutong Moorings (see "Tankers").

**ANCHORAGE:** For cargo, passengers or clearance. It is recommended that vessels anchor close inshore directly opposite Miri River Mouth, but caution must be exercised as sudden squalls and swell up to 4 ft. can occur, for which allowance should be made.

Cargo usually worked into or from wooden lighters of 30 to 35 tons capacity. Swell often restricts work to landward side only and swell or wind often make it difficult to work Hatch No 1 in some vessels. Accommodation ladder should be lowered on landward side to enable shore personnel to board.

Prohibited Anchorage and Berthing Area. From (*a*) 4° 30′ 54″ N.; 113° 56′ 19″ E. in a 090° direction to the shore; and from (*a*) to (*b*) in 4° 27′ 30″ N.; 113° 47′ 01″ E., thence in a 090° direction to the shore.

**HEALTH:** Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

Free pratique granted without health inspection to vessels calling to lift bunkers only at Lutong Moorings, provided ship healthy. Vessels with unclean bill of health or vessels which have not declared themselves healthy in their arrival notice telegram are subject to normal Port Health inspection procedure. Therefore of utmost importance that arrival notice is sent not less than 24 hours before arrival and contains all information requested (see "Radio") in order to prevent unnecessary delay.

**RADIO:** Miri Radio call sign 9 WW21, frequency 500 kc/s., operates at following hours local time: 0900–0930, 1300–1330, 1700–1730, 2100–2130. Present station has a limited range and if difficulty is experienced making contact, vessels should pass messages through other stations, such as Singapore radio, or through other ships in close vicinity of Miri.

Arrival notice must be telegraphed at least 24 hours before arrival and should contain following information:

All vessels

(*a*) expected time of arrival (local time GMT plus 8 hours);

(*b*) name of last port of call and next port of call, if not previously advised;

(*c*) whether or not ship is healthy.

For bunkers

(*d*) quantity of bunkers required, in long tons at least 48 hours notice is required;

(*e*) provisions or medical attention required, if any.

For cargo

(*f*) tonnage to discharge, if any;

(*g*) number of gangs required to load;

(*h*) number of winchmen required to load.

Passengers

(*i*) number of passengers to disembark.

**BERTHING:** Cargo vessels – see "Anchorage", oil carriers – "Tankers".

**MEDICAL:** Treatment of urgent cases available on shore subj weather conditions. Early notice should be telegraphed of medi requirements.

**TANKERS:** Lutong Terminal position 04° 30′ N. 113° 57′ E. (appro Open sea berths lying about 3 miles offshore just Northward Lutong River mouth. Berthing any hour day or night. Await Berth Master in area bounded by lines joining following positions: 04° 25 113° 56¼′ E.; 04° 25′ N. 113° 55′ E.; 04° 26¼′ N. 113° 55′ E.; 04° 26½ 113° 56¼′ E.

Pilot ladder should be rigged for Berthing Master, and starbo derrick near fuelling connection should be topped-up and rigged lift heavy equipment required for mooring and connecting pipe-lin and which has to be taken on board before proceeding to moor berth.

Moorings are in a prohibited area which must not be entered wi out a Berthing Master of Sarawak Shell Oilfields Limited on board

| *Berth* | *Max. length* | *Max. draft* |
|---|---|---|
| SBM 1 | 600 ft. | 40 ft. |
| SBM 2 | 750 ft. | 40 ft. |
| SBM 4 | 820 ft. | 44 ft. |

No slop discharge facilities.

**FRESH WATER:** No fresh or boiler water available.

**FUEL:** No ex-barge facilities but bunkers obtainable from Luto Terminal.

*Nos. 1, 2 and 4 Sealines.* Available for bunkering dry-cargo vesse Ship's spring wire will be used to haul ends of mooring wires board and mooring winches should be double gear and in all respec ready for use. Both ship's anchors will be used. All other gear mooring and connecting pipes is brought on board with Berthin Master at Pilot Station. Bunkers will be supplied through 8- flexible hose brought up on starboard side amidships and appr priate flange on ship's connection should be removed in advanc Berthing Master will remain on board throughout bunkering ope tion and will leave after vessel has unberthed. Mooring and u mooring operations each require about 1½ hours and bunkering ra usually 45–75 tons per hour.

**CUSTOMS ALLOWANCES:** Bonded Store on vessels other tha those berthing at Lutong Moorings for bunkers only and exempt from formal clearance, sealed by Customs after allowing a dai ration for duration of stay in port.

One Customs Officer will remain on board all vessels anchored Miri Roads and accommodation, if necessary, should be arrange for them. The Agents' staff will remain on board throughout cargo operations and it would be highly appreciated if meals cou be supplied to them and to the Customs Officer in view of the lon time occupied travelling by launch between ship and shore.

**AIRPORT:** Distant 10 miles. Daily flights.

**TIME:** GMT plus 8 hours. Permanent.

**SHORE LEAVE:** It is regretted that both passengers and cre must be dissuaded from coming ashore other than for medic attention, owing to weather and tidal restrictions.

**REPAIRS:** No facilities for repairs.

**LUBRICANTS:** Generally, lubricants not available but in eme gency certain grades sometimes obtainable in very limited quantitie

**PROVISIONS:** Limited fresh provisions and ex-bond stor available for which vessels should give 72 hours notice of requir ments so that arrangements can be made to secure the requir supplies.

**REGULATIONS:** The Master of every vessel of over 15 tons abo to depart from a port for any place outside Sarawak shall cause th "Blue Peter" (International Code Flag "P") to be hoisted, durin day-light hours, for at least twelve hours before the vessel is due t sail, or if the vessel is in port for less than twelve hours, for th period of her stay in the port.

(i) The Master or the Agent of every vessel about to depart fro a port shall, on demand by the Port Officer, produce for inspectio the port clearance.

(2) The Port Clearance shall be in the form of an endorsement o the form of clearance prescribed under the Customs Ordinance o in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a po shall hoist her signal letters, if any whilst under way.

**POLICE/AMBULANCE/FIRE:** Tel. 999.

**AUTHORITY:** Marine Officer, Marine Dept., Miri.

**AGENT:** Lloyd's sub-agents in Miri. The Borneo Company (M Sdn. Bhd. Postal address PO Box No. 60, Miri, Sarawak. Tel. offic 3365, 3366, 3367; out of office hours: 3261, 3344. Telegraphic addres "Borneo Miri".

The Borneo Co. (M) Sdn. Bhd. operate their own launches and representative will board vessels as soon as possible after arriva

## PENANG, Malaya: 05.25 N. 100.21 E. (See Plan)

**DOCUMENTS:**

The report of arrival (provided in Marine Shipping Ordinance, 195

A copy of Passenger Statistics on prescribed forms.

A List of Crew Members.

A List of Passengers.

Evidence of last port clearance.

All Ship's Documents (safety equipment, deratisation, radi load line and register).

Maritime Declaration of Health.

International Health Certificate for passengers and crew.

Vaccination List, for Smallpox and Cholera, for passengers and crew.

*Departures:* Port Clearance Certificate signed by the Port Health Officer, to be shown to the Port Officer issuing clearance.

For oil tankers, a copy of Ship's Manifest to be submitted. Ship carrying explosives, Captain required to fill prescribed form "D" stating quantity of explosive cargo ship is carrying together with copy of Ship's Manifest.

**PILOTAGE:** Vessel approaching port has to send telegram to Pilot Office direct (cable address "Pilots Penang") or to ship's Agent stating "ETA North Channel Light Float" or in case of South Channel "ETA Pulau Rimau". Draft of vessel to be given. Pilot Office may be contacted through Penang Telephone Exchange on VHF Channel 16 to local telephone No. 63313. At least six hours' advance notice should be given before arrival at Pilot point.

Pilot boats have a blue hull varnished upperworks with "Pilot" written in bold letters on both sides of boat.

Pilot is usually taken on board, for North Channel, in vicinity of North Channel Light Float and for South Channel, in vicinity of Rimau Wreck Buoy one mile South of Pulau Rimau Lighthouse.

Vessels awaiting tide can anchor, in case of North Channel, in area shown by pecked lines marked anchorage area in Chart No. 1366. For South Channel ship can anchor in vicinity of Rimau Wreck Buoy. During bad weather, provided draft suitable, vessels sometimes requested enter and take on Pilot at Erskine Buoy.

Pilotage is compulsory for all vessels navigating in pilot district of Penang with the exception of fishing vessels and vessels of below 600 grt.

*Shipmaster's Report:* The KRA lightvessel, on the Outer Kra Bank to the South of the South Channel, is non-existent.

The pilot station is now equipped with VHF but operates on Channel 12 only. The Pilot Launch is also equipped likewise, as is a car that transports the pilots from their homes to Batu Maung Point where they board the launch. It takes them exactly one hour from their homes until they are aboard a vessel at Rimau Buoy, therefore a minimum 2 hour notice is adequate.

One pilot advised me not to approach the South Channel at any time if the vessel's draft is over 24 ft. He stated that the bar to the South-west of Rimau Buoy has not been surveyed for many years and that possible silting may leave it on a lesser depth than the chart suggests. The approach to the North Channel is safe.

**ANCHORAGES:** The anchorage for foreign going steamers (other than those carrying dangerous cargo or quarantine ships) is Southward of the South-western corner of the Man of War Anchorage (shown on Admiralty chart by pecked lines) and eastward of a line drawn from this pcint to the Northern white mark buoy and thence 180°. Vessels must moor so as to swing clear of these lines at all states of tide.

The anchorage for coasting power vessels is Southward of a line drawn 270° from the Northern white mark buoy and Westward of a line drawn 180° from this buoy. Vessels must swing clear of these lines at all states of the tide.

**RESTRICTIONS:** No entry restrictions imposed other than those dictated by state of tide and draft of vessel.

**MAX. SIZE:** No limitations of size of vessel except for draft. North Channel chart datum 26 ft. South Channel chart datum 22 ft. Vessels of up to 32 ft. can use port but must wait for high water.

**RADIO:** Penang Radio, call sign 9–MG.

**VHF:** Vessels can communicate direct to Pilot Office via VHF operated on Channel 12 VHF within a range of 15 miles. A separate VHF network links the tugs, launches and the Commission's personnel working on board vessels in the roads.

**TUGS:** May be required to berth vessel at Butterworth Wharves in Port Penang. Tug joins vessel when at close proximity to wharves. Usual for tug's lines to be used.

Two tugs available, 1,320 b.h.p. and 1,200 b.h.p. Also one small tug of 440 b.h.p. and one tow-boat of 174 b.h.p. available to tow lighters to and from vessels.

**BERTHING:** There are two wharves, viz. Swettenham Pier on the island of Penang and Butterworth Wharves on the Mainland.

*Swettenham Pier:* Two ocean berths of 1,200 ft. length with 32 ft. of water alongside. There is 168 sq. ft. of covered storage accommodation.

*Butterworth Wharves:* Five ocean berths of 2,928 ft. length with 32 ft. of water alongside. There are five transit sheds of 148,000 sq. ft., 5 storage godowns of 171,000 sq. ft. and a timber shed of 60,000 sq. ft. and 140,000 sq. ft. of open storage area. Seven godowns of 303,000 sq. ft. near the port area are leased to private companies.

**SPECIALISED CARGO-HANDLING FACILITIES:** No special berths for handling bulk cargo. Two of the berths at Butterworth Wharves are designed to handle containerised cargo when such facilities are required. At Swettenham Pier and Butterworth Wharves there are vegetable oil bulking installations. Pipe-lines are connected from the installations to the wharves.

**CARGO HANDLING EQUIPMENT:** At Butterworth Wharves 13 mobile cranes of 2- to 3-ton capacity, 62 fork-lift trucks of 6,000 lb. capacity, one forklift truck of 13,000 lb. capacity and 28 LPG forklift trucks for hatch work. In addition, one 30-ton mobile crane and one prime mover with four trailers for handling 20 ft. containers. At Swettenham Pier one mobile crane of 10 ton capacity, two electric cranes of 3-ton capacity, 11 fixed and mobile cranes and 25 fork-lift trucks. Scores of tractors and trailers make up the rest of the mechanised cargo-handling equipment of the Commission.

**LIGHTERAGE:** In the event of a vessel working in the roads, lighterage is available for the transport of goods to and from the vessel. There are about 242 lighters operated by private companies and twenty 150-ton lighters by the Commission for lightering of cargo in the Port. In the case of the Commission's lighters, lighterage is only undertaken for export cargo.

**STEVEDORES:** Stevedores can be provided by stevedore contractors at short notices but normally a minimum of 12 hours will be required. Shipping Agents normally make these arrangements with stevedoring contractors.

**MEDICAL:** Advance notice is necessary if medical attention is required so that arrangements can be made with Medical Department by Agents.

**TANKERS:** Two tanker berths. Esso Wharf, 27 ft. at low water. Caltex Wharf, 35 ft. at low water. Mud bar approach to Caltex Wharf is 29 ft. at low water. Tankers also occasionally call at Swettenham Pier to deliver oil to City Council Power Station.

**FRESH WATER:** Available at all times. Delivery can be by means of hydrants at berths or by water-boats to vessels anchored in Roads. Rate of delivery is approximately 40 tons per hour.

**FUEL:** Fuel available from private oil companies at 24 hours notice. Limited quantities of fuel can be supplied by barges to vessels in the roads.

**GANGWAY/DECK WATCHMEN:** Services of a watchman recommended.

**OPENING/CLOSING HATCHES:** Normally carried out by stevedores.

**IDENTIFICATION CARDS:** Needed only when a crew member is discharged after hospitalisation or when he is repatriated.

**REPAIRS:** Minor repairs can be undertaken.

**DRY DOCKS:** Dry docks not available for ocean carriers. Slipways available for vessels of 700 tons nrt with dimensions of 190 ft. × 40 ft.

**REPATRIATION:** Facilities exist for effecting crew changes and arranging necessary repatriation.

**AIRPORT:** Distance from port to airport approximately 11 miles. Served by both international and local airlines.

**TIME:** 7½ hrs. ahead of GMT. No alteration to clocks during year.

**HOLIDAYS:** Three port holidays a year: Hari Raya Puasa, Hari Raya Haji and National Day.

**POLICE/AMBULANCE/FIRE:** Dial 999.

**TELEPHONES:** A telephone is placed on every ship that berths alongside. This is one of services provided under a common charge known as the wharf service charge.

**SERVICES:** All types of minor marine servicing is available. Provided by private firms. Some of the services are draft survey, general conditioning of ship, valuation of ship, accident survey, inspection of refrigeration, radar adjusting service, compass adjusting and tank-cleaning facilities.

**SHORE LEAVE:** Allowed.

**REGULATIONS:** Free port, and as such, when a vessel calls at port, Customs search party may go on board vessel to search for contraband goods.

**DEVELOPMENTS:** The Bulk Cargo Terminal project at Prai consists of the construction of a 460 ft. × 60 ft. wharf which will be connected to land by an approach bridge of 24 ft. in width and approximately 3,900 ft. in length, reclamation of 64 acres of land for use as stockpile sites and the installation of a mechanical loading and unloading system for both wet and dry bulk cargoes.

Although initially only one berth is constructed, the scheme provides for the ultimate development of three more berths – one for both wet and dry bulk cargoes, and two for liquid cargoes.

Loading and unloading of dry bulk cargoes will be fully mechanical. A system of conveyor belts will link the berths and the stockpile sites. At the berth, loading will be by means of a ship loading conveyor and unloading will be by ship bulk unloader. The design capacity for the loading equipment is 900 tons per hour and unloading 450 tons per hour. Liquid cargoes will be pumped through pipe-lines and stored in special tanks at sites set aside for this purpose.

Under the project of the construction of the sixth berth at Butterworth Wharves, a new berth with associated cargo handling facilities will be built at Butterworth as an extension of the existing berths.

The new berth will be 532 ft. by 190 ft. and will have a transit shed of 30,000 sq. ft. Although it is a general cargo berth, container crane tracks will be laid to make it a dual-purpose berth similar to berth Nos. 4 and 5. When completed in 1977, the berth will increase the cargo handling capacity of Butterworth Wharves by an additional 200,000 tons annually.

*Container Handling Facilities:* Plans have been finalised to develop improved container handling facilities at Butterworth Wharves to cater for the gradual increase in container traffic in the Port of Penang.

The facilities to be provided are geared to service feeder container vessels and conventional vessels transporting containers as draft restrictions prevent the use of the port of Penang for large cellular container vessels. The facilities which will be provided include:

1. A marshalling yard of 16·5 acres with storage space of 1,270 containers.
2. A container freight station of 42,000 sq. ft.
3. 20 power points for refrigerated containers.
4. 1 unit 40 tons prime-mover, 1 unit 20 tons prime-mover, 2 units 40 ft. trailers and 2 units 20 ft. trailers.
5. 2 units straddle carriers.

The whole scheme is expected to be completed by 1975. At full utilisation, the facilities will have the capacity to handle 23,000 containers a year.

At this stage it is not planned to provide container crane (portainers) to handle containers between ship and wharf and vessels calling at the wharves are expected to use their own lifting gears.

*Expansion of Dockyard Facilities:* The Commission has called for International tenders from Consultants to undertake a study of the Commission's Dockyard at Bagan Dalam. The study will look into the expansion, modernisation and reorganisation of the yard on a commercial basis.

**DELAYS:** Rain is only factor that may delay a ship's discharging or loading operations.

**AUTHORITY:** The Penang Port Commission, PO Box 143, Penang, Malaysia. Tel. 63571. Telegraphic Address, "Wharves, Penang".

## PORT DICKSON, Malaya: 02.31 N. 101.47 E.

**DOCUMENTS:**

1. *Harbour Master's Office or Marine Department*

(*a*) "Report of Arrival of Vessel" on prescribed Form (Marine 28) obtainable from Harbour Master's Office on arrival.

(*b*) One copy, Passenger List, specifying names and nationalities and required to report any casualties, accidents, births or deaths that have occurred during the voyage to the passengers, crew, ship or cargo.

(*c*) Port Clearance from last port and copy of Manifest of Cargo to be discharged.

(*d*) List of all arms and explosives on board.

(*e*) In the case of a British or Malaysian vessel and vessels belonging to a nation not having a Consular Officer at the port, produce to Port Officer the Certificate of Registry and ship's Articles.

(*f*) All ship's certificates such as Safety Equipment Certificate, Radio Certificate, Load-line Certificate, Safety Construction Certificate, Ship's Registry, Passengers' Certificate, Derating Certificate and all Certificates of Competency of all Officers on board.

(*g*) Crew List.

X. *Immigration Authorities*

(*a*) Crew List (3 copies).
(*b*) Passenger List (3 copies).
(*c*) Produce all passengers passports/visas.
(*d*) Produce all seamens' cards.
(*e*) Forms A and B – "Immigrant and Emigrant" obtainable from Immigration Department on arrival.

3. *Port Health*

(*a*) Crew List showing last date of vaccination.
(*b*) Passenger List showing the last date of vaccination.
(*c*) Produce all seamen and passengers' vaccination cards.

4. *Customs Department*

(*a*) Crew List (2 copies).
(*b*) Passenger List (2 copies).
(*c*) Personnel Effects List (2 copies).
(*d*) Cargo Manifests (2 copies).
(*e*) Last Port Clearance.
(*f*) Bonded Stores List (2 copies).
(*g*) Full and correct statement of dutiable goods carried as ship's stores (2 copies).
(*h*) Customs Form C.D.15 obtainable from Customs Department on arrival.

**APPROACHES:** Deep water approach channel from North-west, marked by four light buoys, presents no difficulties and is clear.

Leading lights also exhibited which when in line bearing 070°, lead up to harbour over a sand ridge in depths of about 3½ fathoms.

**PILOTAGE:** The Port Dickson area does not constitute a Compulsory Pilotage District under provisions of Merchant Shipping Ordinance, 1952. Private pilotage services are, however, operated by Shell and Esso for vessels making use of their respective marine installations. Mooring Master boards tankers at Banbeck Shoal Buoy.

**ANCHORAGES:** (*a*) Good anchorage may be obtained in depths from 15 to 20 fathoms, Westward and South-westward of Tanjong Kamunin. Small vessels may obtain anchorage in depths from 4 to 5 fathoms North-eastward of Pulau Arang Arang, but holding ground is poor.

(*b*) Quarantine Anchorage is Westward of 10 fathoms line with leading light beacons of Port Dickson in line, bearing 070°, and within 15 cables of front leading light beacon situated on Railway Jetty.

(*c*) Prohibited Anchorage Area indicated by pecked lines on chart and described under Port (Negeri Sembilan) (Amendment) Rules, 1963. This area contains a tanker mooring buoy, with extensive ground tackle and floating hose attachments, which is connected to the shore by a submarine pipe-line. Passage between the buoy and the shore is also prohibited.

**TUGS:** No tug-boats available.

**MAX. SIZE:** Up to 47 ft. draft at S.B.M. terminal.

**BERTHING:** Port installations at Port Dickson comprise the following:

A small boat harbour contained in the curve of the stone approach to the Railway Jetty which affords little shelter against Southerly winds and dries out at low water.

The Shell Jetty – property of the Shell Refining Co. (Malaysia) Ltd. (Private.) Reinforced concrete jetty 700 ft. with "T" head 170 ft.×36 ft.

The Esso Jetty – property of the Esso Standard Malaya Ltd. (Private). Reinforced concrete island jetty 200 ft.×24 ft.

The Railway Jetty – property of the Malayan Railway Administration. Stone pier 600 ft. length terminating in a crosshead 150 ft. long with steel piling and wooden deck.

The Joint Shell/Esso single-buoy Tanker Mooring and Crude Oil Discharging Terminal.

Stone ramp on foreshore usable by lighters at high water.

**MEDICAL:** District hospital with 150 beds.

**TANKERS:** Shell/Esso Single Buoy Mooring for crude discha into submarine pipe-line. Refineries produce petroleum product export. Deballasting facilities up to 35,000 barrels capacity.

*Esso Product Jetty:* Berth is constructed of reinforced conc The island jetty is 200 ft.×24 ft. with 4 off-lying mooring bu inshore for mooring purposes. Accommodation for one vesse outer face only.

Max. LOA 575 ft.; Max. draft 34 ft.; max. size 19,500 dwt.

Shore connections:

1×20 in. black oil/ballasting
1×16 in. white oil line
1×10 in. LPG line
1×4 in. inert gas line
1 crane to handle hose

**FRESH WATER:** Available at Shell and Railway jetties.

**FUEL:** Bunker fuel-oil available. No diesel.

**DEVELOPMENTS:** Proposal to enlarge facilities and to prov deep-water berths.

**CUSTOMS ALLOWANCES:** Tobacco, cigarettes 25 in num per man per day, or cigars 8 in number per man per day, or toba 1 oz. per man per day, or snuff 1 oz. per man per day. Wine and spirits, spirit ⅙ qt. per man per day, or wines 1 qt. per man per da beer or stout 1 qt. per man per day.

**REPAIRS/DRY DOCKS:** None.

**HOLIDAYS:** Official holidays in the state as follows: New Ye Day, 1 day; Chinese New Year's Day, 2 days; Muslim New Ye Day, 2 days; Wesak's Day, 1 day; His Majesty's Birthday, 1 d Prophet Mohammad's Birthday, 1 day; His Excellency Governo Birthday, 1 day; Malaysia Day, 1 day; Deepavali, 1 day; Hari Ra Huji, 2 days; Christmas Day, 1 day. No cargo is worked on an the above gazetted public holidays – port closed.

**AIRPORT:** None.

**AUTHORITY:** See "Malacca".

## PORT KELANG, formerly Port Swettenham, (See Pla Malaya: 03.00 N. 101.24 E.

**PORT LIMITS:** All the waters in the Klang Straits, Klang Riv Sungei Aur, Selat Lumut, Sungei Langat and other waterways co tained within the parallels 2° 58′ N. and 3° 05′ N. and the meridia 101° 20′ E. and that passing through Connaught Bridge i.e. 101° 30″ E. approximately including all piers, jetties, landing plac wharves, quays, docks and other similar works whether within without the line of high water mark, any position on the shore or ba within 50 yards of high water mark subject to any rights of priv property therein.

**APPROACHES:** Ships from and to Penang enter and leave t port by the North Klang Straits; and ships from and to Singapo enter and leave by the South Klang Straits. The entrance channe the North Klang Straits has a natural depth of 32 ft. below datu A very large deep water anchorage for ships is available at the Nor Klang Straits. For ships entering the Old Port, the permissible dr is 28 ft. and 22 ft. plus the height of tide through the North Kla Straits and South Klang Straits respectively.

**DOCUMENTS:** (*a*) *For Agent.* Vessels required to fill in arri report which may be obtained from Agent at Singapore or Pena or Boarding Agent on arrival. This should be completed and hand to Boarding Agent together with last Port Clearance and one co each of Crew List and Passenger Lists for submission to Mari Department.

Vessels should have ready and hand to Boarding Agent on arri the following:

Arrival Report.
Last Port Clearance.
Two copies of Crew List.
Two copies each of Disembarking and Transit Passenger Lis (if any).
List of Explosives, dangerous cargo on board.

Following documents should also be handed to Boarding Age on arrival and will be returned to vessel after perusal by Mari Department:

Malaysian Light Dues Receipt (if any).
Ship's Register.
Radio Safety Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Deratisation Certificate.

Port Health Officer now requires all vessels arriving from forei ports to submit an "Entry Declaration" on form Health 43, on t International "Maritime Declaration of Health" form or on a simi copy, and this should be handed to Boarding Agent, together wi copy of crew list, in cases where vessels are not in Quarantine, which case doctor does not attend on board.

*Note:* Endorsement of Port Clearance must be obtained from Po Office at Marine Office before a fresh Port Clearance can be issu by local Customs Authorities and handed to vessel before sailing.

(*b*) *Immigration*

2 copies Crew List.
2 copies Passenger List (Disembarking and Transit).

(*c*) *Customs*

2 copies Customs List (CD.15).
1 Crew List.
1 Passenger List.

**FLAGS:** The Malaysian Flag. Flag "Q" meaning Health Cleara required. * Flag 2/5 meaning No passengers on board, or * Flag 3 meaning Passengers on board. Pennant Zero is not required since Boarding Officers do not board the ship on arrival. Flag H meaning Pilot on board. (* Applies only to vessels arriving from foreign ports, which now includes Singapore.)

*Note:* Except for vessels under way, no vessel in port may use its siren except in case of an emergency when no other means of communication is available. The Authorities strictly enforce this rule and vessels infringing it become liable to heavy fine.

**PILOTAGE:** Available 24 hours a day.

(*a*) Application. Piloting carried out by Kelang Port Authority. Masters to cable "Pilots Port Kelang" giving ETA and point of arrival, i.e. Pintu Gedong, Pulau Angsa, Kapar Buoy, Tanjong Bakau, or Deep Water Point, and draft at least 6 hours before arrival, as Pilots will not leave shore until confirmation received from vessel. Both North and South Channels are well marked and Pilots consider it quite safe to arrive and depart at any hour.

Vessels approaching this port normally apply through Agent, giving ETA Pintu Gedong, Pulau Angsa or Deep Water Point, together with draft and port of departure.

(*b*) VHF. If vessels wish to communicate direct all pilot boats are fitted with VHF for use between pilot office, pilot boats, pilot boat to pilot boat and where necessary to vessels arriving at this port. Operated on Channel 12 of International Maritime VHF radio telephone bands, and of a range of 20–25 miles.

(*c*) Recognition. Pilot boats painted black with white horizontal band all round and have white superstructure.

(*d*) Boarding. Unless advised otherwise Pilots will be ordered to board vessels at Pulau Angsa (North Channel), or Pintu Gedong South of the Seaward Bar Buoy, or, Deep Water Point between Tanjong Sarang Lang and Tanjong Bakau.

Pilot ladders should be of approved Standard pattern internationally used.

(*e*) Waiting a Pilot. Location for a vessel awaiting Pilot is at Pintu Gedong 5 cables South of Seaward Bar Buoy, at Pulau Angsa 1 mile East of Pulau Angsa Island, and at Deep Water Point where anchorage is available according to number of vessels already anchored.

(*f*) Regulations. Master may bring his vessel into Deep Water Point Anchorage without a Pilot and if this is the case the Pilots are to be informed accordingly. It is compulsory to take a Pilot when berthing or unberthing at a wharf and to take a Pilot to and from the buoys. Pilotage is not compulsory to the anchorages Nos. 6 and 7, to the North Shore Anchorage or to Deep Water Point. Vessels will be berthed port side to on ebb tide and starboard on flood.

**ANCHORAGES:** Per latest Admiralty charts. Vessels may load timber and ore from privately owned junks at Deep Water Point Anchorage. In exceptional cases and with permission of Port Authority it is also possible to work with Authority Lighters at Deep Water Point.

**RESTRICTIONS:** (See "Max. Size"). Pintu Gedong, the Southern Channel Pilot Station, there is a restriction, of which vessels will be advised when giving their ETA.

**MAX SIZE:** Max. length of vessels using South Port (old port) is: dry cargo vessels, 565 ft. LOA with draft of 32 ft.; tankers, up to 560 ft. LOA and draft 30 ft. Tidal conditions govern movements of all vessels over 500 ft. LOA in the South Port but not at the North Port (new port). Vessels of up to 621 ft. can be berthed under any conditions at the North Port but only under special tidal conditions at the South Port.

At the North Extension Wharves, container ships of 950 ft. can be berthed.

**HEALTH:** Port Health Officer will board vessels arriving from infected ports, or carrying deck passengers at Deep Water Point between 0700 and 1800 hours. All ships arriving from foreign ports should ensure that all on board hold valid smallpox vaccination documents.

All vessels should include in arrival cables confirmation that all well on board and also that all health papers in order. It should be understood that the health papers referred to include deratisation, or deratisation exemption Certificate.

**RADIO:** ETA cables normally routed via Singapore or Penang as no radio station in Port Kelang. Such messages when received are transmitted by telephone to Agents/and or Pilots at Port Kelang.

**VHF:** (See "Pilotage"). Ship to shore telephones available at all berths at North Klang Straits, and VHF sets available for ships in moorings. Klang Exchange keeps a 24-hour watch on Channel 16 and will connect the vessel to any telephone receiver ashore. For local calls the cost is $1.92 for 3 minutes (approx.).

**TUGS:** Supplied by Port Authority and normally "stand by" vessels berthing at wharves as and when required. Tugs towing use ships lines, tugs pushing use their own lines. 5 tugs available to assist in berthing and unberthing and are equipped with fire-fighting appliances and radio communications system. When vessels berth or unberth at wharf tugs ordered by Agent in consultation with Pilots and once in attendance are charged for whether used or not. Tugs also used to swing vessels in stream which are stemming ebb tide on departure. In addition 3 smaller tugs used to tow lighters to and from vessels.

**BERTHING:** There are two ports viz: the South Port or Old Port and the North Port. Vessels berthing in the South Port (Old Port) are governed by tidal conditions which vary considerably. Vessels over 525 ft. LOA are usually berthed port side to on the ebb and then only when tides are favourable. There is usually no objection to vessels unberthing from the wharf at night although generally speaking vessels will not be berthed at night. As a general rule discharging vessels will berth at North Port (North Klang Straits) and loading vessels in the stream in the South Port (Old Port).

(*a*) South Port. Three ocean wharves of 1,640 ft. length with 30 ft. of water alongside, two coastal shipping wharves of 950 ft. with 20 ft. of water alongside, 5 swinging buoys, and two anchorages. Three to four vessels of not more than 250 ft. in length and with drafts up 18 ft. can be accommodated at North Shore anchorage. Also two lighterage wharves of 350 ft. 550 ft. of wharves will be added once the joining of wharves No. 3 and No. 4 in South Port completed.

(*b*) North Port (North Klang Straits) Wharves. Four ocean wharves with total length 2,490 ft. Each berth 580 ft. long, width 202 ft. Concrete wharves with a safe working load of 4 cwt. per square foot and a maximum point load of 10 tons. Draft alongside all four wharves 30 ft. Rail track on wharf apron. In addition two container wharves, each 1,050 ft. long and one conventional cargo wharf 700 ft. long have been built and are now in operation. Two wharves are 260 ft. wide. Depth of water alongside is 45 ft. There are two container cranes on the container wharves. If there are no container ships in port, these wharves will be used by conventional vessels.

Depth of water alongside is 45 ft. Container stacking yard is 18 acres with room for future expansion. Freight station measures 600 ft. × 120 ft.

*Container Handling Equipment:* 2 container cranes of 35 tons capacity each (which can handle 800 containers a day).

2 straddle carriers of 30 tons capacity each.
12 prime movers.
9 twenty ft. and 6 forty ft. trailers.
10 forklifts.
2 tugs of 2,700 h.p. each.

(*c*) General.

| *Facility* | | | Depth (ft.) |
|---|---|---|---|
| North Klang Straits Approach | | | 30 |
| Pintu Gedong Bar | | | 20 |
| Labohan Garap Bar | | | 25 |
| No. 1 Wharf | | 400 ft. length | 20 |
| No. 2 Wharf | | 350 ,, ,, | 20 |

| No. 9 Wharf | | 580 ,, ,, | 30 |
| No. 10 & 11 Wharf | | 1,050 ,, ,, | 45 |
| No. 12 & 13 Wharf | | 1,050 ,, ,, | 45 |
| No. 14 Wharf | | 700 ,, ,, | 45 |
| No. 1 Buoy on 600 ft. swing | | | 23 |
| on 500 ,, ,, | | | 32 |
| No. 2 Buoy on 600 ,, ,, | | | 23 |
| on 500 ,, ,, | | | 29 |
| No. 3 Buoy on 600 ,, ,, | | | 17 |
| on 500 ,, ,, | | | 26 |
| No. 4 Buoy on 600 ,, ,, | | | 20 |
| on 500 ,, ,, | | | 25 |
| No. 5 Buoy on 600 ,, ,, | | | 24 |
| on 500 ,, ,, | | | 24 |
| No. 6 Mark on 600 ,, ,, | | | 30 |
| on 500 ,, ,, | | | 30 |
| No. 7 Mark on 600 ,, ,, | | | 30 |
| on 500 ,, ,, | | | 40 |

Distance between buoys is as follows:

Distance between No. 1 buoy and No. 2 buoy 1,200 ft.
Distance between No. 2 buoy and No. 3 buoy 1,200 ,,
Distance between No. 3 buoy and No. 4 buoy 1,200 ,,
Distance between No. 4 buoy and No. 5 buoy 1,300 ,,

The above distances allow for slackness in pendants at low water. The depths listed combined with tidal predictions for current year give actual depth of water.

**STEVEDORES:** Almost all timber loaded from private junks for which no lighter gangs needed. Average working rate, subject to stow, for timber in loose pieces is 4–6 tons per hour, and in bundles 6–8 tons per hour. Not more than two lighters or "tongkangs" may lie alongside any vessel abreast of each other and not more than two lighters shall be moored astern of a vessel.

Rubber, latex in drums, etc., loaded by Port Authority and lighter/wharf gangs are required. Average working rate for these commodities is 14 tons per hour.

The average rate of discharge at North Port (North Klang Straits) wharves is 14–16 tons per hour.

On-board stevedores provided by the Port Authority. Requirements for the 1st shift should be made known by 1300 hours the previous day and for 2nd shift by 1000 hours same day and the 3rd shift not later than 1130 the same day.

Working hours throughout port: first shift 0700 to 1500 hrs. (meal break 1100–1200 hrs.). 2nd shift 1500 to 2300 hrs. (meal break 1900–2000). 3rd shift 2300 to 0700 hours (meal break 0300 to 0440).

**MEDICAL:** A number of private doctors in Port Kelang and it is often not necessary to give any advance notice of medical attention being required. In event of vessel requiring urgent medical attention on arrival, advisable for Master to cable Agent in advance. At present 2nd class medical facilities available in Kelang and 1st class facilities only available in Kuala Lumpur. As vessels arriving at Port Kelang normally do so after calling at Penang or Singapore no inoculation, vaccination or fever certificates are required unless either Singapore or Penang is declared an infected port.

**TANKERS:** Tankers always berth port side to on ebb and near slack water. Vessels with bulk liquid cargoes to load or discharge will berth at wharves 3, 4, or 5. When a number of pumping vessels in port, vessels will usually occupy these wharves only for the time it takes to complete pumping and may then have to shift to stream or another wharf. Three of the ocean wharves are provided with facilities for handling liquid cargo. Liquid cargoes now being handled are: latex, palm, coconut oil, petroleum products, alkane, tallow and fuel oil.

Shell Company has a private jetty on which vessels up to 420 ft. in length with drafts not exceeding 20 ft. can be berthed.

**DENSITY:** Varies considerably with state of tide and heavy monsoon rains.

**FRESH WATER:** Waterboat, capacity 200 tons, available to supply vessels in South Port (Old Port) and at Deep Water Point with fresh water. As much notice as possible should be given if waterboat required. At North Port (North Klang Straits) water available from wharf. Pumping rate about 20–25 tons per hour.

**FUEL:** Bunkers are available.

**FIRE PRECAUTIONS:** In respect of tankers loading or discharging inflammable cargo, necessary to have wharf cordoned off and "No Smoking" signs exhibited prominently. Port Fire Brigade required to be on stand-by at wharf whilst operation in progress. Vessel may not disable engines whilst alongside wharf and shall have axes ready in event has to leave wharf urgently and necessary to cut ship's lines. Port Fire Service on duty 24 hours a day throughout year. Service is capable of fighting all types of fire whether on land or on sea. Fire service has following equipment: 3 fire engines, 1 Land Rover fire engine, 2 trailer pumps, 3 fire fighting tugs.

**OPENING/CLOSING HATCHES:** Normally carried out by stevedores.

**CUSTOMS/IMMIGRATION:** Customs Officer will board vessel soon after arrival to seal the "Bonded stores". For vessels staying in port some time it is usual to issue 3 days supply – a further issue may be made on request after 3 days.

Immigration Officer will clear vessels arriving from foreign ports on all days between 0700 and 2100 hours. No one may board or leave or approach within one cable length of such vessel without special permission until vessel has been cleared by Immigration Officer and Immigration Signal is hauled down. No Immigration formalities required for vessels arriving from or leaving for other West Malaysian ports (Malacca and Penang).

**IDENTIFICATION CARDS:** Advisable that members of crew carry identification cards when leaving ship.

**CONSULS:** Consulates/Embassies/High Commissions in Kuala Lumpur (28 miles from Port Kelang).

Embassy of the United States of America.
Australian High Commissioner's Office
Belgian Embassy
Consulate of Brazil
British High Commission
Burmese Embassy
Canadian High Commission
Consulate of the Republic of China
Royal Danish Embassy
Consulate of Finland
Embassy of France
West German Embassy
Indian High Commission
Embassy of the Republic of Italy
Embassy of Japan
Embassy of the Republic of Korea
Royal Embassy of Netherlands
New Zealand High Commission
Consulate of Norway (at Penang only)
Consulate of Panama (at Penang only)
Pakistan High Commission
Embassy of Philippines
Singapore High Commission
Royal Swedish Embassy

**REPAIRS:** Slipping facilities for repair of lighters and smaller tugs available. No facilities for major repairs to ships.

**DRY DOCKS:** None.

**REPATRIATION:** Crew changes and repatriation must be arranged by Agent. Harbour Master attends signing-on and signing-off of the crews on ship's articles.

**AIRPORT:** Subang International Airport approximately 20 miles from port on main trunk route to Malaysian capital of Kuala Lumpur and served by regular domestic flights and international flights.

**HOLIDAYS:** Port Closing Days. *Hari Raya Puasa; * Chinese New Year; Malaysia Day (31st August); * Deepavali; Christmas Day (25th December). * Dates subject to changes as festivals coincide with Mohammedan, Chinese and Hindu calendars.

**TELEPHONES:** At North Port (North Klang Straits) Wharves telephones installed on board if required. At wharves in South Port (Old Port) there is always a telephone within easy reach at Wharf Office.

**GENERAL:** (*a*) Ship-Shore Communication. When vessels are berthed in stream or at Deep Water Point a 24 hour launch service can be supplied. Arranged by Agent in consultation with Master to suit requirements of ship.

Vessels permitted use own boats with proper navigation lights at night.

(*b*) Seamen's Club. "Mariner's Club" for officers and seamen outside No. 3 Gate of South Port. Club has swimming pool and bar.

(*c*) Diving. Diving services available for salvaging lost cargoes, examining underside of ships, etc. Divers capable of deep-sea diving down to 120 ft.

**DEVELOPMENTS:** The North port is to be extended Northwards with wharves totalling 7,000 ft. in length. Phase I of the pro (construction of 3,500 ft. of wharves) is expected to be completed the end of 1976. Phase II involves construction of 2,100 ft. Phase III the final 1,400 ft. is expected to be ready by the end 1979 or 1980.

**AUTHORITY:** Lembaga Pelabohan Kelang, Port Kelang.

## ROMPIN (Kuala Rompin); inc. Pahang, Malaya: 02 N. 102.30 E.

**DOCUMENTS:**

Register.
Last Port Clearance.
7 copies Crew List and 4 for Agent.
5 copies Passenger List (if any).
5 copies Stowaway List (if any).
2 copies Stores List (including firearms and ammunition).
2 copies Dutiable Liquor and Tobacco List.
2 copies Crews Declaration List (cameras, radios, etc.).
1 copy Vaccination List.

Masters of vessels to fly the necessary following flags on arrival required under Section 448 of the Merchant Shipping Ordinance Sub-Section (9) of the Federation Port Rules, 1953.

(1) The Federation of Malaysia Flag.
(2) The Pennant "O" Flag (Request Port Officer).
(3) The "Q" Flag (Request Port Health Officer).
(4) The Pennant "2"; "5" Flags if no passengers and "3"; Flags if there are passengers on board (Immigration).

**PILOTAGE:** Compulsory to the loading berths. Extra charge pilotage outside normal office hours and holidays.

**ANCHORAGE:** On arrival, vessels required to anchor about mile outside berthed ships to obtain pratique. An accommoda ladder must be rigged on lee side to allow Port Authorities to boa

**READINESS:** Notice of readiness cannot be accepted until ves is in free pratique, Customs Inward Examination completed, and all respects ready to load.

**LOADING.** (*a*) Ladders. Masters particularly advised to see tha sound and adequate ladder provided at each lighter to allow labour engaged in loading to pass to and from ship with no undue ri Regulations are provided in the Merchant Shipping Ordinanc Section 445, Sub-Section (O) which takes care of this requireme and failure to take adequate precaution in seeing regulation observed may result in serious consequence to those responsible.

Masters requested to ensure that in addition to ladders labourers, an extra ladder, preferably a clean pilot ladder, be ma available at all times for the Agent for boarding. This ladder shou be made fast on lee side, just forward of any scuppers in vicin and a heaving line from ship's rail made fast to bottom rung. Wh ladder not in use, bottom of ladder can be pulled up a few feet w heaving line to prevent labourers from using it or damage fro lighters.

(*b*) Winches. All winches must be in single gear at all times.

(*c*) Derricks. Practice to work two sets of derricks to one ligh where practicable.

(*e*) Trimming. No manual trimming undertaken.

(*e*) Damages. In the event of your vessel sustaining damage stevedores during loading, you are requested to inform the clerk a foreman on board immediately and as soon as practicable conf same in writing to the Eastern Stevedoring Co. Ltd., Kuala Romp with copies to Hong Kong & Eastern Shipping Co. Ltd., Hong Kon and Malay States Shipping Ltd., Kuala Rompin. It is important th full details of damage are given, together with measurements whe ever possible.

Minor damage has occurred on vessels due to hatch beams n being bolted or lashed. Masters therefore requested ensure all bea adjoining working parts of hatches either bolted or lashed, otherwis stevedores will repudiate liability for any damage incurred.

**OPENING/CLOSING HATCHES:** Removal and replacement hatch beams and covers must be done by ship's crew. Shi Officers should see that any tween-deck beam removed is replac before ore reaches that height.

**CUSTOMS:** Customs office hours 0830 to 1630 Monday to Frid 0830 to 1300 Saturday.

**IDENTIFICATION CARDS:** Every member of crew must produ Identity Document or Shore Leave Pass at Customs House wh landing and again when returning to vessel.

**HOLIDAYS:** New Year's Day; Hari Raya Puasa, 2nd day; Chine New Year, 2nd day; Hari Raya Haji, 2nd day; First Day of Muharra Vesak Day; Birthday of Sultan of Pahang; Birthday of H.M. The Ya Di-Pertuan Agong; Birthday of Prophet Muhammad; Malaysia Da Deepavali; Christmas Day.

*Note:* Where a holiday falls on a Sunday, the following day w be observed as a holiday, and if such latter day is already a holida then the day following shall be a public holiday.

**GENERAL:** (*a*) *Scrap Iron*. Steel mills in Japan complain from ti to time of finding pieces of scrap iron in the iron ore cargoes. If th scrap is not found it will cause serious damage to the plant a occasion considerable delay to production; furthermore, sho scrap iron enter the machinery there is always the possibility of endangering life, and several fatal accidents have been attribu to this cause.

The assistance of officers and crew is requested in reporting a scrap iron they see being loaded, advising shippers into which ho it went and number of the lighter it came from to enable us to ta appropriate action.

*(b) Whistle, Radio.* Wireless Transmitters, Whistles and Sirens, etc., must not be used by vessels at anchor off Kuala Rompin.

*(c) Stores.* Bonded stores can be obtained from Kuala Lumpur and Kuantan at prices roughly same as Singapore. Essential, view Customs formalities, that Masters give Malay States Shipping Ltd., Kuala Rompin six days prior notice of requirements.

**SHORE LEAVE:** No seaman may proceed more than three miles from Kuala Rompin Customs House. The Officer in Charge Customs, as acting Immigrating Officer, has authority to limit or prohibit shore Leave in all cases.

**AGENT:** Malay States Shipping Sdn. Berhad, PO Box 2, Kuala Rompin, Pahang.

## SABAH, including Kudat, Lahad Datu and Semporna: (See Plan)

**DOCUMENTS:** Eight copies all usual documents.

**PILOTAGE:** Applications normally made by Shipping Agents with advance notice of 24 hours prior to actual time that Pilot services required. Pilot boats between 30–40 ft. length and equipped with VHF/AM Sets – 80·4 Mc/s. frequency. Pilot station at Port Office and location for vessel awaiting Pilot is within port limit.

**ANCHORAGE:** All ports within bays, therefore provide safe anchorages.

**RESTRICTIONS:** No restrictions for vessels entering port at night.

**MAX. SIZE:** All ports unlimited, cargo worked at anchor.

**HEALTH:** To obtain pratique, arrange with Shipping Agent. Pratique for vessel entering, after calling at another port in same state, is not required. Anchor in quarantine anchorage if vessel is suspect and display following signals: *By Day:* International Code Signal "QQ.". *By Night:* A Red light over a White light and a separate hoist of Red light over a Green light. Hoisted vertically 6 ft. apart where best seen.

**RADIO:** Singapore Radio recommended.

**BERTHING:** Application for berthing has to be made within 24 hours prior to actual time that berthing is required. *Details and Requirements:* Name of vessel, gross and net tonnage, length overall, draft (fore and aft), ETA at berth, ETD from berth, nature and tonnage of cargo to be discharged/loaded. No priority for berthing ships and the turn is, first come first served.

*Kudat:* L-shaped wharf with the two berths. Western berth – length 370 ft. minimum depth 21 ft. Eastern berth – length 300 ft. minimum depth 21 ft.

*Lahad Datu:* L-shaped wharf with two berths. Outer berth, length 200 ft. minimum depth 32 ft. Inner berth, length 130 ft. minimum depth 30 ft.

*Semporna:* T-shaped wooden wharf with two berths. Outer berth, length 150 ft. minimum depth 26 ft. Inner berth, length 127 ft. minimum depth 20 ft.

**STEVEDORES:** Arrangement of stevedores should be made with 48 hours notice to Shipping Agent. Average load/discharge rate: General cargo, 15–20 tons per hatch per hour; cement 20–30 tons per hatch per hour.

**MEDICAL:** Arranged on arrival by Shipping Agent.

**DENSITY:** Average density in the ports 1020.

**FRESH WATER:** Available at Government General Cargo Wharves at a rate of 20 tons per hour.

**DEVELOPMENTS:** Lahad Datu, having new port installation and wharves facilities.

**GANGWAY/DECK WATCHMEN:** Not necessary.

**OPENING/CLOSING HATCHES:** Normally by stevedores.

**CERTIFICATES:** Registry, Load Line, Radio, Safety Equipment and Derating Exemption.

**CUSTOMS ALLOWANCE:** Tobacco, wine and/or spirits: no control and up to discretion of Officers of Customs and Excise.

**CARGO GEAR:** Ships gear used.

**IDENTIFICATION CARDS:** Not needed.

**CONSULS:**

**REPAIRS:** Marine Department operates engineering workshops at Labuan and Sandakan. Some private firms also undertake small engine and deck repairs.

**DRY DOCKS:** No dry docks available in the State. Marine Department has three slipways in Labuan which are capable of shipping vessels of 60 tons, 200 tons and 500 tons displacements. One in Sandakan for vessel up to 120 tons.

**REPATRIATION:** Normally arranged by Agents.

**AIRPORT:** Most airports in State between 2–5 miles from the town.

**TIME:** Local time is 8 hours ahead of GMT. No alteration to clocks.

**HOLIDAYS:** Cargo work can be arranged if necessary during official holidays, but not for Hari Raya Puasa, Chinese New Year and Christmas Day.

**POLICE/AMBULANCE/FIRE:**

| | Fire/Police | Hospital |
|---|---|---|
| Kudat | 333 | 335 |
| Lahad Datu | 599 | 522 |
| Semporna | 599 | |

**SERVICES:** No services available for cleaning tanks, but compass adjusting can be arranged with officers of Marine Department, Labuan.

**SHORE LEAVE:** Allowed.

**DELAYS:** Due to weather conditions only.

**AUTHORITIES:**

## SANDAKAN, Sabah: 05.50 N. 118.07 E. (See Plan)

**FLAGS:** Signal letters, Mail flag (if any mail on board for discharge); "Q" flag is essential if Sandakan is the first Sabah port at which a vessel calls. If ship carrying passengers it should fly immigration signals Nos. 3 and 4; if no passengers Nos. 2 and 5.

**DOCUMENTS:** Five sets of Inward Manifest in the prescribed form to be airmailed to Agent to arrive at least 48 hours before the vessel.

(a) *To be Produced on Arrival:*

| | Total |
|---|---|
| Sabah Lights and Harbour Dues form | 1 |
| Manifest in the prescribed form | 2 |
| Crew List | 3 |
| Last Port Clearance | 1 |
| Stores List | 3 |
| Passenger List | 3 |
| Arms List | 2 |
| Narcotics List | 3 |
| Parcels List | 2 |

(b) *Required by Agent:*

2 sets of Inward Manifests for all inward cargo.

5 sets of Transhipment Manifests for all cargo to be transhipped at Sandakan.

2 copies of hatch list.

1 copy of Passenger List.

1 copy of Crew List.

1 copy of List of Arms and Ammunition.

1 copy Narcotics List.

1 copy Stores List.

(c) *To be Supplied to Ship before Departure:*

Manifests, as required by vessels.

Captain's copy of B's/Lading.

Port Clearance and Customs Clearance.

Sabah Lights and Harbour Dues form.

(d) *Immigration:* Immigration Officer will board vessel on arrival and clear her inwards. No restrictions on crew and/or passengers going ashore. Immigration require 2 copies of crew list and 2 copies of passenger list. Vessels cleared inward until 1800 hours only. If there are special circumstances arrangements can be made to clear vessels inward after this time.

(e) *Marine Department:* Shipping Arrival Report to be signed by Master of Vessel.

**PILOTAGE:** Pilotage not compulsory but if required the Harbour Master acts as Pilot. At least 24 hours notice should be given and position where Pilot is required to embark (i.e. the bar buoy or within harbour limits) should be included in the message. Pilot station tel. 3128.

**ANCHORAGES:** For loading timber: A black and white conical buoy situated 1·2 miles South-westwards from Government Wharf indicates the anchorage. It is important that vessels should anchor as close to this buoy as possible, when anchored further from shore it may take up to an hour longer for launches towing rafts of timber to reach ship and in addition there is less shelter from wind and weather and consequently raftsmen have to cease work earlier.

For discharging: Unless it is intended to come alongside the wharf, vessels discharging should anchor 4 cables due South of wharf. Wharf is 750 ft. long with dolphins placed 100 ft. from each end giving a total length of 950 ft. If discharging into lighters and loading log timber simultaneously vessels should proceed to Timber Anchorage.

**RESTRICTIONS:** (a) Shifting: Vessels may not berth alongside after dark without special permission, but they may leave the wharf, having given prior notice.

(*b*) Special Cargo Regulations: No vessel with dangerous cargo may be alongside after sunset, except at discretion of Harbour Master. No dangerous cargo may be discharged simultaneously with general cargo except with permission of the Harbour Master. Livestock: subject to approval of Veterinary Authority. Certain animals, including cattle, are prohibited imports and exports except under licence.

**MAX. SIZE:** Draft restriction is 25 ft. on the Bar plus the height of tide, mean high water being about 6 ft.

**HEALTH:** (Also see "Radio" and "Regulations"). If Sandakan is first port of entry into Sabah a vessel must proceed to quarantine anchorage until cleared by Health and Immigration Officials.

The Sabah Government are signatories to the WHO convention on quarantine regulations. If vessel comes from outside State of Sabah then Port Health Authority will require to board in quarantine anchorage before vessel can proceed to wharf or timber anchorage. If, however, vessel is not coming from an infected port pratique may be granted providing vessel cables Agent prior arrival advising last port of call and whether vessel healthy. Pratique normally cabled to ship but if unreceived, vessel must proceed to quarantine anchorage.

Port Health Authority require completed copy of Maritime Declaration of Health, and copies of Crew, Passenger and Narcotics Lists.

**RADIO:** (Information required before ship's arrival). ETA; number of passengers, health situation. Manifest, stowage plan, number of gangs required, (loading and discharging gangs to be specified separately). Amount of water required. Vessels not allowed to use their radio in port.

Marine signal station keeps watch on VHF Channel 16, from 0530 to 2000 hours.

**TUGS:** A tug of 337 b.h.p. stationed at Sandakan.

**BERTHING:** (Also see "Anchorages"). (*a*) Mooring: The numbers of a vessel which is berthing alongside will be shown from signal station on Eastern end of Customs House. In addition, a cone indicating tidal stream will be hoisted, pointed end of cone down indicates flood tide and pointed end up indicates ebb tide. Linesmen are on hand to receive a vessel's lines, a mooring boat will be provided by Marine Department if it is necessary to send lines to dolphins. Government Wharf, least depth 21 ft.

(*b*) Buoys: No mooring buoys.

(*c*) Lighters: No lighter fleet. The timber companies have their own lighters and scows which can sometimes be hired if not being used by these companies.

**STEVEDORES:** Stevedoring in hands of Port Authority who supply gangs as required.

(*a*) Working hours, 0730–1130 also 1130–1300 (overtime), 1300–1700 also 1700–2200 (overtime). Gangs ordered at least 12 hours before a vessel arrives.

(*b*) Overtime. When working in stream, overtime usually from 1100 to 1200 and 1800 to 2200. Application for permission to work overtime must be made to Customs not later than 1500 hours on the afternoon that overtime is to be worked or 1100 hours on Saturday for weekend overtime.

(*c*) Working Sundays and holidays. Work is normally carried out Sundays and it is sometimes possible to arrange for work on some public holidays, principal exception being Chinese New Year. Application must be made to Customs for permission to work Saturday afternoons, Sundays and public holidays.

(*d*) Rate. Log loading is good, comparing more than favourably with other Borneo ports. Rate of loading about 800 cu. ft. hoppus (20 B/L tons) per gang hour for logs, and 6 B/L tons per gang hour for sawn timber. Discharging general cargo about 10 tons per gang hour.

**CARGO:** (*a*) Tally: Tally clerks supplied by Agent if required. Sawn timber tallied on to scows by timber companies' clerks and tallied into ship by ship's tally clerks. Ship responsible for total number of pieces of timber shown on Mate's receipts. Letters of Credit do not allow the clause: "A quantity said to be" to be inserted on the B/Lading. Log timber tallied into ship by checking against specifications supplied by timber companies.

(*b*) Inward Cargo: Is tallied out of ship on to wharf or into lighter. Local watchmen can be supplied by Agent if necessary but it is generally found to be more satisfactory if these duties are carried out by crew. Damaged cargo is surveyed on the spot, otherwise no liability of vessel is acknowledged. Discharge carried out after permission has been obtained from Customs after manifest of inward cargo has been deposited. Cargo is delivered to consignees against production of relative Bill of Lading. Ship's responsibility to consignees ceases at ship's side but, in the case of short-landed cargo, reasonable proof must be given to Customs that cargo has not been landed. A short-landed Memo certified by Chief Officer is usually accepted as proof.

(*c*) Heavy Lifts: Usually landed overside on flat-top scows for delivery to private jetties, where they are man-handled to required site. Occasionally consignees provide low-loaders.

(*d*) Transhipment Cargo: After discharge of cargo from first carrier, transhipment cargo placed under supervision fo Ports Authority, unless it is possible to arrange direct transhipment into small coastal vessels.

(*e*) Outward Cargo: Main export is log timber and is towed out to loading vessels in rafts, each one accompanied by two raftsmen. Loading is on a single swinging derrick with gun tackle; the other derrick being used for pulling the logs into position in the holds. Vessels should have, if possible, two snatch blocks available at each hatch where log timber being loaded. Sawn timber loaded in normal manner from scows and lighters. Documents required are shipping order issued by Agent and list of specifications supplied by timber companies. Other exports are rubber, copra, coconuts, palm oil, jungle and sea produce.

(*f*) Refrigerator Cargo: Only small quantities of refrigerator cargo loaded or discharged. No formalities or certificates being required other than compliance with normal Customs regulations. Inward fridge cargo is confined to foodstuffs, meat, etc., and outward to frozen prawns.

(*g*) Explosives: Explosives must be discharged into lighters under police escort and transported to an approved police store. A licence for their importation must be obtained from police prior to arrival of cargo, and Harbour and Police authorities must be informed of arrival of explosives in port either for discharge or as through cargo.

(*h*) Damaged Cargo: Ship's survey should be carried out at ship's side on all cargo discharged in a damaged condition and Chief Officer should note extent of damage, and sign certifying same. Cargo coming alongside in a damaged condition should be noted and M/R claused accordingly. Chief Officers are reminded that it is most unwise to load any copra which is rain or salt water damaged.

**MEDICAL:** (*a*) Hospitals: Duchess of Kent Hospital will receive sick seamen or officers. Three classes of wards, also isolation wi Hospital equipped to carry out normal surgery.

(*b*) Inoculation: PHO will vaccinate or inoculate crew member Duchess of Kent Hospital.

(*c*) Death on Board: PHO and police to be informed immediat They will then make an investigation into cause of death. If satisf that death was due to natural causes, a certificate will be issued, a arrangements may then be made for interning the body. Harb Master must also be informed in the case of seamen.

**TANKERS:** Two bulk oil installations at Karimunting (Pavitt Poi Esso, with storage capacity of 2,080 tons and Shell, with stora capacity 15,730 tons.

Jetty extends 550 ft. from shore, is 128 ft. long with moori dolphins 125 ft. from each end. Minimum depth alongside 24 ft.

New oil berth, 1,000 ft. length between dolphins, with cen discharging pier. Least depth alongside 30 ft. This berth also us for loading palm oil in bulk.

**FRESH WATER:** Can normally be supplied from wharf at rate 20 tons per hour. No water boat. Occasionally water is not availa and, at such times, Agent warns Principals in advance.

**FUEL:** No facilities for supply of fuel oil bunkers. Limited quanti of lubricants can be obtained in drums and bulk diesoline availab at Shell jetty.

**FIRE PRECAUTIONS:** No fire-floats and in case of a vess alongside, fire brigade should be summoned by dialling 999. T OCPD should be informed also.

**WATCHMEN:** No regulations regarding use of watchmen, wh however, can be supplied if required. There have been only ve isolated reports of pilferage in Sandakan.

**CONSULS:** None.

**DRY DOCKS/REPAIRS:** No dry docks and very limited rep facilities. Marine Department slipway on Berhala Island is capab of taking ships up to 300 tons. Castings, forgings, welding, etc., c be done at this slipway. Permission to repair main engine of a vess alongside the wharf should be obtained from the Port Manag Sabah Ports Authority.

**POLICE/AMBULANCE/FIRE:** Ambulance: Duchess of Ke Hospital, tel. 2111; Police/Fire: Police Station Emergency, tel. 999.

**GENERAL:** (*a*) *Surveyors:* Harrisons & Crosfield (Sabah), Sdn. Bh are Lloyd's Agents, neither Bureau Veritas nor the American Burea of Shipping are represented.

(*b*) *Fumigation:* No facilities.

(*c*) *Ship Chandlers:* All kinds of stores and provisions can b supplied at reasonable prices.

(*d*) *Call Signals and Call Flags:* (i) Continuous watch kept by sign station during day-light hours. In emergency such as serious inju or fire a ship should hoist appropriate International Code signal an blow whistle or siren to attract attention. Apart from these circum stances and for purposes of navigation vessels are prohibited fro using sound signals for any other reason.

(ii) Signals for attracting Public Service Launch: By day: Inte national Code Pendant No. 8. By night: three red lights vertica Owing distance of anchorage from jetty these signals often i distinguishable by hire launches unless they are cruising in th harbour. Regular launch services can be arranged if required b Master. No restrictions against a vessel using its own launch o motor lifeboat but it must not land anywhere other than at Custom wharf.

(*e*) *Recreation Facilities:* Three cinemas in town which sho English-language films. Cricket, football, and hockey matches ca be arranged with local teams and several tennis courts availabl Only suitable swimming beaches at Berhala Island at mouth o harbour. Yacht Club and Golf Club for members only, but sever Shipping Companies pay Corporate Membership fee which enable all officers and first-class passengers to use club. Recreation Cl offers facilities for large variety of sports and entertainment; visitor must be accompanied by a member. Churches in town for Anglica Catholic and Lutheran worship.

**REGULATIONS:** 1. Arrival and Departure. The Owner or Age of every vessel other than a small ship intending to call at a port sha as soon as possible, and in any case not later than thirty-six hou prior to the estimated time of arrival of the vessel, give notice i writing to the Authority of such arrival and, if so desired, the requir ment for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribe by the Authority and shall contain full particulars regarding the carg to be discharged and loaded, the embarkation and disembarkation o passengers, heavy lifts, special or perishable cargo, hazardous an dangerous goods (whether to be discharged at the port or not), an any other matters of importance relating to the working or safety o the vessel in the port.

3. The Master of every vessel entering or leaving a port betwe sunrise and sunset shall cause to be hoisted the national colours an the signal letters, if any, of the vessel. The national colours shall b exhibited from 0800 to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State s Sabah shall exhibit the Immigration and Quarantine signals contain in the First Schedule and shall also at the request of a custom officer hoist the Customs signals. Such signals shall rema exhibited until the appropriate officer has given permission for the to be lowered.

5. No vessel shall approach within six hundred ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from an vessel until the vessel is cleared inwards and the Immigratio Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficient

secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessel shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

2. Special signals.

| *Significance* | *By Day* | *By Night* |
|---|---|---|
| Immigration (for ships not carrying passengers) | International Code Signal "2 5" | Two green lights, six ft. apart, hoisted vertically where best seen. |
| Immigration (for ships carrying passengers) | International Code Signal "3 4" | Two green lights, six ft. apart, hoisted vertically where best seen. |
| Quarantine (vessel is Healthy request pratique) | International Code Signal "Q" | Nil |
| Quarantine (vessel is suspect) | International Code Signal "Q Q" | A red light over a white light and a separate hoist of red light over a green light and hoisted vertically six ft. apart where best seen. |
| Quarantine (vessel is infected) | International Code Signal "Q L" | |
| Quarantine (not received pratique) | Nil | A red light over a white light six ft. apart hoisted vertically where best seen. |
| Request Police Assistance | International Code Signal "S T" | A green over a white light, six ft. apart hoisted vertically where best seen. |
| Request Medical Assistance | International Code Signal "W" | A red light over a green light, six ft. apart, hoisted vertically where best seen. |

**DEVELOPMENTS:** A new port situated just East of the Bulk Oil Jetty is now under construction. This port will feature an island wharf connected to shore by 2 access bridges, with a transit shed of 90,000 sq.ft. constructed on the structural deck of the wharf. The total berthing space will be 1,890 ft. The minimum alongside depth will be 30 ft. This project is scheduled for completion in early 1975.

**AUTHORITY:** Sabah Ports Authority. Tel. 3255.

**AGENT:** Harrisons & Crosfield (Sabah), Sdn. Bhd. Telegraphic address "Crosfield". Tel. 2141 ext. 51–54 (Shipping Department). Code – Bentley's Second Phrase.

## SARAWAK COASTAL PORTS

Coastal anchorages at Sibuti, Niah and Suai, 28, 30 and 47 miles S.W. of Miri respectively are being used increasingly for the export or round logs, good holding ground is to be found approximately 3¼ miles offshore in 30 ft. of water. Caution should be observed in the event of sudden wind squalls from the West.

Vessels destined for coastal ports should report to Miri for Customs and Immigration Clearance.

Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during day-light hours, for at least twelve hours before the vessel is due to sail, or if the vessel is in port for less than twelve hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the port clearance.

(2) The Port Clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

## SEJINGKAT (Sungei Sarawak), Sarawak: 01.35.10 N. 110.26 E.

Anchorage off Kampong Sejingkat approximately 10 miles from mouth of river and three miles below Pending Point. (See "Kuching".)

Main timber loading point for the First Division of Sarawak. Loading used to be seasonal due to log rafts having to be towed from felling areas along coast. Since this is not possible during North-east monsoon season shippers now stockpile during favourable weather and loading continues throughout monsoon period.

Vessels up to 500 ft. length and 25 ft. draft regularly use anchorage. No facilities for obtaining fuel or fresh water.

Pilots may be picked up off Tanjong Po in the area marked "Pilots" on Admiralty Chart 1822 or at Pending. In rough weather it may be necessary for a ship to follow or meet the pilot launch at the junction of Embang and Senari leads. Pilots for the Batang Lupar, Triso or Lingga Anchorages are also normally embarked off Tanjong Po by arrangement. The Kuching Pilot launch "Alor" is fitted with "Hague Plan" VHF radio for ship to pilot communication.

Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during day-light hours, for at least twelve hours before the vessel is due to sail, or if the vessel is in port for less than twelve hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the port clearance.

(2) The port clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

## SIBU, Sarawak (incl. Binatang and Sarikei): 02.24 N. 111.56 E.

Sibu is the major town in the Third Division of Sarawak. There are two inward routes (*a*) via Paloh River and (*b*) via Rejang River. Sibu is 51 miles from the sea via Paloh, and 70 miles via Rejang.

(*a*) Paloh Entrance: This route to Sibu is almost exclusively used by overseas vessels and the use of a Pilot is recommended, they having knowledge of other ship movements in the river (see "Pilotage").

The Outer Bar limits the draft to 17 ft. during the Landas (N.E. monsoon) or to 20 ft. during the summer months. The depth on the axis of the channel is now 11·5 ft. chart datum. The two buoys are fitted with radar reflectors and the Fairway Buoy is visible for a distance of 10 miles. Care should be taken transiting the channel against being set to the Northward by the ebb tide as there is a 7 ft. patch in position 2° 29·2′ N. 111° 10·5′ E. The entrance to the Kuala is marked by a light beacon at Tanjong Sedi on the North bank of the river.

Strong cross currents and swell especially during the North-east monsoon period (November to March) necessitate caution when entering.

An inner bar with a least depth of 14 ft. exists where the Paloh joins the Seredeng at Tanjong Gelang. This crossing is marked by unlit transits and being sheltered no allowance is necessary for swell.

Vessels can cross the Outer Bar at night then anchor off Tanjong Sedi to await day-light.

(*b*) Rejang Entrance: Draft for crossing Outer Bar is governed by state of tide with an allowance for swell together with depth of 19 ft. below ACD. Vessels drawing 29½ ft. have successfully crossed this Bar. However, this draft will only give access to the Deep Water Anchorage at Tanjong Mani and vessels proceeding further up river are restricted as follows:

(i) Deep water anchorage in Rejang River situated at Tanjong Mani. Has a capacity for about 6 large ships (500 ft.) and 4 small ships (300 ft.), it is normally used for loading logs. (See separate information for "Tanjong Mani".)

(ii) From Tanjong Mani inwards there is a Bar situated about 3 miles below Sarikei with a least depth of 13 ft. below ACD thus limiting drafts to 23 ft.

(iii) From Sarikei to Binatang, the next port, the river is winding with some shallow patches with depths of 15 to 18 ft. below ACD.

(iv) Proceeding from Binatang towards Tanjong Pendam and thence to Sibu vessels are limited to 13 ft. draft and 200 ft. length.

(v) Leba'an corner, 15 miles below Sibu is the junction of the two routes used by sea-going vessels bound for Sibu. A certain amount of shoaling has taken place here at the approach from the Rejang channel and it has been found necessary to restrict the length of vessels using this route (Rejang) to 200 ft. with a draft of 13 ft. This route is generally used by the smaller overseas vessels trading from Singapore, etc. There is an obstruction off Tanjong Ensurai approximately six and a quarter miles up river from Leba'an bend which has a least depth over it of 15 ft. Caution should also be exercised when rounding Tanjong Bindje due to three shoals across the river, one of which has a least depth over it of 11 ft.

*Note:* River Igan and Sungei Kut. The River Igan affords access to Sibu from the North. It is approximately 60 miles long and depth over the bar is 4 ft. with an average rise of 5 ft. Ocean-going oil tankers of up to 2,000 tons displacement entering the river from the Sibu end discharge at Sungei Meral Oil Wharf about three miles from Sibu.

The largest vessel to use this wharf was the Japanese vessel *Nisso Maru* of 1,566 gross tonnage, 264 ft. overall length with a draft of 16 ft. Larger vessels using this wharf are not envisaged due to the wharf position and structure.

**DOCUMENTS:** Port Clearance to be surrendered to Customs when boarding.

Crew lists and passenger lists, 2 copies for Immigration Department, 2 copies for Rajang Port Authority, two copies for Customs, 1 copy for Port Health Officer.

List of ship's stores (2 copies for customs).

List of ammunition (2 copies for customs).

Health Documents (Vaccination Certificates and Cholera Inoculation Certificates to be examined by Health Inspector).

**PILOTAGE:** (*a*) Kuala Paloh. Pilots usually embarked off Tanjong Sedi, however, if Master requires a Pilot to board at Fairway Buoy he should indicate this in his ETA telegram.

Ship Masters wishing to use Paloh channel should state this clearly in their ETA messages.

(*b*) Rejang River (Tanjong Mani, Sarikei, Binatang and Sibu). Pilots normally embarked, weather permitting in buoyed channel

West of Jerijeh lighthouse but it may be necessary for a ship to follow the pilot launch to sheltered water inside turning buoy. This applies mainly to larger ocean ships calling at Tanjong Mani and smaller vessels on a first visit, but a Pilot may be picked up anywhere to suit provided clear and precise information is given in the arrival telegram. A few of the more frequently requested points are off South Jerijeh Beacon, Rejang Village and for upriver berths, Tanjong Mani itself, or even as far up as Tanjong Delima. The Rejang pilot launch Layang Laut, is fitted with "Hague Plan" VHF radio for ship to Pilot communication.

Application for Pilots should be made giving 24 hours' notice of arrival to "Shipping", Sibu or to "Shipping", Sarikei, for Sibu and Tanjong Mani ports respectively. Ships proceeding to Sibu and requiring a Pilot should indicate positively in their arrival telegram which channel they wish to use by adding "Paloh" or "Rejang" in the text, bearing in mind the maximum length via Rejang is 200 ft.

**ANCHORAGES:** (*a*) See "Tanjong Mani".

(*b*) Sibu Anchorage. Some foreign-going vessels load, with Customs permission, at the mid-stream anchorage when Customs wharf is congested.

(*c*) Restricted Anchorages.

(i) Abeam of Loba Selemit on the true right bank of the Rejang River in position 02° 08′ 22″ N.; 111° 16′ 35″ E. for loading and discharging dangerous goods.

(ii) The Anchorage defined by a line running 045 degrees 2·6 cables from position 02° 16·89′ N. 111° 49·28′ E. on Pulo Kerto, thence 135 degrees 8 cables to position 02° 16·5′ N. 111° 50·4′ E. thence 225 degrees 1·9 cables to shore on Pulo Kerto. For loading and discharging dangerous goods other than petroleum.

(iii) The berth alongside the Sungai Merah Wharf in position approximately two miles downstream from the junction of the Rejang/Igan River on the true right bank. For loading and discharging petroleum.

**MAX. SIZE:** Largest vessel to berth Sibu was 7,372 gross tons and overall length 450 ft.

Deepest drafted vessel to berth Sibu was 22 ft. 6 in.

**HEALTH:** Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

**BERTHING:** (*a*) Principal wharves at Sibu

1. Main wharf 486 ft. long with minimum depth alongside 20 ft.
2. Lighterage wharf 156 ft. by 24 ft.
3. Kubu wharf 83 ft. long. Dries at 1 ft. Used mainly for small passenger craft.
4. Burong Apu wharf 250 ft. long with a least depth of 17 ft. Used for larger coastal craft.
5. Floating landing stages 576 ft. long with least depth of 4 ft. Used for smaller coastal and river craft.
6. Upstream of the public wharves several private wharves are used for timber and general cargo.
7. Sibu-Sungei Merah oil wharf is "T"-shaped with a berthing face of 64 ft. and a least depth alongside of 15 ft. This is a "common user" wharf at present used by the Shell and Esso Oil Companies. It can accommodate vessels up to 245 ft. long and 15 ft. draft.

(*b*) Sarikei. Customs wharf consiting of 2×60 ft. long floating pontoons, can accommodate vessels up to 2,000 tons deadweight up to 23 ft. draft. There is a Customs Godown on shore.

(*c*) Binatang. Customs Wharf 179 ft. long by 20 ft. wide with a least depth alongside of 15 ft.

A signal mast has been erected near the wharf which shows tidal signals, i.e. "E" flag for Ebb, "F" for Flood, and "S" for slack water.

**STEVEDORES:** The Rejang Port Authority provide all labour necessary for loading and discharging.

**REPAIRS:** 5 shipbuilding (up to 100 gross tons in size) and repairing yards near Sibu. These deal mainly with repairs to wooden or steel coastal and river craft. One yard has a slipway capable of taking vessels up to 500 gross tons.

**DEVELOPMENT:** Construction of a further one thousand feet of concrete jetty, in a Westerly direction, following the river bank from the existing jetty. Completion by 1975. Also to be built are godowns and other buildings and ancillary services.

**GENERAL:** Small quantities of diesel oil bunkers available, also provisions and fresh water. Principal exports rubber, pepper, timber and sago. Average delay time per ship varies from 10 to 25 hours.

**REGULATIONS:** The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during day-light hours, for at least twelve hours before the vessel is due to sail, or if the vessel is in port for less than twelve hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the Port Clearance.

(2) The Port Clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

**AUTHORITY:** Rajang Port Authority, Sibu, Sarawak, East Malaysia. Cables: "Raport Sibu". Tel. 8898 and 8899.

## TANJONG MANI, Sarawak: 02.09 N. 111.21 E.

Rejang River entrance. The least depth on the bar remains at 1 The entrance is well lit by two lighthouses and one light beacon the bar is marked by two light buoys.

Tanjong Mani. This is a deep water anchorage 16 miles from river entrance, mainly used by vessels loading timber.

Size of vessels using Tanjong Mani limited only by depth on Ten ships can be safely accommodated at anchorage at any roughly six large (500 ft. length) and four small (300–400 ft.). So far ship has been delayed awaiting a berth though eight or nine anchored there at the same time is now a regular feature. Vess up to 29½ ft. draft have crossed the bar.

Pilots are normally embarked, weather permitting in the buoy channel West of Jerijeh lighthouse but it may be necessary ship to follow the pilot launch to sheltered water inside the turn buoy. This applies mainly to the larger ocean ships calling at Tanjo Mani and smaller vessels on a first visit but a Pilot may be picked anywhere to suit provided clear and precise information is given the arrival telegram. A few of the more frequently requested po are off South Jerijeh Beacon, Rejang Village and for upriver berth Tanjong Mani itself, or even as far up as Tanjong Delima. Rejang pilot launch Layang Laut, is fitted with "Hague Plan" radio for ship to Pilot communicaton.

Application for Pilots should be made giving 24 hours' notice arrival to "Shipping", Sarikei.

Anchorage. Abeam of Loba Selemit on the true right bank of Rejang River in position 2° 08′ 22″ N. 111° 16′ 35″ E. is restricted loading and discharging any dangerous goods.

## TAWAU, Sabah: 04.15 N. 117.53 E. **(See Plan)**

**PORT LIMITS:** A line drawn from Batu Tinagat on the Mainla to the boundary mark on Sebatik Island between Indonesian Born and Sabah (Malaysia) and thence through the island to Burs Po on the Mainland, and thence intersecting all waterways to the We of Burs Point, entering the Serudong River.

**DOCUMENTS:**

(*a*) *To be Produced on Arrival:*

| | |

| Last Port Clearance | 1 |
| Crew List | 1 |
| Passenger List | 1 |
| *Agent* | |
| Manifest in the prescribed form | 4 (2 for SPA) |
| Crew List | 1 |
| Passenger List | 1 |
| *Immigration* | |
| Crew List | 2 |
| Passenger List | 2 |
| *Travel Control Office* | |
| Crew Lists and Passenger Lists | 2 each. |

(*b*) *To be Supplied to Ship before Departure:*

Manifests, as required by vessel.

1 Port Clearance and 1 Customs Clearance.

3 copies of Passenger List.

**PILOTAGE:** A Pilot is available from 0600 to 1800 for berthin vessels given reasonable notice (48 hours). Not compulsory.

**ANCHORAGES:** Good anchorage in 8 fathoms 1,000 yd. to 1,300 W.N.W. of wharf; and 350 yd. South there is an anchorage in fathoms.

Petroleum Anchorage. An area bounded by parallels of 04° 15′ and 04° 16′ N. and meridians of 117° 15′ E. and 117° 52′ E. This are is to be marked "Petroleum Anchorage".

Explosives Anchorage. An area bounded by parallels of 04° 12′ and 04° 13′ N. and meridians of 117° 52′ E. This area is to be marke "Explosives Anchorage".

Quarantine Anchorage. An area bounded by parallels of 04° 12.5′ and 04° 13.5′ N. and meridians of 117° 54′ E. and 117° 55′ E. This are is to be marked "Quarantine Anchorage".

**RESTRICTIONS:** (*a*) Communication ship/shore when lying roads: Regular launch services difficult to arrange if required Master. No recognised signals for summoning a launch, as distanc between small boat jetty and anchorage is too great for flag signa to be recognised. No restrictions against a vessel using its ow launch or motor life-boat apart from fact that it must not land an where other than at Ports Authority Wharf.

(*b*) Explosives: No vessel carrying explosives shall come with 500 yards of shore or any other vessel except with written permissi of Port Manager which will be given provided that:

(*a*) quantity does not exceed 2,000 lb. of explosives of Class V and and are carried in a certified magazine, and there is no oth dangerous cargo on board as certified in writing by the Maste

(*b*) quantity does not exceed 3,000 lb. and are exclusively of one the following classes III, IV or VII.

Danger flag must be flown by day and a red light by night.

**HEALTH:** (*a*) Quarantine. The Sabah Government are signatori to WHO convention on Quarantine regulations. Port Health Doctor will not board, unless vessel comes from an infected port. Instead Maritime Declaration of Health is to be filled out and handed to Boarding Officer of Marine Department, who will require one copy of crew list and one copy of passenger list. Vessels should cable Agent prior arrival advising last port of call and whether vessel healthy.

(*b*) Immigration. Immigration officer will board vessel on arrival and clear her inwards. No restrictions on crew and/or passengers going ashore. Immigration will require 2 copies of crew list and 2 copies of passenger list. Vessels are cleared inward until 18.00 hours only. If there are special circumstances arrangements can be made to clear vessels inward after this time.

**RADIO:** Information required prior arrival, ETA Tawau with as much prior notice as possible. Number of gangs required. Quantity of fresh water required.

**VHF:** A Maritime VHF radio telephone service now operates in the Port of Tawau on Hague Plan channels 16 and 12.

Continuous listening watch is kept on Channel 16 and the station is operative between the hours of 0600 and 2000 daily.

Vessels are requested to make use of the above facility for notifying ETA, pilotage requirements etc. Berth availability will be notified on vessel's call.

**TUGS:** No tugs available.

**BERTHING:** (*a*) Wharf Light at Tawau in position on North-west end of wharf, 04° 14′ 32″ N. 117° 52′ 56″ E.

(*b*) Tides/Linesmen. The numbers of a vessel which is berthing alongside will be flown from signal station. In addition a cone, indicating tidal stream will be hoisted, pointed end of cone down indicates flood tide and pointed end up indicates ebb tide. Linesmen are on hand to receive a vessel's lines; a motor boat can be hired to assist in berthing if prior advice is given.

(*c*) New Wharf. Consists of a 300 ft. long approach causeway extending from a reclamation area and a 550 ft. long wharf, 50 ft. wide with a dolphin in line ±100 ft. off each end. Least depth 20 ft.

(*d*) Monsoon. During strong wind from S.E. and S.W. ships are liable to range alongside wharf, and during S.W. monsoon sea breeze may make it difficult for ships to leave wharf in the afternoon.

(*e*) Buoys: No mooring buoys in Tawau.

(*f*) Lighters: No lighters available except a few wooden and steel lighters owned by Bombay Burmah Trading Corpn. Ltd. and Borneo Abaca Limited. Hire of these lighters can be arranged when they are not being used by owners, which is seldom.

**SPECIALISED CARGO-HANDLING FACILITIES:** None. Can handle palletised cargo only.

**STEVEDORES:** (*a*) No stevedoring company in Tawau. Work is undertaken by stevedoring contractors. Stevedores in sufficient numbers usually available.

(*b*) Working hours 0730–1130 hours, 1300–1700 hours, 1800–2200 hours.

(*c*) Overtime: Overtime working hours are from 1800 to 2200 hours. Application must be made to Customs one day in advance; double rate charged.

(*d*) Sundays and holidays: Work normally carried out on Sundays and holidays, the only exception being Chinese New Year. Application must be made to Customs for permission to work Saturday afternoons, Sundays and public holidays.

(*e*) Rates: General cargo about 8 tons per gang/hour (loading/discharging).

**CARGO:** (*a*) Special Cargo Regulations: No vessel with dangerous cargo may be alongside after sunset except at discretion of Port Manager. No dangerous cargo may be discharged simultaneously with general cargo except with permission of Port Manager.

Heavy lifts usually landed overside on to flat-top scows. Customs bonded store is available with about 4,000 sq. ft. of space including Customs Liquor and tobacco store. There are no private bonded warehouses to date. There are no facilities for handling or storing bulk cargoes in any quantity.

Livestock: subject to approval of Veterinary Authority, certain animals including cattle are prohibited imports and exports except under licence.

(*b*) Damage. Ship's survey should be carried out on all cargo discharged in a damaged condition and Chief Officer should note extent of damage, and sign, certifying same. Cargo coming alongside in a damaged condition should be noted and M/R claused accordingly. Chief Officers are reminded that it is most unwise to load any copra which is rain or salt water damaged.

(*c*) Tally: Tally clerks can be supplied by Agent if required, on receiving advance notice.

(*d*) Inward. Inward cargo is tallied out of ship onto wharf or into lighter. Damaged cargo surveyed on the spot, otherwise no liability of the vessel is acknowledged. Discharge carried out after permission has been obtained from Customs after manifest of inward cargo has been deposited. Cargo delivered to consignees against production of relative Bill of Lading. Ship's responsibility to consignees ceases at ship's side, but, in the case of short-landed cargo, reasonable proof must be given to Customs that cargo has not been landed. A short-landed Memo certified by Chief Officer is usually accepted as proof.

(*e*) Transhipment. After discharge of cargo from first carrier, transhipment cargo is placed under the supervision of the Customs, unless it is possible to arrange direct transhipment into small coastal vessel.

(*f*) Outward. When vessels berth alongside, packages are brought by motor transport and lighters; when in roads, by lighters.

(*g*) Refrigerator. Only small quantities of refrigerator cargo loaded or discharged. No formalities or certificates being required other than compliance with normal Customs regulations. Inward refrigerator cargo is confined to foodstuffs, meat, etc., and outward to frozen fish.

(*h*) Explosives. Explosives must be discharged into lighters or immediately on arrival onto wharf under police escort and transported to an approved police store. A licence for their importation must be obtained from police prior arrival of cargo, and Harbour and Police authorities must be informed of arrival of explosives in port either for discharge, or as through cargo.

**TANKERS:** Shell jetty, least depth 14 ft.

**MEDICAL:** (*a*) Hospitals. Government General Hospital is only hospital in town, and will receive any sick seamen or officers. Three classes of wards, but first class ward can only accommodate two persons. Hospital is equipped to carry out normal surgery.

(*b*) Inoculation. Port Health Officer will vaccinate or inoculate crew members at General Hospital.

(*c*) Port Health Officer. General Hospital, General Office 2234; Medical Officer-in-Charge 2333; M.O.'s Residence 2239.

**FRESH WATER:** Can only be supplied at wharf. Twenty-four hours notice should be given of a vessel's water requirements. Usual rate of supply is about 15 tons per hour. A water barge is available but no guarantee of availability.

**FUEL:** Not available except diesoline in drums.

**FIRE PRECAUTIONS:** No fire floats and in the case of a vessel alongside catching fire, the fire brigade should be summoned by dialling 2999. The OCPD should also be informed.

**CONSULS:** None.

**REPAIRS:** No facilities.

**POLICE/AMBULANCE/FIRE:** (*a*) Police/Fire, tel. 2999; Hospital 2234.

(*b*) Accidents: Hoist a two-flag signal and give a blast of the whistle to call attention of signal station. Police and the hospital should be informed immediately of any untoward incident.

**GENERAL:** (*a*) *Surveyors:* Harrisons & Crosfield (S) Ltd., as Lloyd's sub-Agents, may appoint a Surveyor if a survey is requested.

(*b*) *Fumigation:* No facilities.

(*c*) *Ship Chandlers:* Fresh vegetables obtainable in limited quantities early every morning from vegetable market.

(*d*) *Priority:* Vessels are berthed on a "First come first served" basis. Vessels with palletised cargo get priority.

(*e*) *Watchmen:* These can be supplied if required.

**REGULATIONS:** (*a*) Arrival and Departure. The Owner or Agent of every vessel other than a small ship intending to call at a port shall, as soon as possible, and in any case not later than thirty-six hours prior to the estimated time of arrival of the vessel, give notice in writing to the Authority of such arrival and, if so desired, the requirement for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribed by the Authority and shall contain full particulars regarding the cargo to be discharged and loaded, the embarkation and disembarkation of passengers, heavy lifts, special or perishable cargo, hazardous and dangerous goods (whether to be discharged at the port or not), and any other matters of importance relating to the working or safety of the vessel in the port.

3. The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted the national colours and the signal letters, if any, of the vessel. The national colours shall be exhibited from 0800 to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State of Sabah shall exhibit the Immigration and Quarantine signals contained in the First Schedule and shall also at the request of a customs officer hoist the Customs signals. Such signals shall remain exhibited until the appropriate officer has given permission for them to be lowered.

5. No vessel shall approach within six hundred ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from any vessel until the vessel is cleared inwards and the Immigration, Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficiently secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessel shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

(*b*) Special signals

| *Significance* | *By Day* | *By Night* |
|---|---|---|
| Immigration (for ships not carrying passengers) | International Code Signal "2 5" | Two green lights, six ft. apart, hoisted vertically where best seen. |
| Immigration (for ships carrying passengers) | International Code Signal "3 4" | Two green lights, six ft. apart, hoisted vertically where best seen. |
| Quarantine (vessel is Healthy request pratique) | International Code Signal "Q" | Nil |
| Quarantine (vessel is suspect) | International Code Signal "Q Q" | A red light over a white light and a separate hoist of red light over a green light and hoisted vertically six ft. apart where best seen. |
| Quarantine (vessel is infected) | International Code Signal "Q L" | |
| Quarantine (not received pratique) | Nil | A red light over a white light six ft. apart hoisted vertically where best seen. |
| Request Police Assistance | International Code Signal "S T" | A green over a white light, six ft. apart hoisted vertically where best seen. |
| Request Medical Assistance | International Code Signal "W" | A red light over a green light, six ft. apart, hoisted vertically where best seen. |

**AUTHORITY:** Port Manager, Sabah Ports Authority. Tel. 2852.
Customs. Assistant Commissioner tel. 2342 (Office); 2256 (House). Office hours 0800 to 1200 hours, 1330 to 1600 hours, week-days; 0800 to 1200 hours, Saturdays.

**AGENT:** Harrisons & Crosfield (Sabah) Ltd., Dunlop Street. Telegraphic address: "Crosfield". Tel. Manager 2624; Shipping 2262; Airways 2261. PO Box No. 5. Code – Bentley's Second Phrase.

# Malta

## VALLETTA: 35.54 N. 14.31 E.

**DOCUMENTS:** Pratique deposition to be filled by Master on arrival, form supplied by the boarding Customs Officer. 3 Crew Lists. 2 Bonded Store Lists and 1 list of dutiable items belonging to crew on arrival. 3 Passenger Lists.
**PILOTAGE:** Compulsory. Pilot boards at Fairway Buoy weather permitting. Pilot available at all hours for small ships, daylight hours for large vessels. Sea Pilot berths vessel for civil berths. Berthing Pilot boards in Bighi Bay for Malta Dry Docks or Buoy Berths. In bad weather Pilot boards inside entrance. Vessel's ETA should be given to Agent at least 12 hours' prior arrival to order Pilot. Pilot boat located near Customs House. Pilot boat not equipped with VHF.
**ANCHORAGES:** Sea anchorage off Grand Harbour. To East of line, Fairway Buoy to entrance, medium to poor holding ground. To West of line, holding ground excellent.
**RESTRICTIONS:** Minimum depth entrance channel (over wreck) 52 ft. Harbour channels – Bighi Bay 58 ft., French Creek 43 ft., Marsa 32 ft. Nature of bottom entrance channel rock and mud. Harbour channels mud. Harbour entrance and approaches affected by current – in North-west winds there is a set of up to ½ knot from North-west to North-east. Port is subject to closure in gregale (North-east gale) conditions – winter months occasionally, not more than 4 times a year.
**SIZE:** Discharging Berths – New Quay.
Berths 1, 2, 3. Min. water depth alongside berth 32 ft. Max. length acceptable 350/400 ft. Max. draught acceptable 32 ft.
Berth 4. Min. water depth alongside berth 32 ft. Max. length acceptable 550 ft. Max. draught readily acceptable 32 ft.
Maximum so far handled 1,000 ft. length, with draught 35 ft.
**HEALTH:** Port Medical Officer grants pratique when boarding on arrival. Accelerated pratique can be granted through Pilot provided crew all in good health and ship has not called any infected port during last 15 days, and is coming from a European port.
**RADIO:** Radio call sign 9HD. Radio telephony working frequency 2625 kHz. Listening watch 2182 kHz.
**RADAR/VHF:** No radar service available. VHF facilities available by Malta Dry Docks. Frequency 156·8/156·55/157·9 Mc/s. Call sign Malta Dry Docks. Range 10 miles. Master can call signal station on VHF Channels 16 or 12.
**TUGS:** Join vessel just inside harbour entrance. Lines at discretion of ship's Master.
**BERTHING:** No specific requirements necessary. Can berth at any time but subject size of vessel and weather conditions.
**STEVEDORES:** Ordered by Agents. At least 24 hours notice required.
**MEDICAL:** Notice must be given to Agent soon as possible to make necessary arrangements. Hospital facilities available. Crew must be in possession of inoculation/vaccination certificates, etc.
**TANKERS:** Vessels must be gas-free except at tank-cleaning berth, where ships with not more than 2 tanks gas free are allowed. Slop (residue) discharging facilities available. No. of tanker berths: Parlatorio Wharf (Navy) Max. draught 35 ft.; max. length 650 ft. Marsaxlokk – has Saptan Dolphin (Navy) max. draught 34 ft.; max. length 650 ft.
**FRESH WATER:** Unlimited amount ex barge between 20 to 80 tons per hour.
**FUEL:** Bunker Berth – Shell (Malta) Ltd. at new quay. Grades handled include MFO. MDO. TFO. GO. Max. draught 32 ft. 48 hours notice required. Bunkering berth also used for discharging cargo and available when not occupied by discharging vessel.
**FIRE PRECAUTIONS:** Precautions according to Petroleum Ships Regulations. Civil tugs partly equipped with fire fighting equipment but not well trained. Admiralty tugs and salvage tug well trained and well equipped.
**GANGWAY/DECK WATCHMEN:** Not compulsory but recommended.
**OPENING/CLOSING HATCHES:** Opening by stevedores. Closing of hatches by crew. Stevedores can close hatches at extra cost.
**CERTIFICATES:** Ship's Register; Load Line Certificate; Derat Certificate.
**CUSTOMS ALLOWANCES:** 200 cigarettes allowed for each crew member. Wine and/or Spirit, None to crew except Captain, at Customs' discretion.
**CARGO GEAR:** Factory Act Book for Cargo Gear. Cargo work cannot commence unless certificates valid.
**IDENTIFICATION CARDS:** Not needed.

**CONSULS:**

**REPAIRS:** All types of deck and engine repairs possible.
**DRY DOCKS:** Malta Dry Docks Corp. operates five dry do up to 861 ft. length, 130 ft. 6 in. wide.
**SERVICES:** Tank clearing and underwater hull cleaning und taken by Malta Dry Docks Corp.
**REPATRIATION:** Facilities exist for crew changes and repa tion by air.
**AIRPORT:** Four miles from port. Served by BEA/Alitalia daily London and Rome.
**TIME:** GMT plus 1. No alterations made during year.
**HOLIDAYS:** New Year (1st January); Epiphany (6th January); Paul's Shipwreck (10th February); St. Joseph's Day (19th Marc Good Friday (no work performed at all on this holiday and in t afternoon of Tuesday Carnival); St. Joseph the Worker (1st Ma Ascension Day (date changes); St. Peter and St. Paul (29th Jun Assumption of B.V. Mary (15th August); National Day (8th Septe ber); All Saints Day (1st November); Immaculate Conception (8 December); Christmas Day (25th December) (no work perform at all).
**POLICE/AMBULANCE/FIRE:** Police 26934; Ambulance 212 Shore Fire Brigade 24001.
**TELEPHONES:** Can be arranged in Dry Docks berth, and buoys. Cost approx. £1 per week.
**GENERAL:** Important that tankers are gas-free before enter and that cargo vessels do not carry explosives.
**AUTHORITY:** Superintendent of Ports, Custom House, Valle
**AGENT:** Kirton & Co. Ltd., 38 Lascaris Wharf, Valletta, Mal Telegraphic address: "Lambert", Valletta, Malta. Tel. 24360. Af hours 32778. Telex 241.

# Marianas Islands

## GUAM, (Apra Harbour): 13.26 N. 144.39 E.

**DOCUMENTS:** Guam is part of the American Trust Territories the Western Pacific and official documentation is as for mainla U.S. ports, including visaed crewlist completed at port of departu prior to Guam. Vessels should have a stock of American Crew Lis Form 1-148 and Form I-95A. The American Alien Crewman Landi permit is acceptable and preferred. This is the plastic identificati card previously issued on the U.S. coast.
Required on arrival:
Vaccination Cards.
Visaed Immigration Crew List.
4 Crew Lists.
4 Passenger Lists.
1 Store List.
Clearance from last port.
Cargo papers.
Have ready Immigration Form I-94 for each passenger and For I-95A for each alien unless they have I-184 plastic Identification Car Shore Passes not required. Crew Customs Declaration not require
**RESTRICTIONS:** The U.S. Navy is in complete control of th approaches to Guam and it is essential to obtain clearance an permission to enter Guam from "Commanding Officer U.S. Nav Station Guam", call sign NRV (this is the U.S. Coast Guard Statio at least 24 hours prior to arrival. Permission is readily granted wi the condition to request permission again two hours prior to arri at Guam. This time from Guam control, same station NRV. Depth water not less than 100 ft. on the 084°. True range of the Leadi lights/beacons at the entrance to Apra and Outer harbour – 55 ft. the berth. In day time, the beacons on the 084° range are visible fro sea at a distance of at least ten miles.
**PILOTAGE:** It is advisable to have on board U.S. charts for Guam C & GS 4197 Apra Harbour. 4198 Guam Approaches.
Pilot usually boards at Quarantine anchorage, or just inside brea water. When requested will board outside, weather permitting. Pi mandatory in Inner Harbour. Pilot available at all times.
**ANCHORAGE:** Harbour – range 084° True, two green lights. Stro set across harbour entrance, Navy recommends 10 knots enteri Quarantine anchorage at Middle ground, Outer Harbour, depth 45
**RADIO:** No commercial ship/shore radio. Use USCG Stati "NRV" for best service, also U.S. Navy Station "NPN". If una reach Guam, route messages via San Francisco, Japan, Honol or Manila. Prior to arrival, call "Guam Control" on 2716 kc/s for en permission, advising ETA and any explosives aboard. Note distre frequency 2182 kc/s. not normally monitored on Guam. Within

hours of arrival contact "Guam Control" giving ETA (account harbour traffic).

**VHF:** Masters of vessels approaching should keep watch on Channels 16 and 13.

**HEALTH:** If from suspect port, Inspector boards at anchorage or at pier for thorough check. Grants Pratique.

**BERTHING:** Port side to, one large tug and one small tug normally used. Ship's gangway is required. Local information from pilots states that after completion of this oil berth a submerged wreck was discovered, said to be a five hundred foot long cargo vessel, and lies across and below the vessel in this berth, on the eastern side of the jetty. It is advisable not to drop anchors – should they have to be used – until vessel has passed over the wreck. There have been instances of forward springs or breastlines becoming fouled in this wreck during operations.

**HOSES:** Four 10 in. flexible hoses connected by ship's crew. Two 20 in. lines.

**IMMIGRATION:** 1. Prior to Departure for Guam:

A. Visaed Crew List: Prepare one Crew List on U.S. Form I-418 and have it visaed by a U.S. Consulate at a port prior to Guam. Without this, crew shore leave may be denied.

B. Passengers must have a valid passport and also must have an appropriate U.S. Visa whether landing or not on Guam.

C. Intransit passengers do not need U.S. Visa if the Owners of the vessel have signed a contract called "Immediate and Continuous Transit Agreement" with the Commissioner of Immigration at Washington, D.C.

D. Obtain a supply of U.S. Form I-84 for passengers and U.S. Form I-95 for Crew.

2. Prior to Arrival at Guam:

A. Passenger List, Form I-418 prepare 3 copies of passenger List on U.S. Form I-418 for Immigration, Customs and Agent.

B. Passenger Landing Card Form I-94 these to be presented by passenger with passport.

C. Crewmen's Landing Permit Form I-95A prepare or have on hand, one U.S. Form I-95A for each alien crew member. Not required if crew member is a permanent resident with U.S. I-184 laminated "*Crewmen's Landing Card*", not required of U.S.A. Citizens. Please present Form I-95A in appropriate Seaman's passport or identification book. Form I-95A can be used repeatedly for future arrivals of same crewman on same ship.

3. Upon Arrival at Guam:

A. U.S. Federal Immigration Inspector boards upon arrival at pier, must see all passengers with their passport and Form I-94 and all crew members with their passport or identification books and Form I-94A or Form I-184.

B. Passengers and crew are required to be ready for inspection immediately upon docking at Guam.

C. No shore leave and no mail distributing and no visitors or stevedores may board until this immigration inspection is complete. The inspector will advise Master when he has completed his inspection of passengers and of crew.

4. Prior to Departure from Guam:

A. *Intransit Passengers:* pick up from intransit passengers the Form I-94 and hand to Agent before departing from Guam. These must be returned by Agent to U.S. Immigration as passenger departure records.

B. Alien Crewmember joining at Guam pick up from them the Form I-94 which they used to enter the U.S.A. These must be returned to U.S. Immigration by Agent as permanent records.

**SECURITY:** Guam Government Official usually boards at pier, examines vaccination cards (smallpox vaccination required) and inspects Steward's stores and slop chest. Also represents U.S. Customs. Requires 1 Crew List, 1 Passenger List, 1 Store List, Clearance from last port, later issues new clearance from Guam which Agents bring to ship. Normally does not seal stores or slop chest.

**MARINE GUARD:** Required when docked at Ammo pier, requires 1 Crew List.

**U.S. COAST GUARD:** Marine Inspection and Shipping Commissioner Services. Requires 1 Crew List. Checks official log book and arrival draft.

**FUEL:** Mobil Petroleum can supply black oil or truck diesel, but no marine diesel. Requires ship move to their pier, no commercial fuel barge. Unable supply fuel while Ammo vessel or Bulk Cement vessel working. Possible to supply by truck/trailer to other piers. Navy special (Black Oil) and marine diesel available from Navy on emergency basis only, sufficient to reach next bunkering port. Cash payment required in advance of delivery. Will not normally supply commercial vessels. Navy barge available.

**FRESH WATER:** Very good, available any quantity, meter service. No water barge.

**STORES:** No ship chandler, order through Agent. Available but considered expensive. Produce from U.S.A., Milk is recombined in quart cartons, White, Chocolate or Buttermilk. Order milk day prior to delivery. Tropical fruits seldom available. Ice in blocks or cubes. Prices wholesale, except under one case lots when at retail. Delivered to ship's gangway or hook.

**LAUNDRY:** Also dry-cleaning available, U.S.A. prices. One-day service extra. Delivered to ship's gangway or hook.

**MEDICAL:** Foreign ships use Guam Memorial Hospital or Catholic Medical Centre or other clinics in town. American ships use U.S. Naval Dispensary in Harbour area, or in emergency U.S. Naval Hospital near Agana, 10 miles distant. Certificates required signed by Master. Patient returns to vessel by taxi at vessel's expense. Dispensary hours for merchant seamen Monday to Friday 1800–1500. At other times, if emergency, use the U.S. Navy Hospital. Doctors will not normally visit ships.

*Dentists:* Private dentists only. Usual hours 0900–1700, Saturday to 1200.

**REPAIRS:** Commercial Yard, Dillingham Maritime Services Yard available. Navy Yard, repairs by U.S. Naval Ship Repair Facility (SRF), subject to prior Navy commitments, and requires cash deposit in advance. Payment to be made for work done successfully or not. "No Cure No Pay" does not apply.

**TIME:** G.M.T. plus 10 hours. When on Daylight Saving Time, G.M.T. plus 11 hours.

**POLICE/FIRE/AMBULANCE:** Ambulance U.S. Naval Dispensary, Harbour Area, 339–4224/4227; Fire, 22222; Police – Naval Station Security, Harbour Area, 333–2968; Police – Guam Civilian Police, Agana 777–9611

# Martinique

## FORT DE FRANCE: 14.36 N. 61.04 W. (See Plan)

**PORT LIMITS:** The straight lines joining Pointe des Negres, the South extremity of Fort St. Louis and Pointe d'Alet.

**DOCUMENTS:**

Maritime Declaration of Health.
4 Crew Lists.
2 Provisions Lists.
2 Lists of Passengers in Transit.
5 Lists of Passengers Disembarking.
2 Lists of Crew Personal Effects.
2 Vessel's Particulars Declarations.
2 Cargo Manifests.

**PILOTAGE:** Call Pilot by International Code flag "G" or by sounding "G" on whistle. Pilot launches are painted black. The Pilot joins vessel on arrival at Pointe des Negres. If Pilot not available, vessel must anchor in the Baie des Flamands East of Point des Negres to await Pilot.

**ANCHORAGE:** In Baie des Flamands in front of the town. Depths of 10–40 metres.

**MAX. SIZE:** Length 190 metres. Draft 10 metres. See "Tankers".

**HEALTH:** Request free pratique by radio or can be obtained on arrival when Master completes Health Declaration and presents Health Certificates.

**RADIO:** Fort de France Radio, call sign FFP. ETA message to Agent required 24 hours before arrival on working days or 48 hours on holidays. Message to include number of crew on board.

**TUGS:** None available.

**BERTHING:** Alongside quay. Maximum depth 10 metres. Roll-on/roll-off berth operational.

**MEDICAL:** Doctor and hospital facilities available.

**TANKERS:** *Petrol Pier:* depth alongside 17 metres, can accommodate tankers up to 65,000 dwt. Crude discharge through two 12-in. Chiksan Arms, capacity 4,500 tons per hour.

Vessel's displacement is limited by strength of the dolphins.

*Refinery Berth:* depth alongside 7·50 metres, for loading products, fuel, gas oil, kerosine at a rate of 150 tons per hour.

**DENSITY:** About 1028.

**FRESH WATER:** Available from quay in unlimited quantity. Rate 50–80 tons per hour.

**FUEL:** All grades available subject tp 12 hours advance notice.

**GANGWAY/DECK WATCHMEN:** Recommended. Performed by crew members.

**OPENING/CLOSING HATCHES:** Can be performed by crew.

**CUSTOMS ALLOWANCES:** 200 cigarettes per man. All alcohol to be declared.

**IDENTIFICATION CARDS:** Not necessary.

**CONSULS:**

Belgium
Colombia
Cuba
Denmark
Germany
Haiti
Italy
Netherlands
Norway
Panama
Portugal

**REPAIRS:** Minor repairs possible.

**DRY DOCK:** One, 200 m. length, 21 m. wide. Equipment restricted.

**REPATRIATION:** Facilities for crew change and repatriation.

**AIRPORT:** 7 miles from the port, served by regular airlines.

**HOLIDAYS:** 1st January, Shrove Tuesday, Ash Wednesday, Easter Monday, 1st May, Ascension Day, Whit Monday, 14th July, 15th August, 1st November, 25th December.

**POLICE/FIRE/AMBULANCE:** Police, tel.: 17 and 43–06; Fire/Ambulance, tel. 18 and 22–64.

**AUTHORITY:** Capitainerie du Port, tel. 20–73.

# Mauritania

## NOUADHIBOU (Port Etienne):

### POINT CENTRAL: 20.49 N. 17.03 W.

**PILOTAGE:** Pilotage is compulsory only for vessels berthing. Pilots normally board vessel at No. 2 Channel Buoy. Pilots may be ordered by VHF before arrival through Agent.

**ANCHORAGE:** Ships waiting for a berth should anchor about ¾ mile to the South-east of wharf. North-east of wharf is a turning area in which ships are forbidden to anchor.

**RESTRICTIONS:** *Outer Channel:* Width 400 m., depth 17·5 m. below the lowest water levels of spring tides.

*Inner Channel:* Width varying between 400 and 250 m. minimum. Depth 17 m. below the lowest water level of spring tides.

*Manoeuvring Circle:* Diameter 1,000 m. Depth 17m. below the lowest water level of spring tides.

Depth alongside oil berth (south part of the wharf) 11·50 metres.

Water density is 1025. Loading is completed during flood tide, and vessels sail at high water.

**MAX. SIZE:** Max. length 310 m. Max. width 45 m. provided the captain does not require the mineral to be put into the vessel more than 5 m. from the vessel's axis on the opposite side to the loader. In all border-line cases, consult the DCFP with drawings.

*Max. Draft:* Arrival – preferred draft with ballast or part cargo: 12·50 m. with possibility of reballasting at the quay to reach the 14 m. height range.

Max. height range (loader arm lowered in the work position): 14 m. from sea level for longitudinally opening cargo hatches; 14 m. from sea level to above the hold hatches where the latter open transversally.

Departure – max. draft at all states of the tide: 52 ft, i.e. 15·85 m. with possibility of going up to 53 ft. (16·15 m.) and slightly more working on the tidal coefficient and the time of departure of the vessel.

*Essential:* All vessels greater than 100,000 tons dwt, which have never visited the port before must have prior approval of the DCFP.

**HEALTH:** Free pratique is given only after vessel has berthed.

**TUGS:** None available.

**BERTHING:** The ore-loading terminal of Société Nationale Industrielle et Miniere de Mauritanie (SNIM) is located in position 20° 49′ N,. 17° 02′ W. The terminal comprises a single pier on steel piles, the northern part of which is the ore-carrier berth. Vessels moor port side to pier. The starboard anchor may be required to assist in berthing. Ships are requested to berth with a quantity of ballast equal to half of their cargo capacity.

*Pier:* Length 245 m. depth 16 m. below the lowest water level at spring tides.

Tide: Highest level in spring tides plus 2·16 m. Lowest level in spring tides plus 0·34 m.

*Loading equipment:* Belt conveyor, one mobile single loader with raisable arm. Run of loader: 165 m.

Vessels whose hold hatches are more than 165 m. away have to shift. A mooring buoy placed to the North of the mineral quay and the oil berth moorings to the South of the mineral quay provide good mooring points.

Outreach from edge of quay wall 28·50 m.

Rate of loading: Nominal output: 5,000 tonnes/hour.

Practical output: 2,000 tonnes/hour for small vessels. 3,000 tonnes/hour for large vessels loading only one quality of mineral.

**FRESH WATER:** Not available.

**FUEL:** Not available.

**MEDICAL:** There are hospital and medical facilities at the port. All officers and crew require valid smallpox and yellow fever inoculations.

**CUSTOMS ALLOWANCES:** All Bonded stores must be carefully declared. The vessel is liable to be fined if quantities are found to be more or less than those declared.

**GENERAL:**

(*a*) Direction of propeller rotation. It is of interest to know in advance whether vessels have a left-hand propeller, since this particularity complicates manoeuvring and is liable to delay positioning of the loading equipment.

(*b*) Vessels requiring several qualities of mineral: Advance warning prior to arrival at Nouadhibou must be given of the number of qualities, the tonnage per quality (and the maximum permissible differences) so as to be able to prepare a loading plan, and if possible this must be given prior to tying up at the quay so as to save time.

(*c*) For part loads to be shipped on vessels greater than 100,000 tons, the rules remain the same including advance acceptance of the vessel for loading by the DCFP.

**AUTHORITY:** Société Nationale Industrielle et Miniere de Manritanie (SNIM).

## NOUADHIBOU HARBOUR: 20.54 N. 17.03 W.

**PILOTAGE:** Not compulsory but recommended. Pilots are the same as for Point Central, and can be contacted by VHF Channel 16.

**RESTRICTIONS:** The main berth is available for ships of maximum 7·30 metres draft. Other berths are used for trawlers or small cargo vessels according to draft, length and Harbour Master's instructions.

**FRESH WATER:** Available for only small vessels.

**FUEL:** Available for only small vessels.

**AUTHORITY:** Capitainerie du Port.

## NOUAKCHOTT: 18.02 N. 16.02 W.

INFORMATION BASED ON REPORT DATED 1968, BUT ONLY RECENTLY RECEIVED.

**LOCATION:** Nouakchott Wharf is situated in position 18° 02′ 08″ N., 16° 01′ 43″ W., being about 7 km. S.S.W. of Nouakchott.

All vessels anchor off the port and movement of cargo is undertaken by barges and lighters.

**WIND:** The direction of the wind varies from N.N.W. – N.E predominant winds affecting navigation are from the N.N.W.

The rapid onset of bad weather should be noted. When cond are bad vessels should weigh anchor and proceed seaward a coast offers no natural shelter.

**CURRENTS:** There is an almost permanent N.–S. current ru at about 0·5 knots; it reverses S.–N. on a few days during the

**SWELL:** Two kinds of swell have been observed: Local swe to the coastal winds, varying from N. to N.W. in dry weather, turning between N.W. and S.W. during the wet season.

**ANCHORING ROADS CONDITIONS:** The periods during climatic conditions are liable to upset work are as follows: S swell, January/March; rain, July/August/September.

This virtually allows the port to be used during 200 days in the

**WORKING CONDITIONS:** Vessels must locate themselv closely as possible, where they can anchor without risk, to the within the limits of their drafts (generally between half and a qu of a mile), in line. At the lighterage quay there is a depth of wa 7 m.–8·5 m. It is preferable for a ring of lines to be placed in adv around the sides of the vessel to which barges may tie up.

Experience shows that the tonnage unloaded currently by the is 400 to 500 tons per day where goods in sacks are concerned possible to work two vessels at once, but each 4 will only wor of this tonnage.

Work is currently carried out on board by private companies on land, in the launches and lighters by the Wharf Organis personnel.

As far as wharf personnel are concerned, during working the normal working hours are from 0800 to 1600 hours.

Overtime day hours are from 1600 to 1900 hours.

Night time working is considered to apply between the hou 1900 and 0600 hours (currently impossible).

It should be noted that there is an overtime hour at the begi and end of work, which is the time required to launch or bring b on to the landing-stage.

**ANNUAL TONNAGE:** Total discharged in 1967, 33,000 tons; loaded in 1967, 600 tons.

**RECOMMENDATIONS TO CAPTAINS OF VESSELS:** sels must be at all times capable of gaining the open sea ra since bad weather comes up very quickly, and the coast affor natural protection.

**WHARF:** The working platform s 86 m.×21 m. and lies N.W.–S.E. direction it is connected to the shore by a gan 246·5 m. length and 7 m. wide.

The wharf is designed to take a load of 2 lorries of 25 tons (2 of 10 tons and 1 axle of 5 tons) or an overload of 1 ton/sq. m.

The wharf manager's office together with police, custom radio office are located on the shore.

**WHARF EQUIPMENT:** Three cranes with capacities of 20, 5 tons respectively.

**FLOATING EQUIPMENT:** One launch of 50 hp, two launch 100 hp. Ten steel barges, internal dimensions 10 m×3 m×1 with capacity for 20 tons cargo. One steel barge, internal dimen 13 m.×4 m.×1·35 m. with capacity for 30 tons cargo.

**LAND EQUIPMENT:** Goods are transported from the wh the storage area by 18 trailers each with a capacity of 8 tons port is also equipped with two tractors of 80 hp. and five fo trucks with capacity of 3·5 tons.

**TANKERS:** Dakar oil companies are presently building a h carbon oil depot about 400 m. North of the wharf.

The depot will be fed from tankers by means of 2 sea-lin 900 m. length.

# Mauritius

## PORT LOUIS: 20.09 S. 57.30 E. (See Plan)

**PORT LIMITS:** The commercial area of the port is the area the port bounded by the entrance buoys and the shore line inner harbour. Vessels at the outside anchorage lie within the of the port defined by an imaginary line joining Pointe Aux S and Pointe aux Pimentes. In this area commercial activitie restricted to bunkering, ship repair and the landing of passe or personnel.

**PILOTAGE:** Compulsory. Vessels are brought in or taken the harbour at any time before or after official hours by s arrangement with the Director of Marine.

**ANCHORAGE:** Open roadstead with anchorages for vess any draft.

**MAX. SIZE:** Harbour entrance depths from 42 ft. to 119 ft. Cha dredged to 32 ft.

**RADIO:** Port Authorities require to be notified of the date vessel's arrival by radio as soon as it is possible for Mas communicate with Harbour either:

1. By CW transmission through the Government Radio S (3 BA) at Vacoas on 500 kc/s.

2. By R/T transmission through Port Louis Harbour Radio S (3 BB 3) on 2182 kc/s.

**VHF:** Port Louis Harbour Radio Station is equipped with VH maintains 24-hour watch on Channel 16.

**TUGS:** One 2,300 h.p. deep-sea and salvage tug *Le Corsaire* 720 h.p. diesel-engine tugs, *Betty* and *Winnie*. These tugs are able for deep-sea towage and salvage and are fitted with fire-fighting equipment, R/T, W/T and VHF. Three smaller tugs of 320 h.p. are also available for harbour work.

**BERTHING:**

Quay D, length 485 ft., depth alongside 31 ft. 6 in. Can take one vessel up to 580 ft. overall, draft 30 ft. 6 in.

West Quay, length 400 ft., depth alongside 35 ft., designed for white oil and fertiliser discharge.

Quay C, length 396 ft., depth 18 ft. alongside for a length of 310 ft. Can take one vessel up to 300 ft. length, and 17 ft. draft.

*Buoys:* 6 berths capable of taking ships up to 31 ft. maximum draft; 3 berths capable of taking ships up to 29 ft. 6 in. maximum draft; 1 berth capable of taking ships up to 25 ft. maximum draft; 3 berths capable of taking ships up to 20 ft. maximum draft, maximum length 350 ft.; 2 berths capable of taking ships up to 16 ft. maximum draft; maximum length 225 ft. Vessels of 31 ft. are berthed in Quarantine Berth in No. 5E, No. 4E, No. 2E, No. 2W, and No. 5W. Distance between buoys at entrance 1½ cables.

**SPECIALISED CARGO-HANDLING FACILITIES:** LPG carriers berth at Quay D; there are no facilities for full containerisation and roll-on/roll-off traffic.

*Bulk Cargo:* Cement Discharging facilities. Rate of discharge 500 tons per hour. Maximum draft 20 ft., minimum 18 ft.; capacity of Silo: 7,400.

**STEVEDORING:** Undertaken by private contractors. Approximate rate of loading per day of eight hours: Sugar in bags, 200–250 t. per gang per day; sugar in bulk, 200–250 t. per gang per day; general cargo, 60 t. per gang per day; rum in drums, 100 t. per gang per day; bales hemp, 100 t. per gang per day.

Working hours: Mondays to Fridays from 0700 to 1600, Saturdays from 0700 to 1300. Overtime can be carried out on weekdays up to midnight and up to 1600 hours on Sundays and public holidays.

**MEDICAL:** Arrangements for medical attendance should be made through ship's Agent. Private clinics available.

**FRESH WATER:** Fresh water supplied by barges at any berth between 0700 and 1600. Arrangements can be made for supply before 0700 and after 1600 on payment of overtime. The rate is about 25 to 30 tons per hour. Four barges of 50, 75, 85 and 110 tons respectively are available.

**FUEL:** Gas oil, marine diesel and furnace oil obtainable. (Arrangements must be made in advance between Owners and the Shell Co., BP, or the Anglo-Iranian Oil Co.) The pumping capacity of the installations at Port Louis for furnace oil is between 150 and 200 tons per hour, and for marine diesel oil and gas oil 50 tons per hour. Marine diesel oil and furnace oil (35 secs. to 1,000 secs.) is supplied at Quay "D". Furnace oil 1,000 seconds only is supplied on No. 5 West berth.

A 400-ton bunkering barge available to supply vessels in harbour and outside anchorage.

**DEVELOPMENTS:** Planned to dredge harbour to 45 ft. and to reclaim approximately 200 acres of land for port installations.

**REPAIRS:** Almost any type of repair can be undertaken in Mauritius.

**DRY DOCK:** Stevenson dry dock. Largest vessel that can be docked: 326 ft.× 48 ft., with a maximum draft of 16 ft.; vessels of up to 358·5 ft.× 50 ft. can also be docked, but at least 15 days notice should be given.

**CONSULS:** *Consulates:* Belgian, Danish, Dutch, Finnish, German (Federal Republic), Norwegian, Portuguese, Spanish and Swedish. *Embassies:* French, Malagasy, American, Russian and Pakistan. *High Commission:* British and Indian.

**HOLIDAYS:** 1st January (New Year's Day), port closed; 22nd January (Cavadee); 6th February (Chinese Spring Festival); 18th February (Id-El-Adha); 6th March (Maha Shivaratree); 12th March (Independence Day); 1st May (Labour Day); 29th October (Divali); 1st November (All Saints' Day); 1st December (Id-El-Fitr); 25th December (Christmas Day).

**POLICE/FIRE:** Police, tel. 999; Fire, tel. 999.

**AUTHORITY:** Mauritius Marine Services Dept.

## Mexico

### ACAPULCO: 16.50 N. 100.00 W.

**DOCUMENTS:**

Health Clearance from previous port.
Health Pratique.
4 Stores Lists.
4 Lists of Crew's Personal Effects.
12 Crew Lists.*
2 Passenger Lists.*
12 Manifests of cargo for the port.*

* One copy to be visaed by Mexican consul.

**PILOTAGE:** Pilot is ordered by Agent on the basis of Master's ETA, which should be given accurately at least 24 hours before arrival. Pilot boards at the port limits, approximately one mile from the entrance.

**ANCHORAGE:** Vessels may anchor in the middle of the bay as indicated by the Pilot. Depths up to 150 ft.

**RESTRICTIONS:** The Bay of Acapulco is a natural harbour surrounded by mountains, approximately 4 miles across at its widest part and 2½ miles across at its narrowest. There are two entrances, one called Boca Grande and the other called Boca Chica.

Boca Grande is between Punta Siclata on Isla de la Roqueta and Punta Bruja. The channel is 3,000 m. wide with a depth of 31 fathoms in mid-channel.

Boca Chica channel, between Isla de la Roqueta and the Peninsula of Las Playas is 300 m. wide with a depth of 14 fathoms in mid-channel.

**MAX. SIZE:** For berthing alongside maximum draft 28 ft. 6 in.

**HEALTH:** When vessel arrives at the port the following Authorities will board: Port Health Authority, Customs and Immigration, accompanied by the ship's Agent.

**RADIO:** Coastal station of Acapulco receiving on 8374 kHz in day-time and on 4180 kHz at night. Transmitting on 8514 kHz in day-time and 4250 kHz at night. Radiotelephone receiving and transmitting on 2715 kHz during the day and on 2182 kHz from 2000–0600 hours local time. VHF service available from 0630 to 2300.

**TUGS:** One tug is required for berthing. Tug's line used.

**MEDICAL:** Agent should be advised by radio in advance if any medical assistance required. Hospital facilities available.

**TANKERS:** Tanker moorings operated by Petroleos Mexicanos situated on the Eastern side of the bay. It is strictly prohibited to discharge oily residues in the bay or within 40 miles of the port.

**FRESH WATER:** Can be supplied by hoses from the quays, rate about 15 tons per hour.

**OPENING/CLOSING HATCHES:** Is performed by stevedores.

**CUSTOMS ALLOWANCES:** Crew members are only allowed to retain cigarettes, tobacco and liquor sufficient for their own consumption while vessel is in port.

**IDENTIFICATION CARDS:** Crew members should carry a passport.

### COATZACOALCOS: 18.08 N. 94.25 W.

**PORT LIMITS:** From the centre of the channel at the bar with a radius of half a mile to seaward.

**DOCUMENTS:**

*Customs:*

Cargo manifest, original and four copies visaed by Mexican Consul at place of origin. If no cargo carried for this port a certificate and 2 copies stating the fact.
Stores List, original and one copy.
Personal Effects List, original and one copy if vessel is arriving from another Mexican port Customs release from that port must be produced.

*Port Captain:*

Clearance from last port.
2 copies Crew List.
3 copies Manifest of cargo for this port.

*Immigration:*

Crew List, original and one copy, bearing consular visa.
Passenger List, original and copy, visaed by consul.
All Crew Passports or I.D. Cards.

*Health:*

2 copies Crew List.
2 copies Passenger List.
Crew Vaccination Certificates.
Derat Certificate.
When vessels are anchored beyond the breakwater authorities board from the pilot launch.

**PILOTAGE:** Compulsory. Pilot meets vessel off the jetties at Coatzacoalcos Estuary. Master should give Agent information not less than 24 hours prior arrival stating vessels name, flag, and ETA as well as draft.

Pilot boat black hull, white housing and red deck. Two launches, *Alcion* and *Vencedora.* The sound signal for calling the Pilot is two long blasts and one short blast. The light signal is a blue Bengal light.

**ANCHORAGE:** Vessels may anchor between ½ mile and 1½ miles off the breakwater or at the Master's discretion.

**MAX. SIZE:** Max. draft crossing the bar is 34 ft. Max. LOA permitted:

Free Zone 187 m. Pajaritos 233 m. (day), 186 m. (night).
Hours of service: Day 0800–1800. Night 1801–0759.
Max. draft permitted at Pajaritos 32 ft. fresh water.
Max. draft permitted at Free Port 30 ft. fresh water.

**HEALTH:** Pratique never given by radio. Vessels granted free pratique when berthed alongside if no contagious illnesses aboard.

**RADIO:** Communication with local Agent by Coastal Radio XFF, located near the beach in the village of Allende on the right bank. Telegraphy transmitter with range of approx. 500 miles, frequency 512, 500, 432 and 419·5 kc/s. Speech transmission with range of approx. 50 kms. frequency 2182 and 2665 kc/s. Radio-beacon transmission with range of about 300 miles and frequency of 312 k/cs. VHF transmission with range of some 50 miles and frequency of 156·55, 156·60, 156·70 and 156·80 mc/s.

**TUGS:** Tugs join vessels in the river when entering. Tug's lines used. Towage is compulsory for docking, undocking and shifting berth in the harbour. For vessels up to 4,000 grt one tug, over 4,000 grt two tugs. Seven tugs available. The signal for calling tugs is two long blasts and two short blasts on the whistle and signal for dismissing tugs is one short, one long and three short blasts. Tugs will repeat signals to indicate acceptance.

**BERTHING:** Normally vessels docked starboard side alongside. When current and circumstances permit vessel docked port side alongside. When vessels berthing must prepare accommodation ladder to be boarded by Port Authorities. There are seven docks in the Free Port area numbered 2, 3, 4, 5, 6, 7 and 8. Nos. 2, 3 and 4 exclusively for general cargo. Depths alongside: No. 2, 25 ft.; No. 3, 27 ft.; No. 4, 30 ft. Nos. 5, 6 and 8 exclusively for loading sulphur in bulk (dry and liquid). Depths alongside these 3 berths of 32 ft. No. 7 for discharging bulk harmless fertilisers. Depth 28 ft. There is one berth at Pajaritos FFM private berth where bulk harmless fertiliser loaded or discharged. Depth of 33 ft. There are two small berths at Coatzacoalcos Fiscal Port used only for fishing-boats and tugs. No loading or discharging performed at these berths. Depths alongside of 18 ft. A crane capacity 300 tons expected shortly.

**STEVEDORES:** No ETA advice necessary. Free Port: Straight working hours: from 0800 to 1200 and from 1400 to 1800 hours Overtime 100% overcharged according Tariffs. Latest times to order gangs: 0730, 1330 and 1730 hours. Straight time above hours Monday through Saturday. Sunday and holidays allowed to work except "Legal Holidays". Loading and discharging rates: 25 tons gang/hour using ship's derricks. No shore cranes available. Loading sulphur by conveyor belts at 500 tons per hour, working around the clock.

Private FFM Berth: Loading or discharging operations performed by their own personnel working 24 hours per day. Rate of loading by conveyor belt: 500 tons per hour. Rate of discharging 1,100 tons per day with ships gear.

**MEDICAL:** Hospital facilities available. Inform Agent in advance if treatment required. Smallpox vaccination certificates inspected on arrival. If certificates expired crew members are revaccinated at Health Department.

**TANKERS:** Tankers regularly moor in the Pajaritos Roads. There are four large quays for mooring seven vessels up to 233 metres, with max. draft at the quay of 33 ft.

The Provisional Quay has two lines of operation of 24 in. with three points 8 in. for crude oil and one other of 8 in. for crude oil.

**DENSITY:** Averages 1012.

**FRESH WATER:** Available at berths in Free Port area, delivered by 1½ in. hose. Loading rate about 8 tons per hour.

**FUEL:** Fuel can be supplied at Coatzacoalcos port by tank-trucks when vessels need small quantities. Petroleos Mexicanos (PEMEX) has at Nanchital a loading terminal which is about 3 miles up-river from Coatzacoalcos (max. draft 27 ft. 6 in.) where Bunker C fuel available.

Diesel oil only available at Minatitlan, about 17½ miles up-river from Coatzacoalcos (max. draft 21 ft.). If vessel bunkers at Nanchital or Minatitlan there will be at least one delay day and heavy extra expenses.

**DEVELOPMENTS:** The channel and docks are being dredged in the free zone, and Pajaritos and the main channel buoys are being improved.

**CUSTOMS ALLOWANCES:** No restriction for free use on board.

**CONSULS:** Norway and Netherlands.

**REPAIRS:** Minor repairs may be effected. No dry dock available.

**AIRPORT:** At Minatitlan, about 40 minutes car drive away. 2 regular flights to Mexico City.

**TIME:** 6 hours behind GMT.

**HOLIDAYS:** No work performed on following legal holidays: January 1st; March 21st; May 1st; May 5th; September 16th; October 12th; November 20th; December 25th; and December 1st every six years when Federal Government changes President.

**TELEPHONES:** No facilities for placing telephones on ships.

**POLICE/AMBULANCE/HOSPITAL:** Police tel. 2 01 22, Red Cross 2 02 85; Hospital 2 00 30.

**SHORE LEAVE:** Possible. Crew must have I.D. cards or passports. Passengers must have passports.

**AUTHORITY:** Port Captain, Free Zone Building, 2nd Floor. Tel. Tel. 2-01-69.

**AGENT:** Representaciones Maritimas, S.A. Calle Juarez 320 Altos Coatzacoalcos, Ver. Tel. 2 01 71. Telex 078 822. Cable: "Maritimex", Coatzacoalcos.

## MANZANILLO: 19.03 N. 104.20 W.

**DOCUMENTS:**
14 Crew Lists.
20 Passenger Lists.
Derat Certificate.
Vaccination Certificate for each crew member.
Cargo Manifest and one copy to be visaed.
8 additional copies of Cargo Manifest, unvisaed.
10 Bills of Lading, one copy to be attached to each cargo mani

**PILOTAGE:** Pilot station cannot be contacted by radio, and Pi are ordered by Agents basis Master's ETA.

Pilot boat is black with white wheel-house on which is pai letter "H". International Code signals used. Pilot normally boa vessel about one or two miles from breakwater but if requeste advance the pilot boat will come out to five or six miles. Pilot ca board in rough weather. Vessels waiting for Pilot may anchor ab two or three miles N.W. of breakwater in depths of 12–15 fathom

**ANCHORAGE:** Vessels may anchor in the whole North part of Bay where depths are 12–15 fathoms at a distance of one to two m from the coast.

**RESTRICTIONS:** Vessels may enter at any time day or night.

**MAX. SIZE:** No limitation for anchoring in the bay. For moo alongside, maximum length 200 metres, maximum draft 32 ft.

Also see "Tankers".

**HEALTH:** Port Health Officer and Immigration Officers bo vessel at anchorage. Passengers and crew may be required inspection. All passengers and crew members must poss Smallpox Vaccination Certificates.

**RADIO:** Coastal station Manzanillo Radio, call sign XFM, opera 0600–1800 local time.

**TUGS:** One tug available, compulsory to use tug when moo alongside. Tug will join vessel as ordered by the Pilot.

**BERTHING:** Vessels may berth at both sides of the pier or a North end of the pier.

**STEVEDORES:** Advise Agent in advance number of gangs quired. Discharge rate approximately 20–25 tons per hour per ga

**MEDICAL:** Agent should be advised in advance if medical atte ance required on board. Hospital facilities available.

**TANKERS:** Two berths available, max. length 650 ft. No restric on beam. Max. draft: North-east side, 31 ft. (Forward) and 38 ft. (A South-east side 33 ft. (Forward) and 38 ft. (Aft).

**FRESH WATER:** Should be ordered in advance. Rate of 10 t per hour. Vessels must furnish own steam for pumping, 2 i coupling. No barges available for delivery at anchorage.

**FUEL:** Should be ordered in advance: All grades available. Ma expensive due customs fees.

**DEVELOPMENTS:** Improvements are in progress to accom date vessels up to 30,000 tons with a draft of 40 ft.

**GANGWAY/DECK WATCHMEN:** No shore service availabl

**OPENING/CLOSING HATCHES:** Normally performed by c members.

**CUSTOMS ALLOWANCES:** Each crew member may retain carton of cigarettes, and one bottle wine/spirits for his own No alcohol may be taken ashore.

**IDENTIFICATION CARDS:** Identification cards or shore pas are necessary for crew going ashore.

**CONSULS:** Nearest are at Colima and Guadalajara.

**REPAIRS:** Only repairs to auxiliary machinery can be effected Guadalajara hull repairs may be effected provided dry dock required.

**REPATRIATION:** Can be arranged.

**AIRPORT:** Local airport only for internal traffic.

**TIME:** GMT minus 6 hours all the year round.

**HOLIDAYS:** The following holidays can only be worked in cas emergency: 1st January; 5th February; 21st March; 1st May; 5th M 16th September; 12th October; 25th December; and in addition May, Anniversary of the Stevedores' Union.

**POLICE/FIRE/AMBULANCE:** Police tel. 4; Fire 23; Ambulanc

**TELEPHONES:** Cannot be connected on board ships.

**SHORE LEAVE:** Permitted except for crews of Russian, Cuban Communist Chinese vessels.

Crew members required present their identity cards to Immi tion at the gangway. Crew members left behind by vessel must covered by 10,000 Pesos bond to guarantee repatriation expens

**AUTHORITY:** Capitania de Puerto Edificio Federal, Morelos y Mayo. Tel. 34.

## MINATITLAN: 17.54 N. 94.35 W.

**DOCUMENTS:** See "Coatzacoalcos."

**PILOTAGE:** See "Coatzacoalcos Pilotage." Port about 17½ m up-river from Coatzacoalcos. Vessels are piloted either up-rive down-river to and from Minatitlan.

**ANCHORAGE:** Only at Coatzacoalcos. At Minatitlan rive narrowed and anchorage not permitted.

**RESTRICTIONS:** Vessels may enter harbour only in dayl Latest time for entry and sailing to and from Minatitlan is 1500 ho

**HEALTH:** Pratique never given by radio. Vessels granted prat at anchor at Coatzacoalcos. Vessels must prepare accommod ladder, to be boarded by port authorities.

**MAX. SIZE:** Maximum LOA at Pemex berths: 475 ft. Maxi LOA at Fiscal berth: 440 ft. No breadth restrictions at both. Maxi draft permitted: 21 ft. in fresh water.

**TUGS:** One tug required to accompany vessels past the Coatz alcos Bridge. Tugs rejoin vessels in the river on arrival at b

Tug's lines used. For vessels over 2,000 grt one tug required, over 3,000 grt two tugs required.

**BERTHING:** Normally vessels dock starboard side to. Petroleos Mexicanos (Pemex) has 8 berths for tankers, where they can load crude, fuel oil, gasoline benzene, xylene, metaparaxylene, toluene and other petroleum derivates. Fiscal berth has a length of 80 metres depth alongside of 22 ft. Actually only used to discharge bulk harmless fertilisers. Discharge performed by elevator at a rate of 800 tons per 24 hours, also by ship's gear using buckets at a rate of 200 tons per day per hatch.

**TANKERS:** No ballast to be discharged in the river. All ballast to be discharged to shore tanks through two 6 in. pipe-lines.

**STEVEDORES:** No ETA advice necessary. Agent or Receivers of cargo order gangs to discharge. Straight working hours from 0700 to 1500 Mondays through Saturdays. Latest time to order gangs 0645 and 1445 hours.

**DENSITY:** Averages 1006.

**MEDICAL:** Hospital facilities available.

**FRESH WATER:** Available at all berths, but is not recommended.

**FUEL:** Marine diesel oil and Bunker "C" obtainable at Pemex berths. Bunker "C" also obtainable by barge, and diesel oil only by tank truck.

**CUSTOMS ALLOWANCES:** No restrictions. Free use on board. Two customs guards remain on vessel while alongside.

**DEVELOPMENTS:** Constant programmes for more berths, sheds, dredging and equipment are under way, but rather slow.

**REPAIRS:** No dry docks available, but small repairs can be done in shore repair shops.

**AIRPORT:** About 15 minutes car drive away. Regular flights to Mexico City.

**TIME:** 6 hours behind GMT.

**TELEPHONES:** No facilities for placing telephones on ships.

**AGENTS:** See "Coatzacoalcos".

## NANCHITAL: 18.00 N. 94.27 W.

**DOCUMENTS:** See "Coatzacoalcos."

**PILOTAGE:** See "Coatzacoalcos Pilotage." Port about 3 miles up-river from Coatzacoalcos.

**ANCHORAGE:** See "Coatzacoalcos Anchorage."

**RESTRICTIONS:** Vessels may enter Coatzacoalcos only with daylight. Navigation from Coatzacoalcos to Nanchital remains closed from 1630 to 0700 hours.

**MAXIMUM SIZE:** Maximum LOA 580 ft. No breadth restrictions. Maximum draft permitted 27 ft. 06 in.

**HEALTH:** See "Coatzacoalcos."

**TUGS:** When vessels proceed to Nanchital, 1 tug accompanies to pass the Coatzacoalcos bridge, according to Port Regulations. Tugs again join vessels when arriving at Nanchital berths. Tug's lines used. For vessels over 4,000 grt two tugs used.

**BERTHING:** Normally vessels dock port side alongside. When current and circumstances permit vessel is turned around and docked starboard side to. There are two docks at Nanchital, called Old Pier and New Pier. Both to load crude oil, No. 6 fuel oil by pipe line of 6 in. and up to 10 in. Mooring, unmooring, connecting and disconnecting hoses performed by Pemex own labourers.

**MEDICAL:** Hospital facilities available only at Coatzacoalcos.

**BALLAST:** Special regulation for tankers that no ballast water to be discharged in the river. Deballasting performed by two pipe-lines of 6 in. diameter to shore tanks.

**SALINITY:** Average 1006.

**FRESH WATER:** Available at both berths but is not recommended for drinking.

**FUEL:** Available only at the Pemex Oil Terminal at any time.

**DEVELOPMENTS:** Constant programmes for more berths, sheds, dredging and equipment are under way, but rather slow.

**CUSTOMS ALLOWANCES:** No restrictions. Free use on board. Two Customs guards stay on board. Vessel to provide them boarding and lodging.

**CONSULS:** None.

**REPAIRS/DRY DOCKS:** No dry docks available, but small repairs can be done in shore repair shops.

**AIRPORT:** At Minatitlan, about 1 hour car drive away. 2 regular flights to Mexico City.

**TIME:** 6 hours behind GMT.

**TELEPHONES:** No facilities for placing telephones on ships.

**AGENTS:** See "Coatzacoalcos".

## PROGRESO: 21.17 N. 89.39 W.

**DOCUMENTS:**

Crew List visaed by the Mexican Consul and 7 simple copies.

Passports or Seaman's Book for all crew.
Clearance from last Port of Call.
Passenger List visaed by Mexican Consul and 7 copies.
6 Stores Lists.
7 Manifests.
7 Bills of Lading (2 to be visaed).
Tonnage Certificate.
Certificate of Free Pratique.

**PILOTAGE:** Compulsory. Pilot boards about 3½ miles North of the lighthouse from a fast launch. International signals to be used to call Pilot day and night. ETA should be passed to Agent via radio station at least 24 hours before arrival.

**ANCHORAGE:** Vessels waiting for a berth anchor 3 miles off the Fiscal quay. The anchorage is marked on Chart H.O. 0966.

**RESTRICTIONS:** No night restrictions. Also see "Max. Size". No facilities for tankers.

**MAX. SIZE:** Max. LOA, 190 metres. Max. draft 16 ft. (arriving), 16 ft. 6 in. (sailing).

**HEALTH:** The doctor boards the vessel at the quay. Where illness or fever is suspected on board, international rules are followed. If the vessel is arriving from another Mexican port, there is no health inspection. Radio pratique is not obtainable.

Authorities require Smallpox Vaccination Certificates for all crew and passengers, and valid Derat Exemption Certificates. No radio pratique prior to arrival obtainable.

**RADIO:** Progreso Radio XFN works from 0600 to 1900 hours every day and listens on frequencies 2,182 kc/s. and Channel 16 VHF on radio-telephony and 500 kc/s. on radio-telegraphy. Working frequencies are 2,756 kc/s., Channel 14, Channel 13 and Channel 12 VHF for radio-telephony, and 420 and 429 kc/s. on radio-telegraphy. ETA can be passed through this station 24 hours in advance.

**TUGS:** No tugs available.

**BERTHING:** One pier heading 355° true. Berth available on both sides, East and West, with 204 metres length on each side, and both with 18 ft. depth alongside.

**STEVEDORES:** No ETA advice necessary if stowage plan received in advance by Agent. Otherwise, ETA advice for gangs required 6 hours prior to arrival. Stevedores' General Cargo discharging and loading rate about 12 tons per gang/per hour.

**MEDICAL:** Attention available. The port has a clinic. Hospitals are situated in Merida.

**TANKERS:** No facilities.

**DENSITY:** Average 1015.

**FRESH WATER:** Available from pier by hoses. Fresh water is treated in the plant.

**FUEL:** Bunkers are available. Delivery by tanker truck equipped with pumps. Diesel and fuel supplied. Agent requires 24 hours notice.

**FIRE PRECAUTIONS:** No smoking allowed aboard vessels.

**GANGWAY/DECK WATCHMEN:** It is not necessary. Sometimes Masters require them.

**OPENING/CLOSING HATCHES:** This work is normally carried out by stevedores, but sometimes is carried out by crew in order to save time in loading or unloading.

**CUSTOMS ALLOWANCES:** Any quantity to be used on board is permitted.

**IDENTIFICATION CARDS:** Not necessary, but crew must carry passport or Seamans I.D.

**CONSULS:** The Consular Offices are located in Merida, the capital of State of Yucatan (20 minutes from Progreso by taxi):

| | | | |
|---|---|---|---|
| Cuba | tel. 1 66 77 | Lebanon | tel. 1 77 76 |
| France | ,, 1 60 13 | Switzerland | ,, 1 75 00 |
| Germany | ,, 1 21 77 | USA | ,, 1 60 30 |
| Great Britain | ,, 1 67 99 | | |

**REPAIRS:** Small repairs can be carried out in shore shops. No dry docks available.

**REPATRIATION:** There are facilities for effecting crew changes and arranging necessary repatriation. All matters are handled by the Office of Immigration.

**AIRPORT:** International Airport in Merida, about 30 minutes from Progreso by taxi. Daily services to Miami, Fla., by Pan American World Airways and New Orleans La., every two days. Other flights to Central America, Jamaica, and Germany.

**POLICE/AMBULANCE/FIRE:** Police 5 00 26.

**HOLIDAYS:** January 1st; February 5th; March 21st; May 1st (Labour Day); September 16th (Independence Day); November 20th (Revolution Day); December 1st (every 6 years); December 25th; It is possible to work, paying 100% additional.

**TELEPHONE:** It is not possible to place telephones on board.

**SHORE LEAVE:** Crew members are allowed ashore.

**AUTHORITY:** Harbour Master (Captain of the Port), Fiscal Quay Building. Tel. 5 00 90.

**AGENT:** Representaciones Maritimas S.A., c/o Fernando Patron Nicoli, 27th Street No. 112, Progreso, Yucatan, Mexico. No Telex. Tel. 5 00 52.

## SAN CARLOS: 24.47 N. 112.08 W.

SHIPMASTER'S REPORT

**DOCUMENTS:**

Visaed Crew List by Mexican Consul and 9 copies.
Visaed Cargo Manifest from each loading port and 4 copies.
Derat Exemption Certificate.
Valid Smallpox Certificates for all on board.
Passports or Seamen's Books for all on board.
Clearance from last port of call.

**APPROACHES:** A very strong current was experienced running from S.E.–N.W. when entering Bahia Magdalena at Pta. Redondo. Caution should be exercised making this approach, because currents can be strong and unpredictable in this area.

**PILOTAGE:** Compulsory. Pilot boards in lat. 24.39 N. long. 112.05 W. from small boat with outboard engine.

Anchorage is also good in this position should it be necessary to await pilot or berth. The two buoys marking the entrance make good radar targets and are distinctive.

**RESTRICTIONS:** Channel must be navigated at suitable time of tide giving careful consideration to vessel's draft, in order to clear

numerous shallow patches. Maximum draft to date of vessel navigating channel was 30 ft 4 in. on top of high water.
**RADIO:** La Paz Radio (XFK) 500 kHz and 441 kHz. Working hours appear to be uncertain, but there is a working arrangement with Agent to transmit messages free of charge.
**CHARTS:** Chart used to navigate channel was Mexican No. FH. 614. Masters are strongly advised to obtain this chart.
**BERTHING:** One pier 420 ft. long.
**FRESH WATER:** Available at pier at 10 tons per hour.
**COMMUNICATIONS:** Very poor. No telex, no telephone and no cable service. Telephone available at Villa Constitucion 57 kilometres away by paved highway. Plans are in force to introduce a telephone service in the fairly near future.
**CONSUL:** If consular advice is required it is best to contact the British Embassy in Mexico City. Tel. 5 11 48 80.
**LAUNDRY SERVICE:** None.
**SHIP CHANDLER:** None. A pick-up wagon can be supplied by Agent to obtain essential stores from supermarket at Villa Constitucion.

## TAMPICO: 22.15 N. 96.51 W.

**PORT LIMITS:** Vessels in Mexican ports are considered to be arrived vessels as soon as permission to moor has been granted by the Port Authorities.

Permission to tie up will be granted on the quay or whilst in midstream, and occasionally during periods of very good weather a vessel is authorised to anchor in the port entrance.
**DOCUMENTS:**

1 Crew List visaed by Mexican Consul.
9 simple copies of Crew List.
1 Visaed Cargo Manifest from each loading port.
4 simple copies of Cargo Manifest.
1 Visaed Passenger List or visaed Statement to the effect of no passengers, and 5 simple copies.
2 copies of Store List.
2 copies of Personal Effects List.
Derat Exemption Certificate.
Valid Smallpox Vaccination Certificates for all crew and passengers.
Passports or Seaman's Books of all crew.
Clearance from Last Port of Call.
3 copies of lists of packages containing explosives, inflammable or corrosive materials.

**PILOTAGE:** Pilot ordered by Agent who needs 24 hours ETA prior to vessels arrival. Pilots board vessels two miles off the breakwater. Vessels may anchor about two miles off the breakwater waiting for Pilot. Pilots have radio-telephone, frequency 2182.
**ANCHORAGE:** About 2 miles East of breakwater in 40–60 fathoms of water.
**RESTRICTIONS:** There are no restrictions for movements at night. The drafts of the vessels will be governed by the mooring zones in which they are working. The depths at these berths are as follows:

| | |
|---|---|
| *Free Zone Quay | 30 ft. |
| Minera Autlan Quay | 32 ft. |
| Petroleos Mexicanos Quay | 30 ft. |
| Mexican Gypsum Quay | 26 ft. |
| Metals and Minerals Quay | 29 ft. |
| Anahuac Cement Quay | 23 ft. |

The navigation channel to the Mexican Petroleum Maritime Terminal has a depth of 38 ft. and that to the Free Zone 31 ft.
* This depth is subject to constant dredger maintenance, the draft being reported weekly to the Ship's Agents.
**MAX. SIZE:** The maximum length is 656 ft. There are no restrictions for beam. The drafts will be those admissible in the corresponding berth used.
**HEALTH:** No radio pratique. Pratique granted after docking and presentation of documents to Port Authorities. In case of disease or fever on board, Master to give notice to Agent before arrival.
**RADIO:** Tampico has a coastal station with frequency 2182, as have the Port Captain, the pilots' office and the Gulf Tugs' office. All have the same frequency.
**TUGS:** 3 tugs are available, intended solely for port manoeuvres, comprising *Guayalejo* 2,000 h.p., *Tamesi* 1,000 h.p., and *Panuco* 800 h.p. Also Petroleos Mexicanos have tugs whose power varies between 1,000 and 3,000 h.p.
**BERTHING:**

1 berth at the Minera Autlán quay where manganese is moved by moving belt at the rate of 1,200 tons per hour.

5 berths at the Pemex Quay, where oil and its derivates are moved at the rate of 600–800 tons per hour, by means of 4 in., 6 in., 8 in., and 10 in. pipes.

1 Berth at the Mexican Gypsum quay where calcium sulphate is moved by moving belt at the rate of 500 tons per hour.

2 berths at the Metals and Minerals Quay, where bulk minerals are moved by four moving belts at the rate of 125 tons per hour per belt.

7 berths at the Tampico Free Zone, where general cargo is moved at the rate of 20 tons per hour per gang.

1 berth at the Anahuae Cement quay, where bulk cement is moved by means of 10 in. pipes at the rate of 250 tons per pipe, there being 2 ducts.

All quays have lighting for night operation and telephone facilities.
**STEVEDORES:** No ETA advice necessary of Stowage Plans received in advance by Agent, otherwise ETA advice for gangs appreciated 48 hours prior to arrival. Stevedores general cargo discharging and loading rate about 20 tons per gang/hour. Mi loading at Metals Pier about 125 tons per belt/hour (2 conv belts available to service both berths).
**MEDICAL:** Hospital facilities available. No advance notice requ
**TANKERS:** See "Berthing". Dirty ballast is received ashore.
**SALINITY:** Average 1006.
**FRESH WATER:** Available on written request from ship's Ag Drinking water delivered by pump at the rate of 12 cubic metres hour.
**FUEL:** Available preferably at the Petroleos Mexicanos Q although with one week's advice prior to arrival this service ca provided at the public service quays.
**DEVELOPMENTS:** Constant programming for more spac wharves, sheds, warehouses, continuous dredging and increa capacity of operational equipment.
**CUSTOMS ALLOWANCES:** No allowances to be taken ash but reasonable amounts of tobacco and spirits are allowed t taken out of bond, but to be kept on board for use of crew and p sengers only.
**CONSULS:** Great Britain, Peru, Germany, Holland, Nor Sweden, Italy, Uruguay and Lebanon.
**REPAIRS/DRY DOCKS:** There is a floating dock with capa up to 4,000 gross tons, where hull repairs can be effected, as can w on steering system, machinery, marine auxiliaries and other eq ment of less importance.

There are specialist workshops attached to the dock.
**GANGWAY/DECK WATCHMEN:** No watchmen necess Customs guard keeps watch at gangway while vessel alongs
**REPATRIATION:** In the port there is an office of the Adminis tive Secretariat, where the repatriation of any crew member ca negotiated. This negotiation will be for the account of the sh Agent, who is required to deposit a bond of $10,000 per person.
**AIRPORT:** At a distance of 10 kilometres from the port, there regular flights to Monterrey, Nuevo Laredo, and Mexico City connections in any direction.
**TIME:** 6 hours behind GMT.
**HOLIDAYS:** January 1st; February 5th; March 21st; May September 16th; November 20th; December 25th; December every 6 years.
**FIRE/AMBULANCE/POLICE:** Fire Department 2 12 22; Red C 2 13 33; Police 2 11 57; Police (Jail) 2 10 32.
**AUTHORITY:** Superintendency of Port Operation, tel. 2 2 Port Captain tel. 2 20 29.

**AGENTS:** Representaciones Maritimas, S.A., Edificio Luz-P Despacho 523, Tampico, Tamps. Mexico. Tel. 2 34 77 and 2 4 Telex 01430. Cable: "Maritimex, Tampico."

## VERA CRUZ: 19.12 N. 96.08 W.

**PORT LIMITS:** Area bounded by the reef lighthouses outsid breakwater.
**DOCUMENTS:** See "Coatzacoaloos".
**PILOTAGE:** Compulsory, advise Agent 24 hours before ar giving name, flag, ETA and draft.

The Port Captain is to be given a minimum of 2 hours' notic the Agent. This to be done between 0800–1800 (pilot office hou Orders for Pilots between 1800–0800 to be made between 0800-

The Pilot normally boards within the port limits, but if his serv are requested outside such limits the Pilot will proceed to location, i.e. the anchorage.

The pilot launch leaves from a "T" shaped pier when expe vessel is sighted. The launch has a black hull with white su structure and false funnel painted black.
**ANCHORAGE:** In good weather, vessels may anchor in the o area off the port, in the case of bad weather, to the South of the of Sacrifices (Isla de Sacrificios). If the vessel prefers to anc within the port limits, it must request the services of the Pilot on anchoring for its own account within this sector must pay fees due to the pilotage service.
**RESTRICTIONS:** In normal weather conditions there are restrictions on entry and departure, the sole consideration being draft of the vessel, since if this exceeds 29 ft. the time of the must be taken into consideration, and also after a strong North a vessel drawing more than 24 ft. must wait for the tide.
**MAX. SIZE:** Length 200 m., at berth nos. 4 and 6 or the oil term
**HEALTH:** The International Health Office gives a 24-hour ser for the arrival and departure of vessels. To obtain free pratiqu arrival of vessels there is a medical inspection, with submissio the Maritime Health Declaration, signed by the Captain, and exam tion of documents of Derat Certificate, certificates of vaccin of the crew and passengers; smallpox, cholera, yellow f (dependent upon the location from which the ship has co Examination of crew members or passengers who might be dec as suffering from contagious illnesses. With these formalities filled, free pratique is granted. Free pratique can be granted radio, provided it is considered that the vessel's arrival will not rise to the introduction or propagation of illnesses covered by regulations, and that also the following requirements are fulfille

1. Exercise of greater epidemiological vigilance in respe illnesses covered by International Health Regulations.

2. The Captain's radiogram must be presented to the Interna Health Delegation eight hours in advance and must invariably all the stipulations as set out in the attached form.

3. Without prejudice to the foregoing, the Health Doctor whomsoever he may designate, and where it is considered ap priate, shall go on board for the purpose of receiving the Ma

Health Declaration so that enquiries and verifications as may be considered necessary may be carried out.

Once the vessel has called at a national port, in subsequent national ports the requirements for obtaining free pratique will not be required, provided there does not exist on board any alteration in the health conditions as established in the Maritime Health Declaration.

Medical service to crew members and passengers on board foreign flag vessels is provided by doctors and private hospital institutions, through the intermediary of the consignee ship's Agent.

For possible handling of diseases covered by the Health Regulations (smallpox, cholera, yellow fever, bubonic plague), there are isolation wards in the Official Hospitals "Aquiles Serdán" and "Regional de Veracruz".

The Office of International Health has immunisation services, required for the diseases covered by the Regulation, which are certified on special international forms, with any cost, to crew members and passengers.

**RADIO:** Radio station Vera Cruz Radio, call sign XFU. Works on 500, 451, 8514 and 4250 kHz. and others. Also VHF Channels 12, 16, 26 and 27.

**TUGS:** Two tugs available; tugs' lines used at no extra charge. Tugs join vessels inside breakwater.

**BERTHING:** Depths given for low water, tidal range 1 ft.

| | | |
|---|---|---|
| Pier No. 1 | N. and S. | 27 ft. |
| Pier No. 2 | S. | 23 ft. |
| | N. | 21 ft. |
| | Head | 26 ft. |
| Pier No. 4 | | 27 ft. |
| Pier No. 6 | S. corner | 29 ft. |
| | S. end | 29 ft. |
| | N. side | 27 ft. |
| | N. head | 27 ft. |

**MEDICAL:** Doctors, dentists and hospital facilities available (see "Health").

**TANKERS:** Petroleos Mexicanos berth located in Northern part of port. Max. draft 28 ft. Berthing for 2 vessels of 170 m. LOA. Berth provides 5×8 in. lines for discharge of refined product and 2×12 in. lines for fuel oil.

**DENSITY:** 1025.

**FRESH WATER/FUEL:** Available.

**REPAIRS:** Hull and machinery repairs can be effected by "Astilleros de Veracruz" (Vera Cruz Shipyard Company).

**DRY DOCKS:** "Astilleros de Veracruz S.A." has four docks, two floating and two dry docks. The largest of them is Floating Dock No. 4 with the following characteristics:

| | |
|---|---|
| Length onstocks | 169·210 metres |
| Internal useful beam | 30·400 metres |
| Height of keel stocks | 1·400 metres |
| Maximum draft on keel stocks | 8·200 metres |
| Lifting capacity | 12·800 tons |

*Dock No. 2:* with capacity for vessels up to 10·000 tons

| | |
|---|---|
| Useful length | 154·000 metres |
| Useful beam | 19·400 metres |
| Draft | 5·180 metres |

Served by a 45 ton capacity crane

*Floating Dock No. 3:* with 3,000 ton capacity lifting capacity

| | |
|---|---|
| Useful length | 25·900 metres |
| Useful beam | 13·550 metres |
| Draft | 5·800 metres |

Served by 2 (two) cranes of 10 ton capacity each.

*Dry Dock No. 1*

| | |
|---|---|
| Length | 45·720 metres |
| Useful beam | 7·920 metres |
| Draft | 2·130 metres |

**SURVEYORS:** Lloyds, Norska Veritas and Germanischer Lloyd.

**GANGWAY/DECK WATCHMEN:** Available if required.

**HATCHES:** Mechanical hatches usually opened by crew, otherwise by stevedores.

**CUSTOMS ALLOWANCES:** 200 cigarettes and 1 bottle of spirits per man and will attend as necessary for further issues.

**CARGO GEAR:** Piers 1 and 2, 4×20 tons, 6×10 ton, 3×5 ton and 10×4 ton mobile cranes. Various cranes at piers 4 and 6. 2 floating cranes available maximum lift 46 tons.

**REPATRIATION:** Possible, arranged by Agent.

**AIRPORT:** 8 km. from Vera Cruz, flights daily to Mexico City.

**TIME:** GMT minus 6 hours all year round.

**HOLIDAYS:** During the year the following holidays are observed: 1st January, 5th February, 21st March, 1st May, 5th May, 16th September, 12th October, 20th November and 25th December.

**POLICE/FIRE/AMBULANCE:** Police – 2.28.23, Fire Brigade 2.25.00, Red Cross – 2.01.40.

**TELEPHONES:** Available on most piers but not on vessels.

**SERVICES:** Provisions, laundries, and dunnage available. Garbage must be removed every 48 hours.

**SHORE LEAVE:** Possible.

**DEVELOPMENTS:** A new petroleum quay is to be constructed to take 2 tankers of 40,000 tons.

**GENERAL:**

*Government Secretariat – Local Administration Office*

In accordance with the stipulations of Article 75 of the General Local Administration Law, vigilance of foreign crew members in vessels of any nationality tied up in national ports, together with visits or stays by the said crew members will be subject to the following requirements:

I. Heads of Local Government will designate accordingly personnel who will carry out vigilance of the vessel, in accordance with the provisions of Section II of Article 29.

II. Crew members may visit ports during the stay of the vessel, provided they deposit at the Local Administration Office their identity documents which for such purpose may be issued to them and their passports and other documents, all of which will be returned to them on re-embarkation.

III. Shipping companies, their Agents or consignee firms, for all legal purposes shall be responsible for the complete embarkation of crew members and for the costs involved in repatriating any who may remain behind after the vessel sails. When a crew member wishes to stay in the country, he must obtain documentation in compliance with one of the categories as set out in the appropriate Law and Regulations.

**SHIPMASTER'S REPORT:**

*Documents:*

1 Visaed and 9 Plain Spanish Crew Lists.
1 Visaed and 5 Plain Passenger Lists.
1 Visaed and 2 Plain Spanish Stores Lists.
2 Crew Customs Declarations.
5 Cargo Manifests.
1 Arrival Form.

The customs require a complete list of all shop goods priced in U.S. Dollars, failure to produce this will cause confiscation and $10,000 fine. The Customs thoroughly check bond and beer locker and seal same. All storerooms are also checked.

The Agricultural Inspector insists that all dry stores are fumigated and kept under seal for 24 hours. All refrigerated stores – except U.S.A. meat is sealed up.

*Pilotage:* Pilot boards one mile W.N.W. of Aneguda de Adentro Light beacon from black boat flying pilot flag.

*Tugs:* Two tugs available for berthing.

*Restrictions:* Port open day and night. Prevailing Northerly winds are sometimes too strong to allow ships movement in harbour.

*Health:* Health authorities board after berthing.

*Radio:* ETA to be sent 48 hours in advance via XFB Cuidad de Carmen. Agent orders Pilot.

*Fuel:* Bunker C and Diesel are available. A mixing machine is being installed to supply intermediate. Bunkers are supplied from most quays and are expensive for foreign ships.

*Consul:* There is a British Consul.

*Repairs:* There are three drydocks and all repairs can be done.

*Surveyors:* There are Lloyds and N.B. Surveyors available.

*Airport:* The airport is six km. from Vera Cruz with twice daily flights to Mexico City.

**AUTHORITY:** Port Captain, "Venustiano Carranza" Building, tel. 2.22.48 and 2.36.40.

# Morocco

## AGADIR: 30.25 N. 09.38 W.

**DOCUMENTS:**

Health Declaration.
4 Cargo Manifests.
6 Stores Lists.
6 Crew Lists.
6 Passenger Lists.

**PILOTAGE:** Compulsory. Pilot boards at port entrance. International code signals used.

**ANCHORAGE:** Good anchorage in open roadstead.

**MAX. SIZE:** Up to 29 ft. draft.

**HEALTH:** Pratique given immediately after berthing when port doctor boards.
**TUGS:** Two tugs available, one of 350 h.p., one of 1,275 h.p.
**RADIO:** Agadir Radio operates 24 hours a day.
**BERTHING:** Alongside pier: berth 475 metres long, 9 metres depth; berth 380 metres long, 6 metres depth.
**MEDICAL:** Doctors and hospital facilities available.
**FRESH WATER:** Available from pipe-line at berths.
**FUEL:** Fuel and gas oil available from pipe-lines at berths.
**GANGWAY/DECK WATCHMEN:** Available but not compulsory.
**STEVEDORES:** ETA required 24 hours in advance to arrange gangs.
**OPENING/CLOSING HATCHES:** Performed by stevedores.
**CUSTOMS ALLOWANCES:** Crew allowed normal daily consumption of tobacco, wine and spirits.
**IDENTIFICATION CARDS:** Required.
**CONSULS:** France, Spain, Belgium and Portugal represented locally.
**REPAIRS:** Small machinery and electronic repairs can be effected.
**TIME:** GMT plus one hour permanently.
**POLICE/FIRE/AMBULANCE:** Police, tel. 23–49; Fire, tel. 22–43; Ambulance, tel. 19.
**HOLIDAYS:** 1st January, 6th January, 19th March, Maundy Thursday, Good Friday, 1st May, Ascension Day, Corpus Christi, 29th June, 18th July, 25th July, 5th August, 15th August, 12th October, 1st November, 8th December, Christmas Day. Work may be arranged on all holidays except Good Friday.
**SHORE LEAVE:** Allowed.
**AUTHORITY:** Director del Puerto.

**AGENT:** Ernest Corcos, PO Box 54, Agadir. Tel. 24–55 and 33–31. Telex 810–18. Cables: Ercos Agadir.

## CASABLANCA: 33.36 N. 07.37 W. (See Plan)

**PORT LIMITS:** Vessels considered as "arrived" when passing buoy CA 5 in position 33° 37′ 05″ N. 7° 35′ 02″ W.
**DOCUMENTS:**
Certificate of Registration.
Cargo Manifests.
Crew Lists.
Passenger Lists.
Customs Declaration.
Bill of Health.
Ship's Entry Declaration.
International Tonnage Certificate.
**PILOTAGE:** Compulsory for all merchant vessels of 100 tons and over, in the area between the meridians 7° 37′ 10″ W. (the root of jetée Moulay Youssef) and 7° 33′ 50″ W. (Table d'Oukacha) and South of the parallel 33° 37′ 40″ N. Pilotage is available day and night. The Pilot meets vessel at the CA5 buoy.

A red flag displayed at the signal station by day indicates that the Pilot cannot come out, on account of the sea, but vessels may enter the port at their own risk, and the Pilot will await them under the shelter of jetée Moulay Youssef. Should bad weather prevent the Pilot from coming out, a vessel should not attempt to enter the harbour at night. The Master may contact the pilot station for port radar service by VHF Channel 12.
**ANCHORAGE:** The anchorage outside Casablanca harbour is partially protected from winds between S. and W. but a Westerly swell finds its way into the bay. With a heavy Westerly or North-westerly swell the anchorage becomes dangerous.

The holding ground in most places outside the harbour is poor, but a berth with good holding ground may be obtained in a depth of 13 fathoms N. of jetée Moulay Youssef. There are numerous anchorage berths in the harbour, some at mooring buoys, in depths up to 12 m. 8 (42 ft.).
**MAX. SIZE:** Maximum length permissible, about 884 ft.; maximum breadth permissible, about 105 ft.; maximum draft permissible, about 32 ft., but normally 30 ft. for berthing alongside. Tankers: up to 34 ft. draft.
**HEALTH:** Masters must fill in the declaration of health and display the "Q" flag, to obtain pratique. In the event of any suspected disease or fever on board, Masters have to warn their Agent before the ship's arrival.
**RADIO:** The name of radio station for ETA cables to Agents, receivers, etc., is Casa Radio.
**TUGS:** There are 6 tugs of 800–1,500 h.p. 3 of them are sea-going tugs fitted with modern salvage apparatus. Normally tugs join the vessel at port entrance. To call them, 4 long blasts and 1 short for one tug, 4 long blasts and 2 short for 2 tugs, etc. Ship's lines are mostly used.
**BERTHING:** To arrange berth, ETA message should be given 24 hours before the ship's arrival.

Mooring. When making fast to the jetty by the stern, the anchor should be let go at a sufficient distance from the jetty to allow for a good scope of hawsers.

Vessels are recommended to secure with special 10-in. coir hawser tailed with wire. It is recommended to moor head to the swell, but in bad weather a vessel should be ready to leave at short notice.
**CARGO HANDLING:** Phosphate loading: up to 5,000 tons per hour. Depth alongside 32 to 26 ft.

Grain Handling: discharging 800 t.p.h., loading 400 t.p.h. Depth at silo berths 30 ft.

Containers: straddle carrier for handling up to 20 ft. containers.

Roll-on/roll-off: three berths for roll-on/roll-off vessels, depth 30 ft.

**STEVEDORES:** There are 13 stevedoring companies. No working days are in two shifts (from 0700 to 1500 and from 15 2300). Ship's Agents arrange gangs in connection with steved Two daily orders (at 1100 and 1600) are made to fix the numb gangs.

**AGENT:** A. Adigard des Gautries, BP 52, El Jadida.

## KENITRA: 34.17 N. 06.30 W.

Situated on the left bank of the Oued Sebou, 17 km. from the Atlantic.
**PILOTAGE:** Pilotage is compulsory for entering and leaving port. Vessels must wait outside the port entrance for the tide. It is possible to enter from two hours before until one hour after high water during the night, and from three hours before until two hours after high water during the day. The Pilot boards vessels at river mouth. The Pilot will be on station two hours before high water.
**RESTRICTIONS:** From the mouth of the river up to the port is a dredged channel. Depths are 4·20 m. during neap tides and 5·40 m. during spring tides. Height of tide during neap tide is 2·60 metres. Height of tide during spring tide is 3·80 metres. The constant is 1·60 metres.

During the winter it is recommended to stay outside the port in strong squalls. Ships are advised by Kenitra port radio of the possibilities for entering port.

Between November and April there is a total of 6 or 7 individual days when the port is closed to navigation, due to weather conditions.
**RADIO:** Messages to ship's Agent should be sent through Casablanca radio. In the ETA message to Agent, also advise vessels draft. There is a radio station at Kenitra for port use only. Watch-keeping hours are only during high water, on 2182 kHz.
**TUGS:** Two tugs of 250 h.p. and one of 130 h.p.
**BERTHING:** The outer port used only by trawlers, and a mooring quay of 360 m. length belonging to the Royal Moroccan Navy. The length of main quay is 870 metres and includes 10 berths. In addition to the above there is a jetty for wine vessels, and a jetty for oil tankers.
**FRESH WATER:** Supplied alongside the quays.
**FUEL:** There are supplies of diesel oil, gas oil and petrol in the port. These products supplied by tanker lorry along the quay.
**REPAIRS:** There are workshops for small running repairs in the port. There is a slipway for ships up to 400 tons.
**CONSULS:** The Consular representatives at Kenitra are those of Belgium, France, Portugal.
**AIRPORT:** The nearest commercial airport is that of Rabat-Sale and there is a small airfield at Kenitra.
**AUTHORITY:** Directeur du Port, Boite Postale 23, Kenitra. Tel. 20–58; 20–59 and 31–31.

**AGENT:** Consortium Industriel Commercial Maritime, 19 Boulevard Imam Ali, Kenitra. Tel. 21 39, 28, 37, 22 56. Telex: 31030 Boutrans 31966 Incomar. Cables: "Incomar Kenitra"

## MELILLA: 35.18 N. 02.57 W.

**DOCUMENTS:**
Health Declaration.
4 Cargo Manifests.
2 Stores Lists.
5 Crew Lists.
5 Passenger Lists.
**PILOTAGE:** Compulsory for vessels over 500 tons. ETA to Agent required at least 10 hours before arrival to arrange Pilot. Pilot boards at anchorage near port entrance. International code signals used.
**ANCHORAGE:** Half a mile East of port entrance, in depths of 14 to 20 metres.
**RESTRICTIONS:** Entrance normally in day-light only. In case of emergency vessel may enter at night.
**MAX. SIZE:** Up to 32 ft. draft.
**HEALTH:** Pratique obtained immediately after berthing when vessel boarded by health officials.
**TUGS:** One tug of 550 h.p. available.
**MEDICAL:** Doctors and hospital facilities available. Vaccinations can be arranged.
**TANKERS:** One oil berth for tankers up to 32 ft. draft.
**FRESH WATER:** Available at all quays.
**FUEL:** Available subject to advance notice.
**GANGWAY/DECK WATCHMEN:** Available. Consignee Agents have their own watchmen for goods on the quay.
**OPENING/CLOSING HATCHES:** This work is carried out by stevedores.
**CUSTOMS ALLOWANCES:** Crew allowed normal daily consumption of tobacco, wine and spirits.
**IDENTIFICATION CARDS:** Required.
**CONSULS:** France and Italy are represented locally.
**REPAIRS:** All types of engine and hull repairs can be effected for smaller vessels.
**REPATRIATION:** All facilities available.
**AIRPORT:** Situated 1 km. from the city. 3 daily flights to Malaga, except on Sundays.
**TIME:** GMT plus one hour in Winter. GMT plus two hours in Summer.
**HOLIDAYS:** 1st January, 6th January, 19th March, Maundy Thursday, Good Friday, 1st May, Ascension Day, Corpus Christi, 29th June, 17th July, 18th July, 25th July, 15th August, 12th October, 1st November, 8th December, Christmas Day. Work may be arranged on all holidays except Good Friday.
**POLICE/FIRE/AMBULANCE:** Police, tel. 1741 or 1744; Fire, tel. 1693; Ambulance, tel. 1441.
**TELEPHONES:** It is possible to arrange for a telephone to be placed on board.
**SHORE LEAVE:** Allowed.
**AUTHORITY:** Ingeniero Director del Puerto, Calle General Garcia Valino, 2. Tel 2396.

**AGENT:** Jose Salama & Co., BP 5, Melilla.

## MOHAMMEDIA: 33.45 N. 07.22 W.

**DOCUMENTS:**
Bill of Health.
3 Crew Lists.
3 Passenger Lists.
3 Provisions Lists.
Manifests and Ship's Papers for Agent.
**PILOTAGE:** Compulsory for vessels entering or leaving the harbour or shifting berth. Pilot available for vessels arriving during night and wishing enter the basin when conditions are possible.
**ANCHORAGE:** Three good anchorages in depths of 11 to 6½ fathoms about a mile N.E. of the entrance, and N.W. and S.E. of the pipe-line area.
**RESTRICTIONS:** Vessels with a draft over 15 ft. wishing to berth in the basin, are obliged to wait for tide.
**MAX. SIZE:** Sea line installation: tankers up to 45,000 tons dwt.

Imodco Buoy Berth: tankers up to 100 000 tons dwt.

For the basin: max. length 150 metres, max. draft 6·9 m. (22 ft. 8 in.)
**HEALTH:** Port sanitary control officer boards immediately after arrival for pratique delivery. In the event of any suspected disease or fever on board, it is necessary to advise by radio to Agent 24 hours before arrival. Pratique is automatic after calling at another port of Morocco.
**RADIO:** Casablanca radio station.
**TUGS:** There are no tugs but three pilot boats of 150 h.p. will assist vessels if necessary, or tugs can be ordered from Casablanca.
**BERTHING:** Vessels up to 150 metres in length and drawing up to 6·9 m. (22 ft. 8 in.) at Spring tides and 5·4 m. (18 ft.) at Neaps.

Quay No. 1 has a length of 70 metres with a depth of 8·50 m. (28 ft. alongside).

Quay No. 2 has a length of 170 metres with a depth of 5·50 m. (18 ft. alongside).

Quay No. 6 has a length of 60 metres with a depth of 6·00 m. (19 ft. 8 in. alongside).
**TANKER BERTHS:** Single buoy mooring located in position 33° 44′ 01″ North, 7° 23′ 02″ West in depth of water 70 ft. Diameter of swinging area: 850 metres. The buoy is marked by a white light flashing once every three seconds, also equipped with radar reflector and fog horn, which sounds once every twenty seconds.

Vessels may be berthed by day or night. Mooring is affected by two floating nylon ropes, each 40 metres long, made fast to the fore end of the vessel.

The buoy is connected to a floating crude oil line, 20 in. diameter, with two flexible hoses of 16 in. diameter. One flexible hose of 8 in. diameter is available for discharging refined products. There are no facilities for discharge of slops or dirty ballast.

There is also a conventional buoy berth, in depth of 50 ft. Diameter of discharge lines 14 in. No slop discharge facilities.

Smaller tankers may also berth at harbour quay No. 1.
**STEVEDORES:** The loading and discharging capacity of general cargo or timber is 300 tons per day. Gangs are arranged by the stevedore according to the cargo plan given by the consignee to the harbour authorities.
**MEDICAL:** There is the hospital in Mohammedia, and other hospitals and clinics in Casablanca (16 miles away). Vaccinations can be arranged.
**DENSITY:** 1025.
**FRESH WATER:** Water can be supplied at any time alongside the quays at the rate of 15 tons per hour. There is no fresh-water supply to the offshore tanker terminals.
**FUEL:** Available from Casablanca at 48 hours notice.
**FIRE PRECAUTIONS:** All tankers are confined by gates and watched over by special firemen.
**GANGWAY/DECK WATCHMEN:** Services of watchmen are recommended.
**OPENING/CLOSING HATCHES:** This work is normally carried out by crew. When carried out by stevedores the cost is charged.
**IDENTIFICATION CARDS:** Passport required and police permit for leaving the harbour.
**CONSULS:** There is no consul in Mohammedia. All are in Casablanca.
**AIRPORT:** The nearest airport for international flights is Nouasseur. Casablanca Airport operates internal flights only.
**TIME:** GMT in Winter. GMT plus one hour in Summer.
**HOLIDAYS:** 1st January; 1st May; 3rd March; 18th November; and any other religious holidays which are not at regular dates. Only on two days (1st January and 1st May) no cargo work can be arranged.
**POLICE/AMBULANCE/FIRE:** Police, 21.51; Ambulance/Fire, 15.
**SHORE LEAVE:** Allowed.
**DEVELOPMENTS:** A new refinery is to be built at Mohammedia and is due to start production in 1976.
**AUTHORITY:** RAPC, Port de Mohammedia, Maroc. Tel. 23.32 at Mohammedia.

**AGENT:** Marbar S.A., BP 169, 81 Ave. Houmane, Elfatouaki, Casablanca. Tel. 2607–21. Telex: 21 011, 21 012. Cables: "Barimer Casablanca".

## SAFI: 32.19 N. 09.12 W.

**DOCUMENTS:** Clearance procedure is very simple. 3 Crew Lists, 1 Personal Effects List, 3 Passenger Lists and 1 Stores List only are required. Other documents are presented on berthing.
**PILOTAGE:** Arranged by vessel's Agent, to whom a correct ETA should be given. There is VHF radio contact with the pilot station and Harbour Master's office. The pilot boat is located inside the harbour and the Pilot boards in the anchorage. Pilot ladder only is required.
**ANCHORAGE:** Recommended anchorage is S.W. of harbour entrance. Safe holding ground for 25,000 dwt. vessels. Vessels should keep port entrance clear.
**MAX. SIZE:** Vessels with a draft of more than 28 ft. and up to a maximum of 30 ft. enter and sail at high water.
**HEALTH:** Health Officer boards shortly after berthing but Agent must be advised before arrival if suspected disease or fever on board. Health clearance in one Moroccan port holds good for the next.
**RADIO:** Casablanca Radio for normal traffic or Safi Radio for local R/T traffic. Harbour Radio VHF channel 16.
**TUGS:** Tugs stand by vessel inside breakwater and, usually, ship's lines are used.
**BERTHING:** Vessels berth in order of arrival. Port used for export of manganese and barytes. No night entry after 1900.
**STEVEDORES:** Gangs are arranged by vessel's Agent. Night work is possible from 1800 to 2200 hrs. and, very exceptionally, until 2400 hrs.
**MEDICAL:** Advanced notice of required medical attendance is advisable but not essential. Modern hospital and clinic are available. Smallpox vaccination only is necessary except when vessels have called at cholera and yellow fever ports.
**TANKERS:** Only small tankers use this port. White products and gas oil imported; no export. Ammoniac tanker berth maximum draft high water 30 ft.
**DENSITY:** Density varies between 1024 and 1026.
**FRESH WATER:** Availability not limited, by hoses from quay.
**FUEL:** Limited supplies gas oil; diesel available but must be stemmed. Fuel oil and large quantities diesel, gas oil can be delivered by tanking lorry from Casablanca.
**GANGWAY/DECK WATCHMEN:** Watchmen necessary. One watchman day and night.
**OPENING/CLOSING HATCHES:** Normally done by crew but can be arranged by stevedores with advance notice.
**CUSTOMS ALLOWANCES:** 200 cigarettes, and one open bottle of spirits allowed each man. Bond is sealed and heavy fines are imposed by Customs for smuggling.
**IDENTIFICATION CARDS:** These are needed.
**CONSULS:**

| | | | |
|---|---|---|---|
| Denmark, | Tel. 30.39 | Portugal, | Tel. 23.58 |
| Finland | ,, 31.40 | San Salvador, | ,, 28.76 |
| France, | ,, 27.97 | Sweden, | ,, 29.06 |

**REPAIRS:** Major repairs not possible; small workshops only for repairing fishing boats.
**REPATRIATION:** Repatriation by air or sea through Casablanca, 150 miles away.
**AIRPORT:** Nearest at Novasseur, served by principal European airlines.
**TIME:** Local time is GMT in Winter and GMT plus one hour in Summer.
**HOLIDAYS:** On the following holidays no work is possible: 1st January (New Year's Day); 3rd March (Coronation Day); 1st May (Labour Day); 18th November (Independence Day). Other Moslem and Christian holidays are subject to last minute decisions as far as tariff is concerned, but work can be arranged.
**TELEPHONES:** No telephones can be placed on board. Public telephone available on the quay during working hours only.
**GENERAL:** Masters are strongly advised to take local currency from their Agent. Landing of foreign currency encourages black market transactions and incurs confiscation and heavy fines as well as delays by the Customs authorities.
**SHORE LEAVE:** Police permits are required by Liberty men and are delivered by Immigration Authorities.
**AUTHORITY:** Capitainerie de Port, Safi. Tel. 27 33 and 27 42.

**AGENT:** Marbar S.A. Branch Office of Marbar, Casablanca.

## TANGIER: 35.47 N. 05.48 W. (See Plan)

**PORT LIMITS:** Vessels considered to be an "arrived ship" subject to Charter Party terms, on passing the line joining Pointe de Malabata, 35° 48′ 53″ N. 05° 45′ 00″ W. and the mouth of l'Oued el Youd, 35° 47′ 26″ N. 05° 50′ 00″ W.
**DOCUMENTS:** Required on arrival:
Health Declaration.
2 Crew Lists.
7 Cargo Manifests.
5 Lists of Passengers Disembarking.
4 Lists of Passengers in Transit.
Required on departure:
5 Cargo Manifests.

CRS. Agents radio ships through same station. Naval Radio Station–call sign CRX 3 – available for distress signals.

**TUGS:** Join incoming vessels at inner anchorage, about 1 mile distant from quays. Ship's lines used. Four tugs available, up to 3,200 h.p.

**BERTHING:** No night berthing done unless with prior consent of Chief Pilot, otherwise no specific requirements.

Cais do Pungue: length, 1,679 m.; depth, max. 17 m., min. 10 m.

LW depths alongside wharf, berth nos. 1, 2 and 3, 27 ft.

| | | | |
|---|---|---|---|
| ,, | ,, | 6 and 7 | 25 ft. |
| ,, | ,, | 4 and 8 | 26 ft. |
| ,, | ,, | 5 | 29 ft. |
| ,, | ,, | 9 | 28 ft. |
| ,, | ,, | 10 | 30 ft. |

Chiveve Cais: length, 446 m.; depth, max. 10 m., min. 3 m.

**CARGO-HANDLING FACILITIES:** There is a mechanical ore appliance used mainly for minerals like chrome, etc. This appliance has an average loading rate of 400 tons per hour. It is equipped with only one spout.

*Mobile Cranes:* 25 cranes with capacity 1–10 tons.

*Electric Cranes:* 52 cranes at Pungoe Wharf with capacity 3–20 tons.

*Steam Cranes:* 19 cranes at Chiveve Wharf with capacity 3–20 tons.

*Molasses:* Two storage tanks, capacity 18,000 tons and 8,000 tons.

**STEVEDORES:** Ordered by Agent. Vessels should advise Agent their ETA at least 12 hours in advance (weekdays), 24 hours in advance (week-ends).

**MEDICAL:** No advance notice required for medical attention, unless urgent assistance necessary. Hospital facilities available. Crew members and passengers should be in possession of valid smallpox and yellow fever certificates (cholera certificate too if from cholera area) on international forms. Vaccination/fever inoculations and certificates may be obtained ashore if required.

**TANKERS:** Discharge lines white and black oils, 2×10-in. lines feeding into 12 and 14-in. lines leading to storage tanks. Also a 22-in. discharge line for crude oil. No slop discharge facilities. Two tanker berths, maximum permitted drafts about 32 ft.

**DENSITY:** In harbour area allow 3 to 4 in.

**FRESH WATER:** Available at all berths, pumping rate about 50 tons per hour. Also available from water barge.

**FUEL:** Fuel oil 1,000′ viscosity, marine diesel 43·1′, diesel 34·1′. 3–4 days advance notice required. Bunkers delivered when alongside, no bunkering barge available.

**GANGWAY/DECK WATCHMEN:** Compulsory to employ watchmen to prevent pilferage.

**OPENING/CLOSING HATCHES:** Can be done by either crew or stevedores. Often done by crew.

**SHIP CERTIFICATES:** Tonnage Certificate to be produced to Pilot, as certain port dues are based on vessel's registered tonnage.

**CARGO GEAR:** All gear supplied by stevedores except rope slings, rain tents, and spreaders for heavy lifts.

**IDENTIFICATION CARDS:** Required. Passport if possible, otherwise Seamen's Book.

**CONSULS:** British (Tel. 22032), Belgium (23284), France (24074), Greece (23898), Holland (23174), Italy (22197), Malawi (24312), Norway and Denmark (22091), Panama (271519), Rhodesia (24227), Swiss (23137), South Africa (271251).

**REPAIRS:** Most types of deck and engine repairs are possible, but major repair jobs are not undertaken.

**DRY DOCKS:** One dry dock 115×17×8·5 metres, suitable for ships up to 5,000 tons.

**REPATRIATION:** Facilities exist for nationals of those countries maintaining diplomatic relations with Portugal. A valid passport is necessary as immigration authorities do not recognise a Seamen's Book as being a valid travel document.

**AIRPORT:** Beira Airport situated 7 miles from sea port. Regular flights to all destinations.

**TIME:** Local time 2 hours ahead of GMT. No alterations made to clocks during year.

**HOLIDAYS:** New Year's Day (1st January); National Day of Portugal (10th June); Corpus Christi (variable date); Assumption (15th August); Beira City Holiday (20th August); Republic Day (5th October); All Saints' Day (1st November); Restoration of Republic (1st December); Immaculate Conception (8th December); Christmas Day (25th December). No cargo work on 1st January and 25th December; on other holidays work continues normally in the port.

**POLICE/AMBULANCE/FIRE:** Port Police (Tel. 22920); Ambulance (22442); Fire (22222).

**TELEPHONES:** Can be placed on board. These telephones must only be used for local calls, not trunk calls.

**GENERAL:** Beira port works 24 hours per day, 7 days a week (except 1st January and 25th December) and overtime working is compulsory.

**SERVICES:** Services available for tank cleaning, compass adjusting, minor repairs to radar and radio.

**SHORE LEAVE:** Crew members are allowed ashore, excepting nationals of those countries not maintaining diplomatic relations with Portugal.

**DELAYS:** Generally no delays, but sometimes 24–48 hours delay following rain or bunching of arrivals.

**AGENT:** Allen, Wack & Shepherd, Lda., PO Boxes 270, 280 and 290, Beira, Mozambique. Tel. 22091 (5 lines). Cables "Thaine" or "Allenwack". Telex: 7332 Thain Mo.

Activities: Steamship Agents, Clearing and Forwarding Agents, Travel Agents, Bonded Warehousemen. Insurance Agents.

## LOURENCO MARQUES: 25.59 S. 32.36 E.

**DOCUMENTS:**

6 Crew Lists.
1 Stores List.
6 Passenger Lists.
Last Port Customs and Port Clearance.
1 List of Ports of Call.
1 Health Declaration (given by Pilots on arrival).
1 Entrance Report (given by Pilot on arrival).
1 Customs Entrance (given by Agent on arrival).
1 Railway Statistics Form (given by Agent on arrival).

**PILOTAGE:** Compulsory. Channels in 24-hour use, but sailing after 2400 only by special arrangement with Immigration. Berthing only during day-light. Pilot station about 26 miles from Lourenco Marques wharf if South entrance used; 55 miles if North entrance used.

Pilot granted only if 16 hours' notice of ETA given.

On arrival vessels can contact Pilot on VHF Channel 16 (working on Channel 12).

The pilot ladder is used together with the accommodation ladder in order that the Pilot has a climb of 9 ft. on the pilot ladder.

**IMMIGRATION CLEARANCE:** Inwards: 0600–1800 only inside harbour proper. Outwards: 0600–2400 except in special circumstances.

N.B. Vessels at the pilot station cannot obtain pratique because this includes Immigration clearance and can therefore be considered as not having arrived or not being in all respects ready to load.

**ANCHORAGE:** Inside harbour: One each for vessels drawing 33, 31, 27 and 26 ft. respectively. Six for vessels between 17 and 19 ft. Vessels delayed in berthing are brought in from pilot station at port's convenience.

**RESTRICTIONS:** Berthing during day-light only. Unberthing 0600 hrs. to 2400 hrs. with exceptions of Matola piers where ships can only unberth during day-light. Ships over 650 ft. may not pass through dredged channels at night. Ships up to 23 ft. may sail at any time, any tide up till midnight. Thereafter arrangements to be made with the Pilot Department for ETD.

**MAX. SIZE:**

| | | | | |
|---|---|---|---|---|
| General Cargo Wharf | Length | 750 ft. | Draft | 34 ft.–37 ft.* |
| Matola Oil Pier | ,, | 750 ft. | ,, | 32 ft. 6 in. |
| Matola Ore Appliance | ,, | 820 ft. | ,, | 34 ft.–37 ft.* |

* Maximum drafts published by Port Authorities. Approximately 34 ft. to 37 ft. depending on tide.

**HEALTH:** Pratique granted by Pilot unless disease prevalent on board when Masters should telegraph "Saude" Lourenco Marques.

**RADIO:** Advice of arrival 16 hours before to the Port Captain or Chief Pilot and Port Health should be sent through the station CRX (Naval), operating 24 hours on 500 kc/s., replying on 437 kc/s., also 2000 to 0500 hours GMT on 8356 to 8376 kc/s. (replying 3642 kc/s.) and 0800 to 2000 GMT on 12534 and 12564 kc/s. (replying 1299 kc/s.). All other non-official messages through station CRL, operating 0200–1800 GMT on 6 Mc/s. at even hours, 0400 to 1800 GMT on 4 Mc/s. at even hours plus 30 minutes (answering on 4259 kc/s.). Continues watch 0200–0400 GMT on 4 Mc/s. Radio telephone through CRL on 2132 kc/s. at even hours plus 45 minutes 0600–1700 GMT answering on 4415 kc/s.

**VHF:** Pilot boat (Inhaca Station) and port radio operate on Channel 16 (calling) and Channel 12 (working) from 0530 to 1830 hours.

**TUGS:** Four tugs available, 3,200 hp, 3,200 hp, 1,500 hp and 1,200 hp.

**BERTHING:** Carried out at all times except between 0000–0600 at the Main wharves. At Matola Ore berth vessels must berth only at permissible times according to tides.

Main Wharf: All facilities owned and operated by Caminhos de Ferro de Mocambique (CFM), belonging to the Portuguese Government, except stevedoring.

Dimensions: Wharf is in one uninterrupted line running roughly N.E./S.W., accommodating 12–15 vessels. Length: 3,033 metres.

For loading or discharging bulk grain there are two Buhler machines at a berth with 33 ft. depth of water LWOST. About 120 tons per hour. A recent vessel averaged 2,900 tons per day. For loading bulk sugar, there is a spout installation at the last berth on the wharf 40 ft. LWOST. Theoretical rate 750 tons per hour. Recent example 12,400 tons in 29 hours. For coal there is a fixed mechanical installation with adjustable chute and capstans for warping ships. Depth about 24 ft. LWOST. Maximum height of chute above wharf 6·20 metres minimum 3·80 metres, maximum length of vessel 600 ft. Theoretical rate 800 tons per hour, actual average 300 tons depending on trimming required. Maximum permissible draft 28 ft.

*Depths alongside:*

| | | |
|---|---|---|
| Berth | A | 30 ft. |
| ,, | B | 32 ft. |
| ,, | C | 30 ft. |
| ,, | D | 31 ft. |
| ,, | D3 | 31 ft. |
| Coal Tip | | 33 ft. |
| Berth | Frigo | 30 ft. |
| ,, | G | 33 ft. |
| ,, | H | 33 ft. |
| Wharf extension | | 40 ft. |

*Coal Mechanical Installation:* depth about 33 ft. LWOST. Maximum height of chute above wharf 7·80 metres, minimum 4.80 metres; maximum permissible draft 33 ft.

*LPG Carriers:* berth at Matola Ore Berth.

**CRANES:** *Electric cranes:* 70 units with capacity 3 to 80 tons. *Mobile cranes:* 43 units with capacity 2 to 12 tons.

**STORAGE CAPACITIES:**
*Ore and Coal dumps:* Gorjao Wharf.

| | *tons* |
|---|---|
| Coal | 96,000 |
| Ores | 600,000 |
| Copper | 40,000 |
| Vermiculite | 4,000 |
| Steel, Beams and Billets | 46,000 |
| Vanadium | 7,000 |

*Oil:* Storage capacity 200,000 tons.
*Molasses:* Four tanks, capacities 6,000, 9,000, 11,000 and 7,000 tons.
*Fruit:* 7,500 tons (1·133 cu. m./ton) in 100 chambers.
*Fish:* 200 tons.
*Ore:* Matola. Capacity 1·3 million tons. Loading speed for iron ore 3,000 tph and chrome ore 2,400 tph.
*Sugar:* Storage capacity 80,000 tons. Loading speed 750 tph. Unloading speed 320 tph. See also "Berthing".
*Containers:* Terminal under construction.

**TANKERS:** Matola Mineral Wharf, 40 ft. LWOST, maximum length of vessel 820 ft. Matola Oil Jetty, 32 ft. 6 in. LWOST, maximum length of vessel 750 ft.

**FRESH WATER:** Available at all berths, Not available ex-barge.

**FUEL:** Vessels can be supplied from pipe-lines whilst working at all berths, including the Matola Appliance and Tanker Jetty, but excluding the new wharf extension, where pipes have been laid but the system is not yet ready for delivering bunkers. The rate of delivery varies between 300 to 500 tons per hour depending on the type of vessel taking bunkers. At present, supplies of gas oil and marine diesel oil are not in very plentiful supply, recommended to stem as far in advance as possible.

**MEDICAL:** No advance notice required for medical attention, unless urgent assistance necessary. Hospital facilities available. Crew members and passengers should be in possession of valid smallpox and yellow fever certificates (cholera certificate too if cholera area) on international forms. Vaccination/fever inoculations and certificates may be obtained ashore if required. Men for sick parade must first go through the port doctor whose hours are week-days 0800–1130 and 1400–1730; Saturdays 1000–1130, but always available on an emergency call.

**REPAIRS:** No dry dock except for small coasters. Facilities for most normal work, except underwater riveting, cutting and welding, and shaft balancing.

**DEVELOPMENTS:** Administration are considering the construction of a deep-sea port on the coast between Inhaca Island and the Natal border. This port will be mainly used by coal and iron-ore carriers and have a capacity of approximately 6 million tons per annum. Should this project materialise, the port will be operational by 1978.

**CONSULS:**

| | | |
|---|---|---|
| U.S.A. | Sweden | Rhodesia |
| U.K. | Switzerland | Brazil |
| France | Italy | Germany |
| Norway | South Africa | Spain |

**IDENTIFICATION CARDS:** Crew and passengers are issued with Immigration Boarding Permits and they must be carried at all times. (Such permits to be returned to Immigration Officer prior to sailing.)

**WATCHMEN:** Strongly recommend employing services of a local watchman, who will also control visitors and labour passes.

**OPENING/CLOSING HATCHES:** Can be done by either crew or stevedores. Often done by crew.

**CERTIFICATES:** Tonnage Certificate to be produced to Pilot, as certain port dues are based on vessel's registered tonnage.

**REPATRIATION:** Facilities exist for nationals of those countries maintaining diplomatic relations with Portugal. A valid passport is necessary as immigration authorities do not recognise a Seaman's Book as being a valid travel document.

**AIRPORT:** About 5 miles from centre of town.

**CUSTOMS ALLOWANCES:** Bonded stores are usually not sealed.

**HOLIDAYS:** New Year's Day (1st January); National Day of Portugal (10th June); Corpus Christi (variable date); City Day (24th July); Assumption (15th August); Republic Day (5th October); All Saints' Day (1st November); Restoration of Independence (1st December); Immaculate Conception (8th December); Christmas Day (25th December). No cargo work on 1st January and 25th December, on other holidays, work continues normally in the port.

**TIME:** Local time 2 hours ahead of GMT. No alterations made to clocks during the year.

**SHORE LEAVE:** Crew members are allowed ashore, excepting nationals of those countries not maintaining diplomatic relations with Portugal.

**TELEPHONES:** A telephone will be placed on board the vessel.

**GENERAL:** Crew and passengers not to take photographs in the dock area. Permission through Agent required to lower any boats or gear overside into the water or on to the wharf.

Do not immobilize main engines or carry out engine trials at the wharf until permission has been obtained by the Agent as the Authorities require vessels to maintain sufficient steam for main engines to be used at 2 hours notice.

Customs guards to be supplied with meals and accommodation whilst at inner anchorage and alongside the LM wharf otherwise cost per guard will have to be paid by Agent on Owner's behalf.

**AUTHORITY:** Capitania do Porto de Lourenco Marques.

**AGENTS:** Rennies' Consolidated (LM) Lda., Avenida 18 de Mayo 36, POB 351 or 292. Tel. 3021. Cables: "Reniform Lourenco Marques".

## MOZAMBIQUE: 14.58 S. 40.45 E.

**DOCUMENTS:**
Customs Clearance from last port.
Port Clearance if last port was Portuguese.
Health Certificate.
6 Crew Lists.
6 Passenger Lists in Transit.
7 Passenger Lists Disembarking.
2 Stores Lists.
2 Lists Deck Stores.
2 Lists Cargo in Transit (main items of cargo only).
6 copies of Manifest of Mozambique Cargo.

**PILOTAGE:** One Pilot available, 24 hours. Pilot boat is black grey, with two flags on the mast (Portuguese flag and a blue with a white "P"), and at night, with conventional lights. Ships Pilot near buoy No. 2 (Red Buoy) placed off Goa Island. At ships should send Morse signals with Aldis lamp to the midd Mozambique Island (location of Port Office). ETA should be as soon as possible to Pilot station off Mozambique Island and to ship's Agent.

**ANCHORAGES:** When waiting for Pilot, or in reason of draft (more than 30 ft.) ships may drop anchor off red buoy N (½ mile seawards). Depths between 60 and 90 ft. Bottom with and some broken coral; current from North to South, someti up to 4 knots.

**MAX. SIZE:** Only ships with drafts less than 30 ft. can cross bar and enter the Port.

**HEALTH:** Quarantine flag should be flown, even after calling other ports in this country. Health Certificate given by Pilot.

**RADIO:** Radio Mozambique call sign CRQ. Also available Louren Marques or Beira Radio Stations.

**TUGS:** Tugs are not necessary in this port.

**BERTHING:** No quay berths. Vessels work cargo at anchor.

**STEVEDORES:** All requirements on this purpose must be to the Agent.

**MEDICAL:** Medical assistance can be given at any time, to vessels unable to cross the bar because of draft. Hospital adequate facilities, and emergency services available.

**FRESH WATER:** Always available in any quantity. Supplied barge of 40 tons capacity.

**FUEL:** Small quantities available.

**OPENING/CLOSING HATCHES:** By stevedores.

**CARGO GEAR:** Vessels anchor in bay and load and dischar by lighters and barges.

**IDENTIFICATION CARDS:** Required.

**CONSULS:** No local representatives.

**REPAIRS:** Light repairs can be effected.

**REPATRIATION:** All facilities available.

**AIRPORT:** Situated about 7 km. from Mozambique. Connectio to Beira and Lourenco Marques every day.

**HOLIDAYS:** 1st January; 2nd March; 1st and 10th June; 1 August; 5th October; 1st November; 1st December; 8th Decemb 25th December. Cargo handling can be arranged on these days.

**POLICE/AMBULANCE/FIRE:** Maritime Police, Customs Agents will always be on board during stay.

**TELEPHONES:** No telephones, but walkie-talkies are availab arrange with Agent.

**AUTHORITY:** Capitania do Porto de Mocambique. Tel. 22 and Cables "Capitaniamar Mocambique".

**AGENT:** Companhia Comercial Joao Ferreira dos Santos, SAR Caixa Postal No. 1, Moçambique. Cables "Jorreirantos Moçam que".

## NACALA: 14.32 S. 40.37 E.

**PORT LIMITS:** The line joining Ilha Gomen to Cabo Columulo Light at the entrance of Bay of Fernao Veloso.

**DOCUMENTS:**
Customs Clearance from last port.
Port Clearance if last port was Portuguese.
Health Certificate.
6 Crew Lists.
6 Lists Passengers in Transit.
7 Lists Passengers Disembarking.
2 Stores Lists.
2 Lists Deck Stores.
2 Lists Cargo in Transit (main items of cargo only)
6 copies of Manifests of Nacala Cargo.
2 Lists of Dangerous Cargo.

**PILOTAGE:** Permanent and compulsory for entering harbo Pilot boat situated at harbour entrance.

**ANCHORAGE:** Fine natural harbour. Entrance half a mile w depths up to 60 metres. Good anchorage for any size vessel. Sa and mud bottom.

**MAX. SIZE:** For anchoring, no restrictions. For berthing, up 31 ft. draft.

**RADIO:** Radio Naval Nacala operates permanently on 2182 kHz

**HEALTH:** Vessels to radio "Senidade Maritima", their ETA a "All Well" (or otherwise) even when coming from another Port guese port. If "All Well", Health Certificate given by Pilot.

**TUGS:** None available and not required.

**BERTHING:**

| | Length (m.) | Depth (m.) |
|---|---|---|
| New Wharf | 312 | 10·00 |
| " " | 111 | 7·50 |
| Wooden Jetty | 70 | 4·50 |

Also see "Developments".

**CRANES:** 12 Electric cranes with capacity 1 to 20 tons. 1 Floating crane with capacity of 25 tons. 16 Mobile cranes with capacity 2 to 7 tons.

**STEVEDORES:** Working hours 0700 to 1100, 1300 to 1700, 1900 to 0600. Two local stevedoring firms.

**FRESH WATER:** Available from hydrants on the quay.

**FUEL:** Available from connections on the quay.

**MEDICAL:** No advance notice required for medical attention, unless urgent assistance necessary. Hospital facilities available. Crew members and passengers should be in possession of valid smallpox and yellow-fever certificates (cholera certificate too if from cholera area) on international forms. Vaccination/fever inoculations and certificates may be obtained ashore if required.

**GANGWAY/DECK WATCHMEN:** Recommended to employ watchmen to prevent pilferage, but not compulsory.

**OPENING/CLOSING HATCHES:** Can be done by either crew or stevedores. Often done by crew.

**CERTIFICATES:** Tonnage Certificate to be produced to Pilot, as certain port dues are based on vessel's registered tonnage.

**REPATRIATION:** Facilities exist for nationals of those countries maintaining diplomatic relations with Portugal. A valid passport is necessary as immigration authorities do not recognise a Seaman's Book as being a valid travel document.

**TIME:** Local time 2 hours ahead of GMT. No alterations made to clocks during year.

**SHORE LEAVE:** Crew members are allowed ashore, excepting nationals of those countries not maintaining diplomatic relations with Portugal.

**HOLIDAYS:** New Year's Day (1st January); National Day of Portugal (10th June); Corpus Christi (variable date); Assumption (15th August); Nacala City Holiday (16th September); Republic Day (5th October); All Saints' Day (1st November); Restoration of Republic (1st December); Immaculate Conception (8th December); Christmas Day (25th December). No cargo work on 1st January and 25th December; on other holidays work continues normally in the port.

**DEVELOPMENTS:** Pier under construction, length 195 m., depth 8 m., ready 1974. One other pier under construction, length 408 m., depth 15 m. ready early 1975.

**AUTHORITY:** Capitão do Porto de Nacala.

**AGENT:** Companhia Transitaria Joao Ferreira dos Santos POB 45 Nacala. Cables: "Transan-Nacala".

### PORTO AMELIA: 13.00 S. 40.28 E.

**DOCUMENTS:**
- 6 Crew Lists.
- 6 Lists of Passengers Disembarking.
- 6 Lists of Passengers in Transit.
- 1 Master's Declaration.
- 1 Stores and Provisions List.
- 1 Health Declaration.
- 5 Sets Cargo Manifests.
- 2 Sets non-negotiable Bills of Lading.
- Clearance Documents from last port.

**PILOTAGE:** It is necessary to order by radio request to Agent 14 hours before arrival.

**ANCHORAGE:** Vessels may anchor South of the dock about 300 metres off. Other suitable anchorages will be indicated by the Pilot.

**RESTRICTIONS:** Vessels may enter with Pilot at any hour day or night.

**MAX. SIZE:** Draft up to 27 ft. 6 in. for berthing.

**HEALTH:** In case of contagious disease on board, the port Health Authorities must be advised in advance.

**RADIO:** Send messages through Beira Radio.

**TUGS:** None available.

**BERTHING:** One berth, length 182 metres, depth alongside 28 ft.

**STEVEDORES:** In ETA message to Agent, indicate number of gangs required and advise quantity and description of cargo for discharge.

**MEDICAL:** In case of urgency advise Agent by radio before arrival. Hospital facilities available. Vaccinations can be performed.

**FRESH WATER:** Available.

**FUEL:** Available.

**GANGWAY/DECK WATCHMEN:** Not necessary as there is a permanent guard on board.

**OPENING/CLOSING HATCHES:** Performed by stevedores.

**CUSTOMS ALLOWANCES:** Bond is not sealed and no restrictions made.

**IDENTIFICATION CARDS:** Required by police.

**CONSULS:** Only Germany is represented locally.

**REPAIRS:** Facilities available.

**REPATRIATION:** Can be arranged.

**AIRPORT:** Situated 7 km. away. Flights to Beira and Lourenco Marques daily.

**TIME:** GMT plus 2 hours. No alterations during the year.

**HOLIDAYS:** No work performed from 1700 Christmas Eve until 0600 on 26th December; no work performed from 1700 New Year's Eve until 0600 on 2nd January. Work may be arranged on the following holidays: 10th June, 15th August, 5th October, 1st November, 1st December, 8th December.

**POLICE/FIRE/AMBULANCE:** Police, tel. 2828; Hospital, tel. 2211.

**SHORE LEAVE:** Allowed. Except for nationals of countries not maintaining diplomatic relations with Portugal.

**AUTHORITY:** Capitao do Porto de Porto Amelia.

**AGENT:** Companhia Comercial Joao Ferreira dos Santos, SARL, POB 13, Porto Amelia. Cables: "Jorreirantos-Porto Amelia".

## Nauru Island

### NAURU: 00.32 S. 166.56 E.

**DOCUMENTS:**
- International Declaration of Health, 1 copy.
- Clearance from last port.
- Crew Lists, 2 copies.
- Passenger Lists, if any, 2 copies.
- Manifest, 1 copy.

**PILOTAGE:** Pilotage is available on request without charge; Masters are advised to avail themselves of this service. It is necessary that Masters, through Radio Nauru, inform telegraphic address Nauruphos Nauru of ETA 48 hours before arrival, confirming or altering this 12 hours before arrival. Nauruphos will reply through Radio Nauru on receipt of second message giving time for the vessel to close in to half mile West of loading plants, where pilot will board. In case of adverse weather or congestion, Masters will be notified by radio, or by VHF Channel 16, 156·8 Mc/s with range of about 40 miles. Vessels are handled inwards in daylight only, and should fly flag when approaching island. A safe and clean pilot ladder should be provided, a good lee made for the pilot to embark.

**ANCHORAGES:** No anchorages are available owing to the extreme depths of water. Vessels waiting normally drift off and return at daybreak or when instructed to do so.

**RESTRICTIONS:** Tide and draft have no bearing on entry but it is normal not to handle vessels into berth in darkness. However, vessels are unmoored at all hours.

**MAX. SIZE:** Vessels have been handled up to an overall length of 630 ft. Beam should not exceed 90 ft., but there are no draft limitations.

**HEALTH:** Masters of vessels approaching Nauru are required to send a telegram addressed to the Quarantine Officer, Nauru within 24 hours of arrival. The telegram should state the name of last port, date, presence of any infectious disease. On receipt of telegram, the quarantine officer will send reply indicating whether or not pratique is granted. It is still necessary to fill out the International Declaration of Health and hand this to Boarding Officer after berthing.

**RADIO:** Nauru Radio station, call sign C2N. Should, through atmospheric conditions, difficulty be found in raising Nauru, it is suggested that the message be passed through Sydney or any other convenient coastal station. Port Radio VHF, calling Channel 16, working Channel 12, permanent service.

**TUGS:** No tugs available for berthing.

**BERTHING:** Such special requirements which relate to berthing in the port are contained in a Letter of Advice to Ship Masters issued by the BPC. Shore labour normally boards the vessel with the pilot to assist in mooring to the buoy system.

**STEVEDORES:** As stevedoring is carried out by Nauruphos, no separate advice is required. Loading rate of bulk phosphate is as high as 3,000 tons per hour.

**MEDICAL:** Medical treatment can be given on short notice. Limited hospital facilities are available, and emergency surgery can be carried out. Smallpox vaccination is required, and cholera if the vessel has come from an infected area.

**TANKERS:** Lengths and drafts as for bulk phosphate vessels. Eight inch discharge line to shore storage tanks.

**DENSITY:** Normal salt water all states of tide.

**FRESH WATER:** Island water is imported, and water will be supplied only in cases of emergency.

**FUEL:** Island stocks are imported for use in the phosphate industry, and only limited quantities of heavy fuel or diesel oil can be made available in cases of extreme urgency.

**WATCHMEN:** Not required.

**OPENING/CLOSING HATCHES:** Carried out by crew.

**SHIP CERTIFICATES:** Deratisation certificate only.

**CUSTOMS ALLOWANCE:** No restrictions apply.

**CARGO GEAR:** Cargo gear should be up to the standard demanded in Australian ports.

**CREW IDENTIFICATION CARDS:** Some form of identification, passport, discharge book, or identity card should be carried by crew members.

**CONSULS:** An Australian Representative is resident on the Island.

**REPAIRS:** The phosphate industry requires good workshop facilities of various kinds for maintenance of their own heavy plant and such workshops are kept busy at all times. Small repairs such as welding, brazing, lathe work, etc., can be carried out, but only when essential to allow the vessel to proceed on its voyage. Main engines cannot be immobilised whilst the vessel is moored to any section of the buoy system.

**REPATRIATION:** Repatriation can be arranged. No facilities for crew changes.

**AIRPORT:** Two weekly services operated by:

(1) Fiji Airways to Nauru via the Gilbert and Ellice Islands Group to Fiji.

(2) Air Nauru to and from Australia.

Air Nauru operates a fortnightly service from the Marshall Islands to Nauru.

**TIME:** Local time is GMT plus 11½ hours. No alterations during the year.

**HOLIDAYS:** Christmas Day, New Year's Day, and Good Friday are normally closed holidays. Other National holidays occur during the year but normally work carries on, on these days.

**POLICE/AMBULANCE/FIRE:** All emergencies are handled by the Harbour Masters, one of whom remains aboard the vessel throughout the time the vessel is attached to the mooring system.

**TELEPHONES:** Telephones are put aboard for the use of island staff working the vessel.

**SERVICES:** No special services available.

**SHORE LEAVE:** This may be granted at the discretion of the Master but should in all cases terminate at 1700.

**PORT REGULATIONS:** No vessel may immobilise main engines whilst moored to the buoy system. Main engines should be on instant readiness, deck power should be available at all times, and the vessel must proceed to sea when instructed to do so by the Harbour Master.

**DELAYS:** Normally no delays should be expected. Vessels could wait a day, or possibly two due to port congestion, but this seldom happens; delays can occur due to adverse weather, the duration of which is unpredictable.

**AUTHORITY:** The Harbour Master, appointed by The Nauru Phosphate Corporation, Nauru. Telegraphic address Nauruphos Nauru.

# Netherlands

## AMSTERDAM: 52.22 N. 4.54 E. (See Plan)

**PORT LIMITS:** Notices of Readiness will only be accepted (subject to C/P terms) if vessel has actually arrived at Amsterdam, which means that vessels have to enter from sea and pass the locks at Ijmuiden, proceeding through the North Sea Canal to Amsterdam. There are various buoys and quays available where vessels can be moored waiting for final discharging berth.

**DOCUMENTS:**

Health Certificate. Forms obtainable from sea pilot.

Crew List in triplicate.

2 copies of Crew Manifest for cigarettes, cigars, spirits, etc., belonging to crew.

Passenger List in triplicate.

1 copy of Manifest.

1 copy of Bills of Lading.

Dangerous Cargo List.

Ship's Register.

1 copy Stores List.

**PILOTAGE:** Pilotage is compulsory. A pilot vessel cruises at sea in the vicinity of Ijmuiden between the light whistle buoy and the moles.

In order to avoid delays, Masters who require a Pilot must advise their ETA not less than 4 hours in advance to "Pilotage Ijmuiden". This advice must be amended, if vessel's ETA changes more than 2 hours from the original advice.

The text of the message must contain: (*a*) the words "ETA-pilot", (*b*) expected time arrival (group of 4 figures) in middle European time, (*c*) draft with indication of unit applied, (*d*) port of destination.

"Pilotage Ijmuiden" can be informed via Scheveningen Radio or via VHF Channel 12. Pilotage and navigation is possible at night.

*Pilotage by Helicopter:* When the pilot service by pilot cutter has been suspended owing to weather conditions it is possible to take a Pilot on board vessels by helicopter. Helicopter pilotage is carried out for vessels which have an obstacle free hoisting area on deck of min. 15 ft. in diameter. Deck plans should be provided in advance.

Restrictions
1. Minimum visibility 800 metres at 150 ft. above sea level.
2. Maximum wind force 10 (55 kts).
3. Severe turbulence and icing conditions at or below 150 ft.

**ANCHORAGE:** Anchoring in Ijmuiden outer harbour, North Sea Canal and in harbour of Amsterdam is prohibited.

**RESTRICTIONS:** Entry possible at night. Official maximum draft is 43 ft. (salt water). By permission of Government Harbour Master at Ijmuiden it is possible to enter with maximum draft 45 ft. (s.w.). Such permission to be applied for at least 14 days prior to arrival.

**MAX. SIZE:** Vessels proceeding to Amsterdam have to pass locks at Ijmuiden, Dimensions of Northern lock (biggest): 1,312 ft. long, 164 ft. wide 49 ft. 2 in. deep.

**RADIO:** Cable Agents giving ETA draft, cash and other requirements via Scheveningen Radio/PCH.

**RADAR/VHF:** Harbour radar is installed at Ijmuiden. In bad visibility radar assistance will be given for incoming ships day and night. A radio portophone is provided by Pilot. Direct communication between incoming and outgoing ships and commanding post of locks is possible by means of VHF radio telephone, Channel 11. Government patrol boats are also equipped with VHF installations. The Radio-Radar Station (Redeplot) can also be contacted via VHF Channel 12 before approaching Ijmuiden.

**TUGS:** Sea-going tugs available between piers at Ijmuiden assisting vessels, into locks or outer harbour. Harbour tugs available in locks assisting vessels to Amsterdam. The rates include use of tug hawser.

**BERTHING:** Possible at night. If no berth available vessels may be moored on buoys.

**BRIDGES:** Vessels proceeding to Oil Harbour, Coen Harb Vlot Harbour and installations in Eastern part of port pass rai bridge over North Sea Canal at Zaandam. Notices indicating dista from bridge have been placed at 500 metres at either side and not to stop at 150 metres at West side and 225 metres at East side. W bridge closed Masters must stop their ships and must on no acco proceed unless signal is given that passage is allowed. Brid opened regularly in accordance with time-table of Netherla Railway.

**STEVEDORES:** In order to enable agents to order gangs in it is recommended to keep agents duly informed about ETA. No to stevedores necessary.

**MEDICAL:** If immediate medical assistance will be required in locks of Ijmuiden, Agents must receive advance notice.

**BULK HANDLING FACILITIES:** *Grain:* The Silo installatio IGMA at Vlothaven depth alongside 49 ft. 3 in. has main 1,200 ft. length to accommodate two vessels up to 80,000 tons Ships unloaded by four mobile pneumatic suckers, with capa 400 tons per hour, and three floating elevators. Daily discharge ca city about 17,000 tons.

On discharging side maximum gear height above water line On loading side maximum gear height above water line 36 ft.

*Ore, Coal, etc.:* NV Overslagbedrijf Amsterdam in West harb quay 2,600 ft. length, max. draft about 49 ft. 3 in.

Discharging rate of gear up to 60,000 tons per 24 hours. Load rate about 2,500 tons per hour.

Max. outreach of loading and discharging gear 137 ft.; max. he of loading discharging gear above water level 51 ft. Three high sp gantry cranes in use and a fourth to be constructed in 1975.

NV Havenbedrijf Rietlanden Quay length 2,500 ft. depth 3 Capacity about 8,000 tons per day.

*Phosphate:* Albatross Fertiliser Works Jetty, depth along 31 ft. Two grab cranes with daily capacity of 8,000 tons.

*Containers:* Length of quay 465 metres. Roll-on/roll-off be 140 metres, depth alongside quay 36 ft.

The berth is equipped with 2 gantry cranes with lifting capa of 50 tons and one multi-purpose crane with a capacity of 30 ton

A new roll-on/roll-off terminal will be in operation April 1975.

*Minerals:* Eggerding & Co. B.V. Length of quay 400 metres. De alongside 33 ft. Discharge is carried out by floating cranes.

**TANKERS:** *Mobil:* Two jetties, one for vessel of 30,000 tons another for vessel of 80,000 tons. Max. draft 44 ft. 6 in. pipe-line c nections 10 and 12 in.

One jetty for coast tankers or LPG tankers up to 2,500 tons.

The receiving rate for crude oil is 4,000 cu. metres/hour. T loading rate varies from 400–1,900 cu. metres/hour depending grade.

Fresh water available from jetty. Fuel available, pipe-line Facilities available for dirty ballast if vessel to load at berth. M capacity 10,000 tons.

*Amatex:* Five jetties, depth alongside 32–41 ft. Pipe-line conn tions 4 in. and 12 in.

Receiving rate, 400–1,200 t.p.h. depending on grade and b pressure, if any. The loading rate is about 1,000 t.p.h. depending grade.

Fresh water available by barge. Fuel available by barge or pi line. There are no facilities for dirty ballast.

*Comos:* Two jetties, depth alongside 42 ft. Pipe-line connectio 8 in. and 12 in. Four jetties available for seagoing vessels and barg up to a max. draft 14 ft. 9 in.

The receiving capacity is about 2,000 t.p.h. and loading rate up about 1,000 t.p.h.

Fresh water available by barge. Fuel available by barge or pipe-li There are no facilities for dirty ballast.

*Smid & Hollander:* One jetty for receiving crude oil, max. dr 36 ft. 2 in. Fresh water and fuel available by barge.

*Shell:* One jetty available for bunkering purposes. Max. draft 3

*Pakhoed:* One jetty, depth alongside 20 ft. Fresh water and f available by barge.

**DENSITY:** Amsterdam is not a tidal port. The water is brackish fresh.

**FRESH WATER:** Drinking and boiler water can be supplied barge, or if connection available, from shore. Price depends quantity ordered.

**FUEL:** All grades of fuel are available. Advance notice 48 hours

**FIRE PRECAUTIONS:** No repair work to be carried out to tank without permission of Harbour Authorities. Usual non-smok precautions, etc.

**GANGWAY/DECK WATCHMEN:** Not required. Dependent commodity of cargo.

**OPENING/CLOSING HATCHES:** Liner vessels by crew or stevedores, payable per man per hour. Tramp vessels as per Char Party.

**CERTIFICATES:**

Ship's Register.

Usual Cargo Certificate.

Safety Radio.

Safety Equipment Certificate.

Crew Roll.

All usual certificates required for navigation.

**CUSTOMS ALLOWANCES:** Tobacco: 200 cigarettes per man equivalent of tobacco or cigars. Wine and or Spirits: 5 litre of wi per man. Spirits: total 5 litre for the whole ship.

**CARGO GEAR:** Usual cargo gear certificate.

**IDENTIFICATION CARDS:** Not needed.

**CONSULS:** Nearly all countries have established consulates Amsterdam.

**REPAIRS:** All types of deck and engine repairs are possible including gas-freeing and tank-cleaning.
**DRY DOCKS:** NDSM: Four dry docks, largest of which length 817 ft. breadth 120 ft., depth 28 ft.

ADM: Five floating docks largest of which length 677 ft. breadth 97 ft. 6 in., lifting capacity 40,000 tons dwt.

Other floating docks available for vessels up to 4,500 tons.
**REPATRIATION:** Facilities for repatriation of crew to any destination are available.
**AIRPORT:** Distance to Schiphol Airport (served by regular airlines) 15 km.
**TIME:** GMT plus 1 hour. No alterations during the year.
**HOLIDAYS:** New Year's Day; Easter Monday; Queen's Birthday (April 30th); Ascension Day; Whit Monday; Christmas Day and Boxing Day.

Cargo can be worked during these days subject to labour being available at premium rates.
**POLICE/AMBULANCE/FIRE:** Police 222222; Ambulance 355555; Fire 666666.
**TELEPHONES:** Telephone connections on board are only possible on certain quays (passenger ships). It is possible to rent portable mobilophones.
**SERVICES:** 2 Tank cleaning installations, compass adjusting/direction finder calibration, representatives of all leading radio installations, radar and other nautical instruments available.
**SHORE LEAVE:** Crew members allowed ashore.
**DELAYS:** Usually no congestion.
**AUTHORITY:** Dienst der Havens en Handelsinrichtingen, Havengebouw, 7, De Ruyterkade, Amsterdam.

**AGENT:** Wm. H. Müller & Co. Amsterdam B.V., "Havengebouw", 7 De Ruyterkade, P.O. Box 182, Amsterdam. Telegrams Mineral. Telex 12058. Tel. (020) 6 34 56.

## DELFZIJL: 53.20 N. 6.54 E. (See Plan)

**LOCATION:** On the estuary of the River Ems, opposite Emden.
**DOCUMENTS:** See "Rotterdam".
**PILOTAGE:** Pilot boats normally cruise at Wester-Ems buoy. During bad weather they withdraw into estuary, but never further than Borkum Roads. Pilot boats listen on Channel 6 and pilot office on Channel 14 VHF; distance from pilot station to Delfzijl 32 miles. Pilot service compulsory for all vessels drawing over 22 dm. Foreign vessels may call Pilot on 2182 kHz. and Netherlands vessels on 2391 kHz. Traffic between the cutter and the vessel will be held on 1657 kHz.

Approaching vessels from sea should inform the Pilot commissioner of their ETA in M.E.T. with a notice at least 4 hours in advance via Scheveningen – Radio (PCH); the pilot cutter may be informed via VHF.

The ETA message should contain the following details: (*a*) ETA Pilot Westereems (time in M.E.T. in a group of 4 figures); (*b*) Draft; (c) Port of destination.

Departing vessels should apply for a Pilot at least one hour before ETD; the request should be made to the office of the commissioner.

Pilotage from Delfzijl is not compulsory. On request however a Pilot may be put at the Master's disposal for a trip to Emden. This is not applicable for a trip from Emden to Delfzijl or Eemshaven.
**ANCHORAGE:** Anchoring in harbour area prohibited. On roads, ships up to 4,000 dwt. anchor near buoy B.W. 14. Larger vessels should anchor in Doekegat.
**ENTRANCE:** New harbour entrance lies opposite the village of Oterdum about 5·2 m. South-east of the old entrance. The new entrance extends to reach the deep water of the Bocht van Watum, and lies at a point about 600 m. West of the dredged channel between the Bocht van Watum and the Oostfriese Gaatje near Paapsand Sud.

New harbour entrance has an initial depth of NAP —10 m., and a bottom width of 200 m. The harbour channel has the same depth, and a width of 100 m. NAP=Normal Amsterdam Level.
**MAX. SIZE:** Port is now accessible to vessels with draft up to about 28 ft. (8·50 m.) which may arrive or sail without waiting for high water.
**TUGS:** 1 tug of 900 h.p., 2 tugs of 800 h.p. and 2 tugs of 175 h.p. available. Tugs use ship's lines.
**RADIO:** Cable to Agents via Radio Scheveningen. PCH.
**VHF:** The Harbourmaster's office is equipped with a VHF installation, Channel 14. During office-time the station is constantly manned (0800–1200 and 1300–1700 hrs.); during other hours the station is manned during the last quarter of every hour.
**BRIDGES:** Bridge to the 1st Inner Harbour may always be worked. Bridge to the Industrial Inner Harbour (Oosterhornkanaal) will be handled from Monday to Saturday. On Sunday bridge may be opened on special request.
**CARGO HANDLING:** Public quay is equipped with 14 cranes to work general cargo. Five of these may also be used to handle bulk cargoes (fertilisers, grain).

There is in the outer harbour a private facility to discharge alumina, a bulk salt-loading terminal and a deep sea berth to handle molasses.
**DENSITY:** Ranging between 1007 and 1020, depending on the tide.
**FRESH WATER:** Available along new quay in unlimited quantities.
**FUEL:** Fuels in limited quantities for coasters are always available. For bunkering of larger vessels, arrangements should be made in advance.
**GANGWAY/DECK WATCHMEN:** According to police regulations, Master has to keep watchmen on board.
**OPENING/CLOSING HATCHES:** Normally carried out by ship's crew.
**CONSULS:**

| *At Delfzijl* | | *At Groningen* | |
|---|---|---|---|
| Denmark | tel. 05960–16333 | Belgium | tel. 050–138222 |
| Finland | ,, 05960–16800 | Germany | ,, 050–139922 |
| France | ,, 05960–13778 | Norway | ,, 050–189444 |
| Sweden | ,, 05960–16333 | Spain | ,, 050–137879 |

**REPAIRS:** Most engine and deck repairs can be carried out by two local shipyards.
**DRY DOCKS:** Dry-docking is limited to ships up to 3,000 dwt. with a draft not exceeding 32 dm. For larger vessels, dry-docking facilities exist in the nearby port of Emden (Germany).
**CERTIFICATES:** The tonnage certificate should be shown to Harbour Master. on first call every year.
**HEALTH, MEDICAL ATTENDANCE, HOLIDAYS, LOCAL TIME, CUSTOMS ALLOWANCES:** see "Rotterdam".
**AUTHORITY:** Port of Delfzijl Authority, Handelskade W 10, Delfzijl. Tel.: 05960–14966. Telex: 53299.

**AGENTS:** Maritima Shipping & Trading Co. Ltd., De Vennen 52, PO Box 7, Delfzijl. Tel (05961) 13741. After office hours 13742, 13749, 14024. Cables "Maritima". Telex 53153.

## DORDRECHT: 51.49 N. 4.40 E.

**DOCUMENTS:** See "Rotterdam".
**PILOTAGE:** Vessels have to enter New Waterway at Hook of Holland and proceed to Dordrecht via this New Waterway and the River Oude Maas. Masters of vessels bound for Dordrecht should state destination in ETA message as Pilots for Dordrecht embark from pilot cutter at roads. Deep-draughted vessels may have to exchange Pilots just inside breakwaters at Hook of Holland. (See Rotterdam "Ordering a Pilot").
**ANCHORAGE:** At sea off Hook of Holland (see "Rotterdam"). No anchorage between entrance to New Waterway and Dordrecht.
**RADIO/RADAR/VHF:** No radar service on river Oude Maas or Dordrecht.
**RESTRICTIONS:** Max. LOA 175 metres. Max. breadth 23 metres. Max. draft 26 ft. 6 in. Max. breadth is discussable as 25·90 metres could be allowed. For tankers minimum visibility 500 metres (1,640 ft.). For dangerous cargoes, see "Rotterdam". The Pilot will decide the number of tugs required for passage on the Oude Maas, usually a minimum of 3–4.
**TUGS:** Tugboats ordered by Pilot when entering New Waterway. Tugs normally meet vessels at Dordrecht.
**BRIDGES:** Bridges across the River Oude Maas are opened day and night. Sea traffic has preference above shore traffic.
**TANKERS:** Oil installation of Gebr. Broere N.V. has seven tanker berths. There are other tanker berths for small tankers. No slop (residue) storage facilities.
**REPAIRS:** Yards of various capacities available for all types of repairs.
**FRESH WATER:** At oil installations fresh water can be supplied from shore. Or supply by waterboat.
**CONSULS:**
Denmark tel. 32177 Norway tel. 32177 France tel. 33231

Other consulates at Rotterdam at 20 km. distance.
**POLICE/AMBULANCE/FIRE:** Tel. Police 30333; Ambulance 32555; Fire 33333.
**AIRPORT:** Rotterdam and Amsterdam airports at a distance of 30 and 90 km. respectively served by regular airlines.
**PILOT CUTTERS, HEALTH, MEDICAL ATTENDANCE, BUNKERS, CUSTOMS ALLOWANCES, HOLIDAYS:** see "Rotterdam".
**TIME:** GMT plus one hour.

**AGENTS:** Wm. H. Muller & Co. Scheepvaartagenturen (Rotterdam) N.V. Westerlaan 1, Tel. 010–36.43.00. Rotterdam. Telegr. Mineral. Telex. 21245, 46, 48, 32124. Shipbrokers. Liner Agents.

## EEMSHAVEN: 53.27 N. 06.50 E. (See Plan)

New port under construction.
**LOCATION:** About 15 km. North-west of Delfzijl, on the bank of the River Ems.
**DEVELOPMENTS:** Harbour became operational in 1973. Initially harbour accessible for vessels up to 36 ft. (10·97 m.) draft and about 40,000 tons dwt. Eventually port is expected to be suitable for vessels of up to 42 ft. draft (12·80 m.).

Ample facilities for the handling of unit loads and roll-on/roll-off traffic will be offered. A bulk cargo terminal is planned, and a separate basin is projected where vessels loaded with highly inflammable cargo may be discharged safely, unhindered by passing vessels.

The depth of the bar to be passed in the Oude Westereems–Doekegat is about NAP —11 m. Therefore the harbour entrance, keel and turning have a depth of NAP —12 m. However, the ringdike of the port entrance has been laid so wide, that when the bar is deepened, to NAP 14 m., it will be also possible to dredge the harbour (entrance, keel and turning basin) 2 metres deeper without much difficulty.

The bottom width of the entrance is 250 m., measured sheer at the entrance-axis. This measure is equal to the length of the biggest ship to be expected. The bottom distance between both piers is about 320 m.

**AGENT:** See "Delfzijl". Eemshaven (05954) 62 52.

## FLUSHING: 51.27 N. 03.35 E. (See Plan)

**DOCUMENTS:**

2 Crew Lists.
2 Passenger Lists.
1 Store List.
1 Personal Effect List.
Ship's Register.
1 Manifest or Bill of Lading.

**PILOTAGE:** Position of pilot cutters in the Scheldt Estuary: Pilotage is compulsory.

*Wielingen (Southern approach) or via Scheur:* Vessels approaching the Scheldt estuary from the English Channel pass the lightvessels Sandettie Banks and Westhinder. The Belgian pilot cutter *Wandelaar* is stationed near Buoy A1 at 51° 22′ N. and 02° 53′ E. This cutter has a black hull with a white number on her bow, a yellow funnel with black top and flies a red flag with the letter "P" in white.

A vessel bound for Flushing to discharge, bunker, load, to embark or disembark passengers or for repairs will be provided with a Dutch Pilot, who will take the vessel into harbour. Other vessels for Flushing (sheltering, awaiting orders, unplanned repairs, etc.) will be provided with a Belgian Pilot to Flushing-Roads, where a Dutch Pilot comes on board to take the ship into harbour.

*Oostgat (Northern approach):* Vessels approaching the Scheldt estuary from the North can take a Pilot in the vicinity of the S.D. lightbuoy (51° 43′ N. and 03° 20′ E.) where a Dutch pilot cutter is stationed, flying a blue flag with the letter "L" in white. As a rule vessels bound for Flushing are provided with a Dutch Pilot.

*ETA Messages:* Masters' telegrams via Scheveningen Radio, call-sign P.C.H., are passed on to Agents 24 hours a day, week-ends inclusive.

For this reason it is advisible that Masters communicate with Agents via Scheveningen Radio, via which station Agents also route their messages to vessels.

Vessels bound for the river Scheldt should cable, at least four hours in advance, their

1. ETA "Wandelaar" (Southern Approach) to: "Pilotage Ostend", via Ostend-Radio (OST).
2. ETA "Steenbank" (Northern Approach) to: "Pilotage Flushing", via Scheveningen Radio (PCH).

The ETA message should contain the following details: (*a*) the words "ETA pilct Wandelaar or Steenbank". (*b*) ETA central European time shown in a group of 4 figures. (*c*) draft (S.W. or FW) with indication of unit applied. (*d*) port of destination and berth.

Pilot cutters may be contacted on VHF Channel 6.

During bad weather both pilot cutters shift to Flushing roads.

**ANCHORAGE:** Flushing roads at not less than ¾ of mile from Northern Coast. Depths vary quickly from 33 to 85 ft.

**MAX. SIZE:** *Flushing East Harbour:* Entrance 34 ft. 4 in. at MLWS. A depth of 38 ft. planned alongside the quay.

Max. draft at Buoys at entrance 43 ft.

*Outer Harbour:* West side, max. draft 33 ft.

*Inner docks:* Max. depth 24 ft.

*Total:* Max. length 280 m., max. draft 49 ft. (S.W.), max. dwt., 100,000 tons. However, draft is controlled by the depth in the approach channels.

**HEALTH:** No certificates required. In event of any disease or fever contact agents.

**RADIO:** All messages to Agents via Scheveningen Radio.

Flushing Radio can be reached by VHF Channel 14. Harbour tugboats and pilot cutters operate on VHF Channel 6.

**RADAR/VHF:** Port radar service, none. River service under consideration. Flushing Radio Channel 14. Every 5 min. each hour this station transmits information regarding visibility, water-level, hindrances, anchorages, etc. Harbour tugs Channel 6.

**TUGS:** Join vessels in Flushing roads. Vessel's lines usually used. No extra for tug lines. For contract holders 5% reduction.

**BERTHING:** *Outer Harbour:* West side, quay of 1,150 ft. long, depth of water 33 ft. LWOST. Quay height above sea level 2 metres at high tide and 7 metres at low tide. In Northern part of Outer Harbour a landing stage with length of 360 ft. Depth at low tide 20 ft.

*Flushing East Harbour:* Quay length 1,300 ft. Depth 36 ft. LWOST.

*Inner docks:* A double lock and sluice give access from Outer Harbour to inner docks and canal through Walcheren. Largest lock 455 ft. wide, depth on still LWOST of 17½ ft. The other lock is 213 ft. long, 26 ft. wide, and 10 ft. deep. Sluice 113 ft. wide, 28 ft. deep. Constant depth of water at quay 24 ft.

**STEVEDORES:** Provided by N. V. Haven Van Vlissingen (Port of Flushing Limited). Tel.: 01184–5070. Telex: 55137.

**MECHANISED CARGO HANDLING:** Quay length 1,300 ft. equipped with two portainers suitable for handling 20 up to 40 ft. containers.

Roll-on/Roll-off service between Flushing and Ramsgate. Daily service, later on probably twice a day. Vessels berth in the Inner Docks. At Flushing-East, Ro-Ro facilities for deep sea vessels.

**TANKERS:** Vessels carrying over 4,400 gallons of combustible liquids with a flash point up to 21° C., or over 22,000 gallons with flash point up to 55° C require Harbour Master's permission for entry.

Two discharging berths alongside the quay. Discharge lines three of 8 in. diameter with capacity of about 2,000 tons per hour.

*Total:* See "Max. Size".

One jetty for tankers up to 100,000 dwt and three jetties for ba and coasters.

*Connections*

| Commodity | Loading arms |
|---|---|
| Fuel oil | 2×12 in. |
| Clean products | 2×10 in. |
| Bunkers (fuel oil only) | 1× 8 in. |

The two fuel oil loading arms can also be used for the disch of crude oil. The loading arms are hydraulically operated.

*Deballasting:* One 12 in. and one 10 in. loading arm can als used for the discharge of dirty ballast water in unlimited quant at the rate of about 1,800 tons per hour.

*Capacities:* Discharging rate of crude oil and the loading ra fuel oil amount to about 2,000 tons per hour.

*Supplies:* Bunkers and fresh water can be supplied from the and by barge. The jetty is not accessible to trucks, therefore s supplies can be arranged by barge only.

**MEDICAL:** Two hospitals available.

**DENSITY:** About 1024.

**FRESH WATER:** Can be supplied either alongside the qua by water boat. Possible to supply fresh water in Flushing ro weather permitting.

**FUEL:** All grades obtainable from major oil companies and supp by barge only.

Economical bunkering arrangements can be made at the shelte anchorage Schaar van Everingen, a few miles up river from Flush No port expenses are incurred.

**DEVELOPMENTS:** In Flushing East the quay of 1,300 ft. lengt be extended by 140 m. with depth alongside 38 ft. LWOST.

**GANGWAY/DECK WATCHMEN:** Available but not compuls or necessary.

**OPENING/CLOSING HATCHES:** On liners by crew or ste dores, ship's option.

**CERTIFICATES:** On arrival, ship's register only.

**CUSTOMS ALLOWANCES:** 200 cigarettes for each membe crew and total on board out of bond 5 litres spirits and 100 li wine.

**CARGO GEAR:** The port is equipped with modern mobile cra which can be used both in the outer harbour and in the inner doc with the following capacities:

| | |
|---|---|
| 2 cranes – 25 tons | 2 cranes – 10 tons |
| 3 cranes – 12 tons | 1 crane – 8 tons |

Floating cranes are available with capacities of 225, 75, 40 8 tons.

**IDENTIFICATION CARDS:** Not required.

**CONSULS:**

| | | | |
|---|---|---|---|
| Belgium | tel. 5151 | Germany | tel. 01188–1764 |
| Denmark | ,, 4520 | Norway | ,, 2272 |
| France | ,, 2373 | Sweden | ,, 6828 |

**REPAIRS:** All repairs possible.

**DRY DOCKS:** Largest 705 ft. 5 in., width 98 ft. 4 in. and 4 sma docks.

**REPATRIATION:** All facilities available for crew changes; g railway connections.

**AIRPORT:** Rotterdam (Zestienhoven) 125 km.; Brussels (M broek) 150 km.; Amsterdam (Schiphol) 180 km.

**TIME:** GMT plus one hour.

**HOLIDAYS:** New Year's Day (January 1st); Easter Mond Queen's Birthday (April 30); Ascension Day (May 15th); Whit M day; Christmas Day (December 25th); Boxing Day (December 2

Work can be arranged on above days, however dependent u permission of the Docker's Inspection.

**POLICE/AMBULANCE/FIRE:** Police 3333; Ambulance and F 2323.

**TELEPHONES:** Not possible to place telephones on board exc for vessels berthing at the shipyard "De Schelde".

**SERVICES:** Compass Adjuster; Radio/radar services also cali tion of the Direction Finder, Seamen's Home (Mission to Seame Lloyd's Sub-agents; Ship's Laundries.

**SHORE LEAVE:** After clearing inwards, crew members are allow to go ashore without special permission.

**AUTHORITY:** *Outer Harbour:* N.V. Haven van Vlissingen, Bu haven, Vlissingen. Tel. 5070.

*East Harbour:* The Port Authority of Flushing, Badhuisstraat Flushing. Tel. 5045.

**AGENT:** Wm. H. Muller & Co. Shipping Agencies (Rotterdam) N Flushing. PO Box 81. Tel. 2171 (day and night). Telex 55068. Ca "Mineral".

## IJMUIDEN (YMUIDEN): 52.28 N. 04.34 E. (See Pl

Also refer to "Amsterdam".

**DOCUMENTS:**

2 Personal Effects Lists.
2 Stores Lists.
3 Crew Lists.
3 Passenger Lists.
Declaration of Health.

**PILOTAGE:** Compulsory. Pilot boat stationed off entrance Ijmuiden. Vessels required to give 4 hours advance notice to "Lo swezen" Ijmuiden. The advice to be amended if vessel chang ETA more than 2 hours from the original message.

Notice can be given via Scheveningen Radio or by VHF Channel

Harbour Master's office can be contacted by VHF Channel to obtain information for safe navigation and rapid locking adverse weather vessels may receive radar assistance from P Operations for entering harbour.

**ANCHORAGE:** Vessels may anchor off Ijmuiden outside the breakwaters.

**MAX. SIZE:** For North Sea Canal, entrance lock 1312 ft. long, 164 ft. wide, 49 ft. depth. Density: 1016.

Maximum permitted draft is 43 ft. in salt water, only after consultation and with permission of Government Harbourmaster at Ijmuiden may the maximum draft be extended to 45 ft.

**HEALTH:** Pratique granted automatically on arrival after completion of Maritime Declaration of Health. In case of suspected disease on board notify Agent by radio before arrival advising full details.

**TUGS:** Available. Meet vessel in harbour entrance if required.

**BERTHING:** Coal and ore cargoes discharged to Blast Furnace and Steel Works Company in Outer Harbour.

*Quay 1:* Length of quay: 1,360 ft. Depth alongside quay: east part 31 ft. at LLWS, west part 37 ft. at LLWS.

Opposite the quay there are 3 dolphins available where one vessel can wait for a loading/discharging berth (up to 34 ft. draft).

Equipment:
1 crane, lifting capacity 15 tons, max. outreach 57 ft.
2 cranes, lifting capacity 30 tons, max, outreach 57 ft.
1 crane, lifting capacity 30 tons, max. outreach 63 ft.

Finished products such as rolling mill products, pig-iron, cast iron, steel ingots, slabs and coils are handled.

*Quay 2:* Length of quay: 1,800 ft. Depth alongside quay: 48 ft. at LLWS. Maximum draft; the entrance to Outer harbour is accessible to vessels up to 43 ft. draft and with special permission of the harbour authorities up to 45 ft. draft.

Equipment:
3 bridgecranes, lifting capacity 40 tons each, max. outreach 115 ft.
2 conveyor belt systems (capacity 6,000 tons per hour).

Despatch:
About 45,000 tons iron ore per 24 hours. About 30,000 tons coal per 24 hours.

*Quay 3:* Length of quay: 825 ft. Depth alongside quay: 37 ft. LLWS. On this quay exclusively steel products will be loaded.

Equipment:
2 cranes with a capacity of 60 tons each. Outreach 70 ft.

*Inner harbours:* These harbours are mainly used for loading or discharging smaller vessels having drafts between 13 ft. and 21 ft. 6 in.

Finished products such as rolling mill products, pig-iron, cast iron, steel ingots, slabs, coils but also fertilisers are handled.

**DEVELOPMENTS:** Proposed new outer port to be built South of South Harbour Entrance Mole to accommodate vessels up to 62 ft. draft.

**STEVEDORES:** *Working Hours:* In the Outer harbours round the clock, also on Sundays and holidays.

In the Inner harbour round the clock except from 2200 hours on Saturdays until 0600 hours on Monday.

**FRESH WATER:** Available from quay.

**FUEL:** Available by barge.

**MEDICAL:** Doctors, hospital and all services available.

**CUSTOMS ALLOWANCES:** 200 cigarettes for each crew member; 5 litres spirits for whole ship.

**CONSULS, REPAIRS:** and all general information; refer to "Amsterdam".

**AUTHORITY:** Rijkshavendienst Ijmuiden.

**AGENT:** See "Amsterdam".

## ROTTERDAM: 51.55 N. 4.24 E. (See Plan)

**DOCUMENTS:** Maritime Declaration of Health, obtainable from River Pilot. Crew list in duplicate on special Dutch forms, obtainable from agents. Ship's Register. Store list. Crew custom declaration showing quantity cigars, cigarettes, tobacco, spirits, wine, radios, cameras, etc., and souvenirs for each crew member.

Crew and passenger lists to show date of last vaccination against smallpox, for vessel coming from suspect zone within last 14 days.

**DEEP SEA PILOTAGE:** See "Brixham" or "Cherbourg".

**PILOTAGE:** River pilotage compulsory from sea to harbour area and vice versa, except vessels in ballast drawing less than 7 ft. 3 in.

Harbour pilotage compulsory from fairway to berth in harbour area and vice versa, except for vessels under 475 grt.

*Pilot Cutters:* Cruising continuously, day and night, off entrance to New Rotterdam Waterway, one North of line North Mole/Maasbuoy and one near Maasbuoy. Characteristic signals:

1. By day pilot flag, being a blue flag with white letter "L", displayed from main top mast.
2. At night, lights as prescribed by Regulations for Preventing Collisions at Sea.
3. During bad visibility the fog signal prescribed by rule 15 of these Regulations.

*Ordering a Pilot:*

1. Vessels bound for New Rotterdam Waterway should cable, at least four hours in advance, ETA pilot station and draft to:
   (a) Pilotage Hook of Holland via Coastal Station Scheveningen Radio (PCH) or
   (b) Coastal Station Maassluis Radio (Radio Dirkzwager) by VHF Channel 12 (Port operations) or
   (c) Pilot Station Maas at Hook of Holland by VHF Channel 20 and 18.
2. Vessels bound for Port of Dordrecht should also state their destination, as pilots for Dordrecht embark from pilot cutter on roads.
3. Vessels bound for Europoort should also adopt following procedure:
   (a) Vessels equipped with VHF should notify via Channel 12 or 14 their ETA pilot station at least 1 hour in advance to Maassluis Radio Dirkzwager.
   (b) Vessels not equipped with VHF should cable same information to Europoort Rotterdam via Scheveningen Radio (PCH).

On arrival at pilot station vessels requiring Pilot are to display following signals, separately or together:

1. *By day,* International code signal "G". Pilot flag, viz., vessel's National Flag with white border from foremast.
2. *By night,* Morse signal "G" by flash light. Blue lights at intervals of 15 minutes. A bright white light shown just above bulwark for one minute at short intervals.
3. *During bad visibility.* At least 3 seconds after the normal fog signal the international code signal "G". Pilot vessel will answer: the normal fog signals, followed after at least 3 seconds by international code signal "H" (I have pilot on board).

*Pilotage for deep draft vessels and helicopter Service*

Vessels drawing 57 ft. SW and over must make use of the "Eurochannel" between the "Euro One Buoy" and the "Centre Maas Buoy". Pilots are embarked as follows:
up to 57 ft. SW – at the pilot station near the Centre Maas buoy
57 ft.–65 ft. SW – by helicopter:
(a) in rendezvous position 52° N. 03° E.
(b) at the VLCC anchorage off Hook of Holland.

For vessels drawing over 57 ft. SW 1½ times the pilotage tariff Sea – Hook of Holland is applicable.

Helicopter pilotage is regularly carried out for vessels which have an obstacle-free hoisting area on deck of min. 15 ft. in diameter. Deckplans should be provided in advance.

Restrictions:
1. Minimum visibility 800 metres at 150 ft. above sea level.
2. Maximum wind force 10 (55 kts.).
3. Severe turbulence and icing conditions at or below 150 ft.

Pilot ladders: Whenever the distance from sea level to the point of access to the ship is more than 30 ft (9 metres), access from the pilot ladder to the ship shall be by means of an accommodation ladder or by other equally safe and convenient means.

**ANCHORAGES:** Recommended anchorages:
51° 57′ N. 3° 53′ E. } max. draft
51° 59′ N. 3° 58′ E. } 52 ft.
for vessels with a deeper draft:
52° 01′ N. 3° 00′ E.
52° 05′ N. 3° 08′ E.

**RESTRICTIONS:** *Dangerous Cargoes:* (a) explosive cargoes in quantities of over 1,000 kgs.; (*b*) gas in bulk; (c) poisonous liquids; (*d*) inflammable liquid with a flash point of less than 56° C., and of which the gas may form an explosive mixture with air.

Masters of vessels carrying dangerous cargoes have to report 4 hours before arrival at pilot station to "Pilot, Hook of Holland", via Scheveningen Radio, or to "Maassluis Radio Dirkzwager" on VHF Channel 12, stating draft, ETA and the code word "Imco".

*Fog:* Tankers will not be allowed to manoeuvre in fog, i.e. in visibility of less than 500 metres (1,640 ft.).

*Entry times:* Depend on prevailing circumstances, as follows:

Europoort:
Ore carriers – Any time.
Tankers:
50 ft. – 57 ft. SW draft – Any time except for Shell 102 and 103 for which see 57 ft. – 62 ft.
57 ft. – 62 ft. SW draft – Any time except between
5–2 hr. (Calandcanal) } before high tide at
5–1 hr. (Beercanal) } Hook of Holland
62 ft. – 65 ft. SW draft – 2 hours before until 2 hours after high water at Hook of Holland.

Vulcaanhaven Vlaardingen: Between 33 and 39 ft. at slack high tide only.

Botlek:
(a) Between 31 ft. and 37 ft. any time except between 4 hr. and 1 hr. before high water at Rotterdam.
(*b*) 38 ft. and 39 ft. at slack low or at slack high water, depending on circumstances.
(c) 39 ft. to 45 ft. only at slack high water.

Waalhaven:
Same as Botlek, but vessels with a draft of 39 ft. fresh water, which are over 800 ft. in length, must first discharge part cargo in Botlek from where, after draft has been reduced to 37 ft. fresh water, they can be shifted to Waalhaven.

Other basins: Any time.

**MAX. SIZE:**

| | *Max. draft (SW) at HW* | *Keel clearance* |
|---|---|---|
| Euro 1 Buoy – Maas Buoy | 65 ft. | 20% |
| Maas Buoy – Entrance | 65 ft. | 15% |
| Entrance – Europoort | 65 ft. | 10% |
| Entrance – Botlek | 44 ft. | 10% |
| Botlek – Waalhaven | 40 ft. | 10% |
| Waalhaven – Rijnhaven | 34 ft. | 10% |

*Shifting:* Vessels which have been partly discharged at Europoort/Maasvlakte terminals should arrive at the Botlek entrance half an hour before high tide at Rotterdam. The following rules in view of length and draft apply:

| *Max. length overall* | *Max. draft allowed* |
|---|---|
| up to 259 m. (up to 850 ft.) | 44 ft. SW |
| 259–266 m. (850 ft.– 875 ft.) | 42 ft. SW |
| 266–274 m. (875 ft.– 900 ft.) | 41 ft. SW |
| 274–305 m. (900 ft.–1,000 ft.) | 39 ft. SW |

**HEALTH:** Master has to fill in and sign Maritime Declaration of

Health which is handed to him by Pilot. Vessels subject to medical inspection have to hoist flag signal ZV (at night two white lights horizontally placed).

**RADIO:** Recommended radio station: Scheveningen Radio, call sign PCH, via which station also Agents send messages to vessels.

**RADAR/VHF:** Chain of seven shore-based radar stations permits navigation during all weather conditions. Radio and radar station Pilot Maas, at Hook of Holland, communicates via Channel 20 of Hague Band or VHF Channel 20.

VHF range = about 15 miles.

Radar range = about 14 miles in S.W. to W. direction, and 10 miles in N. direction.

Captains are requested to call this station, especially during bad visibility, well in advance of arrival at pilot station. Pilot Maas provides vessels within range with nautical information and acts as a link with pilot cutters.

Radio and radar station, now known as "Rijkshavendienst Waterway", located in Europoort now operates a 24-hour service. It acts as communication post for safety of shipping outside entrance to New Waterway and on Waterway. The station can be contacted by inward bound vessels, but must be contacted by vessels before departure from Europoort by VHF Channel 14, call-sign "RHD Waterway". Station also gives nautical information on situation on New Waterway every half hour via VHF Channel 14 in English.

**MEDICAL:** All medical facilities available. Advance notice only in emergency or if attendance required during week-end.

**TUGBOATS:** Tugs normally join vessel on river when nearing the basin where vessel will be accommodated. Vessel's towing lines used. On departure from Europoort the tow ropes, fastened to the stern, must be supplied by the tugs.

**BRIDGES:** New Waterway connects port of Rotterdam with North Sea, without any locks or bridges. Only to reach some shipyards, situated East of Rotterdam, vessels have to pass the "Maas-Bridges" (Koningshaven), which are on working days opened at regular times.

**GENERAL CARGO FACILITIES:**

| | *Maximum FW draft at low water* | *Cranes No.* | *Cranes Capacity* |
|---|---|---|---|
| Schiehaven | 9 m. = 29 ft. 6 in. | 9 | 5–17½ tons |
| Lekhaven | 10 m. = 32 ft. 10 in. | 8 | 5–25 tons |
| Merwehaven I | 10 m. = 32 ft. 10 in. | 8 | 5–17½ tons |
| Merwehaven II | 10 m. = 32 ft. 10 in. | 5 | 3–25 tons |
| Maashaven | 9 m. = 29 ft. 6 in. | 10 | 5–20 tons |
| Waalhaven, Pier 1 | 10½ m. = 34 ft. 6 in. | 13 | 5–25 tons |
| Prinses Beatrixhaven | 10 m. = 33 ft. | 9 | 3–25 tons<br>4 banana-elevators 80,000–100,000 cartons of 20 kg. per 8 hours. |
| Waalhaven, Pier 6 | 11 m. = 36 ft. | 8 | 10–30 tons |

The 17½-ton cranes are mainly used for the handling of containers and steel. In combination these cranes can lift 28 tons. Two floating cranes – max. capacity 5 tons each.

| | | | |
|---|---|---|---|
| Parkhaven | 8 m. = 26 ft. 3 in. | 10 | 15 tons |
| Jobskade | 8½ m. = 28 ft. | | |
| Jobshaven | 8 m. = 26 ft. 3 in. | | |
| Merwehaven II | 6 m. = 19 ft. 8 in. | 5 | 5 tons |
| | 10 m. = 32 ft. 10 in. | | |
| | 8 m. = 26 ft. 3 in. | | |

**BULK HANDLING FACILITIES:**

Key to table.

1. Berth.
2. Length of quay in metres and feet.
3. Maximum draft at MLW (S) salt water, (F) fresh.
4. Equipment.
5. Max. height of discharging-gear above high water-level.

| barges | 500 m. = 1,640 ft. | 17 ft. " |

However, it must be borne in mind that the maximum draft at river entrance and Europoort is 65 ft. SW.

| | | |
|---|---|---|
| Two cranes: | Total max. capacity | 6,000 tons of ore per hour. |
| | Total average capacity | 3,000 tons of ore per hour. |
| | Maximum outreach | 45 metres = 148 ft. |
| | Lifting capacity | 50 tons. |
| | Grab weight | 20 tons. |
| | Storage capacity | 1·7 million tons. |
| | Max. gear height above high water | 27·5 metres = 90 ft. |

Two mobile barge loading machines:

| | |
|---|---|
| Maximum outreach | 20 metres = 65 ft. 8 in. |
| Total maximum capacity | 12,000 tons per hour. |

Two Stacker/reclaimer combinations:

| | |
|---|---|
| Total maximum capacity | 6,000 tons per hour. |

Conveyor belt system between the discharging section in Beercanal and the loading section in the Hartelcanal, also stacking and reclaiming.

**SPECIALISED CARGO-HANDLING FACILITIES:**

Container vessels:

1. *Prinses Beatrixhaven:* Max. draft 33 ft. (FW).
2. *Prinses Margriethaven:* Max. draft 42 ft. (FW).
3. *Prins Willem Alexanderhaven:* Max. draft 40 ft. (SW). 2 and are operated by E.C.T., capacity 500,000 containers. Length quay, 3,000 m. Operates 11 container cranes, 4 used exclusively Sea/land. Also handles roll-on/roll-off vessels.
4. *Waalhaven* (Pier 7): Max. draft 41 ft. (FW). Operated by Unitcen B.V. operates 4 container cranes. Length of quay 500 m., 800 in near future.

L.A.S.H.: Vessels discharge and load at buoys in Waalhave Average permissible draft at buoys 35 ft. (SW). Maximum draft buoys 6 and 12 40 ft. (SW).

Esso Chemie N.V.: The fertiliser plant in Europoort produc ammonia, urea, nitric acid, calcium ammonium nitrate.

*Max. size:* 15,000 dwt., length 650 ft., draft 34 ft. in S.W. Can accom modate one vessel 15,000 dwt. and three 4,000 dwt.

**TANKER BERTHS:**

**Europoort**

| *Installation* | *Basin* | *No. of berths* | *Max. S.W. draft* | *Hoses* |

**Pernis**

| Installation | Basin | No. of berths | Maximum draft | Hoses |
|---|---|---|---|---|
| Paktank | 2nd Petr. haven | 2 | 36 ft. SW | 10 and 14 in. |
| | 1st Petr. haven | 2 | 32 ft. 8 in. FW | 8 and 10 in. |
| Shell | 1st Petr. haven | 7 | 39 ft. 6 in. FW | 4 at 8 in. |
| | 2nd Petr. haven | 7 | 35 ft. FW | 4 at 8 in. |
| Chevron/Texaco | 2nd Petr. haven | 1 | 32 ft. FW | 3 at 12 in. |
| | | 1 | 35 ft. FW | 3 at 12 in. |
| Mobiloil | 2nd Petr. haven | 1 | 33 ft. FW | 6 in. and 8 in. |

No facilities for discharging dirty ballast at Mobiloil.

No bunkers (ex-installation) at Mobiloil, Paktank 1st Petr. Haven and Matex Europoort.

**DENSITY:** *Europoort* – At high water 1022; at low water 1010.

*Botlek* – At high water 1014; at low water 1001.

Waalhaven and other basins in the Rotterdam port area: At high water 1004; at low water 1000. All depending upon amount of fresh water carried down river.

**STEVEDORES:** Normal working hours:

1. *Bulk cargoes except grain:* Monday 0730 – Saturday 1400 hours uninterruptedly.

2. *Bulk grain:* Monday–Saturday dayshifts: 0745–1600 hours. Monday–Friday night shifts 1645–0100 hours.

3. *General cargo:* Monday–Friday dayshifts 0730–1600 hours. Nightshifts: 1630–0045 hours.

4. *Oil:* Continuously, including week-ends, except the oil storage companies Pakhoed and Nieuwe Matex, which work from Monday till Friday during daytime only, unless overtime arrangements are made.

Agents should be kept closely advised of vessel's position. In view of ordering gangs for next morning/evening master's final ETA message is required before 1400 hours. For work on Monday mornings a final ETA is required before Friday 1400 hours.

**OPENING/CLOSING HATCHES:** On liners by stevedores. On tramp vessels by crew; stevedores lifting beams.

**FRESH WATER:** Can be supplied ex quay at many berths. Where no shore connections are available and at buoys: by waterboat.

**BUNKERS:** All types of oil bunkers can be supplied by means of barges or ex shore installations for tankers. Coasters can take bunkers ex installation during their inward or outward passage. Advance notice is required for vessels which are only 24 hours or less in port and for bunkering during week-ends.

**FIRE PRECAUTIONS:** No floating objects are allowed alongside tankers during discharge or loading of dangerous cargoes and during ballasting.

**CUSTOMS ALLOWANCES:** Spirits: first arrival each month, 5 litres per vessel plus one bottle per man. Otherwise, ¾ litre per man with a max. of 5 litres per vessel. Wine: 5 litres per man.

Each crew member permitted out of bond 200 cigarettes, or 25 cigars, or 500 gm. tobacco.

**DEVELOPMENTS:** Maasvlakte: An oil terminal is under construction and expected to be partly operational in July 1975. The first phase of construction consists of 25 tanks, capacity of 120,000 cbm each, a jetty for tankers up to 400,000 dwt. and a jetty for tankers up to 600,000 dwt.

The breakwater is being lengthened by 3 km. at the entrance to the new waterway. Expected to be completed in 1975.

A L.N.G.-installation is expected to be operational in 1974; storage capacity 75 million cbm.

Future plans to accommodate container and roll-on/roll-off vessels in new basin "Rijnpoort", which will be situated between Hook of Holland and Maassluis, 5 miles from the entrance to the New Waterway.

During 1974 it is expected that vessels with a draft of 68 ft. (SW) will be able to enter Europoort and Maasvlakte.

The expected future draft for Maasvlakte is 72 ft. (SW).

The Grain Elevator Company (G.E.M.) plans to start the construction of a transhipment installation in Europoort for bulk carriers of up to 100,000 tons dwt.

**GANGWAY/DECK WATCHMEN:** Recommended.

**CERTIFICATES:** Ship's Register and Derating Exemption Certificate.

**REPAIRS:** Yards of various capacities are available for new building, engineering and all types of repairs.

**DRY DOCKS:** Largest dry dock for vessels up to 500,000 tons dw. with tank cleaning installation for largest vessels.

**REPATRIATION:** All arrangements for crew changes and repatriation can be made.

**AIRPORT:** Rotterdam airport Zestienhoven (distance 6 km.) and Amsterdam airport Schiphol (distance 70 km.) are served by regular airlines.

**TIME:** During the whole year GMT plus one hour.

**HOLIDAYS:** New Year's Day; Easter Monday; Queen's Birthday (30th April); Ascension Day; Whit Monday; Christmas Day (25th December) no work; Boxing Day (26th December).

**POLICE/AMBULANCE/FIRE:** Police Head office tel. 14.31.44; Alarm and accidents tel. 94; Ambulance tel. 13.50.00; Fire tel. 99.

**TELEPHONES:** At major shipyards, oil and grain terminals telephone is placed on board without extra charge.

**DEGASSING/CLEANING:** Free translation of circular issued 17th April 1973 by the Docks Industry of the Municipality of Rotterdam, reads: Safety requirements in regard to degassing/cleaning of tanks and/or holds on board ocean tanker vessels.

A recent accident during cleaning activities of tanks having contained combustible gases or liquids, poisonous or not, has resulted in the following directives to maintain the safety and to protect the environment in the dock area.

The Articles 55 and 56 of the Port Regulations Rotterdam (Municipal Gazette 1971, No. 3) prescribe a written consent of the Port Superintendent for degassing/cleaning. To obtain such a written consent on behalf of an ocean tanker vessel, the Captain should apply to the Office of the Port Superintendent, Department of Dangerous Substances, at least 24 hours before the actual cleaning. Conditions may be made in respect of, and amongst other things:

(*a*) safe cleaning procedure, and

(*b*) presence of an expert.

To that effect an investigation may be held on board as to a safe rinsing procedure, and relevant subjects, in consultation with the ship's management.

A statement may be demanded from the Captain stating whom he charges with the supervision of the activities. From this person expertise is demanded, to the satisfaction of the Port Superintendent. This "Expert" may be a member of the ship's crew, respectively a person to be designated by the Owner (e.g. a laboratory expert). Without the express consent of the Port Superintendent cleaning must not be started.

These measures have become effective at once and are applicable to all ocean tanker vessels, of which the tanks to be cleaned have contained a combustible liquid as its last contents with a flash-point lower than, or equal to, 55° Centigrade.

For ships berthed at a shore tank-cleaning station and handled by that company, the cleaning-company concerned shall be liable for a safe treatment and consequently no separate consent shall be required.

In the following summary, the ship's data necessary to obtain a consent has been stated.

The cleaning of tanks, as indicated in this circular, is not permitted without the consent of the Port Superintendent of Rotterdam. Concerning stench-causing substances further directives will be issued.

It will be tried to restrict the delays possibly occurring as a result of this new regulation to a minimum.

*Summary:* By "degassing" to be understood: Degassing or ventilating a tankage, steaming or cleaning and the activities related thereto.

Reporting: At least 24 hours before commencement of the cleaning activities the ship (ship's Agent) should make a request by Telex to the Port Superintendent of Rotterdam (Port co-ordinating centre) to obtain a consent pursuant to Art. 55 or 56 Port Regulations Rotterdam. 35 Lloydstraat, Rotterdam. Telex: GEVST 25720.

The following data should be stated when making the application: (1) name ship; (2) nationality; (3) tonnage in g.r.t.; (4) name Agent; (5) berth where cleaning is to be carried out; (6) indication of tanks to be cleaned; (7) correct technical denomination of the last 2 products carried in these tanks; (8) expected time of commencement cleaning; (9) cargo still on board; (10) by whom cleaning will be carried out (ship's own crew respectively name cleaning company); (11) destination slush (remaining on board respectively discharge to . . .).

**AUTHORITY:** Havenbedrifj der Gemeente, Rotterdam. Tel. Rotterdam 049133. Telex 23077.

**AGENT:** Wm. H. Muller & Co's Scheepvaartagenturen. (Rotterdam) B.V., Rotterdam-2. Westerlaan 1.

Shipbrokers – Liner Agents. Tel. 010–36.43.00. Telegrams: Mineral. Telex 21245.

## TERNEUZEN: 51.20 N. 03.49 E. (See Plan)

**DOCUMENTS:** Also see "Rotterdam". Customs clearance takes place in the outer harbour or in the locks, by permission of the lock master. Clearing of ships comprises the production of a document signed by the Master, accompanied by the following documents in triplicate: Cargo and Crew Manifest, and Stores List. Masters are

requested to have Crew List completed beforehand to avoid delay in the lock.
**PILOTAGE:** Compulsory for all vessels entering, leaving, and navigating inland waterways. Sea Pilot meets inward vessels at buoy A1, 51° 22.00′ N. 2° 53.24′ E. for ships entering by Wielingen channel; or at Middensteen Bank buoy, 51° 39.30′ N. 3° 19.00′ E. for ships entering by the Oostgat channel.

In Wielingen channel Belgian and Dutch Pilots available. In Oostgat channel a Dutch pilot cutter is stationed. Belgian pilot boat carries at the masthead a red flag with a white letter P, the Dutch pilot boat has a blue flag with a white letter L. Communicate with pilot cutter by VHF Channel 6.

*Warning:* In approaches Masters may encounter fishing boats steaming a parallel course about 300 ft. apart. The net is being towed between the two vessels. If there is danger of fouling the net, the fishing vessels will display by day International Code flag D, or by night a searchlight from each vessel.
**ANCHORAGE:** Vessels anchor outside fairway where depth is at least 49 ft. Mud bottom and good holding ground.
**RESTRICTIONS:** No restrictions on night entry.
**MAX. SIZE:** Controlling depth 31 ft. 4 in. Keel clearance 3 ft. 0 in. Height of tide 12 ft. to 15 ft. A vessel of maximum draft 40 ft. 6 in. can reach Terneuzen in most circumstances.

Ships not exceeding the following dimensions are allowed to pass through west lock and canal: length 230 m., breadth 31 m., draft in fresh water (canal) 11·75 m.

With special permission: length 245 m., breadth 32 m., draft in fresh water (canal) 12·25 m.
**HEALTH:** Arriving vessels are only subject to medical examination when arriving from countries where contagious diseases reported or when such cases suspected on board. Medical Officer will board in Terneuzen roads or Outer Harbour.
**RADIO:** Communicate via Flushing radio Channel 14, 156.70 mHz. 24-hour watch kept. From five minutes past every hour to ten minutes past the hour switch to Channel 16 for traffic list and navigation reports.

Communicate before entering the West outer harbour Terneuzen by VHF Channel 11 (156·55 kHz), 24 hours watch kept.

Each hour a weather bulletin, navigation reports and warnings are given.
**TUGS:** Towage not compulsory. Tugs can be ordered from Terneuzen tugboat company or Towage and Salvage Union Ltd. respectively by Channel 13, 156.65 mHz, and Channel 3, 156.15 mHz. Stations manned continuously for ordering tugs and general information.
**MEDICAL:** Two modern hospitals available.
**FRESH WATER:** Available from water barge.
**FUEL:** Fuel oil and lubricating oil available from lighter or tanker barge. Bunker coal not available.
**GANGWAY/DECK WATCHMEN:** Available. Tariff increase 100% on Sundays and holidays.
**OPENING/CLOSING HATCHES:** Can be effected by crew or stevedores.
**CUSTOMS ALLOWANCES:** See "Rotterdam".
**IDENTIFICATION CARDS:** Not required.
**REPAIRS:** Terneuzen Shipbuilding Yard situated at junction of East and West Canal branches. Able carry out hull and engine repairs. Floating cranes and diving equipment available.
**DRY DOCKS:** Dry-docking only possible for coasters, length 345 ft. width 39 ft. 6 in., draft 11 ft. 6 in.
**TIME:** GMT plus one hour.
**HOLIDAYS:** See "Rotterdam".
**SERVICES:** Repairs of radio radar, etc., can be effected.
**SHORE LEAVE:** Allowed.
**DEVELOPMENTS:** Plans made to widen and deepen Outer Harbour, also extension to southern Canal Harbour and Zevenaardok Harbour.
**AGENT:** Wm H. Müller & Co's Shipping Agencies (Rotterdam) N.V. – FLUSHING. P.O. Box 81 – Telephone 2171 – Telex 55068 Cables Mineral.

# Netherlands Antilles

## BARCADERA, Aruba: (See Plan)

The industrial harbour of Aruba, situated three miles South-east of Oranjestad.
**DOCUMENTS:** Documents and all general information, refer to "Oranjestad".
**PILOTAGE:** Compulsory.
**RESTRICTIONS:** Harbour open day and night. Depth of water in entrance and throughout harbour is 36 ft. Swinging basin width 1,000 ft.
**MAX. SIZE:** Up to 12,000 grt.
**TUGS:** Available.
**BERTHING:** 1,150 ft. of dockside accommodation.
**FRESH WATER:** Not available.
**FUEL:** Can be supplied.
**AUTHORITY:** See "Oranjestad".

## BULLEN BAY, Curacao: 12.11 N. 69.01 W. (See P

Bullenbay is an open bay on the South coast of Curaçao, 9 North-west of Willemstad.
**DOCUMENTS:** Documents and all General information, refe "Willemstad".
**PILOTAGE:** There is a resident Pilot at the bay. Pilotage is com sory and is rendered day and night.
**ANCHORAGE:** There is no anchorage in the bay.
**MAX. SIZE:** Length 800 ft., draft 36 ft. See "Berthing".
**TUGS:** One tug available to handle VLCC's, second tug avai mid-1975.
**BERTHING:** There are two piers at the East side of the naturally protected from prevailing wind and sea, T-shaped mooring dolphins fore and aft. Vessels moor port-side along these piers. Pier No. 1, a wooden superstructure on iron piles depth alongside of 36 ft. Pier No. 2 is of concrete construction a depth alongside of 38 ft. As the slope is steep, vessels held of piers can load deeper.

*Curacao Oil Terminal:* Curacao Oil Terminal (COT) locate Bullenbay facilitates economical trans-shipment of Eastern he phere crude arriving in very large crude carriers (VLCC's) for sto and on-carriage in smaller ships to draft restricted U.S. ports.

The terminal is owned and operated by Curacao Oil Terminal a company incorporated under Netherlands Antilles law. It wi able to handle about 200,000 barrels per day of crude oil in th segregated grades for trans-shipment by July 1974 and 825,000 ba per day by mid 1975. Initial (1974) facilities will include a T-head suitable for discharging VLCC's up to 500,000 dwt on full draft vessels with a draft of 95 ft. and OAL of 1,350 ft. For loading tra shipment vessels the jetty will be suitable for vessels down to ab 20,000 dwt (draft 32 ft.). (Pier Bullenbay II down to about 45,000 d 38 ft.). The piping systems allows a discharge capacity of 15 barrels per hour at a head of about 450 ft. at ship's rail for 500,000 tankers, and over 100,000 barrels per hour at a head of 275 ft. 200,000 dwt tankers. Later facilities (1975) will include a sec identical VLCC Jetty (350,000 dwt), 2 LR Jetties (100,000 dwt) 1 GP Jetty (20,000 dwt).

Loading will be by gravity up to a rate of 75,000 barrels per ho Volume measurement will be by calibrated tank gauging with accuracy of better than 0·1 per cent.

Tankage of at least 3,000,000 barrels will be available, inclu 4 tanks of 750,000 barrels each and smaller tanks ranging from 85 to 170,000 barrels. Tankage will increase to over 16,000,000 barre 1975.

Deballasting facilities suitable for LR/MR/GP vessels arriving ballast, will include tankage of 185,000 barrels able to receive about 25,000 barrels per hour and corrugated plate type oil separato

Bunker facilities for all grades are available at a rate of 3,800 bar per hour.

*Operators:* Curacao Oil Terminal NV, PO Box 660, Willemst Curacao, Netherlands Antilles. Telex No. Curacao 1096.
**FRESH WATER:** Fresh water available at the piers.
**FUEL:** Bunker oil is available and can be taken simultaneous w loading cargo.
**AUTHORITY:** Harbour Master of Curaçao.

## CARACASBAY, Curacao: 12.04 N. 68.52 W.

Caracasbay is an open bay on the South coast of Curaçao, 5 mi South-east of Willemstad. This port, mainly used by tankers, bun ships and big passenger liners, is specially fitted as an oil termi
**DOCUMENTS:** Documents and all general informations, refer "Willemstad".
**PILOTAGE:** There is a resident Pilot at the bay. Pilot service compulsory and rendered day and night.
**ANCHORAGE:** There is no anchorage in the bay.
**MAX. SIZE:** Vessels with a maximum overall length of 1,050 ft. maximum draft of 47 ft. can be accommodated.
**TUGS:** Tugboats operate from Willemstad. A tug is automatic provided for vessels exceeding 16,000 grt or 700 ft. length. For sma vessels it is recommended that if a tug is required it be ordered advance from Willemstad, otherwise there will be a wait of abou hour.
**BERTHING:** Two piers owned by "Shell Curaçao Ltd." are b at the East side of the bay, naturally protected from prevailing w and sea, with depths up to 47 ft. alongside. Vessels dock direc with their port-side along the piers. Pier No. 2, with a depth alongs of 47 ft., and pier No. 3, with a depth alongside of 47 ft., are ne built concrete piers/quays, modern and equipped for handling oi bulk, with enough platform to serve also as passenger terminal. T biggest cruise ships moor along these piers regularly.

The oil is transported through pipe-lines from the refinery Willemstad to the storage tanks at Caracasbay. Three ships c bunker simultaneously. New electrically-driven centrifugal pum metering and blending equipment at the bay stand for efficie to reduce bunkering time. Subject only to the capacity of sh receiving connections, loading rates up to 2,000 tons per hour bunker oil can readily be achieved.
**FUEL:** The piers are built as oil piers, modern and equipped supply any kind of bunker or lubricating oil to any vessel.
**FRESH WATER:** Fresh water can be obtained via pipe-line on t wharves.
**STEVEDORES:** Lighters and longshoremen are supplied fr Willemstad.
**REPAIRS:** Small repairs can be done at the bay through work barges alongside.

**GENERAL:** Clearance, port administration, port charges and regulations are the same as at Willemstad.
**AUTHORITY:** Harbour Master, Curaçao.

## FUIKBAY, Curacao: 12.03 N. 68.50 W.

Fuikbay, on the South coast of Curaçao, 7 miles South-east of Willemstad, is an inland bay with a 147 ft. wide navigable entrance. The depth of this harbour is 26 ft.
**DOCUMENTS:** Documents and general information, refer to "Willemstad".
**PILOTAGE:** Pilotage is compulsory.
**RESTRICTIONS:** As a rule vessels only enter this port during daylight. Sailing can take place day and night.
**ANCHORAGE:** There is an anchorage area in the West side of the bay.
**MAX. SIZE:** Vessels can enter and leave with a maximum draft of 24 ft. and a maximum length of 360 ft.
**BERTHING:** This bay is mainly used as a loading terminal of the "Mining Company Curaçao" for export of phosphate rock mined out of the "Tafelberg". There is one berth under the conveyor which transports the phosphate rocks from shore into the holds of the vessel alongside. Depth alongside is 28 ft. There is also a 84 ft. berth available for handling explosives or other cargo, usually named Westwerf. Only small vessels with a maximum draft of 8¼ ft. can come alongside. Vessels with more draft can moor with the help of floats between ship and quay.

The piers are privately owned by "Mining Company Curaçao" situated on private territory of this company.
**FUEL:** This port has no bunker facilities, so vessels bound for this port must take bunkers in Caracasbay or Willemstad before or after calling at this port if bunkers are desired.
**GENERAL:** Other services such as tugboats, repairs, power, etc. are rendered from Willemstad. 5-ton mobile crane available.
**AUTHORITY:** Harbour Master, Curaçao.

## KRALENDIJK, Bonaire: 12.15 N. 68.20 W. (See Plan)

**DOCUMENTS:**

| | Customs | Immigration | Agent |
|---|---|---|---|
| Passenger list | 1 | 1 | 1 |
| Crew list | 1 | 1 | 1 |
| Personal effects list of crew | 1 | | |
| Store list | 1 | | |
| Cureo list | 1 | | |

**PILOTAGE:** Pilot service is available and mandatory in Bonaire. In case a Pilot is desired, the authorities should be notified in advance so that a qualified Pilot from Curacao can be called in at the expense of the ship.
**ANCHORAGES:** Unlimited. Depth 30 ft. and over.
**RESTRICTIONS:** Notify the Agent at least 24 hours in advance. No tide.
**MAX. SIZE:** Length 1,050 ft., also see "Berthing".
**INWARD CLEARANCE:** Inward clearance is effected on board immediately on docking. Immigration Officer arrives on board immediately after docking. Passengers disembarking at Bonaire must present themselves for document check.

Customs Officer boards immediately after docking and together with a representative of the Agency's Shipping Department the inward clearance document of the vessel (in ballast or with cargo in transit, as the case may be) is prepared and signed. This document must be signed by the Master. Occasionally the Customs Officer may insist that the Master sign in his presence. Only upon completion of the above formalities, usually carried out in a very short time, the vessel is declared free and passengers and crew may go ashore. It is recommended that one of the public rooms be made available for the purpose of inward clearance in order to avoid congestion in the purser's office.
**HEALTH:** No health formalities.
**RADIO STATION:** A Government Radio Station operates daily from 0700 to 2400. In case of emergency Bonaire Radio can be contacted by telephone. Vessels bound for Bonaire should route their messages for Bonaire through Curaçao Radio (PJC). The Government Radio and Telephone Station maintains daily telephonic communication with Curaçao, also with the United States, Europe, etc.
**TUGS:** None available.
**BERTHING:**
*North Pier:*

| | |
|---|---|
| Berthing space | 225 ft. |
| Depth | 34 ft. alongside at LW |
| Height | 6 ft. |

Maximum permitted load factor on pier is 2,000 kilos per sq. m.
Vessels of maximum 30,000 grt or a maximum length of 738 ft. are allowed to berth alongside.
*Southern pier:*

| | |
|---|---|
| Length | 394 ft. |
| Width | 46 ft. |
| Depth | 50 ft. alongside |
| Height | 6 ft. |
| Length of connecting bridge from shore to pier | 199 ft. |
| Width of connecting bridge from shore to pier | 68 ft. |

*Mooring facilities:*
A: Double Mampaey easy-release electrical capstans (100 tons each)
B: Two (2) bollards 50 tons each
C: Double Mampaey easy-release electrical capstans (100 tons each)
D: Bollards of 50; 25 and 10 tons (every 20 meters)

*Fendering:* Vredestein Gigant Fenders; Block Fenders and D-fenders (made of rubber).

*Roll-on/roll-off Facilities:* Vessels of maximum 66,000 grt or a maximum length of 1,050 ft. are allowed to berth alongside.

Maximum permitted load factor on pier is 2,000 kilos per sq. m.

For the mooring and unmooring at the pier shore labourers are engaged by Agents at the expense of the shipping line. Motor-boats are available for running lines.
**CARGO HANDLING:** About 5 miles South of Krelandijk there is a special pier for bulk handling of salt.
**STEVEDORES:** There are no regular stevedores (longshoremen) available in Bonaire. For cargo handling operations ordinary labourers are engaged by the Agent for account and risk of the ship.

*Working Hours:* Monday–Friday 0700–1200 and 1300–1600. Overtime possible.
**MEDICAL:** Modern facilities are available for medical and dental treatment. A "Medical Service Request" form must be signed by the Master or other authorised officer for crew members requiring medical or dental treatment. In case of crew members having to be left behind at Bonaire for hospitalisation or otherwise, Master must sign an authorisation guaranteeing expense of treatment and repatriation.
**FRESH WATER:** Limited quantities of fresh water from the Government Water distillation and power plant can be supplied at the pier.
**BUNKERS:** On advance request, bunkers are delivered by craft at rates comparable to those in Curaçao or Aruba.
**GANGWAY/DECK WATCHMEN:** Watchmen are not necessary but recommended; Overtime as usual.
**OPENING/CLOSING HATCHES:** This work is normally carried out by crew.
**IDENTIFICATION CARDS:** Passengers. No landing cards required, but some ships carrying a large number of passengers furnish landing cards to passengers for their own control of passengers returning on board. Crew. No landing cards required.
**REPAIRS:** There are no facilities for carrying out major repairs.
**HOLIDAYS:** The following are the official holidays observed in Bonaire: New Year's Day (Jan. 1st); Good Friday; Easter Monday; Queen's Birthday (April 30th); Labour Day (May 1st); Ascension Day; Whit Monday; Kingdom Day (December 15th); Christmas Day (December 25th); Second Christmas Day (December 26th). Religious holidays: August 15th (Assumption Day); November 1st (All Saint's Day).
**TIME:** 4 hours slow of GMT. No Summer time kept.
**AIR SERVICES:** There is a good daily airplane service between Bonaire and Curaçao. Three or four flights a day with good connections at Curaçao with the international services to and from many parts of the world.
**CUSTOM OFFICERS ON BOARD:** One or two Customs Officers will remain on board during the vessel's stay in port. Such officer(s) must be furnished meals at regular meal hours.
**TELEPHONES:** Telephone connection can be placed on board ships at the pier.
**POLICE/AMBULANCE/FIRE:** Police, tel. 8250; Ambulance, 8250; Fire, tel. 8222.
**GENERAL:**

*Live Animals:* The importation of dogs, cats, horses and certain other animals is permitted, provided these animals are accompanied by a certificate issued at place of origin by a licensed Veterinarian, stating that the animal in question is free from any contagious disease.

Dogs must have, in addition, a certificate of Rabies Inoculation. All animals imported (including birds) will moreover be examined on arrival.

*Prohibited Imports:* The importation of the following is strictly prohibited: Parrots and parakeets, absinth, explosives, firearms, ammunition and firework, except with prior permission from local authorities. All kinds of narcotics and drugs, the sale and use of which is regulated by International Conventions, except for legitimate use by and for sale to drugstores by duly accredited importers. Unauthorised reprints of copyrighted scientific and literary works of art. Copper, bronze and nickel coins, except for account of the Government of the Netherlands Antilles. Obscene printed matter.

*Immigration Law:* All passengers disembarking in Bonaire as temporary visitors, for business purposes, on vacation, or in transit to other destination, must be in possession of:
(a) Valid passport/birth certificate.
(b) One passport photograph.
(c) Smallpox vaccination certificate, not over 3 years old.
(d) A return ticket, through ticket or passenger-order to next destination outside of the territory of the Netherlands Antilles.
(e) All documents and visas necessary for continuing to next destination or return to place of origin.
(f) Sufficient means to be able to support themselves during their stay in the territory.

No visa is required from a Netherlands Consul on any of the aforementioned documents.
**AUTHORITY:** Harbour Master, appointed by the Island Government of Bonaire.

## ORANJESTAD, Aruba: 12.31 N. 70.02 W. (See Plan)

**DOCUMENTS:**

Clearance from last port.
Deratisation Exemption Certificate.
Ship's Register.
Manifest of Cargo (or ballast), or Bills of Lading for import goods and transit goods separately.
Crew List (four copies).
List of Stores on Board (two copies).
Consignee Mail (if cargo for discharge).
Passenger List (if any passengers).

The passenger list must carry full names, ages, sex, nationality and occupation of passengers landing at Aruba. The ultimate destination of in-transit passengers must also be shown on the passenger list.

Deratisation Exemption Certificates can be renewed at Oranjestad, Barcadera and St. Nicholas.

Outward clearance, cargo documents and list of outgoing passengers are delivered on board by the Agent's representative, thereby making it unnecessary for Masters to visit the Customs Office to obtain outward clearance.

**PILOTAGE:** Masters are requested to advise Agents of their expected time of arrival at least 48 hours in advance. Arrival messages should include advice regarding cash or other requirements. This information is particularly necessary in order to give prompt attention to vessel's requirements and to avoid delay after arrival.

Pilots are government employees and pilotage is compulsory for vessels from 50 grt upward entering or leaving the harbour. Pilots board inbound vessels within two miles of shore. The Agent's representative will arrange for Pilots to board vessels as necessary. Inbound vessels should close the West entrance of the harbour as near as prudently possible and make a lee to facilitate the Pilot's boarding.

Every vessel arriving or departing must provide and properly secure a pilot ladder which conforms with the standards of construction normally accepted by international safety standards. Failure to provide such a ladder may result in the Pilot's refusal to board a vessel.

**ANCHORAGE:** Anchorages, suitable even for deepest draft vessels, are located outside the protecting reef along the whole length of the Western and South-western coast. The depth of water ranges from 10 to 35 fathoms. Because of the sharply shelving nature of the bottom in this area, it is recommended that the services of a Pilot be obtained in taking up an anchorage. Ships are anchored only during daylight hours.

**TUGS:** A tugboat of 1,000 h.p. is available for assisting vessels to and from the docks. The tug-boat is fitted out with radio-telephone which is open on 2182 Mc. while tug is in operation.

**MINIMUM DRAFTS:** For tankers arriving or sailing in ballast the following minimum drafts are required for manoeuvring under normal weather conditions:

| *G.R.T.* | *Forward* | *Aft* |
|---|---|---|
| 16,600 (T-2) | 8 ft. | 18 ft. |
| 18,000 | 8 ft. | 18 ft. |
| 27,000–30,000 | 10 ft. | 20 ft. |
| 30,000–36,000 | 14 ft. | 22 ft. |
| 37,000 | 14 ft. | 24 ft. |
| 46,000 | 16 ft. | 26 ft. |

**MAX. SIZE:** The harbour itself has a depth of 36 ft. at MLW. The safe salt water draft approved for entering and leaving is 33 ft. Vessels normally enter via the West channel and depart via the East channel.

**HEALTH:** The port doctor will visit an arriving ship only if there is a case of quarantinable disease on board, if the ship has no clean bill of health or if one of the preceding ports of call has been declared to harbour a quarantinable disease. The Netherland Antilles bill of health is free of charge.

**RADIO:** Shore station for R/T communication with 24-hour service. VHF Channel 16, 156·80 mHz (calling); Channel 11, 156·55 kHz (working channel).

HF 2182 kHz, 2558 kHz (working frequency transmitter), 2158 kHz (receiving frequency SSB).

**BERTHING:** In total there are 4,070 ft. of dock length available to accommodate ocean-going vessels and 1,090 ft. of dock for small craft, of which:

1,720 ft. with 36 ft. of water alongside
2,350 „ „ 34 „ „ „ „
460 „ „ 16 „ „ „ „
230 „ „ 10 „ „ „ „
400 „ „ 6 „ „ „ „

**STEVEDORES:** Stevedoring is performed at a fairly fast rate compared with other ports in the Caribbean area. All cargo has to be handled with ship's tackle, while on the docks and in the warehouses fork-lift trucks are used for transportation of merchandise. General cargo is handled at an average of 8 tons per gang per hour.

**MEDICAL:** Excellent medical and dental attention is available at any hour of the day or night to crew members of all vessels.

**FRESH WATER:** Boiler and drinking water of purest quality is supplied by hose from the docks at a rate of 200 tons per hour (in special cases 400 tons per hour)

**FUEL:** The port of Oranjestad is an official Esso bunker station. All grades of bunker fuels can be supplied from shore tanks at a rate of 1,500 barrels an hour. A minimum of 48 hours advance notice is required.

**REPAIRS:** There are no facilities at Aruba for major ship repairs. Local workshops can do repairs of minor nature. Preliminary ad regarding such minor repairs should be included in ETA messa and work requisitions for repairs should be prepared for handlin the Agent's representative immediately upon arrival.

Radar, radio and gyro repairs can be carried out. However, important that Masters radio in their requirements as early as sible and give a brief reference as to the nature of the breakdow fault of the equipment concerned.

While alongside vessels must be prepared to move at one ho notice. Engine repairs to the effect of demobilizing the vessel only be carried out with special permission.

**SURVEYORS:** Representatives of the American Bureau of S ping, the Lloyd's Register of Shipping and the Norske Veritas resident in the area. Masters may request the surveyors' serv through the Agent.

**BALLAST:** Vessels must arrive with sufficient ballast to pe safe handling. All vessels should enter port with clean ballast can be pumped over board when alongside, as it is prohibited pump dirty ballast into the harbour.

**WATCHMEN:** An efficient and continuous watch must be ma tained on deck and in the engine-room of all ships while in port, a sufficient number of men must be on board at all times to m vessels either for harbour operations purposes or in emerge situations.

**OPENING/CLOSING HATCHES:** This work is normally ca out by the crew.

**AIRPORT:** The port of Oranjestad – the commercial and tou harbour of Aruba – is only 5 miles by road from the jet airport. T connection by air with the U.S.A. and Europe are very good rather frequent (TCA, KLM, VIASA); other airlines operating Aruba are: ALM, LAV, Aerocondor, and Caribbair.

**POLICE/AMBULANCE/FIRE:** Police, Oranjestad, tel. 1 Ambulance, Oranjestad, tel. 2010/1234; Fire Alarm, tel. 00.

**CONSULS:** The following countries have consular representati at Aruba:

Brazil
Chile
Colombia
Costa Rica
Denmark
Dominican Republic
Great Britain
Guatemala
Haiti
Italy
Lebanon
Liberia
Nicaragua
Norway
Panama
Peru
Portugal
San Salvador
Spain
Sweden
Switzerland
Venezuela
West Germany

Necessary for Masters of Panamanian and Italian flag vessels visit Consulates at Oranjestad to present documents and rece despatches. Other Consulates have similar requirements. Maste may check with Agent for clarification.

**DEVELOPMENTS:** Landing stage for roll-on/roll-off vessels w depth alongside 33 ft. under construction near Harbour Office.

**TIME:** Local time is four hours slow of GMT. Vessels are request to use local time in ETA messages and when dealing with th Agents.

**CUSTOMS GUARDS:** Local authorities assign one or more Cu toms guards to each vessel during its stay in port; the charges guarding are for the account of the vessel. These officials must provided with meals on board at regular meal hours.

**SHORE LEAVE:** Under normal circumstances no restrictions imposed by the Government Immigration Authorities on sho liberty. Masters are requested to endeavour to have all crew membe on board prior to departure time, so that the ship will have no delay sailing.

**AUTHORITY:** Eilandgebied Aruba, Haven en Loods Dienst.

## PHILIPSBURG, St. Maarten: 18.05 N. 63.10 W.

Philipsburg, capital of Netherlands St. Maarten, lies in a we protected bay in the South-eastern corner of the island. The on obstruction to the harbour is "Proselyte Reef" or "Man-of-Wa Shoals", located 17′ 56″ N. 63′ 04″ W., with a minimum depth of fathoms. Entrance to the harbour can be accomplished by passi either to the North or to the East of this reef.

**DOCUMENTS:**

Crew List: Immigration 1 copy.
Agent 1 copy.
Passenger List: Immigration 1 copy.
Agent 1 copy.
Store List: None required.
Ship's Register: Pilot will require to see this document for obtain ing the official tonnage.

*Note:* No special form is prescribed for the above docume consequently these may be made out in Company's regular for No consular visa required on any of the above documents.

*Immigration:* Immigration officer boards ship immediately aft docking. Passengers and crew are usually free to disembark imme ately after boarding.

*Agency Personnel:* Agency personnel boards immediately aft vessel is docked together with Immigration Officer.

**PILOTAGE:** Pilotage is compulsory and performed by Governme pilots. Ships bound for the pier at Philipsburg should await the Pil at a maximum distance of one mile from the line Point Blanche- Fort Amsterdam.

*Pilot Ladder:* Jacob's ladder, in clean and sound condition is sufficient.

*Time to Berth:* From pilot station to pier, about 15 to 30 minutes.

**ANCHORAGE:** Ample suitable anchorage area available with sufficient depths of water for several large ships simultaneously.

If and when the pier is already occupied by another cruise-ship, cruise-ships can proceed to anchorage, in which case communications between ship and shore to be by ship's own launches.

For ships proceeding to anchorage, pilotage is also compulsory.

**RADIO:** The Government radio and telegraph service operates daily from 0700 L.T. to 2400 L.T. worldwide.

*Radio Telephone:* VHF Channel 10 and 155,925 mHz.

*ETA Messages:* ETA messages should be sent to Agent preferably in local time at least 24 hours in advance and any changes occurring thereafter should be advised.

*Use of Ship's radio in port:* Prohibited.

**TUGS:** None available.

**BERTHING:** The new concrete pier at Philipsburg is located at Point Blanche in Great Bay and has a length of 210 metres, with an additional 60 metres of berthing space, located at a 60° angle to the finger pier. Minimum depth is 34 ft. of water. Four fenders of steel spring and rubber are located along the berthing space.

Height from sea-level to the deck of the pier at high tide is 4·02 metres, at low tide 4·48 metres. Ship will lie with port side to the pier.

*Mooring and Unmooring:* Three dolphins are located in an extended line of the berthing space for mooring. Minimum required size of openings in shackles is 40×50 cm. Mooring boat is available.

*Equipment:* Cranes are available with a capacity of 20 tons maximum. Forklifts up to 8 tons and sufficient flat-bed trailers and low-boys are also available.

**STEVEDORES:** There are three gangs available. Each gang has a total of 9 workers.

**MEDICAL:** Government physicians are available in Philipsburg and there is also a small, but up-to-date hospital operated by the Netherlands Antillean Government. A "Medical Service Request" form must be signed by the Master or other authorised officer for crew members requiring medical treatment.

Dental facilities available.

**FRESH WATER:** Available.

**FUEL:** Not available.

**REPAIRS:** No facilities for carrying out repairs except for radio and radar (Radio Holland).

**SURVEYORS:** There is a representative of Lloyds on the island.

**AIRPORT:** The island is served by A.L.M. (Dutch Antillean Airlines), Air France, Eastern Airlines, K.L.M. (Royal Dutch Airlines), L.I.A.T. (Leeward Island Air Transport), Prinair.

There are direct, almost daily flights, to and from New York and Miami connecting to other major places.

**TIME:** 4 hours slow of GMT.

**HOLIDAYS:** The following Official holidays are observed in St. Maarten: New Year's Day (January 1st); Good Friday (varies); Easter Monday (varies); Queen's Birthday (April 30th); Labour Day (May 1st); Ascension Day (varies); Whitmonday (varies); St. Maarten Day (November 11th); Kingdoms Day (December 15th); Christmas Day (December 25th); Boxing Day (December 26th).

**TELEPHONE:** Service from ship to shore is not available.

**GENERAL:**

*Ship's Bars and Shops:* No restrictions and these may remain open for business while in port.

*Laundry:* Available.

*Wind:* Prevailing winds on the island between the months of March and December are East to South, velocity 6 to 10 knots. Between December and March winds are generally North to East at a velocity of 8 to 15 knots.

*Tide:* The tidal range in Philipsburg is at most 2 ft., but regularly not more than 1 foot.

*Current:* The current outside Philipsburg harbour changes from Easterly to Westerly, with a maximum velocity of 2 knots. At the Pier the current generally runs from North to South, with an average velocity of ½ knot.

*Gangways:* No gangways are available from the pier and ship's gangways will have to be used.

*Ship's Launches:* There are no restrictions on the use of ship's launches.

*Stores:* Available.

*Garbage:* No disposal facilities available.

*Port Health:* No regulations or requirements.

*Customs:* None.

**AUTHORITY:** Harbour Master.

**AGENTS:** S.E.L. Maduro & Sons (Windward Islands) Inc., Emmaplein, PO Box 63, Philipsburg, St. Maarten N.A. Telegraphic Address: Maduroship Stmaarten. Tel. 2202/2207.

## ST. NICHOLAS, Aruba: 12.26 N. 69.55 W. (See Plan)

**DOCUMENTS/HEALTH** and all General Information, refer to "Oranjestad".

**PILOTAGE:** Pilotage is compulsory. Pilot boards off west Entrance within two miles of the shore. Inbound vessels are expected to approach the entrance as near as prudently possible and make a lee to assist Pilot boarding.

A pilot service for anchoring off Lago Aruba terminal during the hours of darkness is now available upon the Master's request, providing radar and echo sounder are functioning properly.

**RESTRICTIONS:** The port is open for day and night navigation, allowing vessels to enter and leave at any hour. The harbour has a depth of 42 ft., while the East and West channels are 45 ft. deep. The safe salt water draft approved for entering is 39 ft., for leaving – 41ft. Vessels normally enter via the West channel and depart via the East channel.

**RADIO:** A lookout tower and signal station is remotely controlled by close circuit TV and is operated by Lago. This tower is located immediately above the Marine Office building. The signal station maintains 24-hour service. Radio-telephonic communication is possible on wavelengths of 156.70 and 156.80 MC/VHF (Channels 14 and 16).

**TUGS:** Two diesel-powered tugs are used for berthing and unberthing.

**MAX. SIZE:** Tankers up to 400,000 dwt. at new Aruba Sea Berth, depth alongside, 80 ft. MLW.

**BERTHING:** All port facilities are controlled by Lago Oil and Transport Company.

The maximum limitations for vessels using San Nicolas facilities are:

| *Berths* | *Length* (ft.) | *Beam* (ft.) | *Salt water max. draft* (ft.) | *Bow to Manifold* (ft.) | *Deadweight* |
|---|---|---|---|---|---|
| 1 South | 745 | UNL | 39 | 376 | 50,000 |
| 1 North | 740 | 110 | 39 | 356 | 50,000 |
| 2 South | 800 | 110 | 40* | 400 | 50,000 |
| 2 North | 780 | 110 | 39 | 365 | 50,000 |
| 3 South | 900 | 130 | 41 | 440 | 90,000 |
| 3 North | 850 | 120 | 40 | 390 | 80,000 |
| West Pier | 650 | UNL | 34 | UNL | 25,000 |
| Reef Berth | 1,200 | UNL | 75 | UNL | 400,000 |
| HDS Pier | 700 | UNL | 30 ft. 6 in. | UNL | 14,000<br>(dry cargo only) |

*Note:* *2 South – 40 ft. mean draft with recommendation load with one foot trim by stern or 39 ft. 6 in. forward and 40 ft. 6 in. aft.

The maximum entering draft is 41 ft. even keel salt water. The following is the suggested ballast draft for vessels.

| *MDWT* | *Fore (ft.)* | *Aft (ft.)* |
|---|---|---|
| 10–20 | 8 | 18 |
| 20–30 | 10 | 20 |
| 30–40 | 14 | 22 |
| 40–50 | 14 | 24 |
| 50–90 | 16 | 26 |

*New Sea Berth:*

(*a*) Position: 12.26.1 N. 69. 55.6 W.

(*b*) Pilotage: Pilot will board 2 miles West of berth. Docking will be during daylight hours only during initial operations.

(*c*) Design Data: Pier heading is approx. 130° T. Wind is less than 20 knots 70 per cent of the time, and less than 25 knots 97 per cent of the time. Current is less than 0·2 of a knot 90 per cent of the time.

| *Wind* | | *Current* | |
|---|---|---|---|
| *True* | *% of time* | *True* | *% of time* |
| 20°–40° | 2 | 40°–70° | 24 |

| 110°–120° | 13 | 320°–340° | 25 |
| 140°–170° | 1 | | |
| 220° | 5 | | |

There are four breasting dolphins at 100 ft. intervals, each with double quick-release hooks, and four mooring dolphins with triple hooks, all interconnected by catwalks. Distance between mooring dolphins one and four is 1,300 ft. Vessels require twelve mooring lines, and Pilot may require one synthetic line to be run to a port bow buoy, depending upon environmental conditions.

There are two 3,000 h.p. tugs and one of 4,000 h.p. on stand-by for initial dockings.

Approach velocity is continuously measured by Radar Doppler mounted on No. 1 and No. 4 breasting dolphins.

There are four 16-in. cargo transfer arms and with 12-in. connections and one 8-in. bunker arm.

Crude discharge-loading line is 36 in. diameter, 3,000 ft. long.

(*d*) Mooring for VLCC's: Mooring arrangement and hawser loads were calculated using ER & E computer programmes taking into consideration vessels loaded condition, wind and current velocities and directions.

Mooring lines assumed to be 1½ in. diameter steel wire with a breaking strength of 90 to 100 tons.

Mooring winches assumed to have about 25 metric tons heave capacity and 55 metric tons brake holding capacity.

The combination of a wire and a synthetic line to a single dolphin will not be permitted.

Self-tensioning not permitted. Automatic tension winches should be used on manual brakes.

Synthetic tails on wire lines should have a higher braking strength than the wire to which they are connected to allow for in-service strength reductions. The eyes of tails should be protected from abrasion with suitable coverings, and tails should be connected to wires with suitably designed shackles.

The ship always docks port side to with, approximately 8 shackles out on the starboard anchor which will have been walked out in about 180 ft. of water.

A mooring launch may be used depending upon environmental conditions. Mooring capstans on dolphins have a 2·2 ton pull and a 100 ft. a minute line hauling capability.

Before arms are connected, the correct setting of winch brakes will be checked by ship/shore personnel as follows:

(1) Mechanical brakes by torque wrench.
(2) Hydraulic brakes. The settings as recommended by the manufacturer to be confirmed by mutual inspection.

A maximum of only two layers of line to be allowed on working or tension drum of split drum winches.

(*e*) Safety: A safety inspector will board the ship while vessel is moored alongside and will complete the IOTTSG safety check off list accompanied by the Master's Representative.

VHF communication between the vessel's cargo control room and the oil movements control room must be maintained as long as the vessel is alongside.

UHF communication between the cargo control room and the Berth Operator will be maintained as long as the vessel is alongside.

A high-level alarm will sound from the tower on the berth when the crude level in the shore tank is approaching maximum level. Vessel's pumps should be stopped or by-pass opened immediately on hearing the alarm or on being advised by the Berth Operator by voice radio.

For the security of the ship and terminal, the area between the Sea Berth and the gate to San Nicolas is closed to pedestrian traffic. Arrangements for crew transportation can be made by calling the Marine Agency Section.

*Wind Tolerance:* At 30 m.p.h. loading will be discontinued and loading arms will be drained. Tugs will be called out. Engine to be confirmed ready for use.

At more than 30 m.p.h. or gusting to more than 30 m.p.h. arms will be disconnected. The Senior Pilot and Marine Advisor, together with the ship's Captain, will decide whether to take the ship out of the berth.

**FRESH WATER:** Fresh water can be supplied ex-wharf.

**FUEL:** All grades of bunkers available.

*Sea Berth:* Vessels arriving for bunkers only with a draft greater than 41 ft. must use the Sea Berth (Reef Berth). As the berth is used for crude oil trans-shipment bunkering vessels can expect delays. Also the following considerations apply:

1. Vessels working cargo have priority over vessels bunkering.
2. In assigning tugs, vessels working cargo take priority. (3 to 4 hours tug service required at the sea berth.)
3. Mooring launches require 48 and 24 hours notice.
4. Vessels using the berth must have 12 good mooring lines. All mooring winches and equipment will be inspected and must be in good order. Vessels may not be docked if equipment is faulty.
5. In the event of marginal weather, deep draft vessels calling for bunkers may not be docked.

**REPAIRS:** A local workshop can do minor repairs.

**PORT FIRE PROTECTION:** The port of St. Nicolas is very well equipped with modern equipments for fire-fighting and fire prevention.

**BALLAST:** Tankers must arrive with clean ballast only. Clean ballast will be discharged overboard after docking. Only slops can be discharged to the disposal facilities ashore.

**SPECIAL REGULATIONS:** Strict compliance with Harbour Safety Regulations is mandatory. Stringent regulations prohibit the transportation of alcoholic beverages through Lago refinery and harbour area. No liquor or beer may be taken on board or removed from vessels except only bonded stores ordered by the Master.

**SHORE LEAVE:** As all ship's personnel when going ashore have to walk over the docks and the company's concession, nobody is allowed to leave the docks without a proper pass. Passes which are valid for the day of issue and the following day only, entitle personnel to proceed from the dock at which their ship is berthed to the main refinery gate and vice versa. Shore passes are not valid for the refinery area.

**POLICE/AMBULANCE/FIRE:** Police, 5000; Ambulance, 5050; Fire, 00.

**AUTHORITY:** Lago Oil and Transport Co.

## SINT MICHIELSBAY, Curacao:

Sint Michielsbay, on the South coast of Curacao, 5 miles North-west of Willemstad, is an open bay, naturally protected from prevailing winds and sea.

**PILOTAGE:** Compulsory.

**ANCHORAGE:** In the bay 650 ft. out of the coast in 130 ft. water is laid a mooring buoy, which gives a good anchorage to vessels which, because of dangerous cargo, quarantine or because of a defect cannot enter another port of Curaçao.

**BERTHING:** Vessels moored with their stern to the buoy and their bow anchors are heaved out to hold the foreship from the coast.

**REPAIRS:** Repairs or handling cargo can be carried out by way of barges. A landing jetty for barges is available.

**GENERAL:** Other services as tugboats, lighterage, stevedoring, etc. are rendered from Willemstad.

**AUTHORITY:** Harbour Master, Curaçao.

## WILLEMSTAD/EMMASTAD, Curacao: 12.06 N. 68.56 W. (See Plan)

**DOCUMENTS:**

For Immigration.

2 copies of Crew List.

2 copies of List of Passengers Landing at Curaçao (if any).

2 copies of List of Passengers in Transit (if any).

For Customs:

1 copy List of Stores (deck, engine and steward department).

Manifest of Cargo for Curaçao, if any, in duplicate, on special form called "Vrachtlist".

Manifest of Cargo for Curaçao, in transit, for trans-shipme other ports, if any, in duplicate.

Manifest of Cargo on Board, in transit, if any, in duplicate.

2 copies of Tally Books of Cargo for discharge at Curaçao, if

If the ship is in ballast only the store-list is required.

1 copy Crew List.

1 copy Passenger List landing at Curaçao.

**PILOTAGE:** Pilotage is compulsory. Rendered day and n Pilots are government officials and are stationed at Willem Caracasbay and Bullenbay. The Harbour Master is also the hea the Pilot Service.

Vessels bound for Curaçao should proceed to Willemstad har except when they have specified orders for another bay. Vesse sight of Willemstad will be contacted by the signal station at Nassau for further orders. From this same station lights are sh to direct the traffic in port. Vessels should stay ¾ miles off s West of the harbour entrance to await Pilot. The pilot motor bo identified by a blue flag with the letter "L" at daytime and a red above a white at night time.

**ANCHORAGE:** As a rule there is no anchorage area in the har of Willemstad, but in the Eastern part of the Schottegat there is pair of mooring buoys available to await berth or orders for lim time subject to permission and conditions from the Harbour Mas

Two vessels alongside each other can be safely moored at bu Depth: 38 ft.; distance between the buoys from 900 ft.

**RESTRICTIONS:** The harbour of Willemstad consists of a yd. long and minimum 270 ft. broad channel, the St. Annabay, depths from 49 to 79 ft. and an adjacent inner bay, the Schotteg 150-acre body of water with a depth of more than 10 ft. and a m mum of 79 ft.

The navigable portion of the entrance of the port is 865 ft. marked on either side by a light-buoy, and the minimum dept 49 ft.

**BRIDGES:** Santa Anna Bay is crossed by two bridges, the Qu Emma floating pontoon bridge, and the new, fixed bridge.

The pontoon bridge opens day and night for in and outgo vessels. There will no longer be any waiting period at the har entrance. Automobile traffic will be diverted to the new bridge those on foot will have continuous ferry service available. S will have overall preference for openings.

The new fixed bridge, dominating Willemstad's skyline and entrance to Schottegat Bay, is 185 ft. high, (clearance 180ft.) enab the biggest vessels to pass under. The bridge is of box girder c struction and is open to automobile traffic only. No smokin permitted by passing motorists, and glare-proof lights are insta to prevent interference with light signals that harbour pilots rel when bringing a ship through the channels.

**MAX. SIZE:** Length 1,000 ft., draft 45 ft.

**RADIO:** Port Operations Station (Operated by Harbour Auth ties): Location, Fort Nassau. Call sign, Fort Nassau. Frequenc International Channels 16 (156·80 Mc/s), calling and safety; 12 (15 Mc/s), working, first choice; 14 (156·70 Mc/s). Watchkeeping hours on Channel 16. Type of operation, Simplex, Frequency mo lated. Range, 20 to 25 miles.

Main Private Station (Operated by Shell Curaçao N.V.): Locat on the Zwarteberg. Call sign, Shell Curaçao. Frequency, internati Channel 25 (receiving, 157·25 Mc/s); transmitting, 161·85 Mc Type of operation, Duplex working, frequency modulated; oper by remote control from Shell's telephone exchange; ask operator connection with party desired. Range, 20 miles. Watch-keepi 24 hours on Channel 25; normal daily business, 0730 till 2400 hou urgent business only, 2400 till 0730 hours.

Tug Base Station: Location, on the Zwarteberg. Call sign, Ma Department – for tug movements only and in an emergency to di the tugs. Watchkeeping during office hours. Central Post – for t movements only. Watchkeeping 24 hours. Shell Curacao – for em gency calls to tugs only after having been alerted on Channel 25. watchkeeping. Frequency, International Channel 14 (156·70 Mc Operation, Simplex – frequency modulated. Operation by rem control from Shell's Marine Department, Central Post and teleph exchange.

Tug Mobile Stations: Location, one on each tug. Call sign, Kor Passaat or Karet. Frequency, International Channels 16, 12, 1 and 6. Watchkeeping, 24 hours on Channel 14. Operation, Simple frequency modulated.

**HEALTH:** The port doctor will visit only if there is a case of quar tinable disease on board. The Netherlands Antilles Bill of Heal free of charge.

**TUGS:** Compulsory for all tankers longer than 700 ft. and dry ca longer than 750 ft.

L. Smit & Co. International Tug Service has a permanent oce towage and salvage base in the port of Willemstad. There is alwa powerful salvage tug at the station which has been especially eq ped to deal with casualties and a harbour tug of 1,350 h.p.

Shell Curaçao has stationed here three sea-going motor-tu 1,250 h.p. and 2,250 h.p.

The Curaçao Dry Dock Company has a motor-tug of 350 h.p. one of 225 h.p.

There are a few harbour tugs available varying from 60 to h.p. and about 80 lighters to receive the cargo or to bring the ca alongside a vessel varying from 60 to 250 ton capacity.

**BERTHING:** There are berths on either side of the St. Anna North of the pontoon bridge, with depths varying from 18 to 3 alongside, generally used for bunker, cargo and passenger ship

On the Eastern side 4 wharves: the Handelskade, depth 18 ft.; Kleine wharf, depth 24 ft.; Grote wharf, depth 31 ft.; and Sala depth 24 ft.

On the Western side 6 wharves: the Matheywerf, depth 23 ft.; Westwerf South, 25 ft.; Westwerf North, 36 ft.; Nieuwe werf, 33 ft.; Motetwerf, 33 ft.; Oranjewerf, 19 ft.

In the Schottegat there are seven more berths, generally used for bunker, cargo or passenger ships.

Prins Hendrikwerf which closes the Western corner St. Annabay/Schottegat, has a depth of 35 ft.; however, ships with a draft of more than 35 ft. can be moored by way of placing rafts of 10 ft. width between vessel and the quay.

At the Eastern part of the Schottegat are the Admiraal Brionwerven, which has 3,000 ft. docking space available with 34 ft. depth alongside.

In the Schottegat on the peninsula of Asiento are situated the 14 piers owned by Shell Curaçao Ltd. which are mostly used by tankers; however, other vessels are enabled to use these wharves for bunker facilities. Valentijnpier No. 5 may be used for general cargo.

The names and the depths alongside these piers from West to East are: Pier I, 32 ft.; Piers II and III, 34 ft.; Pier IV, 40 ft.; Pier V, 46 ft.; Pier VI, 41 ft.; Pier VII, 34 ft.; A-pier, 34 ft.; Pier VIII, 46 ft.; Margrietpier (two berths), 35 ft.; Pier IX, 36 ft.; Pier X, 33 ft.; Pier XI, 19 ft.

The Schottegat also has about 4,000 ft. of quay available for repairs. The names of the wharves, lengths and depths alongside are: Beatrix I and II, 1,300 ft. – 21 ft.; Beatrix III, 400 ft. – fore 10 ft., aft 35 ft.; Beatrix IV, 350 ft. – 31 ft.; Beatrix V and VI, 1,000 ft. – 37 ft.; S.E. Quay, 750 ft. – 25 ft.

In the Schottegat is a special berth, Bernhardkraan, with fixed sheerlegs for the purpose to discharge or to load heavy lifts up to 150,000 k/gs. Depth alongside this berth is 30 ft.

Docking of cruise ships in Willemstad harbour: The following piers are regularly used by cruise ships and cargo ships:

Nieuwewerf, Motetwerf: West side St. Anna Bay. Type: quay. Construction: sheet piling, concrete top, stelcon plates floor. Length: 1,200 ft. Draft: 33 ft. Height above water: 4 ft. One transit shed each: Nieuwewerf, width 65 ft., length 216 ft., area 14,000 sq. ft. Motetwerf, width 65 ft., length 216 ft., area 14,000 sq. ft. Open space area 200,000 sq. ft. One warehouse facility 6,500 sq. ft.

Oranjewerf: On West corner St. Anna Bay/Schottegat. Type: quay. Construction: iron piles, concrete top, concrete floor. Length: 418 ft. Draft: 19 ft. Height above water: 6ft. Special bunker pier, cargo handling mostly via lighters alongside.

Prins Hendrikwerf: In the Schottegat near West corner St. Anna Bay. Type: quay. Construction: iron piles, concrete top, concrete floor. Length: 700 ft. Draft: 34 ft. Height above water: 5 ft. One transit shed: width 65 ft., length 385 ft., area 25,000 sq. ft. Open space area 100,000 sq. ft. No warehouse facilities.

Admiral Brion Wharves: Nos. 1, 2, 3, 4, 5 and 6 situated at the East side Schottegat. Type: quay. Construction: sheet iron cells with concrete top, asphalt floor. Total length: 3×1,000 ft. Depth: 34 ft. Height above water: 5 ft. Two transit sheds: one with width 65 ft., length 680 ft., area 44,000 sq. ft.; one with width 65 ft., length 330 ft., area 21,000 sq. ft. Open space area 510,000 sq. ft. A special platform for Ro/Ro ships has been constructed. Maximum draft: 33 ft.

Kleinewerf, Grotewerf, Salazarwerf: East side of St. Anna Bay. Type: quay. Construction: sheet piling, concrete top, asphalt floor. Total length wharf: 1,470 ft. Maximum draft alongside 24–31 ft. Height above water: 2 ft. One transit shed, width 65 ft., length 330 ft., area 21,500 sq. ft. Open space area 154,000 sq. ft.

**SLOP RECEPTION FACILITIES:** Available at all Shell Terminals.

**FRESH WATER:** Fresh water for drinking purposes and use in boilers is available day and night in sufficient quantities at all wharves. Fresh water is also delivered alongside by means of water barges.

**FUEL:** Besides the Shell piers there are two bunkering installations: namely, the "Admiral Brion Wharves" comprised of six berths and the "Motet" bunkering installation comprised of four berths.

The "Admiral Brion wharves" bunkering installation is directly supplied from the refinery by means of two pipelines with diameters of 12 and 8 inches. The pipelines run the full length of the piers, each with five bunkerpits, from which the oil can be delivered directly to the ships via a mobile blending unit if this is required. The capacity of the pipeline and the pumps is 600 tons per hour for fuel oil and 300 tons per hour for diesel oil. Gas oil is also available.

The bunkering facilities of the "Motet" installations in Otrabanda, which are comprised of seven storage tanks and pumping facilities, are supplied through two pipelines of twelve and six inches diameter from the refinery. The rate of delivery, by gravity and pumps, is 600 tons per hour for fuel oil and 500 tons per hour for diesel oil.

Modern fuel blending facilities are available at all installations in Willemstad.

**REPAIRS:** The Curacao Drydock Company Inc. has repair yards, two graving docks and one floating dock laid out in the Schottegat.

The largest graving dock is 919 ft. long, width of entrance between wheel fenders 152 ft. and a depth of water over sill of 27 ft. 10 in. Suitable for up to 120,000 dwt. Movable cranes of 25 and 75 tons lifting capacity are fitted alongside the dock.

The Curacao Drydock Company Inc. has 4,000 ft. of repair wharf with varying depths up to 40 ft. Cranes alongside up to 75 tons lifting capacity. A floating crane with capacity of 30 tons and a mobile truck crane of 140 tons also available.

Electric shore-power A.C., D.C. 110, 220 or 440 volts can be supplied directly from shore at wharves of Shell Curacao Ltd. and at other wharves from generators on barges. Shell can also supply steam directly from the shore at a pressure of 8–15 kg/cm.

**STEVEDORES:** Gangs must be engaged between 0600 and 0630 for the day, on week-days and Saturdays. For work on Sundays and holidays, gangs must be ordered between 0600 and 0630 on Saturday or the workday preceding the holiday. Masters of vessels carrying out cargo operations are consequently recommended to advise Agents their ETA well in advance of above deadlines.

**TIME:** Curaçao time 4 hours slow of Greenwich time.

**HOLIDAYS:** New Year's Day, Good Friday, Easter Monday, Queen's Birthday, Labour Day, Ascention Day, Whit Monday, Kingdom Day, Christmas Day, Second Christmas Day. "No work", holidays for cargo operations: New Year's Day, Good Friday, Labour Day and Christmas Day.

**GENERAL:** Customs Officers remain on board on duty during the vessel's stay in port. They must be fed by the ship and are entitled to the equivalent of officers mess or first-class dining saloon.

**REGULATIONS:** Both anchors should be ready for immediate use. Defects of engines, steering gear, anchor gear and other defects which influence manoeuvring abilities of the vessel should be reported before entering, to the Harbour Master. Vessels carrying explosives must obtain a permit from the Harbour Master before entering.

**DEVELOPMENTS:** During 1973 a new repair quay 2,500 ft. long and 41 ft. deep has been built, with a trial berth on the inner side for ships up to 1,000 ft. with a maximum draft of 40 ft.

**AIRPORT:** There are daily international flights from Dr Albert Plesman Airport.

ALM: Frequent daily trips to Aruba and Bonaire. Daily flights to Miami and New York. Regular air services to St. Maarten, Caracas, Maracaibo, Colombia, Haiti, Sto. Domingo, Puerto Rico, Trinidad and Paramaribo.

Eastern Airlines: Daily flights to Puerto Rico and transfers to all points.

American Airlines: Daily flights to New York and transfers to all points.

VIASA: Regular scheduled flights to Caracas, Sto. Domingo, Paris and Amsterdam.

Aerocondor: Daily flights to Colombia.

LAV: Many daily flights to Caracas.

KLM: Daily flights to Amsterdam, Lisbon, Madrid, Frankfurt and Zurich.

*Ferry:* Ferry's Del Caribe S.A. runs a regular service with a new modern ferry which carries 1,200 people and 120 automobiles. This ferry has regular service between Curacao and Coro, Venezuela on Monday, Tuesday, Wednesday and Thursday. On Thursday the ferry also goes to Aruba and Punto Fijo, Venezuela.

**AUTHORITY:** The Harbour Master.

**AGENT:** SEL Maduro & Sons Inc., Schouwburgweg 16, POB 304, Willemstad, Curaçao, Netherlands Antilles. Tel. 37900. Telex: 1092 Selms NA. Cables: "Maduroship".

# New Caledonia

## NOUMEA: 22.16 S. 166.27 E. (See Plan)

**DOCUMENTS:**

Ship's Register.
Safety Certificates.
Cargo Manifests.
List of Dangerous Cargo.
Passenger List.
Crew List.
Crew Personal Effects List.
Bonded Stores List.

**PILOTAGE:** Compulsory for vessels over 60 metres LOA. ETA to Port Captain and Pilots required 24 hours in advance. The two access channels to Noumea are Boulari channel (Amadée light) and Havannah channel. Pilot boats are wooden launches about 15 metres long equipped with VHF.

*Boulari Channel:* Pilot boards one mile off, on the alignment of the Amadée high and low lights.

*Havannah Channel:* Pilot boards off Goro light on the alignment of the leading lights on Cap N'Dua.

In bad weather, pilot launches will remain on these leading lines, but as close as possible to the channel entrances.

**ANCHORAGES:** Available in the outer and inner roads of Noumea, as indicated by the Pilot. Prohibited zones are marked on the chart.

**RESTRICTIONS:** Vessels may enter and anchor at any time, mooring may be effected at night.

**MAX. SIZE:** Tanker buoy berths designed for 20,000 dwt., and 45,000 dwt. Draft limited to 13 metres by a bar between the reef and the port.

**HEALTH:** Unless vessels have signalled that there is suspected disease or fever on board, free pratique is given automatically by radio request to the Capitaine du Port or by the Pilot.

**RADIO:** All messages by coast station Noumea, call sign FJP. Harbour Master's office equipped with VHF, Channels 16, 12 and 14, operated during normal working hours.

**TUGS:** Tug's service is compulsory. One tug of 1,200 h.p. and one of 500 h.p. available to assist.

**BERTHING:** At old Port Authority quay, draft limited to 7·50 metres. Quays under construction to accept vessels up to 10·0 metres draft and over 200 metres length. Private berths of Nickel Company are dredged to accommodate 9 metres draft.

**STEVEDORES:** Service provided by three private companies. Two or three days' notice required to arrange work.

**MEDICAL:** Doctors, hospital, and three private clinics available. Smallpox vaccinations are compulsory.

**TANKERS:** Buoy berth, max. draft 40 ft. Shell berth (at Nickel Company), max. draft 9 metres at HW.

**DENSITY:** 1026.

**FRESH WATER:** Supplied by pipe-line at the quays; rate, 40 tons per hour.

**FUEL:** Several grades available from Shell and Mobil.

**GANGWAY/DECK WATCHMEN:** Recommended, but not compulsory.

**OPENING/CLOSING HATCHES:** Can be performed by stevedores if required.

**CUSTOMS ALLOWANCES:** 200 cigarettes per man. Additional allowance can be made after 10 days. Max. 3 bottles spirits per man. Wines and beer not limited.

**IDENTIFICATION CARDS:** Recommended that crew carry Seamen's Books.

**CONSULS:** Australia, Belgium, Indonesia, Italy and Norway, are represented locally.

**REPAIRS:** Many engine, hull and electronic repairs can be effected. Slipway for small vessels.

**REPATRIATION:** All facilities available for crew change and repatriation.

**AIRPORT:** Tantouta Airport situated 50 km. from Noumea. Several connections a week to all parts of the world.

**TIME:** GMT plus 11 hours. No alterations during the year.

**HOLIDAYS:** 1st January, Easter Monday, 1st May, Ascension Day, Whit Monday, 14th July, 15th August, 1st November, 11th November, 25th December. Work may be arranged on Sundays and holidays.

**POLICE/AMBULANCE/FIRE:** Police, tel. 17; Fire, tel. 18; Ambulance, tel. 721.21.

**TELEPHONES:** Can be connected on board passenger vessels. The apparatus belongs to the Compagnie des Messageries Maritimes.

**SHORE LEAVE:** Allowed.

**AUTHORITY:** Port Autonome de Noumea, Quai des Volontaires, BP 14, Noumea. Tel. 759–66.

## New Zealand

### AUCKLAND: 36.52 S. 174.46 E.

**DOCUMENTS:**

3 copies Passenger List.
3 copies Crew List.
1 Copy Search List (Form 2).
1 Copy Stores List (Form 3).
1 Copy Prohibited and Restricted Immigrants.
1 Copy Poisons List.
1 Copy Animals and Birds List.
1 Copy List of Firemans (not cargo).
1 Copy Arrival Manifest (Form 1).
1 Copy of List showing the gross tonnage of cargo for discharge in New Zealand.

**PILOTAGE:** Vessel approaching port to give 24 hours notice by radio. A second notice confirming or amending first to be sent 4 hours before expected time. Signal Station on Mt. Victoria, call sign ZLEA, calling frequency 2182 kc/s, working frequency 2012 kc/s. VHF, call sign "Auckland Port Control", Channel 12 and 16. Continuous listening watch on Channel 16.

Pilot launch is 64 ft. long, single mast, painted white. Name is *Akarana*. Standard flag and lights are shown. Word "Pilot" painted in black on white above cabin. Pilots board one mile North of Rangitoto Beacon, but will proceed farther when necessity arises. Good pilot ladder with manrope required to within five ft. of waterline with proper lighting at night. Heaving lines will be needed for mail and for portable radio.

**ANCHORAGE:** For vessels waiting Pilot: Gulf Anchorage No. 1 bearing 000° distance two miles; No. 2 bearing 006° distance 2·5 miles; No. 3 bearing 012° distance 3 miles. Bearings and distances from Rangitoto Beacon.

All inner anchorages in pilotage area can be indicated by Pilot. All anchorages are in 6 to 15 fathoms with good holding ground.

**RESTRICTIONS:** Ships may enter harbour at any time of day or night. Main channel has least depth of 36 ft. chart datum. Vessels with greater draft must wait for tide to make and enter at Harbour Master's orders. Tankers not berthing immediately on arrival anchor as directed at one of gulf anchorages.

**MAX. SIZE:** No limits, within reason, on the length or breadth. Controlling depth at chart datum: entrance 36 ft.; Rangitoto Channel 36 ft.; anchorages 32 to 60 ft.; berths 20 to 40 ft.

**HEALTH:** 24 hours before arrival time, despatch message to Port Health, Auckland. Message to state ETA, last port, number of crew, number of passengers and state of health. 12 hours before arrival confirm ETA.

Doctor boards by way of vessel's shipside gangway (not pilot ladder) when in harbour. This gangway to be ready immediately on arrival in order to avoid any delay. A responsible person should meet doctor at head of gangway and conduct him to appropriate person.

*Papers required:*
Completed Maritime Declaration of Health.
Derating Certificate.
Complete Crew List with dates of last smallpox vaccination.
Complete Passenger List with dates of last smallpox vaccina
N.B. Crew and Passenger Lists to be certified as being corre the Master.
List of Addresses of Disembarking Passengers.
List of Dangerous Cargo on board.

Pratique is granted initially, and covers all subsequent co movements in New Zealand for that voyage. Radio pratique ca granted only after prior approval from New Zealand Health De ment.

Vessels requesting pratique should exhibit appropriate I national Code Signals by day and night until pratique is grant

**RADIO:** Station for routing traffic to the Auckland area is A land Radio. Call sign ZLD. Working both W/T and R/T on contin watches.

**RADAR:** Radar station with range of 45 miles located on Mt. toria 36° 49′ 42″ South, 174° 47′ 57″ E. Masters may call on radio phone and request particulars of their bearing and range as sh on radar screen. Responsibility for the use of this information r entirely with Master of vessel.

**TUGS:** Four tugs available. Tugs join vessel East of Eastern T Wall. Tugs supply lines at no extra charge.

**BERTHING:** Tankers berthing at Eastern Tide Wall, BP De must berth in accordance with weather and tidal conditions. T ers must arrive at Pilot station not later than half an hour be sunset, otherwise berthing will be postponed until following m ing.

Depth of water: Bledisloe, 31 ft./35 ft.; Captain Cook, 25 ft./3 Eastern Tide Wall, 33 ft./35 ft.; Hobson, 17 ft./22 ft.; Jellicoe, 2 35 ft.; Kings, 13 ft./30 ft.; Marsden, 9 ft./20 ft.; Princes, 25 ft./3 Queens, 30 ft./34 ft.; Wynyard, 25 ft./34 ft.; Freyberg, 32 ft./35 ft.

**BRIDGES:** No particular time to pass under Auckland Har Bridge. Navigation span is 138 ft. to 131 ft. above MHWS for 2 each side of centre.

**STEVEDORES:** Labour commences at 0730. In order to en labour for this time ETA should be received at Agent's office be 1500 previous day, or before 1500 previous Friday for a Mon start. Delays on radio messages may be up to 3 hours.

**MEDICAL:** In case of urgent medical attention being requ Agents can arrange for doctor to board in stream at any no Hospital and ambulance services available 24 hours. If any sma vaccinations have expired this must be included in ETA advice.

**TANKERS:** There are three tanker berths, two with 35 ft. de LWST suitable for tankers up to 600 ft. LOA. One berth in de 27 ft. LWST for vessels up to 560 ft. LOA.

Any size pipe-lines can be used, oil companies have all redu pieces needed.

No facilities for slop discharge.

**DENSITY:** Always 1025.

**FRESH WATER:** Fresh water always available. Delivery rate tons per hour, through canvas hoses. AHB supplies all equipm

**FUEL:** Light fuel oil, diesel, gas oil and heavy fuel are availa To be ordered in ETA notice.

**FIRE PRECAUTIONS:** In addition to usual precautions, Cle tankers are under extra security with a nightwatchman from Harb Master's staff in addition to the normal tanker guard.

**BULK HANDLING FACILITIES:** Fergusson Wharf Comple Eastern end of port includes roll-on/roll-off sections and 1,500 ft berthage for container vessels. Water depth maintained at 4 LWST.

**GANGWAY/DECK WATCHMEN:** Watchmen are necess Best to use crew.

**OPENING/CLOSING HATCHES:** Crew can open comple mechanical hatches only. All other hatches opened by waters workers.

**CERTIFICATES:** Register, Deratisation, Load Line, Safety Equ ment, Safety Radio, Articles of Agreement, are main Certifica required.

**CUSTOMS ALLOWANCES:** 1 bottle of spirit (in use) *or* 1 bo of wine (in use) *and* 12 quart bottles (or the equivalent) of be 200 cigarettes *or* ½ lb. of tobacco *or* 50 cigars.

**CARGO GEAR:** Preventer guys must be entirely wire. All blo and shackles must be moused. Safety strops on all heel blocks wires, ropes, chains and blocks to have Certificate of Test.

**IDENTIFICATION CARDS:** Not required.

**CONSULS:**

Belgium
Denmark
France
West Germany
Greece
Italy
Japan
Netherlands
Norway
Panama
Philippines
Sweden
U.S.A.

**REPAIRS:** Any ship repairs can be carried out. A slipway can b vessels of 600 tons displacement and up to 211 ft. LOA.

**DRY DOCKS:** Maximum size of vessel that can be accommoda in Calliope dry dock is 595 ft. LOA and 65 ft. beam. Water on sl MHWS 33 ft.

**REPATRIATION:** All facilities exist for repatriation.

**AIRPORT:** 8 miles from harbour to airport. Served by all ma international airlines.

**TIME:** Local time is GMT plus 12 hours throughout the year.

**HOLIDAYS:** No work is done on these days: New Year's Day

January); Good Friday; Easter Monday; Anzac Day (25th April); Queen's Birthday (first Monday in June); Labour Day (fourth Monday in October); Christmas Day; Boxing Day. In addition, each Province has an Anniversary Day and a Waterside Workers' Picnic Day. In Auckland these are in last half January.

**POLICE/AMBULANCE/FIRE:** All emergency services are called through one telephone number. Dial 111 and state service required.

**TELEPHONES:** Telephones at all berths. Cost is $1.34 fee phone per day, plus the cost of any overtime incurred in connecting or disconnecting any such telephone.

**GENERAL:** *Refuse Disposal:*

It is important that no refuse be allowed to pass into tidal waters either directly or indirectly. This is covered by strict Government Regulation.

Masters should ensure that refuse is lowered into refuse boat "Manui" and not thrown into boat from any great height.

No refuse will be collected from stern of vessel as this is hazardous for collection craft. A suitable site in way of the flat side of the vessel on off shore side should be chosen.

**SERVICES:** Services include tank cleaning, compass adjusting, all cargo surveying, average adjusting, etc. Tank washings may be pumped to road tankers.

**SHORE LEAVE:** Crew members may go ashore.

**REGULATIONS:** All guests aboard vessel in the evening must have passes signed by the Master. All visitors' passes expire at 2300. All ships in port are subject to the Rules and Regulations contained in the Harbours Act 1950, and the By-laws of the Auckland Harbour Board.

**AUTHORITY:** Auckland Harbour Board, PO Box 1259, Auckland. Tel. 74-610. Cable address "Haboard N.Z."

## BLUFF: 46.37 S. 168.22 E.

**DOCUMENTS:** See "Auckland".

**PILOTAGE:** Pilotage is compulsory. Pilots board vessels from a launch within a 3-mile radius of signal station on Stirling Point, and always well to seaward of 6 fathom line. Arrangements regarding boarding will be made by radio-telephony, wireless-telegraphy, or visual signals from signal station.

Vessels, other than those which are exempt from pilotage, must not proceed inside Bluff Foreshore Light without a Pilot.

Pilots do not usually board vessels between sunset and sunrise, except in reasonable weather.

Caution: Vessels stopping to pick up a Pilot are particularly warned not to approach entrance shoal too closely, especially during flood stream as stream sets strongly on to entrance shoal, North-eastward.

*Coastal Pilots:* Coastal Pilots are available on 24 hours notice for piloting service from Tairoa Head to Milford Sound.

**ANCHORAGE:**

*Southward of Stirling Point:* In fine weather vessels missing tide may anchor in 10 to 12 fathoms with Stirling Point lighthouse bearing about 356° and Dog Island lighthouse bearing about 108°.

*Eastward of Dog Island:* A good anchorage for vessels delayed longer than six hours awaiting to enter Bluff is situated 5 miles East of Dog Island.

**RESTRICTIONS:** The safest time to enter the harbour is at slack water. Strict attention should be paid to signals passed from the signal station on Stirling Point. No vessel should attempt to enter without a Pilot, unless possessing local knowledge.

Least depth in fairway is 23 ft. on Northern edge of Channel Rocks; 24½ ft. on Mararoa Rock; also 25 ft. (about 1 cable West North-westward of the tidal stream indicator beacon).

Entering by North channel least depth is 20 ft. off Northern end of Davey Bank.

**MAX. SIZE:** Length, 620 ft., overall beam, no limit. Maximum draft permissible in approach channel: 30 ft. 0 in. at HW, 21 ft. 6 in. at LW. The Board has been carrying out extensive blasting and dredging in the entrance channel and it is anticipated that a further increase in the present port draft of 30 ft. in the entrance channel will be increased to 34 ft. but this will be publicised at the time when it can be confirmed without doubt what the new actual port draft will be.

**HEALTH:** Inspector boards in quarantine anchorage. In the open roadstead within navigable area enclosed by a circle having a radius of 3 nautical miles from the flagstaff on Stirling Point.

**RADIO:** A signal station is situated on Stirling Point and is connected by telephone with harbour officials. A continuous watch is maintained and vessels can communicate by the International Code of Signals or the Morse Code. There is a radio-telephone at signal station. Call sign is ZLRW, calling frequency is 2,182 kc/s, and the working frequency is 2,012 kc/s. VHF radio having Channels 16 and 12. Watches are maintained from 33 to 40 minutes past the hour, every hour. After radio-telephone contact has been established further listening watches can be made by mutual agreement.

**TUGS:** Two tugs are available. A twin-screw vessel of 1,500 i.h.p. and 14·7 tons static pull. A twin-propulsion Voith Schneider vessel of 1,200 i.h.p. and 15·3 tons static pull. Both vessels are equipped for fire fighting and deep sea salvage work.

**BERTHING:**

| Berth No. | Dredged depth l.w. (draft 2 ft. less or maximum) ft. | in. |
|---|---|---|
| *Island Harbour* | | |
| 1 | 26 | |
| 2 | 26 | |
| 3A | 30 | |
| 3 | 35 | |
| 4 | 35 | |
| 5 | 35 | |
| 6 | 30 | |
| *Old Main Wharves:* | | |
| 11 | 31 | 6 |
| 12 | 29 | |
| 14 | 26 | 6 |
| *Tiwai Wharf:* | 34 | |

**STEVEDORES:** Agents require ETA in advance to arrange labour for cargo handling.

**MEDICAL:** Port doctor available through Agents. Nearest hospital is at Invercargill City, 16 miles from Bluff. Medical service whilst at sea; through Awarua radio.

**TANKERS:** Tankers are berthed at No. 11 berth only, main wharf. Side connections are to be used. Only one pipe-line connection on wharf.

It is not permitted to commence the discharge of oil cargoes during the hours of darkness. No vessel carrying a cargo of motor spirit or having discharged such cargo will be handled during the hours of darkness.

**DENSITY:** 1025.

**FRESH WATER:** Available alongside all berths.

**FUEL:** Bunkering facilities are available. Boiler fuel is supplied by 8 in. diameter pipe-line located at No. 11 berth, old wharf. Delivery rate 240 tons per hour. Limited quantities of coal, light diesel oil and lubricating oil can be arranged for delivery by road or rail to the wharves.

**GANGWAY/DECK WATCHMEN:** Available.

**OPENING CLOSING HATCHES:** Usually carried out by stevedores, unless automatic then by crew.

**CUSTOMS ALLOWANCE:** See "Auckland".

**IDENTIFICATION CARDS:** Not required.

**REPAIRS:** Major repair work can be undertaken by the following: Two small machine shops at Bluff; a foundry at Invercargill; a slipway for vessels of up to 500 tons displacement at Bluff. A diver is available for underwater inspections.

**REPATRIATION:** Facilities exist.

**AIRPORT:** Internal air services from City Airport, Invercargill, 16, miles by road. Connecting with international airports of Christchurch Wellington and Auckland.

**TIME:** GMT plus 12 hours. No change.

**HOLIDAYS:** Christmas Day; Boxing Day; New Year's Day; Second of January; Watersiders' Picnic Day (4th Monday, January); Good Friday; Easter Saturday (except by special arrangement); Easter Monday; Easter Tuesday; Labour Day; Anzac Day; Reigning Sovereign's Birthday.

**POLICE/AMBULANCE/FIRE:**

| | Tel. (Emergency) | (Other) |
|---|---|---|
| Ambulance | Bluff 111 | Ingrill 4119 |
| Police | Bluff 111 | 8844 |
| Fire Brigade | Bluff 111 | |

**TELEPHONES:** By arrangement, all vessels can be connected with telephone system.

**SERVICES:** Compass adjusting, refuse collection daily.

**SHORE LEAVE:** Allowed.

**AUTHORITY:** Southland Harbour Board, the Secretary-Manager, PO Box 1, Bluff.

## GISBORNE: 38.42 S. 178.02 E.

**PORT LIMITS:** All of Poverty Bay within a line from the Northern point of Young Nick's Head to Tuaheni Point.

**DOCUMENTS:** See "Auckland".

**PILOTAGE:** Telegraphic address – Harbour Master, Gisborne. Advance notice – 24 hours of ETA and further confirmed at 4 hours of ETA. VHF Channel 12.

Pilot boat is painted white, 45 ft. in length; exhibits pilot flag or lights. Pilot boards on line of leads (332°) 2 miles from breakwater light.

**ANCHORAGE:** Vessels awaiting Pilot and berth anchor with Tuaheni Light bearing 084° 3·2 miles in 10 fms. of water.

**RESTRICTIONS:** Vessels may be berthed at night according to size, draft and weather conditions.

**MAX. SIZE:** Maximum length, 560 ft. OA. Beam, No restriction. Draft, 29 ft. at HW, 25 ft. at LW; there can be slight variations according to heights of tide and weather conditions.

**HEALTH:** Same procedure as "Auckland".

**RADIO:** Auckland Radio ZLD, Wellington ZLW.

**RADAR/VHF:** Radar service available – arrangements can be made through Signal Station by means of VHF Channel 12.

**TUGS:** Tug joins vessel in channel outside breakwater. Normally use ship's lines; if tug's lines used, no extra charge.

**BERTHING:** 700 ft. at 32 ft. depth LW; 1,400 ft. at 18 to 20 ft. depth LW.

**SPECIALISED CARGO FACILITIES:** Two 1,000 tons for bulk grain etc. silos behind No. 7 berth and a conveyor for loading grain etc. in ships.
**STEVEDORES:** Advice of ETA and particulars of stowage required in order that required number of gangs can be ordered. Hours of work, Monday to Friday, 0700–1200, 1300–1800; Saturday, 0700–1200.
**MEDICAL:** No advance advice required for medical attention. Full hospital facilities available.
**DENSITY:** 1025 at all stages of tide.
**FRESH WATER:** Available by 2½″ hoses at approximately 40 tons per hour per hose.
**FUEL:** Fuel is at present only available by rail tanker and should be ordered through ship's Agent in advance. It is expected that tankers should be discharging here in about 2 years.
**DEVELOPMENTS:** It is expected that present overseas berth will be increased from 700 ft. to 1,300 ft. within about 3 years.
**GANGWAY/DECK WATCHMEN:** Ships at present provide own watchmen.
**OPENING/CLOSING HATCHES:** Stevedores normally carry out this work.
**CUSTOMS ALLOWANCE:** See "Auckland".
**IDENTIFICATION CARDS:** Not required.
**CONSULS:** None.
**REPAIRS:** Normal maintenance repairs.
**DRY DOCKS:** One 400 ton slipway.
**REPATRIATION:** Full facilities available for effecting crew changes and repatriation. However, no seaman's pool operating at Gisborne. Replacement crew must be obtained from either Auckland or Wellington.
**AIRPORT:** 3½ miles. Regular internal service.
**TIME:** Standard Time is related to the meridian of 180° *East,* i.e. 12 hours ahead of GMT.
**AUTHORITY:** Gisborne Harbour Board.

## LYTTELTON: 43.35 S. 172.42 E. (See Plan)

**PORT LIMITS:** All those tidal waters of the Port of Lyttelton comprised within the area enclosed by the arc of a circle having a radius of 3 nautical miles from the Northernmost point of Adderley Head.
**DOCUMENTS:** Customs procedure. Overseas vessels, on arrival in New Zealand, should have following papers ready to produce to Customs Officers:

Register.
Names of Owners and Agents.
Crew List.
Passenger List.
List of Prohibited or Restricted Immigrants.
Search List.
Stores List.
List of any stock or birds on board.
List of Poisons.
List of Firearms.
Statement of excess Tonnage of Cargo.
Statement of quantity of Fuel Oil in double bottoms.
Declarations by Passengers arriving in New Zealand.
Baggage Declarations by Passengers for duty purposes.

On departure for overseas, Master or his Agent is required to produce:

Manifest of Cargo.
Stores List.
Crew List.
Passenger List (if any).
Clearance from the Marine Department (if a British ship).

A home trade vessel under *transire* is required to produce her cargo book to Collector of Customs and such particulars as to passengers, crew, and cargo as the Collector may at any time demand. Cargo book shall contain name and port of registry of ship, Name of Master, and date of arrival at, and departure from each port. Particulars as to dates of arrival and departure must be entered not later than 24 hours after time of such arrivals and departures.
**PILOTAGE:** Masters requiring services of a Pilot must notify Harbour Master of their estimated time of arrival and maximum draft not later than 1600 hours on day prior to arrival (Monday to Friday). If estimated time of arrival is on a Saturday, Sunday or any public holiday which falls on a Monday, notification must be given before 1600 hours on previous Friday. International Code of Signals or Morse Code used for communicating with signal station. Station also equipped with radio telephone. Call sign is ZLHL, calling frequencies are 2182 and 2045 kc/s and working frequencies are 2012 and 2162 kc/s, a continuous listening watch being maintained. Radio telephone equipment also installed in the tug, pilot cutter and Harbour Master's office, and same call signs, frequencies and watches are employed. VHF in operation on International Channels 12, 14 and 16.

Pilot vessel is 54 ft. in length. Equipped with radar, radio telephone and echo sounder. The pilot vessel is located at the tug wharf in inner harbour and any vessel awaiting arrival of the Pilot, should anchor about 1½ miles to seaward of Godley Heads, in a depth of 9 to 10 fathoms and await instructions.

The limit of pilotage is a line joining Godley and Adderley Heads.

Every facility must be provided to ensure safe boarding of the Pilot.
**ANCHORAGES:** Anchoring in or near entrance of the dredged channel is not permitted. Vessels not awaiting pratique or a Pilot should anchor within navigable portion of water Westward of Camp Bay and within an area bounded by a line bearing 345° from anchorage beacon in Camp Bay and a line bearing 022° from staff on Ripapa Islet situated about 2 miles Westward of Camp and clear of dredged channel. Anchorage is prohibited in the vi of a telephone cable laid across the port about 4 cables w entrance. Inner limit of the position of this cable is marked by white patches painted on cliffs, one on the northern side and on the southern side of the port.
**RESTRICTIONS:** Cargo vessels not berthed during hou darkness, except at Cashin Quay and Gladstone Pier East.

Tankers are berthed during hours of darkness at the discretio the Harbour Master. All vessels can depart from their berths du hours of darkness. Vessels holding pilotage exemptions may enter or depart during the hours of darkness.

The following are the controlling depths at mean low water spri mud bottom in each case;

entrance to port 48 ft.
dredged channel 37 ft.
inside anchorage 36 ft. (Camp Bay)
approaches to berth 35 ft.
alongside berths 28 ft. to 40 ft.

**MAX. SIZE:** Max. draft permissible for entering or leaving: at high water and 32 ft. at low water. Vessels drawing less than can enter at any state of the tide. Max. size permissible for en length 850 ft. at Cashin Quay, any additional length contact Har Master, 750 ft. at Inner Harbour. No limit on vessel's beam.
**HEALTH:** Master of every ship about to enter a New Zealand shall, not later than 12 hours and not earlier than 24 hours be expected time of arrival at that port, inform Port Health Office radio of last port of call, date of departure therefrom, and sta health of vessel.

Arrival of vessels. On arrival, vessel showing International quarantine signal, should proceed to inspection to await arriva Port Health Officer. Inspections are normally carried out at berth

Radio pratique. Certain ships may be granted pratique by radio hence need not be visited by a Port Health Officer, provided medical officer carried as part of ship's complement.

Maritime Declaration of Health. Masters of all vessels arriving New Zealand from any port beyond New Zealand shall complete deliver to Port Health Officer a maritime declaration of health co tersigned by the ship's medical officer, if carried.

Crew List and Passenger List. Master of every ship liable quarantine should be prepared to furnish Port Health Officer a of all passengers, showing in respect of each passenger, name, race, age, and port of embarkation; and a list of crew giving the na race, and rating of each member.
**RADIO:** Wellington Radio, call sign ZLW; Awarua, call sign Z or Auckland, call sign ZLO.
**TUGS:** Normally join vessel at Parsons Rock Beacon. Tug lines used, charge for which is included in the overall hire rate for t Two tugs required for vessels over 20,000 tons.
**BERTHING:** Requirements for berthing at berths 2, 3, 4, 5, 6 an for vessels over 1,000 tons net are; bow out, the anchor to be us and gangway turned in.
**STEVEDORES:** Waterside labour can be ordered after arriva ship at 6.30 a.m. up to 9 a.m. For work on Saturdays orders must placed by 9 a.m. Friday. Saturday afternoon work to be ordered 10.30 a.m. Saturday.

For supplementary hours labour must be requisitioned by 3 p previous Friday and confirmed by 7 a.m. Monday and daily.
**SPECIALISED CARGO HANDLING FACILITIES:**

*No. 1 Breastwork, Inner Harbour:* Grain Silos. 2,000 tons capac 250 tons per hour loading rate for coastal shipments.

*No. 1 Cashin Quay:* Bulk Loading Facilities: Woodchips, grain, (under construction – due completion 1974).

*Gladstone Pier, East:* Bulk cargo discharges: 5, 5-ton elec cranes, 3, 100-ton mobile bulk hoppers.

*Gladstone Pier, West:* Roll-on/Roll-off Coastal and Trans-Tasm Cargo Terminal.

*No. 2 Jetty west, Inner Harbour:* Roll-on/Roll-off Inter-Isla Passenger and Cargo Terminal.
**MEDICAL:** Hospital facilities are available at Christchurch, 9 mi from port, and international regulations apply in regard to inocu tions, vaccinations, etc. Agents can be notified at any time of me cal allocation required, preferably with 24 hours notice.
**TANKERS:** All tankers berth alongside oil wharf in Inner Harbo One berth only is available with a max. draft of 33 ft. 6 in. A 10 line is used for discharging and loading with suitable fittings reduction to 8 in. Slop or oily residue facilities are not availab Lyttelton is considered to be a discharge port for fuel oils only.

Oil hoses can be connected and disconnected during hours darkness. Side connections are connected to discharging ar situated at the middle of the oil wharf.

Berthing is generally starboard to, head out.
**DENSITY:** 1025, salt water.
**FRESH WATER:** Available at all berths delivered by hose at a d charge rate of 20 tons per hour.
**FUEL:** Bunkering facilities available: Oiler fuel oil, supplied by 4 and 6 in. diameter bunker hose connected to an 8 in. diameter pi line, located on the oil wharf.
**FIRE PRECAUTIONS:** Tankers are not permitted to immobi engines at the oil wharf. Repairs may be carried out at other whar with Harbour Master's permission. Boiler and galley fires are required to be extinguished when loading or discharging. All sca pers are to be plugged and cemented in case of spillages.
**DEVELOPMENTS:** The new container berth at Cashin Quay N will be completed by the end of 1974.

Tender documents have been prepared for the purchase of the most modern single-lift container crane. It is expected that it will be in operation by 1976.

**GANGWAY/DECK WATCHMEN:** All ships must be provided with a watchman whilst at oil wharf; a shore watchman is also required. Watchmen can be ordered at any time by contacting Seamen's Union at Lyttelton

**OPENING/CLOSING HATCHES:** This work is carried out by waterside labour.

**CUSTOMS ALLOWANCES:** ½ lb. and/or 200 cigarettes per man. 1 bottle of wine and/or 1 bottle of spirits per man.

**IDENTIFICATION CARDS:** Passes are necessary at oil wharf but not required otherwise.

**CONSULS:** At Christchurch.

| | | | |
|---|---|---|---|
| Australia | 66–221 | Belgium | 77–905 |
| Denmark | 899–099 | France | 60–085 |

| Netherlands | 65–669 | Norway | 65–079 |
| Sweden | 65–179 | U.S.A. | 65–864 |

**REPAIRS:** Major work can be undertaken at Lyttelton where a machine shop and foundry are available.

**DRY DOCKS:** A graving dock is available for vessels up to 6,500 tons gross, and dimensions of dock are floor length 450 ft., top length 481 ft. 6 in., top width 82 ft., entrance width 62 ft., width in way of ships bilge 54 ft. 6in., sill depth at MHWS 23 ft. A patent slip is also available for vessels up to 240 tons gross.

**REPATRIATION:** Facilities are available.

**AIRPORT:** Distance from Christchurch – 6 miles, served by regular airlines.

**TIME:** Local time is 12 hours ahead of GMT, no alteration to clocks.

**HOLIDAYS:** Holidays throughout year shall be New Year's Day; Anzac Day; Provincial Anniversary Day; Good Friday; Easter Monday; Labour Day; Birthday of Reigning Sovereign; Christmas Day; Boxing Day; and the Harbour Board's employees picnic day (to be held on same day as the Waterside Workers' Union picnic day. No cargo work is carried out on these days.)

**POLICE/AMBULANCE/FIRE:** For emergency calls from ships telephones, dial 111 and ask the operator for service required. For other than emergency calls dial 8079 and ask for service you require.

**TELEPHONES:** Arrangements can be made with Harbour Master for telephones to be placed on board.

**SERVICES:** Tank-cleaning and tank-washing facilities are available as well as a compass adjuster.

**SHORE LEAVE:** Crew members are allowed ashore.

**AUTHORITY:** Lyttelton Harbour Board, Christchurch.

## MOUNT MAUNGANUI: 37.39 S. 176.11 E. (See Plan)

**PORT LIMITS:** The port of Tauranga outward sea limits are bounded by a right line bearing 093° from North Rock Light 2 nautical miles distant from Trig A Mount Maunganui, then by an arc of 2 nautical miles radius centred on Trig A extending in an anti-clockwise direction to MHW mark at Matakana Island.

**DOCUMENTS:** See "Auckland".

**PILOTAGE:** Pilotage is compulsory for merchant vessels of over 100 tons net tonnage; Pilot boards vessel about 1 mile North-eastward of North Rock light structure. If, due to adverse weather conditions, the Pilot is unable to embark, the pilot launch will lead the vessel into smoother waters and embark abreast No. 2 light buoy. All vessels inward bound must give 24 hours notice by radio of their expected time of arrival off the port limits. If bound from Auckland or near ports, vessels send their expected time of arrival immediately on departure from that port; a vessel requiring the services of a Pilot requests this in the same message.

A second message confirming or amending the first is sent four hours before the expected time of arrival as given in her first message. In the event of a vessel expecting to arrive earlier, the four-hour notice is sent four hours before the new expected time of arrival.

Communications are addressed "Harbour Master Tauranga" and are attended to at all hours of the day or night.

Pilot launch is 50 ft. long, is painted white and equipped with R/T, 2182 kc/s., 2162 kc/s. and 2012 kc/s.; VHF Channels 16, 12, 14, 8 and 6, and radar.

Vessels awaiting Pilots may anchor in pilot boarding position.

**ANCHORAGES:** Three sheltered anchorages are situated in Western channel of Tauranga Harbour and are available for vessels of up to 500 ft. long with a maximum draft of 22 ft. 6 in.

**RESTRICTIONS:** Vessels may enter, berth, unberth, or depart during hours of darkness in fine weather. Tankers are handled during daylight only except tankers in ballast and gas free which may sail at night. Vessels over 300 ft. generally enter or depart on HW or LW slack.

**MAX. SIZE:** Max. length permissible is 615 ft., no restrictions on beam. Max. arrival and departure draft at high water is 31 ft. and at low water 26 ft.

**HEALTH:** Radio notification to be sent to "Port Health Tauranga", regarding state of health of crew and ETA 24 hours before arrival.

Pratique is granted by Port Health Officer on arrival. Notification should be made by radio to Port Health in case of suspected disease or fever on board.

Pratique is automatic if vessel has been previously cleared at another New Zealand port. Radio pratique may be granted in case of passenger vessels or such vessels as carry a doctor on board.

**RADIO:** Nearest coastal radio station to Port of Tauranga is "Auckland Radio" – call sign ZLD.

**RADAR/VHF:** Radar is fitted to Harbour Board pilot launch and one tug. VHF is fitted to Harbour Board Watch Office, Main Office, both tugs, pilot launch and work launch. Channels 16, 14, 12, 8 and 6 available. Contact should be made through Channel 16 where continuous listening is maintained. Harbour Board Watch Office is also fitted with R/T, call sign ZLDQ Tauranga. A listening watch is kept on 2182 kc/s.

**TUGS:** Two tugs are available. Usually join vessels in vicinity of entrance. Tugs lines are normally used, for which there is no extra charge. A third tug planned for delivery in 1973.

**BERTHING:** Berthing normally takes place 30 minutes after negotiating harbour entrance at HW or LW slack. Wharves are quay type of concrete construction with wooden spring fendering and rubber buffers. At present 5,700 ft. of wharf is available, with a further 300 ft. under construction Southward due for completion 1974.

**STEVEDORES:** ETA to stevedoring companies is usually worked in conjunction with ETA to Harbour Master.

**MEDICAL:** Unless specifically required for arrival, Agents do not require advice. Local medical practioners are consulted and services of one public and one private hospital are utilised. Smallpox certificates are required.

**TANKERS:** Discharge of black and white products is done through a single 10 in. discharge line. Flexible connection between these lines and ship is 8 in. No slop facilities. Two tanker discharge points with a maximum permissible draft of 28 ft. 6 in. at No. 5 berth and 31 ft. at No. 9 berth. Chemical tankers are also loaded and discharged at No. 9 berth.

**DENSITY:** Salt water, 1025.

**FRESH WATER:** Unlimited supply by pipe-line. Good quality, 15 tons per hour.

**FUEL:** Light bunker fuel oil 200 secs. Redwood No. 1. Heavy bunker fuel oil 1,000 secs. Redwood No. 1. 24 hours – minimum notice. Availability up to 1,000 tons.

**FIRE PRECAUTIONS:** A fence is erected around tankers to prevent unauthorised access to berth. Both tugs are equipped for fire-fighting.

**DEVELOPMENTS:** An increase of draft to 32 ft. could be undertaken on completion of channel realignment.

**GANGWAY/DECK WATCHMEN:** Ship's watchmen are usually employed by overseas ships.

**OPENING/CLOSING HATCHES:** Usually performed by stevedores.

**CUSTOMS ALLOWANCES:** See "Auckland".

**IDENTIFICATION CARDS:** Not required.

**REPAIRS:** All types of engine and deck repairs are possible with exception of docking and associated bottom repairs.

**REPATRIATION:** Repatriation no problem.

**AIRPORT:** Airport is situated 1 mile from wharves and is served with regular flights from internal airlines to overseas airports at larger centres.

**TIME:** GMT plus 12 hours.

**HOLIDAYS:** New Year's Day (1st and 2nd January); Good Friday (end of March); Easter Monday (end of March); Anzac Day (25th April); Queen Elizabeth II Birthday (1st June); Labour Day (26th October); Christmas Day (25th December); Boxing Day (26th December); Port Picnic Day (end of January). Cargo work does not take place on public holidays, Saturday afternoon or Sunday.

**POLICE/AMBULANCE/FIRE:** All connected through automatic exchange, Emergency No. 111.

**TELEPHONES:** Telephones are placed on board all ships by Harbour Board.

**SERVICES:** No facilities for discharge of tank washings exist. Compass adjusters can be arranged from other ports. Local provendors cater for most domestic supplies. Fumigation can be arranged.

**SHORE LEAVE:** Crew are permitted ashore at Master's discretion.

**AUTHORITY:** Bay of Plenty Harbour Board, Private Bag, Mount Maunganui. Tel. 53–039. Telegram "Harboard".

**AGENT:** Russell & Somers (Bay of Plenty) Limited, 194 Maunganui Road, POB 5087, Mount Maunganui. Tel. 53059. Telex: 2942 "Lumberco". Cables: "Rusticated" Mount Maunganui.

## NAPIER: 39.29 S. 176. 54 E.

**DOCUMENTS:** See "Auckland".

**PILOTAGE:** Vessels should advise ETA and draft to Harbour Master Napier 24 hours prior to arrival, ETA to be confirmed or amended 4 hours before original ETA or 4 hours before arrival, whichever first.

VHF pilot boat and watchtower. Listen Channel 16. Work Channel 12.

Pilot boat 65 ft. long, painted white, funnel yellow with black top. Pilot boards inward vessels on main leads 1 mile East of roadstead buoy.

**ANCHORAGES:** Anchorage 1 mile East of roadstead buoy. 9 fathoms. Bottom sand and mud.

**RESTRICTIONS:** Vessels are berthed between 0500 and sunset. Vessels up to 25 ft. 6 in. draft may berth at any state of tide.

**MAX. SIZE:** Max. length OA 620 ft.; beam, no limit; draft, 28 ft. 7 in. with extension to 29 ft. Subject to beam of vessel and prevailing conditions.

Tanker and bulk carriers berthed at 29 ft. draft. Subject to prevailing swell conditions and being able to commence discharge immediately on arrival.

**HEALTH:** Cable port health Napier 24 hours before arrival. Doctor will board on arrival.

**RADIO:** Cables should be routed through Wellington Radio ZLW. Radio telephone – Napier Watchtower listens 2182 kc/s for 15 mins. at following times: 0400, 0800 1200, 1600, 2000, 2400 and by arrangement. Working frequency is 2162 kc/s. VHF listening watch as above for R/T and continuous during office hours.
**TUGS:** Two tugs take ship's line inside breakwater.
**BERTHING:** Vessels at max. draft limited to HW. Vessels normally berth "Port side to" all berths but will berth starboard side to on request. Notification must be received before 1600 hours on Friday for any shipping movement over weekend and 1600 hours on day preceeding public holidays.
**SPECIALISED CARGO FACILITIES:** Wood pulp store situated adjacent Higgins Wharf South, area 126,000 square feet with 27 ft. clear height.

Bulk fertiliser store adjacent Higgins Wharf, capacity 55,000 tons.
**STEVEDORES:** ETA required for discharge ships 24 hours before arrival. Loading ships 48 hours before arrival with proposed stowages and vacant spaces. Advice number of gangs able to work. All work done by ship's tackles.
**MEDICAL:** No prior notice required for medical attention. Hospital facilities available. Advice would be needed of any contagious disease on board in advance.
**TANKERS:** Standard size discharge lines. All connections supplied by oil companies. Five berths, max. draft 29 ft.
**DENSITY:** 1025.
**FRESH WATER:** Available all berths 20T per hour per hose.
**FUEL:** 220 and 1,000 p/sec. Oil available ex-pipe-line at 110 tons per hour L/Marine diesel and gas oil ex-road tanker. All at immediate notice. Lubricating oil available. 1 weeks notice. No residue service available.
**FIRE PRECAUTIONS:** Watchman supplied on wharf at ship's expense when tankers discharging.
**DEVELOPMENTS:** Container cleaning yard, completion 1974. Breakwater extension, commencing 1974. Kirkpatrick reclamation commencing 1974.
**GANGWAY/DECK WATCHMEN:** Cargo watchmen supplied on request at current award rates.
**OPENING/CLOSING HATCHES:** Hatches normally opened and closed by stevedores unless automatic type.
**CERTIFICATES:**

- Ship's Register
- Health Certificate
- Cargo Safety Certificate
- Radio Safety Certificate
- Load Line Certificate

**CUSTOMS ALLOWANCES:** See "Auckland".
**IDENTIFICATION CARDS:** Not required.
**REPAIRS:** First class service available.
**REPATRIATION:** On arrangement with Customs and vessel's Agents.
**AIRPORT:** Hawke's Bay Airport, served by internal airline 3 miles from port.
**TIME:** GMT plus 12 hours.
**HOLIDAYS:** New Year's Day; 2nd January; Picnic Day (last Wednesday in January) (vessels berthed but cargo not worked on any of these holidays); Good Friday; Easter Monday; Anzac Day (25th April); Queen's Birthday (1st Monday in June); Labour Day (nearest Monday 25th October); Christmas Day; Boxing Day.
**POLICE/AMBULANCE/FIRE:** Emergency telephone 111.
**TELEPHONES:** Connection all berths.
**GENERAL:** Due to open port and swell, ship's engines to be kept at 12 hours notice of readiness.
**SHORE LEAVE:** No restrictions.
**AUTHORITY:** Napier Harbour Board, PO Box 166, Napier, New Zealand. Tel. 58684.

## NELSON: 41.17 S. 173.17 E. (See Plan)

**PORT LIMITS:** Within 3 miles radius of Nelson Lighthouse.
**DOCUMENTS:** See "Auckland".
**PILOTAGE:** Compulsory for vessels of 100 nrt and over. If possible 24 hours notice of ETA to Harbour Master. Confirm ETA before 1600 Friday if arriving during weekend or public holiday.

Radio telephone 2182 kc/s. and 2162 kc/s., call sign ZLED. Listening watch 10 minutes every 4 hours commencing at 0000 hrs. After contact has been establised a further listening schedule can be arranged.

VHF on Channel 16 listening and Channel 12 working. Pilots board inward-bound vessels about 1½ to 2 miles to seaward of main entrance.

Anchorage awaiting Pilot in depth about 30 ft., mud, with Boulder Bank lighthouse bearing 130° distance 8 cables. Pilot vessel 36 ft. double-ended flush-decked vessel painted orange.
**ANCHORAGES:** Anchorage as indicated in pilotage or further seaward according to weather conditions, draft and length of stay at anchor.
**RESTRICTIONS:** Vessels may enter, berth, unberth, or leave during hours of darkness. Overseas vessels (over approx. 380 ft.) enter port on flood tide and usually swing and berth port side to.
**MAX. SIZE:** Maximum permissible length 580 ft. Beam no limit. Draft limits 28 ft. Max. draft at Main Wharf is 26 ft.
**HEALTH:** Doctor clears vessel after berthing. Pratique automatic after clearance at first port. If suspected disease or fever on board advise Medical Officer of Health, Nelson, by radio and await instructions.

**RADIO:** ZLW Wellington Radio; ZLB Awarua Radio; ZLD A land Radio.
**TUGS:** Two tugs available, joins vessel inside harbour. Tug's line used on berthing. Tugs are equipped for fire-fighting.
**BERTHING:** Vessels should endeavour to make their arriva early on flood tide as possible.
**SPECIALISED CARGO-HANDLING FACILITIES:** Facil are available at one general cargo berth for discharging m spirits and oil. Another berth is used for loading wood chips p matically (the loading equipment is owned by Nelson Pine Fo Limited, Nelson).
**STEVEDORES:** Labour ordered 0700 for weekday work; 0900 day for Saturday work. ETA should be received by Agents be these times.
**MEDICAL:** Advise Agents of any medical attention required, g up to 24 hours notice. Hospital facilities are obtainable. Sma vaccination certificates are required.
**TANKERS:** Diameter of discharge pipe, 10 in. white produ 8 in. black oil. No slop discharge facilities. Oil tanker berth, one o Maximum draft at berth 26 ft.
**DENSITY:** Average sea water, 1025.
**FRESH WATER:** Obtainable at any time. Approximately 20 t per hour delivery rate.
**FUEL:** Marine fuel oil, gas oil. Notice required, 24 hours.
**GANGWAY/DECK WATCHMAN:** Watchman necessary usually provided by ship's crew. Shore watchman can be engage requested by vessel. Cost in accordance with national award.
**OPENING/CLOSING HATCHES:** By stevedores only.
**CUSTOMS ALLOWANCES:** See "Auckland".
**IDENTIFICATION CARDS:** Not required.
**REPAIRS:** Deck and engine repairs are possible. (No underwa damage repaired.)
**DRY DOCKS:** Slipway available for up to 1,500 ton vessels.
**REPATRIATION:** Facilities exist.
**AIRPORT:** Distance 3 miles. Served by internal airline only.
**TIME:** GMT plus 12 hours. No alteration made during year.
**HOLIDAYS:** New Year's Day (1st Jan.); 2nd Jan.; Picnic D (usually near end Jan.); Anniversary Day (1st Monday in Fe New Zealand Day (6th February); Good Friday; Easter Mond Queen Elizabeth II Day (1st Monday in June); Labour Day ( Monday in October); Christmas Day; Boxing Day. No cargo w on these days.
**POLICE/AMBULANCE/FIRE:** Police 88309; Ambulance 88 Fire 81589; Emergency calls, dial 111.
**TELEPHONES:** Can be connected on board.
**SHORE LEAVE:** Allowed.
**SHORE POWER:** 400 v., 3 h.p., 50 Hz, 60 amps max.
**DEVELOPMENTS:** A 450 ft. overseas berth with roll-on/roll- facilities available, expected to be ready November 1974.
**AUTHORITY:** The Nelson Harbour Board, PO Box 1003, P Nelson. Tel. 82099 Nelson. Telegram "Nelharbour".

## NEW PLYMOUTH, Port Taranaki: 39.03 S. 174.03 E (See Plan)

**PORT LIMITS:** All waters contained within the area of a cir with radius 2½ nautical miles whose centre is the trig station on Mo Moturoa in position 39° 03′ 56.8″ S. 174° 01′ 44.9″ E.
**DOCUMENTS:** *Customs:* See "Auckland".

*Agriculture:* Shipmaster's Bond List. Meal Locker Declarat Form AGL 36 (2 copies).

*Health:* Maritime Declaration of Health (issued by Port Hea Officer).
**PILOTAGE:** Compulsory. Telegraphic address "Harbour Mast New Plymouth". 3 days notice preferable with 1 day confirmatio VHF Channel 16. R/T 2182 kc/s.

Pilot boat white with buff deckhouse, either "Rawinia" or "Pil in black on side. Pilot taken on board about 1½ miles due North Main Breakwater Head.
**ANCHORAGE:** Vessels can anchor to the West of a line d North from the Main Breakwater head seaward of the 10 fathom li Good holding on sandy bottom. Not recommended in Norther weather conditions.
**RESTRICTIONS:** Ships not berthed during hours of darkne although permitted to sail. Draft maximum 30 ft. (9·15 m.) may exceeded after prior consultation with Harbour Master. Ships und 21 ft. not affected by state of tide. In range 21 ft. to 30 ft. (9·15 m.) ti of berthing relevant to high tide.
**MAX. SIZE:** Maximum size 700 ft. (213·4 m.) overall, breadth no lim
**HEALTH:** Port doctor boards on arrival at berth. In event of su pected disease on board, will board in pilotage area. Pratiq automatic if vessel has already called at another New Zealand po
**RADIO:** Radio telephone system operates watches for 15 minu every 4 hours from midnight. Call sign ZLNE, call frequency 2 kc/s. Working frequency 2012 and 2162 kc/s. VHF station opera on Channel 16 after notice given by telegraph or R/T. ETA cab generally received through Wellington Radio. All outward messag routed through Wellington Radio.
**TUGS:** One tug available. 700 hp.
**BERTHING:** In general all ships are swung in basin coming alo side berth stern first.

*Breakwater* (Under Construction): Length, 122 m.; width, 10 m depth alongside LWOST, 5·5 m. For use by oil field barges, sup vessels and fishing vessels. Road transport only.

*Moturoa Wharf:* Length, 335 m.; width, 27·4 m.

East side of wharf: 1 berth 260 m. long, depth alongside LWOS

10 m. Four 3 tonne portal cranes (5 tonne at reduced radius) 1 berth 76 m. long, depth alongside LWOST 4·9 m.

West side of wharf: 1 berth 137 m. long, depth alongside LWOST 7·9 m. Bunkering point on No. 2 berth. All classes of bulk oil may be discharged at No. 2 berth. Road and rail transport may be used to load and discharge dry cargo.

*Newton King Wharf:* Length, 366 m.; width, 22·9 m.

East side of wharf: 1 berth 244 m. long, depth alongside LWOST 10 m. 1 berth 50 m. long, depth alongside LWOST 7·6 m.

West side of wharf: 2 berths 366 m. overall, depth alongside LWOST 10 m. One 1·5 tonne and one 2 tonne portal cranes. Bunkering points in berths 2, 3 and 4. All classes of bulk oil may be discharged at berths 2 and 4, crudes may be loaded at berths 2 and 4. Road and rail transport may be used to load and discharge dry cargo.

*Blyde Wharf:* West side of the wharf: Length, 426 m., width of apron, 19 m.; width including open storage, 82 m.; depth alongside LWOST, 11 m. Two 2 tonne portal cranes. Rail and road transport may be used to load and discharge cargo. Open hard standings for transit cargo storage are available; a small container facility is provided.

East side of the wharf (under construction): Length, 80 m.; width, 5·5 m. and 13·4 m.; depth alongside LWOST, 5·5 m. Road transport only. For use by oil field supply vessels.

One mobile Lima heavy lift crane capacity 70 tons at 12 ft. from wharf edge to 25 tons at 40 ft. from wharf edge available at No. 2 berth.

**STEVEDORES:** Labour must be engaged between 0700–0900 Monday to Friday. Agents should be advised ETA at least 24 hours, preferably 72 hours, in order arrange cargo if vessel loading. Normal cargo working hours Monday–Friday 0700–1200, 1300–1700. Saturday 0700–1200. Supplementary hours may be worked Monday–Friday. 1700–2300 if labour available. No work on Sundays.

**MEDICAL:** Hospital services available.

**TANKERS:** Black oils 10 in. pipe-line; white oils 8 in. pipe-line. 3 of 4 berths available for tankers, maximum draft 30 ft. (9·15 m.). Small de-ballasting tank available.

**DENSITY:** Sea water.

**FRESH WATER:** Available all berths from main supply at about 100 tons per hour.

**FUEL:** Light fuel oil and gas oil pipe-line connected all berths, except Blyde Wharf. Gravity fed at about 100 tons per hour. Can be arranged at 24 hours notice.

**FIRE PRECAUTIONS:** Tanker berths closed to public with Harbour Board watchman in attendance.

**DEVELOPMENTS:** New reclamation of 23 acres providing berths for 2 overseas vessels. Is now fully operational. These berths are suitable for handling heavy lifts, PAD type roll-on/roll-off vessels, limited container use and a container cleaning installation is provided. A berth for oil rig tenders will be completed by late 1974.

**GANGWAY/DECK WATCHMEN:** Not available and not necessary.

**OPENING/CLOSING HATCHES:** Stevedores must carry out this work.

**CERTIFICATES:**
Normal Safety Certificates.
Ship's Register.

**CUSTOMS ALLOWANCES:** See "Auckland".

**IDENTIFICATION CARDS:** Not required.

**CONSULS:** None available locally.

**REPAIRS:** All repairs except underwater work of a major nature.

**REPATRIATION:** Facilities exist.

**AIRPORT:** Is 7 miles from city, 10 miles from port. Served by domestic service only, 2 flights northbound and southbound each daily.

**TIME:** 12 hours ahead of GMT. No adjustment made.

**HOLIDAYS:** New Year's Day; Stevedores Picnic (4th Wednesday January); Provincial Anniversary Day (2nd Monday March); Good Friday; Easter Monday; Anzac Day (25th April); Queen's Birthday (1st Monday June); Labour Day (4th Monday October); Christmas Day; Boxing Day.

**POLICE/FIRE/AMBULANCE:** Telephone numbers respectively, 75449, 75505, 75439.

**TELEPHONES:** Can be connected on board.

**GENERAL:** Ship's garbage must be in covered containers supplied by Harbour Board and removed daily. Any meats on board vessel on arrival which have been supplied from other than Australia or New Zealand will be sealed off and fresh supplies obtained.

**SHORE LEAVE:** No restriction.

**AUTHORITY:** Harbour Master, Taranaki Harbours Board, PO Box 348, New Plymouth, Tel. 75672. Cables "Taragate".

**AGENT:** Newton King Ltd., Shipping Department, 15–17 Currie Street, (PO Box 244), New Plymouth, New Zealand. Telegrams, "Kingship". Tel. 5719 (10 lines) Business, 83174 Residence. Telex, N.Z. 3275, Answerback "Newking".

## OTAGO, (includes Dunedin, Port Chalmers and Ravensbourne): 45.46 S. 170.43 E.

**DOCUMENTS:** See "Auckland".

**PILOTAGE:** Address "Harbour Master, Dunedin. Through coastal radio stations ZLW (Wellington) or ZLB (Awarua) giving ship's name, draft, and ETA. First message 72 hours out, revise 24 hours out: if from another New Zealand port (coastwise) similar message as soon as possible after leaving that port. Subsequent contact with port private radio station ZLES Taiaroa Heads on 2182 kc/s. or VHF Channel 16. Pilot boat is 55 ft., white launch, also fitted with same frequencies, which meets vessels as required but does not remain on station otherwise. Boarding position is with Taiaroa Head Lighthouse bearing 170° distant 2 miles; good anchorage in same position, depth 12 fathoms. Pilots can always board in this vicinity provided Master has ship under way at slow speed and obeys Pilot's instructions. Vessels arriving to work general cargo should endeavour to embark Pilot by 0500 in order to be alongside berth ready to take labour on board at normal commencing hour of 0700.

**ANCHORAGES:** With Taiaroa Heads Lighthouse bearing 170° distant 2 miles, good holding ground in all weathers, safe except in very strong Easterly gales which are extremely rare. If this position is already occupied by another vessel, there is ample room close Westward, Northwestward, and Northward. Depths 12 to 16 fathoms.

**RESTRICTIONS:** Tankers proceeding to or from the oil jetty at Dunedin make passage of the upper harbour in daylight hours only. Otherwise ships are not boarded between midnight and 0500 as no working time is gained by so doing.

**MAX. SIZE:** For berthing at *Port Chalmers:* Maximum draft 34 ft. at high water, 29 ft. at low tide. Channel is worked as required by circumstances; it is not restricted to slackwater. Maximum size of ship dependent on displacement; largest to date, length 702 ft. but vessels with displacement up to 35,000 tons may safely berth and larger vessels will be considered individually. For berthing in the upper harbour at *Dunedin* or *Ravensbourne,* maximum draft 26 ft. high water, 21 ft. zero tide; maximum length 585 ft.

**HEALTH:** Master to radio to Port Health Officer (entry port in N.Z. only) 24 hours before ETA requesting free pratique or declaring adverse state of health. Agents will advise Port Health Officer and Health Department inspectors who will board vessel on arrival, alongside actual wharf if free pratique requested. N.Z. regulations will require sealing of domestic meat chambers and purchase of local meats for use coastwise.

**RADIO:** Through Awarua Radio ZLB or Wellington Radio ZLW.

**RADAR/VHF:** Port radio station at entrance Taiaroa Head (ZLES) maintains 24-hour watch on R/T 2182 kc/s. and VHF Channel 16. Radar operated at station on request has range in excess of 20 miles to North and East.

**TUGS:** Tug used in vicinity of wharves turning, berthing and unberthing, etc. Tug's lines used without charge.

**BERTHING:** Some restrictions for larger vessels berthing with flood tide at Beach St. Wharf Port Chalmers.

**STEVEDORES:** Labour for Saturday work must be ordered by 0830 Fridays, otherwise by 1430 for following day. Advise Agents of firm ETA in time to judge this. Evening shift work to 2300 can be arranged when labour available.

**MEDICAL:** Emergency medical services and full hospital services always available at short notice. Emergency advice by radio available. Top priority given to arrangements for landing urgent cases for medical treatment.

**TANKERS:** Diameter of lines 8 in.; minor slop facilities only; one tanker discharge berth 700 ft. long, 28 ft. depth alongside at low water. Maximum size ship 585 ft. long; draft for channel transit 26 ft.

**DENSITY:** Harbour density 1024 all states of tide.

**FRESH WATER:** Fresh water available all berths, approx. delivery rate 20 tons per hour.

**FUEL:** Bunkers available at oil berth; all grades up to 1,000 secs. Redwood.

**DEVELOPMENTS:** New Beach St. Wharf Port Chalmers 1200 ft. long, 35 ft. depth at low water alongside, for container ships.

**GANGWAY/DECK WATCHMEN:** Shore watchman not normally required except at entry to oil jetty, such watchman arranged for by oil company. Ships required to maintain own gangway surveillance.

**OPENING/CLOSING HATCHES:** Automatic hatch gear may be operated by ship's personnel. Manual hatches by shore labour only.

**CERTIFICATES:** Normal cargo gear and equipment certificates as required for British ports; also Fumigation (Rats) or Exemption Certificate.

**CUSTOMS ALLOWANCES:** See "Auckland".

**IDENTIFICATION CARDS:** Not required for British subjects. Alien identification cards to be retained on board in case of need.

**CONSULS:** Consular agencies France, Norway, Denmark, Sweden, Germany, Italy, Netherlands, Portugal.

**REPAIRS:** All types deck and engine repairs possible; good machine shops, etc.

**DRY DOCKS:** Otago dock takes ships up to 520 ft. but beam limit 65 to 66 ft.; maximum draft entry 19 ft.

**REPATRIATION:** Repatriation arrangements can be made.

**AIRPORT:** Dunedin is served by all internal main airlines with connections to overseas via Christchurch, Wellington and Auckland. Airport 35 minutes from Dunedin City by car.

**TIME:** N.Z. Standard Time throughout year is GMT plus 12 hours.

**HOLIDAYS:** As for all N.Z. ports, i.e. January 1st and 2nd; Good Friday and Easter Monday; Anzac Day (April 25th); 1st Monday in June; Labour Day (Monday, nearest October 24th); Christmas Day and Boxing Day; Waterside Picnic day (Wednesday at end January). Where New Year and Christmas holidays coincide with Saturdays and/or Sundays, holidays are taken following Monday and/or Tuesday. General cargo not worked on these days nor on Sundays: tankers discharge 365 days: ships arrive and depart regardless of holidays. Container ships worked all days except Good Friday and Anzac Day.

**POLICE/AMBULANCE/FIRE:** Police 76012; Ambulance 77111; Fire Brigade 79111; Hospital 76740; Emergency (serious) dial 111 and ask for any service needed.

**TELEPHONES:** Slot telephones can be put on board with all local calls free, others by cash in slot.

**GENERAL:** No special moorings are required. Harbour, though tidal, is landlocked and there is no surge at any berth. Tide rise averages 6 ft. above datum (extremes 5 ft. and 8 ft.).
**SERVICES:** Radar and gyro compass technicians available. Good shop and providore facilities. Compass adjuster usually available.
**SHORE LEAVE:** Crew members not restricted ashore.
**REGULATIONS:** No special local regulations, but all N.Z. ports have very strict rules for garbage collection and disposal, etc. and against oil spillage.
**DELAYS:** Ample berths normally available. Occasional delays for labour shortage or wet weather (rainfall average 30 in. per year). Small quantities bunkers available ex-tank wagons at any berth. Larger quantities obtainable by shifting to oil jetty outside cargo work hours or as otherwise convenient.
**AUTHORITY:** Otago Harbour Board, PO Box 1, Dunedin, New Zealand. Tel. 77881. Telegraphic address "Koputai", Dunedin.

## PICTON: 41.17 S. 174.02 E.

**PORT LIMITS:** A straight line drawn in a 303° direction from Paparoa Point on Arapawa Island to the opposite shore of the mainland. A straight line drawn between East Head and West Head, Tory Channel Entrance.
**DOCUMENTS:** See "Auckland".
**PILOTAGE:** Compulsory. Pilot will board vessels between Long Island and Motuara Island or one mile radius seaward from West Head, Tory Channel Entrance, provided he is notified at least four hours before estimated time of arrival of a vessel off these islands.

Pilot boat 48 ft. in length equipped with VHF radio Channel 16, call sign "Picton Harbour".
**ANCHORAGE:** Except during strong North-west winds, there is a good anchorage Northward of Mabel Island in 16 fathoms for vessels of all sizes.

*Quarantine Anchorage.* Within the navigable area to Westward of Mable Island enclosed between the foreshore and a line from Kaipupu Point 047° to the Western extremity of Mabel Island, thence 349° to Wedge Point. Vessels not in quarantine can use this anchorage.
**RESTRICTIONS:** Controlling depth in approaches to anchorage is 44 ft. MLWOS.
**MAX. SIZE:** Max. length 620 ft. Draft, fore 30 ft., aft 36 ft. Vessels of this size can berth at any state of the tide. Longer vessels may be accommodated by arrangement with the Harbour Master.
**HEALTH:** First entry at a New Zealand port pratique is granted after vessel berths provided she has a clean bill of health from her last port, otherwise vessel would anchor in the quarantine anchorage, where port Health Officer would board. Once clear at the first port in New Zealand no further pratique is required.
**RADIO:** Port is equipped with medium frequency and VHF, call sign ZLVH, calling frequency 2182 kilocycles. Watch is maintained Monday to Friday, 0900 to 0933,11140 to 1203, 1540 to 1603 daily and at other times by arrangement. In addition the following schedule is maintained for communication with the road/rail ferries: 0103, 1140, 1640, 2020, 2050. Sundays only: 1603.
**BERTHING:** One overseas wharf 700 ft. length with accommodation for two vessels. Depth at wharf up to 38 ft.

2 road/rail ferry berths 500 ft. long with modern terminal facilities for roll-on/roll-off traffic.
**TUGS:** None.
**STEVEDORES:** Agents will provide gangs and other facilities provided Master gives prior notice of his requirements.
**MEDICAL:** It is necessary for Master to give his Agent as much advance notice as possible. Two doctors reside in the port. Hospital at the port and the main hospital at Blenheim, 17 miles by road. Ambulance service available.
**DENSITY:** 1025.
**FRESH WATER:** Supplies available at 30 t.p.h. Cost 75 cents/ 1,000 gals.
**FUEL:** By tank wagon only.
**GANGWAY/DECK WATCHMEN:** Required by general harbour regulations and is generally carried out by ship's deck hands.
**OPENING/CLOSING HATCHES:** Performed by stevedores.
**CUSTOMS ALLOWANCES:** See "Auckland".
**CARGO GEAR:** Marine Department control this and regulations are issued accordingly. These regulations are very similar to those in the United Kingdom.
**IDENTIFICATION CARDS:** Not required.
**CONSULS:** These are stationed at Wellington. (See "Wellington".)
**REPAIRS:** Small repairs undertaken by three companies.
**REPATRIATION:** Crew changes can be made.
**AIRPORT:** Woodbourne – 22 miles by road from Picton, served by feeder services to Wellington – Christchurch.
**TIME:** GMT plus 12 hours, no change.
**HOLIDAYS:** New Year's Day, Anniversary Day, Good Friday, Easter Monday, Labour Day, Sovereign's Birthday, Christmas Day, Boxing Day, Anzac Day, Watersiders' Workers Picnic Day.
**POLICE/AMBULANCE/FIRE:** Police, tel. 439; Ambulance, through doctor or in case of emergency tel. 207; Fire, ring exchange operator.
**TELEPHONE:** Facilities exist to place telephones on board.
**SHORE LEAVE:** Allowed.
**AUTHORITY:** Marlborough Harbour Board, PO Box 84, Picton. Tel. 270.

## TIMARU: 44.24 S. 171.19 E. (See Plan)

**DOCUMENTS:** See "Auckland".
**PILOTAGE:** Pilotage is compulsory, and Pilots are availabl
and night. A vessel requiring a Pilot should remain 1 mile sea
of Eastern Extension Mole, and should not proceed Northwar
line of leading lights on Benvenue Cliff.
**ANCHORAGES:** A vessel should anchor in a depth of not
than 7 fathoms, sand, and Eastward of harbour light structure,
not within 1 mile of Eastern Extension Mole.
**RESTRICTIONS:** Tidal conditions may affect the time of en
ing harbour.
**MAX. SIZE:** Length, 700 ft.; beam, 90 ft.; draft 27 ft. 6 ins. Tim
berthing vessels of over 21 ft. draft. will be dependent on tidal
ditions at Harbour Master's discretion.
**HEALTH:** Due to exposed nature of anchorage, incoming ves
are examined and pratique is granted after a vessel berths. In e
that vessel is quarantined, she will be required to return to ancho
without any contact being made with shore.
**RADIO:** Timaru Harbour Board has a radio telephone sta
equipped with both medium frequency and VHF installations.

Call sign ZLSD, calling frequency 2182 kc/s., working freque
2162 kc/s. Fixed watches maintained for a period of 15 minutes e
4 hours, e.g.: 0345–0400, 0745–0800, 1145–1200, 1545–1600, 1945–2
2345–2400 (New Zealand Standard Time) and at other times mutu
arranged. VHF call sign is Timaru Harbour, Channels 6, 12, 16.
**RADAR/VHF:** Port radar set is located at the Old Lightho
immediately behind harbour, and is available to assist vessels ar
ing and entering port in poor visibility.
**TUGS:** One tug, 1100 h.p. and pilot launch/tug, 200 h.p. availab
**BERTHING:** Moorings supplied at all berths.
**SPECIALISED CARGO-HANDLING FACILITIES:** *All wea
mechanical loaders:* Four all-weather mechanical meat loaders. E
machine is capable of loading 720 units per hour, to a maximu
2,500 units per hour. Also butter, cheese, frozen vegetables ca
handled.

*Bulk Handling:* A modern bulk-handling installation capable
handling grain, lucerne and certain types of minerals. Intake ra
grain 120 tons per hour; lucerne 100 tons per hour. Ship's load
rate: grain 800 tons per hour; lucerne 680 tons per hour. Ship loa
equipped with belt weigher. Wharf conveyor has maximum belt r
of 1,000 tons per hour. Total silo storage at present available 6
tons grain. Inert gas protection provided for lucerne.
**STEVEDORES:** Gangs must be ordered before 0700 weekda
and before 0900 Friday for Saturday work.
**MEDICAL:** Full medical facilities are available as required, inclu
ing an excellent public hospital.
**TANKERS:** One tanker berth, discharge through 8-in. hoses.
**DENSITY:** Specific gravity 1025 at all states of tide.
**FRESH WATER:** Available at all berths, delivered at up to
ton/hour.
**FUEL:** Bunkers available, heavy and medium fuel oil. 24 hours a
vance notice required.
**FIRE PRECAUTIONS:** When tankers are discharging, access
wharf is prohibited except to those holding passes. Fire-fight
equipment is placed in readiness on wharf.
**DEVELOPMENT:** Main consideration in future planning is i
creasing the depth of water in the entrance channel and in the p
**GANGWAY/DECK WATCHMEN:** Available if required.
**OPENING/CLOSING HATCHES:** Carried out by stevedores.
**CUSTOMS ALLOWANCES:** See "Auckland".
**IDENTIFICATION CARDS:** Not required.
**REPAIRS:** Most deck and engine repairs can be undertaken.
**REPATRIATION:** Facilities exist for effecting crew changes a
arranging necessary repatriations.
**AIRPORT:** Situated about 7 miles from city, and there is o
flight per day to and from Christchurch International Airport.
**TIME:** New Zealand Standard Time (GMT plus 12).
**HOLIDAYS:** New Year's Day; 2nd January; Picnic Day (p
holiday, last Wednesday in January); Good Friday; Easter Monda
Anzac Day (25th April); Queen's Birthday (first Monday in Jun
Dominion Day (third Monday in September); Labour Day (l
Monday in October); Christmas Eve (work ceases midday); Chri
mas Day; Boxing Day. Work can be arranged only by private neg
tiation on a voluntary basis.
**POLICE/AMBULANCE/FIRE:** Emergency No. 111 and ask oper
tor for service required. Other than emergency calls: Police, 84-
Timaru; Ambulance, 5253 Timaru; Fire Brigade, 7089 Timaru.
**TELEPHONES:** Can be supplied to vessels at all berths.
**SHORE LEAVE:** Alowed.
**PORT AUTHORITY:** Timaru Harbour Board, PO Box 76, Tima
Tel. 4199

## WANGANUI: 39.56 S. 175.04 E.

**PORT LIMITS:** Arc of a circle of 3 nautical miles radius cent
at the flagstaff at Castlecliff, sited 39° 56′ 49″ S. 174° 59′ 23″ E.
**DOCUMENTS:** See "Auckland".
**PILOTAGE:** If Wanganui is first N.Z. port, initial application f
Pilot and vessel's ETA should be passed to local Agent by rad
through one of three Post Office radio stations. If not first N.Z. po
this information should be given to local Agent by Agent at p
vious port. Final details settled when R/T contact made betw
pilot station and ship.

Pilot launch "Karere", LOA, 41 ft. painted white, high midsh wheelhouse. Pilot boards at anchorage position. International signals for Pilot should be used if no R/T contact made.

**ANCHORAGES:** One anchorage for vessels awaiting to enter.

**RESTRICTIONS:** Port worked day or night at high water when bar conditions are suitable.

**MAX. SIZE:** Length 350 ft., beam no limit, draft dependent on bar depths at particular time but usually 15 ft. maximum at high water springs. No installations outside main port area.

**HEALTH:** See "Auckland".

**RADIO:** Wellington Radio ZLW. No radar or VHF. R/T frequencies 2182, 2162, 2012.

**TUGS:** No tug available. Pilot launch used for swinging.

**BERTHING:** Berthing takes place at high water slack.

**SPECIALISED CARGO-HANDLING FACILITIES:** *No. 6 Berth:* pipe-line for bulk cement connecting wharf with adjacent silos.

*No. 1 Wharf:* direct handling into cool store for fruit.

Portable hoppers used for bulk cargoes to load directly into railway wagons.

There are no facilities for containers, roll-on/roll-off traffic, liquid chemicals or LPG carriers.

**STEVEDORES:** Requirements for labour should be given with ETA and request for Pilot. At least 24 hours notice required.

**MEDICAL:** 24 hours notice required if possible. Hospital facilities available. Inoculations, certificates, etc.

**DENSITY:** 1020 at HW. 1005 at LW. These figures vary greatly according to amount of freshwater in river.

**FRESH WATER:** Plentiful supply through wharf hose connections. Rate of delivery depends on height of ship's filling pipe above wharf level.

**FUEL:** All grades available but ship has to pump out of road tankers. Amount of notice depends on grade required.

**DEVELOPMENTS:** Development plan in course of preparation but as yet no details of size of any possible new installations or draft increases.

**GANGWAY/DECK WATCHMEN:** Watchman necessary, either crew member or shore watchman.

**OPENING/CLOSING HATCHES:** Carried out by stevedores.

**CUSTOMS ALLOWANCES:** See "Auckland".

**IDENTIFICATION CARDS:** Not required.

**REPAIRS:** Minor deck and engine repairs possible.

**REPATRIATION:** Facilities exist but more easily accomplished at a main port.

**AIRPORT:** About 6 miles. Airport caters for internal services only.

**TIME:** N.Z. Standard Time (12 hours in advance of GMT) is kept throughout year.

**HOLIDAYS:** As Auckland, except Anniversary Day holiday which is that held in Wellington Province. No cargo is worked on these days.

**POLICE/AMBULANCE/FIRE:** Ambulance, 8909; Police, 4488; Fire Brigade, Wanganui, 8185; Fire Brigade, Emergency 111.

**TELEPHONES:** Arrangements can be made for placing telephones on board.

**SHORE LEAVE:** Allowed.

**DELAYS:** Fresh onshore winds could make entrance unworkable for a vessel waiting to enter. Cargo work stops in rain and in unusually strong wind. Bunkering would be slow if large amount of bunkers required.

**AUTHORITY:** Wanganui Harbour Board, Box 8001, Castlecliff, Wanganui, N.Z. Tel. 35137 Wanganui. Telegraph Harborbord, Wanganui.

## WAVERLEY HARBOUR, North Island: 39.50 S. 174.37 E.

**LOCATION:** Waverley Harbour is located on the West coast of the North Island of New Zealand in the Northern end of the South Taranaki Bight.

**PORT LIMITS:** Waverley harbour is defined as being all that area of water bounded by the line of mean high water spring tides, and having as its seaward limit the arc of a circle of 2 nautical miles radius centred at 39° 49·6 S. 174° 36·5 E, near the mouth of the Wairoa Stream.

**DOCUMENTS:** Besides the Port Health Doctor, other Government personnel boarding the vessel by helicopter for inward clearance are: 1 Port Health Officer, 1 Customs Department Officer, 1 Agriculture Department Officer.

Port Health Officer will inspect Deratisation Certificate and (possibly with Agriculture Officer) inspect food store rooms, refrigerated spaces, galley, pantry, etc.

Customs Officer: The Customs Boarding Officer acts for the Immigration Department and the Marine Department and will inspect the following ship's documents: Register, Loadline Certificates, Safety Equipment Certificates, Radio Certificates.

The following documentation is required on Inward Clearance:

List of Prohibited Immigrants (Form Lab. Imm. 290).
4 Crew Lists.
Inward Manifest/Nil Declaration.
Search List (Reg. Form 2) Crew.
Stores List.
Poisons Lists.
Firearms List.
2 copies of List covering birds, animals, and fish on board (certified by Master).
Passenger List (if any).

For Outward Clearance (Customs):

2 copies of Special Red Printed Outward Manifest (front page) with attached Ship Printed Manifest.
2 copies of Stores List.
2 copies of Crew List.
5 copies of Embarking Passenger List.
2 copies of Transit Passenger List.
1 Passenger Arrival Card (Lab. Imm. 290) for any crew of passenger leaving vessel.

Agriculture Officer: on arrival:

2 copies of Ship's Meat Locker.
Reg. 1966 Agl. 36.

The Boarding Officer will inspect the vessel's meat locker and inspect the garbage containers.

Australia, United States, Canada and New Zealand meat not loaded in the place of origin, and Japanese meat will be sealed up on vessel's arrival by the Agriculture Officer.

At sailing time, the Agriculture Officer may attend to check on garbage, sealed lockers, etc., together with the Customs Officer, who issues the Port Clearance, to check if all crew are aboard, and that the Bonded Stores Seal is intact.

**NAVIGATION AIDS:** SBM – radar reflector, white flashing light, one flash every 9 second, range 6 miles.

*Leading Lights:* In transit bearing 355° 33′.

*Range Lights:* In line bearing 312° 03′.

All four light towers are of louvred timber construction, painted white with vertical centre line painted red.

The pumphouse building immediately to the West of the two leading lights is prominent with a radar visibility to 15 miles.

**PILOTAGE:** Pilotage is compulsory for Waverley Harbour and under control of the Waverley Harbour Master.

It has become customary for vessels to await the Pilot in a position 2 miles South of the SBM. Vessels equipped with VHF will be contacted accordingly when within range. Information on weather conditions and time of Pilot boarding will be advised through this media.

Due to the nature of the coastline adjacent to Waverley Harbour and the weather conditions experienced, the transportation of the Pilot (and other port official personnel) is effected by helicopter, from a pad adjacent to the Administration Building. It must be ensured that radio antennas running respectively from foremast to bridge and bridge to aft, as the case may be, are lowered clear in good time prior to the arrival of the helicopter, and the landing area cleared of loose gear and portable foam fire equipment properly charged, available for immediate use at the landing area.

Berthing to the SBM is effected day and night but dependent on weather conditions being favourable for placing the floating mooring hawsers on the buoy, and visibility and flying conditions being acceptable to the helicopter pilot and in concurrence with the Master of the vessel.

For night flying a wind sock will be erected for the helicopter pilot's observation of wind direction, and vessel is to be floodlit overall.

**ANCHORAGE:** The recommended anchorage off the port is a rectangular area 0·75 miles East and West, and 1 mile North and South of a position 3 miles South of the SBM. The bottom is sandy in 11 to 12 fathoms and the holding ground is reported fair.

A safe anchorage for vessels having to leave the buoy and/or to await suitable weather to moor to the buoy is recommended in Golden Bay. Distance is approximately 90 miles S.W. of Waverley, the approaches are clear and the lights on Farewell Spit and Separation Point, of 15 miles and 12 miles respectively, most reliable. The holding ground is good and depth of water 15 to 16 fathoms.

**WEATHER:** The Harbour and SBM is exposed to the West through South to South-east. The swell conditions caused by Westerley and South-westerly weather are considerably reduced by the shallow ground to the Westward, but Southerly swell rolls in unhindered. Very sudden changes of weather are experienced on this coast with the rapid movements Eastward of cold fronts over the Tasman Sea.

**PRATIQUE:** Vessels arriving at Waverley on consecutive voyages Japan/New Zealand and with all personnel holding valid International Certificates for smallpox should radio to "Health, Wanganui" 24 hours before arrival Waverley, advising number of passengers and crew, and "All Healthy" in which case pratique is automatically granted without any acknowledgement to the vessel.

If a vessel has any suspected diseases on board and if any crew member does not hold a valid International Certificate for smallpox, this information should be stated in the radio message to "Health, Wanganui". The Port Health Doctor will then attend on board on arrival for inspection of all International Health Certificates, and carry out vaccinations as required.

The doctor will supply on arrival N.Z. Maritime Declaration of Health Form H-Q2 for completion by the vessel. It is customary to procure an additional form for the following voyage to facilitate easy inward health clearance thereafter.

**RADIO:** There is no Government Radio Station at Waverley. Vessels trading to Waverley use ZLD Auckland Radio, ZDB Awarua Radio, or ZLW Wellington Radio.

Advice of Arrival: Vessels to radio ETA to "Wavemarine" Waverley on departure from last port, and 48 hours and 24 hours prior to arrival.

In addition to the vessel's ETA to "Wavemarine", arrival draft and details of the hatch loading plans should be advised.

Vessels equipped with VHF should listen in on Channel 14 (156·7 mHz) when in range of Waverley Harbour.

Base Station is at the Shiploading Pump Station, on board the tender vessel *Wairoa* and a remote control unit is fitted in the main administration building. Mobile units are also employed during the loading operation.

Base Station Channels are:
Channel 6 – 156·3 mHz Intership.
Channel 9 – 156·45 mHz Private and Loading
Channel 14 – 156·7 mHz Port Operations/Docking.
Channel 16 – 156·8 mHz Safety.

Meteorological information for shipping is broadcast by the Coast Radio Stations ZLW, ZLB and ZLD at frequent scheduled times. ZLW broadcast by radio telegraph on 417·5 kHz, ZLD 487·5 kHz.

**BERTH DESCRIPTION:** The single point mooring buoy of 11 metres diameter is moored in 64 ft. at low water, 1·5 miles from the shore in position 39° 51′ 02.2″ S. 174° 35′ 52.14″ E.

**BERTHING:** The tender vessel *Wairoa* when the carrier approaches the buoy will receive a 50 m.m. messenger rope with suitable shackle from the vessel and run out and shackle to a small strop on the eye of the first 18-in. floating mooring hawser. When fast, the vessels will heave all aboard, and when the spliced eye is at a suitable distance inside the bull nose a bight of the vessels 9-in. or similar mooring rope will be passed through the eye of the 18-in. hawser and brought back to the bitts and the working end turned up on said bitts. This will give four parts of the vessels mooring ropes to one 18-in. floating hawser.

Alternatively, two ends of a vessels mooring rope could be used to one hawser and turned up to two sets of bitts, also giving four parts of mooring rope to each hawser. Similar method to be used for the second 18-in. hawser from the other side and both 18-in. hawsers to be set up with equal tension on each. Conveyor belt rubber is employed on each hawser where it passes through the bull nose. A good supply of heavy grease should be available for application to the rubber belt to reduce chafing.

It is essential that two or three good heaving lines be available with the messenger rope in the first instance to pass to the tender vessel, to avoid any delays in mooring.

**HOSES:** The floating loading hose string comprises ten 35-ft. lengths of hose, with the shipboard end supported by a steel buoy. After mooring is completed the tender vessel will tow around the floating hose underneath the pick-up derrick, plumbed over the manifold connection on the port side of the foredeck abaft the forecastle head. The pick-up buoy of the hose-end will have shackled into it a 30-ft. length of polypropylene, of 7 in. circumference, to which is attached a 100-ft. length of 2¼ in. circumference for passing to the vessel. The 7-in. polyprop is hove up to the rail and hooked into the vessel's cargo hook. The flange elbow with attached camlock coupling is then hove up and connected to the vessel's deck hose manifold. The hose is presently supported on the ship's derrick and stayed fore and aft after coupling up has been completed.

It has been estimated that after the iron sand slurry has been loaded, and the excess water decanted from the surface of the cargo, that the bulk density of the iron sand should be 190 lb. to the cubic foot.

**LOADING:** All compartments to be loaded should be clean with all drain sumps and double bottom butterworth hole filter places clear.

If weather conditions permit, the vessel should arrive with the after hatch lid of each hold open to facilitate visual inspections of the hold decanting eductors.

**FRESH WATER/FUEL:** Not available.

**REPAIRS:** Emergency repairs can be arranged, including radio.

**MEDICAL:** The Port Health Doctor is a qualified doctor of medicine and can be acquainted of any medical problems affecting any crew member; the necessary arrangements can then be made for treatment aboard or ashore, as convenient.

**CUSTOMS ALLOWANCES:** See "Auckland".

**CONSULS:** There are no consular representatives at the port of Waverley.

**REPATRIATION:** Lists of personal effects, accounts of wages, etc., of any vessels' personnel left ashore, hospitalised or deserted, should be available to Agent as early as possible.

A letter of authorisation is required if the Agent is to provide accommodation, meals, medical attention, transportation or travel expenses, and/or cash advances for account of vessel.

**SHORE LEAVE:** Shore leave for vessel's personnel is not practicable.

**GENERAL:** No Port Authority personnel remain on the vessel during the loading period at the SPM Buoy.

The Marine Department require that all vessels, while moored, "shall at times be kept in readiness to proceed to sea".

The Pilot who is the loading master for Waipipi Iron Sands Limited will accept the Notice of Readiness for the vessel, and acts as Agent for all the vessels requirements. It is customary for the Pilot/Loading Master/Agent to be accommodated on board the vessel during her period on the buoy.

Whistle signals in an emergency may be used for medical, police, etc., as required.

Due to limited means of communicating with vessels while at the loading facilities, Masters are advised that no storing will be accomplished at this port.

No garbage is to be thrown over the side of the vessel whilst she is on the New Zealand coast and moored to the buoy. Garbage must be retained on board and not dumped until the vessel is one day's steaming clear of the Northern point of New Zealand.

**AUTHORITY:** Waipipi Iron Sands Limited, POB 143, Waverley, North Island, New Zealand.

## WELLINGTON: 41.18 S. 174.46 E. (See Plan)

**PORT LIMITS:** All the waters comprised within the harbo Wellington having as their outward seaward limit the arc of a c running from the land ward boundary of the foreshore at Fitzro and thence into Cook Strait and thence to the landward bou of the foreshore at Island Bay, such arc being an arc of a c 3 nautical miles radius and having its centre at a point on the Rock in the harbour of Wellington.

**DOCUMENTS:**

*Port Health Authorities.*

Maritime Declaration of Health (1 copy).

Crew List, stating name, rank, sex, nationality and date of sma vaccination (1 copy).

Port Health Officer will also wish to sight each member of cr smallpox Vaccination Certificate.

Current International Derating Exemption Certificate.

*Customs Authorities*. See "Auckland".

*Agent*.

Crew List, stating name, occupation, rank, sex and natio (1 copy).

Freight Manifest (3 copies).

*Note:* Manifests should be airmailed by loading port to arr New Zealand at least one week prior to vessels arrival.

Stowage Plan, airmailed same as Manifest (2 copies).

*Agricultural Authorities.*

Port Agriculture Inspection Instructions – Ship's Meat L Regulations 1966.

**PILOTAGE:** Compulsory. Pilot vessel is not normally on st outside entrance, and all vessels requiring a Pilot are requir give 24 hours notice by radio of their expected time of arrival of limits. A second notice confirming or amending the first is sent 4 hours before expected time of arrival. In event of a ship pecting to arrive earlier than the time given in 24-hour mess 4-hour message shall be sent 4 hours before the new expe time of arrival. Should vessel expect to arrive later than her 24- message, her 4-hour message shall be sent 4 hours before expe time of arrival given in her original 24-hour message. All commu tions which should be addressed "Harbour Master, Welling will be attended to at all hours of the day or night.

Should it not be possible to give previous notice of arrival it be up to 1½ hours after a vessel is sighted by signal statio Beacon Hill before a Pilot can board.

Pilots normally embark or disembark South of Pencarrow H but in the event of heavy Southerly weather, it may be necessa embark or disembark Pilot in smooth water at or near the com sory limit.

**ANCHORAGES:** Depth in anchorages up to 60 ft.

*Fairway*. Within portion of harbour lying inshore and to West of a line drawn from Easternmost point of Oriental Bay, in a direction, to Kaiwharawhara Shore.

*Inner Anchorage*. Within portion of harbour laying betwee Eastern boundary of fairway anchorage and a line drawn from P Jerningham, in a 354° direction to Kaiwharawhara Shore.

*Outer Anchorage*. Within portion of harbour Eastward of i anchorage.

*Note:* Vessels anchoring in outer anchorage should take a position well up towards Kaiwharawhara.

*Explosives Anchorage*. Within portion of harbour contained i area 4 cables square with sides 000°, 090°, 180°, and 270°. Cent area lies approximately 1·45 miles due North of Point Halswell beacon.

Caution: It is advisable when anchoring (especially when in l draft) to drop two anchors in an Easterly and Westerly direc veering from 75 to 90 fathoms of cable, as it frequently blows with heavy gusts of wind off the high land that surrounds har causing a vessel to sheer about. In very strong winds a ship wi much easier by having both anchors down. A strict watch shou kept.

*Prohibited Anchorages*. Anchorage is prohibited within 500 f the jetty situated on the North-eastern side of Somes Island.

**RESTRICTIONS:** Controlling channel depth is 37 ft. below c datum. All vessels may enter, berth, unberth, or depart during hours of darkness. Tankers do not usually berth or depart du hours of darkness. Berthing is carried out at any state of the

**MAX. SIZE:** Maximum draft 35 ft. LW with no swell. Size no

**HEALTH:** *Health Officer's Examination Ground*. Within portio harbour contained in an area 3 cables square, North-western co of which is at the intersection of a line drawn from Point Jerning in a 354° direction, towards Kaiwharawhara shore, and with a drawn from tower on the Government Life Insurance Building jacent to the General Post Office) in a 055° direction, which line is Northern boundary of the examination ground. Until pratique been granted vessels arriving from ports beyond New Zealand m not proceed inwards beyond the limits of this area.

**RADIO:** Medium frequency: Call sign is ZLEG, calling frequ only 2182 kHz, working frequency 2012 kHz. Vessels working the port and calling 2182 kHz should listen for reply on 2012 A continuous watch is maintained on 2182 kHz.

VHF: Call sign "Wellington Harbour Control", on Channe Working Channel 12 and Channel 14. A continuous watch is m tained on Channel 16.

Port operations. Vessels equipped with radio-telephone w within harbour limits must maintain a listening watch on 2182 or Channel 16 to ensure immediate contact if required. Only for information on harbour conditions, berthing or safety of na tion will be accepted.

When a vessel is notified by radio-telephone or Morse lamp of berth alotted she must confirm this with Pipitea Wharf signal station prior to berthing.

*Note:* Pipitea Wharf signal station and pilot launches are equipped with both medium frequency and VHF radio-telephone. Harbour Master's Office and Union Steam Ship Co. of New Zealand Ltd. tugs are equipped with VHF radio-telephone.

**TUGS:** The Harbour Master may direct the Master of any vessel to engage the services of a tug, and also direct the manner in which the tug shall be used. Two 2,700 b.h.p. Voith Schneider tugs, guaranteed bollard pull 28/31 tons, speed 12 knots, also equipped for fire fighting and salvage duties. Both tugs owned by Wellington Harbour Board.

One tug, 850 i.h.p., owned by Union Steam Ship Co. of N.Z. Ltd. available within port limits.

† Linkspan.

‡ Linkspan facilities served by rail.

**CONTAINERS:** Thorndon Container Wharf, situated South of the Aotea Quay breastwork, consists of a pre-stressed pile and reinforced concrete structure 84 ft. wide extending for 1,900 ft. which provides two container berths each 950 ft. in length, with a depth of water alongside of 40 to 45 ft.

The Board operates a 45-ton twin-lift quayside container crane with 115 ft. waterside outreach and 35 ft. landside outreach to serve the 1,900 ft. quay frontage.

The northern and Southern berths have back-up working areas of 13 acres and 21 acres respectively. A total of 50 acres can be made available, as trade demands.

Berth II or Common User Terminal has been leased to a terminal operating consortium on behalf of certain shipping lines.

The thirteen-acre container park has ground-level outlets for 338 clip-on refrigerated containers and space for over 1,500 general cargo containers in a two-high stack. Five straddle carriers, several forklifts and Drott travel-lift are used for the movement of containers. Two break bulk depots totalling 59,000 sq. ft., one with rail access, also provide packing and handling space under cover for loading or unloading less than container-loads. Office space has been made available for the administration of the Terminal. This Terminal is capable of a throughput of 26,000 containers each way per year, i.e. equivalent to half a million tons of cargo.

Berth 1 back-up area will be developed as trade increases. This area will be capable of a throughput of 42,000 containers each way per year.

Adjacent to the Terminals, the New Zealand Government Railways are providing a 32½-ton rail/road Goliath transfer crane, together with six rail tracks, 700 ft. in length, and will control the transfer of all refrigerated and general containers between rail and road, or terminal transport.

**DEVELOPMENTS:** Progressive development of Thorndon Container Wharf back-up area with associated facilities and break bulk depots, a 32·5 single lift quayside container with telescopic spreaders to handle 20, 30, and 40 ft. ISO containers will be in operation within 18 months. (This crane will assist the twin-lift crane operations.)

Seaview Wharf; the construction of a two-berth tanker terminal is under way.

**TANKERS:** Tankers can berth alongside Point Howard Wharf, Aotea Quay and Miramar Wharves. Side connections are to be used at all wharves. During hours of darkness pipe-line must not be disconnected without first obtaining permission from Harbour Master. All precautions must be taken to avoid oil pollution of Harbour. Scuppers must be plugged and sawdust kept at hand in case of spillage.

Point Howard Wharf is exposed to weather and in the event of a Southerly gale special attention must be paid to vessel's moorings.

No facilities are provided for discharge of tank washings other than when a vessel is on the floating dock.

**DENSITY:** 1025.

**FUEL:** Available at tanker discharging wharves.

**FRESH WATER:** Available at all wharves, delivered by hose (4 hoses per vessel max.), 50 tons per hour.

**DRY DOCKS:** *Floating Dock.* A floating dock capable of lifting vessel of 17,000 tons displacement is available.

*Floating Crane.* Harbour board has an 80-ton revolving and self-propelling floating steam crane of sufficient radius and height to serve the largest vessels when floating in light draft conditions.

**REPAIRS:** Major repairs can be undertaken. There are machine shops and foundries. Diving equipment and the services of trained divers are available for underwater inspections and repairs.

**GANGWAY/DECK WATCHMEN:** Shore watchmen available.

**OPENING/CLOSING HATCHES:** Work normally carried out by stevedores. Only time crew are to open and close top hatches is when advised by stevedore. In case of hydraulic hatches in tween-decks, crew are to open and close, not stevedores.

**STEVEDORES:** Available. No particular ETA advice required except as normally sent by Master.

**CERTIFICATES:** Customs Department require Ship's Register on arrival. Marine Department require:

- Load Line Certificate.
- Tonage Certificate.
- Certificate of Registry.
- Convention Certificates, i.e.
  - Safety Equipment Certificate.
  - Safety Radio-telegraphy Certificate.
  - Safety Construction Certificate.
  - Exemption Certificate (if any).
  - If passenger ship, Passenger and Safety Certificate.
  - Cargo Gear Register.
  - Certificates for all Cargo Gear, i.e. runners, spans, shackels, swivels, etc.
- Deratification Certificate.

**CUSTOMS ALLOWANCES:** See "Auckland".

**IDENTIFICATION CARDS:** Not required.

**CONSULS:** United Kingdom and the Commonwealth Countries of Canada, Australia, India, Singapore and Malaysia have High Commissioners in New Zealand with Headquarters in Wellington.

Foreign Representatives: Argentina, Austria, Belgium, Bulgaria, Chile, China, Czechoslovakia, Denmark, Ecuador, Finland, France, Germany, Greece, Indonesia, Ireland, Italy, Japan, Republic of Korea, Netherlands, Norway, Philippines, Poland, Portugal, Roumania, South Africa, Sri Lanka, Sweden, Switzerland, Thailand, U.S.A., U.S.S.R., Republic of Vietnam, Yugoslavia.

**REPATRIATION:** Facilities are available for crew changes and arranging any necessary repatriations.

**SHORE LEAVE:** Crew members are allowed shore leave at all times.

**AIRPORT:** Situated 4½ miles South-east of City Wharves by road; regular internal and Australian services.

**TIME:** Local time is GMT plus 12 hours throughout the year.

**HOLIDAYS:** New Year's Day (1st January); 2nd January; Wellington Province Anniversary Day (22nd January); Waterside Workers Union Picnic Day (generally observed on Monday of the week 29th January falls); Good Friday; Easter Monday; Anzac Day (25th April); Sovereign's Birthday Observance (first Monday in June); Labour Day (fourth Monday in October); Christmas Day (25th December); Boxing Day (26th December).

**MEDICAL:** Four hour's notice is sufficient for Agent to mobilise the service concerned. For minor attention it is sufficient that Master advises Agent on arrival. Hospital facilities are available. Current International Certificates of Vaccination against smallpox are required by the Authorities.

**POLICE/AMBULANCE/FIRE:**

|  | *Routine* | *Emergency* |
|---|---|---|
| Wharf Police | 47–000 | Dial 111 and ask operator for service required |
| Ambulance | 555–999 |  |
| Fire Brigade | 50–188 |  |

**TELEPHONES:** Vessels may be connected to telephone system at city berths by application to the Harbour Master.

**AUTHORITY:** Wellington Harbour Board, PO Box 893, Wellington, Queen's Wharf, Jervois Quay, Wellington.

## WHANGAREI: 35.45 S. 174.21 E.

**PORT LIMITS:** From a point due South of the summit of Sentinel Rock to a point 5 cables due East of Sentinel Rock, thence to a point 5 cables East of Bream Head.

**DOCUMENTS:** See "Auckland".

**PILOTAGE:** Compulsory. Pilots embark on the line of leads 141°/321° at the seaward extremity of Pilotage District, i.e. up to 1½ miles South-eastward of the Fairway Buoy. In heavy Easterly weather, it may be necessary for pilot vessel to lead ship in through the Outer Channel and embark in the lee of Frenchman Island.

Pilots are available all hours day and night subject to prior minimum notice of 24 hours being received during normal week-day working hours. Second notice confirming or amending first to be sent four hours before expected arrival. The Pilot supplies a set of Harbour bylaws. Pratique, agriculture and customs clearance is normally undertaken on arrival at berth.

Pilot boat is equipped with VHF. Working frequency is Channel 12, but Channels 6, 8 and 16 are also fitted. Pilot vessel *Manaia* – call sign ZM3830; pilot vessel *Ngapuhi* – call sign ZM2146. Range approximately 20 miles. *Manaia* painted blue, varnished housing, yellow funnel; *Ngapuhi* painted blue, white housing, yellow capping rails – pilot ladder with manropes required.

**ANCHORAGE:** Is situated 5 to 10 cables Eastward of the Fairway Buoy in 12 to 20 fathoms of water in the section enclosed by the Fairway Buoy bearing 225° T to 315° T. Holding ground good in fine sand, but exposed to Easterly weather.

*Harbour Anchorage.* At Marsden Point, 2 cables West of Passage Island light, in 5 fathoms of water. Max. draft 24 ft. Good holding ground, sand and shell bottom.

**RESTRICTIONS:** Controlling depth in entrance channel 50 ft. MLWS. Depth in upper harbour channel maintained at 28 ft. MLWS.

**MAX. SIZE:** Marsden Point: Oil Refinery dolphin berths, LOA 1,000 ft., draft 50 ft., Cargo berth LOA 600 ft., draft 28 ft.

Port Whangarei: LOA 600 ft., draft 31 ft.

**HEALTH:** All vessels examined by Health Officer on arrival.

**RADIO:** The station is Marsden Point, Whangarei. Call sign ZLKW Continuous 24-hour watch is maintained on VHF Channels 16 and 12, range 40 miles. Medium frequency, listening watch on 2182 kc/s., working frequency 2012 kc/s., range 200 miles.

**RADAR:** Tugs and pilot boat *Manaia* fitted with radar.

**TUGS:** Available. Tugs equipped with VHF. Tugs usually secure to vessels entering in vicinity of Frenchman Island. Numbers of tugs normally used are 1 tug for vessels up to 25,000 tons dwt., 2 tugs for vessels up to 45,000 tons dwt., 3 tugs for vessels up to 65,000 dwt. 4 tugs over 65,000 dwt. Unberthing: one tug is normally required for vessels under 25,000 dwt., and two tugs for all other vessels, subject weather conditions.

**BERTHING:** Marsden Point Oil Berths (2) – operated by the New Zealand Refining Company, Marsden Point. LOA 1,000 ft., maximum draft 50 ft.

Marsden Point Cargo Berth (1), LOA 600 ft., maximum draft 28 ft.
Port Whangarei berths (3), LOA 600 ft., maximum draft 31 ft.

Portland berths (3), bulk cement berth LOA 270 ft., maximum draft 18½ ft.; bagged cement berth LOA 210 ft., maximum draft 12½ ft.; cargo berth LOA 350 ft., maximum draft 18½ ft.

**SPECIALISED CARGO HANDLING FACILITIES:** Portland bulk cement loading jetty. Port Whangarei, 7 portable hoppers for use discharge of bulk cargoes. Cargon system of butter loading.

**STEVEDORES:** Confirmation of arrival time four hours before ETA or revised ETA, whichever is earlier is required. Notice of arrival during a week-end or public holiday must be given not later than 1400 hours on the last working day preceding arrival.

**MEDICAL:** Hospital and dental services available.

**TANKERS:** Are berthed at all hours day and night. Vessels of 30,000 tons dwt. and upwards are usually berthed portside to berth at slack water, and should position ship's gangway 20 ft. upstream of hose connections prior to arrival.

Slop reception facilities are available. Diameter of load and discharge line 10 in. ASA.

**DENSITY:** 1025.

**FRESH WATER:** At Northland Harbour Board wharves by hose 20 tons per hour at $1.00 per 1,000 gallons. Refinery jetties limited and arranged by refinery.

**FUEL:** Available from berths (viscosities 3,500 secs. red 1. 1,500 secs. red 1 and MDO).

**OPENING/CLOSING HATCHES:** Usually carried out by stevedores.

**CUSTOMS ALLOWANCE:** Tobacco: 200 cigarettes or ½ lb. tobacco or 50 cigars permitted each crew member. Wine/spirit: one opened bottle wine/spirits for each crew member.

**IDENTIFICATION CARDS:** Refinery passes are required when berthed at the Refinery wharves. Passes are brought on board by Agent.

**CONSULS:** None.

**REPAIRS:** Most repairs undertaken.

**DRY DOCKS:** None. One slipway capable of receiving vessels up to 1,500 tons dwt.

**REPATRIATION:** Facilities exist.

**TIME:** GMT plus 12 hours. No change.

**HOLIDAYS:** As for Wellington except Waitangi Day (February 6th), instead of Anniversary Day and Waterside Workers' Picnic Day (second Statutory in December).

**POLICE/AMBULANCE/FIRE:** Telephone 111 for emergency, and ask for service required.

**TELEPHONES:** Available at wharves.

**SHORE LEAVE:** Allowed.

**FIRE PRECAUTIONS:** Fire fighting tug on duty 24 hours a day. Tankers to have fire wires fore and aft.

**SURVEYORS:** Lloyds – New Zealand Government, Marine Division of the Ministry of Transport.

**AIRPORT:** 8 miles from Port Whangarei; regular daily internal flights.

**SERVICES:** Tank cleaning, compass adjuster, radio and radar repairs.

**REGULATIONS:** Issued by Pilot on arrival.

**DELAYS:** Tidal delays and berth vacancies.

**AUTHORITY:** Northland Harbour Board, PO Box 141 and 269, Whangarei.

# Nicaragua

## CORINTO: 12.28 N. 87.11 W. (See Plan)

**ARRIVED SHIP:** Vessels are considered as arrived only having negotiated the entrance channel and are safely inside proper harbour; vessels at the pilot station are not considere having arrived.

**DOCUMENTS:**

| | | | | |
|---|---|---|---|---|
| Clearance | 1 visaed | | | |
| Crew List | 3 | ,, | 6 unvisaed | |
| Store List | 3 | ,, | 6 | ,, |
| Passenger List | 3 | ,, | 6 | ,, |
| Cargo Manifest | 3 | ,, | 17 | ,, |
| Ballast Manifest | 2 | ,, | 6 | ,, |
| Health Declaration | — | — | 1 | ,, |
| Passenger in Transit | — | — | 8 | ,, |

| Bills of Ladings | | | 1 complete set | |
| Voyage Memorandum | — | — | 9 | ,, sets |
| No Passenger List | — | — | 9 | ,, ,, |
| Cargo Tally Books | | | 18 books | |

Note: Documents must be legalised at the last port of call b proceeding to Corinto.

**PILOTAGE:** The Port Authority must receive in writing Agents advice regarding vessels ETA 72 hours prior to ve arrival and a confirmation 12 hours. There is no VHF apparatus i therefore all advice must be sent through Agents by cabl Balboa or Limon station. Pilotage is compulsory on all vesse ceeding 500 gross registered tons or exceeding 7 ft. draft. boards 1 mile off Isla de El Cardon.

**ANCHORAGE:** The anchorage inside the harbour can accon date 6–10 vessels, depending on size and draft.

**RESTRICTIONS:** The port is open 24 hrs.; however, en restricted in accordance with tide and vessels draft. If draft ex 24 ft. entry has to be with the high tide. Due allowance shou made for heavy swell if necessary. Speed limit 8 knots in Co Bay, and 5 knots in the vicinity of berths or other craft.

**MAX. SIZE:** Maximum permissible length 650 ft., 80 ft. beam. controlled by depth of water in approach channel and state of up to maximum of 29 ft.

The maximum permissible draft at low water through the ch is 20·6 ft.

**HEALTH:** After entry and vessel has berthed or anchored, long blasts are given requesting free pratique; after these blas Authorities board the vessel together with the Agent's repres tive and proceed with distribution of the documentation. In the of any suspected disease on board, the action to be taken w given by the Representative of the Health Department. There automatic pratique even though vessel is proceeding from an port in the same country.

Although the port is open 24 hours, vessels arriving after hrs. are not boarded by the authorities until 0600 the following unless the vessel will berth and commence operations immed This being the case, free pratique is granted regardless of the This arrangement is restricted to 0100 hrs. as gangs are not al to commence operations after that hour.

**RADIO:** ETA cables are generally routed via NBA Balboa S or TIM Limon Station, and received through Tropical Ra Telegraph or All America Cable.

**TUGS:** Compulsory for berthing and unberthing. The tug vessel just after vessel passes Buoy No. 7. Tug's lines are ge used: however, at times ship's lines are used. There is no char use of tug's lines. One tug of 1,100 h.p. and one launch of 1 available.

**BERTHING:** There is no preferential berthing, and berth indicated by the Port Authority. Vessels are attended to in the ner "first come first served".

There are three piers available:

1 A concrete pier, length 370 m., depth 35 ft. at low water.
2 A wooden pier, length 160 m., depth 24½ ft. at low water.
3 A special berth with conveyor-belt system for loading of boxes such as bananas, frozen meat, as well as the hand inbound and outbound cargoes such as fertiliser and cott meal. Bananas can be loaded into four hatches at one tim rate of 4,500 boxes per hatch per hour. Depth alongside water is 35 ft.

**STEVEDORES:** Gangs work in shifts of 8 hours, commen 0700 and ceasing at 2330 hrs. Meal hours are 1200–1300 and 180 Work from 1900 Saturday to 0600 Monday, and on holidays double time.

**MEDICAL:** There are several doctors in the port and most Agents have a particular doctor to their service. Hospital fa are also available. No particular inoculation is required.

**TANKERS:** The only tankers which frequent this port are th Esso Standard, Parcel Tankers and the Athel Line. There i one tanker berth and each of the above-mentioned companie their particular load/discharge lines.

The Esso tankers only discharge oils, the Athel tankers lo molasses, the Parcel tankers discharge solvents and occas others load out cotton seed oil.

There are 9 lines belonging to the consignees ranging 4 in. to 12 in.

*Exports:* Molasses is loaded at 180 tons per hour with a 12 and peanut oil with portable pumps at a rate of 60 tons/ho pump.

*Imports*: Discharge rates.

| | | |
|---|---|---|
| Aviation gasoline | 300 t.p.h. | 8 in. pipe |
| Solvents | 100 ,, | 6 ,, ,, |
| Diesel | 100 ,, | 6 ,, ,, |
| Asphalt | 100 ,, | 6 ,, ,, |
| Tallow | 80 ,, | 4 ,, ,, |

Pumping is done by the vessel in each case.

**DENSITY**: 1025.

**FRESH WATER**: Fresh water is available and is supplied from connections on the pier, by gravity at a rate of approximately 10 tons per hour.

**FUEL**: The only fuel available at this port is diesel.

**DEVELOPMENTS**: Projected installation of bulk handling plant, additional warehouses and extension of pier 1,500 ft. with 2 transit sheds, new administration building, stevedores shed, equipment shed and repair shops; redesigning of range lights and buoys and increasing amount of same, also area for Industrial Park.

**GANGWAY/DECK WATCHMEN**: After entering, 2 Custom Officers are placed on board all vessels and their meals must be furnished on board.

**OPENING/CLOSING HATCHES**: If vessel is equipped with regular hatch boards or pontoons, stevedores open and close hatches as well as swing out booms. However, if covers are of the McGregor type or mechanical, the crew has to do the job.

**CERTIFICATES**: Ship's Registry Certificate is required from ships making their first call at the port.

**CUSTOMS ALLOWANCE**: There is no limit on tobacco allowance to be held out of Bond but crew members are only permitted to take two packages of 20 cigarettes ashore. Crew not permitted to take any alcohol ashore. Anyone trying to do so will be subjected to heavy fines.

**IDENTIFICATION CARDS**: All crew members except Officers are requested to submit to the gangway watchman, proper identification with a photograph such as seaman book or passport.

**CONSULS**:

Colombia
Costa Rica
Denmark
Ecuador
El Salvador
France
Guatemala
Honduras
Mexico
Panama
Sweden
Venezuela

**REPAIRS**: There are no repair shops available only for minor welding jobs.

**AIRPORT**: The airport is approximately 160 kilometres from the port and served by regular airlines with daily flights.

**REPATRIATION**: Can be effected.

**TIME**: Local time is Central Standard Time, GMT minus 6 hours. There are no alterations during the year.

**HOLIDAYS**: January 1st; Holy Thursday; Good Friday; 1st & 3rd May; 14th & 15th September; October 12th; December 25th. As a rule, no labour is available on these holidays. However, it is known with the exception of Labour Day and Good Friday, work can be arranged if said arrangements are made in due time prior to arrival of the vessel.

**POLICE/AMBULANCE/FIRE**: Police 269; Ambulance 313; Fire 421.

**SHORE LEAVE**: Crew members are allowed shore leave.

**AUTHORITY**: Autoridad Portuaria de Corinto, Apartado Postal No. 11, Corinto, Nicaragua, C.A. Tel. 211/215. Telex 27. Cable Address: Portuaria.

## PUERTO CABEZAS: 14.01 N. 83.23 W.

**DOCUMENTS**:

1 Clearance from Last Port.
10 Voyage Memorandums.
11 Crew Lists.
10 Passenger Lists.
10 Stores Lists.
1 Bill of Health.
12 Ballast Manifests.
13 Manifests of Cargo.
4 Bills of Lading.
10 sets Tally Books.

**PILOTAGE**: ETA required 24 hours before arrival at the port. The Pilot uses a boat with an outboard motor and boards about one mile off the port. Agent advises the Pilot the date of arrival, he goes out when he sees vessel.

**ANCHORAGE**: Vessels can anchor about half mile South of the wharf. Depths in anchorage 20–22 ft.

**MAX. SIZE**: Maximum length, 400 ft. Draft 19 ft. 6 in. Difference between high and low tide is 18 in.

**HEALTH**: The inspection takes place on arrival. It is not necessary when the vessel comes from some other port in Nicaragua.

**RADIO**: The Nipco has a radiophone for personal use, but they make contacts with vessels. The frequency is 2738. It is better to use or send radiogram via Radio Tropical in Managua.

**TUGS**: There is no tug service.

**BERTHING**: There is wreck in front of the wharf. The location is: 14° 0′ 57″ North, 82° 22′ 4″ West, 1,200 yd. from wharf end.

**STEVEDORES**: The Agent advises stevedores arrival of vessel. They discharge 8 tons of general cargo each hatch (one gang) per hour.

**MEDICAL**: Not necessary to advise the need of a doctor, only for emergencies. One hospital and two other doctors, apart from the official doctor of the port.

**TANKERS**: There are two pipes of 6 in. diameter on the wharf. There is no special berth for oil tankers.

**DENSITY**: 1025.

**FRESH WATER**: The fresh water is carried to the wharf by truck or from one pipe on the wharf. The boiler water gets to the vessel by the pipe on the wharf.

**FUEL**: Gasoline, diesel oil and lubricants are supplied by Texaco. Arrangements are made at the arrival of the vessel.

**DEVELOPMENTS**: A hydrographic survey has been completed in the port zone and surrounding area to establish the best place for future port facilities or whether expansion should be made to the existing port. This survey is being effected in view of projected installation of paper and pulp industry and forthcoming development of agricultural and mineral products which could be exported through the port.

The Port Authority is taking the necessary steps to get technical and financial help to make a general survey of the zone in order to find an adequate and/or protected site to place the new port installations. Port plans are combined with the paper and pulp industry, which is supposed to be installed in the next six years.

**WATCHMEN**: It is not obligatory. It is customary to have two custom guards in the gangway.

**OPENING/CLOSING HATCHES**: The opening and closing of hatches is done together by the crew of the vessel and the stevedores.

**CUSTOMS ALLOWANCES**: Each of the crew can take 2 packs of cigarettes with the seal broken, and one bottle of wine or liquor opened.

**IDENTIFICATION CARDS**: Not needed, just passport or seaman's book.

**CONSULS**: Only consul of Panama available locally.

**REPAIRS**: Minor repairs only can be effected.

**REPATRIATION**: It is possible and only a passport needed. Necessary to go to the capital by air, thence to any part of the world.

**AIRPORT**: Distance of airport from wharf is about 2 kilometres. Service every day to the capital except Sundays and holidays. The name of the only airline is Lineas Aereas de Nicaragua (Lanica).

**TIME**: Local time is Central Standard Time, GMT minus 6 hours.

**HOLIDAYS**: Holidays are 1st January; Holy Thursday; Good Friday; 1st May; 14th July; 14th and 15th of September; 12th October and the 25th December.

**SHORE LEAVES**: The crew is allowed to go ashore after the vessel is received by the Authorities.

**DELAYS**: Delays in berthing can be expected from bad weather.

**AUTHORITY**: Autoridad Portuaria de Puerto Cabezas.

## PUERTO SOMOZA: 12.12 N. 86.46 W.

**DOCUMENTS**:

Clearance from previous Port.
6 copies Voyage Memorandum.
6 Stores Lists.
6 Passenger Lists or negative declaration, 3 to be visaed.
6 Crew Lists.
8 Cargo Manifests, 3 to be visaed.
8 Tally books.
6 Lists of Mail, Explosives or Drugs if carried.

Nine crew lists and six store lists should be despatched by the Nicaragua Consul at loading port if possible, otherwise they are forwarded by Agents from the Panama Canal.

**PILOTAGE**: Optional by local Pilots. Leading lights are installed, at the entrance to the port, prominently sited on a hill. Several buoys indicate exact anchorage positions.

*Tankers:* A Pilot is provided by the oil company in agreement with the Panama Canal Authority. Pilot boards about half a mile West of the sea berth.

**ANCHORAGE**: About one and three quarter miles off port entrance, depth is 30 ft. at low water, and about 45 ft. at high water.

**RESTRICTIONS**: Port is open day and night without exception.

**MAX SIZE**: Tankers at Sea Line Terminal up to 850 ft. length and 41 ft. draft.

**HEALTH**: Port Health inspector boards all vessels on arrival.

**RADIO**: There is a radiotelephone installation at the Customs office. No VHF.

**TUGS**: Not available for manoeuvring vessels. Five small tugs employed for shifting lighters.

**BERTHING**: No quays for ocean-going vessels. Vessels work cargo to lighters at the anchorage.

**STEVEDORES**: Port has four gangs of forty men each for boarding vessels.

**TANKERS**: *Sealine Terminal.* The sea berth is situated in approximate location 12° 10′ N. 86° 49′ W., about two miles off shore in a depth of 47 ft. There are five mooring buoys, two at the bows and three at the stern of the vessel. The first lines to the buoys should each consist of two good ropes lashed end to end to effect the length required. Five lines are normally used at each end of the vessel.

Strong winds may delay berthing or cause vessel to vacate the berth once moored. Sailing at night is not recommended for safety reasons. The discharge hose is lifted on the port side by ship's crew.

**MEDICAL**: Doctor available in case of emergency. Nearest hospital at Leon, 35 km. away.

**FRESH WATER**: Not available for supply to ships.

**FUEL**: Not available for supply to ships.

**OPENING/CLOSING HATCHES**: Normally performed by stevedores. Mechanically operated hatches are opened by ship's crew.

**CUSTOMS ALLOWANCES:** Each crewman allowed two packets of cigarettes. No wine/spirits allowed to be taken ashore.
**IDENTIFICATION CARDS:** Seaman's Book required for going ashore.
**CONSULS:** Nearest at Leon, 35 km. distant.
**REPAIRS:** Small items for repair can be sent to Leon, 35 km. away.
**REPATRIATION:** No facilities for crew changes. If crew member left behind, Agents are responsible for his repatriation at vessel's expense.
**AIRPORT:** Las Mercedes international airport at Managua, 75 km. away.
**TIME:** Central standard time, GMT minus 6 hours. No alterations.
**HOLIDAYS:** All holidays can be worked.
**POLICE/FIRE/AMBULANCE:** Police available locally. Nearest fire and ambulance stations are at Leon, 35 km. away.
**SHIPMASTER'S REPORT:** Port authorities board the vessel at 0600 in the morning, either at outer anchorage or at discharging anchorage. There is no night work performed unless the vessel reaches discharging anchorage with last daylight.

In general, stevedores are well acquainted with handling cars. Vessels carrying cars for Pto. Somoza should avoid loading No. 1 hatch for this port. As there is a permanent swell at anchorage, barges cannot lie safely under No. 1 hatch.

There is a Pilot available, on request, who also acts as stevedore-foreman.
**AUTHORITY:** Administracion de Aduana. Puerto Somoza.

# Nigeria

## BONNY: 04.26 N. 07.09 E. (Inshore Terminal) (See 04.11 N. 07.14 E. (Offshore Terminal) Plan)

**OPERATORS:** The Shell-B.P. Development Company of Nigeria Ltd.
**DOCUMENTS:**
7 Crew Lists.
3 Vaccination Lists.
3 Maritime Declaration of Health.
8 List of Last Port of Call (6 weeks).
6 Lists of Birds & Animals.
7 Passenger Lists.
1 Stores List.
1 Personal Effects List.
2 Arms & Ammunition Lists.
1 Clearance Last Port.
*Agent:* Requires NPA lights and buoy dues form.
**PILOTAGE:** *Inshore berths:* Pilotage is compulsory. Pilots board off Fairway Buoy; incoming ships must *not* enter Bonny Channel without a pilot on board.

*Offshore berths (SBMs):* Berthing Master will board vessel on arrival or at anchorage, and remains on board throughout and acts as loading master. On arrival at anchorage contact berthing master on VHF Channel 14 call sign "Ocean berthing master".

*N.B.* also contact Bonny Terminal on Channel 14 on arrival at Offshore anchorage to ensure vessels arrival etc. is recorded.
**ANCHORAGES:** *Inner Berths:* West of Fairway Buoy in 8–9 fathoms.

*Outer Berths:* 3 miles South of manifold platform in position 4° 11.2′ N. 7° 14.2′ E.

Vessels must not proceed inshore of this position without a Pilot. When at anchor listening watch must be kept on VHF Channel 14 and this Channel must not be used for intership communication.
**RESTRICTIONS:** The maximum draft to which a vessel can load at Bonny is governed by three factors viz..
1. Datum Depth in Bonny Channel.
2. Height of the tide.
3. The underkeel clearance allowed.

Datum depth of the Bonny Channel is dependent on the amount of dredging; at the present time Datum depth is 38 ft. 6 in.

Tide is variable but the relevant factor is the height of the tide at the time the vessel will transit the Channel. The underkeel clearance allowed is dependent on the time of the year and is related to the height of the swell expected to be encountered in the Bonny Channel.

The present allowances are as follows.

| | | ft. | ins. |
|---|---|---|---|
| 1/1–15/2 | = | 2 | 6 |
| 16/2–15/3 | = | 2 | 9 |
| 16/3–31/3 | = | 3 | 0 |
| 1/4–30/4 | = | 3 | 3 |
| 1/5–15/5 | = | 3 | 6 |
| 16/5–31/5 | = | 3 | 9 |
| 1/6–31/8 | = | 4 | 0 |
| 1/9–15/9 | = | 3 | 9 |
| 16/9–30/9 | = | 3 | 6 |
| 1/10–15/12 | = | 3 | 3 |
| 16/10–31/10 | = | 3 | 0 |
| 1/11–15/12 | = | 2 | 9 |
| 16/12–31/12 | = | 2 | 6 |

Thus it can be seen that the maximum draft at any particular time s equal to:

Datum Depth plus Height of Tide minus Underkeel Clearance Allowance.

A typical calculation would be as follows:

| | | ft. | in. |
|---|---|---|---|
| Datum Depth | = | 38 | 6 |
| Height of Tide | = | +7 | 0 |
| Underkeel | | 45 | 6 |
| Clearance Allowance | | 3 | 9 |
| Maximum Draft | = | 41 | 9 |

**MAX. SIZE:** *Inshore Terminal:* Minimum size approximately 1 tonnes or 161 m. (530 ft.). Maximum length 269 m. (850 ft.). Maxi beam no restriction. Maximum draft, see "Restrictions".

*Offshore Terminal:* Minimum size 45,000 tonnes sdwt. Maxi size 300,000 tonnes sdwt. Maximum length no restriction. Maxi beam no restriction. Maximum Draft 22·8 m. (75 ft.).
**HEALTH:** Q-flag to be shown on arrival, except if from an Nigerian port, yellow fever and small-pox inoculations compul In case of suspected disease on board, advance notice to A advisable. Valid Yellow Fever and Smallpox Certificates t produced for all crew members. Also Deratisation Exem Certificate.
**RADIO:** Original ETA message should be sent via Lagos R to the Lagos Agents at least 72 hours before arrival. 48 hours be arrival at the Fairway Buoy a further ETA message should be to Lagos Agents. When anchored at the Fairway Buoy co Bonny Terminal on Channel 14, passing date and time of a (same for Harbour Master Bonny), keeping watch on VHF Chan 14 and 16. Failure to comply with the requirements for ETA mess may result in delays in berthing the ship.
**BERTHING:** *Inshore Terminal:* There are 4 berths (CBMs) de nated A, B, C and D, from upstream. A, C and D consistin 5 buoys (1 astern, 1 on each quarter, 1 ahead and 1 on the ins bow). A, C, D are flood tide berths. B is ebb and flood tide b consisting of 6 buoys, the sixth buoy is on the offshore bo quarter depending on which direction the ship is berthed.

Tankers berth on the flood tide (or ebb at berth B) using the shore ships anchor as an additional mooring point. Ships moo means of 40 mm. wires (provided by the Terminal) one 40 mm. is picked up from each of the buoys and ship's ropes are normally used. Mooring is carried out by ship's crew; and care be taken to ensure that the mooring wires are laid out in a seama manner to prevent runs and kinks forming in the wires. Moo wires must not be kept on tension winches, but stoppered means of Carpenter's stoppers provided by the Terminal, and "turned up" on the bitts. Two men from the Terminal are pu board the vessel to assist the ship's crews position and set up Carpenter's stoppers.

Vessels must be equipped with hose-handling derricks w SWL lifting capacity of not less than 5 tonnes.

Vessels must arrive with clean ballast.

Load-on-top system operates at Bonny, but slops cannot be cepted ashore. Maximum loading rate: 5,000 t.p.h. (1/1/74).

Grades handled: both light and medium crudes.

*Offshore Terminal:* Two SBMs fitted with two 16-inch do nylon mooring lines and one hose string terminating in two 16- diameter end hoses.

No. 1 SBM is S.S.W. of the Platform. No. 2 SBM is S.S.E. o Platform and they are designated Bonny West and Bonny respectively.

Berthing effected under guidance of berthing master and assistant who both remain on board throughout loading opera Accommodation for both to be provided. Whilst berthed a moo rope must be ready on the poop deck so that the mooring la (line boat) may, in the event of the vessel riding up on the S make fast and tow to re-align vessel.

Vessels must be equipped with hose handling derricks w capacity of not less than 7 tonnes.

Vessels must arrive with clean ballast.

Load-on-top system operates at Bonny but slops canno accepted ashore. Maximum loading rate 8,000 t.p.h. (1/1/74).

Grades handled Bonny light crude only (1/1/74), the maxi lifting is restricted to 150,000 tons as at 1/1/74.
**HOSES:** *Inshore Terminal:* Vessels should endeavour to pro two 12-inch diameter 150 ASA connections on the port side o vessel when berthing at A, C, D, berths. On B berth two 16 150 ASA connections should be provided on the port or star sides of the vessel – dependent on whether the vessel is ber on ebb or flood tides. Vessel's hose handling derrick to be ri and plumbed overside. Hoses will be connected by shore la but winchmen must be supplied to operate the ship's lifting The derrick runner must be equipped with a suitable hook estimated weight of each hose string at berths A, C and D, lifting with the ship in light condition is between 3 and 5 ton Ships fitted with only 5 tonne derricks should exercise care lifting to avoid shock loads. On "B" the estimated lifting wei between 5 and 7 tons.

*Weight of Hoses:* Indication only of approximate weights of strings in tonnes (including fittings, floats, and pick-up b Assumed total lift of 7·6 metres (25 ft.) above deck level and w in light draft condition with hoses full of crude oil SG 0850.

| | *16 inch I.D. Hoses* | *12 inch I.D. Hoses* |
|---|---|---|
| dwt | tonnes | tonnes |
| 100,000 | 8·3 | 4·9 |
| 70,000 | 7·5 | 4·5 |
| 50,000 | 7·3 | 4·4 |
| 35,000 | 7·1 | 4·2 |
| 18,000 | 6·3 | 3·7 |

*Offshore Terminal:* Port or starboard side amidships (dependent on which SBM is used). Vessels should endeavour to present two 16-inch standard 150 ASA connections on arrival. Ships crew are required to connect and disconnect the hoses under the advice of the berthing master and/or his assistant. A derrick SWL at least 7 tonnes must be rigged ready on both port and starboard sides and plumbed clear of this side. Derrick runner must be equipped with suitable hook.

*Weight of Hoses:* Indication only of approximate weights 16 inch I.D. hose strings in tonnes (including fittings, floats, and pick-up buoys with all hoses full of crude oil SG 850. Assumed lift is 7·6 metres (25 ft.) above deck level, with vessel in light draft condition.

| dwt | tonnes |
|---|---|
| 200,000 | 8·9 |
| 100,000 | 8·1 |
| 70,000 | 7·3 |
| 50,000 | 7·0 |
| 35,000 | 6·9 |

**SHORE LINE SYSTEM:** *Inshore Terminal:* Crude oil is loaded at berths A, C, D via 32 in. submarine lines and 2 strings of flexible hoses each consisting of 3 lengths of 16 in. hose and 3 lengths of 12 in. hose at the ship end, and via a 28 in. submarine line and 2 strings of 16 in. flexible hose at berth B. Reducers are made available by Terminal on request.

*Offshore Terminal:* Vessels load through SBM from shore through a 48 in. diameter line, thence through a 24 in. diameter floating hose which is terminated by a "Y" piece and two 16 in. diameter hose tails which connect to the ships manifold. Loading rates up to 8,000 tph may be expected. The 48 in. submarine loading line from the Terminal is some 20 miles in length, therefore great care must be exercised during loading when ships valves are manipulated to avoid pressure surges. Pressure recorders are normally fitted at the spool piece between ships manifold and tail end of the hose string to monitor pressure changes generated on board the vessel.

**MEDICAL:** No hospital at Bonny, nearest at Port Harcourt.

**DENSITY:** *Inshore Terminal:* 1015 at Low Water particularly during rainy season.

*Offshore Terminal:* Salt.

**FRESH WATER:** Available by barge at rate of 15 tons per hour. 48 hours advance notice required as barge comes from Port Harcourt.

**FUEL:** Available only by barge from Port Harcourt.

**CUSTOMS ALLOWANCES:** 200 cigarettes per man per 7 days. 1 wine or 1 btl spirit per officer per 7 days.

**IDENTIFICATION CARDS:** Crew to carry passport or seaman's book whilst ashore.

**CONSULS:** Nil.

**REPAIRS:** Nil.

**REPATRIATION:** Possible via Port Harcourt and Lagos.

**AIRPORT:** 28 miles by river, to Port Harcourt, then 7 miles by road, twice daily to Lagos, no international flights.

**TIME:** GMT plus 1, no change.

**POLICE/AMBULANCE/FIRE:** Contact Via Harbour Master or Shell/BP, VHF 14 or 16.

**SHORE LEAVE:** Not permitted.

**GENERAL:** *Delays:* Inshore berths: None.

Offshore berths: Worst weather period June–September when heavy swell may be encountered.

*Immobilisation of engines:* Not permitted at the berth. Not permitted at SBMs. Not advised at sea anchorage due to indifferent holding ground and the existence of obstructions and foul ground in the vicinity.

*Loading:* Ships are required to load cargo as rapidly as possible by day and night in accordance with the terms of their charter parties. This means that ships are expected to load as fast as Shell-BP can supply or they can safely receive. The question of how fast a ship can load is the responsibility of the Master having regard to his Owner's instructions, the charter party and the experience of ship's personnel. However, as further guidance and in absence of any instructions to the contrary, ships are expected and nominations of vessels are accepted by Shell-BP on the understanding that ships will be able to accept a bulk loading rate per hour of not less than ten per cent of the summer deadweight of the vessel.

At offshore berth the Berthing Master acts as Loading Master during loading operations and is provided with walkie-talkie radios to ensure adequate ship/shore communication.

Loading Masters visit each vessel, and Masters are requested to co-operate in the completion of the Shell-BP Tanker Port Performance Time Sheet by ship and shore personnel at all terminals. Only crude oil is handled at Shell-BP terminals, loading temperatures and specific gravities of the two grades of crude, Bonny Light and Bonny Medium are reasonably constant and are approximately:

| | |
|---|---|
| Bonny Light | 0.823 at loading temperature |
| Bonny Medium | 0.890 at loading temperature |

*Early Departure Procedure:* A modified early departure procedure is in operation at Bonny Offshore Terminal. Masters are requested to sign all documents in blank, retaining in their possession Masters' consignee copies. On completion of loading, the berthing master will supply masters with a copy of the figures required for the completion of the retained documents. Masters are requested to complete these before the departure of the vessel. Customs and agency representatives will normally board vessels during the daylight hours. Depending on other commitments of the offshore launch, it may be necessary to request masters to provide temporary accommodation for these officials.

**AUTHORITY:** Nigerian Ports Authority.

**AGENT:** Alraine (Nigeria) Ltd., 26 Creek Road Apapa. POB 265, Apapa. Tel. 47770. Telex 21 244. Cables: "Freight Lagos".

## BURUTU (incl. Warri): 05.21 N. 05.31 E.

**DOCUMENTS:**
7 Ports of Call Lists.
5 Crew Lists.
5 Kroo boy Lists.
2 Animal Lists.
2 Arms and Ammunition Lists.
9 Manifests.
2 Summaries.
1 extra Manifest for transshipment cargo.
3 Stores Lists.
2 Crew Declarations.
2 Inward Reports.
2 NPA Master's Declaration.
2 NPA ship's particulars.
1 Customs Clearance.
1 Declaration of Health.
1 Vaccination List.

**PILOTAGE:** No compulsory pilotage, local pilots or rather river guides, available at Escravos. No communication is possible with these guides from Burutu.

**ANCHORAGES:** One anchorage known as "the pool", opposite Okorodudu Town; maximum draft for pool anchorage 14 ft. MLWS. Further anchorage at Forcados for vessels waiting to proceed to Burutu or Warri.

**MAX. SIZE:** Restricted only by draft. Official depth 21 ft. MLWS, governed by actual depth on Escravos bar which does vary from time to time and being dredged for increased draft. Latest information always available from Nigerian Ports Authority, Lagos.

**HEALTH:** International pratique regulations prevail. Pratique *not* necessary when coming from another port in Nigeria.

**RADIO:** Station, Port Burutu. Watch kept from 0730–1200, 1400–1700 on week-days and 0730–1200 on Saturdays on 2182 kc/s R/T and Channel 16 VHF.

**TUGS:** No tugs available.

**BERTHING:** No specific requirements to berthing. Berth number is hoisted on flagpole situated on No 4 berth. Ships berthed in order of arrival.

| Warri | | length | draft |
|---|---|---|---|
| 1 | Buoys Fore and Aft | 525 ft. | 21 ft. |
| 2 | Buoys Fore and Aft | 525 ft. | 21 ft. |
| 3 | Single Buoy | No limit | 21 ft. |
| 4 | Main Wharf | 525 ft. | 21 ft. |
| 5 | Canal Berth | 1055 ft. | 20 ft. |

**Burutu**

Two vessels normally berth alongside the wharves. The main wharf being some 750 feet in length and a smaller wharf of some 300 feet. There is plenty of water alongside these berths and the depth that a vessel can load to is controlled by the Burutu flats which is 13 feet.

**STEVEDORES:** Advice given on radio during transit Escravos–Burutu is quite adequate. Normal rates approximately 13/15 ton per hook hour.

**MEDICAL:** Fully equipped hospital under supervision of resident medical officer situated at Burutu.

**TANKERS:** Only small coastal tankers use Burutu to periodically replenish bulk tanks, which have capacity for 1,800 tons gas oil and 900 tons fuel oil, used primarily for consumption by local vessels.

**DENSITY:** Fresh water.

**FRESH WATER:** Limited amount available in wet season from shore line at rate of 4 tons per hour.

**FUEL:** No fuel available.

**FIRE PRECAUTIONS:** Small fire station situated in port area. No specific fire precautions required.

**GANGWAY/DECK WATCHMEN:** Considered advisable have gangway/deck watchmen.

**OPENING/CLOSING HATCHES:** Normally carried out by stevedores, except in ships fitted with Mcgregor hatches.

**TOBACCO/WINE ALLOWANCE:** 200 cigarettes; part bottle.

**IDENTIFICATION CARDS:** Either discharge books, or passports advisable.

**CONSULS:** No consulates at Burutu.

**REPAIRS:** Dockyard has four slipways which can accommodate most creek and river vessels up to tonnage of 600 tons. Management of dockyard in hands of qualified engineers who are able carry out afloat, hull and/or machinery surveys as required. Limited deck, hull and engine repairs can be carried out.

**REPATRIATION:** Facilities exist for individuals but not for crew changes.

**AIRPORT:** Small airstrip one and a half hours away by launch, where daily scheduled flights by small twin-engined aircraft operate to Lagos.

**TIME:** GMT plus 1.

**HOLIDAYS:** January 1/2, March 9/10, April 12/15, June 8, October 1, December 25/26. Cargo may be worked on all these holidays except Christmas Day, Good Friday and Republic Day.

**POLICE/AMBULANCE/FIRE:** No telephone numbers – all these services available in port area.

**TELEPHONES:** Facility available for connecting telephones on board.

**SHORE LEAVE:** Crew members allowed ashore.
**AUTHORITY:** Nigerian Ports Authority, Burutu.

**AGENT:** Alraine (Nigeria) Ltd., 4 Khalil Road, POB 374, Warri. Tel. Warri 341. Telex via Lagos 21.244.

## CALABAR: 04.57 N. 08.27 E.

Situated on right bank of Calabar River, 42 miles from sea.
**DOCUMENTS**, and all general information, refer to "Lagos".
**PILOTAGE:** Not compulsory, but the services of the Harbour Master can be requested for pilotage duties.
**MAX. SIZE:** The maximum recommended draft for vessels using the port of Calabar is 19 ft. 6 in., which is, at present, governed by a depth of water on Duke Town Crossing of 12 ft.
**BERTHING:**
(*a*) Pool Anchorage, 3 ocean going vessels.
(*b*) Millerio Wharf, 1 ocean going vessel.
(*c*) Cement Wharf, 1 ocean going vessel.
(*d*) Ivy Wharf, 1 coaster vessel. This wharf has been damaged seriously and is not in use at present.

*Moorings:* One mooring berth is available for main line ships Pilot Service.
**AIRPORT:** At Calabar.
**AUTHORITY:** Nigerian Ports Authority.

## ESCRAVOS: 05.30 N. 05.00 E. (See Plan)

**DOCUMENTS:** Required and brought out by Pilot:
4 Nigerian Ports Authority/Masters Declaration.
2 Customs and Excise (Form C 13).
4 Ship's Report (Gulf) } on behalf of Agent.
2 Requests for Service }

The sailing clearance will be completed after B/L figure of cargo loaded is available, and will be delivered to the ship before sailing.
**PILOTAGE:** Compulsory. Boarding area is in a position 3 miles West-north-west of the berth operation platform.
**NAVIGATION AIDS:** Berth Operations Platform is a conspicuous steel structure 85 ft. high and is approx. 1 mile from Berth No. 2, between the berth and the shore. On top of this structure is a heliport, which at night is surrounded by red lights. In the event of a power failure a green intermittent light will be shown from one corner of the seaward side of the platform.

A RACON reflector is mounted on this platform for easy identification of the Gulf Sea loading area. Radar transmission from the incoming vessel triggers the RACON Unit which responds with the Morse Code letter "G" (– – ·), followed by a solid tail. This signal is observed visually on the ship's radar screen and appears very close to the point where the radar echo of the berth operations platform itself should appear.
**ANCHORAGE:** Vessels required to anchor on arrival will anchor in position approx. 3 miles West-north-westward of the berth operations platform, i.e. in a position Lat. 05° 31′ 00″ N., Long. 04° 57′ 30″ E., or as otherwise instructed.

On approaching the terminal, VHF contact can be established with the Mooring Master on Channel 16 and the vessel will be advised of which berth has been nominated for her cargo. At the same time, the vessel will be advised where the Mooring Master will board. In cases where VHF contact is not made, the vessels will remain in the anchorage area until such time as contact is made by radio or the pilot boat. Vessels are advised to anchor only in the stated area due to the existence of submarine pipe-lines in other areas.

Anchorage is forbidden in the mooring area.
**RESTRICTIONS:** Mooring and unmooring operations will be undertaken by day and by night under normal weather conditions.

Notice of Readiness will be accepted by the Company representative on arrival providing that the ship is in all respects ready to load.
**MAX. SIZE:** The Escravos Terminal consists of two Single Buoy Mooring Berths Nos. 2 and 3 only, the conventional Sea Berth (Berth No. 1) having now been de-commissioned.

The location of the Sea Terminal Berth No. 2 (SBM) for vessels up to 100,000 dwt is off the North of the Escravos River in a position Lat. 5° 30′ 37″ N., Long. 4° 59′ 25″ E., and has a minimum depth of water of 72 ft. at LWS.

Berth No. 3 (SBM) for 350,000 dwt, vessels is situated 4·25 miles West-South-Westward of No. 2 berth in a position Lat. 5° 29′ 29″ N., Long. 4° 55′ 54″ E., and has a minimum depth of 105 ft. at LWS.
**RADIO:** Vessels bound for Escravos must advise their ETA to Gocon, Lagos, 72 hours and 24 hours before arrival – the message to contain the vessel's name, ETA, Master's name. A 24-hour watch is maintained on VHF Channel 16, in the Senior Mooring Master's Office, and ships are usually able to make contact on this Channel at a distance of 20 to 30 miles on the seaward side of the Berth Operations Platform. Channel 10 is used for internal traffic and ship berthing operations.
**MOORING:** Before arrival at the pilot boarding area, it will be necessary to ensure that the following moorings are ready for use on arrival at the berths:

Four mooring ropes – buoyant lines if possible, e.g. polypropylene, on the forecastle head.

When the vessel is within reasonable distance of the buoy, two ship's lines will be carried by the mooring launch to the floating buoy lines and secured to same, these lines will then be heaved aboard. As the buoy ropes come clear of the water it will be noted that chains are attached to them. These chains are to be secured to the bitts in such a manner that the nylon is outside of the ex length of the ship; i.e. so that the chains will absorb any cha if the buoy line crosses the bow. There are two buoy lines.

Power must be available at all times on all deck winches windlass while vessel is at the berth.

A mooring line must be available aft, secured to the bitts an sufficient length to enable a tug-boat to pick up the eye and tw it to realign the vessel if necessary. If available, a buoyant line is preferred in this position.
**CARGO:** Nigerian Light Crude – API 36° approx. Temper 85° F. (fairly steady throughout the year).
**HOSES:** Lifting, connecting, disconnecting, lowering and handling of hoses will be performed by the ship's crew, as ad by the Company representative, and where possible the Com will provide a pipe-line gang to assist the ship's crew. At all t handling of hoses will be performed by the ship's crew, as ad a deck officer must be in attendance.

Both derricks must be rigged and ready for use on arrival vessels are cautioned that the weight of each hose is at least 3 under favourable conditions. Where possible, it is requested the derrick runner is on one winch and the topping lift on ano as this will make the hose-handling operation much smoother faster. In any case, members of the ship's crew will be require operate the winch or winches.

*Berth No. 2:* Loading is through an SBM which is approx. in diameter and held in position by 4 chains secured to piles into the seabed. 1×16 in. floating hose is secured to buoy and 12 in. tailing piece attached to it with 12 bolt holes ASA 150 flan they are also fitted with Camlock connections. It is proposed another 12 in. tailing piece to this buoy at some future date.

*Berth No. 3:* Is a larger version of No. 2 and more heavily mo with 8 chains secured to piles sunk into the seabed. There is 1× floating hose with 2×12 in. tailing pieces. These are ASA fla with Camlock connections, similar to those at Berth No. 2.
**BALLAST:** *Deballasting and Loading Procedures:* Vessels proc ing to Escravos to load must arrive with sufficient clean ballas safe manoeuvring. A vessel arriving with dirty ballast will costly delays as it is not permitted to discharge dirty ballast to sea. The "Load on top" system is accepted at this port and ves are requested to arrive with the slop tank "settled out" as far possible and so avoid any chance of pollution of the Terminal wa from this particular tank.

The Nigerian Government has very strong views on pollution vessels are warned that a very careful watch is kept at all time ensure that pollution does not take place, or that if pollution sh occur it is controlled as quickly as possible.

All vessels are cautioned to keep a close watch on the flo hose (or hoses) towards the end of deballasting, as it is poss under certain conditions of weather and tide for the hose to bec trapped under the fore-foot of the vessel. Should this situation ap likely to arise vessels are requested to attempt to keep the fore submerged by transfer of water or bunkers, etc. If the hose beco foul, it must be disconnected and towed clear causing conside delay to the vessel.

During the hours of darkness it is requested that searchli from bridgewings and approved floodlights to be used to illum the surrounding waters to facilitate detection of oil and a generally in loading operations. Vessels are advised that fa to supply sufficient lighting could result in cargo operations being allowed during the hours of darkness. Such delay wou for the ship's accounts.

After the ballast tanks have been inspected and found t satisfactory, deballasting will commence on the advice of Company Representative. When all the ballast has been dischar the tanks will again be inspected and if ready for cargo a dry ce cate, if presented, will be signed by the Company representa In any case, cargo will be loaded when both ship and shore are to commence operations. In no circumstances will the vesse expected to load at a faster rate than that requested by the Ma It is the ship's responsibility to check that the requested loading is not being exceeded. The Company for their part will make e effort to maintain the requested rate and will advise of any altera of loading rate immediately; prior warning being given if circ stances permit.

*Simultaneous Deballasting and Loading:* In order to reduce the around time at this Terminal, but with close attention to sa vessels will be permitted to load cargo and discharge ba simultaneously, provided that no contamination of cargo or poll of the Terminal waters can occur. Vessels desirous of adopting method of loading can do so, but will be required to advise Company in writing, stating the that vessel accepts full responsi if this method of loading results in contamination of cargo an pollution of the Terminal waters.

Throughout the deballasting and cargo operations, a deck of must be on deck with sufficient crew members to safely handle operation. Company representatives will be on board throug to co-ordinate terminal and marine operations and will be in cons communication with the terminal by portable and/or ship's VHF Before loading commences, the amount of cargo required mus given to the Company Representative in writing and the Term will, in conjunction with the vessel, arrange to stop the flow of c at this predetermined figure.

*THERE ARE NO FACILITIES AVAILABLE TO DISCHARGE EXC CARGO SHOULD THE VESSEL OVERLOAD.*

The Company Representative will advise on the detailed proce for shutting down and disconnecting, but briefly, after car completed and oil has ceased to flow, loading valves on the s and Berth Operation Platform (BOP) will be closed. Then and not before, the vessel's manifold valves may be closed.

Do not close ship's valves against incoming oil as such procedure creates excessive pressure which may damage hoses, terminal facilities, or ship's piping.

Figures taken after completion will be passed to the shore by VHF and a ship/shore difference obtained. On request, full sets of cargo papers will be prepared and delivered to the Master as speedily as possible. However the briefer form of documentation is used at this terminal, and the remainder of the documents will be forwarded by airmail. At the same time the Company will arrange clearance for the vessel.

Loading signal to be displayed is the International Code flag "B" from a conspicuous halyard during the hours of daylight. During the hours of darkness a red light visible all around the horizon at a distance of at least one mile is to be exhibited.

**REPAIRS:** No facilities of any kind are available at this port.

Under no circumstances are engine repairs or the immobilisation of main engines permitted within the port limits.

**REPATRIATION:** Not permitted except in grave emergency and then only if the person concerned holds all the necessary valid certificates and documents, e.g. valid Smallpox, Cholera and Yellow Fever Certificates.

**WEATHER AND CURRENTS:** Wind and swell are mostly from a South-westerly direction. The weather is generally good from November to May, but is unfavourable during the wet season, i.e. May to November. For approximately 75% of the year the current sets in a North-north-westerly direction and for the remainder of the year it is reversed, i.e. South-south-easterly. The strength of the current varies from ½ to 1½ knots, and the currents frequently reverse direction very quickly causing the vessel to yaw (swing) heavily at the berth.

**FRESH WATER:** Not available.

**FUEL:** Not available.

**MEDICAL:** Not available except in an emergency.

**STORES:** Stores are not available at this Terminal and urgent spares/equipment forwarded by air can take up to three (3) weeks to clear formalities. In view of this it is essential that Gulf be advised of the airway bill number at the earliest opportunity to avoid further delays.

**NATIONAL FLAG:** Available from the company.

**GENERAL:** In view of the exposed location of the berths, the Mooring Master and pipe-line gang will have to remain on board throughout the vessel's stay at the berth and, therefore, it will be necessary for the vessel to arrange food and accommodation for this period. A pipe-line gang will usually consist of four men, but this number may be varied at the discretion of the Company.

It is assumed that the Mooring Master will be accommodated in the Pilot Room; but where such a room does not exist on board, then accommodation equivalent to a minimum standard required for a Senior Officer is to be provided. In the case of meals, due allowance and provision is to be made for the fact that irregular hours of work by day and night may be involved.

**TIME:** Local time is GMT plus one hour throughout the year.

**SHORE LEAVE:** In view of the isolated positions of the buoy moorings (approx. 15 and 19 miles from the shore) Masters are strongly advised not to grant shore leave. The weather and swell conditions could result in persons being injured either embarking or disembarking from the vessel, and in addition the boat journey will take approx. 2–2½ hours. Should the weather deteriorate, it could mean delay to the vessel as outward clearance would not be granted until all the crew were on board the vessel. As the terminal does not own any suitable boats, it would be necessary for the vessel to charter one for shore leave purposes.

In view of the foregoing, the terminal does not recommend shore leave being granted.

**AUTHORITY:** Gulf Oil Company (Nigeria) Limited, Private Mail Bag 2469, Lagos, Nigeria. Cables: Gocon – Lagos.

## FORCADOS (Offshore Terminal): 05.10 N. 05.10 E.

**DOCUMENTS:** **(See Plan)**

*Port Health:*

4 copies Crew List.
3 copies Vaccination List.
3 copies Maritime Declaration of Health.
5 copies List of Last Ports of Call (6 weeks).
4 copies List of Animals and Birds.
4 copies Passenger List.

*Customs:*

1 copy Crew List.
1 copy List of Last Ports of Call (6 weeks).
2 copies List of Animals and Birds.
1 copy of Passenger List.
1 copy Stores List.
1 copy Personal Effects List.
2 copies Arms and Ammunition List.
1 copy Clearance Last Port.

*Agent*

2 copies Crew List.
2 copies List of Last Ports of Call (6 weeks).
2 copies Passenger List.

Vaccination booklets for all crew members to be produced.

Deratisation Exemption Certificate to be produced.

**APPROACHES:** An efficient sounding machine and a high definition radar will assist in making the terminal for the first time. A heavy cluster of radar echoes from the Escravos area may be recorded on passing the 100-fathom line. On making the 20-fathom line, it is reported that the coastline from North Point to Moore Point and from South Point to Ajamabri shows on the radar screen with good chart comparison.

Once the vessel's position is ascertained and the course for Forcados adopted, the first and most obvious sighting, at night, will be that of the control tower, which is marked with numerous fixed lights at several levels. The control tower, which also serves as a helicopter platform, is in close proximity to the two SBM's.

**PILOTAGE:** Berthing master will board vessel on arrival or at anchorage, and remains on board throughout. Contact berthing master on VHF Channel 14. Call sign "Forcados Berthing Master". *N.B.:* Also contact "Forcados Terminal" on Channel 14 immediately on anchoring to ensure that vessels arrival is recorded and that berthing turn will be in correct sequence.

**ANCHORAGE:** 3 miles West of or 2 miles N.W. of Production Platform in position 5° 10′ 17″ N. 5° 10′ 42″ E.

Vessels must not proceed inshore from these positions without a Pilot. When at anchor a listening watch is to be maintained on Channel 14 and this Channel must not be used for ship-to-ship exchanges.

*Note:* A 14-mile 48 in. pipe-line extends from the coast at South Point near Forcados to the manifold Platform and hence to the SBMs. Vessels are warned not to anchor in the vicinity of the pipeline.

**RESTRICTIONS:** Vessels berth at any state of tide, night or day.

**MAX. SIZE:** Min. size 45,000 tonnes. Max. size 254,000 tonnes. No restriction on length and beam. Max. draft 65 ft.

**PRATIQUE:** Health and Customs Officers board at a convenient hour and come from Forcados, 20 miles distant from the buoys. Normally travel by high-speed launch, but may occasionally use helicopter.

**RADIO:** ETA to be given via Lagos Radio, 72 hours before arrival and re-confirm 48 hours before vessels ETA at the terminal anchorage.

**TUGS:** No tugs required and none available.

**BERTHING:** Effected under guidance of Berthing Master and/or local assistant who both remain on board throughout loading operations. Accommodation for both to be provided. Whilst berthed a mooring rope must be ready on the poop deck so that the mooring launch (line boat) may, in the event of the vessel riding up on the SBM, make fast and tow to realign vessel.

There are two SBMs each fitted with two 15 in. nylon moorings and one hose string 840 ft. long with 2×16 in. end hoses. No. 1 SBM is South of platform and No. 2 is West.

Position of hose connections: Amidships ports or starboard side depending on seasonal conditions. Vessels should endeavour to present 2×16 in. (400 mm.) (150 ASA) connections on arrival. Ship's crew are required to connect and disconnect the hoses under the advice of the Berthing Master and/or his assistant. A derrick, SWL at least 7 tonnes, must be rigged ready on both sides and plumbed clear of ship's side. Derrick runner must be equipped with suitable hook.

*Weight of Hoses:* Indication only of approximate weights 16 in. I.D. hose strings in tonnes (including fittings, floats, and pick-up buoys) with all hoses full of crude oil SG 850. Assumed lift is 7·6 m. (25 ft.) above deck level, with vessel in light draft condition.

| dwt | tonnes |
|---|---|
| 200,000 | 8·9 |
| 100,000 | 8·1 |
| 70,000 | 7·3 |
| 50,000 | 7·0 |
| 35,000 | 6·9 |

*Loading:* Load-on-top system operates at Forcados but slops cannot be accepted ashore. Maximum loading rates 11,000 t.p.h. (1/1/74).

A single grade of crude oil is handled which is known as "Forcados Blend".

*Shore Line System:* Vessels load through SBM from shore through 48 in. line to SBM. The 48 in. submarine line to the SBM is some 14 miles in length, therefore great care must be exercised during loading when ships valves are manipulated to avoid pressure surges. Pressure recorders are normally fitted at the spool piece between ships manifold and tail end of the hose string to monitor pressure changes generated on board the vessel.

**MEDICAL:** No facilities for medical attendance but assistance may be given only on an emergency basis.

**FUEL:** Not available.

**FRESH WATER:** Not available.

**DENSITY:** Approximately 1025.

**REPATRIATION:** No crew changes possible.

**SHORE LEAVE:** Not permitted.

**GENERAL:**

*Loading:* Ships are required to load cargo as rapidly as possible by day and night in accordance with the terms of their charter parties.

This means that ships are expected to load as fast as Shell-BP can supply or they can safely receive. The question of how fast a ship can load is the responsibility of the Master having regard to his Owner's instructions the charter party and the experience of ships' personnel. However, as further guidance, and in absence of any instructions to the contrary, ships are expected and nominations of vessels are accepted by Shell-BP on the understanding that ships will be able to accept a bulk loading rate per hour of not less than ten per cent of the summer deadweight of the vessel.

At offshore berth the Berthing Master acts as Loading Master during Loading Operations and is provided with "walkie-talkie" radios to ensure adequate ship/shore communication.

Loading Masters visit each vessel, and Masters are requested to co-operate in the completion of the Shell-BP Tanker Port Performance Time Sheet by ship and shore personnel at all Terminals. Only crude oil is handled at Shell-BP terminal, loading temperature and specific gravity of the grade of crude. Forcados Blend is reasonably constant and is approximately: 0.856 at loading temperature.

*Immobilization of engines:* Not permitted at SBMs. Not advisable at sea anchorages as many obstructions if vessel drags anchor.

*Restrictions which may cause delays:* Weather. Worst period June–September when heavy swell may be encountered.

*Early departure procedure:* A modified early departure procedure is in operation at Forcados offshore terminal. Masters are requested to sign all documents in blank, retaining in their possession master's consignees copies. On completion of loading, the Berthing Master will supply Masters with a copy of the figures required for the completion of the retained documents. Masters are requested to complete these before the departure of the vessel. Customs and agency representatives will normally board vessels during daylight hours. Depending on other commitments of the offshore launch, it may be necessary to request masters to provide temporary accommodation for these officials.

**WATCHMEN:** Whilst berthed at an SBM, a security watch must be kept on the forecastle head by member(s) of the ship's crew throughout the hours of darkness.

**SHIPMASTER'S REPORT:** The SBM's are situated about 11 miles offshore.

*Moorings:* Starboard derrick topped and doubled up. If accommodation ladder rigged then on port-side. Not necessary for vessels up to 50,000 dwt.

*Hoses:* All sizes of reducers available.

**TERMINAL OPERATOR:** The Shell-B.P. Development Co. of Nigeria Ltd.

## LAGOS (including Apapa): 06.27 N. 03.25 E.

**DOCUMENTS:** See Burutu.

**PILOTAGE:** Compulsory. Hoist "G" flag. Agent to give notice of ETA to Harbour Master as early as possible. Contact Pilot by VHF Channel 16. No pilot boat stationed outside.

**ANCHORAGES:**

| | *Length* | *Draft* |
|---|---|---|
| Pool 1 | 480 ft. | 24 ft. |
| Pool 2 | 600 ft. | 28 ft. |
| Pool 3 | 450 ft. | 26 ft. |
| Pool 4 | 450 ft. | 26 ft. |
| Pool Buoy 5 | 320 ft. | 18 ft. |
| Badagry Creek | 380 ft. | 16 ft. |

**RESTRICTIONS:** Draft only.

**MAX. SIZE:**

| | *Length* | *Draft* |
|---|---|---|
| Marina Buoys | 750 ft. | 24 ft. |
| Container Berth | 720 ft. | 27 ft. |
| Pool | 600 ft. | 28 ft. |
| APQs | 600 ft. | 27 ft. |
| Customs | 520 ft. | 23 ft. |
| PWA | 580 ft. | 25 ft. |
| BOP | 500 ft. | 26 ft. |
| Ijora | 420 ft. | 19 ft. 6 in. |

**HEALTH:** Port Health Officer boards vessel on arrival. ETAs must be advised by ship or Agent direct to Port Health. Pratique automatic when from Nigerian port.

**RADIO:** Messages routed through Lagos Radio.

Continuous VHF watch on Channel 16 maintained in Harbour Master's office. Contact Signal Station by VHF Channel 16.

**TUGS:** No specific joining position, depending on tide and on Pilot's request, otherwise close to berth. Normally ship's line used. 2 tugs available 1,280 HP. 24 hour service available.

**BERTHING:** Cargo for Apapa and Lagos should be stowed separately on all liner ships as the Apapa wharves have rail connections to the North, and the customs wharf only receives cargo for Lagos locally.

No specific arrival time is required for berths, except for Petroleum Wharf where tankers need high water. Berthing on ebb tide required for Fish Wharf and Ikjora Wharf.

There are three berths at the Customs Jetty, 1, 2 and 3. The depths alongside are 22 ft. 6 in.; 21 ft. 6 in.; 19 ft. 6 in. respectively. Each berth can accommodate a vessel of maximum 500 ft. in length.

Lighter Berth, length 380 ft., draft 16 ft.
Fish Wharf, length 280 ft., draft 19 ft.
Marina Dolphin, length 250 ft., draft 19 ft.

**STEVEDORES:** Available.

**MEDICAL:** Agents to be given advance notice of medical attention required as early as possible. Hospital facilities available. International Certificates of smallpox and yellow fever required.

**TANKERS:** Length 580 ft. Draft 25 ft. (FW).

**DENSITY:** 1012.

**FRESH WATER:** Delivery by barges at between 20 to 40 tons per hour. Advance notification needed.

**FUEL:** Fuel oil available, coal bunkers obtained from Ijora Wharf.

**FIRE PRECAUTIONS:** Tankers and vessels with explosives: fire-boat always in attendance with fire-control depot ashore working in conjunction with the Harbour Master on VHF Channel 16. Port area tugboats also equipped for fire fighting.

**GANGWAY/DECK WATCHMEN:** Advisable, available if required.

**OPENING/CLOSING HATCHES:** Stevedores/crew.

**CUSTOMS ALLOWANCES:** Tobacco allowance: 200 ciga per person reissue after 8 days. Wine/Spirit: One part bottle re to officers after 4 days.

**IDENTIFICATION CARDS:** Passports or identity cards.

**CONSULS:** Most countries maintain Embassies/High Com sions or Consuls.

**REPAIRS:** Major repairs available.

**DRY DOCKS:** Authority maintains large well-equipped doc which primarily for maintenance of Authority's own fleet, pro facilities to commercial interest. In installation is modern flo dock which has lifting capacity of 4,000 tons. Max. draft 18 ft. Slip also available for use of small craft.

In addition to facilities offered by Authority's dockyard, m shipping agencies in port maintain dockyard installations, inclu slipways for raking smaller vessels and lighters; can provide aid repair for main line vessels.

**REPATRIATION:** Facilities available for effecting crew cha and arranging any necessary repatriations.

**AIRPORT:** 8 miles from harbour, served by regular airlines.

**TIME:** GMT plus 1 hour.

**HOLIDAYS:** Fixed: New Year Day (1st January); National (1st October); Christmas Day (25th December); Boxing Day December). Variable: Good Friday; Easter Monday; Eid-El- Festival; Eid-El-Kebir Festival; Maolud Nabiyyi (Mohamm Birthday). Port closed on Republic Day, Good Friday and Christ Day.

**POLICE/AMBULANCE/FIRE:** Police Apapa 45798, Lagos tom 20030; Ambulance Apapa 41341/227; Fire Apapa 41741, L Custom 20777, General Emergencies 199.

**TELEPHONES:** No arrangements for telephones on board.

**GENERAL:** 2 floating cranes 1 × 40 ton capacity, 1 × 100 ton capa

**SERVICES:** Small services available.

**SHORE LEAVE:** Crew members allowed ashore after clearanc Port Health and Immigration Authorities.

**AUTHORITY:** Nigerian Ports Authority, 26–28 Marina, PMB 1 Lagos. Tel. 26471.

**AGENT:** Alraine (Nigeria) Ltd., 26 Creek Road, Apapa, La P.O. Box 2206. Tel. 47 770. Cables "Freight Lagos". Telex 2124

## PENNINGTON TERMINAL: 04.37 N. 05.26 E. (Se
P

All vessels required fly Nigerian Ensign on foremast during day hours.

**OPERATORS:** Texaco Overseas (Nigeria) Petroleum Comp

**LOCATION:** Pennington Marine Terminal located in 65 ft. of w in latitude 4° 37′ 20″ N., longitude 5° 26′ 10″ E., bearing approxim 210°, distance 5,300 ft. from "Special Purpose Vessel 367001" (w has been fabricated from the forebodies of two tank vessels, a approximately 740 ft. in length).

**APPROACHES:** The berth should be approached from a Wes direction to a point not less than 2 miles seaward of "Special pose Vessel". At this location, Mooring Master will board vessel.

**DOCUMENTS:** Following documents required on arrival:

Last Port Clearance.
Register.
4 copies Passenger Manifests.
4 copies Crew Lists.
2 copies Stores Lists.
2 copies Bonded Stores Lists.
2 copies Arms and Ammunition List.
2 copies Livestock List.
1 copy Vaccination List, showing date of last smallpox and ye fever inoculations of all crew members.
2 copies of Master's Declaration to Nigerian Ports Autho

These forms will be supplied when Authorities board the sh

**PILOTAGE** (see "Approaches"): Mooring Master, together Custom Officials will board incoming vessel about two miles ward of the "SPV 367001". Vessel's Master will be advise approach to the berth details in respect of mooring, unmoo connecting and disconnecting hoses, and all other operations w the berthing area.

Vessels requested to have pilot ladder safely and securely ri for immediate use, and long enough to reach Mooring Mas launch. A light line should be ready to take on board the Moo Master's radio and/or briefcase.

Mooring Master will remain on board during loading opera and he will be in direct control of all ship communications wh Terminal area.

**TUGS:** 3,200 h.p. tugboat and a mooring launch to assist in m ing and unmooring. A flat charge is made for use of tugboat mooring launch.

**MAX. SIZE:** Maximum draft approximately 45 ft. depending on conditions. Maximum capacity 50,000 dwt.

**RADIO:** All vessels to be loaded at the Terminal must cable to "Topcon, Lagos", 96 hours and 24 hours prior arrival. The C pany, Lagos, will then notify Senior Mooring Master on board Sp Purpose Vessel.

Ship to "SPV 367001" communication, while ships are in moo will be by portable VHF radio-telephone units, provided by Term Mooring Master will advise ship's Master regarding emerg whistle signals set up for use in event radio-telephone units bec inoperative. Use of ship's radio station and/or battery chargi prohibited while loading is in progress.

**READINESS:** The Company will make every effort to load ves upon arrival, or as promptly as berth is available, weather perm

"Notice of Readiness" will be accepted as at time of arrival, provided vessel is in all respects ready to load. Arrival time will be considered as at time Mooring Master boards vessel, or time vessel anchors off the terminal, which ever occurs first.

Mooring Master may reject a vessel if in his judgment she is not properly equipped or suitably manned, or if, upon inspection, he deems her to have dirty ballast or tanks unsuitable for cargo. However, Company will not issue any certificate or representation purporting to state that vessel's tanks, pipes and pumps and appurtenances are clean or acceptable for receiving cargo nor will the company assume any responsibility for "contamination of cargo aboard ship caused by condition of ship's tanks, pipes, pumps or appurtenances."

Vessels shall have in readiness:

1. Windlass and both bower anchors, each with not less than 150 fathoms of chain.
2. At least 14 good mooring lines, each no less than 120 fathoms in length, with eyes and tailropes spliced into each end.
3. Suitable stoppers for all manila lines and chain stoppers for use with wires.

Vessels must be adequately equipped with blocks, tackle and booms to hoist submarine hoses, a 5-ton lift from seabed to ship's rail, in a safe, efficient and expeditious manner. Vessels must also have an adequate supply of nuts, bolts, gaskets and wrenches to connect cargo hoses.

**BALLAST:** ABSOLUTELY NO PROVISION IS MADE FOR DIRTY BALLAST. VESSELS WITH DIRTY BALLAST WILL BE REJECTED AND ALL COSTS THEREFROM WILL BE TO THE VESSEL'S ACCOUNT.

As soon as practicable after arrival, and prior acceptance for loading, all vessel's tanks will be inspected for evidence of oil in ballast, and during discharge of ballast, similar inspections will continue. If evidence of oil appears at these inspections, the vessel may have to vacate berth and proceed to sea to dispose of oil ballast. Upon return, vessel will be obliged to tender new "Notice of Readiness".

If, during first inspection or during process of loading it is revealed that vessel's tanks are not oil-tight, she will be rejected, or refused further loading.

In addition to lights usually displayed, vessels discharging ballast or loading cargo during darkness will illuminate area around the ship to satisfaction of Mooring Master, in order that any oil on the surface of sea may readily be detected and appropriate action taken. Vessels unable to illuminate sea satisfactorily may not discharge ballast during darkness. Vessels should provide suitable floodlights for working on deck during night operations.

Vessels properly equipped will be encouraged to discharge clean ballast and load simultaneously.

**MOORING:** Weather and other circumstances permitting, vessels are moored, loaded and unmoored during daylight hours only.

Signals displayed on Special Purpose Vessel:

(*a*) By day, on offshore end of vessel, three shapes in vertical line; the upper and lower shapes globular and red; the middle shape diamond and white.

(*b*) By night, three lights in vertical line; the upper and lower in red; the middle white.

The permanent mooring consists of 7 steel buoys. All buoys fitted with quick-release hook to which vessel's mooring lines are attached by Company Mooring launch. Berth is laid out so that vessels will head 210° true when moored. Vessels mooring use both bower anchors and 14 ropes to respective mooring buoys.

Each buoy is fitted with $1\frac{3}{4}$-in. diameter preventer wire, one end of which is secured to mooring buoy. When Mooring Master considers it required, the other end is brought on board vessel after moored in position. Preventer wires are supplemental to vessel's regular mooring lines and intended assist holding vessel in moorings during adverse conditions. Vessels should have chain stoppers for handling these wires.

All manoeuvring within loading berth area is to be done only in accordance with advice of Company Mooring Masters, subject to understanding that in all cases and circumstances Master of vessel being manoeuvred shall remain solely responsible for safety and proper manoeuvring. Vessel's Master or a qualified Deck Officer must be on bridge at all times during manoeuvring.

Winds and swells mostly from South-westerly direction. From March through November, the unfavourable weather period, extra mooring lines will be required. Currents are irregular and at times strong, and Mooring Master will provide Master with this information when boarding.

**LOADING:** During loading, the International Code Flag "B" shall be displayed from top-mast signal halyard during daylight hours. During hours of darkness, a red light shall be displayed, visible at a distance of at least one mile, and showing unbroken light all around the horizon.

Raising, connecting, disconnecting and lowering of submarine hoses will be performed by vessel's crew under direction and supervision of an appropriate vessel's Officer as advised by the Mooring Master, who will remain on board while the vessel is in moorings.

After vessel securely moored, two 12-in. submarine loading hoses will be lifted to rail amidships. Weight of each lift approximately 5 tons. Hoses lifted with vessel's gear on port side. Mooring Master advises vessel's personnel in the lifting, connecting, disconnecting and also when lowering the hoses, when mooring launch may be used to avoid bends or kinks in the hoses. A vessel's Deck Officer must be present, and direct the crew in all hose handling. There must be sufficient crew on deck to perform this work.

Master is responsible for own vessel at all times. The maximum loading rate is about 20,000 bbls. per hour and Company Mooring Master will advise in respect to loading pressures and hazards, but will not direct loading except as may be necessary to protect Terminal facilities. Manipulation of vessel's valves is direct responsibility of vessel's personnel.

Prior commencement loading, Chief Officer will assure Mooring Master that sea suction valves are *closed* and he will make note to that effect in Mooring Master's log before cargo loading started. Final ullaging and computation of cargo will be done by an Officer of the vessel who will hand this information to Mooring Master for transmittal to officer in charge on board "SPV 367001" for use in comparing metred-out cargo.

*Caution.*—The incoming oil stream is controlled on board the "SPV 367001" and it is extremely dangerous to close a cargo valve against the incoming stream. Such a procedure creates excessive pressure, which may damage hoses, piping or Terminal facilities. Vessels will be held liable for damages resulting from failure to observe this precaution.

*Emergency Signal.*—When normal ship-to-shore communications fail, the emergency signal to stop the flow of oil will be a continuous blast on the whistle until oil ceases to flow. Steam or air should never be shut off from the whistle during loading. Whenever emergency whistle signal is used, all loading operations will be shut down until communications can be re-established.

*Shore Stops.*—Request for Terminal to stop the flow of cargo at a predetermined tonnage must be made in writing. Requests must include statements that the Company will not be held responsible for any error and in case of overloading, the excess cargo cannot be pumped back to the "SPV 367001". Some delays are always incurred when such a shore stop request is made.

**SAFETY:** Pennington Terminal considered an open roadstead, and under no circumstances may engines be shut down for repairs while a vessel is moored in the submarine berth. Vessel must be able to depart from berth immediately on instructions to do so.

Vessel's personnel responsible for safety of vessel, and must take all necessary precautions whether or not so advised by Mooring Master. Any safety precautions imposed by Company Mooring Master and so disregarded by ship's Officers or crew, will be considered just cause for rejection of vessel and all expenses and liabilities related thereto will be for account of the tanker.

Not less than one Deck Officer and three seamen shall be available on deck at all times while vessel in moorings.

Power must be available at all times on deck winches and windlass while vessel in moorings.

Presence of unauthorized craft alongside is extremely hazardous and Masters are requested to require all unauthorized craft to clear vessel's side prior ballast pumping and cargo loading.

Mooring Masters are authorized to shut down loading operations during severe electrical storms, if another vessel or craft of any description comes alongside the loading vessel, and under any other circumstance which imperil loading operations.

**MEDICAL:** Medical assistance on an emergency basis only.

**FRESH WATER/FUEL:** Not available.

**AGENCY:** General Agency functions to perform services necessary to document and clear vessel and export cargo will be handled at Pennington Terminal by Palm Line Agencies. The Company will provide transportation of Customs and Agency personnel to and from the S.P.V. where they will be available to assist vessels in such Customs and Agency requirements as necessary.

## PORT HARCOURT (incl. Okrika): 04.46 N. 07.01 E.

**DOCUMENTS:**

9 Crew Lists.
9 Passengers Lists.
6 Arms and Ammunition Lists.
6 Livestock Lists.
7 Ports of Call Lists.
2 Bonded Store List.
3 Vaccination Lists.
10 Manifests.
2 Bills of Lading.
2 Crew Declaration (Special Lists).

**PILOTAGE:** The Pilot Station for Port Harcourt is at Bonny, 15 miles from Fairway Buoy, 28 miles from Port Harcourt. The Harbour Master keeps watch on VHF Channels 16 and 14 and on 2182 from 0700 to 1800. As there presently is no radio station at Port Harcourt Masters should cable their Lagos Agent with a 48 hours ETA asking the Lagos Agent to pass the information to Port Harcourt. Pilot boards at Fairway Buoy from pilot-cutter green hull, stone colour superstructure.

Position of Fairway Buoy: 4° 12′ 56″ N., 7° 00′ 28″ E.

It should be noted that Bonny is an Oil Terminal and as such heavy traffic of tankers is continuous. In extreme circumstances vessels may be requested by Harbour Master to pass the channel from Fairway Buoy at Bonny, and anchor at Bonny without a Pilot, in which case latest Notices to Mariners should be studied in order not to damage oil pipe-lines in prohibited anchorage areas.

**ANCHORAGES:** Position West of Fairway Buoy, depths 8–9 fathoms.

**RESTRICTIONS:** Night pilotage available for tankers at Bonny only. Vessels for Okrika and Port Harcourt can only navigate during daylight.

**MAX. SIZE:** Maximum draft is 25 ft. at high water, minimum depth in approaches 18 ft. datum. Max. length 600 ft. no restrictions on beam. Ebb tide reaches a max. of 3 knots off the berths and 2½ knots in the river, flood tide 2½ knots off berths and in the river.

**HEALTH:** Q-flag to be shown on arrival, except if from another Nigerian port, Yellow fever and small-pox inoculations compulsory. In case of suspected disease on board, advance notice to Agent advisory.

**TUGS:** One tug available, 1,490 h.p.

**BERTHING:** *Main Quay:* The main Quay is 3,459 ft. long and capable of berthing seven vessels, with drafts from 24 ft. to 26 ft.

The old quays at Port Harcourt have been completely reconditioned to enable them handle bigger ships. Dredging in front of these quays is in progress and when completed ships with drafts of up to 29 ft. will be able to use these berths.

*B.O.P. Berth.* This berth lies outside the Quay area, and is for the loading of palm oil by means of a direct pipe line from the installation of Bulk Oil Plants (Nigeria) Limited. It consists of a central "T" jetty with dolphins and is capable of berthing vessels up to 480 ft. in length. It is also used for the discharge of explosives as such cargo is not permitted to be handled across the general cargo Quay.

Oil is supplied by a 6-in. diameter pipe at a maximum rate of 250 tons per hour.

*Okrika Oil Refinery:* Okrika lies on the Bonny River, some 35 miles from Bonny Fairway Buoy. The approach is by a buoyed channel some 8 miles in length, dredged to a depth of 38 ft. chart datum. The river from Bonny to Okrika has been dredged as necessary and least depths are 29 ft. chart datum. Jetty at the oil refinery suitable for berthing coastal and ocean tankers up to 33,000 tons deadweight. The jetty is "L" shaped with a square dolphin at the end of the arm. Ocean tankers secure on the outside of the jetty making fast to two sets of mooring dolphins each end. The coastal vessels and barges are berthed on the inside of the jetty. Oil is supplied via gantry hoses on either side.

*Coal handling facilities:* Facilities for loading coal have been completed and a conveyor capable of loading about 60 tons per hour is working. Maximum draft at the coal berth is 24 ft. This berth is situated at the Northern end of the port, berth No. 8.

**STEVEDORES:** Gang requirements and hatch distribution should be included in 48-hours ETA cable to Agent. Discharging general cargo 8 tons per gang/hour, cement 15 tons per gang/hour, bagged cargo 20 tons per gang/hour, loading produce 15–20 tons gang/hour.

**MEDICAL:** Doctors available 24 hours, but limited supply of medicaments. Yellow fever, cholera and smallpox vaccination required.

**DENSITY:** Appx. 1015 oz.

**FRESH WATER:** No restriction, from barge (15 ton/hour). From quay low pressure, max. 8 ton/hour.

**FUEL:** Most standard lubricants available, fuel available by barge only. Requirements by 48-hours ETA cable.

**GANGWAY/DECK WATCHMEN:** Recommended.

**OPENING/CLOSING HATCHES:** Normally by crew.

**CUSTOMS ALLOWANCES:** 200 cigarettes per man per 7 days. 1 wine or 1 btl spirits per officer per 7 days.

**IDENTIFICATION CARDS:** Crew to carry passport or seaman's book whilst ashore.

**REPAIRS:** Only very minor repairs available, no spares.

**REPATRIATION:** Possible via Lagos.

**AIRPORT:** 7 miles away, twice daily flights to Lagos, no international flights.

**TIME:** GMT plus 1 hour, no changes during the year.

**HOLIDAYS:** New Year (Jan. 1st); Id-El-Kabir (Feb. 16–17th); Good Friday and Easter Monday; National Day (Oct. 1st); Fasting Period (October 31st); Id-El-Fitri (Nov. 29–30th); Christmas Day (Dec. 25th); Boxing Day (Dec. 26th). The Muhamadan holidays are subject to changes. The port does not work on Good Friday, Christmas Day and Republic Day.

**POLICE/AMBULANCE/FIRE:** All can be contacted by tel. 999.

**SHORE LEAVE:** Allowed provided crew carry passport or seaman's book.

**AUTHORITY:** Nigerian Ports Authority.

**AGENT:** Alraine (Nigeria) Limited, PO Box 622, Port Harcourt, tel. 8059, 8062, 8053. Telex Freight Lagos 21244 attention – Port Harcourt.

### QUE IBOE: 04.20 N. 07.59 E.

**DOCUMENTS:**

Port of Call List and clearance from previous port.
Crew Lists with passports and Certificates of Vaccinations available for inspection.
Stores List.
Crew Personal Effects List.
Manifest of Cargo.
Arms and Ammunition List.

**PILOTAGE:** An 80,000 dwt. storage tanker *Mobil Japan* is moored in position 4° 20′ N. 7° 59·5′ E. Notice of arrival should be given five, three and one days before arrival to "Mobiloil Lagos" and to the storage tanker, call sign 62JG. A company mooring master will board approximately 2 miles South of the storage tanker.

**RADIO:** Storage tanker, call sign 62JG keeps 24-hour watch on VHF Channel 16. Listens on MW 425 kHz between 1600 and 1700 GMT, and on HF 12350 to 12710 kHz between 1730 and 1800 GMT.

**BERTHING:** Loading berth is seven point conventional buoy mooring. Sea-line hoses are lifted on the starboard side, total weight of lift, 6 tons.

**BALLAST:** No facilities for reception of dirty ballast. Tankers must arrive with clean ballast only.

**FRESH WATER:** Not available.

**FUEL:** Not available.

**REPATRIATION:** There are no facilities for repatriation or c changes.

**SHORE LEAVE:** Not possible.

**AUTHORITY:** Mobiloil Lagos.

### SAPELE (incl. Koko): 05.55 N. 05.42 E.

**DOCUMENTS:**

Crew List.
Port of Call List.
Passenger List.
List of Arms and Ammunition.

These documents required by following Government Departme Collector of Customs, Customs Preventive Service, Ports He Authority, Police Authority/Immigration, Nigerian Produce Ma ing Co., Nigerian Ports Authority NPA also require Inward and ward Masters Declarations and all other documents such as M fests and Bill of Lading, etc.

**PILOTAGE:** Not compulsory, but local river guides availab Escravos on request.

**ANCHORAGES:** No laid-down areas.

**RESTRICTIONS:** None under normal conditions.

**MAX. SIZE:** Average length 400/450 ft., draft 16½ ft. plus tide fo day, minus Master's underkeel clearance.

**HEALTH:** Normal International Regulations, but between por Nigeria nothing required.

**RADIO:** ETA and ETD best passed via Lagos Radio to La Agents who in turn advise local Agents. Port Authority ope VHF Channels 16, 14, 13, 12, 11 and 9.

### NARVIK: 68.26 N. 17.25 E.

**DOCUMENTS:**
- Health Declaration in Norwegian form (if not available anothe form is possible.)
- 6 Crew Lists.
- 1 Provision List.
- 1 Private Customs List.
- Passenger List.

**PILOTAGE:** Tranoy Pilot station. Position 68.11 N. 15.34 E. Pilot request 24 hours notice. Cable address: Tranoy pilot station. Befor arrival pilot station Pilots should be called on VHF Channel 16.

Distance from Tranoy to Narvik is 46 miles. The harbour Pilo will board and assist during berthing.

**ANCHORAGE:** Narvik Harbour. Pilot will advise anchorage.
**RESTRICTIONS:** No restrictions on night entry.
**RADIO:** Cable Agents giving ETA, draft and cash required. Radi station: Rogaland Radio/LGB but other stations can be used.
**TUGS:** Must be employed for tankers. Two tugs available, capabl of assisting vessels up to 250,000 dwt.
**HEALTH:** Free pratique, otherwise see "Documents".
**BERTHING:** Max. depth alongside 13·5 m. at LWOST, max. dra on sailing 13 m. A deeper sailing draft may be permitted if tide an weather conditions are favourable but the Master will be liable fo any damage caused by a vessel with draft over 13 m.

Two boom-type shiploaders are available, on each side of the pie If two vessels are loading simultaneously, one on each side of th pier, then only one loader may be used by each vessel. The designed capacity of each loader is 4,500 tph but average capacity of each loader is 2,000/3,000 tph depending on quality and kind of ore to be loaded.

Maximum outreach from fender line is 15 m. The height from the water to the top of the vessel's coaming must not exceed 13 m. (Pier 3) and 11 m. (Pier 4).

The length of the ore pier is 250 m. on the outside (No. 3) and 220 m. on the inside (No. 4).

The shiploaders are able to travel over a distance of 145 m. so larger vessels (65,000 tons dwt) may have to shift during loading operations. The length of the vessel from the bow (or bulbous bow) to the aftermost loading point must not exceed 202 m.

The limit on beam is 37–38 m. for ore/bulk carriers and 39–40 m. for OBO vessels (approx.).

A stowage plan is to be handed to the Agent and foreman on arrival, stating the quantity in metric tons and loading rotation of the hatches, also the estimated draft on sailing.

*Weighing:* Electronic conveyor weighing with an average accuracy better than ± 0.15%.

**STEVEDORES:** Ordered by Agent. Not necessary to contact stevedores.

*Working hours:*

Ordinary working hours 24 running hours, except Saturday 2200 to Sunday 0600.

Loading does not take place on the following holidays:

| | | |
|---|---|---|
| December 24th | 1300 – December 26th | 2200 |
| December 31st | 1300 – January 1st | 2200 |
| Maundy Thursday | 1400 – Easter Monday | 2200 |
| Whitsun Eve | 1400 – Whit-Monday | 2200 |
| April 30th | 2200 – May 1st | 2200 |
| May 16th | 2200 – May 17th | 2200 |

**DENSITY:** 1020.

**FRESH WATER:** Ore berth has supply of fresh water. Otherwise delivery by tugs.

## SLAGEN: 59.19 N. 10.32 E. (See Plan)

Oil refinery pier operated by A/S Norske Esso, Norge.

**DOCUMENTS:**

Four Crew Lists.
Manifest of Crew Personal Effects.
Stores List.
Cargo Papers.
Bill of Health.
Ship's Register.

**PILOTAGE:** All foreign ships must have Pilot. Pilot obtainable at Store Ferder, East. Boats are white with name "Los". Deep water available and no special anchorage place if waiting for Pilot. Call Pilot at least two hours in advance by VHF Channel 16 or radio telephone.

**ANCHORAGE:** North-north-west of pier head. Particulars regarding anchorage will be given by Pilot.

**MAX. SIZE:** Tankers up to 1,200 ft. length and 66 ft. draft can be berthed.

**HEALTH:** Clearance is effected on arrival. International procedure followed to obtain pratique. In case suspected disease or fever on board inform port authorities in advance.

**RADIO:** Cable Agent ETA, cash, bunkers, personnel, bonded stores, or other special requirements. Radio telephone contact should be established with Marine Office on VHF or via Tjøme Radio. Call name Marine Office "Slagen Havne radio" on VHF.

**TUGS:** Are available up to 3,200 i.h.p. Tankers over 20,000 dwt. required to have tug standing by throughout discharging operations. The charge for standby tug is to owner's account.

**BERTHING:** The East side of the pier (crude side) is used for loading and discharging. The West side (product side) is used for loading products only.

Berth No. 1 and crude berth – max. length 1,200 ft., max. draft 66 ft.
Berth No. 2 max. length 630 ft., max. draft 34 ft.
Berth No. 3 for coasters and barges.

**HOSES:** Crude oil berth: Four 12-in. lines, max. pressure 150 psig.

Berth No. 1: Four 10 in. lines for dirty oils
Two 10 in. ,, ,, clean products
Two 6 in. ,, ,, fuel
One 4 in. ,, ,, LPG
Three 3 in. ,, ,, ,,
Berth No. 2: One 10 in. line for dirty oils
Two 8 in. ,, ,, clean products
One 6 in. ,, ,, fuel

**BALLAST:** Shore ballast tanks capacity 100,000 bbls. All ballast to be discharged ashore.

**POLLUTION:** A submersible oil boom has been installed enclosing the oil pier. Normally, the boom rests on the sea-bed, but when needed it will be raised to the surface using compressed air.

The oil boom and its system of anchorage will be damaged by vessels' anchors. In order to ensure that the oil boom is operable at all times, and to avoid expensive repairs, which will be charged to the ship responsible for the damage, great care should be taken in connection with manoeuvres along the Slagen pier, which will require the use of anchors.

The drawing of the pier shows the position of the oil boom and the anchorage system. Except for emergency situations, anchors should not be used within the shaded area.

All manoeuvres to and from berths should be discussed with the Harbour office (Slagen Harbour Radio, Channel 14). The Harbour Office will give you information regarding current strength and setting.

Approach to Berth 2, and Berth 3 if Berth 2 is not occupied, is facilitated by the fendered sliding front.

**MEDICAL:** Medical attention and hospital facilities available.

**DENSITY:** Occasionally brackish.

**FRESH WATER:** Available from pier.

**FUEL:** All grades available.

**FIRE PRECAUTIONS:** Special safety regulation forms given when berthed.

**GANGWAY/DECK WATCHMEN:** Oil Pollution/Safety Inspector placed on board all vessels over 20,000 dwt.

**CUSTOMS ALLOWANCE:** 200 cigarettes/or 200 grammes tobacco and one bottle spirits for each man.

**IDENTIFICATION CARDS:** Gate pass delivered to ship when berthed.

**CONSULS:** Denmark, Finland, France, Great Britain, Netherlands, Spain, and Sweden have representatives in Tonsberg. W. German consul in Sandfjord. All countries represented in Oslo.

**REPAIRS:** Repair shops facilities ashore. Tankers alongside pier must not effect repairs to main engine which should be in constant readiness.

**DRY DOCKS:** Available at Sandefjord about 35 miles from Slagen.

**REPATRIATION:** Changes of crew are available. Transportation by train and plane from Oslo (about 100 kilometres from Slagen), passenger lines from Oslo. Hotel accommodation available at Tønsberg (10 kilometres from Slagen).

**TIME:** GMT plus 1 hour.

**HOLIDAYS:** New Year's Day; Maunday Thursday; Good Friday; Easter Monday; Labour Day (1st May) 17th May; Ascension Day; Whit Sunday and Whit Monday; Christmas 25th and 26th: Discharging/loading all days.

**POLICE/AMBULANCE/FIRE:** Police Tønsberg 13355; Ambulance Fire local at the refinery.

**TELEPHONES:** Available at berth.

**SERVICES:** Tanker cleaning services available at Horten, about 15 miles from Slagen.

**GENERAL:** Ratguards are compulsory. Transportation of alcohol through refinery is prohibited.

**SHORE LEAVE:** Crew members allowed to go ashore.

**AGENT:** Sev. Dahl A/S, Storgt 15, PO Box 128, 3101 Tønsberg, Ship and Insurance brokers, Lloyd's Agent, Chartering, sale and purchase of tankers and motor ships. Tel. 14027 – 14028 – 14432 – 14194. Telex 11557, "Sdahl". Telegram: "Severin", Tønsberg.

## STAVANGER: 58.58 N. 05.44 E.

**DOCUMENTS:**

Declaration of Health, one copy.
List of Goods, including stores, one copy.
Crews List of Goods liable to duty, one copy.
List of Goods, two copies for each port of discharge. All bills of lading to be entered with marks, numbers, weight and quantity.
General List of Goods, one copy.
A form for entering ports of call where discharging will take place.

**PILOTAGE:** Vessels approaching from sea and desiring a Pilot should order at least 24 hours notice in so far as possible and confirm arrival at pilot station at 2 hours notice. Advance order can be sent in following manners:

(*a*) From ships at sea over radio direct to sea pilot watch (calling frequency 2182 kc/s, from two minutes past until ten minutes past each full hour, or over VHF radio-telephone calling, frequency 156.80 mc/s; Channel 16).
(*b*) From ships at sea over coastal radio station to pilot station or pilot office.
(*c*) From broker or shipowner over telephone to sea pilot station or to any pilot office which will immediately convey report to sea pilot station.

Vessels lying in port and desiring Pilot will order Pilot from nearest pilot office during its office hours and if possible at four hours notice.

Vessels approaching from sea as well as vessels lying in port shall when making an advance order state name and destination of vessel and whether one or two Pilots are desired.

Pilot will be despatched to ships in accordance with advance orders, and vessels are therefore requested to comply with foregoing rules as far as possible in order to avoid having to wait for Pilot.

International provisions for summoning Pilots by signal flags or blue lights, etc., are still in force, but should in future be used as a supplement to radio communications or as sole communication in emergencies.

Pilots are taken on board at:

*A Feistein Lighthouse,* 19 miles South of Stavanger, or in bad weather 6 miles North of lighthouse under the lee of Rott.

*B Skudefjorden,* 18 miles North-west of Stavanger. In bad weather under the lee of Karmøy or Kvitsøy, as weather permits.

Pilot boats are stationed at Tananger and Skudesneshavn. No boats are out cruising.

**RADAR/VHF:** Radar service for inner harbour. At Kvitsøy lopit station radar service may be obtained over VHF Channel 16.

**ANCHORAGE:** Found in the Byfjord, 3 nautical miles North of Stavanger. Harbour pilots recommended when anchoring.

**MAX. SIZE:** Largest depth alongside goods and passenger quays is 30 ft. Depth alongside oil refinery 16·5 metres. Maximum draft for tankers, 48 ft.

**TUGS:** Normally not used.

**BERTHING:** The coasting and the foreign trade is located in the Western harbour, comprising the two main quays, namely the Skagen Quay and the Strand Quay. These quays measure 1,600 m. with depths alongside 24 to 30 ft.

The quays are equipped with one 6-ton crane and eight 3-ton cranes. A floating crane with a lifting capacity of 65 tons available.

*Grain:* Rogaland Felleskjøp: Capacity for storing 72,000 tons, quay length 190 metres, depth alongside 48 ft. Discharging capacity 200 tons per hour. Stavanger Havnesilo: Storing capacity 140,000 tons, quay length 170 metres, depth alongside 51 ft. Discharging capacity 500 tons/hour.

*Roll-on/roll-off:* Traffic is offered by a ferry berth constructed for ships up to 5,000 g.r.t., depth alongside 26 ft.

Offshore oil-exploration bases: Aker-Norsco A/S at Risavik, Tananger North Sea Exploration Services A/S, Dusavik.

**STEVEDORES:** No particular ETA advices required.

**MEDICAL:** Agents should get advance notice to secure speedy service. Hospital facilities available.

**TANKERS:** Discharge at Sola refinery terminal where there are 3 berths, depth alongside up to 16,5 metres. It is intended to enlarge these facilities to accommodate 200,000 dwt. vessels with restricted draft.

*Esso Norske:* 3 nautical miles South of central harbour, depth alongside 45 ft.

*Norske Shell A/S:* 14 nautical miles South West of central harbour, depth alongside 38 ft.

*Norske Braendselolje A/S:* 7 nautical miles South of the central harbour.

*Texaco Oil:* 1 nautical mile from central harbour, depth alongside 25 ft.

*A/S Kulimport:* Coal and coke. Length of wharf 116 m., depth alongside 27 ft.

**DENSITY:** 1025, no change in relation to state of tide.

**FRESH WATER:** Delivered from quay or from water boat.

**FUEL:** Normal grades available without advance notice.

**GANGWAY/DECK WATCHMEN:** Not required.

**OPENING/CLOSING HATCHES:** Usually carried out by crew.

**CUSTOMS ALLOWANCE:** Tobacco: 20 cigarettes per day. Wine and/or Spirit: Two bottles of wine or one bottle of brandy.
**CONSULS:** Germany, C. Middelthon, tel. 21.040; Denmark, Leifbuch Hansen, tel. 27.575; U.K. Colin W. Peck, tel. 23.652; Sweden, Charles R. Bergesen, tel. 27.500.
**REPAIRS:** All kinds of repairs available.
**DRY DOCKS:** One, 545 by 75 by 24 ft. Marine slipway up to 1,500 tons dw.
**AIRPORT:** 10 km. from port. Airlines to Continent, U.S.A.
**TIMES:** GMT plus 1 hour. No alterations during year.
**HOLIDAYS:** 1st January; Maundy Thursday; Good Friday; Easter Monday; 1st May; 17th May; Whit Monday; Christmas Day and Boxing Day.

**REPAIRS:** All types of deck and engine repairs are possible.
**DRY DOCKS:** One available with capacity of 3,600 tons deadweight and a floating dock for vessels of 8,000 dw.
**REPATRIATION:** Can be arranged.
**AIRPORT:** 35 km. away from port. Regular airlines.
**TIME:** GMT plus 1 hour.
**HOLIDAYS:** Holidays (1974): Christmas (2 days); Easter, 11th, 12th, 14th and 15th April; 17th May; Ascension Day, 23rd May; Whitsun, 2nd and 3rd June.
**POLICE/AMBULANCE/FIRE:** Police 27500; Ambulance 21–510; Fire 21–505.
**SHORE LEAVE:** Allowed.

**AUTHORITY**: Trondheim Havnekontor, tel. 28015–28016.
**AGENT**: Bachke & Company, Dronningensgt. 7, POB 609, 7001 Trondheim, Tel. (075) 20124. After office hours tel. (075) 59657. Telex: 55035. Cables: "Bacos".

### VADSO: 70.04 N. 29.45 E.

**DOCUMENTS**:
- Trade Certificate.
- Tonnage Certificate.
- Certificate of Nationality.
- Number of Crew and Passenger Lists.
- Customs and Health Documents.
- Manifests and Bills of Lading.

**PILOTAGE**: Vessels approaching from sea and desiring Pilot should order at 24 hours notice and confirm arrival at Pilot Office, Vadso, at 2 hours notice. The advance order can be sent over coastal radio station to Pilot Office, the Harbour Master, Vadso, tel. Vadso 51235 or 51143. Harbour Pilot has to be taken on board in position Lat. 70° 45′ N. Long. 29° 41′ E.
**ANCHORAGES**: Anchorage for vessels up to 400 tons in basin, with depths varying between 14 and 21 ft. Larger vessels anchor W. of the mole in 16 to 20 m. Outer harbour inside breakwater, inner harbour, further to East. Entrance to inner harbour is by buoyed and lighted channel 1,560 ft. long and 115 ft. wide, this has been extended by the addition of a fishery basin 750 ft. long 800 ft. wide. Outer harbour is 1,000 ft. long, 700 ft. wide, depths 15 to 30 ft.
**MAX. SIZE**: Maximum length of vessel 300 ft. and breadth 45 ft. Draft 16 ft. Ship about 3,000 gross reg. tons.
**HEALTH**: Health documents necessary.
**RADIO**: Call Vardo Coastal Radio Station, through which contact by telephone Agent or Harbour Master or Vadso Harbour.
**STEVEDORES**: Stevedores arranged. Agent telephone 51395 Vadso.
**TANKERS**: Only small tankers can discharge. Discharging berth only for 500 gross reg. tons tankers, draft 13 ft.
**FUEL**: Gas and diesel oil. Water available on all quays.
**GANGWAY/DECK WATCHMEN**: Watchmen necessary. Master can use ship's crew as gangway and deck watchmen. Not necessary to use watchmen from the Watchmen Service.
**CUSTOMS ALLOWANCE**: Tobacco: Wine/Spirit: For 10 days, each crew 200 cigarettes, or 200 grams tobacco. ½ litre spirit, for each crew member.
**CONSULS**: Finland, tel. 51225 Vadso.
**REPAIRS**: Only smaller types of deck and engine repairs are possible.
**AIRPORT**: Distance to airport by sea 24 miles. By bus 160 km. Airport served by regular airlines; SAS two flights per day.
**TIME**: Local time, GMT plus 1 hour.
**POLICE/AMBULANCE/FIRE**: Police 51271 or 51593 Vadso; Ambulance 51845 or 51691 Vadso; Fire 51122 or 51554 Vadso.
**AUTHORITY**: Harbour Authority, Harbour Master, tel. 51235 or 51143.

## Ocean Island

### OCEAN ISLAND: 00.52 S. 169.35 E.

**DOCUMENTS**:
- Clearance from last overseas port.
- 2 Crew Lists.
- 4 Passenger Lists.
  - Bonded Stores List including Narcotics List (in duplicate).
  - Crew Store List (sometimes called search list or curio list).
- 4 Manifests.
- 1 International Health Declaration.
- Documents to be completed when ship arrives Ocean Island:
  - List of unmanifested cargo; Passenger's Baggage Declaration, if any, 1 copy per passenger.

**PILOTAGE**: Pilotage available on request without charge and Masters advised avail themselves this service. Necessary that Masters, through Ocean Island Radio, inform telegraphic address "Phoscom Ocean" of ETA 48 hours before arrival, confirming or altering this 12 hours before arrival. Phoscom reply through Ocean Island Radio on receipt of second message giving time for vessel to close in to a half mile West of loading plants, where pilot will board. In case of adverse weather or congestion, Masters notified by radio or by VHF channel 16, 156·8 Mc/s, with range of about 40 miles. Vessels handled inwards in daylight only, and should fly "G" flag when approaching island. A safe and clean pilot ladder should be provided, and a good lee made for pilot to embark.
**ANCHORAGES**: No anchorages available owing to extreme depths of water. Vessels waiting normally drift off and return at daybreak or when instructed to do so.
**RESTRICTIONS**: Tide and draft have no bearing on entry but normal not to handle vessels into berth in darkness. However, vessels are unmoored at all hours.
**MAX. SIZE**: Vessels have been handled up to overall length of 575 ft. Beam should not exceed 75 ft., draft limitations 34 ft. 6 in.
**HEALTH**: Masters of vessels approaching Ocean Island required to send telegram addressed "Quarantine Officer, Ocean Island" within 24 hours of arrival. Telegrams should state name of last port, date, presence of any infectious disease. On receipt quarantine officer will send reply indicating whether or not pratique granted. It is still necessary to fill out International Declaration of Health and hand to Boarding Officer after berthing.
**RADIO**: Ocean Island Radio station call sign VQK. Daylight range not great but traffic may be passed through C2N Nauru. No radar at Ocean Island. VHF Channel 16 156·8 Mc/s.
**TUGS**: No tugs required for berthing.
**BERTHING**: Such special requirements which relate to berthing are contained in a Letter of Advice to Ship Masters issued by the BPC.
**STEVEDORES**: As stevedoring is carried out by Phoscom, no separate advice required. Loading rate of bulk phosphate is as high as 1,300 tons per hour.
**MEDICAL**: Medical treatment can be given on short notice. Limited hospital facilities available, and emergency surgery can be carried out. Smallpox vaccination required, and cholera if vessel from infected area.
**TANKERS**: Maximum length 600 ft., no draft restrictions. Eight-inch discharge line to shore storage tanks.
**DENSITY**: Normal salt water all states of tides.
**FRESH WATER**: Island water imported, and water will be supplied only in emergency.
**FUEL**: Island stocks are imported for use in phosphate industry and only limited quantities of heavy fuel or diesel oil available in extreme urgency.
**GANGWAY/DECK WATCHMEN**: Not required.
**OPENING/CLOSING HATCHES**: Carried out by crew.
**CERTIFICATES**: Deratisation certificate only.
**CUSTOMS ALLOWANCES**: Tobacco, 200 cigarettes or ½ lb. tobacco or 50 cigars for use on board; 25 cigarettes or 1 oz. of tobacco may be taken ashore for own personal consumption. Wine/Spirit, 1 bottle only for use on board; No bottles may be taken ashore.
**CARGO GEAR**: Cargo gear should be up to standard demanded in Australian ports.
**IDENTIFICATION CARDS**: Some form of identification, passport, discharge book, or identity card should be carried by crew members.
**CONSULS**: None.
**REPAIRS**: Small repairs such as welding, brazing, lathe work, etc. can be carried out, but only when essential to allow vessel to proceed on voyage. Main engines cannot be immobilised whilst the vessel moored to any section of buoy system.
**DRY DOCKS**: None.
**REPATRIATION**: Repatriation can be arranged. No facilities for crew changes.
**AIRPORT**: No airport at Ocean Island.
**TIME**: GMT plus 11½ hours.
**HOLIDAYS**: Christmas Day, New Year's Day, and Good Friday normally closed holidays. Other National holidays occur during year but normally work carries on, on these days.
**POLICE/AMBULANCE/FIRE**: All emergencies handled by Harbour Masters, one of whom remains aboard vessel throughout time vessel attached to mooring system.
**TELEPHONES**: Telephones are put aboard for use of island staff working vessel.
**GENERAL**: Shore labour normally boards vessel with pilot to assist in mooring to buoy system.
**SERVICES**: No special services available.
**SHORE LEAVE**: This may be granted at discretion of Master, but should in all cases terminate at 1700.
**REGULATIONS**: No vessel may immobilise main engines whilst moored to buoy system. Main engines should be on instant readiness, deck power should be available at all times, and vessel must proceed to sea when instructed to do so by Harbour Master.
**DELAYS**: Normally no delays expected. Vessels could wait a day or possibly two due to port congestion, but this seldom happens; delays can occur due to adverse weather, duration of which unpredictable.
**AUTHORITY**: The Harbour Master, appointed by The British Phosphate Commissioners, Ocean Island. Telegraphic address "Phoscom Ocean Island".

## Oman, (Sultanate of)

### MINA-AL-FAHAL: 23.39 N. 58.32 E. (See Plan)

**DOCUMENTS**:
- 2 copies Crew Lists.
- 2 copies Medical Attendance Forms required for ship's crew visiting doctor.
- 1 copy Arrival Report form (supplied by Berthing Master).
- 2 copies Maritime Declaration of Health.
- 3 copies Mail Lists.

**PILOTAGE**: The Berthing Master will board incoming tankers in position with Fahal Island lighthouse bearing 285° from seaward distance 2 miles. Tanker should arrive at this position, make a good port lee, and take way off.

Harbour steaming is deemed to start at this point. The port side derrick should be rigged and crew standing by at the derrick ready to lift the mooring equipment from the launch when the Berthing Master comes on board.

The pilot access should be in good condition, clean and ready on the port side. Tankers of 70,000 tons summer deadweight and above in ballast or partly loaded condition should have either a pilot ho or a combination of accommodation ladder and pilot ladder rigged.

**ANCHORAGE:** If a tanker is required to anchor this information will be passed on the VHF radio. The normal anchorage position for tankers is 1 mile E.S.E. of Fahal Island. A prohibited area is enclosed by the parallel, 23° 40′ N., and the coastline and the meridians 58° 30.8′ E., and 58° 32.2′ E. This area should not be entered unless a Berthing Master is on board.

**RESTRICTIONS:** Open sea approaches.

**MAX. SIZE:** No length limitation. Draft up to 80 ft. Tankers up to 500,000 dwt. can be accommodated.

**HEALTH:** When advising ETA, include in message whether any sickness on board.

**RADIO:** ETA messages should be sent to Petro Muscat via Muscat Radio (call sign A4M). If no contact can be established with Muscat Radio, the message should be sent through an alternative coast station such as Bahrain Radio.

The message should contain the following information.

(a) ETA in local time and date in plain language to avoid mutilation.
(b) Whether there is any sickness on board.
(c) Whether any crew require medical treatment and very briefly the nature of the complaint.

VHF communications should be established as early as possible with station, call sign Fahal Control on Channel 16. The range of the station is approximately 50 miles but may be reduced to 20 miles when approaching from the Eastwards, due to screening effect of the mountains. A 24-hour watch is maintained by this station which uses Channel 20 as a working frequency, which can also be used for telephone link calls.

The mooring launches are equipped with Channel 16 and a Working Channel 6, call sign Fahal Pilot.

**TUGS:** None available and not required.

**BERTH DESCRIPTION:** Three single buoy moorings with floating hose strings.

No. 1 SBM is for crude oil export, marine fuel import and export.

No. 2 SBM is for crude oil export and marine fuel oil export. No. 3 SBM is for marine fuel export only. The Western Coastal Tanker mooring is for the import of bitumen, the Eastern mooring for the import of white-oil products.

*SBM No. 1:* Two by 810 ft., 20-in. crude oil hoses, reduced to 16 in. at manifold connection; two by 840 ft., 8-in. bunker fuel hoses terminating in single hose for manifold connection.

*SBM No. 2:* The position of the new SBM is 23° 39.93′ N. 58° 32.15′ E.

SBM No. 2 can now accommodate tankers up to 500,000 dwt and allow a draft of up to 80 ft. A 40-in. crude oil pipe-line and two 10-in. bunker lines will provide the crude oil and the bunkers.

*SBM No. 3.* Two by 720 ft., 8-in. hoses terminating in a single hose for manifold connection.

*Loading Rates.* Crude oil loading is by gravity only. Bunker fuel delivered by pumps. Max. crude loading rates up to 9,000 t.p.h. Bunker fuel discharging rate up to 3,000 t.p.h. at Berth No. 1. Bunker fuel loading rate up to 500 t.p.h. at all berths.

**BERTHING:** Vessels berth head on to buoy. Two 12 in. 110 ft. (150 ft. at SBM No. 1) nylon lines from buoy are secured on forecastle head, using equipment provided by Terminal. A suitable messenger rope should be ready for use (provided by the ship). No moorings aft. Berthing Master will advise mooring procedure.

**HOSE CONNECTIONS:** Amidships. Derrick must plumb over manifold and have minimum SWL 5 tons with equipment in good condition. Any reducers required will be supplied by Terminal. Connecting and disconnecting by ship's personnel with advice from Berthing Master's Assistant.

**BALLAST:** No facilities for reception of dirty ballast.

Tankers should arrive with clean ballast, lines and pumps and no oil should be released into the sea.

**MEDICAL:** Medical treatment can be given by Petroleum Development (Oman) Ltd.'s medical staff to crews of ships on Time Charter to Shell International Marine on ships using P.D. (O) Ltd.'s tanker agency facilities. A charge of R.S. 25 is made per round trip for launch hire and transport facilities. No dentist is available. Emergency treatment only can be carried out at the P.D. (O) Ltd. Hospital.

**REPAIRS:** It is not permitted to immobilise main engines whilst moored to the SBM's; under no circumstances should the propeller be turned in the ahead direction.

**DENSITY:** Approximately 1026.

**FRESH WATER:** Not available.

**FUEL:** Fuel oil only available. Lubricants, quantity limited, supplied in drums only.

**REPATRIATION:** Crew changes are possible at Mina-al-Fahal provided the Agents receive 72 hours notice (excluding Fridays and holidays) giving full particulars of embarking/disembarking crew, such as full name, nationality, place and date of birth, passport/seaman's book number with date and place of issue and expiry date, and also destination for repatriation of disembarking crew members, to enable Agents to obtain necessary permits and arrange air passages.

*N.B.* If the information required as above is received on a Thursday or a day preceding a holiday, the time mentioned of 72 hours will not be sufficient as no permits can be obtained from the Authorities during holidays.

**TIME:** GMT plus 4 hours all year round.

**SHORE LEAVE:** Not possible.

**GENERAL:** *Liquor.* Trading in liquor strictly prohibited and no alcoholic drink should be offered to Arab nationals.

*Cargo Ships.* Will anchor in one of following positions: (*a*) Fahal Island bearing 340 degrees (True) distance two miles. Water depth 42 ft. (*b*) Fahal Island bearing 350 degrees (True) distance 1¾ miles. Water depth 42 ft. (*c*) Fahal Island bearing 340 degrees (True) distance 1½ miles. Water depth 57 ft. The Portmaster will allocate an anchorage to incoming vessels.

**DEVELOPMENTS:** From the 1st Ocober 1973 the prohibited area, within the Port Area of Mina-al-Fahal, will be extended northward to the parallel of latitude 23° 40.8′ N. The Eastern and Western extremities will remain as at present, viz. longitudes 58° 33.2′ E. and 58° 30.8′ E. respectively.

The new position of SBM 2 will be approximately 013° × 3,800 ft. from its present position, or with Fahal Island lighthouse 292° × 2·27 miles.

Tanker and cargo ship anchorage positions will be changed to the following bearings (from seaward) and distances from Fahal Island lighthouse:

| *Tankers* | | *Cargo Ships* | |
|---|---|---|---|
| A | 330° × 1·0 n.m. | I | 340° × 2·0 n.m. |
| B | 000° × 1·0 n.m. | II | 350° × 1·75 n.m. |
| C | 030° × 1·0 n.m. | III | 340° × 1·5 n.m. |
| D | 060° × 1·0 n.m. | IV | 010° × 1·5 n.m. |

Ships proceeding to an anchorage within the Port Area should pass North of Fahal Island and under no circumstances enter the prohibited area unless accompanied by a Mina-al-Fahal Berthing Master.

Ships arriving at Mina-al-Fahal should contact "Fahal Control" on VHF Channel 16 as early as possible, requesting instructions.

**AUTHORITY:** Petroleum Development (Oman) Limited, PO Box 81, Muscat, Sultanate of Oman. Cables: "Petro Muscat". Telex: Muscat Petro MB212.

**AGENT:** See Mutrah (Mina Qaboos). Petroleum Development (Oman) Ltd. can also act as Agent.

## MINA QABOOS (Mutrah): 23.37 N. 58.36 E. (See Plan)

Muscat has ceased to be a commercial port and instead vessels now call at Port Qaboos.

**PORT LIMITS:** From the level of high water springs at a point near Ras Kab at longitude 58° 33·2′ East on a line due North to latitude 23° 41′ North;
Thence due East to longitude 58° 35·6′ East;
Thence due South to Ras Muscat on Jazirat Muscat;
Thence in a generally Southerly direction by the line of high water on the Western side of jazirat Msucat to Pinnacle Rock;
Thence in a straight line approximately South—westerly to the easternmost point of Siraz al Gharbiyah;
Thence by the line of high water springs to the point of commencement.

**DOCUMENTS:**

*Required on Arrival:*
2 Copies Crew List.
1 Copy Maritime Health Declaration form with ports of call from commencement of voyage.
1 Copy Vaccination List.
3 Copies Passenger List.
3 Copies in transit Passenger List.
3 Copies Cargo Manifest.
3 Copies Hatch List.
4 Cargo Stowage Plans.
5 Hazardous Cargo Lists.
5 Heavy Lift Lists.

*To be airmailed in advance:*
7 Copies Cargo Manifest.
1 Copy Freight Manifest.

**PILOTAGE:** Available and compulsory.

**MAX. DRAFT:** 29 ft. at LW.

**TUGS:** Available.

**RADIO:** Muscat Radio (call sign A4M) keeps a listening watch on the international R/T call frequency of 2182 kHz. This service is available during the period 0800–1400 and 1530–1800 local time, Saturday/Thursday and 0800–1400 on Friday. Range 200 miles.

Ship-shore radio service: Hours of working to ships 0300–1700. Telex service (MB 209 a/B MCT RX) 24 hours. Range of station (H/F) 1,000 miles. Station will accept traffic for ships via telex from all countries.

**BERTHING:** *Small craft Pier:* For vessels drawing up to 14 ft. draft.

Berth No. 3. Depth 18 ft. at LW.
Berth No. 4. Depth 24 ft. at LW.
Berths Nos. 5–9. Depth alongside varies from 30 ft. to 36 ft.
Also see "Developments".

**CRANES:** Nine mobile cranes available from 2 tons to 35 tons.

**STEVEDORES:** The labour position is fair, except in the date-picking season June to August.

Total of 9 barges are available for landing cargo ex vessels. Landing rates: bagged cargo 4/600 tons per day; general: 200 tons per day; timber 100/150 tons per day during fair weather provided no congestion on jetty or in the bay and if cargo stowed in more than three hatches.

*Working Hours:* Saturday to Thursday inclusive. 1st shift 0700–1300, 2nd shift 1500–1900. Overtime work is possible.

**FRESH WATER:** Not available to vessels at anchor. Sometimes small quantities of fresh water are available at the berth. Delivery is by truck at a rate of 5/10 tons per day.

**FUEL:** Heavy fuel oil is available at Mina-al-Fahal but for tankers only, stem should be made through Shell London. However, this facility in emergency cases is made available to dry cargo vessels provided that the vessel is able to go alongside the buoy without assistant. Lub. oil and gas oil drums are available to all vessels.

**WATCHMEN:** A Customs watchman will be present on board throughout the stay of the vessel in port, and the vessel must provide him with food and accommodation during the stay. The same is applicable in the case of tally staff.

**REPATRIATION:** Is now possible if Masters give full particulars of the seamen to be repatriated by telegram at least 72 hours earlier. This also applies to embarking crew members. The 72 hours notice is not enough in the case of a Friday, or any other holiday falls in between.

See also "Mina-al-Fahal".

**DEVELOPMENTS:** The first stage provided for the construction of two lighter berths of 1,000 ft. total length, with 14 ft. depth at LWS; a rock armoured breakwater approximately 1,500 ft. long for the protection of the lighter berths two transit sheds 250 ft. × 80 ft. Administration Building, Passenger Building, Police and Dock Harbour Office and Ancillary Services. This is now complete.

The second stage will include the construction of a 2,300 ft. long rubble mound breakwater, armoured with 15-ton concrete armouring units on the seaward side; eight berths of a total length of 5,000 ft. with a water depth varying from 24 ft. (min) to 48 ft. (max), which includes a berth 750 ft. long with a 33 ft. average depth with open handling facilities suitable for large pipes and other bulk cargoes. This berth could also be developed for handling container traffic.

**DELAYS:** Every vessel should expect a delay of 3/4 days. Vessels berth in turn.

**GENERAL:**

*Ships arriving at Mina Qaboos:*

Ships may approach Mina Qaboos without a Pilot as far as the perimeter of the limits of the port. No ship shall proceed through the entrance to or from the port without the permission of the General Manager or the Harbour Master.

All ships, other than expected ships, shall be under the pilotage of a Pilot appointed by the Port Authority when under way within the limits of the port. The ship shall have rigged and ready for use a pilot ladder of modern pattern, in good repair and provided with reliable manropes. Such pilot ladder shall be well illuminated between dusk and daybreak. The ship shall have a boat-rope ready rigged from the break of the forecastle to abaft the pilot ladder.

No ship shall enter or leave Mina Qaboos unless her draft marks are correctly shown and clearly visible.

Every ship shall at all times when entering, navigating in or leaving the port have both anchors ready for immediate use.

Ships proceeding to berth at the port premises shall have no list and shall be trimmed upright.

Before entering Mina Qaboos every ship shall hoist the following flags: The ship's signal letters. The "Q" flag, International Code, unless the Port Health Officer has previously given pratique. The "H" flag, International Code, denoting that a pilot is onboard. The "I" flag, International Code, if the ship is carrying passengers.

Until pratique has been granted communication between ship and shore shall be by: Flag hoist, using the International Code of signals, Mose code, by signal light, or radio-telephone on approved frequencies, which will be promulgated for use for such purpose.

*Conduct:* The Master or Owner of every ship shall be held directly responsible for the proper conduct and behaviour of the crew of such ship while in the port and for strict observance of the laws of the Sultanate of Oman, particularly those laws concerning the sale, transference or consumption of any narcotic or of alcoholic or intoxicating drink of any kind.

*Flags:* Every merchant ship within Mina Qaboos between the hours of sunrise and sunset shall fly her national flag and the national flag of the Sultanate of Oman.

*Repairs:* The Master of any ship wishing to carry out major engine repairs or adjustments, which will affect the mobility of the ship whilst in the port shall make written application to the Harbour Master so to do. The Harbour Master shall give his permission or otherwise in writing.

*Safety of ships and persons:* The Master of every ship anchored or moored in the port or berthed at the port premises shall, unless the Harbour Master concede some relaxation in this port rule, at all times retain on board sufficient crew to work or move the ship.

*Ships berthing and unberthing at the port premises:* No person shall swim from any ship berthed at the port premises.

No person shall make fast or anchor any country craft or boat of any kind at any quay, wharf, pier or landing place or at any steps provided thereat in the port premises except with the prior permission of the Harbour Master.

*Pollution:* It shall be unlawful to throw, discharge or deposit, or cause, suffer, or procure to be thrown, discharged or deposited, either from or out of any ship, barge or other floating craft of any kind, or from the shore, wharf, manufacturing establishment or mill of any kind, any refuse matter or other substance of any kind or description whatever into the waters of the harbour; and it shall be unlawful to deposit, or cause, suffer or procure to be deposited, material or any kind in any place, or on the bank of any water, where the same shall be liable to be washed into such water, either ordinary or high tides, or by storms or floods or otherwise, whereby navigation within the corporate limits of the harbour shall or may be impeded or obstructed, provided that nothing herein contained shall extend to, or apply to, or prohibit operations in connection with the improvement of the port of Qaboos or the construction of public works considered necessary and proper by the Port Authority and provided further than nothing herein contained shall extend to, apply to, or prohibit the depositing of any material above mentioned in such navigable waters within such limits as may be defined, and under such conditions as may be prescribed by the proper office the Sultanate of Oman.

It shall be unlawful for any person, firm, or corporation to depo place, or discharge into the waterways of Port Qaboos, either dire or through private or public sewers, any sanitary sewage, butch offal, garbage, dead animals, gaseous liquid or solid matter gasoline, residium of gas, calcium chloride, trade waste, tar or ref or any other matter, which is capable of producing floating ma or scum on the surface of the water, sediment in the bottom of waterways, or the odours and gases of putrefaction.

Vessels discharging ballast, oil from bilges or tanks or s matter into the waters of Port Qaboos will be reported to the pollu control officer and be subject to a fine of R.O. 500.00 for each offer imposed by and payable to Port Qaboos. Such fine shall be in a tion to any other fines, which may be levied for the same offe by the Sultanate of Oman.

*Ships Leaving Mina Qaboos:* Port Rules applying to ships arri at Mina Qaboos apply equally, in so far as they are relevant, to sh leaving the port.

Merchant ships shall fly the "P" flag International Code, fo hours before sailing from the port.

The Port Authority may refuse to give the Master of any s outward clearance, unless and until all charges due in respec the ship and any penalties, to which the ship or her Master are have been paid or secured to the satisfaction of the Port Autho

*The Working of Cargo at Mina Qaboos:* Ships may be permitte discharge or load cargo in the anchorage if a berth is not avail at the port premises or if in the opinion of the Port Authority ship's cargo is more suitable for handling to or from barges or light

The Master or Owner of any ship shall be held responsible any loss or damage arising from careless or improper slingin cargo onboard such ship.

Any cargo, cargo-handling equipment or ship's gear, which be dropped overboard shall at once be reported by the Maste appointed officer to the Port Authority and shall be immedia recovered by the ship's personnel if it is reasonably possible so to Failing this, it may be recovered by the Port Authority at the sh expense. The Port Authority shall not be responsible for any dam to or loss of cargo, equipment or gear so recovered.

The Master of every ship discharging or loading cargo in the p whether at anchor or berthed alongside shall provide drinking w for all cargo handling labour and all other persons appointed directed to be on board such ship in connection with the discha or loading of cargo.

If the labour or transport allocated or engaged for the purpos landing, loading or transshipping cargo from or to any ship is fully continuously employed by reason of a fault or action attribut to such ship, the expenses incurred thereby shall be paid by s ship.

In the event of any accumulation of cargo or goods upon the q or jetty or in a lighter for any cause that may appear reasonabl them, the Port Authority may require the ship discharging s cargo or goods to suspend or reduce the rate of discharge of s cargo or goods.

The Port Authority may refuse to permit cargo to be landed from ship until suitable shed or open storage space or other accommo tion is or becomes available for such cargo.

Delivery of cargo or goods shall not be deemed to have been m to the Port Authority until such cargo or goods have been brou into the port premises and until the Port Authority accepted deli of such cargo or goods and have issued an official receipt ther to the Master of the ship discharging such cargo or goods or to ship's agent or to any other person duly authorised so to do, c veying such cargo or goods to the port premises.

**SHIPMASTER'S REPORT:**

The following information, obtained locally is given in good fa

The port is scheduled to become fully operational on 1st 1974, when Pilots and two large tugs will be available. The harb still under construction, is very modern in layout, and the jetties solid concrete, well fendered and spacious. There is no ca handling gear except mobile cranes and fork-lift trucks, on wh latter the port depends at the moment. There are ten berths, b have no information about depths except the berth occupied by vessel. I understand that it is hoped to make this a transhipm port, ocean-going vessels discharging cargo for transport into Gulf by coaster.

Bunkers will be available, but no details are yet known. Fresh w piping is laid to the jetties, but there is none yet available, excep emergency, when it can be supplied by hand pump from 250-ga trucks, at about £2·50 per ton. Shore leave is permitted. Repatria is possible, and presumably crew changes will be. There is a Bri Embassy.

Formalities are minimal, Port Health requiring only the usual he form and vaccination list, and Immigration require crew lists. Th are no Customs documents or formalities required at present, no doubt this will follow. There is no port VHF radio as yet; I presu that this will be established in due course, but VHF communica with Agents is good.

The berth occupied by the vessel was No. 5, 600 ft. long with 3 of water alongside. Entry and sailing is permitted during day only, the unlighted buoy off the breakwater end marking the chan

Berthing was carried out by turning short round on the starbo anchor, textbook fashion, between the entrance and the berth, then dropping alongside port side to, finishing with 3½ shackles cable out. Stern anchor was ready for dropping in case of emerge both entering and leaving. No tugs were available to assist in turn the only assistance provided being a launch to run mooring lines and an interpreter to shout at it.

Local Agents provided a launch so that I could at least view the harbour before berthing, and both berthing and unberthing were without incident.

**AUTHORITY:** General Manager, Qaboos Port Authority, P.O. Box 133, Muscat, Sultanate of Oman.

**AGENT:** Gulf Agency Co. (Oman) Ltd., PO Box 1033, Mutrah, Sultanate of Oman, Tel. 3165. Telex Muscat MB-284. Cables "Confidence", Muscat. VHF Channel 16. Call sign "Confidence Muscat".

## MINA RAYSUT (Salallah): 16.56 N. 54.01 E.

**PORT LIMITS:** The water limits of the port are bounded by the parallels of 16° 55′ 30″ N. and 16° 56′ 50″ N., and by the meridian 54° 01′ 30″ E. to the Eastward. To the West the limit follows the coastline from its Northern interception with the headland of Ras Raysut.

The land limit to the Port Area follows the line of the outer security fence across the neck of the Ras Raysut headland.

**DOCUMENTS:** See "Mina Qaboos".

**PILOTAGE:** Compulsory, except for vessels less than 100 n.r.t., Harbour Authority craft and vessels of the Oman navy.

**RADIO:** Masters of all vessels having business within the port shall whenever possible give to the Harbourmaster 24 hours' notice of the intended time of arrival.

Notice can be given either by cable via the Cable and Wireless Signal Station at Muscat, or by direct radio-telephone call to Raysut Harbour Control. Listening watch is kept on 2182 kilocycles during working hours.

**BERTHING:** Incoming vessels are assigned berths on a turn basis subject to operational requirements and the Harbour Master's discretion.

The berth is 350 ft. in length and depth alongside 15 ft. (19 ft. at HW). Vessels of 1,500 dwt have berthed. Larger vessels discharge into barges.

**BARGES:** The two 350-ton port barges used by ocean-going vessels in the deep water anchorage will be charged at the rate of: 500 Baizas per ton of cargo loaded, such charges to be paid by the ship or her Agent before the ship's departure.

**STEVEDORES:** The normal working hours both ashore and afloat from Saturday to Wednesday are 0700–1200 and 1300–1600. Thursday from 0700–1200.

Working hours are subject to change during the month of Ramadan.

Overtime will be charged for all hours worked outside normal working hours. Overtime is not normally worked on Friday afternoon or at night time.

**FRESH WATER:** Available.

**REGULATIONS:** No vessel shall enter the Port Area unless authorised by the Harbour Master. The Harbour Master may, at his discretion, refuse to allow vessels, with the exception of vessels in distress, to enter the Port, and may order from the Port any vessel, with the exception of vessels unfit for sea, which does not have business within the Port, or is in breach of these Regulations.

No vessel shall anchor, or weigh anchor or move within the Port Area except when and where required by the Harbour Master.

No water ballast which is not free from oil or other harmful contaminants, shall be discharged into the waters of the Port Area. In case of the pumping of bilges or pollution by oil or harmful contaminants, into the waters of the Port Area, the vessel will be responsible for any fines imposed by the Harbour Authority and any compensation or other damages.

Should fire break out aboard any vessel the Master should make an immediate signal either by a continuous sounding of long or short blasts on the ship's whistle or siren, or by ringing of a fire bell.

In cases of adverse weather it is the sole responsibility of the Harbour Master to decide whether the sea conditions are suitable for handling cargo with barges in the Anchorage, or whether the day will be declared a "weather non-working day".

Masters shall be responsible for the adequate provision of safety equipment and lights on board whilst cargo is being handled.

Conveyance of alcoholic liquor, other than manifested cargo under Customs supervision, from any vessel to the shore or from one vessel to another is prohibited.

No unauthorised person may enter the Port Area. Visitors to vessels are prohibited except by permission of the Harbourmaster.

Ship's personnel and passengers are not permitted ashore except by permission of the Immigration Authorities and the Harbour Master.

**FLAGS:** Every merchant vessel in port shall fly her national flag, and the national flag of Sultanate of Oman, between sunrise and sunset.

**AUTHORITY:** Raysut Harbour Authority.

**AGENT:** See "Mina Qaboos".

# Pakistan

## KARACHI: 24.52 N. 67.00 E.

**DOCUMENTS:** *Required before vessel's arrival:*

2 copies Freight Manifest.
2 sets Bills of Loading.
3 copies Stowage Plan.
2 copies Passenger manifests.
3 copies Cargo Manifest.
3 copies Hatch Lists.
1 copy Exception Lists.
6 copies Passenger Lists.

*With vessel:*

2 copies Cargo manifest.
Last Port Clearance Certificate.
6 copies each Passenger List, disembarking and transit.
2 copies List of favour parcels.

The following special Pakistan forms are brought on board by Agent for completion on arrival:

2 Customs Arrival Reports.
2 Opium and Dangerous Cargo Certificates.
2 Ship's Currency Lists.
6 Deck Cargo Certificates.
1 Company's Arrival Report.
1 Ship's Crew Advance (if required).
1 Expiry date of Ship's Certificate.
1 Same Bottom or Intransit Cargo.
1 Water Indent.
*10 Crew Lists.
3 Stores Lists.
3 Property Lists.
7 Cargo Gear Information Forms.

* If this is ready prior to arrival, please attach to this form.

**PILOTAGE:** Pilotage is compulsory for ship of 200 nrt and upwards. Pilot boards at the Outer Anchorage.

Vessels are piloted day and night, subject to tides, length and draft, to berths lying on the East and West of the fairway, which is 4·27 miles long. Pilotage distance is about 5 to 6 miles.

**ANCHORAGE:** Outer Anchorage where ships await berth safe except during the S.W. monsoon from mid-May to September. During monsoon no anchorage is recommended. Vessels should anchor a safe distance outside the breakwater within Lighthouse bearings 045 and 025. Depth of water at the anchorage is about 9 fathoms.

**RESTRICTIONS:** Datum depth is 27 ft. Vessels with a draft in excess of 32 ft. are not permitted to enter Karachi due to varying depths at berths, and silting in the ship channel.

Berthing at any time, except vessels with bridge aft which permitted daylight only.

Sailings permitted during flood tide only. Tankers with LOA over 525 ft. Permitted to sail on flood tide during daylight hours only. Vessels with bridge aft permitted to sail on flood tide during daylight hours only.

**MAX. SIZE:**

| | *Length* | *Draft* |
|---|---|---|
| Bulk carriers and general cargo (dry cargo) | 945 ft. | 32 ft. |
| Bulk oil tankers, white oil product | 550 ft. | 32 ft. |
| Bulk oil tankers, black oils. | 650 ft. | 32 ft. |

**PRATIQUE:** The Port Health Authorities give automatic clearance on receipt of a "clean" standard quarantine message and this will be conveyed by the Pilot. However, ships from Yellow Fever areas must be cleared during daylight hours by the Port Health Officer on arrival alongside. On sailing to ports outside India and Pakistan, a medical inspection takes place on the day before sailing. It is, in theory, necessary for a members of the crew to be present at this inspection, although usually the inspection is only a formality. All vessels required obtain Immigration Clearance on arrival.

All vessels which have touched any port or ports between Port Sudan and Durban, on the East Coast of Africa, including these ports, are considered "suspected" vessels on account of yellow fever and jigger and may not have communication with the shore till cleared at berth by the Port Health Office, who attends only between sunrise and sunset, except in special circumstances. The incubation period for yellow fever under the rules is given as 9 days, but vessels arriving later than 9 days are still not free from quarantine because there is no incubation period for jigger.

**RADIO:** Port Authorities equipped with VHF radio-telephone, calling Channel 16, working Channel 12. Control Station call sign "Manora Pilot Control".

Vessels should establish radio contact with control station as soon as they are within VHF range.

Use of Channel 12 is restricted to the following: Ships while entering harbour are to maintain watch on Channel 12 as soon as pilot boards. Ships in harbour scheduled to sail are to keep a listening watch half an hour before sailing till their clearance from the port.

**TUGS:** Towage is rendered by Port Trust tugs on signal from Pilot. Towage is not provided outside the breakwater except in very special circumstances at the direction of the Deputy Conservator. There are 7 diesel tugs, all owned by the Port Trust.

**BERTHING:** *East Wharf:* Seventeen berths, total quayage 8622 ft. Berth Nos. 5 to 17 are on a concrete quay wall of the latest type. All berths are rail-served. Berth lengths vary from 430 ft. to 550 ft. and depths from 26 ft. to 32 ft.

*West Wharf:* Seven berths on a concrete quay wall. There are three berths of 575 ft. and one of 600 ft. Depths vary from 31 ft. to 32 ft.

*Bulk Oil Pier and Extension:* Three berths, 403 ft., 664 ft. and 1,000 ft. with depths of 29 ft. 3 in., 31 ft. 0 in., and 36 ft. 0 in. respectively. Berths lie in a North-South direction on the Eastern edge of the channel.

*Lighterage Berths:* Two lighterage berths of 600 ft. length each. These berths have depths of 24 ft. alongside, and can easily accommodate small medium draft sea-going ships.

**STEVEDORES:** Working Hours: Monday through Thursday and Saturday, day shift: 0730–1130 and 1230–1630. On Fridays day shift: 0730–1230 and 1400–1630. Mondays through Saturday, night shift: 1900–2300 and 2300 to 0330 next day.

Overtime periods: 0330–0630, 1130–1230, 1630–1830.

**TANKERS:** Mineral oils discharged at the Bulk Oil Pier, three berths, and at West Wharf berth 20. Heavy grades may be discharged at the steamer wharves but dangerous petroleum only at the Oil Pier.

Vegetable oils are handled at both the terminals mentioned above, and at East Wharf berth 9.

*Slop reception facilities:* Not available.

**FRESH WATER:** Available ex-wharf or by barge.

**FUEL:** In addition to coal, three grades of petroleum are available-furnace oil, light diesel oil and high speed diesel oil. Furnace oil can be supplied by pipeline at all berths Light diesel only at berths 1 to 4 At other berths supply is made by tank wagons and lorries. Large quantities can be supplied by pipeline at the Bulk Oil Pier only.

**REPAIRS:** Repairs can be carried out at the anchorage except in the monsoon season. Two ship repair jetties are available in the port. In addition, Karachi Shipyard and Engineering Works Ltd. provide all kinds of repair and ship-building facilities.

**DEVELOPMENTS:** 1. Dredging and widening and deepening of channel to 34 ft. below datum.

The scheme for the provision of 4 medium draft berths in continuation of the lighterage berth and 4 more berths in line with the Oil Pier is under construction.

**HOLIDAYS:** Eid-ul-Azha; Muharram; Defence of Pakistan Day (23rd March); Eid e Miland un Nabi; Independence Day (14th August) Defense of Pakistan Day (6th September); Jamat-ul-Wida; Eid-ul-Fitr; Anniversary of Death of Quaid-e-Azam; Christmas Day (25th December).

**TIME:** GMT plus 5 hours all year round.

**AIRPORT:** Karachi Airport, seven miles from city. International connections to all parts of the world.

**SHORE LEAVE:** Shore passes are granted by Immigration Authorities when they first go on board and must be returned on departure of the vessel. These passes permit entry/exit to the docks until 11 pm. This latter regulation is not strictly enforced.

Indian crew are not allowed ashore except in emergency. An Immigration policeman will remain on board in port where Indian crew are carried. This policeman will ask for some sort of accommodation. This need only be given if it does not cause inconvenience to the ship.

**AUTHORITY:** Karachi Port Trust, POB 4725. Cables: "Porttrust Karachi".

# Panama

## ALMIRANTE (Chiriqui): 09.17 N. 82.23 W.

**DOCUMENTS:**

Clearance from Last Port.
Health Declaration.
1 Vaccination List.
10 Crew Lists.
6 Passengers Lists (or negative).
6 Ship's Provisions Lists.
6 Cargo Manifests (or Manifest of Ballast).
(Crew Personal Effects declaration is not required.)

**PILOTAGE:** Pilots are stationed at Boca del Toro town. There are three Pilots, working on daylight only. Pilotage service is compulsory, and arranged by the Agent. Three long blasts to call the Pilot on arrival. Pilot ladder on port side. The small pilot launch meets vessels off Cape Toro. This launch is white wooden hull, with a "P" on her bows. Speed limitations from Cape Toro to Mangrove Pt. due to depth. Pilot will remain on board until vessel leaves.

**ANCHORAGE:** It is recommended with Cape Toro bearing from 150 to 180 degrees and eight cables off.

**RESTRICTIONS:** Draft up to 22 ft. Minimum depths between buoys "A" and "B", 28 to 29 ft. Normal head swell about 5 ft.

*Shipmaster's Report:* The water depths on passing Bocas del Toro is above 30 ft., as long as you follow the charted courses lines.

Proceeding at a reduced speed consisting of "dead slow" and "stop", with enough manoeuvrability, to minimise the vessel's pitching, you can enter or leave the Bocas del Toro with a draft of 26 ft. without any difficulties.

On entering and leaving, I was forced by cargo circumstances to do it with a 26 ft. deepest draft, and never got less than 10 ft. below my vessel's keel (deepest section), in low water.

**HEALTH:** Pratique given by doctor who boards on arrival. In case suspected disease on board, radio Agent in advance, advising details.

**RADIO:** Cables to and from Agent, via stations operated by Tropical Radio Telegraph Co., preferably Ojus Radio/WAX or WNU. VHF – not available.

**TUGS:** Not available.

**BERTHING:** One banana pier, 650 ft., with four elevators. One general cargo pier, 350 ft. Starboard side alongside. Maximum draft alongside these piers 32 ft., but draft limited to 26 ft. at the entran (Boca del Toro).

**STEVEDORES:** Agent has responsibility of making all arran ments for loading and unloading, stevedores working around clock.

**FRESH WATER:** Fresh water is limited. It is restricted fr December to April. Loading rate from the quay 2 tons per hour.

**FUEL:** Not available.

**REPAIRS:** No repairs can be carried out.

**FRESH PROVISIONS:** It is almost impossible to get them.

**TIME:** GMT minus 5 hours.

**CONSULS:** The following countries are represented: Costa Ri El Salvador, Honduras and Nicaragua.

**MEDICAL:** All facilities available.

**CUSTOMS ALLOWANCES:** No restrictions as far as nothing taken out the vessel.

**TELEPHONES:** Not available.

**OPENING/CLOSING HATCHES:** Performed by ship's crew stevedores if required.

**GANGWAY/DECK WATCHMEN:** Available from shore required.

**DENSITY:** About 1005.

**SHORE LEAVE:** Allowed, no restrictions.

**POLICE/AMBULANCE/FIRE:** Telephone on the quay, connect to the exchange.

**REPATRIATION:** Can be arranged without difficulty.

**AIRPORT:** Domestic flights airport about 20 km. distance.

**AUTHORITY:** Capitania del Puerto.

## BALBOA: Canal Zone, 08.58 N. 79.34 W.

(N.B. For items not listed below, see "Panama Canal".)

**RESTRICTIONS:** Port open throughout 24 hours.

**MAX. SIZE:** Harbour limitations generally unrestricted as length and beam. Depth about 40 ft. low water. Vessels in exce of 38 ft. 6 in. draft not handled during period 2·5 hours before an 2 hours after low water.

Tankers working cargo restricted to 700 ft. length and 36 ft. s water draft.

**TUGS:** Available and assigned for berthing by Pilot. Tug's line used at no extra charge.

**BERTHING:** No specific requirements as to arrival times. Ni berths available.

(Pleasure yachts under 65 ft. length, may be permitted to dock Panama Canal Yacht Club or Balboa Yacht Club after clearance b boarding officer and after Master has received permission from Por Captain, Customs authorities and Yacht Club officials concerned Chief Customs Inspector shall have authority to grant or deny suc permission at his discretion.)

*Rodman Naval Station:* Piers can accommodate vessels of 700 length and up to 39 ft. draft for oil discharge, bunkers or stores.

*Panama Canal Co. Dock*

| *Dock* | *Usable length* | *Maximum S.W. draft* |
|---|---|---|
| 4 | 492 ft. | 30 ft. |
| 6 | 742 ft. | 36 ft. |
| 7 | 1,058 ft. | 34 ft. |
| 8 | 470 ft. | 26 ft. |
| 14 | 775 ft. | 36 ft. |
| 15 | 1,146 ft. | 40 ft. |
| 16 | 742 ft. | 38 ft. |
| 18 | 500 ft. | 39 ft. |
| 18 | 500 ft. | 35 ft. |
| 18 | 1,000 ft. | 40 ft. |

**STEVEDORES:** Endeavour arrange arrival to avoid cost of "stan by" as Agent arranges gangs for 0700 or 1700 commencement.

**TANKERS:** One berth for vessels up to 40 ft. draft.

**FRESH WATER:** Available.

**FUEL:** Bunker "C", diesel, light fuel and light diesel available Government wharves from commercial companies. Rate of deliver 2,000 bbls. per hour.

Vessel's personnel are to connect and disconnect all fuel lines aboard the vessel. The vessel is also to supply necessary fittings match U.S. standard 4 in. and 6 in. 150-pound flanges.

**REPAIRS:** Emergency repairs possible.

**DRY DOCK:** Length 1044 ft., generally reserved for Canal Compan vessels, but arrangements may be made for emergency dry-docking

**POLICE/AMBULANCE/FIRE:** Emergency tel. 110; routine Polic business 2–1277.

**TELEPHONES:** May be placed aboard through arrangement with Port Captain.

**SHORE LEAVE:** Generally permitted.

**CUSTOMS:** Customs and Immigration Inspection Service avai able Monday to Saturday from 0700 to 1700. Charges for suc service after hours and on Sundays and holidays set forth in Panam Canal Tariff. Number of inspectors required will be determined Chief Customs and Immigration Inspector of port.

**DELAYS:** Delays in berthing, load or discharge or bunkering minimal and infrequent. Eight hours is considered excessive.

**AUTHORITY:** Panama Canal Company, Balboa Hts., Cana Zone. Cable "Pancanco". Captain of the Port (Balboa): tel. 2-26

**AGENT:** C. Fernie & Co., Inc. PO Box 212. Cable Address: "Fernie Balboa". Also VHF. Telephone Nos.: Balboa 5657–5371. After offic hours telephone numbers: Panama 21–2629, Panama 22–1037.

All correspondence should be addressed to Cristobal, Canal Zon

## COLON: 09.21 N. 79.54 E.

**DOCUMENTS,** and all general information, refer to "Panama Canal".

**MAX. SIZE:** Colon Harbour restricted to vessels with draft of 31 ft. or less. Draft 30 ft. if vessel's LOA exceeds 650 ft.

**FUEL:** Delivered by barge from Refineria Panama.

## CRISTOBAL: Canal Zone, 09.21 N. 79.54 W.

(N.B. For items not listed below, see "Panama Canal".)

**PORT LIMITS:** Ship's arrival time is normally determined by their passage between the breakwater lights. Those that anchor outside the breakwater by arrangement with the Port Captain are timed as arrived when they drop anchor.

**PILOTAGE** (also see "Panama Canal"): Pilotage into Cristobal not compulsory, although services of Pilot outside breakwater are available on request.

Vessels arriving outside Cristobal Breakwater who have requested an outside Pilot are required to *heave to and make a good lee.*

A pilot ladder rigged with appropriate spreaders and well illuminated at night to be provided by vessel. Accommodation ladders not acceptable for embarking Pilots outside breakwater.

*Marine Director's Notice to Shipping Agents No. 8–74:*

1. A vessel shall, weather permitting, have both an accommodation ladder and a pilot ladder rigged and ready for use upon arrival in Canal Zone Waters.
2. The pilot ladder shall conform to Regulation 17, Chapter V of the International Convention for the Safety of Life at Sea 1960 (SOLAS) and to all additional recommendations of the International Maritime Consultative Organisation (IMCO).
3. The accommodation ladder may be turned in and secured after the Pilot has boarded the vessel in the anchorage, provided the freeboard does not exceed 9 m. (30 ft.). If the freeboard exceeds 9 m., the accommodation ladder may not be turned in until the last Panama Canal employee boards prior to arrival at the locks.
4. A pilot hoist may be used provided the design and construction of the hoist and ancillary equipment are of such a standard as to ensure an effective and safe means of embarkation and disembarkation. The pilot hoist should only be used when:
   (a) A conventional pilot ladder is rigged and ready for immediate use but triced up well clear of the hoist;
   (b) A lifeline attached to a safety stop and a lifebuoy fitted with a self-igniting light are ready for immediate use.

**ANCHORAGE:** Vessels will ordinarily proceed to anchorage area according to length and draft unless otherwise directed. Arriving vessels expected anchor as far to South and inward from main channel in their anchorage area as is consistent with safety. Vessels anchoring in non-designated areas may be required to move.

*Anchorage Area "A"*. For all ships with a deep salt-water draft of not less than 34 ft. and not in excess of 39 ft. Minimum charted depth is 40 ft.

This area starting at Lat. 9° 23′ 21″ N., Long. 79° 55′ 21″ W.,
thence to Lat. 9° 22′ 48″ N., Long. 79° 56′ 15″ W.,
thence to Lat. 9° 22′ 14″ N., Long. 79° 56′ 15″ W.,
thence to Lat. 9° 21′ 56″ N., Long. 79° 55′ 48″ W.,
thence to Lat. 9° 21′ 25″ N., Long. 79° 55′ 48″ W.,
thence to Lat. 9° 21′ 25″ N., Long. 79° 55′ 21″ W.,
thence due North to starting-point. However, restricted area North and East of Buoy 2, as charted, must be observed. Explosive sector charted in this area to be avoided whenever possible.

*Anchorage Area "B"*. For all ships with salt-water draft under 32 ft. Minimum depth is 29 ft. Explosive sector restricted to vessels carrying explosives or specially designated vessels. All ships of such length as to under no circumstances swing into Anchorage Area "A".

This area starting at Lat. 9° 22′ 48″ N., Long. 79° 56′ 15″ W.,
thence to Lat. 9° 22′ 32″ N., Long. 79° 56′ 41″ W.,
thence to Lat. 9° 21′ 42″ N., Long. 79° 56′ 41″ W.,
thence to Lat. 9° 21′ 52″ N., Long. 79° 56′ 00″ W.,
thence to Lat. 9° 21′ 25″ N., Long. 79° 56′ 00″ W.,
thence to Lat. 9° 21′ 25″ N., Long. 79° 55′ 48″ W.,
thence to Lat. 9° 21′ 56″ N., Long. 79° 55′ 48″ W.,
thence to Lat. 9° 22′ 14″ N., Long. 79° 56′ 15″ W.,
thence due North to starting-point.

*Anchorage Area "C"*. Required pilotage waters for inbound vessels.

This area starting at Lat. 9° 21′ 25″ N., Long. 79° 55′ 21″ W.,
thence to Lat. 9° 21′ 25″ N., Long. 79° 56′ 00″ W.,
thence to Lat. 9° 20′ 48″ N., Long. 79° 55′ 57″ W.,
thence to Lat. 9° 20′ 27″ N., Long. 79° 55′ 21″ W.,
thence due North to starting-point. Restricted area East and South of Buoy 2, as charted, must be observed.

*Anchorage Area "D"*. For all ships of over 350 ft. in length and a deep salt-water draft of less than 35 ft. except where minimum charted depth is 32 ft.

This area starting at Lat. 9° 23′ 19″ N., Long. 79° 55′ 15″ W.,
thence to Lat. 9° 22′ 55″ N., Long. 79° 54′ 21″ W.,
thence to Lat. 9° 22′ 22″ N., Long. 79° 54′ 21″ W.,
thence to Lat. 9° 22′ 02″ N., Long. 79° 54′ 55″ W.,
thence to Lat. 9° 22′ 02″ N., Long. 79° 55′ 15″ W.,
thence due North to starting-point.

*Anchorage Area "E"*. For all ships less than 350 ft. and small craft. Minimum charted depth of water is 24 ft.

This area starting at Lat. 9° 22′ 55″ N., Long. 79° 54′ 21″ W.,
thence to Lat. 9° 22′ 27″ N., Long. 79° 53′ 54″ W.,
thence to Lat. 9° 22′ 22″ N., Long. 79° 53′ 54″ W.,
thence to Lat. 9° 22′ 22″ N., Long. 79° 54′ 21″ W.,
thence due North to starting-point.

*Anchorage Area "F"*. For small craft and yachts. Pilotage for this area will be decided by Cristobal Port Captain, based on merit of each individual case. Under no circumstances may a vessel proceed to this area prior to being cleared by Boarding Officials. (Bounded by Channel Buoy "3" by a direct line through Buoys "A," "B," "C," "L4," "L2" and return to Buoy "3".)

Outer anchorage area. Established North-West of Cristobal breakwater have the following co-ordinates: Commencing at latitude 09° 23′ 14″ N. longitude 79° 55′ 21″ W. (West breakwater light); thence to 09° 24′ 40″ N. 79° 56′ 00″ W. (buoy "A", whistle sea buoy); thence to 09° 24′ 40″ N. 79° 57′ 00″ W.; thence to 09° 23′ 14″ N. 79° 57′ 00″ W.; thence due East to starting point.

During periods of harbour congestion, large, deep-draft vessels and/or any vessel so directed may anchor outside the breakwater in the approved area. Such vessels must advise Cristobal Signal Station, by VHF Channel 12, the time of passing sea buoy, in order to establish order of transit. Masters will be given a definite time to enter the breakwater, where the vessel will be met by transit Pilot(s) and boarding officials.

Vessels must strictly adhere to the breakwater entry times as given, in order that transit schedule can be maintained.

*Prohibited Anchorage.* Eastern side of channel, Canal Zone waters South of Lat. 9° 22′ 02″ N. to Mole Buoy in order to give clear access to Colon Harbor. Also, no vessel or craft may proceed south of Lat. 9° 21′ 25″ N. prior to being cleared by Boarding Officials. No vessel may anchor with any part of the vessel in the main channel or closer than 300 yards to either East or West breakwater lights.

In cases due to harbour congestion, any vessel may be directed to anchor to Westward outside breakwater entrance and given an order as to the time it is to pass through the breakwater entrance.

**RESTRICTIONS:** Port open throughout 24 hours.

**MAX. SIZE:** Harbour limitations generally unrestricted as to length and beam. Draft 40 ft.

**RADIO:** The Port Captain may be contacted via VHF Channel 12. Commercial telephone calls and messages to Agents may be made via Panama Radio, VHF Channel 16.

**TUGS:** Available and assigned for berthing by Pilot. Tug's lines used at no extra charge.

**BERTHING:** No specific requirements as to arrival times. Fifteen cargo and bunkering berths.

**STEVEDORES:** Endeavour arrange arrival to avoid cost of "stand by" as Agent arranges gangs for 07.00 or 17.00 commencement.

**TANKERS:** Four berths available.

**FRESH WATER:** Available from piers.

**FUEL:** Bunker "C", diesel, light fuel and light diesel available at Government wharves from commercial companies. Rate of delivery 2,000 bbls. per hour.

The Southern part of Anchorage C, Cristobal Harbour, has been designated a limited bunkering area for vessels whose draft is too great to use the East breakwater bunkering area.

A large mooring buoy has been placed there. Vessels will anchor and use the buoy as a stern mooring.

Pilotage is compulsory out and into this area for vessels and bunkering barges.

Also see "Balboa".

**REPAIRS:** Emergency repairs possible.

**DRY DOCK:** Length 386 ft., breadth 60 ft., depth over blocks 20 ft. 6 in. MLW.

**POLICE/AMBULANCE/FIRE:** Emergency number 110. Routine Police business 3–2111.

**TELEPHONES:** May be placed aboard through arrangement with Agent.

**SHORE LEAVE:** Generally permitted.

**CUSTOMS:** Customs and Immigration Inspection Service available Monday to Saturday from 0700 to 1700. Charges for such service after hours and on Sundays and holidays set forth in Panama Canal Tariff. Number of inspectors required will be determined by Chief Customs and Immigration Inspector of port.

**DELAYS:** Delays in berthing, load or discharge or bunkering are minimal and infrequent. Eight hours is considered excessive.

**AUTHORITY:** Panama Canal Company, Balboa Heights, Canal Zone. Captain of the Port (Cristobal), tel. 3–1639.

**AGENT:** C. Fernie & Co., Inc. PO Box 5042, Cable address: "Fernie–Cristobal". Telephone Nos.: Cristobal 1772–1295–2914–2128. Telex Nos.: ITT–3482020, TR–9211 "Fernie Pa". Also VHF. After office hours telephone numbers. Cristobal 2468, Cristobal 2568.

## PANAMA CANAL (entering Cristobal or Balboa) (See Plan)

**BOARDING OFFICER:** Arriving vessels will be boarded upon arrival inside the breakwater at the Atlantic entrance or off the seaward end of the dredged channel at the Pacific entrance by a Canal boarding officer in accordance with procedures and boarding hours established for the boarding of vessels at the respective ports by the Canal authorities.

Vessels shall be entered at Canal Zone port of arrival by boarding officer and it is not necessary for masters to come ashore for that purpose. A transiting vessel entered at Balboa is required to clear from Cristobal, and vice versa.

*Anchoring to await boarding officer:* When a vessel is not boarded immediately on arrival, it shall anchor in the appropriate, designated anchorage area and await the boarding officer. See "Anchorages".

**VESSEL'S IDENTIFICATION:** Every vessel shall hoist its signal letters when approaching and entering a terminal port, and those arriving at night shall promptly signal their names by flashing light to the signal station. This communication of the vessel's name by signal letters or flashing light is mandatory even though the vessel communicates by voice radio. (Also see "Radio".)

**OIL POLLUTION:** Every vessel subject to the Federal Maritime Commission's oil pollution financial responsibility requirements, must maintain on board and make available to Panama Canal Company boarding Officers the original or copy of its certificate. Any vessel that does not have the necessary certificate on board will not be permitted to transit the Panama Canal.

If pollution occurs the Master is liable to a heavy fine; an appearance in court may be required hence the vessel being delayed for some considerable time.

**ORDER OF TRANSIT:** Canal authorities may dispatch vessels through Canal in any order and at any time they may see fit. Priority of arrival at a terminal does not give any vessel the right to pass through the Canal ahead of another that may arrive later, although order of arrival will be a consideration in determining order of passage.

N.B. A vessel in excess of 150 ft. in length that is not equipped with properly operating rudder-angle and engine-revolution indicators, so located as to be readily visible to a pilot on the bridge, will be subject to delay in transiting to the extent the Canal authorities deem necessary or appropriate in order to minimize, in the light of the type and volume of Canal traffic and of other factors relating to the safety of Canal operations, the increased hazards of navigation resulting from failure of the vessel to be so equipped. (In practice this regulation is thought to require that the indicators should be located on wings of bridge as well as inside wheelhouse for vessels over 80 ft. beam.)

**DOCUMENTS:** All documents listed below shall be ready for immediate delivery to boarding officer when he boards vessel upon each arrival of vessel in Canal Zone:

| *Documents required* | *From ships which transit Canal but do not take on or discharge passengers or cargo at Canal Zone ports (number of sets)* | *From ships taking on or discharging passengers or cargo at Canal Zone ports (number of sets)* |
|---|---|---|
| (1) Ship's information and quarantine declaration (Panama Canal Form 4398) | 1 | 1 |
| (2) Clearance from last port | *1 | *1 |
| (3) All certificates of a sanitary nature | *1 | *1 |
| (4) Passenger list: Passengers transiting only (on Panama Canal Form 20) | **2 | **2 |
| (5) Passenger list: Passengers for discharge (on Panama Canal Form 18–9) | 0 | **4 |
| (6) Crew list (on Panama Canal Form 1509–10) | 2 | 2 |
| (7) Store list | †1 | †1 |
| (8) Cargo declaration (Panama Canal Form 4363) | 1 | ‡1 |
| (9) Manifest of local cargo | 0 | 4 |
| (10) Panama Canal tonnage certificate | 1 | ††1 |
| (11) National register | *1 | *1 |
| (12) General arrangement and engine room plans | ‡1 | ††1 |
| (13) Report of structural alterations and of changes in use of tanks or other spaces since last transit | 1 | ††1 |
| (14) Declaration by all vessels except ships of war of all arms and munitions of war aboard other than explosives declared separately | **2 | **2 |
| (15) Declaration as to vessel's port(s) of departure, destination, and ports of call, within the last three months, with the corresponding actual or approximate dates | 1 | 1 |

* For examination and possible retention.

** Not required unless such persons or cargo are carried.

† Required if ship during transit is laid up for repairs, regardless of whether passengers or cargo are taken on or discharged.

†† Not required unless ship transits Canal.

‡ For taking up and subsequent return through Agent or otherwise.

*Documents required at ports.* In case a vessel takes on or discharges passengers or cargo at only one Canal Zone port and does not transit Canal, documents indicated in column two are required. In case a ship docks or takes on or discharges passengers or cargo at both Cristobal and Balboa, or at a port other then port of entry, all documents in column two are required at first port and, in addition, four copies of document (9) required at second port.

*Crew list.* For purposes of additional identification of crew members, all copies of crew list shall include for each seaman the serial number of his certificate of identification, continuous discharge book, pass-port or other satisfactory identifying documentation. In addition, the given name and middle initial, as well as family name, shall be shown for all seamen.

*Passenger list.* All copies of passenger lists shall be accurate and legible and shall be delivered to boarding officer. The list shall sh passengers in alphabetical order. Passengers who are to be d charged at Canal Zone ports shall be listed separately from ot passengers aboard who are only to transit Canal. In event any pa senger listed for discharge fails to disembark, or any passen listed for transit disembarks, notice shall be given promptly Master through his ship's agent to Port Captain and a supplem tary passenger list (same number of copies as is required for original list of disembarking passengers) showing required inform tion concerning such passengers shall be furnished promptly Chief Customs Inspector prior to clearing Canal Zone waters.

(It is understood that "Advance Documents" are no longer quired by Authorities. However, Agents request copies of Crew a Passenger Lists in advance, which should, if possible, be airma from last Port.)

**PILOTAGE:** Pilot is mandatory entering either from Balboa Cristobal and is supplied without special request. Should ves desire Pilot to meet it outside Atlantic Breakwater, it should rem there and make signal to that effect. Vessels shall furnish a sa clean, well-lighted pilot ladder, and will be required to make a lee rough weather. Vessel normally boarded inside breakwater a point north of the Mole Beacon at the Atlantic Entrance, and Merchant Vessel Anchorage to seaward of Buoys 1 and 2 Pacific Entrance.

*Shelter for Pilots:* Purpose of platform is to provide a shelter fro sun and rain for pilots working near bow of vessel and to prov adequate visibility around the locks to reduce danger of damage.

Platforms are required on:

(*a*) All vessels that are 100-ft. or more in extreme beam w bridge aft; and

(*b*) All vessels that are 95-ft.to 99·9-ft. extreme beam with brid 600 ft. or more from the bow measured at the outside of t wheelhouse at the centreline.

Platform to be erected at position which is farthest forward extreme beam and not more than six inches inboard from the vertic plane of shell plating. One on each side of the vessel. Awning ma of suitable material. Deck of wood or other suitable material w non-skid surface.

Vessels equipped with previously approved design may contin to use platforms of that design until they require replacement.

Further inquiries on this subject should be directed to Chi Ports Division.

The vessels mentioned above require four Pilots, two forw and two aft, when transiting the locks of the canal.

**STEERING LIGHT:** All vessels with the bridge more than 250 f from the stem must have a steering light at or near the stem. Th light may be any colour except white, green or amber, must not b visible forward of the beam, and must be of such an intensity a so fixed as to be clearly visible from the navigation bridge.

**ANCHORAGES:** No vessel shall anchor within navigable water of Canal Zone in other than a designated anchorage.

1. *Merchant Vessel Anchorages.* (a) *Atlantic entrance merchan vessel anchorage.* An area to the west of the Canal channel bounde as follows: Starting at a point "A", located in position 9° 21′ 25″ N 79° 55′ 31″ W., and marked by gas buoy No. 2, thence 900 yd. 27 true to a point "B" located in position 9° 21′ 25″ N., 79° 55′ 58″ W thence to lighted buoy "I", thence to lighted buoy "H", thence du North to a point "C" located in position 9° 22′ 07″ N., 79° 56′ 41″ W thence 2,800 yd. 59° true to a point "D" located in position 9° 22′ 5 N., 79° 55′ 29″ W., and thence to the starting-point. The line extendin due West from the Cristobal Mole through lighted beacon No. 1 an lighted buoy No. 2 (9° 21′ 25″ North) marks the Southern limit of th anchorage area. No vessel shall pass this line without having bee passed by the boarding officer and without having a Canal pilot o board.

(*b*) *Gatun Lake anchorage basin.* An area immediately East of th Canal channel line, bounded by a line extending to a point 450 yd 120° true from the East wing-wall at the South end of Gatun Lock thence 690 yd., 148° true to flashing white lighted buoy "A" thenc 700 yards, 070° true to flashing white lighted buoy "1" thence 1,1 yards, 148° true to quick flashing white lighted buoy "3" thenc 2,800 yards, 224° true through fixed white lighted buoy "5" and blac can buoy "7" to the Canal channel line at flashing white lighted bu "9"; the channel prism line being the westerly boundary line of th anchorage area.

(c) *Pacific entrance merchant-vessel anchorage.* An area bounde as follows: beginning at a point in position 8° 51′ 50″ N., 79° 30′ W., marked by a lighted whistle buoy which is painted with alte nating black and white vertical stripes and which shows short-lon flashing white light every 8 seconds, i.e. light 0.4 second, eclipse 0 second, light 1.6 seconds, eclipse 5.6 seconds; thence due East t longitude 79° 28′ 00″ W.; thence due North to latitude 8° 54′ 31″ N thence due West toward Flamenco Island Light to a point 8° 54′ 3 N., 79° 30′ 46″ W.; thence South-westward touching the North-wes corner of San Jose Rock to position 8° 53′ 27″ N., 79° 31′ 23″ W marked by canal-entrance lighted buoy No. 2; thence South-eas ward to the point of beginning.

2. *Anchorage areas for ships loaded with hazardous cargoes.* (a *Atlantic end.* Area included in rectangle 1,000 yd. wide immediat South of West breakwater, starting at a point on West breakwa 1,000 yd. from West Breakwater Light and thence extending wes ward 2,000 yd. along breakwater.

(b) *Pacific end.* Area South of Naos Island bounded on the Ea by a line drawn South (true) from entrance gas buoy No. 1; on th South by a line drawn east (true) from Tortolita Island, and on th North and West by the curve of 30-ft. depth.

Vessels carrying explosive cargoes shall anchor in the explos anchorage areas, on arrival at the Canal Zone, and there await instructions.

**MAX. SIZE:** N.B. The following paragraphs serve as an approximate guide to permitted size of vessel in transmitting Canal, but Owners and Operators should always seek official clarification and ruling from: The Chief Navigation Division, Panama Canal Company, Box 5012, Balboa, Canal Zone.

1. *General*

(*a*) Based on experience to date, the Panama Canal Company has determined that 106·0 ft. is the widest extreme beam commercial vessel acceptable for regular transit. Wider vessels, not exceeding an extreme beam of 107·0 ft., may be permitted to transit on a delivery basis only. The max. length is limited to 900 ft. except that container or passenger vessels will be accepted up to a max. length of 950 ft.

(*b*) Vessels of 100 ft. beam and over, whose handling characteristics are such as to endanger herself, Panama Canal appurtenances and/or a third party, may have such further limitations of draft and trim placed on her as Canal Authorities deem necessary to ensure reasonable safety.

(*c*) Draft of non-self-propelled barges 550 ft. or more in length, and/or 100 ft. or more in beam, may be limited when in the opinion of Canal Authorities such limit is necessary to ensure reasonable safety.

(*d*) Because of the increasing need for despatching large vessels and tows as early as possible in the morning, consistent with safe practice, it is important that information provided in advance of initial transit of the vessel include capacity plans, general arrangement plans, engine-room plans and, whenever possible, photostatic copies of national register, load-line certificates and Panama Canal tonnage certificates. This advance information will minimise the time spent aboard the vessel by admeasurers before commencement of the initial transit.

2. *Initial Transit Draft*

The maximum draft (deepest point of immersion) allowed for initial transit of the Panama Canal (except for identical sister-ships) will be limited to 37 ft. Panama Canal fresh water. This max. draft will be further limited as necessitated by the draft limits established by bilge radius, the max. TFW draft allowed for the Panama Canal as promulgated periodically by the Marine Director because of Gatun Lake Level, or by limitations deemed necessary because of restrictions in the waterway. This will normally be:

| *Gatun Lake Level* | *Normal Panama Canal Draft Restriction* | *Maximum Panama Canal Fresh Water Draft For Initial Transits* |
|---|---|---|
| Over 86′ 6″ | 39′ 6″ | 37′ 0″ |
| 86′ 0″ to 86′ 6″ | 39′ 0″ | 37′ 0″ |
| 85′ 6″ to 86′ 6″ | 38′ 6″ | 37′ 0″ |
| 85′ 0″ to 85′ 6″ | 38′ 0″ | 37′ 0″ |
| 84′ 6″ to 85′ 0″ | 37′ 6″ | 37′ 0″ |
| 84′ 0″ to 84′ 6″ | 37′ 0″ | 37′ 0″ |
| 83′ 6″ to 84′ 0″ | 36′ 6″ | 36′ 6″ |
| 83′ 0″ to 83′ 6″ | 36′ 0″ | 33′ 0″ |

3. *Maximum transit draft*. After initial transit made at, or less than, authorised initial transit draft, maximum draft for succeeding transits will be maximum allowable Panama Canal fresh water draft for particular vessel, based on all relevant factors. After initial transit, Owners, Operators or Agents will request authorised maximum draft from the Chief, Navigation Division. This request will be returned with approved maximum Panama Canal fresh water draft stamped thereon.

4. *Transit drafts for sister-ships*. Identical sisters are not limited to initial transit draft established in paragraph 2. Transits of such vessels will be permitted at maximum Panama Canal fresh water draft authorised an identical sister, lake level permitting.

5. *Procedure to obtain initial transit draft allowances*. Shipowners, Operators or Agents who desire arrange initial transits in excess of 34 ft. Panama Canal fresh water draft must correspond with the Chief, Navigation Division, Panama Canal Company, Box 5012, Balboa, Canal Zone, not later than two weeks prior to loading vessel in order receive designated initial Panama Canal fresh water transit draft.

6. *Increased allowances for vessels with limited bilge radii*. A vessel whose Panama Canal fresh water transit draft allowance is restricted by her bilge radius, may install permanent fendering to keep vessel from touching lock-wall batters when alongside lock walls, providing maximum beam, including fendering, does not exceed 100 ft.

7. *Release from liability*. Masters of vessels will be required to execute a form, undertaking to release Panama Canal Company from liability in case of accident and to indemnify Company for damages sustained in following instances (because of additional draft allowances granted to transiting vessel, these releases are required, generally, on a one-time basis):

(a) When *maximum* tropical fresh water draft during an initial transit (not to exceed 37 ft.) is within 1 ft. 6 in. of authorised mean tropical fresh water load line of transiting vessel;

(b) When initial transit is being made by an identical sister ship at a maximum draft in excess of 37 ft.;

(c) When transiting vessel is equipped with permanent fenders to breast her off the lock-wall batters, until trial transits have proven permanent fenders satisfactory;

(d) When vessel permitted transit at draft greater than her allowed Panama Canal fresh water draft or her mean authorised TFW load line. Vessels over draft will be subject to denial of transit or delay to extent Panama Canal authorities deem necessary in light of traffic conditions and safety of Canal operations;

(e) When a vessel transits at less than the minimum drafts specified below:

| | |
|---|---|
| Over 425′ up to 475′ | 8′ fwd. 14′ aft |
| Over 475′ up to 525′ | 18′ fwd. 20′ aft |
| Over 525′ up to 580′ | 20′ fwd. 22′ aft |
| Over 580′ up to 625′ | 22′ fwd. 24′ aft |
| Over 625′ | 24′ fwd. 26′ aft |

**HEALTH:** Radio pratique is available to all vessels arriving in Canal Zone waters. Radio pratique is a quarantine clearance by radio, based upon information from the vessel prior to its arrival at Balboa or Cristobal and past experience with the vessel and its personnel. A limited number of vessels will be sampled for compliance with the required standards of health and sanitation on board. The sampling will generally be done on a random basis and will provide a measure of the success of the programme.

It should be emphasised that radio pratique applies only to the quarantine section of the required forms and documents for the Panama Canal. All vessels must still complete the required boarding forms, and in most cases, be prepared to receive the Panama Canal Boarding Inspector on arrival in Canal waters. Such forms as crew and passenger lists, ship's information forms, and the cargo declaration must always be completed for presentation to the Panama Canal officials.

Attached is a listing of the items to be reported prior to arrival in the Canal Zone. The information is similar to that now required of vessels requesting radio pratique in U.S. ports. In addition, there are some special circumstances in the Canal Zone that make additional information necessary.

The manner of reporting the information required should be clear and orderly as specified in 35 CFR, section 123.4, listing information required in advance. The request for radio pratique should originate from the Master and can be submitted directly by radio or through the vessel's local agent. The local agent should submit his request with all the required information to the Quarantine office at the port of arrival of the vessel. The local agent will be notified when radio pratique is granted or refused and the agent will communicate this information to the ship.

It is hoped that vessels will take advantage of radio pratique when arriving for transit or docking at the Canal Zone ports of Balboa and Cristobal, and that in as many instances as possible it may be able to grant this time saving privilege.

*Radio Pratique Programme*

1. *General*

(*a*) The granting of radio pratique is a Health Bureau responsibility designated to the Division of Preventive Medicine. (35 CFR 61.264)

(*b*) In order to process the details of this programme more expeditiously, communication may be held between the quarantine offices and the ship's Canal Zone Steamship Agent representing the vessel hereinafter called local Agent.

(*c*) All vessels coming to the Panama Canal may request radio pratique by means of the ETA radio message or through the ship's local Agent.

(*d*) Requests for radio pratique may be submitted to the quarantine office at the port of arrival at least 12 hours and not more than 48 hours before vessel is scheduled to arrive.

2. *Specific Requirement for Each Voyage*

(*a*) The vessel will be maintained free from rats and vermin.

(*b*) The Derating Certificate or Derating Exemption Certificate must be valid (i.e. date of issue not more than 180 days prior to date of arrival at the Panama Canal).

(*c*) Vessels arriving within 15 days from the ports designated in the Aedes Aegypti Indices Bulletins must be disinfected with the aerosol described in the Aedes Aegypti Indices Bulletin No. 8, 1970.

(*d*) The restrictions imposed in 61.281 through 61.302, "Importation of Certain Things", Title 35 CFR, must be strictly adhered to and followed.

3. *Action taken by the Quarantine Officer in Charge**

(*a*) Radio pratique *may* be granted by the quarantine office upon request from the vessel or through the ship's local Agent representing the vessel:

(1) if the information requested in the Appendix hereto is complete; *and,*

(2) if the quarantine officer in charge* is of the opinion that the vessel is reasonably free from any condition either from a health or sanitation standpoint that might introduce illness into the Canal Zone.

(*b*) Radio pratique may be denied by the quarantine officer in charge:

(1) if the requested information is incomplete; or,

(2) if the quarantine officer in charge* feels that medical or sanitary reasons prevail requiring careful inspection upon arrival of the vessel.

* Or designated representative.

4. *For Sampling and Surveillance of Compliance Purposes*

After the information supplied by the Shipmaster has been reviewed the quarantine officer in charge* will advise the ship's local Agent concerned whether radio pratique has been granted or denied and if any restrictions or limitations have been imposed. He will also inform the Marine Traffic Controller, and the Immigrations and Customs office whether radio pratique has been granted or denied.

* Or designated representative.

5. *Action taken by the Ship's Local Agent*

(*a*) The ship's local Agent may submit requests for radio pratique to the quarantine office if the vessel has not done so by radio. The information required is listed in the Appendix hereto. Such requests should be submitted not later than 12 hours before the vessel is scheduled to arrive nor earlier than 48 hours before the expected arrival of the vessel.

(*b*) The ship's local Agent will advise the vessel which he represents whether radio pratique has been granted or denied; and any restrictions or limitation imposed.

6. *Action taken by Panama Canal Company Boarding Inspectors*

On vessels that have been granted radio pratique, the Panama Canal Company Boarding Inspector will:

(*a*) Ascertain that the Shipmaster has completed the Ship's Information and Quarantine Declaration (Form 4398) *except* the "quarantine portion" at the bottom of the form; and,

(*b*) Otherwise process the vessel (e.g. for Immigration, Customs, Admeasurement, and any other non-quarantine requirements) without any further questioning on quarantine matters. This processing may be either in the bay or at the dockside at the discretion of the Admeasurer Watch Supervisor. By agreement with the Chief Immigration Service, passengers that are disembarking from vessels may be processed by the Immigration Service at the docks.

(*c*) Vessels that are denied radio pratique or have failed to request radio pratique, will be cleared through Quarantine by the Panama Canal Company Boarding Inspector in the prescribed routine manner.

7. *Action taken by Shipmasters*

(*a*) Shipmasters should request radio pratique directly by radio or through the agent representing them in the Panama Canal Zone and supply the information requested in the Appendix hereto.

(*b*) Shipmasters should take cognizance of the requirements listed in paragraph 2, "Specific requirement for each voyage", above.

(1) If granted radio pratique, they may enter the anchorage area or a Canal Zone port without flying the quarantine flag; they must however comply with any restrictions or limitations imposed by the Quarantine Officer in Charge.

(2) Unless the boarding of docking vessels is scheduled to take place at the pier, vessels *must* await boarding by a representative of the Panama Canal authority.

(3) If denied radio pratique, vessels must be cleared for Quarantine in the prescribed routine manner; that is enter the Canal Zone waters or a Canal Zone port flying the Quarantine Flag and must await processing by the Panama Canal Company Boarding Inspector.

(4) It is important that the Shipmasters remember that in all instances all forms regularly required are to be completed prior to arrival for presentation to the Boarding Inspector.

*Appendix*

Information required by Quarantine Officer in Charge from Shipmaster requesting radio pratique through ship Agency representing him at the Panama Canal.

Full name of vessel.
Country of registry.
International radio call letters.
Estimated date of arrival and port.
Whether docking at Balboa or Cristobal and reason therefor.
List of ports of call within past *15* days prior arrival.
Record any illness or communicable diseases on board.
Record any death occurring on board since departure from last port and cause, if known or suspected.
Report the number of smallpox vaccinations required.
Report the number of passengers to be disembarked and port of disembarking (e.g. Cristobal or Balboa).
Report the date of the Deratting Certificate or Deratting Exemption Certificate.
Record the number, kind, and origin of all animals aboard and if any are scheduled for disembarking.
Report the origin or source of the meat in the ship's stores.

Only vessels in the following categories need still be subject to "on board" public health clearance upon arrival at Canal Zone ports:

A. Vessels which, during the 15 days prior to arrival in the Canal Zone ports, have or have had on board passenger or crews with any of the following conditions or symptoms of illness:

1. Temperature of 100° F (38° C) or greater (*a*) which persisted for two days or more: or (*b*) which was accompanied or followed by any one or all of the following: rash, jaundice, glandular swelling; *or*
2. *Prolonged diarrhoea* (lasting 1 full day or more).

B. Occurrence of death on board for any reason.

C. Vessels which have been in a country infected with smallpox during the 15 days prior to arrival in the Canal Zone.

D. Vessels which have been in a country infected with plague in the 60 days prior to arrival in the Canal Zone.

**RADIO:** Balboa Naval Radio NBA.

1. *Signal stations.* (a) Visual-signal stations established for communication on arrival Canal approaches by International Code and/or flashing light, at seaward end of Pier 6 Cristobal, and on Flamenco Island at Pacific entrance.

(b) Flamenco Island also contactable on VHF Channel 12 frequency 156·6 Mgs., and R/T 2182, 2638 and 2846 kc/s. – call letters WHC.

(c) Vessels of 85 ft. beam and above awaiting transit at Balboa anchorage should keep VHF radio watch on Channel 12 for transit orders.

(d) Arriving ships may communicate with Port Captain's Office, Cristobal through Cristobal Signal Station Radio communication is maintained on international maritime VHF Channel 12 (156·6 Mc/s.) through "Cristobal Radio".

2. *Advance information required by radio from vessels approaching Canal.* Vessels approaching Canal shall communicate by radio to the Port Captain, through Balboa Radio Station, call letters NBA, at least 48 hours in advance of arrival in Canal Zone, the information required below. If radio communication can be established e than 48 hours in advance of arrival, required information shou furnished at time such communication is first practicable.

(*a*) All items of information listed below, unless previously municated through agents or otherwise to Canal authorities, sh transmitted to Port Captain using phonetic alphabet lette identify items, as follows:

ALFA – The Panama Canal Identification Number of the ves

BRAVO – Estimated date and time of arrival, port of arriva request for Canal transit if desired.

CHARLIE – Estimated draft upon arrival, in feet and inches and aft).

DELTA – Any changes in the vessel's name, country of reg structure, or use of tanks that have occurred since the vesse called in Canal Zone waters.

ECHO – Will the vessel dock at Balboa or Cristobal? What i reason for docking? If it is for cargo operations, fuel or water the tonnage involved in each case. Is there any other reason the v will not be ready to transit upon arrival? What is the reason?

FOXTROT – The nature and tonnage of any deck cargo.

GOLF – If the vessel is a tanker, state names and grades of carried. State names and grades of the cargo last carried in empty tank which is not gas free.

HOTEL – If the vessel is carrying explosives as cargo, stat grade of each explosive and the amount, in tons of each grade

INDIA – Quarantine and immigration information:

(1) Is radio pratique desired?

(2) State the ports at which the vessel has called within 15 proceeding its arrival at the Canal Zone.

(3) State all cases of communicable disease aboard an nature of the disease or diseases, if known.

(4) The number of deaths which have occurred since depa from the last port and the cause of each death, if known.

(5) The number of smallpox vaccinations required.

(6) The number of passengers disembarking and their po disembarkation.

(7) The number and ports of origin of any stowaway and a description of the identity papers of each stowaway.

(8) The number, kind and country of origin of any animals ab Are any animals to be landed?

(9) The country of origin of all meat, whether carried as car as ship's stores.

(10) Has the vessel called at a port in any country, infected foot-and-mouth disease or rinderpest during its present voy Countries considered to be infected are:

(*a*) All countries east of the 30th meridian West longitude West of the International Date Line except Australia, Ch Islands, Fiji, Greenland, Iceland, Japan, New Zealand, Nor Ireland, Norway, Republic of Ireland;

(*b*) All countries of South America;

(*c*) Curacao (the Leeward Islands of the Netherlands Antille

(*d*) Martinique;

(*e*) Cuba;

(*f*) Guadaloupe.

(11) Specify whether the vessel has a valid Derating Certi or a Derating Exemption Certificate issued 180 days prior to a

(*b*) The following additional information shall be transm via radio to the Port Captain from all vessels as applicable:

(1) Vessels approaching from the Pacific shall report actual of passing Cape Mala, or the latitude of Cape Mala, and the ves speed.

(2) Vessels approaching from the Atlantic shall report 12 h prior to arrival at Cristobal any change of one hour or more i expected time of arrival.

(3) Any other matters of importance and interest.

(*c*) Timely receipt of the above information will facilitate the tr or docking of arriving vessels. Failure to comply with these repo requirements may subject a vessel to delay since vessels whic comply will receive priority of service and handling over those w do not.

**DENSITY:** On several occasions vessels arriving for transit been found to be over authorised draft after entering Gatun Overdrafts in these instances have been caused, it is believe assuming fresh water densities different from what actually e in Canal.

Using distilled water as 1·000, water densities have been d mined to be as follows:

| | *Density* | |
|---|---|---|
| *Location* | *Gm./cc 85°F* | *Lbs./ft³ 85°F* |
| (*a*) Gatun Lake* | 0·9954 | 62·21 |
| (*b*) Miraflores Lake† | 0·9971 | 62·32 |
| (*c*) Balboa Anchorage‡ | 1·0219 | 63·87 |
| (*d*) Cristobal‡ | 1·0212 | 63·76 |

*Fresh water.
†Brackish water.
‡Salt water.

**BOILER WATER:** May be taken without charge from Gatun subject Pilot's Permission and draft.

**FRESH WATER:** Available Balboa on Cristobal cost abou cents per 100 cu.ft.

**CERTIFICATES:** see "Documents". (*a*) If a valid Derating C ficate or Derating Exemption Certificate is not produced respect to any arriving vessel the quarantine officer shall:

(1) If he is satisfied that vessel is free of rodents or is kept in a condition that number of rodents on board is negligible, iss Deratting Exemption Certificate; or

(2) If he is satisfied that a Deratting Exemption Certificate sh

not be issued with respect to such vessel, require derating of vessel.

(*b*) When, pursuant to paragraph (*a*) (2) of this section, deratting has been completed to satisfaction of quarantine officer, he shall issue a Derating Certificate.

**CUSTOMS:** *Hours.* The regular hours for the customs inspection of baggage of landing passengers and for the customs supervision of landing passengers are from 0700 to 1700 daily, excluding Sundays, and holidays. Such customs services may be furnished during other hours, or on Sundays and holidays, only upon the request of the Master or authorised agent.

2. *Marine Protests.* Marine notes of protest may be made and extended by Masters of American vessels before customs officers without charge.

3. *Allowances.* Tobacco, Wine and/or Spirits at Master's discretion sufficient for immdeiate consumption. Alcohol not permitted to be taken ashore.

**CONSULS:**

**Great Britain:** British Consulate, Colon Office 38–7–7060;

**Norway:** Royal Norwegian Consulate General: Consul General for Panama, R. P., Terence O. Ford, Office: 28–25–2347. Residence: 28–24–1884.

Norwegian Consul, Cristobal, G. R. Morland, Fenton Bldg. 3–2819.

Norwegian Consul for Pacific Side, Canal Zone, Arne Hauge, Office 2–1965.

**Republic of South Africa:** Consul for the Republic of South Africa, Henry I. Darlington, Office: 28–23–0834. Residence: 28–23–6779.

**Sweden:** Royal Swedish Consulate General, Edificio Melinda, Via Argentina, Panama 28–23–9694.

**Denmark:** Royal Danish Consulate General, Consul General for Panama and Canal Zone, W. Ishoy, Office: 28–25–0524. Residence: 28–24–1537.

Royal Danish Consulate for Colon and Canal Zone, George R. Downing, Office: 38–7–1870. Residence: 3–2361.

**Finland:** Finnish Vice-Consul, Cristobal/Colon, Donald Francey, Fenton Bldg. 3–1781.

**REPATRIATION:** Crew members, of vessels other than vessels of United States registry or enrolment signed on before a shipping commissioner, may be discharged in Canal Zone only with consent of the Immigration Service. Before such consent may be given, the Chief Immigration Inspector at port concerned shall be furnished a memorandum in triplicate showing name, age, nationality, and rating of the crew members proposed to be discharged.

When crew members are signed on a vessel, other than crew members signed on a vessel of United States registry or enrolment by a shipping commissioner in the Canal Zone, a memorandum in triplicate showing name, age, nationality, and rating of crew members signed on shall be furnished to Chief Immigration Inspector at the port concerned.

Arriving crew members and particularly visiting Superintendents should if possible possess Panamanian visas.

**AIRPORT:** Tocumen International Airport located outside Panama City, 18 miles from Balboa; 48 miles from Cristobal, served by all major scheduled international airlines operating in Southern hemisphere.

**HOLIDAYS:** Sunday, January 1; February 22, Good Friday; May 30; July 4; First Monday in September; November 3; November 11; Thanksgiving Day; December 25; and such other days as may, pursuant to law, be declared to be holidays.

**TIME:** EST. No alterations to clocks necessary throughout the year.

**LOCKS:** Gatun Locks (Atlantic side) raise and lower vessels 85 ft., Miraflores (nearest to Pacific) 54 ft. and Pedro Miguel (Pacific side) 31 ft.

**AUTHORITY:** Ports Division, Panama Canal Company, Box 5012, Balboa, Canal Zone.

**AGENT:** See "Cristobal".

### PUERTO LAS MINAS (Payardi): 09.24 N. 79.50 W.

**DOCUMENTS:**

5 Crew Lists.
5 Passenger Lists.
5 Stores Lists.

Vessels arriving at Las Minas Bay for cargo operations must have on board Panamanian Consular despatches, obtained at the previous port. Vessels arriving without despatches will be charged with twice the cost of these documents on arrival.

**PILOTAGE:** Refinery Pilot boards at the sea buoy in approximate position 9° 25′ 40″ N. 79° 49′ 42″ W.

**ANCHORAGE:** Vessels waiting for Pilot should anchor in the vicinity of the sea buoy in the approximate position given above.

**APPROACHES:** Las Minas Bay is situated approx. 6 miles East of Cristobal. The approach channel is 1 mile long, 1,000 ft. wide, with a minimum depth of 47 ft. Leading lights covering approach channel on bearing 171°.

The inner harbour channel is 1 mile long, 300 ft. wide, dredged to a depth of 40 ft. up to the tanker berth. Leading lights covering the inner harbour channel are on a bearing of 148° 45″.

**MAX. SIZE:** Length 800 ft. LOA, draft 37 ft. 6 in. at tanker berth.

**RADIO:** See Panama Canal.

**BERTHING FACILITIES:** One tanker berth with a depth of 40 ft. alongside. Dry cargo berth, depth of 28 ft. alongside. This berth can accommodate vessels up to 530 ft. LOA.

Barge Dock, with depth of 20 ft. alongside. Can accommodate vessels up to 250 ft. LOA.

**FRESH WATER:** Drinking water may be taken on directly from the tanker berth while discharging or loading cargo.

**FUEL:** Bunkering at the tanker berth is available only to vessels working cargo. Vessels under 250 ft. length can be bunkered at the barge dock. Vessels at the dry cargo pier are bunkered by barge. Vessels calling for bunkers only are refuelled by barge at the anchorage in vicinity of the Sea Buoy No. 1.

From the storage tanks of Refineria Panama, marine fuels are loaded on barges and transported to Cristobal and Balboa and also to Colon Harbour and Taboga Island for delivery to vessels by barge. The refinery produces all types of marine fuels, Bunker C, light and heavy diesel, kerosene, etc.

When a vessel is stemmed for bunkers and cannot be supplied by barge due to rough weather or technical difficulties, she is docked at Cristobal, where she bunkers for the account of the suppliers (Refineria/Golden Eagle). The supplier then absorbs any docking charges in excess of the barging fee, plus Panamanian Authorities usual fees.

**AUTHORITY:** Refineria Panama S.A.

## Papua and New Guinea

### KAVIENG: 02.34 S. 150.48 E.

**PORT LIMITS:** A line drawn from the South-western extremity of Cape Siwusat to the Southern extremity of Nago Island.

**DOCUMENTS:** See "Lae".

**PILOTAGE:** The Administration does not maintain a Pilot at Kavieng. Arrangements may be made with the Harbour Master at Rabaul; and a private Pilot can be contacted by the Agent.

**HEALTH:** See "Lae".

**RADIO:** Call through VJZ.

**TUGS:** None available.

**BERTHING:** Main Wharf. Length 308 ft.; width 40 ft. Minimum depth of water 23 ft. below LAT (due to debris which is being removed). (N.B. channel restriction 26 ft.)

**FRESH WATER:** None available.

**FUEL:** Diesel fuel and distillate are available. Supply is by road tanker.

**CUSTOMS ALLOWANCE:** Tobacco: 1 lb. per person, 400 cigarettes deemed equivalent to 1 lb. Wine/spirit: Not in excess of three quarts per person.

**REPAIRS:** No facilities.

**AIRPORT:** Distance from port 2 miles by road, served by regular airlines.

**TIME:** GMT plus 10 hours. No change.

**AUTHORITY:** Port Manager, PO Box 127, Kavieng. Tel. (office) 244. Telegraphic Address "Portman, Kavieng".

**AGENT:** See "Rabaul".

### KIETA: 06.13 S. 155.28 E.

**PORT LIMITS:** Marowa Point to Western end of Arovo Island; Eastern end of Arovo Island to beacon on Wogoromodo Reef to Kepotto Point; Southern tip of Bakawarri Island to Mission Point.

**PILOTAGE:** A Pilot is available on application to the Harbour Master.

**TUGS:** None available.

**BERTHING:** *Main Wharf:* Minimum depth at LAT 24·6 ft., length 208 ft., width 36 ft. Position 6° 13.27′ S., 155° 38.25′ E.

The wharf is situated in front of a steel sheet piling retaining wall which provides for coaster berths of 95 ft. and 190 ft. at the Western and Eastern ends respectively.

**FRESH WATER:** Not available.

**FUEL:** Distillate is available by road tanker.

**AUTHORITY:** Port Manager, PO Box 149, Kieta. Tel. office 956063, residence 956370. Telegraphic address, "Portman, Kieta".

**AGENT:** See "Port Moresby".

### KIMBE: 05.33 S. 150.09 E.

**PORT LIMITS:** Starting on the shore at a point 295° 260 m. from the North-west corner on the wharf face thence 044° 317 m. thence 132° 490 m. thence 216° to the shore.

**PILOTAGE:** The administration does not maintain a Pilot at Kimbe. Arrangements may, however, be made with the Harbour Master at Rabaul.

**TUGS:** Not available.

**BERTHING:** Position of wharf, 05° 32.93′ S. 150° 09.26′ E. Length of "T" head, 200 ft. width 40 ft. Height of wharf above LAT 10·2 ft. Minimum depths of water below LAT are as follows: outer face 35 ft., inner East 19·5 ft., inner West 18 ft.

**FRESH WATER:** Not available.

**FUEL:** Not available.

**AUTHORITY:** Port Manager, PO Box 65, Kimbe. Tel. (office) 48. Telegraphic address, "Portman, Kimbe".

## LAE: 06.48 S. 147.11 E.

**PORT LIMITS:** From a position Lat. 6° 44′ 12″ S. Long. 146° 59′ 52″ E. 175° T. for 2·2 cables, thence 270° T for 9·3 cables, thence 017° T to the shore. Time of arrival at Sugarloaf Anchorage, if berth is not immediately available, is accepted as time of arrrival in port.

**DOCUMENTS:** First port of call in Papua New Guinea the following inward Customs documents are required to be handed to Customs Department within 24 hours of ship's arrival:

3 copies Inward Passenger List.
7 copies Inward Customs Manifest.
3 copies List of Crew.
3 copies Articles in Private Possession of Officers and Crew – Form 5.
3 copies Stores List.
2 copies Immigration Restriction Ordinance List (Form 6) being complete list of passengers disembarking and in transit.

If other than first port of call:

3 copies Inward Passenger List.
7 copies Inward Customs Manifest.
Outward Customs Clearance from last port of call.

**PILOTAGE:** The Administration's Harbour Master acts as Pilot if required. Pilot will board vessel 3 miles from Overseas wharf, from a 25 ft. fibreglass blue and white cabin cruiser.

Telegrams requesting a Pilot should be addressed to Lyle Lae through Lae Radio on 50 kc/s between 2200 GMT and 0830 GMT any day. VHF station, call sign Lae Harbour, Channel 16.

**ANCHORAGES:** Safe anchorage is available about 5 miles from main wharf, in the Huon Gulf area, called Sugarloaf Anchorage, at approximately one and a half miles offshore between beacons: Northern Beacon lat. 6 deg. 47′ 10″ S., long. 146 deg. 57′ 20″ E. Southern Beacon lat. 6 deg. 48′ 20″ S., long. 146 deg. 57′ 6″ E.

Holding ground is good and 11 fathoms is found just South of the line with Northern Beacon bearing West true one and a half miles distant. The depth varies within a fathom or two in seasons on account of the soft bottom.

Medium-sized vessels up to 450 ft. LOA may find safe anchorage 1½ cables from N.W. end of the Overseas wharf in position 6° 44′ 03″ S., 156° 48′ 48″ E. Depth of water 30 ft.

**RESTRICTIONS:** The port works 0600–2400, 7 days a week, except on Christmas Day and Good Friday.

Except for LPG and fuel, vessels berth and sail any time of the day or night, depending on availability of berths and number of vessels waiting for a berth.

**MAX. SIZE:** The Overseas wharf is 810 ft. long, with a minimum depth of water at LAT 36 ft. Normally two vessels, max. draft 30 ft., are berthed simultaneously, each overhanging the ends of the wharf.

**HEALTH:** (*a*) Vessels Arriving Directly from Australia. Pratique is given by radio to vessels which voyage directly from Australia to a Territory port. Master of vessel notifies Quarantine Officer at the port of entry to which he is proceeding of ETA, the number of passengers and crew and whether there is any sickness aboard. This notification from Master is sent not longer than 24 hours and not less than 12 hours of the ETA. If there is no sickness aboard a reply is sent stating that pratique is granted, and when a vessel arrives the actual pratique form is delivered to Master of vessel or to Collector of Customs to hand to Master. Full pratique is given.

(*b*) Vessels Arriving from a Foreign Port. All vessels which arrive from a foreign port must anchor in the designated position and await arrival of a Quarantine Officer who boards the vessel by himself – no other person (except a Pilot) is to be allowed on board vessel until pratique has been granted. If a Pilot is on board he must remain on board until pratique is granted.

*Smallpox.* All passengers and crew are required to be in possession of a valid International Certificate of Vaccination against smallpox on arrival in the Territory. *Cholera.* All passengers and crew are required to be inoculated against cholera if the vessel is expected to arrive at a port in the Territory within seven days of leaving an area where cholera is either endemic or is present.

**RADIO:** Radio contact is made through Lae Radio on 500 kc/s and station call sign is VIL. Telegraphic address for radio contact is Lyle Lae.

**TUGS:** None available. Two 21-ft. steel work-boats are available for running lines to wharf and shore bollards.

**BERTHING:** Vessels berth either port or starboard side to at the direction of the Port Manager. Provided anchorage in Milford Haven Bay is clear, ample swinging room is available off the North-western end of the wharf.

**STEVEDORES:** There are three stevedoring companies in port of Lae. Information required by the stevedores is approximately 72 hours' notice of the number of gangs required, hatch tonnages and information of any particular heavy lifts or awkward cargo.

**MEDICAL:** Maximum possible notice should be given so that full arrangements can be made with regard to hospitalisation, etc. Full hospital facilities are available approximately two and a half miles from the wharf.

**TANKERS:** Tankers berth on the wharf, maximum permissible draft 31 ft. and only one tanker can berth at a time. Tankers must be coupled up to the shore pipe-line and pumping commenced at least one hour before sunset.

**DENSITY:** Due to proximity of Markham River, fresh water extendding approximately one and a half miles from the wharf.

**FRESH WATER:** Fresh water is available in unlimited quantity at a rate of 30 tons per hour.

**FUEL:** Only light grade fuels are available such as dieseline and distillate.

**GANGWAY/DECK WATCHMEN:** Watchmen are not requir

**OPENING/CLOSING HATCHES:** Normally carried out by ste dores.

**CERTIFICATES:** Certificates of Registration, and Standa Articles. If a ship remains in port over 24 hrs., Articles must stamped by Harbour Master. Certificate of Registry and Port D Certificate must be produced to Port Manager if requested.

**CUSTOMS ALLOWANCES:** A duty-free issue of 200 cigare or the equivalent weight in tobacco is issued by Customs every days. No wines or spirits allowance to crew members.

**CARGO GEAR:** All cargo gear necessary for discharging and lo ing is carried by stevedoring company.

**IDENTIFICATION CARDS:** Not required.

**CONSULS:** No consular representatives at this port and immigration and migration matters are handled by the Collector Customs.

**REPAIRS:** Only minor repairs can be carried out.

**REPATRIATION:** Full repatriation facilities are available effecting any crew changes.

**AIRPORT:** Situated approximately 2 miles from Wharf area. Th is a daily connection to Australia with Trans-Australia Airlines Ansett Airlines of Australia.

**TIME:** Local time is 10 hours ahead of GMT, and does not during the year.

**HOLIDAYS:** New Year's Day (1st January); Australian Foun tion Day (26th January); Good Friday; Easter Saturday; Eas Sunday; Easter Monday; Anzac Day (25th April); Queen's Birth (June); Commemoration Day (Mid-September); Christmas D (25th December); Boxing Day (26th December). Cargo work carried on all through the year with the exception of Christmas D and Good Friday.

**POLICE/AMBULANCE/FIRE:** Police 2222; Ambulance 2 Fire 2255.

Fire alarms connected to Fire Station are situated outside No and No. 5 cargo sheds. A direct telephone line to the Police Stati is situated at No. 2 cargo shed.

**TELEPHONES:** No facilities available for connection of a te phone to vessels, but there is a public telephone installed in wharf area.

**SHORE LEAVE:** Allowed.

**DELAYS:** Whilst only 800 ft. of overseas wharfage is availa there is likely to be berthing delays of up to four days.

**AUTHORITY:** The Port Manager, Papua and New Guinea Ha bours Board, PO Box 563, Lae. Tel. 42650 and 42620. Telegraph address, "Portman Lae".

**AGENT:** See "Port Moresby".

## LORENGAU: 02.01 S. 147.16 E.

**PORT LIMITS:** From position 02° 00.78′ S. 147° 16.11′ E., 012° 2,040 m., thence 121° for 5,190 m. to the high water mark on Westernmost tip of Butjo Mokau Island thence 221° for 2,160 m.

**PILOTAGE:** No Pilot stationed at Lorengau.

**TUGS:** A workboat (90 b.h.p.) is available.

**BERTHING** Nabu Wharf (Parendo Point): Position 02° 00.81′ 147° 16.27′ E. Length 50 ft., width 30 ft. Minimum depth of water ISLW 17 ft. A berthing dolphin having a face length of 15 ft. is loca 85 ft. from the North end of the wharf.

There are also two wharves for small craft.

**FRESH WATER:** Available in limited quantities.

**FUEL:** Distillate is available by pipe-line at Nabu Wharf or by ro tankers.

**AUTHORITY:** District Commissioner, District Office, Loreng Tel. (office) 1. (residence) 34. Telegraphic address, "Disc Lorengau".

## MADANG: 05.12 S. 145.49 E.

**PORT LIMITS:** A line drawn from Cape Jantzen to Kalib Point.

**DOCUMENTS:** See "Lae".

**PILOTAGE:** One pilot is normally available on application Harbour Master. Boarding station is situated ½ to 1 mile off Coast Watcher's Light on Kalibobo Point.

**RESTRICTIONS:** Ships do not normally berth at East Wharf o the West Wharf after civil sunset.

**HEALTH:** See "Lae".

**RADIO:** Call through Lae Radio VIL.

**TUGS:** No tug is available but a 40-ft. work-boat may assist application to Harbour Master.

**BERTHING:** *West Wharf:* Length 450 ft.; width 42 ft. Minim depth at ISLW 33 ft.

*Small Ship's Wharf:* Length 75 ft.; width 30 ft. Minimum dept ISLW 21 ft.

*Concrete Quay:* Length 100 ft.; width 15 ft. Minimum depth at 5 ft. 9 in.

**FRESH WATER:** Available at wharves but supply is lim

**FUEL:** Fuel oil and distillate are available. Supply is by road ta

**CUSTOMS ALLOWANCE:** Tobacco: 1 lb per person, 400 ci ettes deemed to be equivalent of 1 lb. tobacco. Wine/spirit: No excess of three quarts per person.

**CONSULS:** None.

**REPAIRS:** All normal deck and engine repairs available. Slipw available up to 400 tons.

**REPATRIATION:** Can be arranged.

**AIRPORT:** Distance from port 4 miles by road, served by regular airlines.
**TIME:** GMT plus 10 hours throughout the year.
**AUTHORITY:** Port Manager, postal address: Box 273, Madang. Tel. (office) 822351, (residence) 822731. Cables: "Portman Madang".

**AGENT:** See "Port Moresby".

## ORO BAY: 08.54 S. 148.29 E.

**PORT LIMITS:** From the Easterly tip of Cape Sinclair to the mouth of Namani Creek (lat. 8° 52.6′ S., long. 148° 29.25′ E.).
**PILOTAGE:** There is no Pilot at Oro Bay.
**TUGS:** None available.
**BERTHING:** Position of wharf, 08° 53.55′ S., 148° 29.37′ E. Length of "T" head 198 ft.; width 40 ft. Minimum depths of water below ISLW are as follows: at Outer Face 37.5 ft. at Inner West 34·5 ft.
**FRESH WATER:** Not available.
**FUEL:** Diesel fuel and distillate can be supplied by road tanker.
**AUTHORITY:** Port Manager, PO Box 160, Popondetta, telegraphic address, "Portman Popondetta".

**AGENT:** See "Port Moresby".

## PORT MORESBY: 09.26 S. 147.06 E.

**PORT LIMITS:** A line drawn from Bogirohodobi to the Southernmost tip of the South Lolurua Island.
**DOCUMENTS:**
4 Crew Lists.
4 Passenger Lists.
1 Customs List of Articles in possession of Crew.
3 Customs List showing Stores, fuel, etc. on board.
Normal International Health Papers.
7 Inward Manifest.
1 Copy of Bills of Lading.

**PILOTAGE:** Apply by radio through Agent or direct to "Harmas" 48 hours before arrival and up-date as necessary. Pilot vessel is fitted with VHF calling on Channel 16.

Pilotage is compulsory. Pilot vessel is 53 ft. long, white hull with word "Pilot" in large block letters each side. White superstructure, small buff-colour funnel, green awnings. White over red all-round lights at night. Pilot usually boards 1½–2 miles South-east of Basilisk Light Beacon. In heavy weather, ship may enter on leads and Pilot will board North-west of Basilisk Beacon. Usual safety precautions are expected. Vessels may anchor North-easterly of Basilisk Beacon clear of leads.
**ANCHORAGES:** If necessary to anchor prior Pilot boarding do so at Kila Leads. Pilot will then direct to suitable anchorage on boarding.
**RESTRICTIONS:** No restrictions after dark if conditions favourable.
**MAX. SIZE:** For Berthing 700 ft. length. Draft 27 ft. *Tankers:* 600 ft. length. Draft 40 ft.
**HEALTH:** Radio "Health Boroko" 24 hours prior to arrival. If from Australia or another T.P.N.G. port pratique will be granted by radio or advised by Agent on arrival. In other instances if a ship has been at sea more than 10 days from last port of call and no quarantine disease on board may also be given Radio Pratique, but this is up to Health Authorities.
**RADIO:** Port Moresby Radio, VIG.
**TUGS:** One tug of 560 h.p. and 7-ton bollard pull available through arrangement with Harbour Master direct.
**BERTHING:** Permission required to berth after dark which is normally automatic. Maximum draft 25 ft. but on inner North-east arm 320 ft. length, maximum draft 15 ft. Height of deck above LWOS 14·64 ft. Wharf length 700 ft.
**STEVEDORES:** ETA required 24 hours advising no. of gangs required.
**MEDICAL:** If serious notify any time. Hospital facilities available. Normal International Health Regulations required.
**TANKERS:** Two tanker discharge berths, one with depth of 45 ft., and one with depth of 48 ft.
**FRESH WATER:** Available at berth. Rate of delivery 20 tons per hr.
**FUEL:** Only gasoil and light marine diesel available. By road tanker to wharf. Deliveries normally limited to 100 tons.
**GANGWAY/DECK WATCHMEN:** Required: Ships crew.
**OPENING/CLOSING HATCHES:** Carried out by Stevedores.
**CUSTOMS ALLOWANCES:** 200 cigarettes each 10 days. No wines/spirits allowance.
**CARGO GEAR:** Normally supplied by stevedores unless special gear required.
**IDENTIFICATION CARDS:** Required.
**CONSULS:** French. Tel. 2033/34. British. Tel. 3095.
**REPAIRS:** Only very minor deck and engine repairs carried out.
**REPATRIATION:** If necessary crew changes could be effected though not recommended.
**AIRPORT:** Distance 6 miles from Wharf Area regular daily flights to Australia where overseas connection normally made. Also two flights a week via Manila and Hong Kong to Europe, and one flight a week to Singapore via Darwin.
**TIME:** Ten hours ahead of GMT. No change throughout the year.
**HOLIDAYS:** Only two days vessels do not work. Good Friday and Christmas Day.
**POLICE/AMBULANCE/FIRE:** Police 55555; Ambulance 58622; Fire 2255.
**TELEPHONES:** Can be placed on ship at berth local calls only.
**GENERAL:** If any tankers arrive for water or provisions and wish to berth they have to be gas free and tanks blown.
**SERVICES:** Very limited, compass adjusting can be done if necessary.
**SHORE LEAVE:** Crew members normally permitted ashore.
**DELAYS:** Port very busy, turn-around good, but delays can occur up to 48 hours at times.
**AUTHORITY:** The Port Manager, PO Box 384, Port Moresby. Telegraphic address "Portman, Port Moresby". Tel. (office) 2554, (residence) 53635.

**AGENT:** Burns, Philip (New Guinea) Ltd., PO Box 75, Port Moresby. Telex NE 22116. Cables: "Burphil Port Moresby".

Agents at all major Papua and New Guinea ports.

## RABAUL: 04.13 S. 152.12 E.

**PORT LIMITS:** The port limits are from Matupit Causeway – the connection (on Chart Aus 680) to Matupit Island, across to the Easternmost point of Vulcan.
**DOCUMENTS:** See "Lae".
**PILOTAGE:** Two pilots are normally available on application to Harbour Master. Boarding station is one mile South of Sulphur Point, off Matupi Harbour for vessel requiring full pilotage, or between the Beehives and the Wharves for vessels requiring berthing assistance only.
**HEALTH:** See "Lae".
**RADIO:** Call sign VJZ.
**TUGS:** No tug is available, but two 40-ft. work-boats of 165 h.p. may be hired to assist in manoeuvring.
**BERTHING:** *East Wharf:* Lat. 4° 12.1′ S. Long. 152° 10.5′ E. Length 400 ft., width 40 ft. Minimum depth at LAT 26 ft.

*New Wharf:* Length 500 ft. Minimum depth at LAT 33·5 ft.

*Kamaki Wharf:* Out of commission.

*Small Ships' Wharf:* Length 204 ft., width 22 ft. Minimum depth at LAT 9·5 ft.
**CARGO HANDLING:** A limited number of small containers are handled only by conventional methods. The ships concerned are unit loaders and carry containers, palletised, and wire caged cargoes. These are handled mainly by forklifts, from side ports.

The only roll-on/roll-off carriers are coastal barges, with bow doors.

LPG Carriers discharge at CPL Toboi Wharf, which is privately owned. This wharf also handled copra expeller and coconut oil. The expeller is loaded in bulk, but by conventional methods, i.e. bins hoisted on board by ship's gear, and then emptied over the hold.
**FRESH WATER:** Available at the wharves. The rate is 25 tons an hour depending on number of vessels taking water simultaneously.

Also obtainable at anchor by water barge, with a minimum of 100 tons. As a point of interest the water barges are old Japanese dumb submarines, used in the war to bring cargo from Kavieng and towed by a powered submarine submerged.
**FUEL:** Diesel and distillate are available, the former by pipeline, the latter by road tanker. Fuel available by barge if sufficient notice given.
**DEVELOPMENTS:** Design is being undertaken for expansion of coastal facilities to eastward of the small ships wharf.
**CUSTOMS ALLOWANCES:** Tobacco: 1 lb per person, 400 cigarettes deemed equivalent to 1 lb. tobacco. Wine/spirit: not in excess of three reputed quarts per person.
**CONSULS:** None.
**REPAIRS:** Small repairs undertaken.
**DRY-DOCKS:** None available. Slipway length 140 ft.
**AIRPORT:** Distance from port 3 miles by road. Served by regular airlines.
**TIME:** GMT plus 10 hours. No change throughout the year.
**AUTHORITY:** Port Manager, PO Box 592, Rabaul, Tel. (office) 922970, (residence) 922622. Telegraphic address, "Portman Rabaul".

**AGENT:** Burns, Philip (New Guinea) Limited, POB 87, Rabaul Tel. 92–2813. After hours tel. 92–2114. Cables: "Burphil Rabaul". Telex Burphil NE 92540.

## SAMARAI: 10.30 S. 151.00 E.

**PORT LIMITS:** From position lat. 10° 36.74′ S., long. 150° 39.6′ E., thence 270° for 5·46 cables, thence 000° for 5·46 cables, thence 090° for 7·1 cables, thence 180° to the shore.
**DOCUMENTS:** See "Lae".

**CONSULS:** None.

**REPAIRS:** Some minor repairs.

**REPATRIATION:** There are facilities for effecting crew changes and arranging any necessary repatriation. Those who are going to be repatriated must have a permit from the Port Authority to be allowed ashore.

**AIRPORT:** Ilo Airport, 8 kms. Scheduled flights twice a week on Tuesdays and Saturdays and regular airport in Tacna at 1½ hours by taxi, scheduled flights twice daily to Lima.

**TIME:** GMT minus 5 hours. No alterations during the year.

**HOLIDAYS:** 1st January (New Year); Maundy Thursday and Good Friday (change every year); 1st May (Labour Day); 29th June (Saint Peter and Saint Paul); 28th and 29th July (Motherland Days); 30th August (Saint Rosa of Lima); 1st November (All Saints Day); 8th December (Our Lady); 25th December (Christmas).

*Holidays which are not in the Calendar but are considered Holidays with reference to payments to the workers:* 6th January (King's Day); 19th March (Saint Joseph); Corpus Christi (it varies every year); The evening of the 24th June (India man day); 30th July (Motherland Day); 15th August (Feast of the Assumption); 24th September (Las Mercedes); 12th October (Race Day); 27th November (Tarapaca Battle); 9th December (Ayacucho Battle).

**POLICE/AMBULANCE/FIRE:** Southern Copper Corporation operate fire service. Police, tel. No. 3; Ambulance, tel. No. 3.

**TELEPHONES:** No arrangements for placing telephones on board.

**SHORE LEAVE:** Crew members allowed ashore and identify themselves with cards signed by Capitania del Puerto given through ship's Agents.

**GENERAL:** Tank cleaning and well cleaning must be done 5 miles leeward of the port. Not allowed to unload explosive cargo.

**DELAYS:** Only delays when quay is occupied by two ships. In the load/unload operations the port can attend to 4 ships simultaneously and 4 more when new quay (that is now being built) is finished.

**AUTHORITY:** The Port Authority is Capitan del Puerto, who is a Navy Officer. Cable address: Capitania de Puerto. Tel. 79.

**AGENT:** See "Callao".

## LA PAMPILLA

Tanker Buoy Berth about 30 miles North of Callao.

**DOCUMENTS, ETC.:** As for Callao.

**PILOTAGE:** Tankers calling at La Pampilla must first call Callao anchorage to be received and cleared by Authorities. Not necessary to call Callao after discharge as clearance simultaneous with reception. Pilot boards vessel at Callao anchorage and either remains on board or returns by launch to take vessel out, as required by Master.

**BERTHING:** Vessels moor to buoys. One submarine line of 18 in. reduced to 10 in. at vessel's connection running 1,500 m. from shore opposite La Pampilla refinery.

**LAUNCH:** Launch service between La Pampilla and Callao during vessel's stay in berth.

**GENERAL:** Two customs police and two refinery employees board at Callao and remain in vessel during discharge.

**AGENT:** See "Callao".

## MATARANI: 16.59 S. 72.07 W. (See Plan)

Matarani is a berth port. Main activity: loading of minerals, wool, coffee, skins, tin-ingots, discharging general cargo. Matarani is an important transhipment port for cargo to and from Bolivia.

**PILOTAGE:** Compulsory.

**RADIO:** *Arrival Advice:* 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent.

**TUGS:** 4 tugs available, 2 at 75 h.p., 1 at 690 h.p. and 1 at 800 h.p.

**BERTHING:** One quay with three berths. Length 450 m., width 20·15 m. Vessels of 570 ft. length can berth. Depth alongside 30 ft.

**CRANES:** 7 cranes. 2 at 7 tons, 3 at 10 tons, 1 at 15 tons and 1 at 20 tons lifting capacity.

**MEDICAL:** A hospital is available.

**STEVEDORES:** *Working Hours:* 0800–1200, 1300–1700, 1700–2400, 0000–0600.

9 gangs available of 15 men each.

**FRESH WATER:** Available.

**FUEL:** Not available.

**GENERAL:** *Swell Period:* From June to August.

**AGENT:** See "Callao".

## PACASMAYO: 07.24 S. 79.33 W.

**DOCUMENTS:**

3 copies Voyage Log Extract.
2 originals and 5 copies of Entry/Exit Declaration, endorsed by Consul.
8 copies of Passenger Lists for the Port.
8 copies of Transit Passengers List.
4 copies of Store List.
4 copies of Personal Belongings Manifest.
13 copies of Cargo Manifest.
1 Maritime Health Declaration.
2 Crew Lists.
1 Vaccination List.
When this is the first Peruvian port, Gross Tonnage Certificates.
When having cargo for the port, Statement of Cargo, endorsed by Consul.
When Pacasmayo is the first or last port called, Lists or Manifests of cargo in transit (2 copies each).

Refer to "San Juan" for further information on Consular endorsement.

**PILOTAGE:** The port has no Pilots because it is an open bay. Vessels have free pratique after boarding by port officials.

**ANCHORAGE:** The most usual anchorage area is in position 7° 23′ 50″ S. 79° 35′ 10″ W. Bottom from 3¾ to 4½ fathoms deep.

**APPROACHES:** Reference points are the lighthouse of Cruz Punta Pacasmayo with a range of 12 miles, and during the day the cylindrical tower of cement factory with a height of 50 metres situated in the S.E. of the bay. On the head of the quay there is also a small iron tower of 9 metres height with a permanent red light of 2 miles visibility. The quay is very old and only flat boats can moor.

**MAX. SIZE:** Wide anchorage without problems concerning length or breadth. Recommended draught 4 fathoms, but it is possible to find 6, 8 or 10 fathoms towards the West. Current from South to North at an average of 6 knots.

**HEALTH:** Sanitary control is carried out by the health doctor who comes on board with port officials. Normally, captains notify any suspected illness or any other information by telegraph.

**RADIO:** There is only one radio station. It operates in the premises of the Agency Juan Dalmau, call sign OC155 and frequency 40.400 kc/s.

**TUGS:** They only operate to bring or take out flat bottomed barges once the vessel is moored.

**BERTHING:** Vessels anchor in open bay.

**LIGHTERS:** Nine lighters with a total capacity of 400 tons.

**CRANES:** One at 2 tons, 1 at 3 tons and 1 at 4 tons. Max. length of cases 7 m. Max. weight 6 tons.

**STEVEDORES:** Agents order the number of gangs required. These gangs work at a tariff hour/ton and the amount is controlled by the Port Captain. The number of gangs (9 men each) depends on loading/discharging speed required and on the number of holds and winches available. For overtime rates see "Pimentel."

**MEDICAL ATTENTION:** Can be provided by Centro Preventivo del Area de Salud or by Hospital Regional de Chepen, 35 km. from port (150 beds).

**DENSITY:** Salt water.

**FRESH WATER:** Not available.

**FUEL:** Not available.

**DEVELOPMENTS:** When the mines of Micchiquillay (copper) start working, the embarking capacity of the port has to be 100,000 tons per month, consequently it is planned to build a quay for minerals or otherwise a floating island 6 miles from the port for embarking in gross raw materials by pipelines.

**OPENING/CLOSING HATCHES:** These operations are carried out by the stevedores.

**SHIP CERTIFICATES:** Deratisation or Fumigation Certificate; Vaccination Certificate for Crew and Passengers; Tonnage Certificate when coming from abroad.

**CUSTOMS ALLOWANCES:** Only tobacco, wines, spirits required for normal consumption, which must be included in vessel's stores list.

**CARGO GEAR:** Ships gear used.

**IDENTIFICATION CARDS:** Not required unless leaving the vessel.

**CONSULS:** There are no Consuls in the port.

**REPAIRS:** There is a small workshop in the port for minor repairs such as soldering, etc. There is no foundry.

**DRY DOCKS:** Nearest at Callao.

**REPATRIATION:** Members of crew or passengers can be repatriated subject to Port Authorities permission and passport control.

**AIRPORT:** There is a small emergency airport 2 km. from the port where biplanes can land.

**TIME:** GMT minus 5 hours. During the 3 months of summer clocks advance 1 hour.

**HOLIDAYS:** Holidays have been restricted. The national official holidays are: 27th and 28th July (National Independence Days); 1st January (New Year); 25th December (Religious Fete); Maundy Thursday and Good Friday; variable days and 1st May (Workers' Day).

**POLICE/AMBULANCE/FIRE:** Police 2126; Ambulance 2225; Fire 2081.

**TELEPHONES:** It is not possible to instal telephones on board. Communication by walkie-talkie radio.

**GENERAL:** Fresh and dry provisions can be supplied, such as meat, poultry, vegetables and fruits.

**SERVICES:** There is no tank-cleaning equipment and the discharge of tank washing and any other kind of garbage is forbidden, for the bay is a bathing area.

**SHORE LEAVE:** Allowed.

**DELAYS:** The vessel is moored on arrival. Delays can occur due to heavy sea or rain in case of cement loading.

**AUTHORITY:** Captain of the Port: Captain de Fragata, Rafael Diaz Zumaeta, Tel. 2202.

**AGENT:** See "Callao".

## PAITA: 05.05 S. 81.07 W. (See Plan)

**DOCUMENTS:**

5 copies Peruvian "Declaracion de Entrada".
13 Crew Lists.
5 Cargo Manifests, from each port where cargo loaded, or negative.
5 copies of each Bill of Lading.

3 Personal Effects Lists.
13 Stores Lists.
1 Tonnage Certificate from first and last port.
1 International Maritime Health Certificate.
13 Passenger Lists, disembarking, or negative.
13 Passenger Lists, in transit, or negative.
1 Clearance from last port.
1 Sealed envelope from Peruvian Consulate addressed to Customs.
(Documents should be visaed by Peruvian Consulate.)

**PILOTAGE:** Compulsory. There are two Pilots, on 24 hour service. Arranged by Agent. The boat is an old disembarking launch, hoisting blue flag with a white "P" Pilot will board after free pratique has been granted by Port Captain and Health authorities.
**ANCHORAGE:** Recommended 5.04 S. 81.07 W.
**RESTRICTIONS:** Draft restricted to 31 ft. at low water.
**MAX. SIZE:** Length and breadth practically unlimited.
**HEALTH:** Agent will notify Health Authorities about the vessel's arrival.
**RADIO:** Recommended Balboa Radio.
*Arrival Notice:* 24 hours Notice of Arrival should be sent to the Captain of the Port and Agent.
**TUGS:** 1 tug of 180 h.p. and one motor barge of 68 h.p. available.
**BERTHING:** One finger pier, length 365 m, width 36 ft. Four berths available, depths are as follows:

| | |
|---|---|
| No. 1A (North-west Berth) | 34·1 ft. |
| 1B (North-east Berth) | 34·4 ft. |
| 1C (South-west Berth) | 23·8 ft. |
| 1D (South-east Berth) | 22·9 ft. |

A safety margin of 3 ft. should be observed. It is advisable to request (from Pilot) berths "B" or "D", if empty, due to the prevailing winds. The berths have good fenders.
**STEVEDORES:** Arranged by Agent at 24 hrs. notice.
*Working Hours:* 0800–1200, 1300–1700, 1700–2400 and 0000–0700.
*Night work:* Possible, as long as it is ordered in plenty of time.
10 gangs of 9 men each available per shift.
**MEDICAL:** There is a local hospital with all facilities.
**DENSITY:** 1030.
**FRESH WATER:** Not available.
**FUEL:** Not available.
**FIRE PRECAUTIONS:** Port Authority fire equipment stationed at the end of the pier.
**STORES:** Fresh provisions available.
**GANGWAY/DECK WATCHMAN:** Available on request.
**SHIP'S CERTIFICATES:** Not requested.
**CUSTOMS ALLOWANCES:** Two cartons and one bottle per person.
**CARGO GEAR:** No additional requirements.
**IDENTIFICATION CARDS:** Not required.
**CONSULS:** Ecuador.
**REPAIRS:** No facilities.
**REPATRIATION:** Allowed on request to the Port Captain.
**GENERAL:** Painting and chipping ship's side restricted. Very strict concerning rat-guards, throwing of garbage, etc.
**AIRPORT:** Piura, airport 55 km. with domestic flights to Lima International Airport.
**HOLIDAYS:** 1st May only.
**AUTHORITY:** Captain del Puerto.

**AGENT:** See "Callao".

## PIMENTEL: 06.50 S. 79.58 W.

Pimentel is an unprotected open road port, loading/discharging only from/into lighters. Clearance is possible day and night, including Sunday and holidays, but of course with overtime additionals. Main activity: Sugar export, import of fertilisers and general cargo.
**PILOTAGE:** Not available.
**ANCHORAGE:** Vessels usually anchor about 1½ miles off the Mole Head in 7–8 fathoms, near to the anchorage place of lighters.
**RADIO:** *Arrival Notice:* 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent.
**TUGS:** 2 at 82 h.p. 2 at 120 h.p. and 2 at 134 h.p.
**LIGHTERS:** 15 lighters with a total capacity of 1,170 tons.
**CRANES:** On the mole there are 3 diesel cranes each 3 ton capacity, 3 steam cranes with 4, 6 and 15 ton capacity. Maximum dimensions of Cargo 27 ft. (length) × 15 ft. (wide) × 21 ft. (height).
**STEVEDORES:** *Working Hours:* 0700–1100 and 1300–1700. Overtime (plus 100%) 1100–1300 and 1700–2400. Overtime (plus 200%) 0000–0700.
On Sundays and holidays an additional 100% to the abovementioned tariffs.
**MEDICAL:** There is a hospital at Chiclayo 15 km. from the port.
**TANKERS:** *Submarine Pipe-line:* Diameter 8 in. max. draft 18 ft. One pipe-line for clean products and one for dirty products.
**FRESH WATER:** Not available.
**FUEL:** Not available.
**CONSULS:** Vice-consul of the Netherlands.
**SURVEYOR:** Mr. Manuel S. Reyes H., sub-agent of Lloyd's of London.
**GENERAL:** *Swell Periods:* Pimentel being an unprotected open road port it frequently occurs that the port has to be closed due to heavy swell. The swell comes up suddenly and is not subject to any specific period, but it occurs more frequently during June–September and the Easter week.

**AGENT:** See "Callao".

## PUERTO CHICAMA: 07.50 S. 79.22 W.

Puerto Chicama is about 295 miles North of Callao. Fishmea
loaded from lighters in an open roadstead.
**PILOTAGE:** Not available.
**ANCHORAGE:** Vessels anchor about one mile from the Mole.
**RADIO:** *Arrival Advice:* Advise general Agents in Lima who
telephone Port Agents.
**TUGS:** 3 tugs available, 1 of 65 tons and 2 of 80 tons each.
**LIGHTERS:** 20 lighters with a total capacity of 900 tons.
**CRANES:** 4 cranes, 2 of 2 tons, 1 of 4 tons and 1 of 6 tons.
**STEVEDORES:** Working hours are from 0700–2400. These ho
may be exceeded to complete loading. Five gangs of 9 men
available.
**FRESH WATER:** Not available.
**FUEL:** Not available.
**GENERAL:** *Swell Period:* During the months of June, July a
August.

**AGENT:** See "Callao".

## SALAVERRY: 8.14 S. 78.57 W. (See Plan)

**DOCUMENTS:** See "Callao".
**PILOTAGE:** Compulsory.
**RESTRICTIONS:** Harbour entrance is sand and liable to silti
Advisable to check draft requirements in advance, as depths
subject to latest dredging.
**MAX. SIZE:** Approx. 25,000 dwt. with up to 29 ft. draft.
**PRATIQUE:** Cable Agent requesting free pratique. Agent m
be notified in advance if disease suspected on board.
**RADIO:** *Arrival Advice:* 24 hours Notice of Arrival should be s
to the Captain of the Port and the Agent.
**TUGS:** Four tugs available, 1 each at 720 h.p., 160 h.p., 85 h.p. a
40 h.p.
**BERTHING:** *No. 1 Pier:* Length 220 m. Vessels able to berth bo
sides. Max. draft 29 ft.
*No. 2 Pier:* Length 230 m. Vessels able to berth both sides. M
draft 29 ft. This pier is specially for the loading of sugar in bul
loading bridges available, loading rate 200 t.p.h. each.
**STEVEDORES:** *Working hours:* 0700–2300. Sugar and molass
in bulk loaded 24 hours a day. 10 gang available of 9 men each.
**CRANES:** 2 at 18 tons capacity.
**MEDICAL:** At Trujillo, 15 km. from the port.
**TANKERS:** *Submarine Pipe line:* Diameter of 10 in., depth 26 ft.
**FRESH WATER:** Available.
**FUEL:** Not available.
**GANGWAY/DECK WATCHMEN:** Recommended.
**CUSTOMS ALLOWANCES:** Any amount held over nom
consumption may result in customs search being imposed.
**IDENTIFICATION CARDS:** Supplied by Agent and stamped
Immigration. Required for all crew members.
**HOLIDAYS:** Only 1st May when work is not available.
**CONSULS:** Nearest at Callao/Lima.
**GENERAL:** *Swell Period:* June to September.

**AGENT:** See "Callao".

## SAN JUAN: 15.21 S. 75.11 W. (See Plan)
## SAN NICOLAS: 15.14 S. 75.14 W. (See Plan)

**DOCUMENTS**

| Maritime Declaration of Health | 2 for arrival |
| *Passenger List (Form ALALC/OEA 4) | 6 |

* This document is not to be presented when vessel is not carryi
passengers or cargo.

*Note* 1. If no Peruvian Consul exists at port of departure or with
50 km/s. radius, then the documents which require Consular vis
should be signed by a Consul of a friendly nation stating that the
is no Peruvian Consul. If no Consul of any nation exists at the po
of departure, the documents above mentioned must bear a certi
cate signed by an official of the port stating that no Consul of an
nation exists at the port of departure or within 50 km/s. radius.

*Note* 2. In the case of a vessel merely transiting the Panam
Canal, no new Peruvian Consular clearance is required. The Co
sular despatch from port of departure will be accepted provided it
correct and no changes have taken place. If, however, vessel sto
for any business during the Canal passage, embarking or dise
barking passengers, crew changes, loading or discharging carg
or the conduct of any business which causes a change in the Pe
vian Consular documents, New Consular Dispatch must be obtaine
Panama or Balboa, which ever applies, becomes the port of depa
ture for Peru.

The following documents should be available for inspection:
Ship's Papers.
Valid Fumigation or Exemption Certificate.
Crew's Identity Documents.

International Vaccination Certificates of all persons aboard.

List with following data: date and port of issue of ship's register, date and port of issue of Health Certificate, date of vessels, building and yard, list of ports of call with dates during previous four months.

**PILOTAGE:** Pilotage is compulsory for berthing. No vessel may proceed to pier until permission to berth has been granted. No vessel is permitted to berth alongside Marcona Mining Company's pier without an authorised Docking Pilot on board. While loading, during periods of heavy swells and surge a Marcona Pilot will be on board permanently. Masters are requested to make arrangements and facilities available.

Upon arrival in port, vessels must anchor and wait for reception. Official time of arrival is the time of anchoring. The starboard accommodation ladder must be rigged for port Officials and Marcona representatives. Ships approaching San Nicolas must fly their national and quarantine flags. Vessels proceeding to San Nicolas to load iron ore will radio Marcona Mining Company, Lima, Peru, cable address Marminco Lima, their ETA five days – forty-eight hours and again at twenty-four hours prior to arrival; when vessels have direct contact with station "OAS", a prestowage hatch list must be radioed to Agent, giving tonnage per hatch and loading sequence. The coast radio station "OAS" located in San Juan Bay should be contacted as soon as vessel is within range. Berthing instructions and other messages from Agent at San Nicolas will be transmitted via this station. Radio contact must be made 48 hours prior to arrival, specially on week-ends and holidays.

**BREAKWATER:** A 2,653 ft. long breakwater has been built in order to reduce the effects of the swell alongside of the pier. The breakwater is at the West side of the pier 875 yards of distance on the South end, and does not run parallel to the pier, but at N. 36° 35′ 28″ E. angle. The North end of the breakwater is 1,430 ft. from the North end of the dolphin, but the perpendicular distance from the pier to the closest point of the breakwater is only 1,090 ft.

At the North end of the breakwater there is a lighthouse with the following characteristics: one green flash every 4 seconds, visibility 5 miles.

There are also three buoys indicating the end of the toe of the breakwater, and whose characteristics are as follows: one white flash every 4 seconds, visibility 3 miles.

**ANCHORAGE:** The anchorage recommended for vessels waiting for berth is in inner portion of the bay, East of meridian through San Nicolas point in depths of 15 to 20 fathoms. When anchoring, it is essential to leave sufficient sea room, about $\frac{3}{4}$ of a mile for ships to manoeuvre in and about the berh.

Wreck of M/S *Templar* lies in position: Lat. 15° 13′ 53″ S., Long. 75° 09′ 48″ W. The obstruction lies in approximately 150 ft. of water. Clearance above the obstruction is 60 ft. Do not anchor in the vicinity of the wreck.

**RADIO:** Coast Radio Station "OAS" is located in port of San Juan and serves both San Juan and San Nicolas. This station listens on 500 kc/s. 1200/1400 GMT, 4345 kHz 0130–0200 GMT, 6,510 kHz 0045–0100 GMT, 8,680 kHz 0000/0045 – 0100/0115 – 1200/1230 – 1600/1630 - 2000/2100 GMT, 16,968 kHz 0115/0130 – 1330/1400 – 1630/1655. It handles traffic on 410, 425, 444, 448, 454, 468, and 480 kc/s. Antenna output is 300 w.

There is a transmitter with the following frequencies schedule:

4,365 kHz – GMT 0045; 0100; 1000; 0200
8,680 kHz – GMT 0000/0045; 1200/1230; 1600/1630; 2000/2100
16,978 kHz – GMT 1330/1400; 1630/1700; 2100/2200 listening on 4, 8 and 16 M/rz.

**TUGS:** Two tugs available at 500 h.p.

**BERTHING:** *Pier and Mooring Facilities:* The pier is located at the South side of the bay and is built on a North–South direction. It is constructed of pre-stressed concrete and steel pipe-lines with deck 1,000 ft. long and 50 ft. wide. The deck is 11 ft. 3 in. above mean low water.

At the pier head, a mooring dolphin has been constructed to make fast the stern lines of any vessel bigger than 900 ft. overall length, the diameter 50 ft. Distance from Northern end of pier to Northern end of dolphin 198 ft.

There is a wooden retractile fender around the dolphin of 7·5 ft. wide. There are three big bollards, two pelican hooks and an electric winch to make fast the stern lines. There is also a connecting bridge from the pier to the dolphin, which is 148 ft. long.

There is a fendering system on both sides of the pier consisting of wood pilings and a continuous rail of laminated lumber and rubber cylinders which keep vessels five ft. from the concrete pier. On the West side of the pier (ore-loading side) there are 28 mooring cleats, 12 bollards and 3 double mooring bitts. At the centre of the pier-head there is one bollard. On the East side of the pier there are 23 cleats, 2 bollards and 1 double mooring bitt. The loading berth on the West side of the pier has been deepened.

The original depth in the berth was 42 ft. at the shore end and 59 ft. at the seaward end. The new depth is 62 ft. all alongside the pier and up to 300 ft. westward from the pier fender, except in the place known as anchor pocket which is located between the pier-head and the dolphin. The anchor pocket is 70 ft. deep, 250 ft. long and 300 ft. wide. When docking the 2 anchors are let go in that pocket where enough water exists to prevent any collision of the ship with her own anchors.

The East side of the pier still has the original depth.

The bottom alongside is mud and sand. The ore ship loader has a pier straddle clearance height of 14 ft. and width of 12 ft. thus restricting the size of cargo parcels placed on the pier when the gantry is positioned inshore.

*Berthing and Mooring:* Vessels calling at San Nicolas for the discharging of general cargo must berth on the East side of the pier with the starboard side of the ship to the pier. Such vessels use their own regular mooring lines. Only ore in slurry form is loaded at this side through 20 in. pipe-lines.

Ore vessels berth at the West side of the pier with the port side of the ship to the pier. In addition to the vessels own regular mooring lines, heavy surge lines are compulsory for all vessels loading iron ore. Wires are not permitted as moorings to the pier except when attached to tension winches.

*VERY IMPORTANT:* While vessels are alongside the pier, engines must be ready for immediate use. Sufficient crew must be on deck at all times to tend mooring lines and heave in the slack as loading progresses. Failure to do so may result in a discontinuance of loading and the vessel being moved out from the berth.

*Loading and Unloading:* Loading is generally carried out at the rate of about 4000 l.t.p.h. Vessels arriving with 50 tons of cargo or less may have a choice of barge rental while at anchor in the bay or have pier discharge subject to loading operation or other cargo vessels discharging at the pier.

*San Juan Bay:* One pier length 760 ft., width 50 ft., depth 36 ft.

*Loading:* Prior to commencement of loading the Master or Chief Officer will deliver to the port Agent a pre-stowage plan with the following information:

Total cargo required, calculated tonnage per hatch, sequence of loading, fuel on board, water and stores on board in long tons, and calculated draft and trim upon completion of loading.

Loading is generally carried out at the rate of about 4,000 l.t.p.h.

Tonnage on board at any stage of the loading is available from the loading Master, the Pilot on board, or at the scale house at the upper end of the pier. In order to avoid last minute delays, it is very important that a constant check be made of vessel's draft, ballast left to discharge and cargo on board during the entire loading. Any change in tonnage of cargo required must be reported to the Port Agent or Loading Master not later than when there is approximately 2,000 long tons remaining for completion of loading, and always in writing.

It is convenient to check drafts, ballast and tonnage of cargo on board each time the loading gantry shifts from one hatch to the next. While loading is actually in progress in a hatch, no loading interruptions are permitted except in case of emergency. At the termination of each pouring, a slip stating cargo loaded and drafts readings, will be delivered to the chief officer.

In calculating the tonnage required to fully stow a hold, it should be remembered that cargo is spout trimmed only. No trimmers are available at San Nicolas.

Vessels will depart from the pier immediately upon completion of loading. The Pilot will take the vessel out from the berth. If the Master wants to anchor in San Nicolas Bay prior to proceeding to sea, he must advise the Pilot who will in turn advise suitable anchorage. The Master will advise the Pilot of the estimated time of departure in order that this may be reported to the Port Captain.

Delays of port operations, as well as delays of other vessels waiting to berth, caused by a vessel which for any reason is not prepared and able to move from the pier when so ordered, are chargeable to the vessel which causes the delay.

Clearance papers, bills of lading, statement of facts and all necessary papers for clearance of the vessel will be delivered shortly after completion of loading. This can be accomplished while the vessel is being moved from the berth, or at anchor, but never alongside the pier when other vessels are waiting for loading turn.

*Slurry:* For the new Marcona flow system a 20 in. diameter pipeline has been installed and vessels adapted for slurry transportation can load either at the East or West side of the pier, depending on size and draft of the vessel. Hourly loading rate has not been determined so far but it is expected to make over 2,000 l.t.p.h.

**CRANES:** Two at 25 tons and 2 at 50 tons.

**MEDICAL:** All medical attention may be arranged.

**STEVEDORES:** *Working Hours:* 0800–1200, 1300–1700, 1800–2400, 0100–0700.

**TANKERS:** On the West and East side piers there are three raisers to which three eight-inch diameter hoses can be connected to a main pipe-line of 16 in. diameter for the discharging of bunkers C. Flanges are U.S. Standard (ASA). Location on the pier is for midship connection on vessels. Maximum pressure permissible is 125 lb. p.s.i. and maximum temperature 150° F. The length of the 16-in. pipeline from the manifold on the pier to the storage tanks is 4,840 ft. There are two storage tanks of 167,000 bbls. each and one storage of 252,000 bbls. Total capacity 386,000 bbls. The height of the tanks above MLW is 142 ft. to the bottom and 190 ft. to the top of the tanks. The intakes to the tanks are at the top.

Diesel oil discharged on the East side of the pier, using one hose to an 8-in. diameter pipe-line. Flanges are U.S. Standard (ASA) with 8 bolt holes. The length of the 8 in. pipe-line from the hose connection to the storage tanks is 3,706 ft. Maximum permissible pressure is 125 lb. p.s.i. There are two diesel oil storage tanks of 7,340 bbls each (total capacity 14,680 bbls).

The height of the tanks above M.L.W. sea level is 145 ft. to the bottom of the tanks and 177 ft. to the top of the tanks. Intakes to the tanks are at the top. There is no booster pump on the pipe-line.

There is a crew on the pier to sling the hoses; the vessel's crew is required to operate the winch, boom, hoist the hoses on board, and connect same to vessel's manifold.

**BALLAST:** Special attention is called to ballast requirements of vessels which do not need ballast in order to enter under the loading boom. Such vessels are required to carry sufficient ballast for safe handling during berthing. It is permissible to discharge clean ballast at the pier.

**FRESH WATER:** None available.

**FUEL:** None available.
**GANGWAY/DECK WATCHMEN:** Recommended by crewmen to prevent stowaways.
**OPENING/CLOSING HATCHES:** Stevedores/Crew.
**CARGO GEAR:** Ore-loading boom extends 60 ft. from face of pier fender, and can be retracted from this position to a minimum length of 29 ft. Gantry with loading boom is mobile. Range of its mobility is 900 ft. starting at a point 76 ft. from the head of the pier. Shifting of vessels during loading is therefore not required. Height from water to underside of boom is 41 ft. Vessels must be ballasted so that height of any coaming or any other objects in the vicinity of the hatch where loading is to start will not exceed 39 ft. above waterline.
**IDENTIFICATION CARDS:** Required.
**CONSULS:** At Lima.
**REPAIRS:** Except in extreme emergency, repairs cannot be effected at this port.
**TELEPHONES:** None available.
**REPATRIATION:** In cases where crew changes are to take place in San Nicolas, at least seven days advanced cable notice is required to obtain the necessary immigration authorities permission. The advanced cable must set forth name, nationality and passport number.
**HOLIDAYS:** See "Ilo".
**GENERAL:** Official hours for port officials are from 0700 to 1100 and 1300 to 1800 hours. Upon request, port officials will board vessels at any time day or night, Sundays and holidays included. Overtime or such service is for account of vessels.

*Emergency Signals:* A number of short blasts on the whistle indicates an emergency. The whistle will not be used except for emergency in accordance with Peruvian regulations.
**SHORE LEAVE:** Shore leave may be granted at the Master's discretion. All crew members must be issued ship's passes before proceeding ashore. These must be shown to the Immigration authorities when required. Peruvian laws and Immigration Regulations must be strictly adhered to in order to avoid unnecessary difficulties. Crew members are not permitted to travel 100 km. outside of San Nicolas – San Juan port areas without written authorisation or pass from the Master approved by Immigration authorities.
**REGULATIONS:** Cargo holds must be properly cleaned. In this respect special care must be taken where vessels prior to their arrival at San Nicolas have carried the following cargoes: Gypsum, Phosphate, Pyrite, Coal, Sulphur, Silica, Aluminium, Sand, Gravel, or Quartz, or any other ore containing Arsenic, Phosphorus, Sulphur, Silica, Aluminium, or Copper. Prior to commencement of loading, cargo holds will be inspected by a representative of the shippers. It is recommended that the Master or a ship's officer accompany the cargo hold inspector during the inspection.

**AGENT:** Agentes Navieros San Nicolas, S.A. P.O. Box 1229 Lima. Cables: "Agnav Sannicolas".

## SUPE: 10.50 S. 77.44 W.

Supe is about 84 miles North of Callao. Cargo operations are undertaken in an open unprotected roadstead. The main activities at the port are the loading of fishmeal and discharging of fertilisers, cellulose and chemical products.
**PILOTAGE:** Not available.
**ANCHORAGE:** Vessels anchor in the open roads.
**RADIO:** *Arrival Advice:* 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent.
**TUGS:** 8 tugs available, 1 of 65 h.p., 2 of 85 h.p., 4 of 134 h.p., and 1 of 165 h.p.
**LIGHTERS:** 32 (14 of wood and 18 of steel) for dry cargo only. The capacity of the lighters varies from 50 to 100 tons. Total capacity being 2,100 tons.
**CRANES:** 4 mobile cranes of 5 tons each.
**STEVEDORES:** See "Pimentel" for working hours and overtime rates.

5 gangs of 9 men each available.
**MEDICAL:** There is a hospital at Barranca.
**TANKERS:** *Submarine Pipe-line:* One line 10-in. diameter for dirty products and one line 8 in. diameter for clean products. Depth of water 48 ft. At Paramonga there is a 10-in. line, depth 36 ft.
**FRESH WATER:** Not available.
**FUEL:** Not available.
**GENERAL:** *Swell Period:* June/August.
**AGENT:** See "Callao".

## TALARA: 04.35 S. 81.17 W.

**DOCUMENTS,** and all general information, refer to "Callao".
**PILOTAGE:** Compulsory. In the vicinity of Talara there are several off-shore oil drilling platforms and near the entrance to the port there is a shallow of 24 ft.
**ANCHORAGE:**

| | | | |
|---|---|---|---|
| Summer | 04° 34′ 09″ S. | 81° 17′ 36″ W. | 9¼ fathoms |
| Winter | 04° 34′ 12″ S. | 81° 17′ 29″ W. | 10 Fathoms |
| 3rd Place | 04° 34′ 03″ S. | 81° 17′ 42″ W. | 6–10 Fathoms |

**RADIO:** Arrival Notice should be sent at least 24 hours before arrival to Captain of the Port and Agent via the government radio station OAH. Station on 500 kc/s. from 0800 to 2400 hrs.
**TUGS:** Three lighter tugs of 200 h.p., 1 at 160 h.p., 1 at 180 h.p. and 1 harbour tug of 600 h.p.
**BERTHING:** At Talara there are two berths for loading fuel and water; one is a regular quay, the other a petroleum berth in w vessels lie, moored to dolphins alongside hose platform.

Quay length 385 ft., depth alongside 18 ft. to 34 ft.

Petroleum berth, length 585 ft., depth alongside 34 ft.

Talara is mainly a bunkering port as it is the main port for Northern Peru Oilfields. The little general cargo discharged is d at the quay; bunkering being done at the quay and at the dolp berths.

Larger vessels load/discharge into lighters at anchorage. F lighters are available, total capacity 1,160 tons.
**CRANES:** One crane of 5 tons, one mobile crane of 10 tons. F heavy lifts a floating crane with 40-ton capacity may be hired fr Belco Petroleum Co.
**TANKERS:** See "Berthing".

*Submarine Pipe-lines:* 12-in. diameter. Vessels with a maxim draft of 36 ft. can moor to the pipe-line.
**STEVEDORES:** It is possible to work 24 hours a day with inter tions at meal hours. Three gangs of 16 men each available. Overti only charged for Sundays and holidays at 50%.
**FRESH WATER:** Available alongside berths.
**FUEL:** Available alongside berths. Bunker "C" 3,500 secon Petroperu No. 5 (Intermediate 4) 400 secs., Diesel 2 (marine diese
**MEDICAL:** A private clinic is available.
**CONSULS:** Panama and Nicaragua.
**GENERAL:** Smoking is prohibited on deck, at the piers and near refinery installation.

**AGENT:** See "Callao".

# Philippines

## BATAAN, Limay: 14.32 N. 120.36 E.

Esso Tanker Terminal.
**DOCUMENTS:**

Maritime Declaration of Health.
Crew List.
7 copies Cargo Manifest.
3 Stores Lists.
3 Personal Effects Lists.

**PILOTAGE:** Not compulsory but recommended. Pilot boards ve sel just off the berth.
**RESTRICTIONS:** Approaches are open deep water. Vessels m berth and unberth at any hour and any stage of the tide. M clearance of 10 ft. required.
**MAX. SIZE:** LOA 1,000 ft. Maximum draft 50 ft.
**RADIO:** Manila Radio. At the berth, shore communication w vocaline JRC 475 transceivers on 465 Mc/s.
**HEALTH:** Port health officials board with the Pilot. Radio requ for free pratique can be made prior arrival.
**TUGS:** Available.
**BERTHING:** *Crude berth:* Conventional buoy mooring, tank moor to eight buoys, in depth of 60 ft. Hoses may be connected either side. Four 12-inch hoses for crude oil discharge.

*Products Pier:* Inner berth depth 13 ft. Outer berth depth 32 ft. C accommodate vessel up to 530 ft. length. No slop discharge faci ties available.
**DENSITY:** 1025.
**MEDICAL:** Doctor and hospital facilities available. Advance not required of any medical attention needed.
**FRESH WATER:** Not available at berth. Can be supplied by barg
**FUEL:** Bunkers, fuel and diesel, obtainable from berth, advan notice required.
**REPAIRS:** No facilities available.
**CERTIFICATES:** Those required are.

Certificate of Registration.
Certificate to Operate.
Certificate of Officers and Engineers (Licenses).
Officers and Crew-Seaman's book.

**CUSTOMS ALLOWANCES:** 200 cigarettes for each crew me ber, and one bottle of liquor for each crew member.
**IDENTIFICATION CARDS:** Essential.
**REPATRIATION:** Effecting crew changes and arranging nece sary repatriation are carried out by the Immigration Office in the p with the assistance of the ship Agent and the Foreign Embas concerned.
**TIME:** Local Civil Time is 8 hours ahead of GMT. This time reck ing is constant throughout the year.
**HOLIDAYS:** New Year's Day (1st January); Bataan Day (9th Ap Holy Thursday (variable); Good Friday (variable); Labour Day ( May); Independence Day (12th June); Republic Day (4th July); A Saints' Day (1st November); National Heroes Day (30th Novemb Christmas Day (25th December); Rizal Day (30th December). Wh any holiday falls on a Sunday, the following day (Monday) is by l considered a public legal holiday. As a general rule, employees of t government in the Philippines do not work on Saturdays. Ca work on board vessels on these holidays can be arranged.
**SHORE LEAVE:** Crew of vessels who are nationals of countr with whom the Philippines maintains diplomatic relations can allowed ashore after securing a pass from the Immigration Office the port. Restricted aliens (citizens or nationals of Iron and Bamb Curtain countries) are not allowed on shore as a matter of polic
**GENERAL:** Customs Inspector and two guards accommodated board during vessels stay.
**AUTHORITY:** Private oil company terminal.

## BATANGAS, Luzon (including Tabangao): 13.43 N. 121.03 E.

**DOCUMENTS:** Upon arrival of the vessel, the following papers must be submitted to the boarding authorities:

Original and 1 copy Visaed Crew List.
Original and 2 copies List of Stores: Deck, Engine, Steward Dept.
Original and 2 copies List of Stores: Firearms, Medicines, including opium and the like, if any.
Original and 2 copies Personal Effects Declaration of Officers and Crew (include cigarettes, whiskey, etc.).
Original and 5 copies Inward Foreign Cargo Manifest.
8 copies Ordinary Crew List.
1 copy Clearance from previous port of call.

**PILOTAGE:** Pilotage for docking and undocking at government wharves and privately owned wharves in the Port of Batangas is compulsory for all vessels engaged in foreign trade. The vessel is met by the harbour Pilot approximately 2 miles South of the wharf. Pilotage for entering the Batangas Harbour and anchoring in the quarantine anchorage is optional but pilotage for shifting therefrom or changing in the stream is compulsory for vessel engaged in foreign trade.

**ANCHORAGES:** Bureau of Customs Administrative Order No. 191, dated January 13, 1955, defines the limits of Batangas Harbour for navigational and mooring purposes as follows:

"... a navigational and mooring area a depth of 1 mile measured from Hagony River (near West boundary of refinery compound) Eastward along the coast by ¾ mile seaward running perpendicularly from both points ..."

Within this navigational and mooring area a depth of 12 to 14 fathoms with good holding ground will be found at less than 400 yards from the beach. The bottom close to the beach is mainly sand and gravel. In the event of a strong South-west monsoon, vessels may resort to the protection afforded by the mountains of Maricaban Island by anchoring on the Northern side of the island along Maricaban Straight.

**MAX. SIZE:** Caltex Refinery: LOA 755 ft., draft 41 ft. Jetty designed for 45,000 dwt.

Tabangao Shell Refinery: LOA 900 ft., draft 48 ft.

**HEALTH:** Ships will clear for quarantine on arrival at the Batangas Harbour. Quarantine officers will normally board the vessel 2 miles South of the oil wharf.

**TUGS:** Tug service is not furnished by the two oil refineries. The use of a tug for berthing and unberthing is required. Although a tug is normally available at Batangas it may be necessary to dispatch a tug from Manila. Accordingly, it is important for Masters of vessels to provide at least 48 hours advance notice of ETA to ensure the availability of the tug boat.

**BERTHING:** Berthing may be done any time during the day or at night and Masters should exercise their own judgement in this respect. Vessels moor either port or starboard side to, depending on prevailing conditions.

**STEVEDORES:** All vessels proceeding to Batangas should radio either Caltex or Shell, whichever is their destination, their estimated time arrival at Batangas as early as possible, but not less than 96 hours before arrival, amending this ETA subsequently if it varies more than two hours from the original estimate in order to arrange towing gangs with the Luzon Stevedoring Corporation. Stevedoring is usually handled by Luzon Stevedoring Corporation.

**MEDICAL:** Both refineries have a small hospital for handling emergency cases. Should any ship's personnel need prolonged hospitalisation, arrangement will have to be made to transfer the patient to Manila or to the Provincial Hospital of Batangas where suitable medical attention is available. Dental treatment can be obtained from local dentists in the town of Batangas.

**TANKERS:** *Shell Refinery, Tabangao.* Jetty 1, two hoses of 10-in. diameter. Jetty 2, four arms of 12-in. diameter. Two berths of 50 ft. depth alongside. Slops acceptable at 500 t.p.h. up to limit of 3,000 tons.

*Caltex Refinery:* a T-head jetty. Berth No. 1 (depth alongside), 15 ft., No. 2, (depth alongside), 35 ft.; No. 3, (depth alongside), 42·4 ft.; No. 4, (depth alongside), 35 ft. Maximum distance between head and stern mooring buoys 1,040 ft.

**DENSITY:** 1.0261.

**FRESH WATER:** Fresh water is available to vessels loading, unloading or bunkering at Batangas Port. It is delivered to the vessel through hose connections. The water satisfies the physical and chemical requirements for drinking water.

**FUEL:** Bunkers are available from the two refineries. Prior advice should be given through the ship's Agent.

**FIRE PRECAUTIONS:** At both refineries smoking or open fires are prohibited on the wharves or on vessels alongside or within 100 yards of either wharf. Furthermore, each vessel's personnel is responsible for the safety of its own ships at all times.

**DEVELOPMENT:** The Government pier at present is under construction, with plans of constructing two other piers which will enable this port to accommodate more foreign vessels. The Caltex Refinery also has plans of pier improvements.

**GANGWAY/DECK WATCHMEN:** Not needed. The security guards in the gates of the two refineries serve the purpose.

**OPENING/CLOSING HATCHES:** This work is normally carried out by crew members of the vessel at the 2 refineries; off-loading hoses will be connected and disconnected on board by the vessel personnel under the direct supervision of a ship's officer with the assistance and advice of wharf personnel.

**CUSTOMS ALLOWANCES:** Sufficient amount for crew's consumption while in port.

**CARGO GEAR:** During berthing and unberthing, it is required that ship's engines, tackle and all other gear must be in operative condition and in a state of readiness for use at a moment's notice, as required.

After clearing with the Customs' representative, off-loading hoses will be connected and disconnected on board by the vessel personnel under the direct supervision of a ship's officer with the assistance and advice of wharf personnel. Wharf equipment will normally be used for handling hoses although vessel's gear may at times be required and must be made available for this purpose. A ship's officer must approve the hose connections on board before off-loading commences.

**IDENTIFICATION CARDS:** Not required in the Port of Batangas.

**CONSULS:** Consulates are stationed in Manila.

**REPATRIATION:** To expedite disembarkation and in order that proper arrangements can be made in case of repatriation, the Master should radio this matter to Caltex or Shell refineries or his Agents within 48 hours before arrival. The message should give the names of the crew to be repatriated and their destination.

**AIRPORT:** At Manila.

**TIME:** GMT plus 8 hours.

**HOLIDAYS:** New Year's Day (January 1st); Holy Thursday; Good Friday; Labour Day (May 1st); Independence Day (June 12th); P.I.U.S. Friendship Day (July 4th); Bonifacio Day (November 30th); Special holidays declared by the President of the Philippines are also included. If any other legal holiday falls on Sunday the following day is observed as a holiday. Cargo work can be arranged on any or all holidays with the vessel's agent.

**POLICE/AMBULANCE/FIRE:** Police, tel. 125–J; Ambulance, tel. 7–J; Fire Department, tel. 261.

**TELEPHONES:** At present placing telephones on board foreign vessels is not available; however, telephone service is available on the jetty of both refineries.

**GENERAL:** Discharge of ballast: No dirty ballast may be dumped into the territorial waters of the Republic of the Philippines. The refineries have provisions for off-loading a limited amount of oil water ballast. Rat Guards: Rat guards shall be placed on all mooring lines to the wharf.

**AUTHORITY:** Collector of Customs, Port of Batangas, Sta. Clara, Batangas. Tel. 162 R.

## BISLIG, Mindanao: 08.12 N. 126.19 E.

**DOCUMENTS:**

The original Manifest of all Cargo destined for the port, to be returned with the endorsement of the boarding official.
4 copies of the same Manifest, one of which, upon certification boarding official as to the correctness of the copy, shall be returned to the Master.
4 copies of Stores List.
4 copies of Passenger List.
4 copies of the Crew List.
The original of all through Cargo Manifest, for deposit, while in port, with Customs official in charge of the vessel.
A Passenger Manifest of all aliens.

**PILOTAGE:** Vessel should send direct advice to the Pilot or through its Agents 48 hours prior or at the very least 24 hours before ETA by commercial telegraphy.

There is no VHF operated by the Pilot.

Pilot boat is painted black (hull) and white (bridge and mast). International Code Signals used to call Pilot.

Pilot Station is located at Lat. 8 deg. 11.4 min. N., Long. 126 deg. 21.2 min. E.

Pilot boat will be located (if by prior advice/arrangement by Master requiring specific service of meeting vessel outside of entrance and conducting vessel through channel to inner harbour) at Lat. 8 deg. 16.85 min. N., Long. 126 deg. 26.50 min. E. or 340 degrees, 2·35 miles off Sanco Pt. lighthouse.

Pilot will always board a vessel (outside of entrance) via the pilot's or Jacob's ladder on the leeward side of the vessel.

**ANCHORAGE:** While waiting for a Pilot, the recommended anchorage (at entrance) is at Lat. 8 deg. 16.1 min. N., Long. 126 deg. 26.1 min. E. on or about this position and/or within an area of 0.5 mile radius from this point.

Quarantine anchorage or inner harbour is based on the point Lat. 8 deg. 12.9 N., Long. 126 deg. 22.0 E. to within a ¼ mile radius from this point as centre, otherwise 1 mile north of BBLCI Pier's end.

Working anchorage at stream. When vessel is through with all the port formalities, she has to go to a working area for loading/unloading operations, thus:

BBLCI. Vessels will anchor at least within a 0.5 mile radius from the tip of BBLCI pier.

PICOP. Is especially preferred during North-west monsoon at least within a ½ mile radius from the foot/base of PICOP breakwater.

Bisling Bay. In general is bounded by a line from (*a*) Sanco Pt. to (*b*) Mawes I. to the North-west, thence to (*c*) the town of Bislig to the South-west, thence to (*d*) the village of Mangagoy to the South-west, and back to (*a*) Sanco Pt.

**MAX. SIZE:** 30 ft. at PICOP Pier.

**HEALTH:** Any vessel can be given free pratique if upon inspection everybody is healthy, vessel is clean and all certificates of vaccination are complete. However, if there is a suspicious quarantineable disease, a probationary pratique should be issued and after six days, if it was found out that there was no quarantineable disease at all, free pratique will be issued.

**RADIO:** RCPI, Clavecella and CRC.

**TUGS:** Tugs normally meet vessel with Pilot at the five miles limit and assist Pilot in docking, using ship's lines. 5 available, 4 at 225 h.p., 1 at 112 h.p.

**BERTHING:** Berthing is on a first-come first serve basis. During the North-east monsoon berthing is in daylight only for precautionary measures.

BBLCI and PICOP maintain 2 piers and 1 marginal pier.

BBLCI: Pier. Position 8° 11′ 51″ N., 126° 21′ 55″ W. This is an all concrete pier 800 ft. long and 30 ft. wide with berthing space of 550 ft. on each side. Max. draft 28 ft. at seaward end, 22 ft. at shore end. Both sides are protected by dolphins constructed of pile fenders and large tyres as absorbers. Largest vessel to berth at pier at present is 18,500 tons gross. Lumber, veneer, plywood and logs are loaded at this pier.

BBLCI Marginal Pier. For vessels of less than 1,000 tons gross and 10 ft. draft.

PICOP Pier: This is an all concrete "L" shaped pier, length 426 ft. and width 58 ft. The berth for larger vessels is on the West side of the pier, max. draft 30 ft.

**CARGO HANDLING FACILITIES:** Both companies have ample equipment. Fork lifts, lighters, mobile cranes max. lift 50 ton (BBLCI), and 75 ton (PICOP), sideloaders, trucks and trailers.

**STEVEDORES:** ETA should be advised two days before ship's arrival stating workable hatches and gang requirement for berthing and gang arrangement.

Twenty gangs available, shifts change at 0600 and 1800 when port is full. If only few ships in port change at 0600, 1500 and 2300.

**MEDICAL:** It is necessary for the Agent to receive advance notice if there is serious medical attendance and hospitalisation. However, less serious medical attendance does not need notification. Port of Bislig has hospital facilities with complete smallpox, cholera, El Tor and typhoid vaccine available.

**DENSITY:** About 1.025 with tendency to become heavier during dry season and on flood tide.

**FRESH WATER:** Available at East end of BBCLI Pier. The connection is 2 in., situated 100 ft. from the approach, discharge rate 20 g.p.m.

**FUEL:** Small quantities available. BBLCI maintain 3 tanks for Caltex.

| | |
|---|---|
| 1. Bunker oil tank | 30,000 bbls |
| 2. Diesel oil tank | 11,300 bbls |
| 3. Gasoline tank | 5,100 bbls |

Tank trucks available to deliver oil and gasoline.

**DEVELOPMENTS:** More berthing facilities are on the programme for the next three to five years when the pulp and paper mill is in operation. Installation of more log-processing plants to increase shipments.

**GANGWAY/DECK WATCHMEN:** P1.00 per hour for at least 3 men.

**OPENING/CLOSING HATCHES:** Rigging of booms is done by ship's crew, while opening and closing of hatches is carried out by stevedores.

**CUSTOMS ALLOWANCES:** 200 cigarettes and one bottle liquor for each man.

**IDENTIFICATION CARDS:** Needed.

**REPAIRS:** May be made to ship's gear and equipment in arrangement with BBLCI. The company have an engine repair shop, machine shop and foundry.

**AIRPORT:** 5 kilometres distant; daily flights.

**TIME:** Local Standard Time is 8 hours ahead of GMT.

**HOLIDAYS:** On Christmas Day; New Year's Day and Good Friday. Cargo work may be arranged.

**GENERAL:** Engineering supplies available from BBCLI and PICOP. Dunnage available through BBCLI. Provisions available through chandler or market 1 km. from BBCLI Pier.

**AUTHORITY:** Collector of Customs, Port of Bislig.

## CEBU, Cebu Island: 10.18 N. 123.54 E.

**PORT LIMITS:** The seaward boundaries of the Port of Cebu within which a vessel is considered to be an "arrived vessel". North Entrance: between Pier No. 2 and Caltex Bunkering Station. South Entrance: between Shell Island and Kawit Island.

**DOCUMENTS:**

1 copy Letter to the Quarantine Officer.
1 copy Free Pratique issued by Quarantine Officer.
1 copy Oath of Master (ship coming from foreign port).
1 copy Oath of Master (ship coming from local port).
1 copy Clearance from last port.
6 copies List of Ports of call.
6 copies List of Passengers Manifest.
5 copies Baggage Declaration of disembarking passengers.
6 copies Crew's Manifest.
5 copies Personal Effects List of crews.
5 copies Bonded Store List/Ship's Store List, etc.
5 copies Parcel List.
1 copy Narcotics List.
1 copy Firearms and Ammo List.
1 copy Foreign Currency List.
6 copies Inward Foreign Cargo Manifest.

**PILOTAGE:** Advance notice 24 hours before arrival, giving draft, ETA pilot station, whether coming via North or South Entrance. Pilotage compulsory. Pilot boarding South Entrance at Lauis Ledge of Black Buoy No. 1; Pilot boarding North Entrance between Bagacay and Bontolinao lights.

**ANCHORAGE:** North Entrance between Pier No. 2 and Caltex Bunkering Station. South Entrance between Shell Island a Kawit Island, in front of Lu Do & Luym's private wharf.

**ENTRY RESTRICTIONS:** No restriction on night entry. If d above, North 26 ft. and South 30 ft. vessel cannot go alongside.

**MAX. SIZE:** Length 550 ft.; draft Shell Island 30 ft., Caltex 25 General Milling Corp. 28 ft., and Mobil 28 ft.

**HEALTH:** Pratique obtained after Quarantine personnel h boarded, mustered crew and passengers, and examined ship's hea documents. Pratique automatic if vessel coming from ano Philippine port.

**RADIO:** Globe Mackay Cable & Radio Corp.

*Call letters DZM.*

Master may contact Cebu Stevedoring Company through Chan 1 (156·7 Megacycle) and Channel 2 (157·8 Megacycle) VHF.

**TUGS:** Tugs: 300 h.p. and 600 h.p. Tugs will assist berthing. Sh lines always used.

**BERTHING:** anytime except when current strong at a certain t on North side of Piers 1 and 2.

General Milling Corporation wharf, Port of Mactan, Cebu ha pneumatic suction pump for bulk cargoes like wheat and soybe meal.

Suction rate (wheat), about 85 tons per hour.
Suction rate (soybean), about 40 tons per hour.

All oil depot in Cebu (Shell, Caltex, Mobil, Esso and Filoil) facilities in handling liquid chemicals or LPG carriers.

**BRIDGES:** The Opon-Mandaue bridge crossing the North chan is completed and open to traffic. According to Cebu Pilots Asso tion, clearance is 76 ft. at high water and 80 ft. at low water.

**STEVEDORES:** Ordered by Agents, no ETA to stevedores nec sary from Master.

**MEDICAL:** No advance notice to Agents needed. Hospital facili available anytime.

**TANKERS:** See "Max Size".

**FRESH WATER:** Most berths supply by shore installation, oth wise by barge or trucks.

**FUEL:** All grades available.

**FIRE PRECAUTIONS:** Tankers discharging: smoking allowed in saloon (officers), crew in the messroom.

**DEVELOPMENTS:** Reclamation project at the North side Cebu.

**GANGWAY/DECK WATCHMEN:** Services of watchmen nec sary subject Master's recommendation.

**OPENING/CLOSING HATCHES:** Stevedores, with aid of sh crew.

**CUSTOMS ALLOWANCES:** (Tobacco) One carton a week each crew member. (Wine and/or Spirits) One bottle a week for e crew member.

**IDENTIFICATION CARDS:** Required by Immigration Authori

**CONSULS:** Norwegian 9–77–20; Chinese 7–45–85; American 7- 51.

**REPAIRS:** Minor repairs possible.

**DRY DOCK:** Cebu Shipyard – maximum 1,000 dwt only.

**REPATRIATION:** Facilities available.

**AIRPORT:** Distance 7 miles from port and regularly served by domestic airlines.

**TIME:** Local time based on the 120 East meridian. GMT plus 8 hou

**HOLIDAYS:** Cargo can be arranged during holidays, which are following: New Year (January 1st); Maundy Thursday; Go Friday; Bataan Day (April 9th); Labour Day (May 1st); Independe Day (June 12th); Republic Day (July 4th); Bonifacio Day (Novem 30th); Christmas Day (December 25th); Rizal Day (December 30

**SHORE LEAVE:** Crew members allowed ashore any time, exc Chinese nationals. In view of the Martial Law which is imposed f 0000–0400 hours.

**DELAYS:** Berthing on North side of piers depends upon tide current. South side of piers, vessel can dock any time.

**AUTHORITY:** Dept. of Finance, Bureau of Customs, Cebu.

**AGENT:** Smith, Bell & Co. (Phil.) Inc., Corner M.C. Briones P. Burgos Sts., Cebu City. Tel. 7–52–98, after office hours 7 9–70–14. Lloyds Agents. Cables: "Bell Cebu".

## CLAVERIA, Luzon: 18.37 N. 121.02 E.

**DOCUMENTS:** Required by Customs officers'.

2 copies Crew List.
2 copies Crew Manifest.
2 copies Bonded Store List.
2 Passenger List.
7 Inward Manifest.
2 Narcotic List.
2 copies Money List.
Clearance from Last Port.

**PILOTAGE:** There are no telegraphic addresses of pilot sta although Pilots could be contacted in the Port of Manila wi least 3 days advance notice.

**ANCHORAGE:** Very deep and wide, safe enough to accommo 6 ships at a time.

**RESTRICTION:** No restriction whatsoever is imposed upon entry day or night time.
**MAX. SIZE:** Maximum length permissible is around 300 metres.
**HEALTH:** Pratique is granted as soon as the ship's Master has presented all his crew for vaccination in case same has expired and/or verification of its crew's health record and the submission of the Maritime Declaration of Health of the ship duly signed by the Master.
**RADIO:** Cables could be routed through RCA or DZN Manila for ship's Agents.
**TUGS:** Only required for lighters. Upon anchorage tugs could be called by blowing the ship's whistle twice.
**STEVEDORES:** No particular ETA advice in order to arrange gangs.
**MEDICAL:** Not necessary for ship's Agents to receive advance notice of required medical attendance. Doctors available.
**FRESH WATER:** No fresh water available for ships in this port.
**FUEL:** Not available in this port.
**DEVELOPMENT:** The construction of a breakwater.
**GANGWAY/DECK WATCHMEN:** It is recommended that ships that call at this port employ watchmen.
**OPENING/CLOSING HATCHES:** Is carried out jointly by ship's crew and stevedores.
**CUSTOMS ALLOWANCES:** 200 cigarettes for each man a week, and one bottle wine/spirits.
**IDENTIFICATION CARDS:** Not needed in this port.
**CONSULS:** No Consuls could be contacted in this port, although they could be contacted in the City of Manila.
**REPAIRS:** Major repairs not advisable in this port.
**REPATRIATION:** Changing of crew can be carried out by ship's Agent in Manila, Cebu or in any other big ports in the Philippines.
**AIRPORT:** No government airport in this port, although there is one private but no regular flights.
**TIME:** GMT plus eight hours.
**GENERAL:** See "Manila" for general information.
**AUTHORITY:** Collector of Customs, Claveria.

### DADIANGAS: 06.27 N. 125.12 E.

**DOCUMENTS:**
4 Crew Lists.
3 Stores Lists.
3 Crew Personal Manifests.
Last Clearance.
Ship's Register, etc.
*Immigration:*
1 Visaed Philippine Crew List (and one copy).
*Port Health:*
Deratisation or Exemption Certificate.
International Health Form.
1 List of Vaccination Certificates – must be valid.
1 Crew List.
*Department of Agriculture:*
Certificate stating vessel free of Kaphra beetle.
**PILOTAGE:** Pilot boards about half a mile from the berth. Uses a white painted launch as a rule. If berth occupied, Pilot takes vessel to anchorage off the town.
**ANCHORAGE:** Very deep water. Vessel lowers seven or eight shackles on the port anchor as vessel approaches shoreline. Anchor then takes hold on reef. This is about 200 ft. from shore, when vessel has swung stern-to.
**RADIO:** Messages regarding ETA, etc. are sent through Manila Agent.
**TUGS:** Not available.
**BERTHING:** Private concrete finger pier. Well fendered. Berth on South side only in deep water. Pier width 24 ft. at shore end and about 60 ft. at seaward end. Depth alongside 40 ft.
**REPATRIATION:** Possible, but very difficult via Manila.
**MEDICAL:** Small hospital in town.
**STEVEDORES:** One company only. Ship's gear used and a loading rate of about 1,500 tons per day. Exports are: fresh fruit, canned pineapple and concentrated pineapple juice.
**CUSTOMS ALLOWANCES:** 200 cigarettes and one bottle of spirits per man.
**SHORE LEAVE:** Allowed.
**FUEL:** None available.
**GENERAL:** One Customs Inspector and two guards to be given accommodation and meals. When a vessel is expected, the Agent usually contacts VHF Channel 16 from a vessel alongside.
**AGENT:** See "Manila".

### DAVAO: 07.04 N. 125.38 E.

**DOCUMENTS:** The following documents are required of vessels entering port:
Clearance papers from last port of call.
8 Inward Cargo Manifests.
3 Crew Lists.
3 Passenger Lists.
3 Store Lists.
1 Vessel's information sheet of Ship's Registry.
1 List of Crew Personal Effects.
Officer's and Seaman's Passports (for Immigration Inspection).
**PILOTAGE:** Pilotage at Davao port is compulsory. When vessel is due to call at Davao port, the Master should cable Agents of the vessel's ETA at least 24 hours before arrival. Licensed Pilots are available 24 hours a day. The Master may, likewise, cable the Pilot's Station addressed "Davao Pilots" either through Globe-Mackay or RCA frequencies. There are two pilot boats servicing the port of Davao and they fly the usual "red and white" Pilot Flag, visible in daytime.
**ANCHORAGES:** Davao port harbour limits embraces all that portion of Davao Gulf bounded by an imaginary line drawn from Dumalag Point running East (true) to the Western shoreline of Samal Island; Thence by shoreline of Samal Island to Bassa Point; thence by an imaginary line running straight to the mouth of Lasang River, and thence by shoreline of the mainland (Mindanao Island) to Dumalag Point, the place of commencement. Vessels normally drop anchor approximately 1 mile off the pier area. (Note: Davao Pilots conduct vessels to safest anchorage, away from traffic obstructions.)
**RESTRICTIONS:** Vessels entering port should be prepared to present required documents upon boarding of the Customs Boarding Party. No unauthorised persons must be allowed to go onboard before the customary entrance formalities are effected by the Government authorities, i.e. Quarantine Officers, Customs Boarding Party, Immigration Officers and other Government representatives.
**MAX. SIZE:** For entrance formality purposes, Davao port can accommodate vessels with a length of 700 ft. with a maximum draft of 40 ft. However, if the vessel should proceed alongside the wharf, the maximum length allowable will be approximately 500 ft. with a draft of 20 ft. to avoid touching the bottom at low tide, which is approximately 23 ft. Oil docks can accommodate oil carriers with a maximum length of 500 ft. and a maximum draft of 25 ft. at low tide to avoid touching the bottom.
**HEALTH:** Vessels entering port should display International flag "Q" at fore. Masters are advised to make ready the health book of each officer and crew for submission to the Medical Quarantine Officer when he boards the vessel. In the event of any suspected disease or fever onboard, International Code flags "E Z Q" should be displayed conspicuously, and in the event of death, Customs and Quarantine calls, or International Code flags "E N L" should be displayed.

Pratique is automatic after a vessel has called at another port of entry in the same country.
**RADIO:** Radio messages can be routed through any big stations like RCA or Globe-Mackay. Masters are advised, however, not to send messages when vessel is within a 3-mile radius of the port as defined in the regulations.
**TUGS:** The only tugs available are those belonging to the stevedoring company, and in most cases are not used in assisting vessels when coming in for berth. The Pilot's boat usually assists in handling ship's lines when docking at the wharf. There is a two-line service at the wharf receiving ships' lines and letting-go lines.
**BERTHING:** Berthing facilities of Davao port are limited. The present length of the existing wharf is 1,550 ft. accommodating two overseas vessels and two coastal vessels at the same time. Berthing arrangements are by "first to arrive – first to berth", and vessels are required to work 24 hrs. a day during weather-working days to give way to other vessels awaiting berth. In most instances the wharf is congested and vessels should advise their ETA at least 48 hrs. in advance.
**STEVEDORES:** There are several stevedoring firms operating. The biggest, Luzon Stevedoring Corporation, is most reliable with adequate facilities in handling incoming and outgoing cargoes. Upon receipt of vessel's ETA, the Agents arrange the stevedore gangs required by the vessel and other requirements for discharging or loading operations.
**MEDICAL:** In any cases when vessels entering port requires immediate medical attention of her crew members, the Agents must be advised by cable and the Medical Quarantine Officer shall immediately arrange hospitalisation if necessary. Innoculations are performed by the Medical Quarantine Officers. There are first-class hospitals available with adequate facilities.
**TANKERS:** Only medium-sized tankers can dock at local oildocks, namely, Shell, Caltex and Esso. The lines are 3 and 4 in. Each oildock can accommodate one tanker at a time, and maximum permitted draft is 25 ft.
**FRESH WATER:** Davao port has no water connections at the wharf, and fresh water supply to the vessels is done by tank-trucks with average delivery of 15 tons per hour.
**FUEL:** Fuelling of vessels is done alongside, Shell or Caltex oildocks with average viscosities 750 SSU 100°F. Vessels scheduled for fuelling should make 24 hrs. notice at least.
**FIRE PRECAUTIONS:** No fire boats are available in the port. Vessels docked alongside wharf are assisted by the Davao Fire Department and other ships docked alongside, in case of fire onboard.
**DEVELOPMENTS:** Development programme for the lengthening of the existing wharf is at a slow place. The Government has on its blue-print the construction of the proposed "Free Zone" about 2 miles North of the existing wharf. This is called the Mindanao Development Authority Project. One of the proposed plans is to construct a marginal wharf which will accommodate five overseas vessels at a time, each average 500 ft. in length. Estimated completion within 2 years from start of actual construction.
**GANGWAY/DECK WATCHMEN:** There are numerous watchmen agencies operating in Davao port. Local shipping agents recommend only one agency at a time, and the rates are hourly for deck watchmen on patrol.
**OPENING/CLOSING HATCHES:** This is normally done by the stevedores.
**CUSTOMS ALLOWANCES:** Number of items allowed for the

crew while the vessel is in port depends on how long the vessel stays in port and this should be arranged with the Customs Boarding Officer.

**CARGO GEAR:** Stevedoring company provides cargo gear and vessel may supply additional gear upon request of the stevedores' boss.

**IDENTIFICATION CARDS:** Not required.

**CONSULS:** Countries with consulates are Republic of China (Taiwan), Indonesia, U.S.A. (represented by the USIS).

**REPAIRS:** Only minor repairs are possible for deck and engines, and also refrigeration and electrical repairs.

**REPATRIATION:** There is an office of the Immigration Bureau which arranges repatriation and change of crew.

**AIRPORT:** Wharf is approximately 2 miles from airport with daily flights served by three domestic airlines. Average daily flights to Manila is five flights a day.

**HOLIDAYS:** There are a number of official holidays (same as in Manila) being observed. Stevedores do not work on 1st May, Labour Day, and work half-day During Christmas Day, New Year's Day and Good Friday.

**POLICE/FIRE/AMBULANCE:** Contact should be made through the Customs Office which is at the wharf-side. There is a police outpost near the wharf.

**TELEPHONES:** No telephone connection to vessels at present.

**GENERAL:** Shipmasters should advise their crew not to bring along with them valuables when on shore leave. No visitors are allowed onboard without prior permission by the Customs Inspector onboard.

**SERVICES:** Special services available, e.g. tank cleaning and discharge of tank washings done by Luzon Stevedoring Company.

**SHORE LEAVE:** Except for Chinese crew and other nationalities without diplomatic relations with the country, all other nationalities are allowed shore leave.

**REGULATIONS:** Local ship Agents will brief Shipmasters of the existing port regulations and also Customs Inspectors onboard will assist Shipmasters of these regulations when their assistance is sought.

**AGENTS:** Smith, Bell & Co. (Philippines) Inc., PO Box 146, Davao City, Philippines. Cable address: "Smithbell Davao". Telephone numbers: 7–23–86, 7–36–42, 7–51–02.

## ILOILO Panay: 10.42 N. 122.35 E.

**PORT LIMITS:** Iloilo Harbour is defined as that portion of Iloilo Strait within the following boundaries: an imaginary line extending from the Northern bank of Dumangas River, Island of Panay, across Iloilo Strait to Navalas Point on the Northern coast of Guimaras Island; thence along the North-west and West shore of Guimaras Island to Lusaran Point, thence along an imaginary line extending from Lusaran Point to the South bank at the mouth of Siuaragan River in the municipality of San Joaquin, Province of Iloilo, Island of Panay, to the North bank of Dumangas River.

**DOCUMENTS:**

6 Crew Lists.
1 Visaed Crew List.
2 Crew Personal Effects Lists.
3 Passenger Lists.
1 Health Declaration.
10 Cargo Manifests.
3 Cargo Stowage Plans.
1 Bill of Lading.
2 copies of Customs Documents.

**PILOTAGE:** All foreign-going vessels required advise ETA 24 hours before arrival. Telegraphic address Iloilo Pilots. Pilot station: South entrance at Sinapsan Point; North entrance at Navalas Point. Pilot boat painted white with name "Pilot" on top, carries flag "H". Sound signals for calling Pilot, two long blasts and one short.

Northern entrance: Pilot boards vessels at Northern entrance to Iloilo Strait 2 miles East of Navalas Point. Maximum draft 24 ft. Entry and departure in daytime only.

Southern entrance: Pilots board vessel 1 mile West of Sinapsan Point. Vessels can be brought in and out of the harbour at any time, maximum draft 30 ft. Vessels with more than 30 ft. draft must wait for high tide.

**RESTRICTIONS:** Iloilo Strait, separating Panay and Guimaras Islands, has a width of about 0·9 mile at its narrowest part. This important thoroughfare leads to the port of Iloilo. Its shorelines are very irregular, and the navigable channels are narrowed by Iguana bank and Siete Pecados Islands on the Northern entrance and by Oton bank on the Southern entrance. Ocean vessels use only the South entrance when entering Iloilo Strait. Incoming vessels are met and boarded by Iloilo Pilot at Sinapsapan Point. Pilotage is compulsory. Oton bank is of soft muddy sand, about 0·1 mile West South-west of the Southern extremity of the flat on which Iloilo City stands and extends about 8 miles in a West South-westerly direction. It is composed of shifting sand and said to be extending Westward; vessels should not attempt to cross it. There is a narrow channel between it and the Panay shore, used by coast-wise vessels, but the main channel into Iloilo is between the bank and Guimaras Island. It is the sand bar along this channel that limits the draft of ocean vessels, entering or leaving Iloilo Strait, to a maximum of 33 ft. on a 5.0 ft. tide.

**ANCHORAGE:** Vessels waiting for Pilot may anchor in vicinity of pilot boarding station. No specified quarantine or Customs anchorages. Ships may anchor at any place North or South of the mouth of the Iloilo River provided that they do not obstruct navi tion.

**MAX. SIZE:** No restrictions on length and breadth. Vessels o 30 ft. draft dependent on height of tide.

**HEALTH:** All overseas vessels calling first port of entry are subje to quarantine until free pratique granted. Quarantine doctor boa on arrival and issues Bill of Health subject to Master's Hea Declaration and clearance from last port. Agents must be advis by radio in advance if suspected disease or fever on board. Pratiq automatic for vessels coming from another port in the Philippin

**RADIO:** Sarmiento Radio via Phimacomi, call sign DZZ. Fr quencies 6 and 8 mhz.

**TUGS:** Berthing assistance by tugs available if requested. Shi lines used. Pilot boats normally assist berthing.

**BERTHING:** Limited berthing space at pier berths, accommoda tion for two vessels only. Advance information required for vesse loading bulk sugar or molasses, since only one vessel may ber at a time.

*Guimaras Island:* Molasses installation, the molasses loading pi owned and operated by the Luzon Stevedoring Co., is easily pick out and distinguished by the three steel tanks and one concre tank situated on a hill just above the pier and should not be confus with the Jordan municipal pier laying just south of it. The pier T-shaped, being 25 ft. at the face with a row of four pile clusters line with the face, with a total span of about 300 ft. and with amp mooring facilities. It is recommended that berthing be done at flo tide, with the assistance of a Pilot obtainable at Iloilo. Unberthin can be done at any time. The three steel and one concrete tan has an aggregate capacity to store 52,400 tons of molasses. Thr of these four tanks are provided with pneumercator scales. Th molasses outloading berth is located about 800 ft. North of the bu sugar outloading berth and its outloading capacity is about 5,5 tons of molasses per day. Tankers with as much as 12,000 to deadweight capacity have been handled here.

Bulk sugar installation. The berth has an average depth of wa alongside of 40 ft., the shallowest portion being 33 ft. at the Southe most part of the breakwater extending down to the inloading ber Maximum length of vessel so far accommodated is 633 ft. (witho utilising hatches 1 and 7). The outloading capacity for bulk sug is from 7,000 to 8,000 tons per day, while the capacity to inload fro barges into its three warehouses is about 4,000 tons per day. Th three warehouses have a total capacity of 60,000 tons. Outloadin of bulk sugar to ocean vessels is affected by means of conve system running from the warehouses to the outloading tower whi has two retractable boom bridges fitted with ship trimmers. Heig of boom bridge down to its base is 31 ft. with the water level duri high tide being one foot below this base. Carrier vessels comi alongside to load therefore should not exceed the height of 32 from waterline to hatch coaming in order to allow boom bridge the outloading tower clearance over the hatch opening.

**STEVEDORES:** Advise Agent before arrival details of cargo a number of gangs required.

**MEDICAL:** Agent should be advised 24 hours in advance of a medical requirements. Hospital facilities available. All crew requ valid vaccination certificates.

**FRESH WATER:** Delivered by barge, minimum charge for 4 metric tons. Available from Guimaras Shore Installation, minimu charge for 40 metric tons

**FUEL:** Bunker "C" available, subject to three days advance notic

**WATCHMEN:** Services of shore watchmen recommended.

**HATCHES:** Opening and closing hatches is normally done b stevedores except for McGregor or other automatic hatch cove which are operated by the crew.

**CUSTOMS ALLOWANCES:** 200 cigarettes in an open cart allowed each man. No allowance for wine or spirits.

**CARGO GEAR:** Details of any heavy lifts should be advised t avoid delay.

**IDENTIFICATION CARDS:** Required for shore leave. Seame books or passports usually deposited with Immigration.

**CONSULS:** Great Britain, telephone 5086. All other Consuls Manila.

**REPAIRS:** Minor repairs can be effected. Dry docks for loc barges and launches only.

**REPATRIATION:** Can be arranged subject to Immigrati approval.

**AIRPORT:** Situated about 4 miles from the port with regular loc services.

**TIME:** GMT plus 8 hours all the year round.

**HOLIDAYS:** 1st January, Holy Thursday, Good Friday, 9th Ap 1st May, 12th June, 4th July, 25th December, 30th December. Cargo work may be arranged on these days.

**POLICE/FIRE/AMBULANCE:** Police, tel. 55–21; Fire, tel. 30- Ambulance, tel. 26–12 or 25–61.

**TELEPHONES:** No facilities for placing telephones on board.

**SHORE LEAVE:** Crew members are allowed ashore subject Immigration control.

**AGENTS:** Smith Bell & Co. (Philippines) Inc., tel. 28–51. Teleg phic Address: Bell Iloilo.

## JOLO: (Jolo Island) 06.03 N. 121.00 E.

**DOCUMENTS:**

1 copy of Clearance issued by the last Port of Call.
1 copy of Quarantine Clearance.
2 copies of Crew List.
2 copies of Crew Possessions' List.

2 copies of Stores List.
2 copies each of Narcotic, Firearm, Passenger, Mail, Parcel and Money Lists.
5 copies of Inward Foreign Manifest.

**PILOTAGE:** Telegraphic advice to pilot station required 48 hours in advance. Pilot boards in quarantine anchorage.

**ANCHORAGES:** 4 miles North-west of Piers I and II.

**RESTRICTIONS:** Entry permitted only before sunset and after sunrise. Vessel should wait 4 miles off Piers for quarantine or Pilot service.

**MAX. SIZE:** Up to 8,000 tons dwt.

**HEALTH:** Wait for quarantine doctor at quarantine anchorage. To obtain pratique, the ship's Master must advise the ship's Agent vessel's ETA in advance. The ship Agent must in turn advise the quarantine officer of the arrival of the vessel 2 to 3 hours before the vessel sails into port. When the vessel arrives at the quarantine anchorage, the quarantine officer boards and inspects the same and if the vessel is found to be free from all quarantinable diseases, pratique is granted.

Automatic pratique is granted only to naval vessels.

Pratique is no longer necessary when the vessel entering the port has called at another port in the Philippines immediately before.

**RADIO:** Radio Corporation of America or Mackay Radio.

**TUGS:** None available.

**BERTHING:** As may be directed by Wharfinger.

**STEVEDORES:** ETA advices required in order to arrange gangs.

**MEDICAL:** It is always necessary for ship Masters to notify their Agents of required medical attention at least two to three hours before arrival. Hospital facilities are available. Vaccination/Fever Certificates required, especially those against cholera, smallpox and yellow fever.

**DENSITY:** 1025.

**FRESH WATER:** Available, direct line to ship from all berths.

**FUEL:** Available. Delivery direct line to ship from pier.

**GANGWAY/DECK WATCHMEN:** Services of watchmen necessary.

**OPENING/CLOSING HATCHES:** This work is normally carried out by stevedores.

**CUSTOMS ALLOWANCES:** 200 cigarettes for each crew member, and one bottle of liquor for each crew member.

**IDENTIFICATION CARDS:** Essential.

**REPATRIATION:** Effecting crew changes and arranging necessary repatriation are carried out by the Immigration Office in the port with the assistance of the ship Agent and the Foreign Embassy concerned.

**CONSULS:** None.

**REPAIRS:** No facilities.

**AIRPORT:** Plane flight twice a day to Manila for international connections.

**TIME:** Local Civil Time is 8 hours ahead of GMT. This time reckoning is constant throughout the year.

**HOLIDAYS:** New Year's Day (1st January); Bataan Day (9th April); Holy Thursday (variable); Good Friday (variable); Labour Day (1st May); Independence Day (12th June); Republic Day (4th July); All Saints' Day (1st November); National Heroes Day (30th November); Christmas Day (25th December); Rizal Day (30th December). When any holiday falls on a Sunday, the following day (Monday) is by law considered a legal public holiday. As a general rule, employees of the government in the Philippines do not work on Saturdays. Cargo work on board vessels on these holidays can be arranged.

**POLICE/AMBULANCE/FIRE:** Telephone numbers can be supplied by Agent.

**TELEPHONES:** Cannot be connected on board vessels.

**SHORE LEAVE:** Crew of vessels who are nationals of countries with whom the Philippines maintains diplomatic relations can be allowed ashore after securing a pass from the Immigration Officer in the port. Restricted aliens (citizens or nationals of Iron and Bamboo Curtain countries) are not allowed on shore as a matter of policy.

**DELAYS:** Availability of berthing space.

**AUTHORITY:** Collector of Customs, Jolo, Sulu.

## JOSE PANGANIBAN, Luzon: 14.17 N. 122.42 E.

**DOCUMENTS:**
5 copies Crew List.
3 copies Passenger List.
4 copies Inward Manifest.
4 copies Outward Manifest.
5 copies Stores List.
3 copies Personnel Effects List.
3 copies Narcotics List.
3 copies Tobacco List.
3 copies Ship's Particulars.
Ship's Registry and Quarantine Papers from last Port of Call.

**PILOTAGE:** Compulsory for entrance and for clearance. ETA must be forwarded to the Agency in Manila; the last telegram from the Master w/ETA will be transmitted by radio to Pilots at Jose Panganiban (mentioning Larap if the vessel goes direct to Larap, J.P., and also to the loader in Daet. (Daet is the Capital of North Camarines.) In case of change of time, the hour of expected arrival may be forwarded directly to the Harbour Pilot. Master to pilot his vessel 1·5 miles South of Tanao Island lighthouse and steer 180° at moderate speed to meet the Pilot.

**ANCHORAGE:** About 1 to 2 miles W. of Pinandugan Point; advisable to await Pilot; in 8 to 11 fathoms or proceed Southward at slow speed to meet Pilot.

**RESTRICTIONS:** Entrance can be at any time day or night, but during Northern monsoon advance notice should be given to consider the use of a motor-boat instead of small-motored *Banea;* in case of meeting outside harbour limits the request should be made to Pilot by the Master of vessel entering.

**MAX. SIZE:** Maximum draft not to exceed 30 ft.

**HEALTH:** To obtain pratique, the ship Master must advise Agent vessel's ETA in advance. The foregoing advice is very important because the ship Agent must in turn advise the quarantine officer of the arrival of the vessel 2 to 3 hours before the vessel sails into port. When the vessel arrives at the quarantine anchorage, the quarantine officer boards and inspects the same, and if the vessel is found to be free from all quarantinable diseases, pratique is granted. Automatic pratique is granted only to naval vessels. Pratique is no longer necessary when the vessel entering the port has called at another port in the Philippines.

**RADIO:** RCPI (Radio Communications of the Philippines, Inc.).

**TUGS:** A motor-boat is used by the PIM (Phil. Iron Mines) in Larap for vessels to load for them in that bay, but it is not needed for Panganiban Bay.

**MEDICAL:** Good hospital facilities in Larap and in Daet. There is also rural Medical Officer in this locality.

**FRESH WATER:** Insufficient fresh water on the pier to supply ships.

**WATCHMEN:** There is watchmen service in this port; number of watchmen at ship's convenience.

**OPENING/CLOSING HATCHES:** An additional charge for this job is imposed if carried out by stevedores. The crew can, however, do the job.

**CUSTOMS ALLOWANCES:** 200 cigarettes for each member of the crew.

**IDENTIFICATION CARDS:** Only those which have to be shown to Immigration Officer with booklet are necessary. Immigration Officer will board vessel after the doctor's clearance.

**REPATRIATION:** Effecting crew changes and arranging necessary repatriation are carried out by the Immigration Office in the port with the assistance of the ship Agent and the Foreign Embassy concerned.

**AIRPORT:** In Larap and in Daet. Daily trips to Manila.

**TIME:** Local Civil Time is 8 hours ahead of GMT. This time reckoning is constant throughout the year.

**HOLIDAYS:** New Year's Day (1st January); Bataan Day (9th April); Holy Thursday (variable); Good Friday (variable); Labour Day (1st May); Independence Day (12th June); Republic Day (4th July); All Saints' Day (1st November); National Heroes Day (30th November); Christmas Day (25th December); Rizal Day (30th December).

**SHORE LEAVE:** Crew of vessels who are nationals of countries with whom the Philippines maintains diplomatic relations can be allowed ashore after securing a pass from the Immigration Officer in the port. Restricted aliens (citizens or nationals of Iron and Bamboo Curtain countries) are not allowed on shore as a matter of policy.

**AUTHORITY:** The Collector of Customs, J. Panganiban, Bureau of Customs.

## LEGASPI: 13.10 N. 123.45 E.

**DOCUMENTS:**
2 Crew Lists.
2 Passenger Lists.
2 Bills of Lading.
2 Fire Arms Lists.
2 Bonded Store Lists.
2 Narcotic Lists.
7 Inward Manifests from last port of call.
8 Outward Manifests from last port of call.
1 Vessel's Registration Certificate.
1 Certificate of Ownership.
1 International Loading-Line Certificate.
1 Safety Equipment Certificate.
1 Prevention of Life and Property at Sea Certificate.

**PILOTAGE:** Send advance notice telegram to Harbour Pilot, Legaspi City, 48 hrs. before arrival. ETA should be tendered 48 hrs. and 24 hrs. in advance. No VHF available. Pilot boat has letter "P" painted white above water line. International Code signals used.

Pilot area is within the 3-mile limit from the harbour, whereby no extra charges will be solicited. However, if vessel requires services outside the harbour limits, extra pay is solicited. During inclement weather, Masters of vessels should notify their arrival in order to be met within or outside the 3-mile limit.

During bad weather a jacob's ladder is more appropriate until vessel is at anchorage, thence accommodation ladder will be utilised for the purpose of Quarantine and Customs Officers.

No specific areas of anchorage in waiting for a Pilot; Master must use his discretion to drop anchor within the 3-mile limit with seven shackles in the water until Pilot arrives.

**ANCHORAGE:** After sunset and before no vessel is cleared by Customs.

Anchorage area is open to vessels of any draft.

**MAX. SIZE:** Length 600 ft. draft 32 ft. During spring and neap tides current is strong. At Pilot's discretion when to dock and undock.

**HEALTH:** All crew members and officers should possess valid vaccination certificates. In the event of suspected disease or fever onboard, Quarantine Officers should be notified at port of call.

Pratique could be served by boarding Quarantine Officers. Pratique is not needed if vessel already called at port of entry within the jurisdiction of the Philippines.

**RADIO:** Following stations are normally used:

| | |
|---|---|
| RCPI | FILTEL |
| TELEFAST | CLAVECILLA |
| CRC | |

**TUGS:** No tugs available. Motor launch is used to attend to mooring and unmooring.

**BERTHING:** At AIC Berth and Legaspi Berth. Mooring daytime only. Vessels moor stern to quay (Mediterranean mooring).

**STEVEDORES:** Stevedores are members of Union Oberara of Legaspi, Fraternal Obrara and Espinosa Estervering.

Bulk cargoes are handled and charged per ton. Hired shore personnel are paid per minimum wage rate daily as described by the Bureau of Labour Law.

**TANKERS:** Maximum draft 30 ft. Diameter of Load Discharge Line, 4 in.

**DENSITY:** Salt water density 1036.

**FRESH WATER:** Fresh water is available by tank-truck, containing 6 tons.

**FUEL:** Fuel available at any time.

**GANGWAY/DECK WATCHMEN:** Services of watchmen are available at the Master's discretion.

**OPENING/CLOSING HATCHES:** In the absence of sailors to open/close hatches, shore union personnel are available with a rate based on Union Rate Tariff.

**CUSTOMS ALLOWANCES:** 1 carton of cigarettes for each crew member. 1 bottle of wine and/or spirits for each officer.

**IDENTIFICATION CARDS:** Required, also Seaman's Book.

**REPATRIATION:** Allowed upon approval by Commissioner of Immigration at Manila.

**AIRPORT:** There is an airport about 2 km. away. 1 flight per day or 7 flights per week.

**TIME:** Standard time. GMT plus 8 hrs.

**HOLIDAYS:** 1st January (New Year's Day); 9th April (Bataan Day); Maundy Thursday; Good Friday; 1st May (Labour Day); 12th June (Independence Day); 4th July (Fil-American Friendship Day); 30th November (Bonifacio Day); 25th December (Christmas Day); 30th December (Rizal Day).

Cargo work can be arranged on these days with additional overtime charges covered by the Bureau of Labour Law.

**POLICE/AMBULANCE/FIRE:** There are telephones connected to the three mentioned services but they have no numbers. Only controlled by operator available for any call simultaneously.

**GENERAL:** Notice of vessel's should be sent 48 hours before the vessel's arrival.

**SHORE LEAVE:** Seamen who are restricted aliens are not allowed to leave the ship unless authorised by the Commissioner of Immigration.

**AGENTS:** Smith, Bell & Co. (Philippines) Inc., Legaspi City.

## MANILA, Luzon: 14.40 N. 121.00 E. (See Plan)

**DOCUMENTS:**

- 6 copies Inward Foreign Cargo Manifests:
  - 1 copy Customs Marine Division.
  - 1 copy File – Surveyor's Office.
  - 1 copy Customs Secret Service Division.
  - 1 copy Customs Auditor.
  - 1 copy Plant Quarantine Officer.
  - 1 copy Terminal Contractor (Arrastre).
- 3 copies Ship's Stores Lists:
  - 1 copy Customs Marine Division.
  - 1 copy Customs Inspector in charge of vessel.
  - 1 copy Customs Harbour Police.
- 3 copies Crew Personal Effects Lists:
  - 1 copy Customs Marine Division.
  - 1 copy Customs Inspector in charge of vessel.
  - 1 copy Customs Harbour.
- 2 copies Visaed Crew List: To be handed to Immigration Officer.
- 7 copies Crew Lists.
  - 2 copies Customs Marine Division.
  - 2 copies Immigration Officer.
  - 1 copy Customs Inspector in charge of vessel.
  - 1 copy Manila Police Department representative.
  - 1 copy Customs Secret Service Division.
- 5 copies Landing Passengers Manifests (BU of Immigration Form 15):
  - 4 copies Immigration Officer.
  - 1 copy Manila Police Department representative.
- 6 copies Landing Passengers Lists:
  - 2 copies Customs Marine Division.
  - 1 copy Customs Inspector in charge of vessel.
  - 1 copy Appraisers (Baggage Section) Division.
  - 1 copy Customs Secret Service Division.
  - 1 copy Manila Police Department representative.
- 7 copies in Transit Passengers Lists.
  - 2 copies Customs Marine Division.
  - 2 copies Immigration Officer.
  - 1 copy Customs Inspector in charge of vessel.
  - 1 copy Manila Police Department representative.
  - 1 copy Customs Secret Service Division.
- Baggage Declarations:
  - 1 copy per Landing Passenger or per Head of family.
- Other Papers:
  - Quarantine Pratique.
  - Ship's Register and clearance from Last Port called should a be handed to the Boarding Officer.

**PILOTAGE:** The Pilot will board vessels in the quarantine anch rage at the completion of the quarantine inspection if vessels a proceeding to one of the 26 anchorages within the breakwater or one of the piers.

Pilotage for anchoring or leaving anchorage within the brea water is compulsory, as well as when docking and undocking at a of the piers.

**ANCHORAGE:** The position and bounds of the quarantine anch rage may be determined as follows: From the Manila Outer Harbo light buoy No. 1, approximate position, Lat. 14° 33′ 09″ N., Lo 120° 54′ 00″ E., thence on a range of 76° 24′ true, Custom House C Hall Towers 4,000 yards to approximate position Lat. 14° 34′ 50″ Long. 120° 56′ 00″ E., thence 180° true 119 yards to approxima position Lat. 14° 34′ 14″ N., Long. 120° 50′ 00″ E., thence 242° 30′ t 4,440 yards to the Manila Outer Harbour lighted buoy No. 1 at po of commencement.

When approaching the quarantine anchorage during daytim the ship should fly her registered signal letters. When the ves arrives during night at the quarantine anchorage, vessel's c letters should be hoisted at daylight as well as the "Q" flag. If ves is carrying mail also the "Y" flag should be hoisted until deliv is effected.

**RESTRICTIONS:** Vessels entering Manila Bay through the Nor channel shall pass midway between La Monja Island and Guar Shoal and shall proceed directly through the middle of the chan between Corregidor Island and the mainland, steering 070° u 1 mile distance from the shore is cleared. The same route shall followed by vessels when leaving Manila Bay through the Nor channel.

Vessels entering Manila Bay through the South channel shou not approach any shore closer than 1 mile and shall keep South the restricted area, South of La Monja, Corregidor and Caba Islands, which is embraced within the North sector of the followi two bearings: 296° from El Fraile Island and 236° from Caballo Isla lighthouse; furthermore on the Southern side of the channel, th shall not approach the line joining El Fraile and the North-we point of Limbones Island closer than 1 mile. The same restrictio apply to vessels leaving Manila Bay through the South channel.

There are no uncharted obstructions between the entrance Manila Bay and the quarantine anchorage and vessels should ha no difficulty proceeding over this route. Frequent difficulty is exp rienced in picking up Sangley point light because of its low visibil and the background of shore lights.

**MAX. SIZE:** Pier 9, length 250 m., draft 20 ft. Pier 13, length 400 m draft 32 ft. Pier 15, length 380 m., draft 35 ft. Tankers: Up to 40 draft at Rosario Sea Berth.

**RADIO:** Weather information and Notices to Mariners are broa cast daily from the following local radio stations:

**STEVEDORES:** Stevedoring is handled by Luzon Stevedoring Co. and the Delgado Stevedoring Co., supply ample labour, lighters and tugs. Cargo averages about 10 tons per hour and for the following bulk cargo: Copra, in bulk, 10/12 tons per gang hour. Copra cake and meal, 15/20 tons per gang hour. Desiccated coconut, 250–300 bags per hours. Hemp, 80/100 bales per gang hour. Sugar, 25 tons per gang hour. For the discharging of coal or gypsum, the rate is about 25 tons per hour.

**TANKERS:** Filoil refinery sea berth: Is located at the entrance to Manila Bay position: lat. 14° 26′ 30″, long. 126° 46′ 40″. This position is 2¼ miles off the shore of Rosario, Province of Cavite.

The mooring area is marked by 6 mooring buoys. A ship's guide buoy marks the point where the ship's starboard anchor will be dropped upon entry into the berth. 4 other buoys inside the berth at midport marked the end of the submarine pipe-line, centre of ship's manifold and the hose ends, respectively. The bearing of the centre line of the berth is N. 65° E. The depth is 50 ft. at high tide and 45 ft. at low tide approximately.

The weather is quite good during the dry season, but is unfavourable during monsoon season (May to November). Wind and swells are mostly from a South-westerly direction and usually prevalent during monsoon season.

It is emphasised that vessels moored at the berth must be in good condition to clear the berth immediately in case of an emergency. Ship's engines and gear must be ready with full power for immediate use. Ship's personnel should be at their stations at all times during mooring, unmooring and cargo unloading operations.

*Radio:* Filoil Makati office may be contacted by dialling telephone nos. 87–40–61 and 87–40–71. The Rosario refinery may be contacted by dialling telephone nos. 47–95–51 and 47–95–53.

Communication from the sea berth with the refinery, Filoil's launch and Filoil representative on board is through VHF radio. If VHF radio fails, the Filoil launch will be dispatched to bring the message either way.

Filoil representative on board maintains a radio watch and constant communication with the shore for general purposes and emergencies.

Luzon Stevedoring Company tugboats also maintain a constant radio communication with their representative at the shore. In case of emergency, messages can be relayed via these tugs.

*Ship's Agent:* All vessels carrying crude or other cargoes for discharge at Filoil refinery sea berth must appoint their local ship's Agent who will provide them with the necessary ship husbandry services.

*Notice of Arrival:* They must report their estimated time of arrival to Filoil Refinery Corporation, cable address: "Filoil", Manila, Philippines, 3 days after leaving port of loading and 72 hours before arrival at Manila.

*Pilot and Boarding Parties:* Pilots are arranged for by the ship's Agent. Generally, Pilots board the tanker at the Manila anchorage to assist the Master to moor in the berth and leaves at the sea berth after berthing.

Filoil representative boards the tanker one mile before the sea berth, but if it is the first voyage, he boards the tanker together with the Port and Government authorities at Manila anchorage.

*Tugs:* Tugboat service is arranged for by the ship's Agent. Tugs generally come from Manila. Give at least 48 hours notice when ordering tugs.

*Quarantine, Customs and Immigration:* Manila is the port of entry for the Rosario sea berth. Therefore, entry and clearance must be arranged by the ship's Agent at Manila. Boarding officers board the vessel in the Quarantine anchorage prior to arrival within the mooring area. Pertinent government officials should be given sufficient time, usually not less than 24 hours Monday to Friday, and 48 hours Saturday and Sunday. Generally, entry and clearance can be arranged by the Agent who should advise Customs well in advance of the vessel arrival.

*Ballast, Bilge and Garbage Disposal:* There are no ballast facilities at the refinery. Masters are advised that in Manila Bay, the Harbour-Pollution regulations are rigidly enforced. Therefore no bilge water, oil contaminated water, garbage or similar refuse which may pollute the sea water in any way, is to be discharged overboard while the vessel is within Manila Bay and approaches thereto. The staff at Rosario are required to report any violation of this Philippine Merchant Marine regulation.

*Launch Service:* Regular launch service for crew transportation is not available and has to be arranged through the ship's Agent. The Luzon stevedoring launch is used to run lines, assist in picking up cargo hoses, etc. Filoil's owned or hired launch is for the exclusive use of Filoil representative and personnel boarding the vessel; however, transportation may be arranged through Filoil representative in cases of emergency.

*Medical:* Medical attention can be arranged by the ship's Agent. There is a clinic at the refinery. The nearest hospital is ½ mile from the refinery.

*Heading for the Sea Berth:* As soon as government clearance (pratique) is granted, vessel lifts anchor and heads for Rosario sea berth, a distance of about 16 land miles from Manila anchorage.

*Vessel Mooring Gears and Facilities:* The vessel's bow is secured in the moorings by the use of both bower anchors. Therefore, ship must have both bower anchors ready for immediate use, each with a minimum of 150 fathoms of chain. Anchors, chains and anchor windlass must be in good condition and capable of heaving ship ahead with the chain or letting 1 chain go out on the run while heaving in on the other. Mooring bouy No. 6 can be used instead of port anchor if 3 mooring lines are hooked up.

Vessels must be equipped with 10 in. manila or better mooring lines of not less than 8 in. circumference and not less than 90 fathoms in length of each line. Two lines are required for each of 6 mooring buoys, 5 of which are aft to secure the ship's stern position. Therefore, 5 lines are to be available on the fantail for mooring to buoys nos. 1, 2, 3, 4 and 5.

Vessels having wire moorings secured on warping winches with surge valve and brake are acceptable. Warping winches must be adequate to handle mooring line under heavy strain. Efficient stopper lines must be readily available to "stop" mooring lines for transfer from winch to bitts without loss of tension.

All chocks other than roller (if free) shall be fitted with chafing gear to protect lines before berthing operation commences, endeavouring to install chafing gear after the ship has been moored has proven impracticable. Old fire hoses or substitute is suggested.

If in the opinion of the Pilot, the vessel's mooring facilities lines and/or gear are inadequate, he will inform the Master and Filoil representative, and in such event the vessel will not be allowed to enter the moorings until such conditions are deemed satisfactory.

*Docking Procedure:* To moor, the vessel approaches the mooring heading due South. When in proper position, the starboard anchor is dropped and the chain allowed to run until the vessel crosses the mooring area to a point where the port anchor is let go or where the mooring lines are dropped to buoy no. 6. Then the engines are backed and the vessel with the assistance of the tug, manoeuvred into the mooring area where after lines are run to the 5 mooring buoys and then the anchor chains are brought tight simultaneously with the securing of the stern to the mooring buoys. The vessel is then heading due West parallel with the tide current flow.

When secured in the berth, vessel should not be closer than 10 metres from the end of the submarine pipe-line. Bower anchor chains should have spread of not less than 30 degrees on either side of the ship's imaginary fore and aft line extended forward. Stern buoy moorings should be set as taut as possible and anchors form an approximate angle of 300 deg. with water line.

*Submarine Hose Lifting Gear and Manifold Connection:* The derrick on the port side in way of the hose connection must be rigged to lift not less than 5 tons. The topping lift shall be available to raise or lower the boom as required and the winch and whip shall be of a quality and nature to lift the hose exactly and evenly. The hose and fittings are considered to weigh 3 tons. The hose connecting gang and its supervisor are from Luzon Stevedoring Company and is under contract with Filoil. They will use the ship's machinery to raise the 2–10 in. hoses from the bottom and secure same to the ship's side. They will also disconnect the hoses and lower same to the bottom of the sea after completion of discharging of cargo. The ship's manifold must have 10 in. flanges for connection to 10 in. submarine hoses.

*Safety Rules and Regulations:*

Mooring lines must be in good condition and kept tight at all times.

Sparking smoke stacks must not be permitted. If for any reason a stack catches fire or emits live sparks, cargo operations must be stopped immediately on this and adjoining vessels.

Throw nothing overboard from deck or portholes while at sea berth.

During cargo and/or ballast operations, vessels shall show red flag by day and red light by night. No smoking amidships during cargo and/or ballast operations.

No chipping, repairs, welding or hot work is allowed on any vessel while at sea berth unless special permission is given and a safety permit obtained. The ship must always be ready to sail out at a moment's notice.

Pumping crude oils must be stopped during electrical storms or if lightning appears in close vicinity.

In case of fire, shut down all pumping and sound alarm. Disconnect hoses so as to be ready to shift from berth. All vessels at berth must have main engines ready for use. Water, foamite and steam are never to be used on electrical fires. Use dry chemical or Pyrene. Use foamite, water fog, steam $CO_2$ or dry chemical on oil fires.

Avoid spilling oil on deck. If any oil is spilled, it must be cleaned immediately. Gasoline or naphtha is not to be used for cleaning.

Only Underwriter's laboratory approved flashlights permissible use in methane and air mixtures by the U.S. Coast Guard are to be used for loading, discharging, ballasting and/or repair work on vessels.

Ullage screens are to be kept in place during cargo and/or ballast operations.

Tugboats are not to be allowed alongside while discharging cargo or ballast.

No extension cord or portable cables which are connected to an electric power source shall be used on deck in way of cargo or fuel tanks unless vessel is certified gas-free.

Fire hose shall be laid out and suitable fire extinguishers available. Failure to comply with any of the above rules will result in the vessel being shut down. Sufficient copies are to be presented to the Master so that they may be posted in various places about the vessel. It is the Master's responsibility to see that these rules and regulations are enforced.

*Discharge of Cargo:* After hoses are connected, the Filoil representative will, after communication with the refinery, advise commencement of pumping. In the beginning the rate is to be slow and the Filoil representative will advise when pumping rate is to be increased to the maximum. Discharge of cargo may be stopped due to adverse weather conditions. In which event, the hoses are disconnected and the submarine hose lowered to the sea bottom. Cargo discharge will be resumed when the adverse weather moderates.

Crude oil discharge through 2–10 in. hoses 255 ft. long through a 10 in. check valve and 10 in. gate valve then into the 24 in. pipe-line which is 2½ miles in length. The height of the shore tanks (foundation) above sea level is 15½ ft. Pressure at the ship's side must be not less than 60 lb. Maximum pressure allowed is 120 lb. at the ship's side.

*Stripping – Tank Draining:* To keep a discharge time to a minimum, tanks should be stripped into one of the ship's tanks and the final stripping shall be from only one tank.

*Board and Lodging Accommodation:* Sufficient accommodation and meals are requested to be available and prepared for the Filoil's representative in the officers' quarters. He will remain with the vessel until casting off or until relieved to be of assistance to the crew.

**FRESH WATER:** Available, either at berth or by barge.

**FUEL:** Fuel oil can be obtained from the Esso, Mobil, Getty, Fil-Oil, Caltex and Shell Oil Companies. Delivery by barge is made either at one of the anchorages within the breakwater or at the piers. Where possible, prior notice of 72 hours should be given the oil companies. Maximum rate of loading is 100 tons of bunker fuel and 125 tons of diesel fuel per hour.

**MEDICAL:** Complete hospital facilities are available in Manila.

**REPAIRS:** The Mariveles shipyard operated by the National Shipyard and Steel Corporation located at Mariveles Harbour have facilities for the dry docking and repairs of vessels up to 10,000 gross tons and of length and draft up to 500 ft. and 25 ft. respectively.

**SERVICES:** The Atlantic Gulf and Pacific Co. is equipped to undertake cleaning of tanks for receipt of coconut and vegetable oils. Where the tanks have contained coconut or vegetable oils previously, the time required for cleaning is from 18 to 30 hours; where tanks have previously held wood oils or fuel oils, the time required to prepare them is from 48 to 60 hours.

Vessel requiring the services of a launch at any time of the night should use the following signal to which the harbour transport launches will answer: Searchlight, signal lamp or open blinker light pointed straight up slightly inclined shoreward and left on until launch arrives alongside.

**DEVELOPMENTS:** A stern-loading ramp is being built for roll-on/roll-off vessels.

Plans are under way for the installation of a light gantry crane on pier 3 of the South harbour as an interim measure to handle containers.

*Manila International Port:* New terminal to be constructed at the South end of the North harbour. The first phase is to be completed and operational by mid-1976. The depth of the entrance channel and basin to be maintained at a minimum of 40 ft.

Phase 1. Container terminal – length 650 metres. One gantry crane, capacity 35 tons.

Phase 2. A second gantry crane, capacity 35 tons. A liquid tank farm for molasses, coconut oil and chemicals. A grain silo with conveyor and pneumatic systems. Length of berth 350 metres. Storage for coconut oil in tanks, total capacity 10,000 tons. Storage for grain in 20 concrete silos each with a capacity of 1,000 tons.

**AUTHORITY:** Head of Port Operations Service, Bureau of Customs.

**AGENT:** Smith, Bell & Co. Inc, POB 311, 5th Floor, Domestic Building, Bonifacio Drive, Port Area, Manila.
Tel: 49-21-11. Telex: RCA 722566. Cables: SHIPPING MANILA.

## MASAO: 09.00 N. 125.29 E.

**DOCUMENTS:**

7 copies of Inward Foreign Manifest.
2 copies of Crew List.
Passenger List.
Narcotics List.
Curio or Personal Effects List.
Stores List.
Vessels General Information List.
Money List.
Firearms List.
Parcel Lists

**PILOTAGE:** Pilotage is compulsory and appropriate notice should be sent to the Masao Pilots' Association at least 24 hours before the arrival of the vessel.

**ANCHORAGE:** The anchorage is wide and deep enough to accommodate as many as twenty vessels at one time.

**RADIO:** Any commercial radio systems would be sufficient, such as Globe, or Mackay or RCA.

**TUGS:** At Magallanes Bay, where majority of foreign vessels discharge, tugs are not needed, as anchorage is done along the stream. But at Nasipit, the pilot launch will handle the lines for mooring.

**BERTHING:** Vessels work cargo to lighters in Magellanes Bay. At Nasipit: Copra loading.

**STEVEDORES:** No particular ETA advices necessary; exporters will handle the advice of their stevedores.

**MEDICAL:** Necessary for Agents to receive advance notices for medical attention required; hospitals to handle major medical cases.

**FRESH WATER:** This is available at Nasipit, but notice should be given to the Agent who in turn will serve notice to Messrs. Nasipit Lumber Co. Water is delivered by truck.

**GANGWAY/DECK WATCHMEN:** Available and recommended.

**OPENING/CLOSING HATCHES:** This is normally carried out by members of the crew, but at Nasipit, in the case of American vessels, this is done by the stevedores, chargeable to the exporters.

**CUSTOMS ALLOWANCES:** 200 cigarettes and a bottle of wine for each crew member would be allowed during the duration of th vessel's stay in port. Request for additional needs could be arrange by the Master through the Customs Inspector on board.

**IDENTIFICATION CARDS:** Necessary.

**CONSULS:** None. Nearest at Cebu, and Manila.

**REPAIRS:** All types of repairs on deck require the permission o the Collector of Customs.

**REPATRIATION:** Can be arranged.

**AIRPORT:** Distance to the airport is about 4 kilometres and fligh are daily to Manila. Philippine Airlines, Filipinas Orient Airways hav their regular flights for Manila, Cebu, Cagayan de Oro, and Dava

**HOLIDAYS:** Cargo can be worked on any day except New Yea Independence Day, 12th June, and Holy Week.

**SHORE LEAVE:** Allowed.

**AUTHORITY:** The Collector of Customs, Port of Masao, Butua City.

## SAN FERNANDO, Luzon: 16.37 N. 120.17 E.

**DOCUMENTS:**

1 copy of Clearance issued by the last Port of Call.
1 copy of Quarantine Clearance.
2 copies of Crew List.
2 copies of Crew Possessions' List.
2 copies of Stores List.
2 copies each of Narcotic, Firearm, Passenger, Mail, Parcel, an Money Lists.
5 copies of Inward Foreign Manifest.

**PILOTAGE:** Send telegraphic message (through the ship Agen addressed to Port Pilot, San Fernando, La Union, Philippines, a least 24 hours before expected time of arrival. This is the only mean by which the Pilot can be contacted.

The moment the Pilot receives the 24-hour advance notice of ETA he is under constant watch for the vessel to appear outside the Harbour. When vessel appears, he meets the same in an ordinary outboard motor-boat, which is painted white and bearing Internationa Flag "H".

The vessel, when calling the Pilot, flies the International Flag "G" or sounds a signal of two long and one short blasts.

The Pilot boards within 3 miles of the lower beacon. In case of bad weather or when pilot boat cannot be seen, the vessel can proceed t the quarantine anchorage as there is no specific anchorage fo vessels awaiting a Pilot. The Pilot does not go out during storm weather. He requires a rope ladder for boarding or disembarkin when the sea is rough.

**ANCHORAGES:** The Port of San Fernando is one of the deepes in the Philippines, and the quarantine anchorage as well as the anchorage for vessels waiting to dock at the piers can accommoda vessels up to 30,000 deadweight tons.

**MAX. SIZE:** The maximum permissible tonnage of a vessel whic can be ordinarily accommodated at the piers is 10,000 tons irrespective of the length, breadth, draft, and kind of the vessel. The state o tide does not affect the dimensions of the vessels. However, vessels with a tonnage of more than 10,000 tons up to 30,000 tons need th aid of tug-boats so that they can be manoeuvred into the pier area.

**HEALTH:** To obtain pratique, the ship Master must advise the ship Agent vessel's ETA in advance. The foregoing advice is ver important because the ship Agent must in turn advise the quarantine officer of the arrival of the vessel 2 to 3 hours before the vesse sails into port. When the vessel arrives at the quarantine anchorage the quarantine officer boards and inspects the same, and if the vessel is found to be free from all quarantinable diseases, pratique is granted. Automatic pratique is granted only to naval vessels. Pratique is no longer necessary when the vessel entering the por has called at another port in the Philippines immediately befor proceeding to San Fernando.

**TUGS:** It is the ship Agent of the vessel who furnishes tugs. Whenever needed, the tug-boat normally joins the vessel near the pie while the vessel is docking and at the pier when the vessel is undocking.

**BERTHING:** All berths are alongside piers.

**STEVEDORES:** ETA advices are useful but gangs can be easil arranged even at short notice. The average load rate per gang (1 men) per hour is 20 tons, while the average discharge rate is 2 tons.

**MEDICAL:** It is always necessary for ship Masters to notify thei Agents of required medical attention at least 2 to 3 hours befor arrival. Hospital facilities are available. There are three hospitals i the town of San Fernando. Vaccination/Fever Certificates are required, especially those against cholera, smallpox, and yellow feve

**TANKERS:** There are no berths available for the exclusive use o tankers. Existing facilities for unloading oil have been installe alongside the piers by private oil companies for their own use.

**FRESH WATER:** Supply of fresh water is available at the government pier by pumping from shore-side to vessel at the rate of 1 tons per hour.

**FUEL:** All grades can be readily supplied by any of the oil companie with oil depots in the port area.

**DEVELOPMENTS:** There is an ambitious programme to improv the marine terminal of the port which, among other things, include reclamation and construction of additional storage facilities. Work on the breakwater, marginal wharf for fishing boats, and an industrial estate complete with a new pier, as well as the removal of wreck (parts of sunken ships) inside the harbour are expected.

**GANGWAY/DECK WATCHMEN:** The employment of gangwa deck watchmen though not compulsory is recommended.

**OPENING/CLOSING HATCHES:** An additional charge for this job is imposed if carried out by stevedores. The crew can, however, do the job.
**CERTIFICATES:** Those required are:
Certificate of Registration.
Certificate to Operate.
Certificate of Officers and Engineers (Licenses).
Officers and Crew-Seaman's Book.
**CUSTOMS ALLOWANCES:** 200 cigarettes for each crew member, and one bottle of liquor for each crew member.
**IDENTIFICATION CARDS:** Absolutely needed.
**CONSULS:** None at San Fernando.
**REPAIRS:** Deck and engine repairs are limited only to re-winding, welding, fixing electrical devices and connections, patching, and repainting.
**DRY DOCKS:** Except for the dry dock maintained and operated by the Atlantic Gulf and Pacific Company for the exclusive repair of U.S. Navy LCMs, no facilities of this nature in the port at present.
**REPATRIATION:** Effecting crew changes and arranging necessary repatriation are carried out by the Immigration Office in the port with the assistance of the ship Agent and the Foreign Embassy concerned.
**AIRPORT:** An airport, which is served by the Philippine Air Lines on a daily schedule to and from Manila and other points in Northern Luzon, is located about 1 kilometre from the pier area.
**TIME:** Local Civil Time is 8 hours ahead of GMT. This time reckoning is constant throughout the year.
**HOLIDAYS:** New Year's Day (January 1st); Bataan Day (April 9th); Holy Thursday (variable); Good Friday (variable); Labour Day (May 1st); Independence Day (June 12th); Republic Day (July 4th); All Saints' Day (November 1st); National Heroes Day (November 30th); Christmas Day (December 25th); Rizal Day (December 30th). When any holiday falls on a Sunday, the following day (Monday) is by law considered a legal public holiday. As a general rule, employees of the government in the Philippines do not work on Saturdays.
**POLICE/AMBULANCE/FIRE:** For Police and Fire, either call No. 99 (Phil. long distance tel.) or No. 0 (Gov't tel. System). For Ambulance, call directly for Lorma Hospital, Bethany Hospital or La Union Provincial Hospital on any of the two telephone systems above said.
**TELEPHONE:** Facilities for placing telephones on board vessels are not available at present.
**SHORE LEAVE:** Crew of vessels who are nationals of countries with whom the Philippines maintains diplomatic relations can be allowed ashore after securing a pass from the Immigration Officer in the port. Restricted aliens (citizens or nationals of Iron and Bamboo Curtain countries) are not allowed on shore as a matter of policy.
**AUTHORITY:** San Fernando Port Authority, San Fernando, Philippines. Tel. 2557. Cable address: "Poroport".

## TACLOBAN: 11.15 N. 125.00 E.

**DOCUMENTS:** 3 copies of the following required:
Number of Crew Lists.
Passenger Lists.
Customs Documents.
Health Documents.
Manifests.
Bills of Lading.
Ship's Papers, etc.
**PILOTAGE:** Notice of ETA of vessel must be given at least 24 hours in advance and must be sent through cablegram direct to Collector of Customs, Tacloban City.
**ANCHORAGES:** Safe anchorage: low tide, 17 ft. draft; high tide, 19 ft. draft; area for anchorage, 300 ft. length.
**ENTRY RESTRICTIONS:** At the discretion of the Collector of Customs.
**MAX. SIZE:** Permissible length 300 ft. Draft low tide, 17 ft.; high tide, 19 ft.
**HEALTH:** Pratique is only necessary and required in the first port of entry; it is automatic when entering ports in the same country or state.
**RADIO:** Radio communication of the Philippines, Inc., Manila.
**TUGS:** Ship's Agent arranges tug's lines with watchmen.
**BERTHING:** Inform Customs Collector at least 24 hours before ETA of vessel so that berthing space can be reserved.
**STEVEDORES:** ETA advices should be furnished to stevedores through ship's Agent.
**MEDICAL:** Advance notice of required medical attention to ship's Agent essential.
**FRESH WATER:** Fresh water available delivered by water-tank truck.
**FUEL:** Not available.
**GANGWAY/DECK WATCHMEN:** Necessary for safety of vessel. Ship's Agent makes all necessary arrangements.
**OPENING/CLOSING HATCHES:** Normally carried out by stevedores.
**SHIP CERTIFICATES:** All documents required by International Shipping Rules and Regulations.
**CUSTOMS ALLOWANCES:** One carton cigarettes per week for each man. Wines/spirits at the discretion of the Collector of Customs.
**IDENTIFICATION CARDS:** Needed for inspection by Immigration Officer.
**REPAIRS:** Not possible.
**REPATRIATION:** Immigration Officer effects crew exchanges and arranging necessary repatriations.
**AIRPORT:** Distance from airport, 9 kilometres, and is regularly served by airlines.
**TIME:** GMT plus 8 hours. No alterations during the year.
**HOLIDAYS:** Depending upon agreement with stevedores, work may be performed during holidays.
**POLICE/AMBULANCE/FIRE:** All departments are within one minute's call from the harbour.
**TELEPHONES:** Can be connected on board if required.
**SHORE LEAVE:** Allowed.
**AUTHORITY:** Collector of Customs, Port of Tacloban, Philippines.

## ZAMBOANGA: 06.54 N. 122.04 E.

**DOCUMENTS:**
1 copy of Clearance issued by the last Port of Call.
1 copy of Quarantine Clearance.
2 copies of Crew List.
2 copies of Crew Possessions' List.
2 copies of Stores List.
2 copies each of Narcotic, Firearm, Passenger, Mail, Parcel and Money lists.
5 copies of Inward Foreign Manifest.
**PILOTAGE:** Vessels approaching the port use International Code Signals for calling Pilot.

Pilot Station: Telegraphic address is Zamboanga Pilots, Zamboanga City. Estimate time of arrival (ETA) must be radioed 24 hours in advance. Pilots always on duty. Pilot boat is wooden launch painted white with red trimmings and displaying the pilot flag. The exact area where a Pilot will board vessel is in the vicinity of Little Sta., Cruz Island, for vessels coming from West, and near the vicinity of Rio Hondo for vessels coming from East. Alternative area in the event of bad weather is in the vicinity of Zamboanga Pier at a distance of at least 1 mile either way. Vessels awaiting Pilot should not necessarily drop anchor, provided 24 hours notice of their ETA is given by local Agents or the Master, to the Zamboanga Pilots, for a Pilot is *always* on duty.
**ANCHORAGES:** Owing to the steep bank, strong currents and hard, uneven bottom, there are no good anchorages off Zamboanga. However, anchorage may be made anywhere Southward of the wharf at a distance of about 3 cables from shore Eastward of an imaginary line from the Tide Indicator, at a depth of between 25 and 30 fathoms and giving 7 shackles of chain in the water. This will hold vessel even at strongest current of 6 knots. In the event of very bad weather the vessel should transfer her anchorage to Lamitan, a town 16 miles South-east of Zamboanga on the North coast of Basilan Island.
**MAX. SIZE:** No limits for anchoring. For berthing, up to 32 ft. draft.
**HEALTH:** Quarantine Officer will board the vessel for the necessary inspection of all crew on board. Thereafter he issues pratique, if and when he finds that there is no disease or fever on board. The pratique is valid until after the vessel departs to a foreign port.
**RADIO:** Universal Telecommunication Service, the Capitol Radio Telecommunication, the Telefast Radio Communication, the Radio Communications of the Philippines and the Telecom, operated by the National Government for receiving and transmitting radio messages night and day services.
**TUGS:** The position where tugs normally join the vessel is in the stream and the usual ship's lines or tug's lines are used. There is no charge collected for the use of the tug's lines.
**BERTHING:** The Zamboanga Government wharf is about 800 ft. long with a depth at the latest survey of the following: East end 30 ft.; mid-section 25 ft. and West end 21 ft. There is a private wharf at Baliwasan and vessels of 15,000 gross tons can dock there with the following limitations: Draft forward must not exceed 32 ft.; draft aft must not exceed 36 ft., upon completion of loading. Vessels docking at this wharf can only be docked at *flood* tide (current running East to West) and can only be undocked in the same manner.

Two anchors must be used in berthing and vessels lay alongside the concrete pier port-side-to. This wharf in Baliwasan is for loading coconut oil and copra pellets only.
**TANKERS:** There are four oil depots at Gavilan Pt. and at Baliwasan. (Shell, Mobil, Esso and Caltex.) Max. tonnage of 4,000 gross with a draft of not more than 18 ft. can be moored for discharge.
**STEVEDORES:** The Master of the vessel shall wire to the local Agents of the vessel so that a contract could be made with the shipper to arrange gangs.
**MEDICAL:** It is necessary for Agents to receive advance notice of required medical attention. Hospital facilities are available at all times. Inoculations are also required by the Quarantine Officer upon boarding a vessel.
**FRESH WATER:** Fresh water can be obtained only at night-time due to low pressure. If there is no available space at the Zamboanga Pier the vessel has to wait at the anchorage for a berthing space to get water supply.
**FUEL:** Fuel, diesel, and crude oil available.
**FIRE PRECAUTIONS:** Smoking is entirely prohibited on board a tanker entering this port. The Master must advise all persons boarding his vessel.
**DEVELOPMENTS:** Improvements are carried out every year to the local wharf adding additional berths and dredging to increase draft.
**GANGWAY/DECK WATCHMEN:** The services of watchmen are necessary to foil looters from boarding the vessel.

**OPENING/CLOSING HATCHES:** Normally opening and closing of the hatches are done by the crew, and if the job is done by stevedores the vessel has to pay.
**CUSTOMS ALLOWANCES:** 200 cigarettes per man. Upon arrival in port the cigarettes are sealed in a bonded store by the Customs authorities, and can be opened only upon permission granted by the Collector of Customs.
**IDENTIFICATION CARDS:** All crew members to have identification cards for immediate identification in case of trouble while the crews are on shore.
**CONSULS:** None available.
**REPATRIATION:** Effecting crew changes and arranging necessary repatriation are carried out by the Immigration Office in the port with the assistance of the ship Agent and the Foreign Embassy concerned.
**AIRPORT:** Distance from Zamboanga Pier to the airport is three kilometres. Served by regular airlines. There is a daily flight from Zamboanga to Manila by Philippine airlines.
**TIME:** Local Civil Time is 8 hours ahead of GMT. This time reckoning is constant throughout the year.
**HOLIDAYS:** Cargo work can be arranged with the Stevedoring Company through the shipper to work during holidays, including Sundays.
**POLICE/AMBULANCE/FIRE:** Police Department, tel. 06; Ambulance, Zamboanga General Hospital, tel. 08; and Fire Department, tel. 00.
**TELEPHONES:** Telephones cannot be installed on board when docked at the pier as is not allowed by the City Government.
**SERVICES:** Special services may be available, e.g. tank-cleaning equipment, facilities for discharge of tank-washings, compass adjusting, through representations to be made with the shipper or local Agent of the vessel.
**SHORE LEAVE:** Crew members are allowed ashore upon permission granted by the local Immigration Officer.
**AUTHORITY:** The Collector of Customs, Port of Zamboanga, Zamboanga City, tel. 1103.

# Poland

## GDAŃSK: 54.20 N. 18.40 E.

**ICE:** Efforts made to keep port open all year round. Only in very severe winter are difficulties experienced.
**DOCUMENTS:**
- 12 copies Cargo Manifest.
- 2 copies Bills of Lading.
- Discharge Books to be collected for presentation.
- Ship's Register.
- Maritime Declaration of Health.
- Ship's Articles/Crew List.

## LISBON: 38.43 N. 09.11 W. (See Plan)

**PORT LIMITS:** A vessel is considered to be an "arrived vessel" when, after entering the Tagus Estuary, she has left behind the alignment between the Torre of S. Juliao and the Torre of Bugio.

**DOCUMENTS:**
Health Certificate.
6 Crew Lists.
10 Passenger Lists.
2 Lists of Articles held by the crew: cameras, binoculars, radios, cigarettes, spirits, etc.
2 Stores Lists.
All to be signed by ship's Master.

Certificates for vessels up to 500 tons: – tonnage register, loading and navigability certificates. For vessels over 500 tons: – tonnage register; loadline; radio; safety equipment and navigability certificates.

**CARGO DOCUMENTS:**
10 Manifests.
3 sets of Bills of Lading.
For cargo in transit: 2 Manifests.

**PILOTAGE:** Compulsory. Pilot boat anchored outside the river at Cascais Bay, day and night, but Pilot can also board vessel inside the river at Belem Station.

Pilots are to be requested not less than 6 hours or more than 24 hours prior to the ship's arrival, by a radiogram addressed to "Pilotos Lisboa", or by a radio call direct to the pilot boat stating ship's name, estimated time of arrival at the pilotage area, the station where ship wants to take a Pilot, and vessel's draft. Any vessel failing to correct her ETA or arriving more than 2 hours after her ETA may have to wait at Cascais before a pilot is available to board.

Pilots can be contacted by VHF Channel 16, on permanent watch, and by radio-telephone 2182 kHz.

**MAX. SIZE:** Depth alongside piers varying between 15 and 34 ft.

**HEALTH:** Ordinary visit made at central area with vessel anchored, from 08.00 to sunset. Master may ask for free pratique to get ship moored immediately on arrival. For this, necessary to cable the Health Authorities, addressing cable as follows: Estação Marítima de Lisboa, Rocha do Conde de Obidos, max./min. respectively 15/6 hours prior to the ship's arrival. Text of cable: "ship's name, nationality, code (MIBDU), day and time of arrival" signed by the Master.

**RADIO:** ETA to be advised by Master, to Agent, 24 and 12 hours before ship's arrival. Lisboa Radio: call sign CUL, medium and short waves by code 720, 22, 24. By VHF Channels 5, 9, 21, 16 and 19.

**SPECIALISED CARGO-HANDLING FACILITIES:** *Container Terminal* at Santa Apolonia equipped with two portainers of 30 and 36 tons respectively, side loaders, semi trailers, tractors, etc., depth 8·5 metres.

*Roll-on/roll-off Terminal* at Alcantara for ferry boats and cargo.

*Grain Elevators and Silos* at Poco do Bispo operated by Federacao Nacional dos Produtores de Trigo. Unloading by elevator up to 400 tons per hour.

*Ore Terminal:* At Barreiro there is a terminal for unloading ore from railway wagons to lighters, intended for carrying ore, in particular, to the national steel works (Siderurgia Nacional).

*Cement Storage Terminal:* This is at Poco do Bispo and is operated by Secil.

**TANKERS:** Shell and Sonap berths exposed to 9 knot current. Essential to use good new mooring lines.

*Cabo Ruivo Terminal:* This is operated, on a concession basis, by Soponata and has depths of 11 metres, capable of mooring tankers up to 65,000 dwt. alongside its jetty.

*Fuel Oil Facilities:* The port of Lisbon fuel oil installations belong to private companies are concentrated along both banks of the Tagus at the following points:

Sacavem and Cabo Ruivo (with oil refinery facilities), Montijo, Barreiro, Santa Iria, Porto Brandao, Porto dos Buchos.

**FRESH WATER:** Usually supplied by barge unless vessel lying alongside a pier where water provided.

**FUEL:** Shell, Esso, Sonap. These companies can supply through their own barges or alongside their private bunkering stations on pier.

**DEVELOPMENTS:** In a second stage of the Santa Apolonia container terminal there will be a new wharf of 500 metres length, with water depths of 13·5 metres and a close levelled paved ground area of nearly 50,000 sq. metres will be prepared. This terminal will have, when completed, an 850 metres long wharf and a close paved area of 75,000 sq. metres.

This second stage will also include two roll-on/roll-off berths, as well as lift-on/lift-off equipment. It is operated by the Port Authority.

**IDENTIFICATION CARDS:** Crew members going ashore will need a special yellow card issued by Agent and stamped with police visa. The cards are supplied by Agent to be completed on board in accordance with crew list particulars. With these shore passes crew members may circulate between Lisbon and Cascais, and Lisbon and Sintra.

Master and/or Owners will be fined Esc. $10,000 for any crew member found ashore without that card. A double fine will be imposed in case of reincidence.

Similar cards, but white, are required for passengers in transit.

**CONSULS:** Practically all countries are represented in Lisbon.

**REPAIRS:** There are several repair workshops. The biggest is Lisnave Shipyard with several docks, one for vessels up to 300,000 tons and a new dock where vessels up to 1,000,000 tons can be repaired.

**AIRPORT:** Within the Lisbon area. Regular International services.
**TIME:** GMT. plus one hour No change during the year.
**HOLIDAYS:** 1st January; 1st June; 10th June; 15th August; 5th October; 1st November; 1st December; 8th December; 25th December.
**AUTHORITY:** Board of Administration.

**AGENTS:** A. J. Gonçalves de Moraes, Lda. Steamship and Forwarding Agents. Tourist Department. 22, Rua do Alecrim-Lisbon 2. PO Box 2772. Tel. 34943 (20 lines). Telex 1296, 1297 and 1298. Cables: Amoras. VHF Radio, Channel 16.

## SETUBAL: 38.30 N. 08.55 W.

**DOCUMENTS:**
5 Crew Lists.
5 Passenger Lists.

**TIME:** Atlantic Std. Time, 4 hours less than GMT. No alterations during year.
**HOLIDAYS:** Refer to "San Juan".
**SHORE LEAVE:** Allowed.
**DELAYS:** No delays unless another ship is already berthed.
**AUTHORITY:** Puerto Rico Ports Authority, Harbour Master.

### GUANICA: 17.57 N. 66.54 W.

**DOCUMENTS/GENERAL INFORMATION:** Refer to "Ponce".
**PILOTAGE:** Port operations are under the control of the Captain of the port. Pilot services are available day and night.
**ANCHORAGE:** Harbour is located 8 miles Westward of Guayanilla Bay. Though small, it is one of the best hurricane harbours in Puerto Rico.
**TUGS:** Available from Guayanilla.
**BERTHING:** Pier facilities are owned by the Guanica Central and used for bulk sugar shipments and limited general cargo operations. On the East side of the harbour entrance there is a reinforced concrete bulkhead wharf 440 ft. long with depths of 25 ft. alongside for the handling of bulk fertilisers. Small craft landings and facilities are along the boulevard fronting the beach.
**FRESH WATER:** Available in limited quantities for emergencies only.
**FUEL:** Available by trucks from Ponce.
**MEDICAL:** Medical assistance is available; if hospitalisation is required for any crew member, it will probably be necessary to arrange for admittance to a Ponce hospital.
**CONSULS:** None available locally, nearest at Ponce, Puerto Rico.
**AUTHORITY:** Port Captain, Puerto Rico Ports Authority.

### GUAYANILLA: 18.00 N. 66.47 W.

Oil Terminal owned by Commonwealth Oil Refining Co.
**DOCUMENTS/GENERAL INFORMATION:** Refer to "San Juan".
**PILOTAGE:** Port operations are under the control of the Captain of the port and pilot services are available day and night.
**ANCHORAGE:** It is the largest hurricane harbour and one of the best in Puerto Rico. Available for vessels of any draft. The harbour is protected at its entrance by extensive reefs which extend a mile or more offshore. The entrance channel between these reefs is about 1·5 miles long and about 0·4 mile wide.
**MAX. SIZE:** Tankers up to 680 ft. LOA, with maximum draft 35 ft. 6 in. forward and 38 ft. aft.
**TUGS:** Available 24 hrs. daily, as requested by vessel.
**BERTHING:** Fuel dock. Two 680 ft. berths with 365 ft. depth alongside. Mooring buoys placed to assist in clearing dock and mooring dolphins. No slop disposal facilities. The Union Carbide Company has berthing facilities for barge operations.

New port facilities for Commonwealth Oil Refining Co. and Pittsburgh Plate Glass are owned by the Puerto Rico Ports Authority.
**FRESH WATER:** Available whenever requested by the vessel.
**FUEL:** Available only whenever arranged by owners of the vessel and/or characters prior to arrival.
**MEDICAL:** Medical service is available; hospitalisation at Ponce, which is only 15 minutes distance.
**CONSULS:** None available locally; nearest at Ponce, Puerto Rico.
**AUTHORITY:** Commonwealth of Puerto Rico – Harbour Master. Port facilities are operated and owned by the oil refinery.

### JOBOS (Aguirre): 17.58 N. 66.39 W.

**DOCUMENTS/GENERAL INFORMATION:** Refer to "Ponce".
**PILOTAGE:** The Port of Jobos is served by the Pilots of Port Ponce. Services must be arranged in advance.
**ANCHORAGE:** A fine land-locked harbour, located on the South coast, approximately 42 nautical miles Eastward of Ponce and 20 miles West of Point Tuna. Anchorage inside the bay is Southward of the pier in depths of 19 to 24 ft. soft mud bottom.
**RESTRICTIONS:** The principal entrance is from Westward between Morrillo Cay and Ratones Cay, thence through buoyed channel to the bulk sugar-loading pier at Central Aguirre. Private range lights mark the dredged cuts. Controlling depth is 28.5 ft.
**TUGS:** No tug-boats available.
**BERTHING:** A 1,000 ft. finger pier at Central Aguirre, 29 ft. depth alongside. Pipe-lines for water and molasses, a conveyor belt for bulk sugar and a gantry crane are on the pier.
**FRESH WATER:** Fresh water is available at this dock.
**FUEL:** No bunkers are available at this dock.
**MEDICAL:** Medical assistance is available; if hospitalisation is required for any crew member, it will probably be necessary to arrange for admittance to a Ponce hospital.
**CONSULS:** None available locally; nearest available at Ponce.
**AUTHORITY:** Puerto Rico Ports Authority, port facilities owned and operated by Central Aguirre Sugar Company.

### LAS MAREAS: 17.55 N. 66.10 W.

The Puerto de la Mareas Terminal is located on the South side of the island of Puerto Rico. It is located approximately 26 nautical miles East of the port of Ponce. The nearest city is Guayama. All vessels calling at Phillips Puerto Rico Core Inc., Puerto de las Mareas Terminal should be consigned to Phillips Puerto Rico Core Inc., and all official documents for such ships should show them so consigned. In conformance with port regulations, no vessel will be allowed to tie up alongside a pier without having first obtained a berthing permit from the Ports Authority Captain of the port.
**DOCUMENTS:** The following documents are required by the Customs and Immigration Authorities for entry and clearance:

Master's Oath (Original and 1 copy).
Stores List (Original and 2 copies).
Crew Purchasing List (Curio List) (Original and 2 copies).
Inward Foreign Manifest (Original and 3 copies).
Quarantine Free Pratique (will be furnished by Doctor).
Deratisation Certificate (on date).
Crew List (1 certified and 2 not certified copies).
Clearance from Last Port (depends on sailing port).
Crewmen Landing Permits (for each crew member without the plastic Form I-189).
Passenger List (if any passengers).

The Passenger List must show full names, sex, age, nationality, and occupation of passengers landing at Puerto de las Mareas. The ultimate destination of in-transit passengers must also be shown in the passenger list.

Deratisation Certificates can be renewed at the port.

In most cases, outward clearance and cargo documents can be delivered on board by the Ship's Agent, making it unnecessary for Masters to obtain such clearance in person from the U.S. Customs Office.
**PILOTAGE:** The use of Pilots is compulsory for all vessels, with the exception of American Flag vessels bound to or arriving from a U.S. port which may dispense with Pilots provided the vessel has on board a deck officer qualified and licensed by the United States Coast Guard, as a harbour Pilot for Puerto de la Mareas. Vessel's

Agent will arrange for Pilot, upon notification in the arrival notice, who will board inbound vessels off the entrance to the harbour about one mile off-shore.

When approaching the dock and channel, vessels must have one anchor, to be designated by the Pilot, free of the hawse pipe and ready for quick release if necessary to stop the vessel.

Every vessel requiring a Pilot must provide, properly rigged and secured, a pilot ladder which conforms to international safety standards. When picking up or dismissing the Pilot, the vessel must heave-to and provide a lee with the pilot ladder rigged on the lee side.

**APPROACHES:** The harbour is entered through a channel 250 ft. in width and its narrowest portion, bearing N. 25° E. It is protected on the Eastern side by a rubble mound breakwater extending approximately 700 ft. from the shore line. The dredged channel extends out to the 40-ft. depth contour and has a width at this contour of approximately 900 ft., narrowing to 250 ft. approximately 2,100 ft. inshore from the 40-ft. contour. The 250-ft. wide portion of the channel is approximately 1,000 ft. long. At the inshore end of the 250-ft. wide channel, the harbour itself extends for a length of 2,300 ft. and a maximum width of 950 ft. The harbour has a depth of 38 ft. below mean low water. The above dimensions are given to the bottom of the channel; the sides of the channel and the harbour are sloped at 1 in 3.

**NAVIGATIONAL AIDS:** (A) Seabuoy: The Seabuoy is located 300 ft. West of the centre line of the channel 2 miles offshore from the end of the rubble mound breakwater. It displays a white light through 360° flashing 0·4 second on and 3·6 second off. The buoy is painted with black and white vertical stripes and is fitted with a radar reflector.

(B) Channel Marker Buoys: Two lighted channel marker buoys are provided, located 550 ft. on either side of the centre line of the channel, 2,024 ft. offshore from the end of the rubble mound breakwater. These are lighted and marked as follows:

(i) Port-to (inbound vessels): This buoy has a 360° green light, flashing 0·5 second on and 2·0 seconds off. It is equipped with day-boards 3 ft. by 3ft. square, and painted black with green reflective perimeter.

(ii) Starboard-to (inbound vessels): This buoy is a 360° red light, flashing 0·5 second on and 2·0 seconds off. It is equipped with triangular day-boards 4 ft. by 4ft., painted red.

(Both these buoys are located at the 40-ft. depth contour.)

(C) Channel Marker Navigation Lights: There are four channel marker navigation lights, three of which are located on piling, and one on the end of the rubble mound breakwater.

(i) Port-to (inbound vessels): This marker is located on piping 400 ft. from the centre line of the channel, 2,024 ft. inshore from the channel marker buoys. The light is located 20 ft. above MLW, and is displayed through 360°. It is a green light, flashing 0·5 second on, 2·0 seconds off. The marker is fitted with 3 ft. by 3 ft. square day-boards, painted black with reflecting green perimeter.

(ii) Starboard-to (inbound vessels): This marker is located on a tower at the end of the rubble mound breakwater, 50 ft. above MLW. The light is displayed through 360°, red, flashing 0·5 second on and 2·0 seconds off. The marker is equipped with 4 ft. by 4 ft. red triangular day-boards.

(iii) Port-to (inbound vessels): This marker is located 175 ft. from the centre line of the channel 1,000 ft. inshore from the end of the rubble mound breakwater. It is equipped with a green light showing through 360°, flashing 0·5 second on and 2·0 seconds off. The light is located 20 ft. above MLW. The marker is equipped with 3 ft. by 3 ft. square day-board, painted black with green reflective perimeter.

(iv) Starboard-to (inbound vessels): This marker is located 175 ft. from the centre line of the channel, 1,295 ft. from the end of the rubble mound breakwater, and is mounted on piling with the light 20 ft. above MLW. It is equipped with a 360° red light, flashing 0·5 second on and 2·0 seconds off. The marker is equipped with red day boards 4 ft. by 4 ft. triangular in shape.

(D) Obstruction Light: This light is mounted on the turning dolphin and displays a 360° steady red light.

(E) Range Lights: The front range light is mounted on a tower located on the centre line of the channel. It consists of a set of double red aircraft warning lights 75 ft. above MLW. It is fitted with 4 ft. by 8 ft. day-boards, painted with red–orange reflective coating. The light is located 3,500 ft. inshore from the end of the rubble mound breakwater.

The back range light is located on the centre line of the channel, 5,500 ft. inshore from the end of the rubble mound breakwater. The light consists of a set of double red aircraft warning lights, 110 ft. above MLW. The tower is fitted with 6 ft. by 12 ft. day-boards painted with red–orange reflective coating with a 3 ft. white stripe down the centre.

**RESTRICTIONS:** The entrance channel has a depth below MLW of 40 ft. and the harbour itself has a depth of 38 ft. below MLW. Shipmasters are cautioned that swells in the approach channel can increase the draft of their vessels, therefore caution must be exercised in entering the channel in periods of heavy weather.

**RADIO:** Agents of vessels or owners or its representatives should advise Phillips Puerto Rico Core Inc. by telex, cable or telephone, 72 hours, 48 hours, and again 24 hours before their expected arrival at the sea buoy.

ITT Telex no. 385347 "Philcorgya".

Puerto Rico Communication Authority-Telex no. 347.

Telephone (809) 864–1515.

Incoming vessels should advise the Agent by radio, 48 hours and again 24 hours before their expected arrival at the sea buoy. Co stations available for such advice are:

Lantana Radio (WOE) – Lake Worth, Florida. (Equipped with RC automatic land-line circuit direct to New York City, San Francis California and Washington, D.C.)

New York Radio (WNY) – New York City. (Equipped with RC automatic land-line circuit direct to New York City, San Francis California, Washington, D.C. Also equipped with teletypewri (TWX) for direct communication with steamship companies in th United States having this equipment.)

Chatham Radio (WCC) – Chatham, Massachusetts. (Equipped wi RCA automatic land-line circuit direct to New York City, S Francisco, California, Washington, D.C.)

San Juan Radio (WCT) – Radio Corporation of Puerto Rico Mari Station, Transmits at 2530 kc/s., receives at 2134 kc/s., watch at 2 kc/s.

In addition to the above commercial radio facilities, incomi vessels may contact the port through facilities on tug stationed the port. These facilities are as follows:

HF radio: range 2 to 300 miles. 2182 kc., working frequenc 2638 and 2738.

VHF radio: range 30 miles. Channel 16 (156·8 Mc/s), worki frequency channel 14 (156·7 Mc/s).

SSB radio: 12 Mc/s, 8 Mc/s, 4 Mc/s.

Vessels diverted to Puerto de Las Mareas must furnish the requir 48-hour and 24-hour notices of arrival, unless notice of diversion received when less than 48 hours before anticipated arrival, which case the notice of arrival will be given as soon as notice diversion is received. In such cases, however, Phillips Puerto Ri Core Inc. reserves the right to refuse to load or unload such vesse if tankage is not available for the cargo, or if cargo is not available loading.

**TUGS:** As a safety measure, Masters of vessels calling at La Mareas are advised to engage tugboat assistance on arrival, tu ship around, and tie up alongside the pier, heading bow out to se Arrangements for the use of tugboats should be made well i advance of vessel's arrival of the sea buoy.

**BERTHING:** The dock at the terminal consists of a finger pi approximately 1,122 ft. in length inside the harbour with a tank loading berth on each side. The finger pier consists of a car platform 45 ft. by 90 ft., with fitted fender piling and dolphins. Th cargo platform is connected to shore by a driveway 12 ft. 6 in. wid The mooring and breasting dolphins outboard of the cargo platfor are connected to each other and to the platform by a walkway. N launches are required to handle mooring lines. The top of the car platform is 12 ft. above MLW level. Water depth alongside the fing pier is 38 ft. at MLW. There is no current at the dock or in the harbo

The fender system and breasting dolphins are designed to wi stand the forces exerted by a vessel of 81,300 tons displacem approaching the dock with a velocity component perpendicular t the dock face of 0·30 ft. per second.

Bollards for mooring lines are provided on the breasting dolphin the mooring dolphins and the turning dolphins. Each of the bollar and their associated dolphins are designed to withstand 120,0 pounds of mooring line tension.

Vessels will be required to vacate berths promptly on completio of loading or discharging cargo. Permission to use a berth when no loading or discharging cargo may be granted under special circu stances, and must be requested in writing to captain of the port.

Vessels will be allowed one hour in which to vacate the berth af completion of cargo handling, to start when the last hose is dis connected.

Three hours will be allowed for ballasting at the berth after comp tion of discharging cargo. Vessels awaiting cargo papers and customs clearance must vacate the berth on expiration of allow time and move to anchorage to wait for delivery of the papers.

If the vessel fails to vacate the berth on the expiration of th allowed time, it will be held liable for payment of any demurrage an or damages incurred by Phillips Puerto Rico Core Inc., as a resu of delays to other vessels waiting berths, or for any other consequen of its failure promptly to vacate the berth.

Turning basin 1,100 ft. wide and 1,060 ft. long, outboard of th turning dolphin, is provided. The turning basin has a depth over t entire area of 38 ft. at MLW. The turning dolphin at the end of th finger pier is designed to assist vessels in turning in the basi Normal procedure will be for vessels to enter the harbour and tu prior to docking. In the case of loaded vessels entering the harbo they may, at the Master's discretion, wait until they have discharg and turn just prior to leaving the harbour.

**HURRICANES:** The south coast of Puerto Rico is subject t winds of hurricane force, accompanied by abnormally high tid during the late summer and fall. In the event of such abnorm conditions, vessels may be required to put out additional moorin or if necessary, to suspend all operations and put to sea until nor conditions prevail.

**MEDICAL:** U.S. Public Health Service doctors will be available f attendance on vessels at Puerto de las Mareas, upon receipt o notice 48 hours prior to arrival. If hospitalisation is required for an crew member, arrangement could be made through the shi Agent with hospitals located in the municipality of Guaya Ambulance service can be furnished through request to Agent.

**TANKERS:** The various cargoes available at the Puerto de la Mareas terminal include motor fuel, cyclohexane, benzene, pa xylene, orthoxylene, mixed xylenes, paraffinic naphtha, and oth special products. Feedstock for Phillips Puerto Rico Core In facilities is naphtha, and there is a fuel oil unloading line. Ca handling is accomplished through various sizes of lines, as follo

| *Product* | *Hose size (in.) (each side of dock)* | *Line size* | *Loading/ discharging rate with one pump* |
|---|---|---|---|
| Naphtha feedstock | 4–8 | 20 | 13,700 bph |
| Motor fuel | 3–8 | 20 | 12,000 bph |
| Motor fuel | 2–8 | 12 | 5,700 bph |
| Benzene | 1–8 | 12 | 2,000 bph |
| Cyclohexane | 1–8 | 10 | 3,000 bph |
| Mixed Xylene | 1–8 | 12 | 3,400 bph |
| Orthoxylene (high purity) | 1–6 | 8 | 800 bph |
| Orthoxylene (standard purity) | 1–6 | 8 | 2,600 bph |
| Paraffinic naphtha | 2–8 | 16 | 7,500 bph |
| Paraxylene | 1–6 | 8 | 2,000 bph |
| Toluene | 1–8 | 8 | 2,000 bph |
| Fuel oil | 1–8 | 12 | 2,000 bph |
| Ballast | 1–8 | 8 | 3,000 bph |
| Domestic water | 1–2 | 2 | 7 tph |

**CONNECTING/DISCONNECTING HOSES:** A crew will be provided by the terminal to connect and disconnect hoses on the ship. Vessels are requested to have blanks removed from the cargo lines and hose handling booms rigged on arrival at the dock.

**READINESS:** Notice of Readiness to load or discharge is warranty that the vessel is in all respects ready to receive or discharge cargo, and that the vessel's equipment is ready and capable of loading or discharging petroleum or petrochemical products. Phillips Puerto Rico Core Inc. reserves the right to refuse to accept such notice of readiness if, upon inspection, the vessel is found not to be ready to receive or discharge cargo. Vessels will be accepted loading or discharging on a "first come, first served" basis. Vessels may tender notice of readiness upon arrival, berth or no berth, according to the terms of the charter party or contract of affreightment under which they have been engaged.

**BALLAST:** Ship's Masters are reminded that they are prohibited by Puerto Rico law from pumping dirty ballast overboard when within the Puerto Rican limits. Facilities are provided for disposing of dirty ballast ashore at Puerto de las Mareas. Vessels provided with separate clean ballast systems completely segregated from the cargo system and reserved for clean ballast only, may pump ballast overboard from such systems while at the dock, provided the tanks are inspected and approved for such pumping by the Dockmaster. Heavy fines are enforced for any discharge of dirty ballast, and due to the limited area of harbour, any violations will be quickly detected and reported.

Ballast is pumped ashore through an 8-in. line, capable of receiving at a pressure at the ship's rail of 100 psi. The ballast facilities are sufficient to accommodate 30,000 barrels of dirty ballast. Vessels are requested to arrive with a minimum of dirty ballast.

**FRESH WATER:** Available at the dock in limited quantities.

**FUEL:** No bunkers available at Puerto de las Mareas. In an emergency, bunkers may be delivered by barge from Ponce. In such cases, however, special permission must be obtained from the Harbour Master to take bunkers from the barge while loading or discharging cargo. Lubricating oils may be obtained from Ponce.

**STORES:** May be ordered through the ship's Agent for delivery at the terminal, but must be ordered at least 48 hours prior to vessel's arrival.

**CONSULS:** Consular representatives of the following nations are available in Ponce:

Venezuela
France
Panama
Dominican Republic
Netherlands
Honduras
Spain
Sweden

Further information can be obtained through the Agent.

**REPAIRS:** Complete repair and dry dock facilities are available in San Juan. Limited facilities for emergency repairs are available at Ponce. Requests for such services should be made to the Agent 24 hours prior to arrival.

**SURVEYORS:** There are no classification society surveyors stationed at Puerto de las Mareas, but they are available on call from Ponce or San Juan. Requests for survey services should be made through the vessel's Agent at least 24 hours prior to arrival.

**CARGO INSPECTION:** Representatives of Chas. Martin Inspectors of Petroleum Inc. will be available for cargo quantity and quality inspection as required. Address: POB 1017, Guayama, Puerto Rico 00654. Telephone: (809) 864–0428, 864–1515.

**CUSTOMS:** U.S. Customs and Immigration Authorities will board vessels at the dock, except in unusual circumstances, in which case they will board the vessel at anchor outside the harbour. The vessels will be required to furnish an accommodation ladder.

American Flag vessels will not require Customs entry or clearance unless arriving or departing to a foreign port.

**HEALTH:** The usual regulations concerning sanitation apply to the Harbour of Puerto de Las Mareas. The use of rat guards on all lines is compulsory, under penalty of fines for failure to comply. Trash and galley refuse may not be dumped into the waters of the harbour and must be kept on board until the vessel has sailed. Discharge of toilets and bathrooms into waters of the harbour is prohibited. Sanitary facilities are provided on the dock for use by crew members while their vessels are at berth.

**FIREARMS:** All firearms and ammunition should be shown on the stores list and may not be removed from the vessel during its stay in Puerto Rican waters. Any violations of this regulation will result in fines and confiscation of firearms and ammunition.

**SAFETY:** The provisions of Part 35 "Operations" of the Rule and Regulations to Tankvessels, Subchapter D (CG-123) published by the U.S. Coast Guard are in force at Puerto de Las Mareas, and must be observed under penalty of fine and imprisonment as provided therein.

Particular attention is called to the following safety precautions:

(1) Vessels must be, and remain, in readiness to sail from the dock at any time. In the event of engine repairs, which might interfere with such readiness to sail, being required, written permission must be obtained from the Harbour Master before such repairs may be undertaken.

(2) Scuppers must be plugged during cargo-handling operations.

(3) Absolutely no smoking or open lights will be permitted on the dock or open decks.

(4) Screens in good condition must be used over gauging hatches when not actually gauging.

(5) Operations may be suspended at the discretion of the Master, or may be required to be suspended by the Harbour Master, during severe electrical storms.

(6) In the event of a breakdown of communications between dock and the shore terminal during loading operations, and the need to shut off the flow of cargo to the vessel, an emergency signal consisting of a continuous sounding of the ship's whistle shall be given. The signal shall not be discontinued until the flow of the cargo has been shut off.

(7) An electrical bonding cable will be provided from the dock to the ship. This bonding cable must be firmly secured to a clean metal surface of the vessel's hull or cargo piping before hoses are connected, and must remain in place until the hoses are disconnected.

Violations of these and other safety regulations, as described in Parts 35 of Subchapter D will result in the suspension of cargo-handling operations by the Harbour Master, or the PPRC dock personnel or safety inspectors, without recourse. Such suspension of cargo operations will continue until the violations are corrected or the safety hazzards removed.

**MAIL:** Official and personal mail may be addressed to the vessel in care of the Agent, and will be delivered to the vessel by the Agent on arrival. The Agent will accept official and personal mail from the vessel, and will ensure its delivery to the local U.S. Post Office, upon receipt of a mail transmittal slip to support disbursements.

**SHORE LEAVE:** Normally, there are no restrictions on shore leave. In order to avoid sailing delays, due to late return of crew members, Masters are requested to ensure that all crew members are aboard at sailing time.

Crew of foreign vessels must present valid passports, current individual International Vaccination Certificates, and a copy of Form I-95, properly filled out, in order to be passed through the terminal gates.

Taxi service is available from Guayama and may be called from the gate.

**AUTHORITY:** Puerto Rico Ports Authority; port facilities operated by Phillips, P.R. Core, Inc.

## MAYAGUEZ: 18.12 N. 67.09 W.

**DOCUMENTS:** If vessel staying less than 24 hours:

Crew List.
Stores List.
Cargo Manifest.
Crew Purchase List.
Valid Load-line Certificate.
Ship's Register.
Clearance from Previous Port.

Vessels working cargo. Two sets of documents to be prepared as follows:

Original:

1 copy of Inward Foreign Manifest (U.S. Customs Form 5727–A), Cargo for San Juan.
1 Stores List.
1 Crew Purchase List.
1 Passenger List (if any).
1 Crew List (U.S. Form I–418).
1 copy of Ship's in Transit Cargo Manifest.
Clearance from Last Port.

Duplicate:

Same as original except the in-transit Cargo Manifest.
If vessel has on board cargo for another American port, an extra copy of the original Cargo Manifest is required.
Crew members to declare individually all articles such as souvenirs, etc.

Agents require:

3 sets of Bills of Lading.
2 copies of Manifest (for San Juan only).
1 copy of Crew List.
1 copy of Stores List.
1 copy of Crew Purchases List.
1 copy of Narcotics List.
1 copy of Passengers List.

Certificates:

Valid Load Line Certificate.
Ship's Register.
U.S. Tonnage Tax Certificates (if any).

**PILOTAGE:** Ships Agents must make arrangements with Captain of the Port Office at Mayaguez Pier well in advance, not less than 24 hours, of arrival of vessel at harbour entrance. Pilot boats are painted black (hull) and white (topside) as required, showing the letter "P" on each bow. Pilots board 1 to 2 miles offshore of sea buoy depending on weather conditions.

**ANCHORAGES:** Close to the entrance channel and boundaries. Sufficient depths for large vessels.

**RESTRICTIONS:** The bay is easily entered day or night and is a good harbour in any weather, except in a hurricane. The harbour is 3·8 miles wide, and offshore is protected by shoals which extend across the harbour entrance in a general North by West direction.

The principal channel is about 0·4 mile wide, with depths at the entrance of about 47 to 120 ft. and it is marked by lighted buoys and the range. Depth in the inner channel is approximately 30 ft. and close alongside the pier from 28 to 29 ft.

**MAX. SIZE:** Cargo vessels 600 ft. or more in length call at the port. Safe draft for operations at the wharf is 27 ft.

**RADIO:** Communication to all points, including ships at sea, is available through commercial systems. Cables–Telex via RCA Communications, Inc., a global service of Radio Corporation of America. ITT World Communications, Inc., tel. 830–3316. Puerto Rico Telephone Company, local and overseas communications services, 129 and 128.

**TUGS:** Not used at Mayaguez Port.

**BERTHING:** Berthing permit required from the Ports Authority. The Puerto Rico Ports Authority operates the terminal facilities which consist of a bulkhead wharf approximately 1,200 ft. long, apron width, 30 ft., and transit sheds. There are other berthing facilities in the port which are owned by the tuna packing plants.

**STEVEDORES:** Arrangements are made by the ship's Agents or representatives.

**MEDICAL:** The Agent should know in advance any medical needs so that he can make the necessary arrangements with the U.S. Public Health Service. Good medical and hospital services available.

**TANKERS:** See "Port of Guayanilla". Regular calls from Esso and Texaco to unload fuel by means of barges in order to supply tanks on land by means of pipes located at berthing facilities.

**FRESH WATER:** Available at pier facilities alongside the berth in four outlets to supply any amount required at any time. Hose connections of 2½ in. or less, maximum pressure.

**FUEL:** All grades available.

**FIRE PRECAUTIONS:** Standard fire and safety precautions throughout. U.S. Coast Guard regulations.

**DEVELOPMENTS:** It is planned to locate a heavy lift crane on the berth facility.

**GANGWAY/DECK WATCHMEN:** Ship provides own gangway watchmen.

**OPENING/CLOSING HATCHES:** By stevedores.

**IDENTIFICATION CARDS:** Required to go ashore.

**CONSULS:** Dominican Republic, France, tel. 832–4322. Others at San Juan.

**REPAIRS:** Call San Juan facilities where complete salvage equipment is available. Service to other ports of the island.

**REPATRIATION:** Arranged by ship's Agents.

**AIRPORT:** Maní Airport, 15 minutes from pier, served by regular airlines daily from Mayaguez to San Juan.

**TIME:** GMT minus 4 hours all year round.

**HOLIDAYS:** Refer to "San Juan".

**POLICE/AMBULANCE/FIRE:** Telephone numbers: Police, 343–2020, 832–2300; Ambulance, 832–0496, 832–3212; Fire, 343–2330, 832–2330.

**TELEPHONES:** Can be arranged by Puerto Rico Telephone Company.

**SHORE LEAVE:** Allowed.

**AUTHORITY:** Puerto Rico Ports Authority, Post Office Box 3272, Mayaguez, Puerto Rico 00708. Autorip, Mayaguez, P.R. Tel. 832–3590, 832–3375.

U.S. Tonnage Tax Certificates (if any).

**PILOTAGE:** Port operations are under the supervision of t Captain of the Port and pilot services are available day and nigh

**ANCHORAGE:** Harbour is protected from the prevailing Easte trade winds by enclosing reefs. To the Southward the harbour exposed and for this reason is not safe in a hurricane.

**RESTRICTIONS:** Depths: Entrance channel 36 ft.; turning bas 31 ft.; anchorage, 40 ft.

**BERTHING:** The municipal pier is a concrete and steel constru tion 430 ft. long by 100 ft. wide, with a steel and cement transit sh The municipality has also built a concrete bulkhead wharf extendi East-west for 2,260 ft. from the pier. To the North of the bulkhe wharf there is a manoeuvring basin 30 ft. deep. Depth alongsid Pier 1A, 30 ft.; Pier 2, 29 ft. 6 in.; Pier 3, 30 ft.; Pier 4, 30 ft.; Pier East-side, 33 ft.; Pier 5, West side, 32 ft.

**FRESH WATER:** Water is available whenever ordered in advan for 24 hour daily service or at request during office hours.

**FUEL:** Available by pipe-line: (Texaco only) diesel, gas oil, No. fuel oil. By trucks (Chevron, Shell, Esso).

**MEDICAL:** Ambulance permanently available at dock area, hosp tal and doctors service available as requested to the Agent.

**CONSULS:**
Colombia
Denmark
Dominican Republic
France
Honduras
Holland
Panama
Spain
Sweden
Switzerland

**REPATRIATION:** Arranged by ship's Agents.

**TIME:** GMT minus 4 hours.

**HOLIDAYS:** Refer to "San Juan".

**DEVELOPMENTS:** Shed No. 1 has been dismantled to provi space for open space cargo operations.

The existing part of the bulkwharf running South–North which 260 ft. long is being reconstructed to increase its length to 600 in which a gantry crane will be erected to handle bulk cargo. Th crane will have capacity of 76 tons.

A trailer ship terminal is under construction, consisting of apron of 600 ft. long and 40 ft. wide and marshalling space for 4 vans.

These new facilities will be in operation by December 1974.

**AUTHORITY:** Muelle Municipal de Ponce, Apartado 125, Pla Ponce, Puerto Rico. Tel. No. 842–2145.

## SAN JUAN: 18.28 N. 66.07 W.

**DOCUMENTS:** Foreign vessel calling for fueling purposes a staying less than 24 hours:
Crew List.
Stores List.
Cargo Manifests.
Crew Purchase List.
Valid Load Line Certificate.
Ship's Register.
Clearance from Previous Port.

No customs formal entry or clearance is required if vessel depa before 24 hours and transacts no other business related to cargo passengers.

Vessels working cargo. Two sets of documents to be prepared follows:

Original:
1 copy of Inward Foreign Manifest (U.S. Customs Form 5727-A Cargo for San Juan.
1 Stores List.
1 Crew Purchase List.
1 Passenger List (if any).
1 Crew List (U.S. Form I–418).
1 copy of Ship's in Transit Cargo Manifest.
Clearance from Last Port.

Duplicate:
Same as original except the in-transit Cargo Manifest.
If vessel has on board cargo for another American port, an ext copy of the original Cargo Manifest is required.
Crew members to declare individually all articles such souvenirs, etc.

Agents require:
3 sets of Bills of Lading.
2 copies of Manifest (for San Juan only).
1 copy of Crew List.
1 copy of Stores List.
1 copy of Crew Purchases List.
1 copy of Narcotics List.
1 copy of Passengers List.

U.S. Customs clearances: Documents required:
Outward Foreign Manifest.
Crew List in duplicate (American vessels only).

(Functions of admeasurement and documentation of American sels are performed by the office of Marine Inspection, U.S. Co Guard, Post Office Building, San Juan, Puerto Rico).

Consular clearances for the Dominican Republic:
5 copies of Crew List.

5 copies of List of Weapons and Ammunitions on board.
5 Lists of Passengers.
Consular clearances for Venezuela:
6 copies of Store List.
8 copies of Crew List.
7 copies of Passengers List.

Purser shall supply the Agents with necessary information to fill the inward and out bound cargo reports which have to be filled at Customs House after departure of the vessel.

Customs Inspector requires:
Valid Load Line Certificate.
Ship's Register.
U.S. Tonnage Tax Certificates (if any).

**PILOTAGE:** Compulsory. Ships Agents must make arrangements with pilot station well in advance – not less than 24 hours – of arrival of vessel at harbour entrance. Pilot boats are painted black (hull) and white (topside). Show the letter "P" on each bow. Pilots board three miles offshore of sea buoy. Call pilot station on Channel 16 VHF. There is no inner anchorage for incoming vessels to wait for the Pilot.

**ANCHORAGES:** Deep draft anchorage "E", on the South-west shore of Isla Grande, is for vessels awaiting Customs or quarantine, and no vessel shall remain more than 24 hours without a permit from the Commonwealth and U.S. Coast Guard Captains of the Port. Restricted Anchorage "F" (Fox), shoreward of the West margin of Anegado Channel, is for vessels discharging explosives. No vessel shall anchor without a permit from the Captain of the Port. Anchorage "D", East end of San Antonio Channel, is for yachts, schooners and small craft.

**RESTRICTIONS:** Besides the harbour entrance channel (Bar Channel) and the main ship channel (Anegado Channel) with depths of 42 ft. and 36 ft., respectively, there are four other navigable channels in the inner harbour:

The Army Terminal Channel, which runs in a straight North to South direction is approximately one mile long and 300 ft. wide. Charted Depth in the Army Terminal Channel and alongside Piers 1 and 3 is 35 ft., safe draft 33 ft. Depth in other channels varies 30 to 32 ft. and alongside pier facilities 28–30 ft.

The Puerto Nuevo Channel, approximately 1 mile long and 300 ft. wide. with an average depth of 32 ft.

The Graving Dock Channel, approximately 1 mile long, 300 ft. wide, an average depth of 30 ft.

San Antonio Channel, approximately 1½ miles long, 300 yards wide, mid-channel average depth 35 ft.

**MAX. SIZE:** Cargo vessels 750 ft. in length call regularly at the Port of San Juan. Channel to tanker's berth, 36 ft.

**RADIO:** Radio communication to all points, including ships at sea, is available through commercial systems. Cables-Telex via RCA Communications, Inc., a global service of Radio Corporation of America, tel. 723–6170, San Juan, Puerto Rico.

The signal station at Fort San Cristobal in San Juan harbour is manned around the clock for radio-telephone communication with incoming and outgoing ships traffic. Transmitting vessels can communicate with the station through 156·8 mHz (Channel 16) for call and reply and working Channel 14, 156·7 mHz.

Vessels approaching to enter San Juan Harbour shall remain outside not less than 3 miles Northerly of the harbour entrance to pick up the Pilot, and vessels about ready to depart shall inform the signal station via radio-telephone of their intentions.

**TUGS:** The Puerto Rico Lighterage Company, tel. 723–6164, and Port San Juan Towing Company, tel. 724–2360, operate a fleet of tug-boats. Tugs join vessel just inside harbour entrance.

Use of tugboats compulsory for docking and undocking vessels 8,000 tons displacement and over unless equipped with bow or side thrusters.

**BERTHING:** All vessels must request and obtain well in advance before arrival a berthing permit from the Ports Authority.

*Pier 1:* North shore of the harbour, in the Old San Juan waterfront, East of Customs Building and next Westerly to the ferryboat landing. Modern twin berth, double deck cruise and passengers vessels terminal, pierside passenger and baggage gangways, elevators, parking and shopping. Water and light facilities available.

*Ferry Terminal:* Next Easterly to Pier 1. Ferry terminal for the San Juan-Cataño ferry fleet.

*Pier 3:* North shore of the harbour, Old San Juan waterfront next Easterly to the ferry terminal. Tourist ships terminal similar to Pier 1. Depths in the approaches and alongside tourist piers 35 ft.

*Wharf No. 6:* An extension of the open bulkhead easterly of Pier 3 marginal wharf, 940 ft. long being reconverted to accommodate cruise and passengers vessels. Water and light facilities available.

*Pier 7:* Northerly continuation of Pier no. 6; 472 ft. long, one berth, general cargo pier. Operated by the San Juan Dock Company.

*Pier 8:* East of Pier 7, finger pier, three berths, general cargo pier. Transit shed area and other covered storage 175,508 sq. ft. open area 40,000 sq. ft. Water and light facilities available.

*Pier 9:* East of Pier 8. Finger pier, three berths, general cargo pier. Net storage space pier shed 133,738 sq. ft. open area 40,000 sq. ft. Water and light facilities available.

*Pier 10:* North shore of San Antonio Channel. East of Pier 9. Finger pier, one berth, tug and barge terminal. No transit shed space. Department of Public Works' facility, leased to the Puerto Rico Ports Authority and sub-leased and operated by the Puerto Rico Lighterage Company. Water, fueling facilities and light available.

*Wharf No. 11:* East of Pier 10, marginal wharf, one berth, 580 ft. of bulkhead, general cargo pier. Transit shed area 100,000 sq. ft. ample back area. Gulf Puerto Rico Lines' pier. Water and light facilities available.

*Wharf No. 12:* An extension of Wharf No. 11. Bulkhead 550 ft. long, wide apron, 15,000 sq. ft. transit shed area, 37,000 sq. ft. open storage. General cargo wharves. Water and light facilities available.

*Wharf No. 13:* Prolongation of Wharf No. 12; 28,000 sq. ft. transit shed area, 55,000 ft. open storage area, general cargo wharf. Water and light facilities.

*Pier 14:* Extension of Piers 12–13 bulkhead; marginal wharf, general cargo pier, wide apron. 446 ft. long, 40,000 sq. ft. transit shed area, ample back area. Water and light facilities available.

*Pier 15:* General cargo pier. Dry dock, floating dock, ship repairs, foundry. One wooden floating dry dock of 1,000 tons capacity. Floating crane 25 tons lifting capacity. Four mobile cranes 45 tons capacity. Reinforced concrete graving dock. Fuel and water available. United States Navy installation under lease to Abarca Dry Dock and Marine Terminals for commercial ship repair and dry-docking operations. Bulkhead wharf and finger pier used by commercial vessels.

*Frontier Base Pier:* Navy facility operated by the Puerto Rico Ports Authority under contract. Two berths for sea-going vessels. Depth alongside 30 ft. Principally used for the handling of open storage cargo and the berthing of cruise vessels.

*Isla Grande Terminal:* South shore of San Antonio Channel. Marginal wharf. 1,500 ft. long bulkhead. Wide aprons. Transit shed 32,000 sq. ft. with 240,000 sq. ft. of paved open area. 30 ft. depth alongside Western section of bulkhead for shallow draft vessels. Container terminals:

(*a*) In a Westerly direction Seatrain Lines' lift-on-lift-off trailership terminal; bulkhead wharf 950 ft. long. Wide apron, ample trailers marshalling yards. Two 45 tons capacity pierside cranes.

(*b*) On the South shore, berthing facilities, 300 ft. bulkhead wharf with adjacent areas for TMT's roll-on/roll-off operations. Shoreside concrete ramp extending out seaward. Tug-barge operation, loading and unloading through bow and side ramps. Maximum draft approximately 18 ft.

(*c*) Berwind Lines' roll-on/roll-off shoreside ramp, barge-tug operation; loading and unloading at bow. Maximum draft 18 ft.

U.S. Navy property under lease and operated by the Puerto Rico Ports Authority.

*Puerto Nuevo Docks:* Terminals "A" and "B" marginal wharves. Two 500 ft. berths. 102,000 sq. ft. transit shed area. Two cargo sheds. Thirty ft. depth alongside. General cargo piers. Limited open storage area.

*Trailership Terminals:* (3 at Isla Grande port zone, above, 5 at Puerto Nuevo port zone. Berths C, E, F, G and H and West side Army Terminal).

*Berth "C":* TTT's roll-on/roll-off terminal. Shoreside movable ramps for side loading and unloading. Extra wide pier platform, ample trailer marshalling yards. 30 ft. depth alongside, approx.

*Berth "D":* 100,000 sq. ft. of transit shed space for break-bulk operations and cargo stripping. Marginal wharf 40 ft. wide, 600 ft. long. Ample cargo shed used for distributing cargo coming in trailers for different consignees. Ample trailer marshalling yard. Thirty ft. depth alongside, approx.

*Berths "E", "F", "G", and "H":* 600 ft. each, continuous bulkhead wharves, lift-on/lift-off operation. Maximum draft alongside 30 ft. Extra wide pier platforms. Ample trailer marshalling yards. Five 25-ton capacity pierside cranes are installed at Berth "F".

*Army Terminal Pier:* Finger pier; three berths. Approximately 50,000 sq. ft. transit shed area. East and West berths 600 ft. each. North berth 200 ft. Under the control of the Ports Authority. West side, ramp for roll-on/roll-off operation.

*Isla de Cabras Pier:* Explosives handling pier at Isla de Cabras. Ports Authority property.

*Bulk Grain Handling Facilities:* Berthing, silos and other shoreside installations for the receipt of shipments of bulk grains (Nebraska Mills, California Rice Mills, Red Seal, etc.).

**STEVEDORES:** Arranged by the ship's Agents.

**MEDICAL:** Medical attendance and services are available for seamen at the United States Marine Hospital in San Juan (out-patients). The Presbyterian Hospital handles internal cases.

**TANKERS:** Caribbean Oil Refinery pile clusters berth, maximum permitted draft, 33 ft.; Navy Oil Pier, maximum permitted draft, 29 ft.

**FRESH WATER:** Most of the piers have adequate installations to supply water.

**FUEL:** Served in barges either alongside the vessel at the pier or at anchor. Other combustible liquids are delivered in tank trucks by Shell, Esso and Texaco.

**REPAIRS:** Abarca Dry Dock and Marine Terminals handles dry docking and major vessel's repairs. Stateside Shipyard and Marina, at Isla Grande, and Vaello Shipyard at La Puntilla, Catano, operate marine railways for dry-docking and repairs of small vessels. The Puerto Rico Lighterage Company handles minor ship repairs.

**DEVELOPMENTS:** Two additional trailership berths are under construction at the Puerto Nuevo port sector.

**GANGWAY/DECK WATCHMEN:** Ship provides own gangway watchmen.

**OPENING/CLOSING HATCHES:** By stevedores.

**IDENTIFICATION CARDS:** Required to go ashore.

### YABUCOA: 18.03 N. 65.49 W.

Man-made harbour and channel located at the South East corner of Puerto Rico. Berthing facilities for deep draft tankers and a barge dock. Port and shoreside installations for the receipt and shipment of fuel oils and liquid chemicals for the Puerto Rico Sun Oil Company, a petro-chemical complex.

Facilities consist of the following: Ship channel 500 ft. wide, 40 ft. depth. Turning Basin. Dock and operating platform for a maximum of 100,000 tons dwt. tank vessels. Mooring, breasting and turning dolphins. Catwalks. Additional dock appurtenances (fire-fighting equipment, protective jetty, etc.). Pilot services and tugboats available.

**AUTHORITY:** Captain of the Port, Puerto Rico Ports Authority.

## Qatar

### DOHA: 25.17 N. 51.32 E.

**DOCUMENTS:** The following documents will be required at this port:

*Agents:*

1 copy of the Arrival Report (supplied by the Agent on boarding).
1 copy of the Crew List.
1 copy of the International Declaration of Health.
1 copy of the Passenger List (if applicable).

*Port Health:*

1 copy of Crew List.
1 copy of Dates and Types of Inoculations.
1 copy of the International Declaration of Health.

*Immigration:*

4 copies of Lists of Passengers Landing (if applicable).

*Customs:*

Bonded Store List (Bond will be sealed but issues are available).
Port Clearance Certificate should be procured before the vessel sails.

**PILOTAGE:** Application for a Pilot should be made through the Agent in Bahrain at least 24 hrs. before arrival.

Pilot station keeps a VHF watch 24 hrs. a day on Channel 16. Call sign DOHA PORT. Similar watch kept on R/T 2182 K/cs.

Pilot boat proceeds to the vicinity of the Doha Outer Buoy, position 25° 17′ 06″ N. 51° 41′ 26″ E. when the pilot is required. Pilot launches are painted white. When the vessel is underway the Pilot requires a pilot ladder complete with manropes. When the sea is calm and the vessel is at anchor the accommodation ladder may be used.

**ANCHORAGES:** Near the Outer Buoy and Southerly from it only. Minimum depth of water 5 fathoms.

**ENTRY RESTRICTIONS:** Compulsory pilotage for all vessels of 14 ft. draft or more. Naval vessels exempted. Depth of water in entrance is 27 ft. plus tide and the minimum depth of water required under the keel for manoeuvring in the channel is 3 ft.

Maximum draft for normal or average high waters is 28 ft. 9 in.

**MAX. SIZE:** Maximum length 525 ft., maximum breadth 75 ft., maximum draft 28 ft. 9 in. Vessels of 560 ft. have been accepted in favourable conditions.

**HEALTH:** The International Flag signals for pratique must be flown and remain up until the vessel is cleared by the Port Health Authorities. A Port Health Official will board the vessel in the anchorage or at the Deep Water Jetty when the vessel is alongside. There is no automatic or radio pratique available.

**RADIO:** ETA and Agents messages should be routed through Bahrain Radio. Radio-telephone communications through Doha Port signal station. Calling and listening 2182 kHz. Workin quencies, 2638 kHz, 2738 kHz, 2570 kHz.

**TUGS:** One Government tug M.T. *Raiyan* is normally availab assist in berthing operations. The only exception being when th is under repair.

**BERTHING:** Berthing alongside the Deep Water Jetty (30 ft.) 2,400 ft. in length and can accommodate four vessels at any one with drafts of up to 28 ft. A further two berths may be construct a later date.

Normally berthing and unberthing to and from the deep jetty is not at any time without certain reservations:

(*a*) Draft and trim of vessel.
(*b*) Height of tide.
(*c*) Visibility from Navigation Bridge.
(*d*) Prevailing weather conditions.

The duty Pilot has the option to berth or unberth a vessel a discretion after consultation with the Senior Pilot, when the a mentioned conditions are unfavourable.

**STEVEDORES:** ETA advice is required on the number of g workable. Advance notice is required for any heavy lifts (s excess of 10 tons dwt.) and the consignees name if possib special arrangements have to be made for handling. Average charge rate is 75 tons per hook day.

**MEDICAL:** Unless an emergency no advance notice is requ Hospital facilities do exist and a doctor will visit on request. Cu Vaccination and Cholera Certificates are required.

**DENSITY:** The density of the water is salt (1025) at all states o tide.

**FRESH WATER:** Fresh water is available in small quantitie tons) at the anchorage and larger quantities when alongside jetty and is supplied by motor tankers.

**FUEL:** At present time no fuelling facilities available.

**GANGWAY/DECK WATCHMEN:** The Public Security De ment (Police) post a guard at each gangway, but it is advisable ship also supplies a watchman. Before landing *every* crew me must lodge his passport or seamen's identity card with the g when alongside the jetty and at the dock Police Station whe the anchorage.

**OPENING/CLOSING HATCHES:** This work may be carried by either crew or stevedores, but usually by the latter.

**CUSTOMS ALLOWANCES:** Qatar is "dry" and no official a ance is made. The bond is sealed on the ship's arrival.

**CARGO GEAR:** No additional requirements apart from t required by International Law.

**CREW IDENTIFICATION CARDS:** Discharge Books or P ports are required to be handed to the Police before any member may proceed ashore.

**CONSULS:** The following countries maintain embassies in Q

| | | |
|---|---|---|
| Iran | U.S.A. | Jordan |
| Great Britain | Egypt | Yemen |
| Saudi Arabia | France | Netherlands |
| Kuwait | India | Tunisia |
| Iraq | | |

**REPAIRS:** Only minor repairs can be carried out. Metal-loc bottom brushing and underwater welding.

**REPATRIATION:** Crew changes can be carried out. The Ag will require to know the names, discharge book or passport num and necessary information of dates, etc. well in advance for authorities. Repatriation is normally by air, but Asian crews ca repatriated to Pakistan and India by sea.

**AIRPORT:** It is about 3 miles from the port to the airport. T are regular flights to Europe, U.K. and India by British Airw M.E.A., Air India, P.I.A. etc.

**TIME:** The standard time in Qatar is GMT plus 3 hours.

**HOLIDAYS:** The holidays in Qatar are usually religious therefore fall on moveable dates. As far as shipping is concer there are only two days when work is not possible under any circ stances.

**POLICE/AMBULANCE/FIRE:** Police 4646; Ambulance 5 Fire 5252.

**TELEPHONES:** Telephone available at the new Jetty. No. 257

**GENERAL:** Particular attention must be paid to:

(1) The Qatari flag must be flown at all times at the fore mast

(2) Liquor is not allowed ashore and it is a serious offenc offer alcohol to a Qatari.

(3) Smoking is not permitted in any public places during the mo of Ramadan.

**SHORE LEAVE:** Shore leave is permitted after the Immigra Authorities have cleared the ship and given permission, in wri on the Crew List. Seamens' documents or passports must be de sited with the police at the gangway and retrieved on retur aboard.

**DELAYS:** The only delays that can be expected for berthing on draft. No delay exists for vessels up to 22 ft. 6 in. Over this de may occur awaiting tides. Congestion delays for the discharg cargo do occur from time to time but the maximum that ca expected is 1/2 days.

**AUTHORITY:** Port Department, Ministry of Communication Transport, P.O. Box 313, Doha, Qatar.

**AGENTS:** The Qatar National Navigation & Transport Co. PO Box 153, Doha, Qatar, Qatar Arabian Gulf. Telex: DH 206. 23864. General Manager: 22245. Shipping Manager: 21138. Supervisor: 21213. Cable address: "Navigation Dohao".

## HALUL ISLAND: 25.38.55 N. 52.25.33 E. (See Plan)

Halul Terminal S.B.M.

Qatar national flag should be flown during hours of daylight.

**DOCUMENTS:** Master required provide 2 copies of crew list and show Light Dues receipt. All other necessary papers will be supplied on arrival, by Berthing Master.

**PILOTAGE:** Berthing Master will board incoming vessels in approximate position with Halul lighthouse bearing 270°×2·5 miles (that is to the Eastwards of the island) only. Vessels are requested not to pass to the Westwards or the Southwards of the island when approaching the anchorage or pilot cutter, as this is a hazardous area due to numerous underwater pipe-lines. Masters requested provide a good lee for the launch to facilitate boarding of Berthing Master and the lifting on board of equipment.

**ANCHORAGE:** To the Eastwards of Halul Island centred in a position with Halul lighthouse bearing 270°×2·3 miles. Depth about 80 ft. and bottom sand.

**MAX. SIZE:** SBM No. 1 up to 65 ft. draft (240,000 tons). SBM No. 2 up to 100 ft. draft (500,000 tons).

**HEALTH:** If sickness on board, details should be included in ETA message. No Doctor on Halul. In emergencies the services or advice of Company's Medical Officer based in Doha may be obtained. If Medical Officer or patient has to be flown to or from Doha, the tanker concerned will be charged for helicopter hire. Round trip is approx. £80.

**RADIO:** Vessels should establish communications with Shell Company of Qatar Ltd., Doha, at least 48 hours before arrival Halul Terminal, giving ETA local time and quantity of cargo required in long tons. Message to "Shell Qatar Doha" via Bahrain Radio. Any changes in ETA should be passed via Bahrain Radio, or if within range, through station 2AA (see below).

A private radio station, call sign "2AA", operated by Shell Company of Qatar Ltd., situated in position 25° 17′ 12″ N. 51° 34′ 39″ E. A continuous listening watch maintained on 500 kHz. Incoming tankers should listen for the 2AA traffic list which is transmitted on 438 kHz at 0400, 0800, 1200 and 1600 hours GMT after first calling on 500 kHz. Other details shown in Admiralty List of Radio Stations Volume 1.

A standard information cable is passed to all incoming tankers by station 2AA.

Ship's radio station must not be used while tanker moored to SBM.

**VHF:** A VHF station on Halul Island, call sign "Halul Control", maintains a continuous watch on the International Marine Band, Channel 6. The station has a range of approximately 50 miles and incoming tankers should establish communications with this station as soon as possible. Ship-to-shore communication during loading is by portable VHF Radio telephone provide by the terminal.

**TUGS:** Not available.

**BERTHING:** Approach is from the open sea, passing to the Eastwards of Halul. There are two single buoy moorings. Number one SBM in position 25° 39′ 00″ N, 52° 25′ 55″ E. fitted with two 810 ft.×16 in. floating hose strings and connected to one × 30 in. shore submarine and two 12 in.×150 ft. nylon floating mooring lines from the buoy. This berth will primarily accommodate vessels up to 120,000 tons dwt., but however, may be used for larger vessels if required. Loading rates of up to 8,000 m³ may be given. Number 2 SBM in position 25° 38′ 36″ N, 52° 27′ 35″ E. fitted with two 885 ft.×24/20 in. floating hose strings and connected to two double 15 in.×150 ft. nylon mooring lines from the buoy. This berth will accommodate vessels of over 120,000 tons dwt. with up to a draft of 100 ft. Loading rates of up to 15,000 m³ will be given. In both berths, mooring lines from the buoy are secured on the forecastle head using equipment provided by the terminal. A suitable messenger rope should be ready for use. No moorings are used aft. The Berthing Master will advise in detail the mooring procedure.

*Hose Connections:* No. 1 SBM amidships port side two 16 in. hoses. Hose derrick should be rigged to lift at least 5 tons and two 16-in. reducers should be fitted on the port side only.

No. 2 SBM amidships, starboard, side two 20-in. hoses. Hose derrick must be rigged to lift at least 10 tons and two 20-in. reducers should be fitted on starboard side only.

Hose connection carried out by ship's personnel with advice from Berthing Master. Tankers *not* permitted to immobilise main engines or auxiliaries whilst moored to SBMs.

**DENSITY:** At berth, 1028/1030 (approx.).

**CARGO:** Flash point below 32° Fahrenheit.

$H_2S$ content. Masters should refer to the International Oil Tanker and Terminal Safety Guide Section 1. 4. 2. on the subject quoted here for easy reference.

*1.4.2. Hydrogen Sulphide* – $H_2S$. Hydrogen sulphide has a disagreeable odour characteristic of rotten eggs which quickly deadens the sense of smell so that a dangerous concentration may be present which cannot be detected by odour.

If exposure to hazardous concentrations of this gas is likely to occur, appropriate safety precautions should be taken. Suitable respiratory protection should be available during ullaging and sampling.

The TLV is given as 10 p.p.m. but concentrations in enclosed spaces should be reduced as far below this level as practicable and if men are to work without breathing apparatus, a nil concentration should be achieved before entry is permitted and effective ventilation should be maintained.

On tankers regularly committed to the carriage of sour crude, $H_2S$ gas indicators should be provided.

It is important to realise that the concentration of $H_2S$ can be measured and expressed in two different ways.

the p.p.m. in the liquid, by weight;
the p.p.m. in the air, by volume.

Producing and processing departments at terminal often use the liquid measure for $H_2S$ content, and this could be confusing to tanker officers who usually think of $H_2S$ as expressed in air volume measure. There can be a vast difference between the two measures. The measure in air is higher and can be very much higher. For example, chemists have measured a concentration of 7,000 p.p.m. (deadly) in the vapour stream coming out of an ullage opening when a tank is being topped off with a crude oil containing only 70 p.p.m. $H_2S$ in the liquid. Therefore, it is of vital importance to appreciate that a sour crude can release a lethal concentration of $H_2S$ into the air.

The following guide to the effects on exposed persons of various atmospheric concentrations of $H_2S$ gives some indication of its dangers:

| Measured in air by volume | |
|---|---|
| 50 to 100 p.p.m. | Eye and respiratory tract irritation after exposure of one hour. |
| 200 to 300 p.p.m. | Marked eye and respiratory tract irritation after exposure of one hour. |
| 500 to 700 p.p.m. | Dizziness, headache, nausea, etc., within 15 minutes; loss of consciousness and possible death after 30 to 60 minutes exposure. |
| 700 to 900 p.p.m. | Rapidly produces unconsciousness and death occurs a few minutes later. |
| 1000 to 2000 p.p.m. | Death is apparently instantaneous. |

Apparent death from $H_2S$ is not irreversible as prompt and efficient artificial respiration may restore life.

The terminal should advise the Master if the cargo to be loaded contains $H_2S$ in concentrations which cause the gases vented during loading to be hazardous if inhaled. When handling cargo with a noticeable $H_2S$ content or when ballasting after discharge of such cargo, it is recommended that the following precautions should be taken.

The officer supervising the operations should keep a sharp watch on personnel for signs of fatigue or distress.

Lifelines, breathing apparatus and resuscitator should be readily available.

Loading through the pumproom should be avoided where possible to reduce the possibility of $H_2S$ contamination of the pumproom atmosphere.

Gas should be vented through the cargo tank venting system and, if open ullaging is necessary, the ullage plugs should be kept open only for a minimum period of time.

When ullaging tanks, personnel should work in pairs and stand at right angles to the wind direction in relation to the ullage opening.

Personnel should not enter a pumproom without first starting the ventilation, checking that there is no gas present, and without someone else standing by. If any gas concentration is recorded, a self-contained breathing apparatus should be worn.

Other spaces into which $H_2S$ may have been drawn should be ventilated and checked before entry.

Persons overcome by $H_2S$ should be moved to a gas free area immediately and artificial respiration should be administered at once.

Gas tests should be made on deck and in accommodations at regular intervals and particularly during the topping-off periods. If concentrations exceed 10 p.p.m. inside the accommodations, or 50 p.p.m. on deck more than 10 feet from a gas outlet, the loading rate should be adjusted and if this does not result in a decrease of the gas concentration, loading should be stopped until conditions have improved or other suitable measures are taken.

During discharge, the pumproom bilges should be kept dry.

During loading or ballasting operations, conspicuous notices warning of potential danger should be posted on deck and at pumproom entrance, and at the entrance to any other space which could be affected.

**TIME:** Local time is GMT plus 3 hrs.

**FRESH WATER:** Not available.

**FUEL:** Not available.

**REPAIRS/STORES/LAUNDRY:** Not available.

**TANK CLEANING:** No facilities available and ships must arrive with clean ballast, lines and pumps.

**CUSTOMS:** Trading in liquor is *strictly* prohibited and no alcoholic drink should be offered to Arab nationals.

**TIME:** Local time GMT plus 4 hours.

**SHORE LEAVE:** Not Permitted.

**AGENT:** The Shell Company of Qatar Ltd., PO Box 47, Doha, Qatar, Arabian Gulf. Telegraphic address: "Shell Qatar Doha".

## UMM SAID: 24.54 N. 51.34 E. (See Plan)

When vessel enters port waters in ballast, the ballast water for overside discharge must be clean and a declaration signed by Master and delivered to representative of the terminal. Ashes, oil, oily water or other refuse must not be discharged overboard in port waters. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard whilst in port waters.

**DOCUMENTS:**
Health Declaration.
Crew Lists,
Light Dues Receipt.

Other necessary papers supplied on arrival.

**BUOYED CHANNEL:** All vessels wishing to navigate the Umm Said buoyed channel must obtain prior clearance from Umm Said Control who can be contacted on VHF Channels 14 or 16 or by Telex via Bahrain Radio, addressed to Petroqat Umm Said. This precaution is essential to avoid unexpected encounters with deep-laden oil tankers.

**APPROACHES:**

*Depths.* In Outer Channel there are at least depths of 37 ft. in vicinity of Nos. 1 and 2 buoys, 3 and 4 buoys and Nos. 9 and 10 buoys. Between Outer and Inner Channel, depth varies from 40 ft. at Nos. 11 and 12 Outer Channel buoys through 72 and 78 ft. between "S.E. Arrif" and "S. Arrif" buoys to 47 ft. close to No. 1 Inner Channel buoy. In Inner Channel, least depth is 38 ft. between Nos. 3 and 4 Inner Channel buoys.

From Inner Channel to anchorage, depths vary from 43 ft. between Channel and Turning buoy to 48 ft. at anchorage.

*Tides.* Tides in this area have large diurnal component and at times there is only one high water and one low water in twenty-four hours. This irregularity is more pronounced at Umm Said than at Outer Channel entrance for which predictions are made.

In December the higher high water, or the only high water during periods of single day tides, occurs between 0500 and 1400; in March between 2200 and 0900; in June between 1800 and 0100 and in September between 0900 and 2100.

At Umm Said there are a few days in the year when tide does not rise above 5 ft. and there are considerable periods each day when predicted height of tide is greater than 3 ft. In vicinity of Nos. 3 and 4 Inner Channel buoys, high water occurs about 1 hour after high water at Outer Channel entrance and rise of tide is slightly more than at Outer Channel entrance. Higher high water is normally 5 ft. or better, rising to 8 ft. at exceptional Springs.

Meteorological conditions may affect all the above tides by +2 ft.

*Tidal Streams.* In general, flood stream sets to South south west and ebb stream to North north-east, the rate being up to two knots at Springs.

Cross sets will consequently be experienced in the channel, more particularly in Northern part of Outer Channel, between Outer Channel and "S.E. Arrif" buoy and between "S. Arrif" buoy and the Turning buoy. Outer Channel entrance stream continues to set to Southward for some time after tide has started to fall.

**PILOTAGE:**

Inward: Except on special request Pilots are not provided for the inward passage. Tankers should proceed to Eastern Anchorage, having first received clearance from Umm Said Terminal to enter channel. This is to ensure that all outward bound vessels are aware of traffic movements in channel. Pilot will board incoming vessels at "H" Buoy, if requested.

Outward: Compulsory. Pilots will be disembarked off Hul (H) light buoy.

N.B. It is requested that tankers of 40,000 dwt and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft. above the water. This can be adjusted to suit conditions. A pilot ladder should be rigged immediately abaft the accommodation ladder, to within 2 ft. above the water. This will enable Pilot to ascend pilot ladder clear of launch, and then step on to lower platform of accommodation ladder. Vessels should comply with the current U.K. Merchant Shipping (Pilot Ladders) Rules.

When automatic pilot hoists are used a responsible English-speaking officer must always be in attendance.

Pilotage is compulsory for dry cargo ships bound for Umm Said anchorage. Pilotage performed by Doha Pilots.

**ANCHORAGE:** Eastern Anchorage. Depth 48 ft.

**MAX. SIZE:** Draft of laden tankers leaving Umm Said controlled by depth at outer end of Outer Channel. This is 37 ft. below Chart Datum and Zero of Predictions. Tide rarely falls below 1 ft. above datum, so that there is always 38 ft. or more in the channel.

Even under worst weather conditions there is no appreciable movement on larger ships in Outer Channel. As deep-draft vessels always reduce speed between Nos. 3 and 4 Inner Buoys and in Outer Channel, there is very little "draw down" and an allowance of 3 ft. under the keel for safety is considered adequate. Deep-draft vessels should endeavour to pass between Nos. 1 and 2 Outer buoys at higher high water for the Outer Channel entrance.

In general, limitations are as follows:

(*a*) Ships drawing 35 ft. or less can sail at any time on any day.
(*b*) Ships drawing 36 ft. will rarely have to use tides.
(*c*) Ships drawing 37 ft. will usually have to use tides.
(*d*) Ships drawing 38 ft. always have to use tides.
(*e*) Ships drawing 39 ft. will occasionally be neaped.
(*f*) Ships drawing 40 ft. will be neaped 120 days+a year. The best months are April to August.
(*g*) Ships drawing 41 ft. can sail occasionally. The best months are June and July.
(*h*) Ships drawing 42 ft. are not worth programming as on the few days when predictions indicate they could sail, meteorological conditions may well cut the tides.

*Navigation in shallow waters:* The navigation of deep drafted vessels at high speeds in shallow waters introduces certain hazards. Pilot/Mooring Masters and Masters of ships should be guided by the following:

(*a*) Due consideration should be given to the effect of draw down at speed on vessel's draft in shallow water, bearing in mind vessel's trim.
(*b*) If possible, confirm actual height of tide against predictions and if not, bear in mind that after strong winds the actual height of tide may be reduced and extra caution must be exercised for a few days during and after bad weather.
(*c*) Ensure accuracy of vessel's draft reading, including the ship drafts, having in mind the tendency of vessels to sag the adverse effect of a small list.
(*d*) Reduce to a minimum safe speed to pass over and near areas.
(*e*) Reduce to a minimum safe speed when negotiating turn order to reduce heel under helm.
(*f*) Note that list can mean an appreciable increase in draft.
(*g*) When strong tidal streams are running across a channel, vigilance is required, and allowance made for set, particu at reduced speed, to ensure vessel proceeds along channel.

**HEALTH:** (Quarantine and Medical Clearance). The Med Officer of Qatar Petroleum Company Ltd. will carry out these du Medical attention to Masters and crews of ships arranged by Q Petroleum Company's Medical Officer when asked for by Maste

**RADIO:** Vessels are requested to inform QPC Limited by cabl ETA Hul (H) light buoy 48 hours prior to arrival. It should be cle indicated whether times quoted are Greenwich Mean Time Local Time (GMT plus 3 hours). Also state quantity of cargo, in tons, and maximum loading rate required. Cables should be addres "Petroqat, Umm Said", and passed via Bahrain Coast Radio Stat

When advising ETA ships must state last port of call and if th is any sickness on board. If last port of call Bahrain or Ras Tan the port previous to them must be stated.

**VHF:** Tanker VHF Radio Communications. Terminal equip operate on six channels of International Maritime Mobile R Telephone Service as follows:

| *Channel No.* | *Transmit frequency mc/s.* | *Receive frequency mc* |
|---|---|---|
| 1 | 156·05 | 156·05 |
| 9 | 156·45 | 156·45 |
| 11 | 156·55 | 156·55 |
| 12 | 156·60 | 156·60 |
| 14 | 156·70 | 156·70 |
| 16 | 156·80 | 156·80 |

Continuous listening maintained on Channels 16 and 14, call being "Umm Said" and range of station approximately 50 miles

**TUGS:** No tug available.

**BERTHING:** Pilots act in same capacity as Mooring Masters in berthing, after which they supervise raising of flexible hoses connection to ship's manifold. During loading operation they ac company's representatives.

Vessel's crew are expected to assist with hose connecting.

Mooring, loading and unmooring carried out night and day necessary standards of safety can only be maintained if ves have equipment suited to terminal requirements.

North Berth is a Single Buoy Mooring in Position 24° 53′ 3 51° 34′ 54″ E. Vessels are moored by a single hawser from bo buoy. (See Plan section.)

The following equipment should be carried by each vessel:

(*a*) An 8 in. circumference × 120 fathom nylon hawser trailed a similar hawser, ready to run out from the bow. Also spare 8 in. × 120 fathom nylon hawser.
(*b*) One good boat rope 4½ in. circumference at least 200 ft. at portside.
(*c*) Derrick or crane rigged over the starboard side manif should be capable of lifting 16 in. float hose to a height to 30 ft. above deck.
(*d*) Reducers or adaptors to be bolted to two ship's flanges to take 16 in. hoses.

*Warning:* Ship's anchors must never be used within half a mi this berth or the 36 in. submarine pipeline and must therefo well secured at all times. (See Plan section.)

Vessels moored at South Berth by ship's anchors and moo buoys. Following equipment should be carried:

(*a*) Port and starboard anchors to be fitted with marker buoys sufficient line.
(*b*) Two good boat ropes 4½ in. circ., at least 200 ft. long.
(*c*) A good line by the pilot ladder for hauling on board equip such as hose clamps, wrenches, reducers and elbows.
(*d*) Four good mooring lines aft of a suitable size for the vess which they are used. Each line should consist of 120 fat hawser, tailed by a similar hawser and ready to run o required.
(*e*) Two good mooring lines forward similar to the after line use on breast buoy if necessary.
(*f*) Two good rope stoppers to be available forward. Four rope stoppers to be available aft.
(*g*) Derricks or cranes reaching over hose connection shoul capable of lifting flexible hose from sea-bed to a heig up to 30 ft. above deck.
Derricks should have a safe working load of 10 tons in to lift 12 in. hose strings.
(*h*) Reducers or adaptors to be bolted to ship's flanges, so take 12 in. hose.
(*i*) Carpenters stoppers are provided on loan by Q.P.C. for with Company's 4¾in. wires and chain stoppers should n used.

*Note.* Where a vessel has two or more loading connections ship's flanges should not be less than 4 ft. apart.

**TERMINAL INFORMATION:**

| *Berth* | *Max. t.p.h.* | *Fixed sea-line* | *Strings of flexible hose* |
|---|---|---|---|
| North (SPM) | 5,000 | One – 36″ | Two – 16″ |
| South (CBM) | 4,000 | One – 24″ | Two – 12″ |

*Depth of water:* Available depth of water at seaward end of sea-line is as follows:

| | |
|---|---|
| North Berth (SPM) | 65 ft. (19·6 m.) |
| South Berth (CBM) | 44 ft. (13·41 m.) |

An allowance of 8 ft. for South Berth has been made for height of sea-line end cradle above the sea bed.

*Berth limitations:*

North Berth (SPM) – None.
South Berth (CBM) – Head North – All vessels under 900 ft.
Head South – All vessels under 1,100 ft.

After the vessel has been securely moored in berth, the hoses are lifted and connected to the ship's manifold.

The Mooring Master will not transmit any loading instructions to the shore until the officer-in-charge of the deck is satisfied that the hoses are connected correctly and that all valves have been set for receiving cargo.

While in berth, ships should be ready to move under their own power in the event of their breaking adrift, catching fire, fire in adjacent berths or other emergency. No repairs should be carried out while in berth which would immobilise the ship or impair her fire-fighting efficiency.

The Mooring Master will instruct the Master of the vessel as to any signals needed for local requirements.

The Mooring Master brings a portable radio to the ship.

The radio may not be used for private conversation. Use of the ship's radio while at the loading berth is strictly prohibited.

When loading is completed, hoses will be disconnected and lowered, under the supervision of the Mooring Master.

Ships will then proceed to an anchorage allocated by the Mooring Master or direct to sea.

**BULK HANDLING FACILITIES:** A Government Jetty has been constructed in Umm Said Bay connected to a Fertiliser Production Plant and grain mill. There are facilities alongside the quay for loading bulk urea and bagged urea; for loading refrigerated liquid ammonia; discharging bulk grain.

Vessels up to 60,000 dwt. may be accepted alongside.

The jetty is 700 ft. long, 100 ft. wide; the deck level being 20 ft. 3 in. above. Admiralty Chart datum. There is a least depth of 40 ft. alongside.

Government Pilots provide berthing assistance. See "Doha".

The Qatar Petroleum Company has started construction work for a liquid gas plant which will include a "T"-head jetty extending approximately 380 metres seaward from position 24° 54′ 15″ N. 51° 33′ 37″ E. due for completion in 1974.

*OPERATIONAL EQUIPMENT*

*Ammonia Arm:* One 10 in. liquid ammonia loading arm and one 6 in. vapour loading arm at a fixed point serving the North berths.

*Ship Loaders:* Two loading mobile machines (ship loaders) serving the whole of South side of the jetty, one of which is capable of loading bulk urea.

*Grain Unloading:* Six unloading points for connecting two mobile grain unloading machines.

*Conveyor:* System for export of bagged and bulk urea and import of grain.

*Crane:* 10-ton swl dockside mobile crane serving the whole of the North side of the jetty.

**CARGO:**

1. Flash Point. Flash point of Qatar crude is below 32 degrees Fahrenheit.

2. $H_2S$ Content. Qatar crude contains concentrations of $H_2S$ (sulphuretted hydrogen). This is an evil-smelling poisonous gas which can be lethal depending on concentration of gas in the air inhaled. It can be detected normally by smell, but unfortunately a high concentration of the gas rapidly paralyses sense of smell and may lead to a false sense of security. It is, therefore, important that when the presence of the gas is detected the area or compartment concerned must be left with all possible despatch until adequate ventilation can be carried out. *The explosimeter will not detect this type of gas.*

The under-noted precautions have been evolved as necessary to provide against a possible accident.

(a) During loading gas should only be allowed to escape via the agreed venting arrangements.
(b) When ullaging tanks, personnel should keep to windward of the tank opening and avoid breathing fumes as much as possible. If $H_2S$ is inadvertently inhaled the man should leave the area and not return until his sense of smell has been restored.
(c) No one should enter any pump room or any compartment when gas could collect unless another person is standing by.
(d) Lifelines, breathing apparatus and resuscitator should be readily available.
(e) As a precautionary measure, the gas ejector for the pump room should be put into operation at any time entry is made into this space whilst the possibility of $H_2S$ gas entering pump room from cargo or empty tanks exists.

**LOADING:**

(a) *Readiness.* Notice of Readiness will be received by Company Representative provided vessel ready to load. Lay time will commence six hours after receipt of Notice of Readiness, berth or no berth. The Company will make every effort to load tanker on arrival provided berth available and weather permitting.

Advice from vessel which states she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard vessel has been completed. As soon a possible after such a signal has been received, and without further advice, loading will commence. Damage to hoses can occur if ship's valves are not open at the start of loading.

(b) *Pipelines.* Each berth connected to shore installation by one or two submarine pipelines. The seaward ends of pipelines terminate in 12 in. flexible hoses, there being two such strings of hoses at each berth.

A mooring barge is available to assist ships to raise hoses from sea bed and connect up.

(c) *Tank Dips.* When loading, dips shall be taken frequently of vessel's tanks, thereby preventing loss of oil through a leaking hose. This particularly applies at night, as seepage of oil is practically invisible on the water during darkness. Inspection of vessel's tanks will be made before loading commences by a ship's officer and a representative of the Terminal. Opening dips and closing ullages will be taken and the quantity of cargo calculated. Particular care must be exercised by ship's personnel, towards completion of loading, in the "topping-off" of tanks to ensure that Terminal given timely advice of any decrease in pumping rate required. Adequate "Stand-by" notice should be given before the final "Stop".

(d) *Loading Pumps.* Cargo is loaded with two 1,200 h.p. pumps. Sudden shutting of valves or asking for pumps to be stopped whilst loading at full speed can cause pressure surges throughout pipe system. This has caused breakage in the lines and consequent loss of large quantities of oil with the serious risk of fire. Should a pressure surge occur causing damage to flexible hoses connected to vessel you can imagine the risk with large quantities of crude oil on the decks and in the surrounding sea. In order to avoid any possibility of this, please ensure that 15 minutes notice of requiring to stop pumping be given and that *slow speed* be asked for at this time.

(e) *Ballast.*
(1) Essential that vessel is adequately ballasted to ensure safe handling and manoeuvring. Please comply with Mooring Master's requests as to ballast quantity and disposition.
(2) Umm Said is an open roadstead and subject to sudden changes in weather. On occasions it is of great advantage to commence loading whilst discharging ballast or prior to completely deballasting to avoid having the vessel in a flying light condition.
(3) No cleaning of boiler tubes whilst ship is in port.
(4) All pump-room seacocks must be closed before commencement of loading.

**FUEL:** Bunkers not available. A vessel proceeding to a nearby bunkering port should repeat ETA to Qatar Petroleum Company Ltd. for information. If Qatar Petroleum Company Ltd. have sufficient information concerning expected arrivals, taking into consideration time taken to bunker, they will advise Masters when they consider that probable delay at Umm Said can be avoided by the vessel loading cargo before proceeding to the bunkering port. A similar request may be made in exceptional circumstances when there is a possibility that unduly large stocks of oil may necessitate shutting down the field.

**FRESH WATER:** Not available.

**CUSTOMS ALLOWANCES:** The State Laws of Qatar are very strict about import of liquor and its consumption both on mainland and on vessels in harbour. No employee, whether senior or junior, is permitted to import any liquor direct or to bring any liquor ashore from vessels, and under no circumstances should liquor be offered for consumption on vessel to any company employee unless he is of staff status. At the present time vessels enjoy the privilege of not having to seal liquor stocks whilst in port, but this privilege would be withdrawn if above rules not strictly observed.

**DERATISATION:** No facilities.

**DISCHARGE CERTIFICATE:** The Master of every vessel loading at Umm Said is handed a Discharge Certificate for completion by the Customs or Port Authority at port of discharge and return by air mail to the Director of Petroleum Affairs, Government of Qatar. Doha, c/o Q.P.C. Umm Said within 40 days of sailing from Umm Said. It must be emphasised that failure to comply with this requirement may result in delay or even boycott of the vessel upon return to Qatar. It is therefore in best interest to ensure that Agent at port of discharge attends to despatch of this certificate with least possible delay and by *airmail*.

**OUTWARD PASSAGE:** Same track is followed as for inward passage. Speed must be reduced before rounding the Turning buoy and passage of Inner Channel must be made at slow speed to avoid increase of draft due to "draw down" or "heel under helm". Outer Channel should also be taken at moderate speed to avoid "draw down" and "canal action" when passing close to shoal patches.

**AGENT:** Agency carried out by Qatar Petroleum Company Ltd. Telegraphic address, "Petroqat" Umm Said. Postal address, Qatar Petroleum Company Ltd., PO Umm Said, Qatar, Arabian Gulf.

# Reunion Island

## POINTE DES GALETS: 20.55 S. 55.18 E.

**PILOTAGE:** Pilot is normally ordered by the ship's Agent, or in particular cases by the Harbour Master if contacted by VHF beforehand. Pilot launch carries regulation pilot signals. Pilot boards at the entrance to the port about 1 mile from the breakwaters.

**ANCHORAGE:** There are 3 anchorages in the roads near the port.
(a) In Baie de St. Paul in depths of about 40 metres, well marked and safe except in very strong swell.
(b) South of the port entrance in the immediate approaches, depths of 40 metres, only used in fine weather and calm sea.
(c) In roads of La Possession unmarked anchorage and little used.

If vessel requires a Pilot for anchoring, then anchorage dues are incurred. Vessels anchoring by their own means do not incur charges.
**RESTRICTIONS:** Entering port in daylight only. Before berthing vessels swing in the outer port using starboard anchor.
**MAX. SIZE:** Length, 175 metres; draft, 9 metres.
**RADIO:** Saint Denis Radio. Harbour Master's Office equipped with VHF.
**TUGS:** Only used to assist vessel manoeuvring in the port. Tugs join vessel in outer harbour. Ship's lines always used.
**BERTHING:** Berth assigned by Harbour Master, basis vessel's length and draft. Tankers berth in the outer harbour at dolphin berth. No slop facilities.
**DENSITY:** 1025.
**FRESH WATER:** Available by pipe-line at the quays. Rate 10 tons per hour. Not available at tanker berth.
**FUEL:** Bunkers reported to be available.
**MEDICAL:** Doctor and hospital facilities available.
**WATCHMEN:** Not necessary.
**OPENING/CLOSING HATCHES:** Normally performed by ship's crew.
**REPAIRS:** Only minor repairs can be effected.
**REPATRIATION:** All facilities available for crew change and repatriation.
**AIRPORT:** 30 kilometres away, daily connections to Africa and Europe.
**TIME:** GMT plus 4 hours. No alterations during the year.
**HOLIDAYS:** Same as for "France".
**SHORE LEAVE:** Crew are allowed to go ashore.
**AUTHORITY:** Capitain du Port.

**AGENT** SCAC La Reunion P.O. Box 705, 97474 Saint Denis De La Reunion, Tel. 21.01.32., Telex 937.

# Romania

## CONSTANTZA: 44.12 N. 28.41 E. (See Plan)

**DOCUMENTS:** As soon as vessel is boarded by the border control commission, the Master fills in a form of declaration in 4 copies, which together with Stowage Plan, Cargo Manifests, Sanitary Certificates, is handed to representative of the Agency. Also following documents are to be handed over at Harbour Master's Office:

Derating Certificate.
Certificate of Nationality.
Tonnage Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Safety Radio-telegraph Equipment Certificate.
Ship's Register.
Safety Construction Cert.

N.B. These documents will not be returned to the vessel until sufficient funds, in U.S. dollars, have been deposited by Owners to cover all vessel's disbursements.

Crew Lists and Passengers Lists must be typed in several copies (up to 7).
**PILOTAGE:** Upon arrival in roads, a cable must be sent through radio coast station to Agent, stating hour of arrival and asking for Pilot. If entrance is not possible immediately due congestion Agent will call back the vessel advising when Pilot may board near the port entrance in order to berth vessel.

A Pilot is required for shifting in port, even for warping along the quay. Pilot-boat has black hull with "Pilot" in white on sides, and white upperworks. Pilots operate 24 hours a day on VHF Channel 14 only.
**MINEFIELDS:** Danger Area No. 3B (Constantza South). The area enclosed by the coast and by lines joining the following positions:

| | | | | | |
|---|---|---|---|---|---|
| (*a*) | 44° 09.81′ N. | 28° 38.25′ E. | (*b*) | 44° 08.99′ N. | 28° 39.96′ E. |
| (*c*) | 44° 08.50′ N. | 28° 39.96′ E. | (*d*) | 44° 08.50′ N. | 28° 54.01′ E. |
| (*e*) | 44° 00.17′ N. | 28° 54.01′ E. | (*f*) | 44° 00.17′ N. | 28° 39.88′ E. |

Danger Area No. 3A (Constantza North). The area enclosed by the coast and by lines joining the following positions:

| | | | | | |
|---|---|---|---|---|---|
| (*a*) | 44° 21.79′ N. | 28° 41.10′ E. | (*b*) | 44° 21.79′ N. | 28° 52.69′ E. |
| (*c*) | 44° 21.14′ N. | 28° 54.01′ E. | (*d*) | 44° 10.19′ N. | 28° 54.01′ E. |
| (*e*) | 44° 10.19′ N. | 28° 42.18′ E. | (*f*) | 44° 10.48′ N. | 28° 42.16′ E. |
| (*g*) | 44° 10.99′ N. | 28° 40.76′ E. | (*h*) | 44° 09.77′ N. | 28° 39.55′ E. |

**ANCHORAGE:** Anchorage areas in Constantza roads are just near the new port works in an area up to 44 ft. depth. Length and breadth have no special restrictions. Actual official permitted draft for tankers 30·6 ft. will be soon improved in new tanker berths. Constantza anchorage – East approach Nr. 2. Approach is between limits of Danger Areas Nos. 3B and 3A. Width 1·7 miles, length 15·3 miles, direction 270°–90°. Centre line joins following positions.

C1: 44° 09.35′ N. 29° 02.20′ E. At 17·5 miles on bearing 91° 12′ from Constantza main lighthouse (nr. 1·5).

C2: 44° 09.35′ N. 28° 41.00′ E. At 2·25 miles on bearing 99° 12′ from Constantza main lighthouse (nr. 1·5).

On this approach non-degaussed vessels with max. draft 12 metres may navigate.
**MAX SIZE:** Vessels up to maximum draft 35 to 36 ft. may berth in Constantza. See "Tankers".
**TUGS:** Tugs normally join vessel near port entrance assisting them until berthing.
**RADIO:** Constantza coast radio station, call sign YQ1, freque 462 kc/s. Operation – daily starting at 0650, 1250 and 1850 GMT.
**TANKERS:** Five oil wharfs under construction capable of bert tankers up to 80,000 dwt.
**MEDICAL:** Crew members are offered medical assistance all working days between the hours of 0900–1200 and 1300–1700.
**WATCHMEN:** Watchmen recommended for special gen cargoes. Cost will be arranged through Agent.
**CUSTOMS ALLOWANCES:** Small quantity permitted for e crew member out of bond but may be renewed if vessel stays lon in port.
**REPAIRS:** Largest dry dock in Constantza has 15,000 tons lif capacity, second dock up to 8,000 tons.
**TIME:** Local time is GMT plus 2 hours.
**HOLIDAYS:** Officiai holidays in Romania: New Year's Days and 2nd January); Easter Orthodox Monday (April); Labour Days (1st and 2nd May); Liberation Days (23rd and 24th Augu Anniversary of Socialist Revolution (7th and 8th Novemb Christmas (25th and 26th December); Proclamation of the Repu (30th December).
**STEVEDORES:** Working hours 0800–1700 and 2000–0500. Satur afternoons, afternoon of days before holidays, Monday morni and days after holidays until 0800 usually exempted in C/P altho work may be effected. Loading and discharging are generally effec by shippers and receivers, respectively at their own expense and t may work also on holidays, Sunday and Saturday afternoons, overtime expenses being charged to the vessel for shore labou but without payment of overtime to vessel's crew and with counting the time.
**SHORE LEAVE:** On completion of border inspection, crew can ashore taking their Seaman's Books (or Passports) and the perm they receive from the soldier at the gangway. The permits must returned to soldier upon coming back on board. In the event t crew members desire to visit another place outside Constan they shall inform Agent.
**GENERAL:** From the time a vessel enters the territorial waters Romania until she leaves the respective zone, i.e. 12 miles, it is co pulsory to fly the Romanian flag. Ships that call at Constantza the first time and have not got the Romanian flag on board must ha it ordered through the Agent immediately upon berthing.
**SHIPMASTER'S REPORT:** Rate of exchange is "Tourist Ra which is approx. three times official rate. It is illegal to take Roman money into or out of the country, any money which has not be spent must be returned to Agent in front of Customs when clearan is being given.

Any stages, gantlines or painting scows must be taken inboard night. First opening and closing of hatches are for ship's accou Motor-boats operate a "taxi" service in harbour at a cost of 8 per person per trip.

Bunkering barge *nr Monteoru* delivers oil at approx. 60 metric t per hour. Control will only issue clearance after all cargo wo bunkering, etc., is completed.

At Mineral Berth iron ore is discharged by two large Gan Cranes operating grabs, each working at approx. 200 tons per ho Rate of discharge is frequently disrupted by shunting of railw trucks – two tracks serve five berths.

**AGENT:** Navlomar Shipping Agencies, Telex 014–259. Cab "Navlomar Constantza".

## SULINA (including Galatz and Braila): 45.09 N. 29.39

**DOCUMENTS:** Within maximum 1 hr. from fulfilment of arri formalities the Master or Chief Mate reports at the Harbour Maste Office where he hands the following documents:

Certificate of Nationality.
Tonnage Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Safety Radio-telegraphy Equipment Certificate.
Safety Construction Certificate.
Cargo Gear Certificate.

The above certificates are to be valid and not to expire before shi sailing the port, Load Line Certificate and Cargo Gear Certific not to be older than 12 months, and same remain with the Harbo Master until ship's departure when returned through the represe ative of the Agency that accompanies the Control Commission departure.
**PILOTAGE:** Notice of arrival to pilot station at Sulina is to sent in due time through Navlomar Sulina.

Sulina – South-east approach nr. 5. Width 1·6 miles. Lengt miles. Direction 146°–326°. Centre line joins the following positio

S1: 45° 03.01′ N., 29° 53.4′ E. At 11·5 miles on bearing 124° 24′ fr Sulina Lighthouse (nr. 1·20).

S2: 45° 08.9′ N., 29° 47.9′ E. At 5·75 miles on bearing 95° 42′ fr Sulina lighthouse (nr. 1·20).

Thence on the No. 01 Sulina black light and whistle buoy, afterwards on the line of Sulina Entrance leading lights (301° into Sulina Channel and so to harbour. On this approach n degaussed vessels with maximum draft 7 metres may navigate.

The port of Galatz is situated on the left side of the Danube miles from the Black Sea.
**RESTRICTIONS:** Vessels calling at Danube ports are oblig to wait in roadstead of Sulina, at least one mile away from the bl buoy (a black floating cylinder marked 01 in white, which is ligh at night by green flashing light). All vessels both entering and go

out of Sulina channel as well as during navigation in the channel and Danube, are obliged to have on board a Danube Administration Pilot. As a rule, entering and leaving the Sulina channel, as well as navigation in the channel, is prohibited after night-fall.

**MAX. SIZE:** The draft at Sulina bar is 23 ft. passable. Any other changes of official draft are broadcast daily, at 1150 hours on 1935 metres, long wave. Galatz: Maximum passable draft River Danube is 23 ft. (7·01 m.) for vessels up to 180 metres LOA.

**MINEFIELD:** Danger Area nr. 7 A (Sulina). The area enclosed by the coast and by lines joining the following positions:

| | | | |
|---|---|---|---|
| (*a*) 45° 13.27′ N. | 29° 40.42′ E. | (*b*) 45° 11.77′ N. | 29° 41.42′ E. |
| (*c*) 45° 09.17′ N. | 29° 57.22′ E. | (*d*) 45° 07.37′ N. | 29° 57.22′ E. |
| (*e*) 40° 03.07′ N. | 29° 54.82′ E. | (*f*) 45° 03.07′ N. | 29° 39.34′ E. |

**CLEARANCE:** On arrival in Sulina harbour vessel has to stop to complete border and sanitary formalities and after vessel has completed same, with Danube Administration Pilot on board, proceed to destination. After the vessel has completed manoeuvring to come alongside berth, she is boarded by the sanitary commission. If the vessel has passed the sanitary inspection she is boarded by border control commission which includes a representative of the Agency, the latter assisting the Master in fulfilling arrival formalities and facilitating meeting of any requirements on ship's part. The Master fills in a form of declaration in 3 copies which together with the Stowage, Plan, Cargo Manifest, etc., are handed to representative of the Agency upon his leaving ship. A supplementary declaration is to be completed by the Master, stating: 1. Who supports disbursements expenses (name, mail address, telegraphic address, number of telex). 2. Who supports the supplies of bunkers, provisions other services, etc. (name, mail address, telegraphic address, number of telex).

**RADIO:** Constantza – coast radio station. Call signal YQ1, frequency 462 kc/s. Operation daily, starting with 0650, 1250 and 1850 GMT. Contents of transmission: meteorological and navigation notices. Weather forecasts are broadcast in clear English or codified; radio notices to mariners and navigation warnings are broadcast in Romanian, Russian, and English.

**BERTHING:** After arrival in Galatz roads and port Pilot boarded, the berthing of the vessel is done as ordered by the Port Authorities according to the possibilities of operation (loading/discharging) and to the availability of berths.

**MEDICAL:** Crew members are offered medical assistance if necessary when the Master requests, and they have to come to the Agency Office between 0800 and 0900 hrs. every day, except Sundays and holidays.

**STEVEDORES:** Working hours: 0700–1500 and 1500–2300 hours.

**CUSTOMS ALLOWANCES:** For releasing cigarettes from Customs seal it is necessary to notify the Agent who, in turn, will arrange with the Customs House. Attention is drawn to the fact that bringing into or taking Romanian currency out of the country is prohibited. According to requirements of crew, the Master gets from Agent any sum of Romanian currency. The respective sum is charged in the disbursements account at official exchange rate +200% premium granted to seamen. Before departure from port the Master is obliged to return to Agent the sums of Romanian currency unspent against receipt. The sums are returned in front of the representative of the Customs during the control for departure.

**HATCHES:** Opening and closing of the hatches is to be performed by crew whenever requested due to weather conditions.

**CARGO GEAR:** Rigging of derricks, the good working condition of the winches and derricks, are permanent obligations of the vessel according to requirements of working gangs, The hatch ways must be opened or closed to their full size. The removable beams or covers shall always be stowed on deck on the side where work is not being carried on, so that they may not hinder working gangs or cause accidents. During operations, the vessel is recommended to close the hatches with rain tents, ship's property, if bad weather. If cargo handling gear gets out of order during operations, the waiting time of workers is charged against vessel and such time lost for breakdown of winches not to count as laytime.

**SHORE LEAVE:** On completion of border inspection crew can go ashore taking their Seaman's Books (or Passports) and the permits they receive from the soldier at the gangway. The permits must be returned to the soldier upon coming back on board. In the event that crew members desire to visit another place out of Galatz they shall inform the Agent.

**GENERAL:** From the time a vessel enters the territorial waters of Romania until she leaves the respective zone, i.e. 12 miles, it is compulsory to fly the Romanian flag. Ships that call at Galatz for the first time and have not got the Romanian flag on board must have it ordered through the Agent immediately upon berthing at Sulina Harbour. Throwing garbage overboard or pumping out dirty ballast or bilge water is allowed only beyond the territorial waters of Romania. Non-observance of these rules may result in fines varying between 3,000 and 10,000 lei imposed by the Harbour Master.

**AGENT:** Navlomar Shipping Agency.
Galatz: 20, 13 Junie. Telex 225. Cables "Navlomar Galatz".
Braila: 2 Imparatul Traian. Telex 10. Cables "Navlomar Braila".

## St. Lawrence Seaway:

### ST. LAWRENCE SEAWAY (See Plan)

**DOCUMENTS:** For Agent in Montreal, three unfreighted copies of Complete Manifest for Seaway Toll purposes covering all cargo to be discharged in the Great Lakes.

The St. Lawrence Seaway Authority requires one unfreighted copy of the Complete Manifest, plus one Transit Declaration Form.

In first U.S. port, a "Traveller" is made up by the Customs Inspector with the following documents:
2 complete sets of U.S. Cargo Manifests, plus 6 copies for Agents.
1 set Manifest of Cargo for first U.S. port.
4 Stores Lists.
4 Personal Effects Lists.
4 Firearms and Ammunition Lists.
4 Crew Lists, Form I–418.
4 Narcotics Lists.
4 Vessel's Itinerary Lists.
Vessel's Registry and copies of Paid Tonnage Tax Certificates.
Health Pratique.
Clearance from previous port.
2 sets Bills of Lading.
3 copies Stowage Plan.

In subsequent U.S. ports the following are required:
5 sets Manifest of Cargo for that port.
The Traveller and Permit to Proceed issued in previous port.
2 Stores Lists.
2 Personal Effects Lists.
2 Firearms and Ammunition Lists.
2 Crew Lists.
2 Narcotics Lists.
2 sets Bills of Lading.
3 copies Stowage Plan.

Vessels navigating St. Lawrence Seaway are required to complete applications for:
(1) Certificate of financial responsibility,
(2) Certificate of Insurance, form FMC 225,
(3) Oil discharge assurity Bond, form FMC 226,
(4) Guarantee in respect of liability for discharging oil, form FMC 227.

These applications have to be filed with the Secretary of the Federal Maritime Commission before a certificate is issued. The oil pollution liability certificate should be retained aboard the vessel.

**ICE ADVISORY SERVICE:** Ships inbound from seaward between December 15th and April 15th should advise the Ice Information Officer, Sydney, 36 hours prior to entering Cabot Straight, stating their position, destination, whether loaded or in bulk. This procedure will facilitate the passing of ice information to the ship as necessary. Ice information is also available from radio stations at Halifax, Seven Islands, Wirringate and Grindstone. The Canadian Broadcasting Corporation Maritime Network also broadcasts ice information daily during the winter navigation season. Supplementary ice information may also be obtained from the Canadian Marine Service Icebreakers.

During the ice season, radio broadcasts of ice information are made twice daily from Marine radio stations as follows: Cape Race, Newfoundland; Fox River, Quebec; Mont-Joli, Quebec; Halifax, Nova Scotia.

**PILOTAGE:** The first pilot station when entering the St. Lawrence River is at Les Escoumins, 80 miles West of Father Point. This Pilot will take the ship to the Quebec pilot station 121 miles to the West. Off Quebec a new Pilot boards to take the ship to Trois Rivières, where there is another change of Pilot for the remaining trip to Montreal.

*Pre-clearance:* Vessels intending to transit the St. Lawrence Seaway must be pre-cleared by a representative who shall assume responsibility to the authority for payment of all tolls and charges to be incurred.

Application for pre-clearance Form SLS 429 may be obtained from the St. Lawrence Seaway Authority, Cornwall, Ontario, or from the St. Lawrence Seaway Development Corp., Massena, New York.

**RESTRICTIONS:** The average navigation season in the St. Lawrence River is from April 1st to December 16th.

*Locks Nos. 1 to 7:* length, 860 ft.; width, 80 ft.; depth, 30 ft.; channel depth, 27 ft.

*Welland Canal Locks:* No. 1: length, 865 ft.; width, 80 ft. Nos. 2 to 7: length 859 ft.; width, 80 ft. No. 8: length, 1,380 ft.; width, 80 ft.; channel depth, 27 ft.

*St. Mary's River Locks:* MacArthur: length, 800 ft.; width, 80 ft. Poe: length, 1,200 ft.; width, 110 ft.; depth, 32 ft. Davis: length, 1,350 ft.; width, 80 ft. Sabin: length, 1,350 ft.; width, 80 ft. Canadian: length, 900 ft.; width, 59 ft. The channel depth (lower end) to the Canadian Lock is 20 ft., with a normal depth of 18 ft. 3 in. over the sill. As Easterly gales raise, and Westerly gales lower the water levels below the Loch temporarily, it is recommended that Masters of larger vessel ascertain the available depth from the canal office prior to locking.

*Speed Limits:* 10 m.p.h. upbound, 12 m.p.h. downbound in the Beauharnois Canal; 9 m.p.h. Port Weller Harbour and 7 m.p.h. in all other canals. The speed limits vary from 10 m.p.h. to 18 m.p.h. in most remaining sections of the St. Lawrence River; Lower Detroit River 12 m.p.h.; St. Clare River 9 m.p.h. to 12 m.p.h.; St. Mary's River 10 to 15 m.p.h. Speed limits are detailed in a seaway notice issued early in the year.

**MAX. SIZE:** Length 730 ft., beam 75 ft. 6 in., draft 26 ft. Masts must not exceed 117 ft. above water level.

**HEALTH:** All ocean-going vessels must obtain a free pratique before entering the Seaway. Vessels entering the Seaway direct may receive quarantine inspection and clearance from the Canadian authorities at Montreal while at anchor awaiting entrance to the Seaway.

**RADIO:** *Notice of Arrival.* Master must give at least 24 hours notice to Commander, 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also at least 24 hours notice of ETA at first U.S. discharge port is required.

*Welland Canal:* A vessel arriving at either calling- in point will call the Welland Canal Traffic Control Centre on Channel 16 (156·8 Mc/s) giving (*a*) name of vessel, and (*b*) position. Seaway Welland will acknowledge the call and request the vessel to shift to Channel 14 (156·7 Mc/s). The vessel will then shift to Channel 14 and give: (*c*) destination, (*d*) draft, fore and aft, and (*e*) cargo. If the vessel is called directly into the canal, she will be told to remain on Channel 14. If the vessel is not to come into the canal, she will be ordered to anchor and instructed to guard Channel 16 until called in. Unless instructed otherwise, vessels will guard Channel 14 during their entire transit from calling-in point 15 to calling-in point 16, or vice versa, and all transmissions will take place on Channel 14.

*Great Lakes:* It is recommended that vessels within a radius of 35 miles of a shore station use their FM transmitting and receiving equipment to ensure better connections. This pertains especially to vessels at anchor or in the proximity of a port or berth.

*Radio Stations:* Buffalo, New York, marine operator. Port Burwell, Ontario, marine operator. Geneva, Ohio, marine operator. Loraine, Ohio, marine operator. Rogers City, Michigan, marine operator.

**IDENTIFICATION CARDS:** In the first U.S. port, the immigration officer requires an alphabetical crew list made up on Form I–418 and visaed by the American Consul in the last overseas port. This crew list should contain the name of every crew member on board. Also needed are three copies of this crew list on the same form. The Immigration Officer will require all seamen's books and passports, to issue the completed crew landing permits made out on Form I–95A. The Master will be given a crew list receipt which will indicate the names of crew members detained on board, if any. In case a crew member is detained on board, he cannot go ashore, and at irregular times an officer of the Immigration Service will check if the crew member is on board. A fine of $1,000.00 will be imposed on the vessel for each detained crew member who is not on board.

**TUGS:** Whistle signals differ from those in international usage and are as follows:

1. Ship to Tug: One Long and One Short (— . ) = ship ready to proceed, O.K. or all right. One Long and Two Short (— . . ) = let go the bow tow-line. One Long and Three Short (— . . . ) = let go the stern tow-line.
2. Both Ship to Tug and Tug to Ship: One Short ( . ) = work propeller ahead when stopped, *or*, stop propeller when working, either ahead or astern. Two Short ( . . ) = work propeller astern. Three Short ( . . . ) = slow down or check. Four Short ( . . . . ) = work propeller strong in the same direction it is working at the time the signal is blown. Five or more Short Blasts ( . . . . . ) = the standard danger signal.

**SEAWAY EQUIPMENT:** *Radio-telephone Equipment:* All vessels, other than pleasure craft of less than 65 ft. in overall length, must be equipped with VHF radio-telephone equipment, in addition to the FM equipment otherwise required. The radio transmitters must have sufficient power output to enable the vessels to communicate with Authority Stations from a distance of 30 miles and must be fitted to operate from the wheelhouse and to communicate on 156·6, 156·55, 156·7 and 156·8 Mc/s.

*Stern Anchors:* It is strongly recommended that vessels in excess of 350 ft. in overall length be equipped with a stern anchor rigged and ready for immediate use. All vessels in excess of 350 ft., whose keels are laid after 1st January 1975, shall be equipped with a stern anchor.

*Propeller Direction Alarms:* Vessels in excess of 260 ft. in overall length shall be equipped with propeller direction and shaft r.p.m. indicators or visible and audible wrong-way propeller direction alarms located in the wheelhouse and in the engine-room.

*Sewage and Galley Waste Disposal Systems:* Sewage retention tanks and galley waste grease traps are required for vessels not otherwise equipped with containers for ordures. At Montreal, or at Port Colborne, vessels without retention tanks intending to call at Chicago must put on board portable chemical toilets which are offered for rental by two chemical companies. Two to ten chemical toilets are required for each ship at $30.00 each per week rental charge.

*Oily water separators:* Vessels which cannot contain waste oil products are required to be equipped with oily water separators or other such equipment for the extraction of oil products or waste water discharge.

*Rudder Angle Indicators:* Vessels in excess of 260 ft. in overall length shall be equipped with rudder angle indicators located in the wheelhouse.

*Gyro Compass:* It is recommended that vessels be equipped with a gyro compass.

*Radar Equipment:* It is recommended that vessels be equipped with radar.

Vessels not fitted for the Seaway as prescribed above, will incur expenses for the rental, installation and removal of compulsory fittings.

**REGULATIONS:** For additional information on regulations and procedures, Masters and Owners are urged to refer to the Seaway Handbook and Seaway Notices.

**AUTHORITY:** The St. Lawrence Seaway Authority.

# St. Pierre and Miquelon

**TANKERS:** One berth alongside dolphins in depth of 8·50 me

**MEDICAL:** All facilities available.

**FRESH WATER:** Available at berths. Supplied by hoses,
25 cubic metres per hour.

**FUEL:** Only diesel oil SG 825/840 at 15° C available at all bert

**IDENTIFICATION CARDS:** Each man to carry passpo
seamen's book.

**CONSULS:** Local representatives for Canada, Netherla
Norway, Portugal and Spain.

**REPAIRS:** Small repairs can be effected. Floating dock, cap
750 tons, for vessels up to 13 ft. 6 in. draft.

**REPATRIATION:** Can be arranged.

**TIME:** GMT minus 3 hours all the year round.

**AMBULANCE:** Telephone: 279.

**AIRPORTS:** Connections from St. Pierre to Sydney (Nova Scotia) International Airport.
**TELEPHONES:** Not possible to place telephones on board. It is possible to contact the shore on Channel 16 via Saint Pierre Radio.
**HATCHES:** Opening/closing is normally carried out by crew.
**SERVICES:** Compass adjusting, radar repairs, radio, Decca, Loran and gyro-compass repairs and maintenance possible.
**AUTHORITY:** Officier de Port, POB 24, St. Pierre. Tel. 008.

## Samoa

### APIA, Western Samoa: 13.50 S. 171.45 W.

**DOCUMENTS:**
1 Clearance from previous port of call.
3 Crew Lists.
3 Passenger Lists.
2 Health Documents.
1 Manifest.
Bills of Lading.
Ship's Papers (stores and poisons).

**PILOTAGE:** 24 hours ETA is required. Pilotage is compulsory for merchant vessels. Pilot boards 1½ miles outside harbour on line of leading beacons. Pilot boat painted white with red awning. "Pilot" written on both sides of wheelhouse in brass lettering.

By night, in addition to usual navigation lights, pilot boat carries standard identification, i.e. a red light on foremast with all-round visibility. Exemption from pilotage may be granted to Masters of vessels trading regularly to Apia, but pilotage dues are still payable.

Pilotage District: This is defined as being all navigable waters contained within the segment of a circle of 3·5 nautical miles radius having as its centre Vaea beacon and having as its Western and Eastern limits radii bearing 348° and 030° respectively from its centre.

**ANCHORAGES:** In 20 fathoms outside a line drawn between the two reefs and preferably on line of leading beacons. Bottom is coral.

**RESTRICTIONS:** No night-time or tide restrictions. Turning basin dredged to 36 ft., extending to 1,200 ft. from each end of the wharf. Arrivals preferred during daylight hours.

**MAX. SIZE:** Shore bollards to take stern and bow lines for vessels up to 800 ft. in length. Maximum draft 36 ft. Maximum length 600 ft. if moored to buoy. No limit to beam. Tankers only use the buoy.

Present arrangement for tankers not considered satisfactory now that there is a wharf. Oil companies are considering an alternative arrangement.

**HEALTH:** Doctor boards vessel on arrival.

**RADIO:** Signals to incoming ships by radio or radio-telephone from Apia radio station 5WA. For radio, ships should call on 500 kc/s and operate on 483 kc/s. For radio telephone, ships should call on 2182 and operate on 2162 or other available frequency as may be arranged once contact has been established. Apia maintains continuous service. Call sign "Apia Radio" repeated.

**TUGS:** Two tugs available, *Pualale*, 450 h.p. and *Savaii*, 400 h.p.

**BERTHING:** Small charge made for use of hawsers and moorings. Export Wharf – reinforced concrete wharf 604 ft. in length on the East side of inner harbour. Maximum draft alongside 35 ft. All loading and discharging is carried out with ship's gear. No wharf cranes available. This wharf and all surrounding areas enclosed by fence is Customs area and all vessels trading to or from places outside Western Samoa must depart from or arrive at this wharf.

Buoy – one mooring buoy (red with white top) for use by tankers only. Usual to moor to buoy by the stern, using two wires and two ropes. Length of moorings will be advised by Pilot or Harbour Master having regard to sea conditions and interval between swells.

New wharf 604 ft. long, vessels up to 700 ft. may be berthed.

**STEVEDORES:** Arranged by ship's Agents.

**MEDICAL:** Advance notice to Agents prefereble. No private doctors but good general hospital where seamen may be admitted.

**TANKERS:** Shell, Mobil, and B.P. operating in Samoa, and have own discharging facilities. Tanker terminal situated on West reef. Vessel's stern moored half way between reef and buoy. Discharge line is 6 in. diameter. Launch service may be provided between ship and shore at a small charge.

**TIDES:** Mean high water intervals 6 hrs. 27 mins., spring range 3.2 ft., mean range 2.6 ft. Tidal stern normally slight, but after heavy rain outflow from rivers and streams can cause it to become quite strong.

**FRESH WATER:** Available at wharf from shore installation.
**FUEL:** Only light diesel fuel available.
**FIRE PRECAUTIONS:** Fire services available on wharf, station is half mile distant.
**WATCHMEN:** Recommended and available.
**HATCHES:** Opened and closed by stevedores.
**CUSTOMS ALLOWANCES:** No enforcements.
**IDENTIFICATION CARDS:** Not needed.
**CONSULS:** The New Zealand High Commissioner represents all British subjects; French Consul, tel. 156.
**REPAIRS:** Minor repairs only.
**AIRPORT:** 25 miles from Apia on Western side of Island. Regular and frequent mail and passenger services.
**TIME:** GMT minus 11 hours. No alteration to clocks.
**HOLIDAYS:** No cargo on Sundays between 0300 and 2100. The recognised holidays are Christmas, New Year, Boxing Day, Good Friday, Easter Monday, Whit Monday, Anzac Day and Independence holidays from 1st June to 3rd June.
**TELEPHONES:** Police and public telephones near wharf and provisions are available for telephone connection to tourist vessels berthed at the wharf.
**POLICE/AMBULANCE/FIRE:** Hospital 364; Police 390; Fire 200.
**AUTHORITY:** Port Administrator and Harbour Master, PO Box 474, Apia, Western Samoa.

## Saudi Arabia

**TRAVEL FROM BAHRAIN:** Travel is permitted from Bahrain to Saudi Arabia, *provided* travellers (*a*) hold a valid International Vaccination Certificate showing that the holder was immunised at least five days before travelling to Saudi Arabia, but not more than three months previously; (*b*) that any traveller proceeding to Saudi Arabia from Bahrain should have taken the prescribed doses of Tetracycline over the 48-hour period immediately before travelling. The fact that the passenger has taken the Tetracycline should be certified by the Bahrain Health Department.

### DAMMAM: 26.30 N. 50.12 E.

**LOCATION:** Situated on the East coast of Saudi Arabia, in the Arabian Gulf, is operated by the Saudi Government Railroad.

**FLAG:** In addition to the quarantine signals which are to be shown until pratique is granted, the Saudi Arabian Flag must be flown from vessel's foremast while in port of Dammam.

**DOCUMENTS:** In order to cope with Port, Customs and Agent's requirements, following documents should be airmailed to Agents prior to arrival of vessel at Dammam port:
12 copies of Cargo Manifest for each port of loading, all typed, stamped and signed.
2 copies of Freight Manifest.
3 copies of Hatch List.
3 copies of Stowage Plan.
1 copy of each non-negotiable Bill of Lading.
List of Dangerous Cargo on board, if any.

The particulars of the certificates required by the SOLAS regulations are entered in SGRRO Form No. 805 on the arrival of the vessel at the anchorage and the certificates are sighted after berthing.

**PILOTAGE:** Pilotage at Dammam Port is compulsory. Manoeuvring of vessels in the vicinity of pier or in anchorage will always be performed under supervision of a Dammam port Pilot.

The Dammam port Pilot will board vessels at anchor off approaches to port or when they are abeam of Dammam Beacon No. 2 (approximate position 26° 33′ N., 50° 11′ E.), and will then pilot vessels to anchorage or berth at pier.

**ANCHORAGE:** The approach anchorage area is situated South of parallel 26° 34′ 00″ N., and may be demarcated on the East by the 6 fathoms contour starting in proximity of Beacon No. 1 coming up to light buoy No. 3, and thereafter remaining West of line drawn from light buoy No. 3 to Beacon No. 6. On the West, the approach anchorage area extends within the 6 fathom contour, starting from Beacon No. 2 up to Beacon No. 4 and thence remaining North of line joining Beacon No. 4 and Beacon No. 6.

The vessels anchored in approach anchorage are required to keep fairway clear for access to and from port.

**WEATHER:** The peninsula of Saudi Arabia is almost of an equatorial climate. In winter the temperature is rather low but in summertime it rises over 50 degrees Centigrade. Rain is generally scarce. During major part of year, but especially during summer, the relative humidity is high. From July to September it frequently exceeds 85%.

Winds in this area are not predictable for more than a few hours. They vary in strength and direction, although prevailing winds are from North-west.

Visibility is generally good. There are times, however, when it is reduced to a very short distance due to fog or dust held in suspension in the atmosphere.

**TIDE:** The Diurnal tide rise at port of Damman is approximately 8 ft. at springs, and 5 ft. at neaps. Currents generally drift with tide, and run in or out of the port in counter clockwise rotation. Depending on weather conditions and other contributing factors, these currents are slow moving at all times, speed reaching maximum of three knots.

**MAX. SIZE:** See "Berthing".

**HEALTH:** In accordance with international practice, quarantine signals must be displayed by all vessels approaching Dammam port. These signals shall be displayed continuously until pratique granted. Such signals are the following: Sunrise to sunset – Quarantine Flag; Sunset to sunrise – Signal Lights – red over white.

The Port Doctor or Quarantine Officer will board the vessel either at anchorage or at pier. Documents required for immediate inspection are the following:
Maritime International Health Certificate (from the last port).
Valid Deratisation or Deratisation Exemption Certificate.
Crew List (3 copies).
Passenger List, if any.
Valid Smallpox Vaccination Certificates (of a date not exceeding three years) for all crew members and passengers.
Valid Cholera Certificates (of a date not exceeding three months) for all crew members and passengers.
Valid Yellow Fever Certificates for all crew members and passengers.

Certificates of inoculation against any communicable diseases prevailing at the ports of departure.

Ship's Log Books.

**RADIO:** (Also see "Agents"). Vessels bound to Dammam are required to notify their Agents 72 hours steaming-time prior to arrival, giving ETA in GMT, total weight tons of cargo for discharge at Dammam, number of workable hatches, maximum arrival draft and overall length of the ship. ETA notice should then be confirmed 48 hours and again 24 hours before arrival.

Vessels' messages to Agents can be given by contacting via wireless Aramco Radio Station "HZY" on 500 kc/s, which station provides free of charges service.

**TUGS:** A number of tug-boats is available to assist vessels in mooring or unmooring. Whenever such assistance is provided, Master and crew of tug shall, in the performance of such services as they render to the vessel, become and be deemed to be the Agents and servants of the Owners and/or charterers of the vessel assisted.

**BERTHING:** There are three piers at Dammam commonly referred to as North Pier, Main Pier and Small Craft Pier.

(*a*) *North Pier:* Consists of steel and wood structure connected with mainland by means of 4·86 miles of railroad causeway with 1·8 miles railway track laid on the breakwater to feed the North Pier. The use of the trestle as a means of access to the North Pier has been discontinued since the completion of the breakwater. The main wharf, located at outer end, is 744 ft. long and 86 ft. wide. The heading of main wharf is 346° true. It provides berths for two ocean-going vessels, one on each side, with approx. 33 ft. of water at LW.

(*b*) *Main Pier:* Of the 9 berths at the Main Pier Nos. 3, 4, 5 and 11 have been recently constructed and each berth is 180 metres long. The remaining 6 are old berths, their total length is 2,764 ft. The width of the apron of the Pier is 132 ft. Following are the drafts as indicated against respective berths:

| | |
|---|---|
| 3, 4, and 5 | 12 m. |
| 6 to 9 | 9 m. |
| 10 to 11 | 11 m. |

(*c*) *Small Craft Pier.* It is a steel and cement pier, located 575 ft. from North end of causeway, and protruding 342 ft. into the bay, Eastward. It is mainly designed for accommodating small coasters, barges, dhows, tugs, etc. This pier is 61·6 ft. wide and equipped with cranes for handling cargo to/from barges or crafts. The depth of water is about 11 ft. Two large storehouses are also available.

(*d*) *Other port facilities (tugs – lighters – railway cars).* 4 tug boats, 12 lighters of from 150 to 250 tons capacity each, 10 reefer railroad cars of 1300 cu. ft. capacity, 1 railroad flat car of 80 tons capacity, A large stock of railroad cars of any type of 45 tons capacity each.

No floating cranes, no water or oil barges, no repairs facilities, no transhipment facilities.

(*e*) *Priority:* There is no berthing priority at Dammam Port for any ship or type of cargo carried whatsoever. However, vessels carrying small quantities of cargo, may be berthed, irrespective of turn, at the Main Pier No. 4 berth, immediately on arrival if such a berth is available and provided that there are no other vessels in port within such category.

(*f*) *Registration.* Incoming vessels are assigned berth on a "first come, first served" basis. Every possible effort is made to berth vessels immediately upon arrival. If no berth available, vessels will be listed "in turn" in accordance with time of arrival at prescribed anchorage area (South of Beacon No. 2), pratique granted and presentation of cargo documents to the Port Authorities.

In the event of long delay in berthing due to port congestion or otherwise, vessels once "in turn", may be allowed to take up registration and proceed for any other Gulf port for any intended purpose, and return thereafter to Dammam still keeping their position "in turn". In order, however, that a registered vessel may be still considered in turn, is necessary that she return to Dammam within the time limit intimated to the Master at time the ship was cleared out. Failure to return to Dammam within such time limit, will automatically result in loss of ship's turn and postponement to bottom of waiting list.

**CRANES:** *Main Pier:* Capacity 3–6 tons. *North Pier:* None available.

**DISCHARGE RATE:** General cargo 100/125 tons per hatch per 24 hours. Bagged cargo 150/175 tons. Steel products, 125/150 tons.

**STEVEDORES:** Stevedoring operations at Damman are performed by the Saudi Stevedoring Company. Charges are levied on weight/measurement basis, in accordance with current tariff.

A limited amount of stevedoring gear and equipment can be made available by Saudi Government Railroad on request of Master or Agents. A charge is levied for rental of this equipment.

**MEDICAL:** Masters may obtain medical attention for ship's personnel from port doctor who may in case of serious illness or injury recommend treatment to local hospitals. The port doctor ordinarily will treat minor illness or injuries on board ship.

Masters of vessels at sea may use services of Aramco Radio Station "HZY" without charge to obtain medical advice at any time.

**WATER:** Well water is obtainable at all Dammam piers at the rate of 4/5 tons per hour.

Both well water and distilled water, though in limited quantities, may be also obtainable in Ras Tanura but only in conjunction with and during bunkering operations. The maximum quantity of distilled water obtainable is 15 tons per vessel.

**FUEL:** There are no bunker facilities at Dammam. Vessels requiring bunkers have to call at nearby port of Ras Tanura where bunkers facilities are operated by Aramco. No bunkers supplied however unless a nomination is made available at Ras Tanura through Aramco New York. To obtain such nomination, Owners/Charterers/Operators are required to handle the necessary arrangements in advance of time directly with Aramco New York or one of its offtakers.

**CUSTOMS:** All materials to be either exported from or impo into Saudi Arabia are subject to examination by Customs Auth ties. The importation of certain articles, such as the followin strictly prohibited:

Alcoholic beverages, including beer and wines.
Explosives.
Firearms.
Implements of war of any kind, including antiques.
Religious matter not pertaining to the Moslem faith.
Playing cards and gambling devices.
Narcotics.

Trafficking in these items between ships or between ships and sh is strictly prohibited, regardless of whether they are alongside piers or at anchor.

**CONSULS:** Except for the U.S. Consulate-General residin Dhahran, no other foreign consulates are available.

**DEVELOPMENTS:** Dammam port extension project to prov new berths for five vessels, extending the Main Pier 420 me Northwards to join the breakwater. Depths at the new berths to between 12 and 14 metres. Deepening of approach channel and of the basin to 12 metres in hand. Project scheduled for comple about 1976. The extension project includes provision for increa cargo-handling facilities.

**REPAIRS:** Relatively limited repair service is available from lo business concerns and replacement parts are practically unavailab

Deep-sea divers, operating from modern and well-equipped div boats, are available at Dammam.

A Lloyds representative is available in Dammam.

**AIRPORT:** Very good airline facilities available. Daily departu for any part of the world.

**TIME:** GMT plus 3 hours all year round.

**POLICE/AMBULANCE/FIRE:** Ambulance 3182; SGRR Po 3771; SGRR Fire House 2211.

**SHORE LEAVE:** Ship's personnel and passengers are not perm ted ashore for any purpose whatsoever until pratique has be granted. All shore leave is contingent upon compliance with quar tine regulations and subject to proper permission granted by I migration Authorities. The necessary arrangements can be ma by ship's Agent on Master's request. While in port, the vesse personnel is under jurisdiction of the Law of Saudi Arabia.

**GENERAL:**

(*a*) *General Port Charges.* Vessels arriving at Dammam port required to pay for: Pilotage in and out; Handling of mooring lin Harbour dues; Quarantine fees; Dockage charges; Stevedori Tallying; Car and launch hire; Supplies and services as otherw required; Agency fee and commission.

(*b*) *Port working hours.* Work at Dammam port is performed 6 d a week, from Saturdays to Thursdays, Friday being the regular w holiday. Two shifts are normally worked each day: from 0700 to 1 and from 1500 to 2300. On request, overtime work can be arran from 2300 to 0700 hours.

(*c*) *Dangerous cargo.* Vessels carrying explosives, ammuniti highly inflammable liquids and/or any other cargo of danger natures, will not be berthed alongside piers. All discharging ope tions will have to be performed in anchorage into barges as availa and weather permitting. Only daylight work is permitted.

(*d*) *Lubricating oils.* Lubricating oils are available in limited quantities if ordered in advance by letter or cable through Agen

(*e*) *Provisions.* A large variety of frozen, fresh and canned good available in the local market. Supplies can be arranged throu recommended ship chandlers upon Master's request.

(*f*) *Laundry.* Modern washing and dry cleaning facilities are av able at Dammam and Al-Khobar. Deliveries can be arranged wit 24 hours.

**AUTHORITY:** Director-General, Saudi Government Railr Organisation, Dammam, Saudi Arabia. Airmailing addr S.G.R.R.O. Dhahran, Saudi Arabia. Cable address, "Saudira Dammam. Tel. 3001.

**AGENT:** Gulf Agency Co. (Saudi Arabia) Ltd., POB Airport P Office, Dhahran, Saudi Arabia, Cables "Confidence Dammam" Vessels equipped with VHF, can communicate, when within ran with Agent on stand-by Channel 16 by calling "Confide Dammam". Voice contacts may be also established via VHF, on t same channel as above, with Ras Tanura office, by calling "C fidence Ras Tanura". Once contact is established on Channel communication will continue by switching on available work channels as directed.

Telephone: Normal working hours 2441, 23425, 23426 and 234 After office hours 22861 and 41742.

## JEDDAH: 21.28 N. 39.11 E.

**DESCRIPTION:** The port stands to South-west of the city, island called Jazirat al Mafsaka approximately 600 acres in a The island is connected with mainland by a causeway.

The harbour is sheltered by several long lines of coral reefs islands. The access is through two narrow channels.

**PORT LIMITS:** The limits encompass all waters, islands, chann passages, piers, wharves, jetties, landing-places, sheds, wareho workshops, basins, slipways and bridges, etc., contained within paralles extending from shore seaward to 39° 06′ East longi and between 21° 27′ and 21° 31′ North latitude including Qaham the approach beacons, Mismari and Shib el Kabir.

**CLIMATE:** Tropical desert, hot climate. Humidity very high du summer months, but winer is mild and pleasant. Rainfall is negligible and does not exceed more than 3 to 4 inches per annum.

General direction of wind is mostly North-westerly, mild in intensity. Winds of gale force occur very rarely. The effect of high winds when they do occur in the harbour is not felt due to barrier reefs breaking force of waves. Waves inside harbour not generally above 1 to 2 metres, although waves up to 6 metres may sometimes occur beyond outer reef.

Tides of Indian Ocean do not affect Red Sea due to construction of the Bab-el-Mandab. There is, however, a local semi-diurnal tidal oscillatory motion of the sea along its length, giving a high tide at one end and at the same time a low tide at the other. Jeddah Port is hardly affected by these tides and there are almost no currents produced by these movements.

The variation between the summer and winter water levels is approximately 50/60 cm. only.

Visibility in the port area is generally good, occasionally obstruction to vision occurs due to dust, but such occurrences are seldom of long duration.

**DOCUMENTS:**

2 Crew Lists.
2 Passenger Lists.
Last Port Clearance.
Vaccination Certificates.
Stores List.

Prior to the vessels arrival the following documents are required for translation and submission to the various authorities:

7 copies Cargo Manifest.
1 copy Freight Manifest.
2 copies Stowage Plan.
2 copies Hatch List.
1 copy each non-negotiable Bill of Lading.
1 List of Dangerous Cargo, whether for discharge or in transit.

**PILOTAGE:** The pilot station is off Kaham beacon (lat. 21° 27′ 02″ N., long. 39° 06′ 32″ F.). Pilotage is compulsory and available during daylight hours only. Pilots do not usually keep station unless expecting a vessel.

**ANCHORAGE:** If vessel arrives pilot station too late for entry, anchorage may be made ½ mile North or South of the Kaham Beacon.

Arriving vessels will remain at Outer anchorage until turn for berthing, or proceeding into Inner Anchorage for discharge into lighters.

**RESTRICTIONS:** No navigational aids marking approaches to port, and therefore there is no night navigation. A lighthouse and lighted marker buoys are scheduled for positioning in the development of the new port.

Only Saudi nationals are allowed to board vessel.

**HEALTH:** Doctor boards vessel before arrival at berth and grants free pratique.

(a) *Cholera:* All arrivals from infected or endemic areas are required to possess a certificate showing two injections made not less than 7 days and not more than 30 days before arrival. For re-vaccination carried out within six months of a recorded vaccination or re-vaccination, a single injection renders the certificate valid for a further six months.

In addition, arrivals must submit a certificate dated not more than 7 days before their departure recording the negative results of stool culture. This certificate must be delivered by a licensed laboratory and attested by the Health Authority.

(b) *Smallpox:* All arrivals are required to submit a valid vaccination certificate in accordance with International Sanitary Regulations.

(c) *Yellow Fever:* All arrivals from infected or endemic areas are required to submit a valid vaccination certificate in accordance with International Sanitary Regulations.

(d) *Mecca:* All Muslim crew members who wish to visit Mecca and Medina should have in their possession two recent passport-size photos. These should bear the crew member's name and C.D.C. number to enable Agent to obtain permission for the pilgrimage. Crew members must also have in their possession the above-mentioned medical certificates, otherwise permission may not be granted to them to visit Mecca and Medina.

**RADIO:** Masters should give their agents an ETA not later than 48 hours before arrival. Jeddah Radio "HZH" operates on 500 k/cs with limited working hours.

**TUGS:** There are two port department tugs one of 1,000 and one of 700 h.p. These tugs are supplied free for assisting berthing/unberthing of vessels.

**BERTHING:** 1. Berthing Priority. Generally priority in order of arrival, but also following priorities:

(a) Vessels in distress.
(b) Vessels carrying pilgrims and passengers.
(c) Vessels carrying army stores and equipment.
(d) Vessels instructed to have a special priority by the Ministry of Communications.
(e) Vessels carrying livestock.
(f) Vessels carrying explosives and other dangerous goods.
(g) Vessels carrying freezer cargo, fruit, vegetables and perishable goods, foodgrains and flour.
(h) Vessels carrying less than 100 tons of cargo.
(i) Regular mail vessels.

In the inner harbour there is a finger pier connected to the main quay by a Trestle Bridge. The pier accommodates large vessels with a draft of 29 ft. on the southern side and 32 ft. northern side.

The main quay consists of eight berths for large vessels with a depth of 30 to 34 ft. alongside. These berths have large warehouses adjacent to each berth. There are three more berths which are used by coasting vessels.

The Petromin Jetty can take two vessels at its floating pipe-lines. Vessels moor to two anchors with stern moorings to buoys. This is solely an oil berth used for discharging/loading tankers and bunkering other vessels.

**STEVEDORES:** *Working Hours:* Normally every day except Friday, 0600–1200, 1300–1500. Arrangements can be made to work overtime outside these periods. Discharging on barges can be continuous.

**BARGES:** The Port Department operates about 16 barges of capacities 200 to 400 tons. These are supplied free to the vessels and are used for off-loading steel, drums, heavy lifts and marble.

Sambouks are used for discharging timber and are supplied free but private barges may be used to expedite for which a charge will be made.

**CRANES:** There are sheerlegs situated on the tip of the finger pier with a lifting capacity of 40 short tons. Vessels can use this appliance for the discharge of heavy lifts.

In addition there are several port department mobile cranes with capacities from 2 to 30 tons used for rehoisting cargoes discharged on barges and handling cargo in the storage areas. These are not normally available to ships. With the exception of heavy lifts discharged by sheerlegs all cargo is handled by ship's gear.

**MEDICAL:** Doctors, dentists, eye specialists and hospitals are available.

**FRESH WATER:** Only available at alongside berths as no water barges are available. Rate about 25 tons per hour.

**FUEL:** Owners requiring bunkers should ask their normal suppliers to arrange the stem through Arabian–American Oil Company, New York. The latter will advise their Jeddah office who will in turn confirm the stem with Petromin. Spot bunkers are usually available on cash payment. If the Petromin Jetty is occupied by tankers, vessels requiring bunkers will have to wait until the berth is vacant. Private barges can also supply bunkers and prices are reasonable with no shifting expenses incurred.

**FIRE PRECAUTIONS:** A fire-float is available.

**REPAIRS:** Very limited, due to the difficulty of enabling non-port workers to enter the port area. Facilities exist for repairs to Decca radar.

**WATCHMEN:** Two coastguards are stationed permanently on board and require accommodation and food. Coastguards keep constant check on liquor seals and may search personnel going ashore.

**CUSTOMS ALLOWANCES:** The consumption of alcohol including beer is prohibited. Ship's bonded stores are sealed by the Coastguard after the vessel has been granted free pratique. Any alcohol found after this will be confiscated and a fine imposed of Riyals 1,000.00 per bottle and possible imprisonment for the offender(s).

**REPATRIATION:** Several flights daily from Jeddah. A visa is required for entering or leaving the country.

**AIRPORT:** Situated close to the city. A new airport is under construction about 40 km. to the North.

**TIME:** GMT plus 3 hours.

**HOLIDAYS:** Every Friday is a holiday, although vessels can be worked from 0700 to 1000 to finish, at overtime rates.

**SERVICES:** Good laundry and ship-chandlering facilities.

**SHORE LEAVE:** Permitted.

**IDENTIFICATION CARDS:** Discharge books or passports must be left at the gate, and collected when re-entering the port area.

**GENERAL:** The Saudi Arabian flag (in good condition) must be flown from 0600 hours to sunset.

Communications by cable are lengthy, and about three days should be allowed to receive a reply to a cable. Exterior telephone calls require one day's notice.

Vessels carrying explosives for discharge Jeddah or any other port are not permitted to berth inside harbour. Such vessels will be discharged at the Outer Anchorage and must be capable of discharging all cargo with ship's gear.

**DEVELOPMENTS:** The entire harbour has been dredged to 11·0 metres. The entrance to the harbour has been widened and made easier for vessels to enter and leave at any time of day and night. Night navigation has not, however, been introduced so far, but it is under active consideration and it is hoped that in the very near future it will be introduced.

**AUTHORITY:** Saudi Government Railroad Organisation.

**AGENT:** Gulf Agency Company (Saudi Arabia) Limited, King Abdul Aziz Street, POB 2038, Jeddah, Saudi Arabia. Tel. 2493. Telex: 40138 (AB "Meyaser SJ"). Cables: "Gulf Agency Jeddah".

Copies of correspondence to the Jeddah Office should be sent to Ras Tanura Office.

## JU'AYMAH: 25.56 N. 50.04 W.

*Third Marine Terminal of Ras Tanura*

**OPERATORS:** Arabian American Oil Co.

**FLAG:** In addition to the quarantine signals which are to be shown until pratique is granted, the Saudi Arabian flag must be flown from the vessel's foremast while at Ju'aymah. Vessels should provide themselves with this flag before arrival but, if circumstances render this impossible, such flag may be purchased from the vessel's Agent.

The Saudi Arabian flag is properly displayed when the writing appears on top and the sword on the bottom.

**CHARTS AND PUBLICATIONS:** It is recommended that vessels scheduled to call at Ju'aymah should have on board suitable navigation charts such as the following: British Admiralty Charts 2847, 2858, 2882, 2883, 2886, 3776, 3777 and 3788; U.S. H.O. Charts

62032, 62410, 62414 and 62415. Up-to-date "Sailing Directions", "Pilot Book" and "Light Lists" should also be consulted.

**IMPORTANT FEATURES:** 1. The Ju'aymah loading facilities are located approximately 20 miles North-northwest of the Port of Ras Tanura and 7 miles offshore in Saudi Arabian waters. The loading facilities consist of an oil platform, a control platform and three single point mooring berths.

2. Pilots/Mooring Masters advise on the mooring and unmooring at the buoy moorings and supervise the movements of all vessels in the vicinity of the loading facilities. Presently no charge is made for this service.

3. Mooring and unmooring, connecting and disconnecting of the cargo and bunker hoses are to be performed by the crew of the loading tanker under instructions from the Pilot/Mooring Master.

4. Safety rules are strictly enforced. The Mooring Master will make a thorough inspection of the tanker prior to and during loading operations.

5. When vessels are scheduled to load cargo at both Ras Tanura and Ju'aymah, Aramco reserves the right to advise the vessel at which berth the loading shall start and finish.

6. Aramco maintains a radio station (call letters HZY) for the exchange of messages with ships. For frequencies and transmission times, see "Radio". All incoming tankers should establish early contact with this station at least 72 hours before arrival in order to transmit ETA data and other information as requested in "Radio".

7. Unless instructed otherwise, vessels must arrive at Ju'aymah with propellers almost covered and trimmed not more than 8 ft. by the stern. Masters are urged to maintain radio contact with HZY or ship-to-shore communication by VHF voice radio in order to obtain the latest weather information.

8. The consumption of alcoholic beverages is prohibited within the Kingdom of Saudi Arabia. All alcoholic beverages are to be under lock and key during the vessel's stay. Vessels moored at a Ju'aymah berth or anchored at the anchorage are considered to be in the kingdom of Saudi Arabia.

9. Displays of quarantine signals on approach to Ju'aymah must be maintained until pratique is granted. Ships will not be berthed until the information requested in the quarantine message has been received. The flag of Saudi Arabia must be flown throughout the vessel's stay in port.

10. To permit more rapid ship turnaround, an Early Departure Procedure is available. This procedure permits a quick departure of the vessel after loading, with no delay to await delivery of documents at anchorage.

11. No medical facilities are available at the Ju'aymah Terminal. Requirements for medical assistance or hospital service should be addressed to the ship's Agent. The Aramco radio station HZY, may be used at any time, without charge by vessels at sea to obtain medical advice.

12. Small craft are not allowed in the vicinity of a tanker and no one is permitted to board or leave a tanker while cargo loading operations are in progress.

13. Water, galley fuel and diesel fuels are not available at the Ju'aymah Terminal loading buoys.

**DOCUMENTS:** Some of the tankers which will load at Ju'aymah will have called at Ras Tanura first and will have been cleared by Saudi Arabian Government authorities there. The Ras Tanura Quarantine Customs and Coast Guard clearances will continue in effect at Ju'aymah and no further Government formalities will be required. Seals placed on ships stores at Ras Tanura must remain intact until the tanker has completed loading at Ju'aymah and been completely cleared for departure.

Those tankers which call only at Ju'aymah will require appropriate arrival clearances. After loading operations are complete at the time of unmooring the tanker must have on board port clearance documents, bill of lading and export manifest.

To permit more rapid ship turnaround, an Early Departure Procedure is available by which a ship may clear the port and depart without the necessity of waiting for the delivery of documents at anchorage. Use of this special service is encouraged and it should be requested and arrangements with the Agent should be made at the earliest opportunity. When operating under Early Departure Procedure, it is imperative that, after departure, HZY Traffic Lists be copied until cargo quantities are resolved and the ship's Agent is authorised to approve documents.

*Port Clearance and Cargo Documents:* The port clearance documents consist of the following:

(*a*) Permit of Departure: This form (in English) is filled out with information supplied by tankers in their quarantine radio message.

(*b*) Port Clearance Application. This form (in Arabic) is filled out with information from the Permit of Departure form.

(c) Saudi Arabian Government Port Clearance. This official port clearance form (in Arabic) must be filled out with information provided by the Port Clearance Application.

Both the Permit of Departure and Port Clearance forms are to be aboard the tanker at the time of unmooring.

The cargo documents consist of the following:

(*a*) Bill of Lading. This is an Aramco prepared document. The required information, except for the cargo quantity, will be filled prior to the arrival of the tanker and a copy will be given to the Master by the ship's Agent upon arrival of the ship. After the ship finishes loading, Shipping and Documentation Unit will radio the cargo quantities to the Master who will fill in these quantities on his copy of the Bill of Lading and will instruct his Agent to sign, on the Master's behalf, the original Bill of Lading.

(*b*) Export Goods Manifest. This is a Saudi Arabian Government document required for every ship which has loaded cargo in Saudi Arabia. The Master will receive from the ship's Agent the ori export goods manifest forms covering each consignment of ca loaded. It is imperative that the Master deliver these papers to consignee upon arrival at the discharge port(s).

**PILOTAGE/ANCHORAGE:** The Northern Holding Ancho and Ju'aymah Pilot Boarding Area have been laid out to expe shipping and provide ready access to the Ju'aymah berths. T anchorage area varies in depth from 12 to 28 fathoms (72 to 16 and holding ground is only fair.

Vessels which have anchored at the Northern Holding Ancho should immediately advise Aramco, via radio HZY, of the follo information:

(*a*) Time of arrival at the anchorage area (in GMT).

(*b*) Approximate position in the anchorage area in relatio Ju'aymah light beacon J1 and Ras Tanura light beacon No. 3.

They should then contact Aramco Terminal Planning office Ras Tanura Pilot Office by VHF radio Channel 16 if vessel is equip with VHF.

**NAVIGATION AIDS:**

*Light Beacon:* "J1" – black and white gp. fl. (3) every 8 secs. Ra reflector position: 27° 02.0′ N. 50° 07.8′ E.

*Light buoys:* (all fitted with radar reflectors):

"J2" – Can red – flash red every 6 sec. Position 27° 01.9′ N. 50° 10.

"J3" – Conical black – flash white every 10 sec. Position: 27° 0 N. 50° 07.3′ E.

"J4" – Can red – group flash (3) red every 12 sec. Positi 26° 57.1′ N. 50° 09.8′ E.

"J5" – Conical black – group flash (3) white every 12 sec. Positi 26° 58.7′ N. 50° 04.6′ E.

"J6" – Can red – flash red every 5 sec. Position: 26° 54.6 50° 07.8′ E.

"J7" – Conical black – flash white every 6 sec. Position: 26° 58.7 50° 02.7′ E.

"J8" – Pillar red – flash white every 3 sec. Position: 26° 54.0 50° 03.3′ E.

"JE" (Exit buoy) – Can red – flash white every 2 sec. Positi 27° 10.5′ N. 50° 12.6′ E.

"JD" (Departure buoy) – Can red – flash white every 4 sec. Po tion: 27° 10.5′ N. 50° 24.2′ E.

*Red light float:* marked "Ju'aymah"

Red – flash white every 10 sec. Racon x-bands (3 cm.) - co response Morse letter Zulu – Response pulse length is 22 sweep time is 48 sec. Position: 27° 10.5′ N. 50° 36.0′ E.

*Ras Tanura Channel*

*Light buoy:* (Mid-Channel Marker at Caution Area):

"RT 1" – Spherical black – intermittent quick flash white. Positi 26° 56.2′ N. 50° 12.6′ E.

*A Northern holding anchorage:* area bounded by

| | *North* | *East* |
|---|---|---|
| (*a*) | 27° 08.5′ | 50° 13.5′ |

| (*y*) | 27° 02.5′ | 50° 13.9′ |
| (*z*) | 27° 02.5′ | 50° 17.0′ |

**INBOUND TRAFFIC PROCEDURES:** Arriving tankers wh will be loading at Ju'aymah, should proceed as follows:

(*a*) *Vessels with no Special Instructions:* The vessel should m for a position approximately 2 miles North of Ras Tanura Li Float position 27° 05.6′ N. 50° 57.5′ E. and then enter the inw channel. This will take the vessel past the Approach Buoy to t Entry Buoy. The vessel should then proceed to the Northern Hold Anchorage. The anchor time and position should be passed to t Aramco Terminal Planning Office and Ras Tanura Pilot Office.

(*b*) *Vessel Proceeding to Ju'aymah:* The vessel should make fo position approximately 2 miles North of the Ras Tanura Light F position 27° 05.6′ N. 50° 57.5′ E. and enter the inbound cha Proceed past the Approach Buoy and Entry Buoy and make fo point approximately 2½ miles North-east of Buoy 3A posi 26° 56.3′ N. 50° 11.5′ E., and proceed into the Ju'aymah Pilot Boar Area. The vessel should notify Ras Tanura Pilot Office on pass the Ras Tanura Light Float and will in turn be advised of berth prospects. Should the Pilot not be boarding immediately on t vessel's arrival, the vessel may be instructed to anchor in the P Boarding Area, and to pass the anchoring time and position to t Ras Tanura Pilot Office.

(*c*) *Vessel Proceeding from Northern Holding Anchorage to Ju'aym* On receiving instruction to proceed to Ju'aymah, the vessel sh heave up anchor and re-enter the inbound channel making fo point approximately 2½ miles North-east of Buoy 3A pos

26° 56.3′ N. 50° 11.5′ E. and proceed to the designated Ju'aymah Pilot Boarding Area. If the vessel has been advised that the Pilot will not board immediately on arrival, it may be instructed to anchor in the Pilot Boarding Area and await further instructions. The anchoring time and position should be passed to the Ras Tanura Pilot Office.

(*d*) *Vessel Proceeding from Ras Tanura to Ju'aymah:* The vessel should depart Ras Tanura and follow the departure channel towards the mid-channel marker buoy, R.T.1, position 26° 56.2′ N. 50° 12.6′ E. The vessel should proceed into the Ju'aymah Pilot Boarding Area, exercising due diligence in this area. If the vessel has been advised that the Pilot will not board immediately on arrival, it may be instructed to anchor in the Pilot Boarding Area and await further instructions. The vessel should inform Ras Tanura Pilot Office of its anchor time and position.

(*e*) *Vessel Proceeding from Ras Tanura to Northern Holding Anchorage:* The vessel should leave Ras Tanura and follow the departure channel observing the separation scheme to the Approach Buoy, 27° 06.5′ N. 50° 42.0′ E. and then proceed to the Northern Holding Anchorage. The vessel should inform Ras Tanura Pilot Office of its anchor time and position and await further instructions.

**DEPARTURE FROM JU'AYMAH:** A separate departure channel has been provided for all vessels using the Ju'aymah facilities. The Pilot will disembark and the vessel will proceed via the departure channel between Light Beacon J 1, 27° 02.0′ N. 50° 07.8′ E. and J 2 buoy 27° 01.9′ N. 50° 10.8′ E. The vessel should then proceed towards the exit buoy JE 27° 10.5′ N. 50° 12.6′ E. and from there set an Easterly course North of JD buoy 27° 10.5′ N. 50° 24.2′ E. to the Ju'aymah Light Float, 27° 10.5′ N. 50° 36.0′ E.

**HEALTH:** Quarantine information request (see "Radio") must be received prior to berthing. Vessels failing to supply necessary information may incur extensive delays.

In accordance with international practice, quarantine signals must be displayed by all vessels approaching Ju'aymah. The following signals must be displayed continuously until pratique is granted:

Sunrise to sunet – Quarantine flag
Sunset to sunrise – Signal lights, red over white

*Radio Pratique:* A modified radio pratique procedure is in use at Ju'aymah. Port conditions permitting, vessels supplying requested quarantine information (see "Radio") may be moored on arrival and proceed with hose connecting operations prior to arrival on board of a Quarantine Officer. Vessels failing to supply information may be delayed at anchorage until cleared by the Quarantine Officer. Extensive delay can be incurred by vessels failing to supply requested information promptly.

**RADIO:** Vessels must keep Aramco Ras Tanura fully advised via HZY regarding estimated time of arrival (ETA) at the Northern Holding Anchorage, as well as actual arrival time and position in the anchorage. All messages, of any nature whatsoever, to radio station HZY must be addressed to "Aramco Ras Tanura". It is required that vessels provide a minimum of three notices of ETA information at about 72, 48 and 24 hours "steaming time" from the Northern Holding Anchorage. Shorter notices may result in delays. If loading part cargoes at other Arabian Gulf ports prevents a vessel from furnishing an accurate ETA, steps should be taken to dispatch a message either directly to HZY or through the ship's Agent giving the best estimate possible at the time. This message should then be followed by an accurate ETA immediately upon departure for Northern Holding Anchorage. Failure to give at least 24 hours notice will result in vessel delays for which Aramco will hold no responsibility.

*Radio Messages:* Upon first contact with an inbound tanker scheduled for Ju'aymah berthing, HZY will transmit the following three standard messages of 237, 50 and 32 words:

237 word message:

Master
Rastanuraradio/HZY

Contact HZY soonest advising one ETA GMT Northern Holding Anchorage two any later ETA changes three Agents name and requirements four arrival departure draft fore and aft five deballasting hours six maximum loading rate fullstop vessel urged to accept highest possible loading rate stop advise if cargo or residue aboard to be commingled with Ju'aymah cargo fullstop if VHF aboard call Aramco Terminal Planning for berthing instructions when 100 miles out on 156·80 Channel 16 stop if no VHF aboard contact HZY 500 kHz and copy traffic lists on odd hours for berthing instructions stop on arrival anchorage advise HZY official arrival readiness time and position relative beacon 3 and beacon J1 stop radio messages without charge stop Pilots require sufficient clean ballast for manoeuvring and will board in pilot boarding area for mooring stop recommend propellers almost covered and trim limited to 8 ft. stop vessel will moor to loading buoy using one headrope forward from buoy terminating in three inch chafing chain stop have one ship 3 inch minimum circumference messenger line or mooring rope forward for passing to launch stop have derrick rigged on port side at cargo manifold for lifting mooring gear cargo and bunker hoses stop ships two cargo manifolds to be 16 inch ANSI 150 and after bunker connection on midship manifold to be 12 inch ANSI 150 stop advise if reducers required and derrick lifting capacity.
Aramco

50 word message:

Master
Rastanuraradio/HZY

Please advise any epidemic diseases or illness on board and status of crew's International Certificates of Immunization and all ports called past thirty days also destination stop Agent stop flag stop net registered tonnage stop vessel will not be allowed to berth until this information is received.
Aramco

It is important that you send a reply to the above two messages as soon as possible after receipt.

32 word message

Master
Rastanuraradio/HZY

Imperative that any ship operating under early departure procedure copy Aramco HZY traffic list after departure until cargo quantities are resolved and Agent is authorised to approve documents.
Aramco

Traffic list transmitting and receiving times and frequencies of HZY are as follows:

Transmits on 12811·3 kHz on even hours GMT from 0600 to 1600 GMT, and on 8480 kHz on even hours GMT from 1600 to 0600 GMT.

Listens on 12 mHz and 8 mHz bands after traffic list transmissions until all calls have been cleared.

Also transmits on 16960 kHz at 1000 GMT and receives calls in the 16 mHz band.

Transmits on 430 kHz on all odd hours GMT after callup is made on 500 kHz.

Weather advice, hydrographic notices and traffic lists are transmitted on 430 kHz and 8480 kHz at 0430 GMT and again on 430 kHz and 12811·3 kHz at 1630 GMT. It is requested that all vessels forward their local weather observations to this station, either in code or plain language, to assist in preparation of the Arabian Gulf forecasts.

VHF radio working Channels 11, 12 and 14, and calling Channel 16 are available for ship-to-shore communications at Ju'aymah. Channels 12, 13, 14 and 16 are monitored 24 hours a day at the Aramco Terminal Planning Office, which is located in Dhahran. Ras Tanura Pilot Office can be contacted on Channel 16. VHF equipped vessels should try to contact the Aramco Terminal Planning office on Channel 16 when they are within 100 miles range of Ju'aymah and while at anchor. Use of the high frequency radio transmitter or radar equipment is not permitted while vessels are moored at an oil loading berth. Use of the VHF is permitted to contact Pilots, Agents or the Aramco Terminal Planning Office.

**TUGS:** There are two mooring launches available.

**BERTH DESCRIPTION AND FACILITIES:** Ju'aymah is an Aramco crude oil and fuel bunker loading facility designed for loading and topping-off deep-draft tankers. The port area is located approximately 20 miles North-northwest of Ras Tanura and 7 miles offshore in Saudi Arabian waters.

The offshore platforms consist of the following:

(*a*) An Oil Platform (130 ft. by 190 ft.) located in 50 ft. of water at latitude 26° 54.8′ N. and longitude 50° 01.2′ E. This platform receives crude oil and fuel bunkers from the onshore storage tanks through two 56 in. submarine crude pipelines and one 24 in. submarine bunker pipeline, each being about 35,770 ft. long. The crude oil and bunkers are metered on this platform. The platform is well lighted with general purpose lighting. In addition, one fixed white light has been established on each corner of the platform, with a range of visibility of approximately 5 miles.

(*b*) A control platform (70 ft. by 70 ft.), located 150 ft. North of the Oil Platform and connected to it by a walkway bridge, houses the communications and radar equipment, testing laboratory, offices, control system and meteorological equipment. This platform is marked by a fixed red aircraft warning light.

Three single point mooring buoys have been established. Crude oil and bunkers are received at each buoy from the oil platform through one bunker and two crude oil submarine lines which are connected to the buoy by flexible submarine hoses. The floating hoses, which extend approximately 1,100 ft. from each buoy, consist of two 24-in. crude loading hoses with 16-in. tails and one 12-in. bunker loading hose, each with ANSI flanges for connection to the ship's manifold. The maximum loading rates through each buoy are 130,000 barrels per hour for crude oil and 5,000 barrels per hour for bunkers. Each buoy is marked by a white flashing light with a range of visibility of approximately 5 miles.

The three mooring berths at Ju'aymah are as follows:

(*a*) Ju'aymah Berth No. 31 located at latitude 26° 55.6′ N. and longitude 50° 02.4′ E. Minimum water depth in the berth is 93 ft.

(*b*) Ju'aymah Berth No. 32 located at latitude 26° 56.4′ N. and longitude 50° 02.1′ E. Minimum water depth in the berth is 102 ft.

(*c*) Ju'aymah Berth No. 33 located at latitude 26° 57.0′ N. and longitude 50° 02.7′ E. Minimum water depth in the berth is 103 ft.

**BERTHING PROCEDURE:** A Pilot and a Mooring Master will board the arriving tanker assigned a berth at Ju'aymah at the Pilot Boarding Area located approximately eight miles East of the Ju'aymah berths. They will carry portable VHF radio sets to be used while on board the tanker for communications with the Ju'aymah Control Platform and the mooring boats. They will advise the Master on all manoeuvres and operations relative to berthing, connecting and disconnecting the hoses and unberthing. The services of the Pilot and Mooring Master and of the mooring launches and their crews are provided without charge and upon the express understanding that they become the agents and servants of the owners and/or charterers of the vessel in every respect. Aramco shall not be responsible and shall be held harmless from all liability for any damage resulting from or caused by any action taken, order given or decision made (or any omission thereof) by the Pilot, Mooring Master or launch crew, or in any respect to the handling of such vessel. Damage or injury to any Aramco facility, equipment or personnel by any vessel calling at any loading terminal of the Port of Ras Tanura shall be the responsibility and liability of the owners and/or charterers of the vessel.

Mooring equipment and other equipment supplied at Ju'aymah will be lifted aboard the tanker from the mooring launch which transports the Pilot and Mooring Master to the Pilot Boarding Area. This equipment will include such things as special mooring gear to be used at the bow, various gaskets, bolts, tools, adapter spool pieces (when required), and portable radios to be used for communications with the Ju'aymah Control Platform during loading operations.

A number of forms related to the oil loading operation will be carried aboard the tanker by the Pilot and Mooring Master. These include a form for description of pertinent parts of the tanker's loading manifold, an ullage calculation sheet for use by the First Officer of the loading tanker and forms for maintaining a log of the berthing, loading and unberthing operations. One form entitled "Instructions to Vessels and Conditions of Use of Loading Facilities" outlines the conditions of the use of the loading facilities and must be signed by the Master of the tanker prior to the start of the berthing operation.

During the approach and while mooring, the tanker's anchors must be secured by stoppers to prevent accidental dropping with subsequent damage to the loading buoy mooring chains or the undersea pipelines. Mooring boats will normally assist in the berthing, mooring and hose handling operations. A boat will approach the tanker's bow, take the messenger line and secure it to the end of a 10-in. polypropylene "pickup" line from the mooring arrangement. The "pickup" line will be hove through the centre or port mooring chock until the chafing chain is in the chock. A 15-in. nylon strop which previously will have been secured to the tanker's bollards will then be secured to the chafing chain using a 3-in. bow shackle between the strop and the chafing chain. On tankers equipped with a Smit's towing bracket or brackets, the chafing chain will be secured to an open link in the bracket using a bow shackle. *Mooring and unmooring, connecting and disconnecting of the cargo and bunker hoses is to be performed by the crew of the loading tanker under the direction of the Pilot and Mooring Master.* Communications between the Pilot and the Mooring Master or the bridge and forecastle will be by means of portable VHF radio.

**PRELOADING PROCEDURE:** Upon completion of berthing, a Pilot/Mooring Master, who will remain on board throughout the loading and unberthing of the tanker, will carry out activities related to Aramco safety requirements and planning, and monitoring of the loading operation.

In order to avoid delays in connecting hoses, tankers scheduled to load cargo and bunkers at Ju'aymah should have an adequate number of reducing spools to fit 16-in. and 12-in. standard 150 pound ANSI flanges on the portside manifold.

Aramco is a member of the International Oil Tanker Terminal Safety Group and participates vigorously in a programme developed to ensure adequate safety aboard tankers during the time they are at Aramco piers or berths. A part of this programme involves use of a check list by the Mooring Master to make a thorough inspection of tankers both prior to and during loading operations. This programme is in effect at Ju'aymah, and Mooring Masters who board tankers will be making necessary inspections, posting authorised smoking locations, issuing letters of protest for violations, and shutting down loading or refusing to load a tanker if unsafe conditions are not adequately corrected.

**BALLAST REQUIREMENTS:** Due to the exposed location of the Ju'aymah berths, tankers scheduled to load crude at Ju'aymah should arrive with adequate clean ballast for safe handling having due regard for existing weather and sea conditions. Tankers will be required to arrive with propellers almost covered and sufficient clean ballast tanks available to allow a trim of 8 ft. by the stern. Masters should contact Ras Tanura Pilot Office for weather conditions at the loading facilities.

Aramco is particularly interested in having vessels complete the deballating operation promptly after berthing in order to minimise time at berth. Simultaneous loading and deballasting is encouraged on properly equipped vessels. Owners/operators or charterers of vessels requiring time to deballast in excess of what Aramco considers standard will be so notified by letter with a copy to the Master.

Discharge into the sea of oil or oil base products in combination with ballast water is not allowed. Since the Ju'aymah Terminal does not have facilities to receive any oil residues or oily ballast water, tankers arriving with such materials on abord will be sent to anchorage to await further orders unless the vessel agrees to load on top of such material or unless the ship's Master agrees to segregate such materials in a separate tank. Ships which release oil or oil residues including oily ballast water in either berth or anchorage area will be held responsible for all clean up costs.

**LOADING PROCEDURES:** The oil loading operation will be controlled by VHF radio voice communications between the Mooring Master on the loading tanker and the Ju'aymah control platform. All operations including switching of tanks and topping off must be directly and personally supervised by a ship's officer. The maximum crude loading rate at any of the berths will be 130,000 bph.

Upon being informed by the loading tanker's personnel that the tanker is ready to start loading, the Mooring Master will request the loading operation to proceed according to a previously agreed plan with respect to start-up rates, maximum loading rates and topping off rates. Need for emergency shutdown of loading aboard the tanker must be communicated via VHF from the loading tanker to the Ju'aymah control platform.

In the event of the failure of the VHF communications system, the tanker will sound five long blasts on the ship's whistle followed by one, two or three short blasts for a tanker at berths 31, 32 or 33 respectively. Loading operations will be stopped and will not be resumed until communications have been re-established.

**UNMOORING PROCEDURE AND DEPARTURE:** Upon completion of loading, documentation procedures, disconnection and removal of hoses, the tanker will be unberthed by the Mooring Master. To unmoor from the buoy, the pickup rope is taken to the winch and the weight is taken off the chain. The chain is then unshackled and the rope is slacked as the tanker backs out of
berth. The end of the pickup rope is cast off and floats free.

Upon completion of unmooring, the tanker will make a lee,
mooring and hose connecting equipment will be transferred to
mooring launch and the Pilot/Mooring Master will disembark.

The tanker will then be free to leave the port via the Ju'aym
Departure Channel if the Early Departure Procedure is being follow
and all cargo and port clearance documents are completed and
board. Otherwise, the tanker must proceed to the Northern Hold
Anchorage to await port clearance and document delivery by
ship's Agent.

**FUEL:** Fuel bunkers are available at each Ju'aymah berth. Failur
a vessel to provide adequate advance notice of fuel bunker requi
ments could result in vessel delays.

In addition to fuel bunkering facilities at berth, Aramco opera
a 20 mdwt bunkering vessel *Lina Christensen* stationed in stre
Available products and amounts are:

| | |
|---|---|
| Bunker | 15,000 tons |
| Black diesel | 2,600 tons |
| White diesel | 1,400 tons |

**WATER:** Wash water and potable water are available from
*Lina Christensen* in limited quantities.

**GENERAL:** *Onshore Facilities:* The tank farm with all its associa
facilities is located along the coast of Ras Al Ju'aymah, 11 mi
Northwest of the Ras Tanura Refinery. A small boat pier for the u
of pilot boats, mooring launches and Agents' launches is loca
8 miles Northwest of the Ju'aymah Tank Fram.

*Oil Inspection:* No independent inspection service is availabl
Ju'aymah. In cases of an abnormal difference between ship a
terminal cargo quantities, it is essential that Aramco person
investigate ship measurement of cargo.

*Ship Agencies:* Vessels calling at Ju'aymah should address
ships' business messages to their Agent through "Aramco HZ"
Matters concerning provision supply, minor repairs, local medi
or hospital services, mail, crew changes, etc. are to be handled
the ship's Agent.

*Time Zone:* The company generally bases its local time on
45th meridian (3 hours East of Greenwich). In order to avoid any co
fusion, all communications should be quoted in Greenwich Me
Time.

*Arab League Ban:* All member states of the Arab League proh
the export through their ports of any material consigned to Isr
Further, all ships having called at Israeli ports subsequent to Ap
25, 1952, are banned from Saudi Arabian ports.

*Security Patrol Boat:* An Aramco Security Patrol Boat will pa
the Ju'aymah offshore area.

*Saudi Arab Government Regulations:* Saudi Arab Governm
Regulations are strictly enforced, and Masters having any dou
concerning the interpretation of these regulations are urged
consult their agent. While in port, whether at anchorage or at ber
the vessel's personnel are under the jurisdiction of Saudi Arab la

Consumption of alcoholic beverages, including beer and wine
prohibited in Saudi Arabia. Penalties are severe and major delays
vessels can be incurred for violations.

*Port Officials:* Saudi Arab Government Port Authorities
located in the Customs House, the Port Office and the Quarant
Office at Ras Tanura. A Coast Guard Detachment is located
Ju'aymah.

A United States Consulate General is established at Dhahr
which is approximately 50 miles by road from Ras Tanura.

A British Political Agent is established on Bahrain Island. I
very difficult, however, to contact Bahrain Island by shore teleph
from Ras Tanura or Ju'aymah, and Masters having business th
usually arrange to call at the port of Sitrah (sometimes spelled Sit

*Inbound Clearance:* The ship's Agent will develop informat
necessary to fill in clearance application and port clearance form
Cargo requirements will be reconfirmed, and information requ
to expedite mooring, hose connection and other operational deta
will be exchanged with the Ras Tanura Pilot Office on VHF ra
prior to the tanker's arrival at Ju'aymah.

*Swimming:* or other activities involving life boats in the vicinity
a tanker are not permitted.

**SAFETY REGULATIONS:** *General:* The Port of Ras Tan
(including the Ju'aymah Loading Facilities) maintains a vigor
safety programme. Aramco is a member of the International
Tanker Terminal Safety Group (IOTTSG) and as such follows
procedures recommended by this organisation. As is done at ot
Gulf oil ports, the Pilot/Mooring Master as terminal safety rep
sentative will discuss in detail with the tanker Master, each iter
the "Declaration by Master" which reviews safety requirements
procedures. Prior to start of loading cargo and at several times dur
the loading, the Pilot/Mooring Master, in company with one of
ship's officers, will check to ensure that safe loading practices
being observed.

*Procedure in Case of Fire or Explosion:* What will be done in
event of a fire or explosion on board a vessel which is berthed
Ju'aymah buoy, depends upon the particular facts and circ
stances of the incident. It is impossible to indicate exactly w
practices will be applied before an evaluation of the specific em
gency situation can be made by the Pilot/Mooring Master.
decisions will be based on the following principles:

(*a*) An evaluation of the particular emergency will be made by
Pilot/Mooring Master. His decision as to course of action wi
based on the location, type and extent of fire, or explosion, ta
into account tide and wind conditions, buoy location and proxi
of other vessels.

(*b*) Circumstances permitting, a burning vessel will not be mitted to remain moored to the buoy, and the Master will unmoor the vessel when directed to do so by the Pilot/Mooring Master.

(c) Assistance will be rendered by available launches, tugs and other craft to the extent possible, as requested by the Pilot/Mooring Master.

(d) Prime consideration governing action to be taken will be to protect personnel, terminal facilities and other vessels, and to contain and control the emergency.

Should a fire or explosion occur at a buoy mooring, the oil loading platform or control platform, all cargo operations will be stopped and all vessels should stand by to disconnect and unmoor when so instructed by the Mooring Master, or when the need to take such action becomes self evident.

The signals for emergency are a continuous ringing of the ship's alarm bells supplemented by six short blasts followed by one long blast of the ship's whistle or siren. Assistance may be summoned on VHF Channel 16. Location, nature of emergency and type of assistance required should be given.

It is the responsibility of the tanker's personnel to watch its tanks at all times and to give ample warning to reduce the loading rate or shut off the pumping.

**AGENT:** Gulf Agency Company (Saudi Arabia) Ltd. PO Box 621, Ras Tanura, via Dhahran. Cable Address: Confidence Bahrain, stating "for Ras Tanura".

Agent will be responsible for all ships business, which includes obtaining inward and outward clearance, pratique, medical facilities, provisions, repatriation, repairs and diving services.

## RAS-AL-KHAFJI: 28.25 N. 48.32 E.

Ras-al-Khafji is situated in divided Neutral Zone approximately 60 miles South of Kuwait, this area is under joint jurisdiction of the Saudi Arabian and Kuwaiti authorities; vessels are therefore required to fly the flags of both Governments from the foremast, Saudi Arabia starboard side, Kuwait port side of mast. Onshore base situated in approximately 28° 25′ North, 43° 31′ East, and within a distance of 6 miles (10 km.) offshore, the Company has laid two conventional sea-berths and two single-buoy moorings for loading tankers and also an anchorage area for cargo ships working cargo. Outside this distance is an anchorage area for tankers.

In addition to exporting crude oil, fuel oil and naphtha are also exported.

**OPERATORS:** The Arabian Oil Co. Ltd. (Japan).

**APPROACHES:** Approaches to Ras-al-Khafji marked on appropriate U.S.H.O. and British Admiralty Charts, and are deep enough for majority of vessels using the port to proceed with normal caution using the buoys as centreline markers. A single patch with a depth of 56 ft. (17·07 metres) exists North of courseline between Buoys Nos. 2 and 3, and this necessitates caution on the part of large tankers leaving Ras-al-Khafji in loaded condition.

For tankers arriving Ras-al-Khafji without necessary charts, the full information will be given by telegram if request is sent to "Arabia-oil Kuwait" (via "9KK", Kuwait Radio Station) a few days before arrival. Alternatively, if vessel has VHF, the buoy positions will be given to them upon request to "Ras-al-Khafji" as the vessel approaches, but prior notice of requiring this service should be given in vessel's arrival message.

**NAVIGATIONAL AIDS:** All geographical positions given although approximately correct, are intended for reference purposes only as certain differences are known to exist between these positions and those shown on the U.S.H.O. and British Admiralty Charts of the area.

Conspicuous Marks. Flare stacks in offshore field and ashore normally visible at a great distance, but may occasionally be extinguished.

| | | |
|---|---|---|
| No. 1 Flare | Latitude 28° 28.3′ North | Longitude 48° 57.0′ East |
| No. 2 Flare | 28° 27.0′ | 48° 54.8′ |
| No. 3 Flare | 28° 29.8′ | 48° 56.0′ |
| No. 4 Flare | 28° 30.3′ | 48° 58.0′ |
| Onshore Flare | 28° 24.5′ | 48° 32.4′ |

**DOCUMENTS:** (*a*) Clearance. Master should submit following documents to Saudi Arabian Government through Agent (2 copies each):

Maritime Declaration of Health.
Health Condition of Crew.
Details of Air-conditioning.
Crew List.
Vaccination List.
Passenger List (if any).

Note Forms 1–3 are supplied by the Agent.

(*b*) Cargo. All cargo documents and shore figures are usually prepared on shore, and this takes about 1.5 hours with a futher 30 minutes before the documents arrive at the ship. Ship's Statement of Cargo is, however, prepared on board. Wherever necessary Mooring-Master will sign documents on behalf of the Company.

Following cargo documents are to be completed after loading:

Notice of Readiness.
Bill of Lading.
Time Sheet.
Ship's Statement of Cargo*.
Certificate of Delivery‡.

Note: *Ship's Statement of Cargo includes the items for "clean ballast declaration" and "dry inspection" altogether in one form.

‡ Certificate of Delivery should be handed to ship's Agent at port of discharge for certification by Customs Authorities. Agent should then return Certificates to the Company as soon as possible. Non-compliance with this requirement could involve vessel in serious difficulty. Masters therefore advised to ensure that their Agents at each discharging port return the Certificates at the earliest possible moment.

All certificates are to be sent direct to Arabian Oil Company and the Agents should be notified accordingly. It is understood that Arabian Oil Co. do not require legalised certificates and only certificates attested by the Customs at discharging ports will suffice.

**EARLY DEPARTURE DOCUMENTATION:** This documentation system aims to assist ships to depart early from this port after they complete loading by saving time awaiting documents. For this reason, relevant tanker documents will be signed previously by ship's Master or signed by their Agents at this port, depending on Master's choice on the request sheet. Completed tanker documents, therefore, will not be despatched to ships after completion of loading.

It must be noted that this system is not compulsory at this port, but it is at Master's option on condition that ships can communicate on Harbour Service VHF Radio or Marine Communication Band 2150 mc/s. to receive shore figures and time after departure.

**READINESS:** Master should present Notice of Readiness to load to Company's Mooring Master who will sign it on behalf of the Company. The Notice should be tendered as the time of the vessel's arrival at tanker anchorage area, which is, in principle, understood to be either time of dropping anchor in anchorage, or if vessel does not anchor, the time that Mooring Master boards to commence berthing.

**MOORING MASTER:** Compulsory for berthing and unberthing at Ras-al-Khafji, and Company's Mooring Masters will board vessels at anchorage area to take them to allocated berths. After berthing, Mooring Master will remain on board vessel until it is unberthed and cargo documents are completed. During this time he will act as the Company's representative in charge of all operations and shore personnel where the Company is concerned.

Notwithstanding presence of Company's Mooring Master on board, the Master of the vessel remains responsible for his vessel at all times and in all respects. In event of any emergency, however, the necessary steps should be taken by joint action between the Master and the Mooring Master.

The Master of each vessel shall give to Mooring Master all information necessary for safe handling and safe operation of vessel while it is in berth.

**BALLAST:** All vessels required to have on board sufficient clean ballast to give safe draft for manoeuvring purposes. Vessel arriving with too little ballast may be required to increase quantity, should Mooring Master feel that it would not be safe to berth vessel in its arrived condition. Recommended arrival condition is with propeller completely or almost completely immersed and vessel trimmed not more than 10 ft. (3.05 metres) by stern.

In good weather conditions, Mooring Masters will normally permit vessels to start deballasting as they approach the berth in order to save ship's time.

**BOARDING:** All vessels required to provide safe means of access for personnel boarding and leaving and should have accommodation ladder rigged on port side. In the case of vessels assigned to Berth No. 3, an accommodation ladder which leads down forwards is liable to be blocked by floating hoses, and in such cases the ladder should be rigged on starboard side. A ladder aft is always suitable on the port side.

For the benefit of people boarding at the anchorage area, vessels should provide a safe means of access on the lee side.

**ANCHORAGE:** (*a*) *Tankers:* Within 1 mile radius of position 28° 29.5′ N. 48° 39.0′ E.

The following are the details of the buoys marking the approach channel from sea to the tanker anchorage:

| *Buoy No.* | *Lat.* | *Long.* |
|---|---|---|
| 1 | 28° 36′ 00″ N. | 49° 10′ 00″ E. |
| 2 | 28° 36′ 00″ N. | 49° 00′ 00″ E. |
| 4 | 28° 34′ 58″ N. | 48° 51′ 19″ E. |
| 5 | 28° 32′ 34″ N. | 48° 48′ 58″ E. |
| 6 | 28° 33′ 48″ N. | 48° 48′ 00″ E. |
| 7 | 28° 32′ 51″ N. | 48° 47′ 10″ E. |
| 8 | 28° 33′ 24″ N. | 48° 45′ 41″ E. |
| 9 | 28° 31′ 24″ N. | 48° 43′ 53″ E. |
| 10 | 28° 29′ 29″ N. | 48° 37′ 48″ E. |
| 11 | 28° 28′ 17″ N. | 48° 39′ 12″ E. |

The Western extremity of tanker anchorage is marked by No. 11 Lighted Buoy. Tankers should not pass East of this buoy.

(*b*) Dry-cargo. Anchorage for dry-cargo ships located about 4 miles to West of tanker anchorage, and is centred in position 28° 26′ 08″ N., 48° 33′ 04″ E. and marked by a flashing white buoy. Cargo ships should anchor within a half mile radius of this buoy, where depths are between 36 ft. (10·97 metres) to 50 ft. (15·24 metres) in good holding ground of clayey mud.

(*c*) Prohibited Area. An area bounded by straight lines joining following points is prohibited to anchoring and fishing due to presence of well-heads, Flow Stations, Gathering Station, etc. and numerous pipelines and power transmission cables on the sea bed. Additionally, the area bounded by five light-buoys is prohibited to navigation by all vessels or craft except those operating on direct instructions from the Company.

| | *Latitude* | *Longitude* | |
|---|---|---|---|
| (*a*) | 28° 24′ 48″ North | 48° 31′ 57″ East | |
| (*b*) | 28° 25′ 33″ | 48° 32′ 55″ | |
| (*c*) | 28° 26′ 45″ | 48° 35′ 16″ | |
| (*d*) | 28° 25′ 50″ | 48° 35′ 40″ | |
| (*e*) | 28° 29′ 04″ | 48° 52′ 34″ | |
| (*f*) | 28° 32′ 00″ | 48° 54′ 00″ | Red. Fl. Yellow 3 secs. |
| (*g*) | 28° 35′ 00″ | 49° 00′ 00″ | Red. Fl. Yellow 3 secs. |
| (*h*) | 28° 32′ 00″ | 49° 04′ 00″ | Red. Fl. Red 3 secs. |
| (*i*) | 28° 28′ 00″ | 49° 04′ 00″ | Red. Fl. Red 3 secs. |
| (*j*) | 28° 24′ 00″ | 48° 52′ 00″ | Red. Fl. Red 3 secs. |
| (*k*) | 28° 26′ 53″ | 48° 52′ 00″ | |
| (*l*) | 28° 23′ 13″ | 48° 31′ 48″ | |

**HEALTH:** No radio pratique will be given. Vessels must be cleared by quarantine office on arrival. (In the past, tankers were given free pratique at the request of Agents and on the production of the copy of telegrams from vessels confirming that all crew members possess valid cholera and vaccination certificates and that there is no sickness on board. This procedure has changed recently and all vessels are boarded by quarantine officer and pratique is given only after checking the documents concerned.)

**RADIO:** (Also see "Approaches"). Advise ETA Khafji at least 4 days, and again 1 day, before arrival through normal radio services. As an alternative to the route through Kuwait Radio Station (call sign: 9KK), vessels may send their first message through Singapore, Bombay or Bahrain Radios. Confirmation of ETA should be made a few hours before arrival by calling "Ras-al-Khafji" on Channel 16 VHF. All cables should be addressed to "Arabiaoil Kuwait".

The first message should be sent according to following form, but any items which are the same as a recent previous voyage to this port may be omitted.

(1) ETA Ras-al-Khafji
(2) Last port
(3) Deballasting time
(4) Quantity and type of cargo and bunkers required
(5) Maximum loading rate
(6) Diameter of cargo and bunker connections
(7) Distance from manifold to ship's side
(8) Derrick capacity
(9) Whether Ras-al-Khafji is first or second port (when taking part cargo)

*Note:* Item (9) should only be answered in cases where vessels are taking part cargo at Ras-al-Khafji. If second port, the first loading port should be mentioned.

Communications between shore and loading berth mainly sent and received by means of FM wireless telephone, which is brought on board tankers at time of arrival.

**VHF:** Short-range communication can be made with Terminal Office by calling "Ras-al-Khafji" on VHF Channel 16. Working channels are 9, 11, 12, 13 and 14. Vessels should call Ras-al-Khafji several hours before arrival to confirm ETA and receive berthing instructions. After anchoring they should advise their anchoring time and then maintain watch on Channel 16 until the Mooring-Master boards. Terminal VHF normally operative between 0400–1400 GMT, and is used outside these hours by special arrangements with individual ships.

**TUGS:** The undermentioned tug-boats are available for mooring and unmooring purposes: "Chiyoda Maru No. 22" 200 g.r.t., 1,320 b.h.p.; "Chiyoda Maru No. 3" 175 g.r.t., 1,320 b.h.p.; "Chiyoda Maru No. 4" 236 g.r.t., 2,200 b.h.p.

One of these tugs stands by near the berths as long as any vessel remains moored. Two mooring boats are used for handling ropes and hoses.

**BERTHING:** 1. Personnel. After vessel berthed, Company's Loading Operator and Mooring Crew will board. Loading Operators work shifts and there will always be one on board vessel while in berth. This man acts as assistant to Mooring-Master, and should be treated as such at all times. In particular he will carry out Safety Inspections and handle communications between ship and shore, particularly those communications regarding cargo.

Ship's personnel requested to give Loading Operator all required information and necessary assistance to allow him to do his job properly. Any disputes arising from his actions should be referred to Mooring-Master for final decision.

Mooring Crew will connect and disconnect hoses as required, but may at any time be transferred to another vessel for the same purpose. While they remain on board, vessels are requested to provide them with following: use of Smoking Room, toilet and washing facilities; hot and cold drinking water; utensils for eating and drinking (it is not normally necessary to supply food).

2. Description of berths.

(*a*) *Sea-Berth No. 1*

Position: 28° 26′ 10″ North, 48° 34′ 57″ East.

Depth: 53 ft. (16.15 metres) at Indian Spring Low Water.

Permitted draft: 47 ft. (14.33 metres) maximum.

Type of berth: Conventional four-buoy system where vessel moors to two anchors and one buoy forward and to three buoys aft.

Length: Designed for tankers of 800 ft. (245 metres) length but can be used by tankers of any size, although tankers of less than 650 ft. (200 metres) overall length sometimes experience difficulty in mooring if their lines are less than a full 720 ft. (220 metres).

Submarine Pipelines and Hoses: From the ex-Loading Dock one 26 in. crude oil line and one 18 in. fuel oil line have been laid to the manifold position. Two 10 in. rubber hoses for crude oil and one 12 in. rubber hose for fuel oils are connected to ship's manifold. These hoses approximately 225 ft. (69 metres) long and maximum lifting weight of the two crude oil hoses toget is 4.5–5 tons. For bunkering purposes one section of 6 in. ho is attached to the end of the 12 in. fuel oil hose.

(*b*) Sea-Berth No. 2

Position: 28° 25′ 55″ North, 48° 35′ 28″ East.

Depth: 56 ft. (17.07 metres) at Indian Spring Low Water.

Permitted draft: 50 ft. (15.24 metres) maximum.

Type of berth: As Berth No. 1.

Length of berth: As Berth No. 1.

Submarine Pipelines and Hoses: From the ex-Loading Dock 26 in. crude oil line, one 10 in. bunker line and one 4 in. mar diesel line have been laid to the manifold position. Two 10 rubber hoses for crude oil, one 6 in. rubber hose for bunk and one 4 in. rubber hose for marine diesel oil are connec to ship's manifold. All these hoses approximately 225 ft. metres) in length, and the maximum lifting weight of two cru oil hoses together is 4.5–5 tons.

(*c*) Loading Rates at Berths No. 1 and No. 2

Crude oil rate is 30,000 bbls/hr or 4,000 tons/hr.

Fuel oil loading rate at Berth No. 1 is 7,000 bbls/hr or 1,000 tons

(*d*) Preparation on Board before Berthing at Berths No. 1 and N

Vessels should have ready:

(i) Both anchors.

(ii) Three ropes forward and nine ropes aft.
Some wires are acceptable in place of equivalent numbe ropes. No shore wires used from buoys to ship. All rop and wires should be in good condition and preferably with splices.

(iii) Port derrick rigged for a minimum lift of 5 tons, using a runner and a hook.

(iv) Two 10 in. ASA 150 hose connections for crude oil, and 12 in. ASA 150 for fuel oil cargo (at Berth No. 1 only), at ship's port side manifold.
If ASA 150 is not available, the Company should be advis before arrival.

(*e*) Mooring and Unmooring at Berths No. 1 and No. 2

On approaching berth a ship's line is passed to one tug from cen fairlead aft. This line should be of good strength and well made on board.

When in position off berth, starboard anchor is let go and slack away easily to about 9 or 10 shackles on deck. Port anchor is th let go and paid out easily as vessel swings round into berth us tugs and engines as required. At same time, starboard ancho hove-in to about 6 or 7 shackles on deck and then made ready slacking away again.

As vessel backs down berth the anchors are slacked away necessary, and ropes sent to forward (No. 4) buoy. When st passes close to starboard quarter (No. 1) buoy, ropes are sent a to this buoy, hove-in tight and put on bitts ready for slacking if nec sary. Ropes then run to port quarter (No. 3) buoy, hove tight, lateral position in berth adjusted between port and starboard qua buoys. Lastly, ropes are run to the stern (No. 2) buoy and tug also passed to this buoy. The fore-and-aft position is then adjus between the anchors and the sternlines. A second tug is used assist in lateral positioning of the vessel, and two mooring bo are used for running lines to buoys, normally taking two ropes time.

In wintertime three ropes are used to each buoy, but in sum two of these may be dispensed with at Mooring-Master's discret

When properly positioned in berth, distance from ship's sid manifold marker buoy should be about 50–66 ft. (15–20 metres).

When hose disconnection completed, vessel unmoors by let go all lines on buoys No. 3 and No. 4, followed by those on b No. 2 and lastly those on buoy No. 1. Vessel then heaves both anch as necessary until they are up and clear, and vessel can leave be

Tugs used as required to keep vessel away from manifold mar and mooring buoys.

Mooring-Master may vary this procedure according to preva weather.

(*f*) Hose Connection and Disconnection at Berths No. 1 and No

After completion of mooring, mooring boat will pull hose mar buoys to ship, and connect to ship's port derrick runner. The crude oil hoses are lifted together from seabed by ship's der and connected directly to manifold by Company's Crew.

Fuel oil hose at Berth No. 1 is lifted separately and connecte similar manner.

Time taken for hose connection about 1–1.5 hours dependin number of hoses connected. Hose disconnection takes abou hour, and is done in reverse manner to connection.

(*g*) Loading Restriction at Berths No. 1 and No. 2

Due to there being only one cargo pipeline between ex-Load Dock and the shore, it is not possible to load vessels in Ber No. 1 and No. 2 simultaneously. Therefore, when these berths occupied, one vessel will be loading while the other is deballast the latter arranging to finish ballast about 1 hour before the o vessel finishes cargo.

(*h*) General Description of Berth No. 3

Position: 28° 27′ 06″ North, 40° 36′ 28″ East.

Depth: 62–64 ft. (18.90–19.51 metres), but 59 ft. (17.98 metres) pipelines, at Indian Spring Low Water.

Permitted draft: Normally 54 ft. (16.46 metres), but 56 ft. ( metres) permissible using rise of tide.

Type of berth: Single-buoy-mooring system consisting of a 30 ft. (9.14 metres) in diameter, moored to eight pendant leg 3.5 in. high strength chain shackled to anchor piles at a ra of 575 ft. (175 metres), and having a rotating deck car pipeline and mooring connections.

Moorings: Attached to mooring connections on the buoy are two 12 in. nylon ropes (97 mm. dia., breaking strain 150 tons). These ropes are 120 ft. (37 metres) long, and have at their free end a length of stud link chain which includes a "sister-plate" for receiving the shackles used on deck of tanker. From outer end of this chain is connected a 10 in. polypropylene "pick-up" rope about 180 ft. (55 metres) in length. Rope supported by "doughnut" floats, and chain hung by large plastic buoys 5 ft. in diameter, coloured red and green.

Submarine Pipelines and hoses: One 36 in. crude oil line and two 12 in. fuel oil lines have been laid approximately 30,000 ft. (9 km.) from shore to position close under buoy. From underwater manifold the crude oil goes to the buoy through 20 in. underwater hose; fuel oil lines joined at manifold and fuel oil led to buoy through one 10 in. submarine hose. From deck of buoy 20 in. crude oil hose and 10 in. fuel oil hose are supported by floats, and have a length of 660 ft. (201 metres) to a hose raft, at which position the 20 in. hose is divided into three strings of 12 in. floating hose. These, together with the 10 in. fuel oil hose, extended for a further 120 ft. (37 metres) making a total length of 780 ft. (238 metres) including the raft. At their free end the hoses are paired and connected to two large plastic buoys each 4 ft. in diameter.

Loading Rate: Maximum loading rate of crude oil is 45,000 bbls/hr or 6,200 tons/hr. The fuel oil loading rate is 5,000 bbls/hr or 700 tons/hr.

(*i*) Preparation on Board before Berthing at Berth No. 3

Before arriving at anchorage, vessels assigned to Berth No. 3 should have ready:

(*a*) Two mooring ropes forward, together with rope stoppers, and also one or two steel crowbars.

(*b*) Port derrick rigged for 10 tons, or maximum lift if 7–10 tons.

(*c*) Three 12 in. ASA 150 hose connections for crude oil, and one 10 in. ASA 150 for fuel oil cargo, at the port side manifold. If ASA 150 is not available, the Company should be advised before arrival.

(*j*) Mooring at Berth No. 3

Mooring-Master will board from tug which carries mooring and hose connection materials. Vessels should have crew standing-by ready to receive these materials, and should maintain a lee until this is completed.

Mooring-Master will instruct crew in setting-up of forward moorings, where two 12 in. nylon ropes are made fast round port and starboard bitts with their attached shackles about 12 ft. (3.66 metres) inboard from the fairleads of panama leads as far forward as possible. Size of fairlead opening should be at least 12 in. to prevent chain jamming in fairleads.

Approaching berth, tanker should lower a mooring rope from each bow as a messenger. Mooring boat will take port rope first, and connect it to the port "pick-up" rope which should then be hove-in while the boat returns to take the starboard rope for connection to its "pick-up" rope. These two ropes are then hove-in until the chains come into the fairleads, and the shackles can be made fast in the "sister-plates". The "pick-up" ropes are then slacked back until the nylon ropes have the weight.

Usual time from sending away first line until all fast is about 20 minutes.

(*k*) Unmooring from Berth No. 3

After hose disconnection completed, the weight is taken on "pick-up" ropes, nylon ropes are unshackled, and as vessel backs off berth the "pick-up" ropes are slacked off and then dropped into the water. The tug will come alongside either before or after vessel backs off berth, whichever is convenient, and the nylon ropes and the two big shackles are passed to the tug. Unmooring time usually 10 minutes.

(*l*) Hose Connection and Disconnection at Berth No. 3

After completion of mooring, the mooring boat which has been holding the hoses clear during berthing, will bring the hoses to the ship and connect the derrick runner to the buoy having two 12 in. crude oil hoses. These are usually lifted aboard together and connected directly to ship's manifold, making any necessary separation of hoses as may be required according to lifting capacity of ship's derrick

The hoses are hung off on 2 in. diameter nylon ropes and lashed to the rail to prevent shock loads due to wave action being transmitted to manifold flanges.

After the first pair of hoses have been connected, the second buoy is lifted and the remaining crude oil hose and the fuel oil hose connected in similar manner to the first two hoses. If a vessel requires a loading rate of 5,000 tons/hr or less, only two crude oil hoses are connected. According to the number of hoses to be connected, connection takes 1.5–2.5 hours.

Hose disconnection is done in a reverse manner to connection, and takes about 1–1.5 hours.

(*m*) Berth No. 4 (S.B.M.).

Situated 2 miles East-north-east of Berth No. 3. Permitted draft 64 ft. and 66 ft. using rise to tide.

**LOADING:** Loading crude cargo on top of oily residue is acceptable.

(*a*) Dry Inspection

Upon completion of deballasting the Mooring-Master will inspect the tanks.

If the tanks are not satisfactory, he may require further pumping until such time as they reach the required standard.

(*b*) Loading Operations

When ship is ready for loading, ship's officer must inform Loading Operator who will transmit necessary orders to Control Room on shore.

Loading is started by booster pump, and after everything has been checked and found satisfactory on board loading rate will be gradually increased by starting further booster pumps and then main pumps in sequence until the required loading rate is reached; provided always that required loading rate is within capacity of the pumps.

Loading rates can be varied at any time during loading upon 5–10 minutes notice to the Mooring-Master or Loading Operator on board.

In case of emergency, the immediate stopping of all loading can be accomplished.

When loading is completing, the rate is gradually reduced first by stopping the main pumps and latterly the booster pumps, one by one according to the request of the ship's officer. At the final stage of loading only booster pumps should be on the line, and the ship's officer should tell the Loading Operator to "Stand-by" at least 5–10 minutes before finishing cargo.

Shore pumps will stop about 15 seconds after their control buttons are pressed, but the oil will continue to flow for several minutes, depending on amount of time since main pumps were stopped.

All stops for cargo completion must be given by the ship, as "shore-stop" is *NOT* practised at this port.

(*c*) Overflows and Spillage

In the event of overflow or spillage during loading, cargo will be stopped immediately and will remain stopped until such time as Mooring Master considers it safe to resume loading. This will normally be when all the overflowed oil has been cleared off the deck and there is no longer any unusual danger involved. It is ship's responsibility to clear oil away as soon as possible after occurence.

(*d*) Ullaging and Gauging

After loading completed, Mooring Master will witness final ullaging on board so that ship's figures can be calculated.

Onshore a group of Government and Company gaugers will take manual gauges of the shore tanks before and after loading, and from these gauges the Bill of Lading figures will be calculated.

(*e*) Saybolt Inspection

The oil inspectors of E.W. Saybolt & Co., S.A., based in Mina Abdullah, Kuwait, are available at this port upon consignee's special request. They will carry out or witness gauging of the shore tanks, dry inspection and ullaging of the ship's tanks, calculation of shore and ship's figures, analysis of oils, etc., issuing the necessary certificates according to consignee's requirements.

**STEVEDORES:** Dry-cargo vessels calling Ras-al-Khafji to give at least 72 hours notice to Agents to arrange labourers. Stevedores will be arranged from Kuwait. Ship's gear used for discharging, which takes place at anchorage into barges.

**MEDICAL:** Company operates a clinic and a hospital at Ras-al-Khafji. Medical and dental treatment can be given in cases of emergency or serious illness or injury. Epidemic diseases or cases of serious injury or disease requiring operations, etc. are normally transferred to State hospitals in Kuwait. Company's doctor will not normally attend on board unless patient is incapable of attending clinic. Requests for medical attention should be given to ship's Agent as early as possible before arrival.

**FRESH WATER:** Not available except in cases of extreme emergency.

**FUEL:** (Also see "Berthing")

(*a*) Grades. Marine diesel oil (MDO), light bunker oil (LBO) and heavy bunker oil (HBO) are supplied. Each loading berth has pipeline which can deliver light and heavy bunker oils, but only berth No. 2 has marine diesel line. At Berths No. 1 and No. 3, marine diesel oil supplied from barge for which no extra charge made.

"Bunkering Information" booklet, which gives full details of bunkering services at this port, is available from the Company upon request.

(*b*) Bunker Nomination. Owners, Operators or Charterers should nominate their vessels' bunker requirements *to the Company's Head Office in Tokyo.*

Vessels requested confirm grade and quantity of bunkers required *direct to* "*Arabiaoil Kuwait*" (via "9KK") through normal radio services at least 4 days before arrival; or in cases where vessels receive instructions less than 4 days away, they should advise bunker requirements as soon as possible.

(*c*) Bunkering Operation, Bunkers normally supplied to vessels in berths while they are discharging ballast or loading crude oil. At Berths No. 1 and No. 3 MDO supply from a barge will be done usually before loading cargo.

Except in special circumstances when previously agreed, bunker supply is Stopped Onshore when requested quantity has been pumped according to shore tank gauging.

| *Berth* | *Marine diesel oil* | | *Light and heavy bunker oils* | |
|---|---|---|---|---|
| No. 1 | 4″ | 80 t/hr* | 6″ | 400/300 t/hr |
| No. 2 | 4″ | 40 | 6″ | 400/300 |
| No. 3 | 4″ | 80* | 10″ | 400/300 |

Note: (*a*) * Supply from a barge with 4″ rubber hose.

(*b*) In winter time the rates for light and heavy bunker oils decrease due to the low sea-water temperature increasing the viscosity of these oils.

*Bunkering for Cargo Vessels*

Bunker supply to cargo ships from a barge or a coastal tanker is available.

**CUSTOMS:** Upon arrival Master required submit to Customs a manifest of any cargo to be landed at Ras-al-Khafji and to sign a declaration that no intoxicating liquors or drugs will be landed. After loading completed, Customs will sign an Outward Manifest and issue Port Clearance. These will be handed to Master by Agent.

In normal circumstances Customs Officers do not board tankers, but board cargo ships and leave a Customs Guard on board throughout vessel's stay.

Import of following articles forbidden:

Alcoholic beverages.
Pornographic literature, photographs, pictures and films.
Explosives.
Fire arms or implements of war of any kind.
Religious matters not pertaining to the Moslem faith.
Playing cards and other gambling devices.

**REPAIRS:** Some minor repairs may be made on board using shore assistance in case of extreme emergency, but such repairs must be made only with prior permission of Company's Terminal Office should it be required to do them in berth. Preferably all repairs should be carried out at anchorage. In all cases when shore assistance is required Master should notify ship's Agent well in advance.

**DRY DOCKS:** None.

**REPATRIATION:** May be accomplished by making special arrangement through the ship's Agent, well in advance of vessels arrival.

Marine Superintendent of Owners, or Owners Representatives and businessmen visiting Kuwait must have valid visas. Such visas can be obtained from Kuwait Government's diplomatic missions abroad.

**AIRPORT:** Crew joining must be routed through Dhahran. Kuwait Airport 110 km. Dammam 325 km.

**TIME:** GMT plus 3 hours throughout year.

**TELEPHONES:** No facilities for placing on board.

**SERVICES:** Swedish Welfare for Seamen, Lloyd's Surveyor, Butterworth Tank Cleaning Machines and Equipment and Underwater cleaning.

Provisions and deck stores are available from ship chandlers in Kuwait in limited kinds and quantities. Prices at Khafji may be a little more expensive than in Kuwait due to the transportation charges made. In all cases the ship's Agent should be advised of the requests at the earliest possible time before arrival.

**SHORE LEAVE:** Not normally permitted by Authorities except by arrangement through the ship's Agent.

**AUTHORITY:** *Arabian Oil Company Offices.* Head Office Chiyoda Denden Building, 1–6, Otemachi, Chiyoda-ku, Tokyo, Japan. Tel. (201) 6821. Central PO Vox 1679, Tokyo, Japan. Cable "Arabiaoil Tokyo" or Telex TK 2416 (Araboil).

Field Office (Neutral Zone Office): Ras-al-Khafji, Saudi Arabia-Kuwait Zone, (There is no direct telephone connection between Field Office and the Kuwait telephone system.) Ras-al-Khafji, Neutral Zone, Kuwait. Cable "Arabiaoil Kuwait".

**AGENT:** See "Kuwait".

## RAS TANURA: 26.38 N. 50.10 E. (See Plans)

**OPERATORS:** Arabian American Oil Co. ("Aramco").

**FLAG:** Saudi Arabian flag must be flown from vessel's foremast while in port. Vessels should provide themselves with this flag before arrival but, if circumstances render this impossible, such flag may be purchased from the vessel's Agent. Saudi Arabian flag is properly displayed when writing appears on top and sword or swords on the bottom.

**IMPORTANT FEATURES:**

1. There are two piers and a Sea Island having a total of eighteen oil-loading berths. In addition, a small oil-loading pier is located on West side of Ras Tanura peninsula. A 20 mdwt bunkering vessel is stationed in the anchorage area to refuel vessels that require bunkers only.
2. Aramco Harbour Pilots moor, unmoor and supervise movement of all vessels in vicinity of piers except coastal tankers loading at West Oil Pier. Normally no charge made for this service.
3. Safety rules strictly enforced. Receipt of instructions must be acknowledged before vessel will be berthed.
4. Aramco maintains radio station (call letters HZY) for exchange of messages with ships. All incoming tankers should establish early contact with this station order transmit ETA data, etc.
5. Vessels arriving at Ras Tanura shall retain sufficient clean water ballast on board for the safe handling of the vessel from the anchorage area to the piers. Every effort should be made to reduce the quantity of ballast on board to a minimum and to have the ballast in as few tanks as practical in order to reduce the time spent draining. During adverse weather conditions sufficient ballast shall be retained on board the vessel to assure easy handling and good steering qualities. Ballast pumping equipment should be ready to commence discharging ballast when the vessel is in position in the berth.
6. Consumption of alcoholic beverages prohibited within Kingdom of Saudi Arabia. Local officials carry out inspection to confirm that all alcoholic beverages under lock and key during vessel's stay. Vessels moored at loading piers or anchored in harbour considered to be in Kingdom of Saudi Arabia.
7. Display of quarantine signals on approach to Ras Tanura must be maintained until pratique is granted. The flag of Saudi Arabia must be flown throughout the vessel's stay in port. Ships cannot be berthed until the quarantine message has been received (see "Radio").
8. To permit more rapid ship turnaround, an "Early Departure Procedure" is available. This service provides for a quick departure of the vessel after loading, without necessity of waiting for delivery of documents at anchorage. This special service should be requested and arranged with Agent at earliest opportunity.
9. All vessels transiting the "deep-water departure channel" m maintain a minimum 5 ft. keel clearance.

**LOCATION:** Aramco's shipping and refining facilities situa on Saudi Arabian coast of Arabian Gulf on peninsula known Ras Tanura. The peninsula, which has a total length of 13 sta miles, has as Southern extremity a 5 mile-long sandspit with m mum width about 5 mile. Near its tip are Company's piers, ship tanks, and terminal offices. Refinery and its storage tanks loca about 7 miles to the North. There is a survey reference point loca at Southern tip of peninsula, over which a beacon tower has b erected. Exact position of this beacon is Latitude 26° 37′ 25″ No Longitude 50° 09′ 50″ East. All bearings are referenced to this po which is officially known as Ra's at Tannurah. The name "Ra's Tannura" (variously spelled) appears on most charts and publi tions.

Port of Ras Tanura is a roadstead and there are only o anchorage areas for oil tankers and other vessels. Some protec is afforded by land on the West and shoals to the North, East a South. These shoals tend to keep the sea down to such an ex that vessels do not ordinarily register heavy movement.

**APPROACHES:** The inner channel at Ras Tanura port has b buoyed for the safe navigation of deep-drafted outward bo vessels where marine navigation aids, in accordance with in national standard, have been installed. The channel has a certi depth of 69 ft. at ISLW.

The Port of Ras Tanura should be approached from the No Vessels approaching in ballast should pass Westward outside, close to, the buoyed deep-water departure channel in order provide adequate sea room within the lines of buoys. The buo channel, designated as the "deep-water departure channel", ha clear depth of 71 ft. except for a shoal area about 6,500 ft. long t has a clear swept depth of 69 ft. at ISLW. The buoyed width of shoal area passage between buoys 15, 16, 17, and 18 is 800 ft.

*Caution:*

All vessels approaching the Ras Tanura anchorage from North or South, shall reduce their speed sufficiently to ensure safety of other vessels and themselves, and when passing thro the anchorage the speed shall not exceed 5 knots per hour.

All vessels approaching the ports of Ras Tanura and/or Damm are to stay clear of the "deep water departure channel". The lig draft vessels approaching should give way and endeavour to a getting into crossing situations that might require an out bound vessel to alter course. Such vessels may be extremely lim in their room to manoeuvre due to their deep draft. Vessels depar the ports of Ras Tanura and/or Dammam are required to use "deep water departure channel".

The areas around the approaches to Ras Tanura and northw along the Arabian coast have many drilling platforms, wells other structures which may be hazards to navigation. Approp navigation charts should be kept up to date and consulted w sailing in this area.

*Separation Zone (arriving vessels):*

(*a*) All arriving vessels should stay within the lane.
(*b*) From Approach Buoy or Entry Buoy to Buoy No. 4 the sep tion zone is ¾ mile.
(*c*) From Buoy No. 4 to Buoy No. 5 the separation zone is ½ m
(*d*) From Buoy No. 5 to Buoy No. 7 the separation zone decrea to nil.
(*e*) From Buoy No. 7 to Buoy No. 17 all arriving vessels are to k to the West of Buoys, No. 7, 9, 11, 13, 15 and 17.

*Separation Zone (Departing Vessels):*

(*a*) All departing vessels should stay within the lane.
(*b*) From Buoy No. 17 to Buoy No. 5 all departing vessels a keep to the East of Buoys No. 17, 15, 13, 11, 9, 7, and 5.
(*c*) The separation zone starts at Buoy No. 7 and increases t width of ½ mile at Buoy No. 5.
(*d*) Buoy No. 4 to Buoy No. 5 the separation zone is ½ mile wid
(*e*) From Buoy No. 4 to the Entry Buoy or Approach Buoy separation zone width is ¾ mile.

*Special Notes:*

The following regulations and special notes are promulgated the use of ship's Masters entering and leaving Ras Tanura Dammam ports:

*Inbound Vessels:*

1. Vessels fitted with the appropriate VHF radio equipment requested to monitor Channel 16 when in the vicinity of Tanura channel and anchorage area.
2. Vessels shall report time of passing Beacon No. 3 to Ras T pilot station.
3. Vessels shall report time of passing Buoy No. 7 to Ras T pilot station.
4. Vessels proceeding within the area bound by Channel B No. 9 and the southern extremity of Ras Tanura ancho should limit speed to a maximum of 5 knots.
5. No overtaking is permitted in the Ras Tanura arrival cha after passing Buoy No. 9.
6. A minimum distance of one mile shall be maintained betw vessels proceeding in the same direction after passing B No. 9.
7. Vessels passing Buoy No. 17 must navigate with extreme ca and give way to vessels departing from the berths.
8. Freighters transmitting the Ras Tanura port area, boun Dammam, should alter course Eastward after passing cle Buoy No. 17 and keep to the Eastern sector of the t anchorage.
9. Under no circumstances shall inbound vessels navigate i buoyed deep water departure channel.

*Outbound vessels:*

1. All vessels are to monitor Channel 16 when in the vicinity of Ras Tanura channel and anchorage area.
2. Vessels departing from Ras Tanura anchorage must advise Ras Tanura pilot office of their intentions thirty minutes before departing.
3. Freighters outbound from Dammam shall, when passing Dammam Channel Beacon No. 1, alert Ras Tanura pilot office of their estimated time of arrival at the southern extremity of the tanker anchorage. Freighters should keep to the Eastern sector of the tanker anchorage and avoid the manoeuvring area from the anchorage to the piers.
4. Vessels manoeuvring within the area bound by the southern extremity of the Ras Tanura anchorage and the entrance to the departure channel (Buoys 17 and 18) should limit speed to a maximum of 5 knots.
5. Any departing vessel shall not overtake any vessel ahead until both vessels have passed clear of Buoy No. 5.
6. A minimum distance of one mile is to be maintained between vessels proceeding in the same direction until clear of Buoy No. 5.
7. Under no circumstances shall outbound vessels navigate in the arrival channel.

*Keel Clearance:* No vessel may transit either channel unless it has at least five (5) ft. of keel clearance.

*Communication – VHF Radio:* Maintaining a continuous radio watch aboard all vessels in the Ras Tanura vicinity cannot be overemphasised, particularly in the event of unforeseen circumstances developing in the port area. A two-way exchange of information is an essential prerequisite to a safe, efficient port operation. Vessels in the Ras Tanura anchorage that are not fitted with VHF radio are requested to maintain a radio watch with the local station HZY.

**DOCUMENTS:**

(*a*) Following documents required for immediate inspection by boarding officials:

Maritime International Declaration of Health. (1 copy from last loading port to be surrendered).

Valid Deratisation or Deratisation Exemption Certificate.

Crew List.

Passenger List.

Smallpox Vaccination Certificate, of a date not exceeding three years, for all passengers and crew members.

Certificates of Inoculation against any communicable diseases prevailing at the ports of departure.

A complete set of Log Books covering the period since the vessel's last call at Ras Tanura. In the case of a first visit, log books must cover the period from the date of a vessel's first sailing or from April 25, 1952, whichever date is most recent.

(*b*) "Early Departure Procedure." To permit more rapid ship turnaround, an "Early Departure Procedure" is available. This service provides for a quick departure of the vessel after loading, without the necessity of waiting for delivery of documents at anchorage. This special service should be required and arranged with Agent at ship's earliest opportunity. When vessel is ready to leave port, a Ministry of Health permit and port clearance will be given to Master by ship's Agent.

(*c*) Export Goods Manifest. Masters will receive from Agents, Export Goods Manifest forms covering each consignment of cargo loaded. A letter addressed to the consignee will accompany these forms. This letter provides detailed instructions as to requirements and disposition of the Export Goods Manifest forms. It is imperative that Master delivers these papers to consignee upon arrival at the discharge port(s).

(*d*) Discharge Certificates. According to local procedure, certificates showing details of cargo loaded at this port on any tanker, are airmailed by Agents to the receivers of cargo at the port of discharge along with a self-addressed envelope, and returned to the Arabian American Oil Company in Ras Tanura signed by the recipient Customs Authorities.

**PILOTAGE:**

(*a*) Channel Pilots. Approach channels well marked by lighted, radar-reflecting beacons and buoys. For these reasons, Channel Pilots not provided.

(*b*) Harbour Pilots. Harbour Pilots provided for assistance to Masters of vessels using the Port. Aramco Pilots are on duty continuously. If a berth is available and the ship's radioed quarantine message and notice of arrival and readiness have been received, an Aramco Harbour Pilot will board the incoming vessel while it is underway. The point of boarding will be South of Buoys 17 and 18 and East of the Sea Island. Aramco Harbour Pilots will pilot vessels to berth at all piers. All manoeuvring of vessels in vicinity of or at the piers will be under supervision of an Aramco Harbour Pilot. VHF radio contact may be made between ships and the Port Control and the Pilot's Office at frequencies listed under "Radio".

The services of the Pilots are presently provided without charge, but the Company reserves the right to charge for these services.

If the freeboard of a vessel exceeds 30 ft., an accommodation ladder is required in conjunction with the pilot ladder. This requirement does not involve vessels equipped with *approved* pilot hoists. The deck of the Ras Tanura pilot launch, from where the Pilot boards, is approximately 6 ft. above the water.

Upon request from ship's Master, additional pilotage assistance to transit the Ras Tanura departure channel is available to all VLCC vessels of 150,000 dwt and above which have a deep draft of 60 ft. or more when fully loaded.

On departure from Ras Tanura an Aramco Harbour Pilot will remain on board until vessel is aligned with the channel on a safe course providing the Pilot can disembark safely. The additional pilotage is also available when it is necessary for a VLCC to proceed to anchor to await a favourable tide or make repairs. The Pilot will remain on board until the vessel arrives in the anchorage; however, the Master will be responsible for the actual anchoring of the vessel. During adverse sea and weather conditions, a proper lee shall be made so as to allow the Pilot to safely disembark.

*Pilot ladder requirements:*

1. The ladder should be kept in good order, cleaned, should be of adequate length and strength.
2. The vertical distance between steps should not exceed 15 in. The outboard edge of the step should project from 5 to 6 in. from the hull. Ladders must be so constructed that the steps will remain flat or at right angles to the hull while supporting the weight of a person.
3. Spreaders at suitable intervals should be provided to prevent the ladder twisting and the ladder should be properly secured with the steps level.
4. The deck in the vicinity of the ladder should be clean and free of oil and grease.
5. When possible, on vessels so equipped, the pilot ladder shall be made fast alongside of an area where there is a break in the rail or an opening in the bulwark. This allows a person to step directly on the deck and is considered most desirable. The boarding position should be as near midships as possible.
6. During the hours of darkness, it is necessary that the pilot ladder be adequately lighted. It is emphasised that not only the ladder but the deck area close by the head of the ladder should be illuminated.
7. A manrope or safety line should be rigged in the close proximity of the ladder.
8. Responsible deck department personnel are to be in attendance when the Pilot boards or leaves the ship.

**ANCHORAGES:** All vessels must have anchors well secured when approaching or departing from the Sea Island facilities. No anchor or chain clearing operations are permitted while alongside any berth.

The suggested anchorages in the port of Ras Tanura have been laid out to facilitate shipping in general. They provide vessels with ready access to the piers. The anchorage area ranges in depth from 5 to 12 fathoms. Holding ground in these areas is only fair, as the bottom is varied in character, it is recommended that anchored vessels lie to a long scope of chain whenever the weather is unfavourable.

Any vessel having anchored in the suggested anchorage area should immediately advise Aramco, via Radio HZY, the following information: (*a*) Time of arrival in the anchorage area (in GMT). (*b*) Approximate position in the anchorage area in relation to the North Pier. (*c*) Contact Aramco Terminal Planning Office by VHF radio Channel 14 or 16 if vessel is so equipped.

*Holding anchorage:* Due to the increase in the ship traffic and congestion in the Port of Ras Tanura, an area designed as a "Holding Anchorage" has been established outside of the port. When a tanker is nominated to load at Ras Tanura and the port anchorage is congested, the tanker may be instructed to proceed to the "Holding Anchorage" to await instructions and its turn for a loading berth. Normally, this procedure will only be instituted when a port anchorage is congested or will become congested and it is anticipated that the vessel will have an extended period.

The perimeter lines for the port of Ras Tanura "Holding Anchorage" join the following points:

| *Points* | *Latitude North* | *Longitude East* | *Directions* |
|---|---|---|---|
| 1 | 27° 04′ 30″ | 50° 14′ 00″ | East to |
| 2 | 27° 04′ 30″ | 50° 17′ 00″ | South to |
| 3 | 27° 02′ 30″ | 50° 17′ 00″ | West to |
| 4 | 27° 02′ 30″ | 50° 14′ 00″ | North to Point 1 |

The area designated as the Ras Tanura anchorage for tankers is also being expanded. The new perimeter lines for the Ras Tanura tanker anchorage join the following points:

| *Points* | *Latitude North* | *Longitude East* | *Directions* |
|---|---|---|---|
| 1 | 26° 41′ 00″ | 50° 12′ 45″ | East to |
| 2 | 26° 41′ 00″ | 50° 14′ 00″ | South East to |
| 3 | 26° 37′ 45″ | 50° 15′ 15″ | West to |
| 4 | 26° 37′ 45″ | 50° 11′ 15″ | North East to Point 1 |

**MAX. SIZE:** Vessels up to 250,000 dwt. (part-cargo) have been handled. Departure channel 69 ft. ISLW – see "Approaches". Water depth at Sea Island berths is a minimum of 85 ft. at ISLW, but depth of water in departure channel and not depth of Sea Island berths limits the draft of vessels calling at Ras Tanura.

**HEALTH:** A modified Radio Pratique procedure is in use. Vessels supplying requested quarantine information can be berthed on arrival and proceed with normal loading operations prior to arrival on board of quarantine officer. Vessels failing to supply information will be delayed at anchorage until cleared by quarantine officer. Extensive delay can be incurred by vessels failing to supply requested information promptly. Quarantine information (see "Radio") must be received prior to berthing. In accordance with international practice, quarantine signals must be displayed by all vessels when approaching Ras Tanura. These signals shall be displayed continuously until pratique granted. These signals are: Sunrise to sunset, quarantine flag. Sunset to sunrise, Signal lights, red over white.

Quarantine officer may board vessels awaiting berth in prescribed anchorage area; however, vessels proceeding directly to a berth at one of the piers will be boarded at the pier after being tied up. Pier personnel are normally allowed on board prior to arrival of quarantine official. Vessels at anchor awaiting berth should not rig an accommodation ladder, but instead should provide a safe pilot ladder in good repair, properly secured. At night, the pilot ladder must be adequately lighted.

**RADIO:**

(*a*) Station. Aramco owns and operates marine radio station call letters HZY, maintained for transacting company business with "in-or-outbound vessels" and is open 24 hours daily. Station HZY will also accept and forward messages concerning ship's agency matters to Agents. However, agency messages to Masters are not permitted. No charge for either incoming or outgoing messages. Marine transmitting antenna of HZY located at Latitude 26° 18′ 36″ North, Longitude 50° 07′ 12″ East.

Due to its inland location Masters strongly advised *not* to use this antenna for radio direction-finding purposes since inaccurate bearings will be obtained due to coastal refraction.

(*b*) Messages. All vessels must endeavour keep HZY fully advised regarding estimated times of arrival at Ras Tanura, as well as times of actual arrival and position in anchorage. It is required that vessels provide HZY with a minimum of three notices of ETA information at about 72, 48 and 24 hours "steaming time" from Ras Tanura. Shorter notices may result in berthing delay. If loading part cargoes at other Arabian Gulf ports prevents a vessel from furnishing an accurate ETA, steps should be taken to dispatch a message either direct or through ship's Agent giving best estimate possible at the time. This message should then be followed by an accurate ETA immediately upon departure for Ras Tanura. Failure to give at least 24 hours notice will result in an addition to allowable laytime in the event a demurrage claims is filed against Aramco.

Upon first contact with an inbound tanker, HZY will transmit the following two standard messages of 181 and 50 words:

181 word message
Master Rastanuraradio/HZY
Contact HZY soonest advising one ETA GMT Rastanura two any later changes three Agent's name and requirements four arrival departure draft fore and aft five arrival displacement tonnage six deballasting hours seven maximum loading rate fullstop vessel urged to accept highest possible loading rate stop vessels loading cargo advise previous cargo and if cargo or residue aboard to be commingled with Rastanura cargo fullstop if VHF aboard call Aramco terminal planning for berthing instructions when 100 miles out on 156·8 Channel 16 or 156·7 Channel 14 stop if no VHF aboard contact HZY 500 kHz and copy traffic lists on odd hours for berthing instructions stop on arrival anchorage advise HZY official readiness time and position relative North Pier stop radio messages without charge fullstop Pilots require sufficient clean ballast for manoeuvring and will board in anchorage for mooring stop recommend propellers almost covered and trim limited to 15 ft. stop have gangway ready stop all tanks and lines must be gas free prior loading white products fullstop suggest copy HZY traffic lists several days after departure.
Aramco

50 word message
Master Rastanuraradio/HZY
Please advise any epidemic diseases or illness on board and status of crew's International Certificates of Immunisation and all ports called past thirty days also destination stop Agent stop flag stop net registered tonnage stop vessel will not be allowed to berth until this information is received.
Aramco

It is important that you send a reply to the above two messages soonest after receipt.

(*c*) Traffic list transmitting times and frequencies of HZY are as follows:

Transmits on 12811·3 kilohertz (kHz) on even-hours GMT from 0600 to 1600 GMT, and on 8480 kHz on even-hours GMT from 1600 to 0600 GMT.

Listens on 12 megahertz (mHz) and 8 mHz bands after traffic list transmissions until all calls have been cleared.

Also transmits on 16960 kHz from 0500 to 1300 GMT and picks up calls in the 16 mHz band.

Transmits on 430 kHz on all odd-hours GMT after callup is made on 500 kHz.

Ras Tanura local time is GMT plus 3 hours.

N.B.—To facilitate contacting a vessel after departure, it is suggested that vessels copy HZY traffic lists for several days after leaving Ras Tanura.

(*d*) Weather. Weather advice, hydrographic notices and traffic lists are "dualled" on 430 kc and 8,480 kc at 0430 GMT and again on 430 kc and 12,811·3 kc at 1630 GMT. It is requested that all vessels forward their local weather observations to this station, either in code or plain language, to assist in preparation of the Arabian Gulf forecasts. No charge for the incoming traffic or for weather observations from vessels.

(*e*) Agents. Messages to ship's Agents are handled by HZY, free of charge. However, the shipping Agents are not permitted to use HZY for outgoing traffic. Address message to Aramco and indicate Agent's name as the first words of text.

(*f*) Beacon. An aircraft radio beacon, call sign RT, which transmits on 335 kc is located at Latitude 26° 37′ 36″ North, Longitude 50° 09′ 47″ East.

(*g*) VHF/RT/VHF radiotelephone Channels 13, 14, and 16 are available for ship-to-shore communication at Ras Tanura. Channels 13, 14, and 16 are monitored 24-hours-a-day in the Aramco Terminal Planning Office which is located in Dhahran, approximately 25 miles South of Ras Tanura. Harbour Pilots can be contacted on Channels 14 and 16. VHF equipped vessels should try to contact the Aramco Terminal Planning Office when they are within 100 mile range of the port and while at anchor. Use of VHF while alongside the oil piers to contact the Aramco Terminal Planning Office, Pilots, or Agents is permitted.

HZY will, on request via CW, utilise voice radio, transmitting 4372·4 and 8780 kHz and receiving in the 2, 4, 8, and 12 mHz bands.

(*h*) Radio Silence. The main wireless and radar equipment of a ship must not be operated while the vessel is alongside oil pie Use of VHF while alongside the oil piers to contact Aramco Termin Planning Office, Pilots, or Agents is permitted.

**TUGS:** Under normal operating conditions, no tow-boat or oth craft is to come alongside any vessel before Harbour Pilot boar vessel. Should Harbour Pilot deem assistance of a tug to be nece sary, he will give proper signal. Ship's personnel must not sig for tugs or boats to come alongside except as directed to do so the Pilot. Mooring and unmooring assistance is provided by die tugs, which are regularly stationed in immediate vicinity of pie At present no charge is made for these tugs when employed in no mal mooring and unmooring operations, but a charge is made additional or unusual services. Tugs are fitted with fire pumps a water/foam monitors to assist in fighting fires.

Aramco operates three 4,000 h.p. tugs, bollard pull capacity 65 tons each, three 2,000 h.p. tugs with bollard pull capacity of 35 to each, and one 1,600 h.p. tug with bollard pull capacity 29 tons.

**BERTHING:** Harbour Pilot will direct the manoeuvring of t vessel to the assigned berth. Berthing draft should be sufficient immerse or almost immerse the propeller, with a maximum of 10 stern trim. Full power and manoeuvrability should be available.

*(a)* Turn. Incoming ships are assigned berths in accordance wi time of arrival, product to be loaded, size of vessel, and loaded dra Vessels loading crude oil or crude blends will normally be assign berths as follows: Below 60,000 dwt. Usually assigned to North Pi (or South Pier in case of some refined products). 60,000 to 100,0 dwt. May be assigned either to North Pier or Sea Island dependi on berth availability. Above 100,000 dwt. Usually assigned to Se Island. Endeavour is made to berth vessels immediately upon arri and Master should maintain radio contact with station HZY. If n berth available, vessels to anchor in prescribed anchorage an maintain radio contact with station HZY or Ras Tanura Port Contr office by VHF radio frequencies listed under "Radio".

(*b*) Ballast. Storage space is extremely small for dirty ballast an residue. Prior clearance must be arranged for discharge of reclaime oil or dirty ballast ashore. The Sea Island does not have facilities f handling this material. Aramco strongly recommend the "Loa on Top" procedure wherein such residues are commingled wi crude cargo whenever possible and that new vessels be built wi ballast system independent of cargo tanks. A separate ballast syste shortens time in port by about 5 hours. Vessels should arrive wi minimum clean ballast to enable manoeuvring under prevailin weather conditions. Masters are encouraged to take advantage the favourable weather which prevails much of the time, particular during summer and fall months, to minimise ballast in order reduce turn-around time. Masters should maintain radio contac with HZY or ship-to-shore communication by voice radio in orde to obtain latest weather information and advice on appropria ballast. Aramco particularly interested in having vessels comple deballasting promptly after berthing order minimise time at bert Simultaneous loading and deballasting is encouraged on proper equipped vessels. Vessels requiring excessive time to comple deballasting will be given Letters of Deficiency. To avoid an possible pollution of local waters, all tankers calling at Ras Tanu to load must do necessary tank cleaning prior to arrival. Prior arriving at a loading berth Masters must assure themselves that tanks, pipe-lines, and pumps are free of oil. All tank cleaning mus be done East of 52nd meridian. Regulations in this regard strict enforced to protect local fishing and pearling and reduce fire hazards If, after arriving alongside, a vessel is found to have oil ballast wate on board, it will be sent to sea to accomplish necessary tank cleanin A new notice of readiness to load must then be given.

(*c*) Gangway. All vessels required to furnish their own gangwa which should be made "ready" prior to berthing at North or Sout Pier. At the Sea Island, Aramco can furnish a gangway in som berths.

**OIL LOADING PIERS:** There are two "T" head piers (piers projec from Eastern face of peninsula and are commonly referred to a South Pier and North Pier) and a Sea Island.

*(a)* South Pier. Designed to handle T-2 class tankers. Ships up t 25–30,000 dwt, are efficiently handled. An 8 ft. tide permits som flexibility in loading. Ships up to 35,000 dwt. will be topped off an unberthed on rising tide. The pier is mainly used to load refine products and has one 15,000 b.p.h. crude loading system to servic small crude ships. South Pier connected to peninsula by causewa and trestle, 2,300 ft. in length. Pier has four berths and is 1,200 f long and 105 ft. wide. Depths South Pier as follows: Berth 1, 33 f at ISLW; Berth 2, 33 ft. at ISLW; Berth 3, 33 ft. at ISLW; Berth 32½ ft. at ISLW.

(*b*) North Pier. This pier handles mainly crude shipments wi loading rates up to 60,000 barrels per hour. Some refined product as well as refrigerated propane and butane are also available. Th berths were designed for 45,000 dwt. tankers; however, vessels i excess of 100,000 dwt. have been safely handled, berthed and loade with sufficient attention given to approach velocities and tid conditions. North Pier located about 3/4 mile to North of South Pie and has causeway and trestle that extends some 3,600 ft. from th peninsula. Pier is 2,200 ft. long and 110 ft. wide, and comprises s berths. Depths North Pier as follows: Berth 6, 48 ft. at ISLW; Berth 42 ft. at ISLW; Berth 8, 50 ft. at ISLW; Berth 9, 48 ft. at ISLW; Ber 10, 50 ft. at ISLW; Berth 11, 50 ft. at ISLW.

(*c*) Sea Island. Located about 5,600 ft North-east of the North Pie The Sea Island has eight berths in service. Sea Island No. 4, bert 19 and 20, the largest of these off-shore loading installations wi four hydraulic crude oil loading arms, was inaugurated on 9th December, 1972. Berths 12–17 are capable of routinely handling vessels up to 200,000 dwt. Berth 18 is designed to handle vessels between 65 and 400,000 dwt. Larger vessels can be berthed under special conditions. Depths Sea Island as follows: Berth 12, 85 ft. at ISLW; Berth 14, 85 ft. at ISLW; Berth 15, 85 ft. at ISLW; Berth 16, 85 ft. at ISLW; Berth 17, 85 ft. at ISLW; Berth 18, 85 ft. at ISLW. Each island, or pair of berths, consists of four mooring dolphins and a platform with four breasting dolphins on each side. Length of Sea Island No. 1 (Berths 12 and 14) is 1,250 ft. whereas length of Sea Islands No. 2 and 3 (berths 15, 16, 17, and 18) is 1,400 ft. and length of Sea Island Berth No. 4 (Berths 19 and 20) is 1,750 ft. each between outer mooring dolphins. Sea Island facility equipped with eight submarine crude loading lines having a combined capacity of 680,000 b.p.h. and one bunker fuel line having a capacity of 7,500 b.p.h. and one black diesel oil line having a capacity of 400 b.p.h. Prevailing wind is from a N.N.W. quarter. Sea Island design is for berthing of ships at wind velocities up to 30 m.p.h. and wind pressure of 5 pounds per square foot on pier structure, and 3 pounds per square foot on vessel.

(*d*) West Oil Pier. A small oil-loading pier with maximum water depth 32 ft. Located on West side of peninsula. However, the departure channel is presently limited to 16 ft. at ISLW. Pier is used for fueling small craft and loading coastal tankers. Vessels taking cargo subject to same safety regulations applicable to other piers.

**MOORING:**

1. Full power must be available for manoeuvring to and from wharves.
2. An Aramco Pilot will pilot vessel to berth assigned.
3. All manoeuvring in vicinity of, or at piers, will be under supervision of an Aramco Pilot.
4. Aramco tugs will assist in mooring and unmooring.
5. All tank tops, ullage plugs and sighting ports will be closed before berthing.
6. Vessel's Master must notify the Pilot of any special conditions, difficulties or peculiarities such as defective equipment, lines or gear which might impose special hazards in connection with handling mooring or loading of vessels.
7. Steering gear, engine-room telegraph, whistle and all navigational equipment must be tested before any manoeuvring to or from piers is started.
8. Pilot will decline to moor vessel with unsatisfactory equipment, lines, gear, etc.
9. Aramco will loan additional mooring lines if Pilot deems them necessary.
10. Vessels must be moored to entire satisfaction of Pilot.
11. Vessels must be ready to put out more lines as required by weather changes or at request of Pilot or oil-loading personnel.
12. Winches must be ready at all times for immediate use.
13. Except in emergency, no mooring lines will be let go without permission of the Pilot.
14. While alongside wharves, maintain engines and propulsive machinery ready at all times to leave wharf on short notice under full power.
15. No repairs are permitted that will delay or interfere with this manoeuvring.
16. Non-compliance with 13 and 14 constitutes a serious safety hazard. Any towage and delay resulting from non-compliance will be for vessel's account.
17. If fire or other grave emergency occurs or danger appears imminent on either the vessel or pier, do not await arrival of Pilot–immediately let go mooring lines and personally remove vessels from pier in such manner as to best avoid damage to pier or other vessels.
18. Upon completion of loading and/or bunkering and immediately after disconnection of hoses, vessel must leave berth and await clearance in stream.

*Note:* Most vessels will be loaded using all-metal Chiksan arms. The use of nylon or other highly elastic line is prohibited. Mooring lines should be checked frequently and kept tight to prevent excessive movement of vessel in berth. All vessels moored with automatic tension winches shall set manual brakes on these winches. Pier crews on duty continuously to handle oil hoses/arms and mooring lines. Mooring lines on board vessels will not be handled by Aramco personnel. All loading connections equipped with electrical insulating flanges. Therefore ship-to-shore bonding cables are not used.

**LOADING:** A commonly-used design criterion for tanker loading rates is as follows:

Loading rate in barrels per hour equals dead weight tonnage of vessel (bph. equals dwt.). This rate results in loading a vessel in 7 to 8 hours.

This criterion can be achieved for vessels up to 60,000 dwt. at the North Pier, for vessels up to 90,000 dwt. at Sea Island berths 12, 14, 15 and 16 and for vessels up to 120,000 dwt. at Sea Island berths 17 and 18. With the installation of the fourth 16 in. loading arms in berths 15 and 16, the maximum loading rate at these berths will also increase to about 120,000 bph. Achieving these loading rates will depend upon availability of loading systems, whether vessel's manifold permits connecting all the arms at a berth, and the loading rate at which excessive arm vibration begins to occur.

*Note:* Diurnal tidal rise approximately 8 ft. at spring and 5 ft. at neaps. If at any time a ship's draft approaches to within about 3 ft. of the depth of water at the berth, loading will be suspended until an incoming tide increases the depth to permit resumption of loading and provide for safe draft of the fully loaded ship on departure.

(*a*) Loading Rates. Following table shows products available at each berth and nominal loading rates:

| *Cargo* | *Available at Berths* | *Barrels per Hour* |
|---|---|---|
| Crude oil | 12, 14, 15, 16, 17, 18, 19, 20 | 40,000 to 280,000 |
| Crude oil | 6, 7, 8, 9, 10, 11 | 15,000 to 90,000 |
| Crude oil | 1, 2, 3, 4 | 12,000 |
| Fuel oil | 6, 7, 8, 9, 10, 11 | 12,000 to 22,000 |
| Fuel oil | 1, 2, 3, 4 | 12,000 to 22,000 |
| Black diesel | 1, 2, 3, 4 | 5,000 |
| White diesel | 8, 9 | 12,000 |
| White diesel | 1, 2, 3, 4 | 8,500 to 15,000 |
| Gasoline | 1, 2, 3, 4 | 6,000 |
| Kerosene (see X-2-34) | 1, 2, 3, 4 | 6,500 |
| Jet fuel (see X-2-34) | 1, 2, 3, 4, 8, 9 | 10,000 |
| Bunker fuel oil | 1, 2, 3, 4 | 5,000 |
| Bunker fuel oil | 6, 7, 8, 9, 10, 11 | 5,000 |
| Bunker fuel oil | 12, 14, 15, 16, 17, 18, 19, 20 | 7,500 |
| Bunker diesel | 1, 2, 3, 4 | 1,400 |
| Bunker diesel | 6, 7, 8, 9, 10, 11 | 1,200 |
| Bunker diesel | 15, 16, 17, 18, 19, 20 | 400 |
| Refrigerated LPG | 6 | 8,000 to 28,000 |
| Naphtha | 6, 7, 8, 9 | 15,000 |

Products can be loaded simultaneously at the respective berths if shown above as being available. It is expected that most ships will be able to receive any cargo, except crude oil, as fast as it can be delivered. Officers in charge of loading must have due regard for all safety precautions as well as for individual ship hazards. If loading of crude oil or products is too slow, Aramco will so advise the vessel. Should a demurrage claim be filed against Aramco the slow loading may result in an addition to allowed lay time.

To prevent ignitions by static electricity the loading rates for kerosene, jet fuel and similar white products will be reduced.

(*b*) Responsibility. All operations in connection with starting of loading, discharging, switching tanks and topping off must be directly and personally supervised by a ship's officer. Upon completion of loading vessel will normally be required to leave berth immediately after disconnecting hoses/arms to await clearance in tanker anchorage.

(*c*) Manifold Connections. Since most tankers have manifolds located near midships, the berths at Ras Tanura are designed accordingly. Aramco recommend midship manifolds for all vessels loading at Ras Tanura. Cargo loading arms at the North Pier have 12 in. and 16 in. standard 150 lb. ASA raised face flanges. The two refrigerated LPG loading arms at North Pier Berth 6 have 12 in. and 8 in. standard 150 lb. ASA raised-face flanges. Cargo loading arms at the Sea Island have 16 in. and 24 in. standard 150 lb. ASA flanges. Cargo loading hoses/arms at the South Pier have 8 in. standard 150 lb. ASA raised face flanges. All vessels calling at Ras Tanura should be equipped with reducing spools to fit these loading connections. These fittings should be in place prior to berthing to help expedite ship turnaround time.

(*d*) Refrigerated LPG. Facilities for loading Refrigerated LPG located in Berth 6. LPG loaded at approximately —40°F. for propane and 30°F. for butane. Maximum loading rate 8,000 bhp. for butane and 20,000 bph. for propane for simultaneous loading through separate systems. Ships arriving for Refrigerated LPG cargo should have cargo tanks chilled to desired temperature upon arrival. Before loading can start the atmosphere in cargo tanks must be too rich to explode, as shown by a combustible gas indicator, or must contain less than 9 per cent oxygen. RLPG loading facilities consist of following:

(i) Two 22-in. insulated loading lines each with a 6-in. liquid return line from pier to storage tanks. 4,800 ft. lines manifolded to permit loading propane in one, and butane in the other simultaneously.

(ii) Two PCMA Chiksan loading arms, one 8-in. and one 12-in. The arms are 9 ft. 5 in. centre to centre and are located about 11 ft. 6 in. from ship's rail (12-in. arm is on the North side). The 48-ft. long arms designed for maximum operating elevation of 61·5 ft. above ISLW. Arms equipped with 150 lb. USAW raised face flanges. The 8-in. and the 12-in. arms manifolded to permit propane or butane loading through either arm. Using 12-in. arm propane can be loaded at rates up to 17,500 bhp. of —40°F. (20,000 bhp. equivalent 60°F. liquid). Alternatively butane can be loaded through same arm at rates up to 10,000 bhp. of +24°F. liquid (10,000 bhp. equivalent 60°F. liquid). Using 8-in. arm propane or butane can be loaded at rates up to 8,000 bhp. of —40°F. $C_3$ or +24°F. $C_3$.

(iii) One 20-in. ship-to-shore LPG vapour return line with 12-in. hose connection to ship's vapour manifold. The 12-in. vapour return riser is located 9 ft. North of 12-in. LPG loading arm.

(*e*) Blended Cargoes.

(i) Fuel/Crude. If vessel's draft permits, a full cargo of fuel or a split cargo of fuel and crude can be loaded at the North Pier. In the latter case vessel design should permit simultaneous loading of both fuel oil and crude. The maximum fuel oil loading rate on the North Pier is 25,000 bhp. No facilities to load fuel oil cargoes at Sea Island. However, fuel portion of split cargo could be loaded at North Pier after which vessel would be shifted to Sea Island to load crude portion. Bunker "C" fuel oil is available at Sea Island at rates up to 7,500 bph, metered.

(ii) Crude/Crude Blends. Many large vessels calling at Sea Island load two or more segregated parcels of crude and/or crude blends. Order assure satisfactory loading rates under these conditions, the piping arrangements aboard vessels should be such as to permit loading each parcel consecutively, at rates of 60 mbph., through two or three 16-in. Chiksan arms, Simultaneous loading of another non-blended crude is possible if ship's manifolding allows this.

(iii) Commingled. A 60 mbh. blender is used to supply blends of crude oil/products/LPG to both North Pier and Sea Island. A 30 mbh. blender is used to load blends at North Pier only. Both blenders required full time to load blends containing LPG where homogeneity is critical. Blends that do not contain LPG not required to be homogeneous during loading. Therefore whenever possible Aramco use "batch blend" method, sometimes referred to as "commingling" or "ship board blending". Blenders used to supply Sea Island with blends containing naptha.

(iv) Spiked Crude. Blends of Arab Light and Arab Medium crudes and LPG are commonly referred to as spiked crude. Order assure that boiling mixtures are not delivered to a ship at any time, blend vapour pressure calculations are made prior to each loading taking into consideration such factors as crude vapour pressure, LPG vapour pressure, and blend temperature. LPG and crude stream rates carefully controlled in In-line Blender and spiked crude blend continuously monitored by a Hallikainen Vapour Pressure Analyser so as to at no time exceed a Reid Vapour Pressure of 13 lb. or a True Vapour Pressure of 14.7 psia. For the amount of vapour to be vented, a non-boiling mixture with a True Vapour Pressure equal to atmospheric pressures will have only about 10–20 per cent more than for a stabilised crude of 4–5 lb. RVP.

(*f*) Loading Arms/Pressure.

(i) Piers. Chiksan loading arms used extensively for loading crude, crude blends, bunkers, and refrigerated LPG at Ras Tanura over North Pier. Hoses used at South Pier and for occasional product and bunker loading at North Pier. North Pier has six berths handling vessels up to 150,000 dwt., equipment as follows: Type of Arms: Chiksan HMLA* arms for crude oil, crude blends, and bunkers; Chiksan PCMA** arms for refrigerated LPG (one 8-in. arm and one 12-in. arm – both at North Pier berth 6). Number and Size: Most North Pier berths have four 12-in. arms per berth for cargo with an additional 8-in. or 12-in. arm for bunkers. The bunker arm is located South (aft) of cargo arms (except for 11 berths where arm located North of cargo arms). One berth (No. 8) has 12in.- arm for loading white products (located North of cargo arms) and three berths (Nos. 6, 8, and 9) each have a 12-in. arm in dual service for fuel oil cargoes or bunkers. Berths 8, 9, 10 and 11 each have two 12-in. arms through which fuel oil cargo can be loaded. Spacing of Arms: All arms on North Pier with exception of LPG loading arms are spaced 66 in. apart, centre to centre. Capacity: Each 12-in. arm has a capacity of 15.000 barrels per hour. The point at which vibration of arm and ship's manifold becomes excessive limits loading capacity. Flanges: All 12-in. arms have 12-in., 150 lb. USAS raised face flanges. All 8-in. arms have 8-in. 150 lb. USAS raised face flanges.

* HMLA – Hydraulic Marine Loading Arm.

** PCMA – Pantograph-Counterweighted Marine Arm.

(ii) Sea Island. Double Counterweighted Marine Arms. Number of Arms: Sea Island berths 12 and 14 have three 16-in. arms for cargo and on 10-in. arm for bunkers in each berth. Bunker arm located South (aft) of cargo arm in each berth. A hose length is used if vessel bunker connection is forward of manifold. Sea Island berths 15 and 16 have four 16-in. Chiksan cargo loading arms. Berths 17 and 18 have four 16-in. cargo loading arms. Two loading arms in berth 18 are 72 ft. long. All other loading arms 60 ft. long. Two 10-in. bunker arms (one on each side of the cargo arms) provided in each of these four berths. Berths 19 and 20 are each equipped with four 24-in. crude loading arms and two 16-in. bunker arms and are limited to ships of 150 mdwt–500 mdwt sizes. Spacing of Arms: All arms on Sea Island spaced on 11 ft. centres. This large space required to permit rotating travel of counterweights. Elevation of Arms: Sixty-foot arms designed for maximum operating elevation of 72 ft. above ISLW whereas 72-ft. arms operate 97 ft. above ISLW. Capacity: Capacity of each of 16-in. arms is 30,000 barrels per hour. Actual capacity limited by vibration – thus ship's manifold design should be adequate and well supported. Flanges: Flanges on 16-in. arms of Sea Island berths 12 and 14 are 16-in, 150 lb. USAS *flat* faced. Flanges on 10-in. arms of Sea Island berths 12 and 14 are 10-in., 150 lb. USAS *flat* faced. Flanges on 16-in. and 10-in. arms of Sea Island berths 15–18 same as above except that they are *raised* face. An alarm sounds when pressure in loading arm reaches 100 psig and pier operator shuts down loading. A motor-operated valve upstream of loading arms is throttled during "topping-off" operations to prevent over-pressuring. In addition to alarm which sounds when loading system pressure reaches 100 psig at Sea Island, loading pumps shut down automatically when pressure reaches 125 psig. This feature does not protect against high surge pressures associated with sudden shut-off against a high loading rate. Loading rate control is by means of an hydraulic coupling between pump and motor of each loading system. Speed of pump (and thus loading rate) is remotely controlled from Sea Island. Push button controls at loading arms and in control room shuts down loading pumps and closes a motor-operated valve in loading line. Pump discharge pressure on shore is 150 psig. Pressure at ship's manifold depends on size and number of ship's lines, number of tanks being loaded, loading rates, etc. Aramco design basis is for pressure of 30 psig at ship's manifold when load at 75,000 barrels per hour through Chiksan arms. Aram recommend this same ship's manifold pressure for hig rates, also.

(*g*) Valves. Calculations indicate valves closing in *less than seconds* when loading at high rates will cause excessive surge pre sure and will possibly damage Chiksan arms and ship's load manifold. Aramco strongly recommend that hydraulically control valves be adjusted to close in no less than 30–40 seconds. Sever ships which have called at Ras Tanura have hydraulically opera valves in their cargo handling systems which close in 5 to 10 secon Closure of valves in 5 to 10 seconds while loading at high rates w result in momentary surge pressures well above pressure rating ship's loading system fittings and maximum pressure rating Chiksan arms. Aramco presently limits loading rate of ships equ ped with fast closing hydraulic valves. As an example, ships w valves capable of closing in 10 seconds would be limited to loadi rates of 22,000 bph. per system.

**MEDICAL:** When necessary, Master may obtain medical atten for ship's personnel from port doctor (quarantine officer), who m in the case of serious illness or injury recommend treatment Dammam Government Hospital, Government or private clinics Ras Tanura, or Al-Sharq hospital in Al-Khobar. Port doctor ordi arily will treat minor illness or injuries on board ship. A charge made for medical attention or supplies furnished by port doctor other private sources. Medical facilities of Aramco made availab in emergency only when referral is warranted medically. A charge made for medical attention or supplies furnished by the Compa Aramco radio station, HZY, may be used without charge by vesse at sea to obtain medical advice at any time.

**WATER:** The natural well water obtainable in Ras Tanura is qu brackish and is used mainly for washing. Well water obtainable all berths on North and South Piers at a rate of 50 tons per hou Water is not available at Sea Island. Vessels will be supplied w well water usually up to a limit of 100 tons at a cost of approximate $1.25 per ton. Distilled water also obtainable at all berths on Nor and South Piers, at a rate of 20 tons per hour, but supply usua limited to 25 tons per vessel. The cost is $4.00 per ton. No water bunkering barges in port of Ras Tanura.

**FUEL:** The maximum viscosity of fuel oil bunker is 60 SF at 122° The maximum viscosity of black diesel bunker is 55 SU at 100° About 72 hours advance notice is needed for large lifting of thes fuel grades.

*It is recommended that vessels taking bunkers only, call at Ra Tanura prior to loading cargo elsewhere. By following this recommenda tion vessel will avoid delays caused by draft and berth assignme problems.*

Bunkering facilities are operated by Aramco. Failure of a ship t provide advance notice of bunker requirements could result in vesse delays. Majority of bunkering effected through temperature-com pensated positive displacement meters which record on print-ou forms the net barrels at 60°F. delivered. Galley fuel is available at a berths at the North and South Piers at approximately U.S. $34. per ton. Not available at Sea Island. Lubricating oils availab in limited drum quantities if ordered in advance by letter or radi through ship's Agent.

Sea Island. One 20/22 in. line supplying bunker "C" bunkers up t a maximum of 7,500 barrels per hour. Bunkering is simultaneous wi cargo loading. A diesel supply line (black diesel) has been extende to berths 15 and 16 of Sea Island for bunkering vessels when alon side to either one of such berths.

In addition to bunkering facilities at berth, Aramco operates 20 mdwt bunkering vessel *Lina Christensen* stationed in strea Available products and amounts are:

| | |
|---|---|
| Bunker | 15,000 tons |
| Black diesel | 2,600 tons |
| White diesel | 1,400 tons |

Raw water and sweet water are available from *Lina Christense* in limited quantities.

**SAFETY:** Master should acquaint himself with Aramco's safe regulations, and obtain copy of regulations from terminal represe tative. Port of Ras Tanura maintains vigorous tanker loading safe programme. Arabian American Oil Company is a member of Inte national Oil Tanker Terminal Safety Group (IOTTSG) and as suc follows procedures recommended by this international organisatio Each ship's Master is presented a "Declaration by Master" by pie safety representative who discusses each item in detail with Maste Prior to start of loading cargo and at several times during loadin pier safety inspectors will personally visit vessel and, in compa with one of ship's officers, will check to ensure that safe loadin practices being observed by both ship and shore.

Hydrogen Sulphide Hazards: Aramco crudes may contain di solved hydrogen sulphide in concentrations which would cause th gases vented during tanker loading to be hazardous if inhale Aramco recommend that Masters review instructions issued b Owners/Charterers about hydrogen sulphide hazards. If loading o $H_2S$ bearing crude oil is not covered by such instructions, Aram has available, upon request, a list of recommendations to aid Mas ters.

Signals for Emergency: (*a*) Ship should sound an "Emergen Stations" signal consisting of a continuous ringing of ship's alar bells supplemented by a series of short blasts of ship's whistle o siren. (*b*) Telephone is fitted on jetty. Normally, Aramco perso will telephone for assistance. If no Aramco personnel availab ship's personnel may call for emergency assistance by dialing te phone number 3100 from any berth. (*c*) Assistance can be summone on VHF radio if necessary. Use International Channel 16 on VHF

Give location and extent of assistance required. (*d*) Shore signal in event of an emergency is either a fire siren or a series of short blasts on an alarm or horn.

**CUSTOMS:** All materials to be either exported from or imported into Saudi Arabia subject to examination by Customs authorities. Importation of certain articles is strictly prohibited. Such articles include: alchoholic beverages, including beer and wines; explosives; firearms; implements of war of any kind, including antiques; religious matter not pertaining to the Moslem faith; playing cards and gambling devices; narcotics. Trafficking in these items between ships also is strictly prohibited. This applies to ships at anchor as well as to ships at piers. Almost without exception, all other commodities subject to close examination and to Customs Duty if imported. Saudi Arab Government discourages trafficking between members of ship's crews and shore personnel.

**CONSULS:** United States Consulate General established at Dhahran, about 50 miles by road from Ras Tanura. British Political Agent established on Bahrain Island. It is very difficult, however, to contact Bahrain Island from Ras Tanura, and Masters having business there usually arrange to call at port of Sitra.

**REPAIRS:** Relatively limited repair service available from local business concerns. Aramco will assist in making emergency repairs on vessels only if approved by Aramco Marine Superintendent or Port Captain. Suggested that Master discuss repair charges with ship's Agent prior to authorising or requesting any repair work. Deep sea divers, operating from modern and well-equipped diving boats, available under same conditions as repair services. When alongside Aramco piers, vessels must maintain engines and propulsion machinery in readiness to leave the pier under full power on short notice. No repairs permitted which would interfere with this requirement. Violation of this rule will entail towage from the berth at the vessel's expense and Aramco will not accept responsibility for the resulting delay to the vessel.

**REPATRIATION:** Arrangements can be made through ship's Agent. All crew leaving or joining vessel require valid passport or Saudi Arabian visa.

The following countries are considered cholera-infected areas: Burma, Cambodia, India, Indonesia, Laos, Nepal, Pakistan, Philippines, Singapore, Thailand, Vietnam.

All concerned persons, including regular passengers and crew members, must bring in a stool culture Certificate, and five-day stay in a cholera-free area Certificate, in addition to the usual Health Certificate, for entry into Saudi Arabia. Persons not possessing the above-mentioned Certificates will be denied entry by Immigration Authorities, and returned to the place of their embarkation.

**AIRPORT:** Ras Tanura terminal about 50 miles from Dhahran Airport, This airport is serviced by many international airlines.

**TIME:** Company generally bases local time on 45th meridian (3 hours East of Greenwich). In order to avoid any confusion all communications should be quoted in Greenwich Mean Time.

**HOLIDAYS:** Ras Tanura port operates 24 hours a day, 365 days a year, irrespective of holidays.

**EMERGENCY TELEPHONES:** Emergency (fire, serious injury), 3100; Port Control, 00–6216; Pilots' Office, 9195; Pier Foreman: North Pier, 7140; South Pier, 7161; Sea Island, 7152.

**SERVICES:** (*a*) Recreation Centre. Seaman's Recreation Centre located at shore end of South Pier causeway. The route to the centre and area itself is prescribed and no one should attempt to violate these limits, as Coast Guard personnel guard the route. Violators subject to arrest. Arrangements may be made through ship's Agent for launch transportation from North Pier. During limited hours, soft drinks and ice cream available at nominal cost. Motion pictures, games, and a barber shop also located at this facility. (*b*) Provisions. Ship's chandlers available through ship's Agent at piers, but are not allowed to board vessel. (*c*) Oil Inspectors. Oil inspection service maintained by following independent agencies: Charles Martin Inspectors of Petroleum Inc., 61 Broadway, New York, New York 10006; E. W. Saybolt & Co., S.A., 400 Swenson Drive, Kenilworth, New Jersey 07033; B. & R. Redwood, Orchard Lea, Winkfield, Nr. Windsor, Berks., England; U.S. Navy. (*d*) Surveyors. American Bureau of Shipping and Lloyds of London maintain a marine surveyor at nearby Manama on Bahrain Island.

**SHORE LEAVE:** Ship's personnel and passengers not permitted ashore for any purpose whatsoever until pratique granted. This regulation includes going to pier to read arrival draft. Personnel may go to pier if actually engaged in duties connected with discharging of ballast, loading, etc., but only after pratique granted. All shore leave contingent upon compliance with quarantine regulations. Direct transit to or from Seamen's Recreation Centre requires no special government approval. Centre is open to seamen usually between the hours of 1430 and 2230 local time each day (during summer months of May through September, Centre is open between hours of 1330 and 2130 local time.) Saudi Arab Government regulations strictly enforced, and if Masters have any doubts with regard to these regulations they are urged to consult their Agent. While in port, vessel's personnel under jurisdiction of Saudi Arab laws.

**POLLUTION:** Discharge into the sea of oil or oil-base products either alone or in combination with ballast water is not allowed. Since the terminal does not have facilities to receive any significant amount of oil residues or oily ballast water, tankers arriving along with such materials on board will be sent to anchorage to await further orders unless the vessel has prior clearance to load on top of such material or unless the ship's Master agrees to segregate such materials in a separate tank. Ships which release oil or oil residues including oily ballast water in either berth or anchorage area will be held responsible for all clean up costs.

Aramco vigorously observes, investigates and documents all cases of oil discharge to the sea and reports such releases to the Saudi Arabian Government in accordance with its requirements.

**VISITORS:** *Ras Tanura – Shipowners' Representatives requiring special permission for visits to port areas:* The Port Authorities in Ras Tanura and Dammam state that in the future they will strictly follow the regulations for the ports, stipulating that unauthorised personnel will not be allowed to enter the port areas under any circumstances.

This will also apply to temporary visitors, the purpose of whose visits partly might be to see the ports, e.g. shipowners' representatives. However, exceptions to this rule will be made, provided applications for special permits are sent to the port authorities in Dammam well in advance of the visit. As regards visits to the port area the shipowners must themselves apply for a permit with the head office of one of the Aramco parent companies, i.e. Chevron, Esso, Mobil, Texaco, etc.

**AUTHORITIES:** The Arabian American Oil Company, Dhahran, Saudi Arabia. Cable Address, Aramco, Dammam. Port Officials: Saudi Arab Government port authorities located in Customs House, Port Office, and Quarantine Office at Ras Tanura.

**AGENTS:** Mail Address: Gulf Agency Co. (Saudi Arabia) Ltd., Aramco Mail Box 621, Ras Tanura, Via Dhahran, Saudi Arabia. Telephones: 7118, 7190. Cables: "Confidence", Dammam. Due to slow cable communication, messages of any urgency should be sent via the telex of Bahrain office, telex: 211 Bahrain, Answer back: "Gacship 211", stating "For Ras Tanura". Radio: Vessels can communicate with SSB radio station, frequencies 3539 and 6910, call "Confidence Ras Tanura". For ship to shore communication Ras Tanura office is also equipped with VHF radio, call "Confidence Ras Tanura", on Channel 16, and switch to Channels 13, 6, 9, or 14 for communication.

## YEMBO (Yenbo): 24.05 N. 38.03 E.

**FLAG:** Saudi Arabian flag must be hoisted.

**LOCATION:** On Red Sea coast, about 218 nautical miles North of Jeddah.

**CHANNEL:** Ships entering port pass a channel of the following measurement: Length 1647 metres, width varying between 70 to 130 metres, width at entrance between beacons 310 metres.

**BEACONS:** 11 miles outside port, beacon at Al-Sharm. Height 23 ft. White flash every ten seconds. At entrance of port channel two beacons, height 15 ft. Starboard-hand beacon (black), green flash every second. Port-hand beacon (red), red flash every second.

795 metres from channel entrance on port hand is another beacon, height 15 metres (black and white squares), white flash every second.

**BUOYS:** Channel is buoyed with red and green port and starboard-hand buoys.

**PILOTAGE:** Compulsory. Vessels requiring Pilot should exhibit code flag or International light signal.

**DOCUMENTS:** All vessels calling Yembo should provide the authorities with the following:

*Passenger Vessels*

Certificate of Registry.

International Safety Certificate (issued and validated from one of the signatory states of the pact).

Radio-telegraphy Safety Certificate.

*Cargo Vessels*

Certificate of Registry.

Load Line Certificate.

Safety Construction Certificate.

Safety Equipment Certificate.

Safety Wireless Certificate for vessel of 1,600 tons dwt. or more

Safety Wireless and Telephone Certificate for vessels of 300 tons to 1,600 tons dwt.

Requirements of Cargo and/or Pilgrim Documents:

*For Doctor*

2 copies Passenger List – landing.

2 copies Passenger List – transit.

2 copies Crew List.

2 copies Declaration of Health.

*For Customs*

2 copies Passenger List – Landing.

2 copies Passenger List – Transit.

2 copies Crew List.

2 copies Ship's Bond (tobacco, spirit, wine and beer).

*For Immigration*

6 copies Passenger List – Landing.

*For Agents*

6 copies Passenger List – Landing.

1 copy Crew List.

Prior to the vessels arrival the following documents are required for translation and submission to the various authorities:

7 copies of the Cargo Manifests.

1 copy of Freight Manifest.

2 copies of Stowage Plan.

2 copies of Hatch List.

1 copy each non-negotiable Bills of Lading.

1 List of dangerous cargo whether for discharging or in transit.

**HEALTH:** All incoming vessels should abide by health regulations and present necessary documents to the authorities in accordance with international laws, i.e. as under: Q if the health condition is clean. QQ if there is a suspicious case in the vessel. QL if there is an infection or epidemic case on board.

**RADIO:** Until the implementation of a Beacon Station for navigation, all ships entering port before passing the channel should contact Port Department by radio/telephone during following times: 0500 to 0600 GMT; 100 to 1100 GMT; 1400 to 1500 GMT.

These are the decided times during normal days, but during the Hajj Season a new publication is issued to cover additional times.

**BERTHING:** The port has two quays built at right-angles. The Northerly berth is 170 metres long and the Easterly berth is 210 metres long. The depth is 28–29 ft. The port can accommodate 2 big and 1 small ship or 4 small ships. Turning circle is 360 metres.

Mobile cranes with a capacity of between 1 and 5 tons are available. There is also a supply of fork-lifts to meet with present port requirements. Discharge is mostly carried out by ship's own gear.

There are no barges at Yembo, but 70 native lighters (sambouks) with a capacity of between 5 to 80 tons are available. The total capacity of these native lighters is 1,034 tons.

**STEVEDORES:** Like Jeddah, stevedoring at Yembo, is based on daily paid basis. There are no stevedoring companies and labour is engaged on day to day basis.

There is one custom warehouse at the moment (at Easterly berth) which can accommodate about 10,000 tons of cargo. This shed is near quay and can receive cargo direct into shed from vessel.

**FRESH WATER:** Ships receive fresh water alongside quay and a 24 hours advance notice by the Master should be given. There are no facilities to supply water at anchorage.

**CUSTOMS:** Each crew member may have 200 cigarettes or ½ lb. tobacco, but all alcohol and wine, beer, etc., must be sealed. This applies to all persons on board. For each flask/glass/bottle containing alcohol found by the customs, there is a penalty of £100 sterling.

**SHORE LEAVE:** Passengers may only go ashore if they have a valid visa. Crew may go ashore if they have written permission from Master and leave their passports with passport office at the port.

**AGENT:** Head Office. Gulf Agency Co. (Saudi Arabia) Ltd., Shipsbrokers and Agents, POB. Airport Post Office, Dhahran, Saudi Arabia. Cables: "Confidence Dammam". Tel. 2441, 23425/26/27. After office hours. 22861–41742.

## ZULUF TERMINAL: 28.23 N. 49.14 E.

*Second Marine Terminal of Ras Tanura.*

**DOCUMENTS:** (See also Ras Tanura). All tankers which have called at Ras Tanura will have all EDP documents aboard and will have cleared quarantine. In this case, no further government formalities will be required. Seals placed on ship's stores at Ras Tanura must remain in place until the tanker has completed loading at Zuluf.

Those tankers which have not called at Ras Tanura will require appropriate clearance and must have Port Clearance Documents, Bill of Lading and Export Manifest aboard at time of departure.

This group of documents consists of:

1. Permit of Departure form in English which is filled out with information supplied by tankers in their quarantine radio message;
2. Port Clearance Application in Arabic which is filled out with information from the Permit of Departure form.
3. The official Saudi Arabian Government Port Clearance form in Arabic which must be filled out using the information from the Port Clearance Application.
   (Both the Permit of Departure (English) and Port Clearance (Arabic) forms are to be aboard the tanker at the time of departure).
4. Bill of Lading is an Aramco document. A supply of these forms will be maintained on the *F. A. Davies* and the required information will be typed in by the clerk prior to arrival of the loading tanker.
5. The Export Manifest is a Saudi Arabian Government document which is normally required.

The preceding documents will be filled out in advance using information received primarily from OSPAS (Aramco) via teletype and telephone. These documents will be carried aboard the loading tanker by the Mooring Master.

**IMPORTANT FEATURES:**

1. These facilities are located 37 miles off-shore in the Arabian Gulf. There are two SBM berths, one with a floating storage vessel permanently moored to it; the second is for loading tankers.

2. Aramco mooring Masters direct the mooring, unmooring and supervise the movement of all vessels in the vicinity of the loading facilities. Normally no charge is made for this service.

3. Safety rules are strictly enforced. Receipt of instructions must be acknowledged before a vessel will be berthed.

4. When vessels are scheduled to load cargo at both Ras Tanura and Zuluf, Aramco reserves the right to advise the vessel at which the loading pier shall start and finish while meeting the cargo nomination safely.

5. Aramco maintains a radio station (call letters HZY) for the exchange of messages wih ships. All incoming tankers should establish early contact with this station in order to transmit ETA data, etc.

6. Vessels should arrive at Zuluf with minimum clean ballast water to enable manoeuvring under prevailing weather conditions. Masters are urged to maintain radio contact with HZY or ship to shore communication by VHF voice radio in order to obtain the latest weather information.

7. The consumption of alcoholic beverages is prohibited within the Kingdom of Saudi Arabia. All alcoholic beverages are to be under lock and key during the vessel's stay.

8. Display of quarantine signals on approach to Zuluf must be maintained until pratique is granted. The flag of Saudi Arabia must be flown throughout the vessel's stay in port. Ships cannot berthed until the quarantine message has been received.

9. To permit more rapid ship turnaround, an early depar procedure is in effect. This service provides for a quick depar of the vessel after loading, without the necessity of waiting delivery of documents at anchorage.

**APPROACHES:** Zuluf is located in the Arabian Gulf in appr Lat. 28° 21′ N., Long. 49° 15′ E., in water depths ranging from 10 130 ft. Aramco's Floating Storage Vessel (*F. A. Davies*) is moored a SBM in this position with a SBM loading berth one mile away a South-Easterly direction. Both buoys exhibit flashing white lig and the *F. A. Davies* is well lighted during hours of darkness. A oil separator platform (GOSP) is located at Lat. 28° 23′ N., Lo 49° 12′ E. A flare from this platform should be visible from a co siderable distance depending on atmospheric conditions. The a between Lat. 28° 18′ N., and Lat. 28° 33′ N., and between Lo 49° 08′ E., and Long., 49° 45′ E., is an area with submarine pipe-lin drilling rigs and GOSP platforms in several locations. Ships shou navigate in this area with extreme caution and avoid anchoring ne pipe-lines.

**PILOTAGE:** A Mooring Master will board the loading tanker in t anchorage area about 2 miles South of the SBM berth. He will ca two portable VHF radio sets to be used while on board the vess for communications with the *F. A. Davies* and mooring boats. He w advise the Master on all manoeuvres relative to berthing, connecti and disconnecting the hoses.

Mooring equipment and other equipment supplied at Zuluf will lifted aboard the loading tanker from the mooring launch whi delivers the Mooring Master. Included are such things as spec mooring equipment to be used at the bow, various gaskets, bo tools, adaptor spool pieces (if required) and portable radios.

**ANCHORAGE:** The designated tanker anchorage is within lin joining:

(*a*) 28° 19′ 0″ N. 49° 13.5′ E.
(*b*) 28° 19′ 0″ N. 49° 15.5′ E.
(*c*) 28° 17.5′ N. 49° 15.5′ E.
(*d*) 28° 17.5′ N. 49° 13.5′ E.

The anchorage area ranges in depth from 15 to 20 fathoms. Holdi ground in this area is only fair.

Any vessel having anchored in the suggested anchorage ar should immediately advise Aramco, via Radio HZY, the followi information:

(*a*) time of arrival in the anchorage area in GMT;
(*b*) approx. position in the anchorage area in relation to the SB
(*c*) contact Zuluf by VHF radio Channel 16 if vessel is equipped.

**RADIO:** Masters are urged to maintain radio contact with HZY ship to shore communication by VHF voice radio in order to obta the latest weather information.

VHF Radio-telephone, Channels 12, 13, 14 and 16, are availab for ship-to-ship communications at Zuluf. Channel 16 is monito 24 hours per day aboard the *F. A. Davies*.

HZY will, on request via CW, utilise voice radio, transmitting 4372.4 and 8780 kHz and receiving in the 2, 4, 8 and 12 mHz bands.

Use of the high-frequency radio transmitter is not permitted whi vessels are moored at the SBM. Use of the VHF is permitted f contacting the *F. A. Davies*.

*Radio Messages:*

Upon first contact with a Zuluf bound tanker, HZY will transm the following two standard message of 218 and 50 words:

218 word message:

Master Rastanuraradio/HZ

Contact HZY soonest advising one ETA GMT Zuluf two any la changes three Agents name four arrival departure draft five d ballasting hours six maximum loading rate fullstop vessel urged accept highest possible loading rate stop advise if cargo or resid aboard to be commingled with Zuluf cargo fullstop if VHF aboa call Zuluf for berthing instructions when 100 miles out on 15 Channel 16 stop if no VHF aboard contact HZY 500 kHz and co traffic lists on odd hours for berthing instructions stop on arri Zuluf advise HZY giving official arrival readiness time to F. 50 word message:

Master Rastanuraradio/HZ

Please advise any epidemic diseases or illness on board a status of Crew's International Certificates of Immunization and ports called past thirty days also destination stop Agent stop fi stop net registered tonnage stop vessel will not be allowed to ber until this information is received

Aram

**PRATIQUE:** In accordance with international practice, quaranti signals must be displayed continuously until pratique is gran A modified Radio Pratique procedure is in use at Zuluf. Vesse supplying requested quarantine information can be berthed arrival and proceed with normal loading operation. Vessels fail to supply necessary information will be delayed at anchora

Extensive delays can be incurred by vessel's failure to supply requested information promptly.

**BERTH DESCRIPTION:** The SBM for loading tankers has a single flow system for crude oil designated for a flow rate of about 65,000 b.p.h. It is in approx. 124 ft. of water. The loading hoses consist of two strings of 24-in. underbuoy hoses 175 ft. in length from the two 30-in. undersea pipe-lines to the buoy and two strings of 24-in. floating hoses 1,050 ft. in length from the buoy to the loading tanker, each string terminating in three lengths of 16-in. hoses for connecting to the tanker's manifold.

**FLOATING STORAGE VESSEL:** The 228,000 dwt tanker *F. A. Davies* moored at SBM about 30 miles offshore in water depths of 130 ft. The storage vessel may move temporarily from its mooring in severe weather conditions. The storage vessel also acts as base for Pilots and production crews, and is provided with a helicopter platform.

**MOORING:** Mooring, and unmooring, connecting and disconnecting of cargo hoses is to be performed by the crew of the loading tanker under the supervision of the Mooring Master. Communications between the Mooring Master and his assistant or the chief mate will be by means of portable VHF radio-telephone.

During the approach and while mooring, the vessel's anchors must be secured by stoppers to prevent accidental dropping with subsequent damage to the SBM's mooring chains and undersea pipe-lines. Two mooring launches will normally be used. As the tanker approaches the SBM from down-wind one launch will tow the floating hose clear. The other launch will approach the bow and take the ship's messenger line and secure the end of a 12-in. polypropolene "pick-up" rope. The port "pick-up" rope will be hove through the centre of port mooring chock until the port chafing chain is in the chock. This chain will be secured to a 15-in. nylon strop previously secured to the tanker's bollards using a 3-in. D-shackle between the strop and the chafing chain. The starboard headrope will be secured in a similar manner. On tankers equipped with a Smit's towing bracket or brackets the chafing chains will be secured to the bracket(s) using the 3-in. open link on the end of the chains. If required on very large tankers additional strops may be secured from other bollards on the bow to the open links on the ends of the chafing chains or additional mooring lines may be run from the bow to the buoy.

**HOSES:** All vessels calling at Zuluf should have two reducing spools to fit 16-in. standard 150 pound ASA raised face flanges on the port manifold to avoid any delay in connecting hoses.

**LOADING:** The oil loading operation from the *F. A. Davies* to the loading tanker will be controlled by VHF radio voice communication between the Mooring Master on the loading tanker and the *F. A. Davies.* All operations including switching of tanks and topping off must be directly and personally supervised by a ship's Officer. The max. rate of loading will be 65,000 b.p.h.

Upon being informed by the loading tanker's personnel that the tanker is ready to start loading, the Mooring Master will request the loading operation to proceed according to a previously agreed plan with respect to start-up rates, max. loading rates and topping-off rates. Need for emergency shutdown of loading aboard the loading tanker must be communicated via VHF from the loading tanker to the FSV. No remote control shutdown device is provided to effect shutdown of loading from the loading tanker.

In the event of the failure of the VHF communications system, the loading tanker will sound five long blasts on the ship's whistle. Loading will be stopped and will not be resumed until communications have been re-established.

**BALLAST:** Due to the exposed location of the berth, tanker should arrive with adequate clean ballast for safe handling, having due regard for existing weather and sea conditions. Masters should contact Zuluf for advice on an appropriate ballast draft and weather conditions at the loading facilities. Aramco is particularly interested in having vessels complete the deballasting operation promptly after berthing in order to minimise time at berth. Simultaneous loading and deballasting is encouraged on properly equipped vessels. Owners/Operators or charterers of vessels requiring time to deballast in excess of what Aramco considers standard will be so notified by letter with a copy of letter to the Master.

**CONSTANT READINESS:** When moored at the SBM vessels must maintain engines and propulsion machinery in readiness to leave under full power on short notice. Steam turbine vessels to have automatic gear in astern operation position. When unmooring, engines should be warmed up in astern position. No repairs are permitted which would interfere with this requirement. Violation of this rule will entail towage from the berth at the vessel's expense and Aramco will not accept responsibility for the resultant delay to the vessel.

**DEPARTURE:** Upon completion of loading, documentation procedures and removal of hoses, the loading tanker will be unberthed, normally with the assistance of at least one mooring launch. It is expected that tankers will unmoor without assistance from the mooring launches in adverse weather conditions.

To unmoor from the SBM the "pick-up" ropes are taken to the winch and the weight is taken off the strops. The strops are unshackled from the chafing chains and the ropes are slacked as the tanker backs out of the berth. The ends of the "pick-up" ropes are cast off and float free to await the arrival of the next vessel.

Upon completion of unmooring, the tanker will make a lee and the loading facility equipment will be transferred to the mooring launch and the Mooring Master will disembark.

The tanker will then proceed to the anchorage to await cargo documents and final clearance by Aramco, or depart if final clearance has been given by Aramco.

**MEDICAL:** No medical facilities are available at Zuluf. Emergencies should be handled by Ras Tanura Port Doctor (Quarantine Officer). The Aramco radio station, HZY, may be used without charge by vessels at sea to obtain medical advice at any time.

**FRESH WATER:** Not available.

**FUEL:** Not available.

**REGULATIONS:** The Saudi Arabian flag must be flown from the foremast while vessel is in the coastal waters of Saudi Arabia. Such flags are available for loan and may be obtained from the Mooring Master. The Saudi Arabian flag is properly displayed when the writing appears on top and the swords at the bottom.

Importation and/or use of liquor or contraband items, or trafficking in such items, is absolutely prohibited. The Saudi Arabian Government rigidly enforces these regulations and penalties are severe. In the event of violation, considerable delay to the vessel involved could occur.

**SHORE LEAVE:** Crew members of loading tankers are not allowed to leave their vessels.

**SERVICES:** Crew changes, mail delivery, spares, etc., should be performed at Ras Tanura when passing in ballast or calling for bunkers.

**TERMINAL OPERATOR:** Arabian American Oil Co.

## Senegal

### DAKAR: 14.40 N. 17.26 W.

**PORT LIMITS:** *North:* from the point of Bel-Air by a parallel from North East of the N.E. Jetty of the harbour, to 1 mile North East by a meridian passing 2,900 metres East of the Round-Point determined by the crossing of Felix Eboue and Avenue de la Jetee Nord and by the parallel passing 2,060 metres North of Goree Island.

*East:* By the meridian passing 1 mile East of Goree.

*South:* By a line joining the Cape Manuel from the South point of Goree prolonged until it encounters the meridian passing 1 mile East of Goree.

**DOCUMENTS:**

5 Crew Lists.
2 Lists of Vaccinations.
6 Lists of Passengers in Transit.
6 Lists of Passengers Disembarking.
4 Lists of Crew Personal Effects.
4 Lists of Ship's Stores.
1 Maritime Declaration of Health.
2 Lists of Ports of Call.
5 Ship's Report Inwards.
1 Hatch List.

**PILOTAGE:** Pilots meet vessels off the North point of the island of Gorée in a naturally sheltered area.

**RESTRICTIONS:** During the rainy season, all vessels with a draft of more than 32 ft. 6 in. could be delayed due to the effects of swell to stay at anchorage in outer-roads and await meteorological conditions permitting their entry into the harbour.

Use of whistle signals to call Pilot is forbidden between 2200 and 0600 hours. The harbour area is dredged to a depth of 10 to 11 metres.

**MAX. SIZE:** Ships of 33 ft. draft are able to enter at all stages of the tide by day and night. Vessels up to 36 ft. draft may enter at high tide except possibly during the stormy season, between mid August and mid October.

**HEALTH:** Health Officials board vessel immediately after berthing alongside. For passenger vessels, these formalities are effected before berthing to avoid delays. Vessels at sea may obtain medical advice by VHF via Dakar Radio.

Inoculation/Vaccination can be arranged through Agent during weekdays.

Free pratique can be granted via radio by Agent, by using International Code Words "MIBDU/MIJMA".

**VHF:** The Port Captain's Office, pilot station and tugs are equipped with VHF, with the following channels: Channel 16 used by vessels approaching to contact pilot station or Port Captain's Office; Channel 12 used during manoeuvres for communications between Pilots and tugs; Channel 6 used only by the tug station.

**TUGS:** Operated by a private company, 4 tugs available up to 2,000 h.p. Compulsory for loaded tankers.

**BERTHING:** 9,000 metres of quay length available of which more than half has depths of 8 to 12 metres alongside.

*Mole D'Escale*: 6 berths, depth alongside 10 metres, can be used for vessels refuelling simultaneously with cargo operations.

*Pier 718 Phosphate quay* (Pechiny). 215 metres long, max. draft of 25 ft. 7 in., loading average of 200 T/hour.

*Pier 52 Phosphate quay* (TA IBA). 170 metres long, max. draft of 36 ft., loading average of 1,000 T/hour.

The South area has three wharves with a depth of 26–33 ft.

*Dock I* is 460 metres long.

| | | | | |
|---|---|---|---|---|
| Berth | No. | 12 | Draft | 26 ft. 3 in. |
| ,, | ,, | 13 | ,, | 28 ft. 7 in. |
| ,, | ,, | 14 | ,, | 28 ft. 7 in. |
| ,, | ,, | 15 | ,, | 33 ft. |
| ,, | ,, | 17 | ,, | 33 ft. |

*Dock II*

| | | | | |
|---|---|---|---|---|
| Berth | No. | 21 | Draft | 27 ft. 3 in. |

| ,, | ,, | 24 | ,, | 26 ft. 3 in. |
| ,, | ,, | 25 | ,, | 25 ft. 11 in. |

*Dock III*
360 metres long. Max. draft of 32 ft. 10 in.

**TANKERS:** The Petroleum Basin is dredged to a depth of 10 to 11 metres. Two jetty berths can receive tankers up to 200 metres length, max. draft 32 ft. 6 in. Petroleum Wharf: 4 berths, depth alongside 12 metres (depth in approaches 11 metres) can receive tankers up to 250 metres length with a draft of 36 ft.

**STEVEDORES:** Normal working hours, weekdays from 0800 to 1200 and from 1400 to 1800. Saturdays from 0800 to 1200. Overtime, week-days from 0500 to 0800; from 1200 to 1400; from 1800 to 2200; from 2200 to 0500. Holidays and Sundays from 0000 to 0500; from 2200 to 2400.

**MEDICAL:** *Vaccinations:* Possibilities from 0800 to 1200 and 1500 to 1700. Sunday and holidays excluded. *Doctors:* All kinds of specialists available. *Hospitals:* With qualified doctors and good equipment.

**FRESH WATER:** All quays are fitted with water hydrants. Water supplied by 3 hoses simultaneously, with a rate from 60 to 100 cubic metres per hour. Can also be supplied by barge up to 400 tons capacity.

**FUEL:** All grades can be supplied from the quays up to 1,000 tons per hour. Fuel can also be supplied by barge. Also see "Shipmasters' Report".

**REPAIRS:** All types of repair can be effected by the Naval Arsenal or by private companies.

**DRY DOCK:** At the Naval Arsenal, one dry dock length 189 metres, width 23 metres, depth up to 9.50 metres.

**REPATRIATION:** Seamen can be repatriated to Europe without delay by air.

**AIRPORT:** International airport with regular services to Europe.

**TELEPHONES:** All berths are equipped with telephone apparatus which is placed on board vessels without charge.

**HOLIDAYS:** New Year (1st January); Tabaski (Variable Date); National Day (4th April); Easter (Variable Date); Labour Day (1st May); Ascension Day (7th May); Whit Monday (Variable Date); Maouloud (Variable Date); National Day (14th July); Assumption (15th August); All Saints' Day (1st November); Korite (Variable Date); Christmas (25th December);

**SHIPMASTER'S REPORT:** With a draft in excess of 15 metres it is not possible to anchor in the inner roads due to the swell. The swell is worst from July to October (rainy season).

The Pilot directed us to an anchorage half a mile North-east of I. de Goree but in my opinion it is a little too close. However, the nearer a vessel can anchor North-east of Goree the better. The holding ground is very good.

It is possible to talk to Mory Fuel Company direct on VHF Channel 2. They have a barge which is able to deliver fuel oil and diesel oil, capacity 500 tons.

Three tugs available, be sure to order one well in advance before completion of bunkering or the vessel may have to wait. Bunkering undertaken day and night.

**AUTHORITY:** Port Autonome de Dakar.

**AGENT:** Socopao Senegal, 47 Avenue Albert Sarrault, B.P. 233. Tel. 26600/7. Telex 521–621–622. Cables "Freight Dakar".

### KAOLACK: 14.09 N. 16.06 W.

**DOCUMENTS:**
2 Crew Lists.
2 Store Lists.
2 Manifest pacotille (tobacco, wine, etc.). Agents deposit to Customs office.

**PILOTAGE:** Pilot taken on board, and lands in Dakar. When vessels do not require tank-washing, the Pilot disembarks in roadstead.

**ANCHORAGES:** Sufficient for three vessels only. About six metres deep.

**RESTRICTIONS:** Night navigation forbidden in river Saloum.

**MAX. SIZE:** Length 105 metres (because of river Valor).

**HEALTH:** Agent signals to Harbour Master. Provisionally vessels quarantine in Dakar. No hospital.

**TUGS:** No tugs. (Only from Dakar.)

**BERTHING:** Signalled by flag when berth available. Vessels enter at flood tide so that they can turn at anchorage to be ready for sailing.

**MEDICAL:** Yellow fever vaccinations only at Dakar. No hospital facilities.

**DENSITY:** August to December: sea water. January to July: 1·55.

**FRESH WATER:** Available at ten tons/hour.

**FUEL:** None available.

**GANGWAY/DECK WATCHMEN:** Arranged by Agent.

**OPENING/CLOSING HATCHES:** By stevedores.

**CUSTOMS ALLOWANCES:** Tobacco, No restrictions, but Customs control on board (declaration on manifest). Crew going ashore only allowed cigarettes marked "Vente au Senegal". Wine and/or Spirit, Not limited, Customs controlled.

**IDENTIFICATION CARDS:** Not necessary.

**CONSULS:** None (Dakar only). French Consulate Agent: Mr Jean Guillemot. UTRAM. Tel. 87. Telex Mafic 781 SG.

**REPAIRS:** None (only Dakar).

**REPATRIATION:** Not possible (Dakar only).

**AIRPORT:** None.

**TIME:** GMT Permanent.

**HOLIDAYS:** Independence Day (4th April) no loading. Tabasky (dependent on moon phase).

**FIRE:** Fire Tel. 324.

**TELEPHONES:** Not possible to place on board.

**SHORE LEAVE:** Crew members allowed ashore.

**REGULATIONS:** Vessels must hoist Senegalese flag and no Agent before entering port.

**AUTHORITY:** Harbour Master Tel. 92.

**AGENT:** See "Dakar".

## Seychelles

### PORT VICTORIA, Mahe: 04.37 S. 55.28 E.

**DOCUMENTS:**
Health Certificate – forms obtainable from Medical Officer.
Deratisation Certificate.
5 Crew Lists and Passengers' Lists.
Dangerous Cargo List.
Ship's Register.
Crew Declaration Form.
Declaration of Stores.
Parcels List.
Firearms List.
List of Animals remaining on board.
Un-manifested Cargo List.
Cargo Manifested.

**PILOTAGE:** 24 hours notice, giving draft and length. Telegrap address "Harbour Master" through Cable & Wireless (on C schedule 500 kc/s. and 8714 megs.) Schedule published in Rad List, VHF to be installed 1974 (Channel 16). Pilot boat: white h with blue cabin, flies "H" flag. Signals for Pilot: "G" by flag and whistle, and by night "G" by morse. Pilot boat stationed ashore a proceeds to sea to meet approaching vessels 5 cables North St. Anne Island. Pilot can board in any weather. While awaiti Pilot, vessel can anchor in any suitable anchorage in approaches harbour. Pilotage compulsory for vessels over 150 tons net enteri Inner Harbour. From beginning of 1974 vessels should call "P Office" on VHF Channel 16 two hours before arrival between 07 and 1800. Between 1800 and 0700 the station may not be manned.

**ANCHORAGES:** (1) Anchorage A. In depth of 66 to 72 ft., f sand and shells. Good holding, 9·75 cables, 058 degrees from Victo Lighthouse.

(2) Anchorage B. In depth of about 64 ft., sand and coral. Go holding, 8·25 cables, 074 degrees from Victoria Lighthouse.

(3) Anchorage D. In depth of 78 ft. coral and sand. Good holdi 3 cables, 048 degrees from Victoria Lighthouse.

(4) Anchorage E. In depth of about 78 ft., sand and shells. Go holding, 1·25 miles, 089½ degrees from Victoria Lighthouse. Su tankers and large vessels anchor outside the Fairway Buoy in a suitable anchorage. The Master should always contact Port Offic for anchorage instructions if not familiar with harbour.

**RESTRICTIONS:** All shipping movement in Inner Harbour take place during daylight hours only. In Outer Harbour, nig movement at discretion of Master. No tide restrictions.

**HEALTH:** "Q" Flag or international red over white. Medical Offic boards vessels at anchor and before entering Inner Harbour. Cr Lists with vaccination dates against smallpox, yellow fever a cholera if vessel from infected places. Health clearance given Port Victoria only. Hospital facilities available. Vessels proceedi to the inner harbour may be disinfected.

**RADIO:** Cable and Wireless, Port Victoria, Mahe. Call sign ZC Post Office equipped with VHF.

**TUGS:** None.

**BERTHING:** Due to limited space no berth can be reserved eith alongside or at anchorage. All assistance given to position ev ship in best available place.

**STEVEDORES:** ETA advice required two to three days befo ship's arrival in port. Loading and Discharging: General Carg average 8 to 10 tons per hour per gang (subject weather conditio Bagged Cargo: average 10 to 15 tons per hour per gang (subje weather conditions).

**TANKERS:** Usual safety requirements. Maximum length 400 No night discharge at present. Discharge line 6 inches.

**DENSITY:** Average 1025 at all states of tide.

**FRESH WATER:** In good supply. By mains when alongside a steel barges when at anchor. All water supplied is chlorinated. T special steel water barges with capacity of 100 and 80 tons each wi pumping capacity of 40 tons an hour per barge.

**FUEL:** Marine diesel, viscosity Redwood 42 secs. at 100°F. Gas viscosity Redwood 35 secs. at 100°F. Due to limited stock, it advisable to give one week's notice, preferably through Shell Inte national, London.

**DEVELOPMENTS:** New harbour nearing completion. New je to accommodate one vessel of 50 ft. draft and one tanker or ceme carrier of 400 ft. long. Inner harbour will be provided with lights facilitate night navigation. Lighthouses constructed on Outer Island New harbour tug may be acquired in 1974/75.

**GANGWAY/DECK WATCHMEN:** Customs Officer on duty at times if vessel is discharging cargo.

**OPENING/CLOSING HATCHES:** Normally carried out by stevedores.

**CUSTOMS ALLOWANCE:** At Custom Officer's discretion. fixed allowance.

**CARGO GEAR:** No local safety regulations required for cargo g All cargo slings and gears supplied by ship.

**IDENTIFICATION CARDS:** Not required.

**CONSULS:** French, Mr Andre Delhomme, Le Chantier, PO Box 69, Victoria, Mahe. Tel. 2253.

Netherlands, Norway, Sweden, Denmark, Finland and Iceland, Mr. Harold Hunt, Port Victoria, PO Box 83, Mahe. Tel. 2353.

**REPAIRS:** Only minor repairs to deck: gas welding, pipe bending, etc.

**DRY DOCKS:** None.

**REPATRIATION:** Crew changes for British ships and nationalities represented. Repatriations for same by Agents.

**AIRPORT:** In operation. Several flights weekly.

**TIME:** GMT plus four hours, throughout year.

**HOLIDAYS:** *Public and Estate:* New Year (1st and 2nd); Good Friday; Easter Monday; Official Anniversary of the Birth of the Sovereign (8th June); Corpus Christi (15th August); Saints day (November 1st)); Immaculate Conception (December 8th); Christmas Day (December 25th).

**TELEPHONE NUMBERS:** Police 2011; Fire 2555; Ambulance 2555.

A telephone is placed on board ships alongside for a fee of Rs. 25/- and a daily rate of Rs. 5/-.

**SERVICES:** No tank-cleaning equipment, no facilities for discharge of tank washing, no compass adjusting, radar or radio engineer available for small repairs.

**SHORE LEAVE:** All members of the crew are allowed ashore. No limit to shore leave.

**DELAYS:** Berthing: limited berth, adverse weather conditions. Loading or discharging: weather conditions. Bunkering: space alongside and weather conditions.

**AUTHORITY:** Port Manager/Harbour Master, Port & Marine Department, Victoria, Mahe.

**AGENT:** The Union Lighterage Company Limited, PO Box 38, Mahe, Seychelles. Tel. 2424 and 2425. Telex Unilight SZ 219. Cable address: "Lighterage Mahe Seychelles."

# Sierra Leone

## FREETOWN: 08.30 N. 13.14 W. (See Plan)

**DOCUMENTS:**

5 Crew Lists.
5 Ports of Call Lists.
5 Passengers in Transit Lists.
5 Passengers Landing Lists.
1 Crew Declaration (signed by Crew Members).
1 Store List.
1 Arms Ammunition List.
1 Port Health Declaration.
1 Vaccination List (smallpox, cholera and yellow fever).

Port Health Declaration, Crew Declaration Form and Arms and Ammunition List, all special forms, which obtained from boarding party or, if required, mailed in advance to ship's owners.

1. *For vessels working cargo (discharging):*

(*a*) From each port of loading, by air mail to vessels Agent: 8 copies of Cargo Manifest, 1 copy of Freighted Manifest.

(*b*) On arrival: 4 copies of Cargo Manifests, 1 copy each Bill of Lading (non-negotiable).

*Note:* Customs and Port Authority insists on documents in English, and that Manifests should show weights and measurements. Noncompliance with these instructions places vessel's Agent in difficult position, and vessel may not discharge without payment of fine.

2. *Required by Port & Stevedores for vessels working cargo:* 4 copies Stowage Plan, 4 copies Hatch Lists.

**PILOTAGE:** Vessels can enter and leave port anchorage without Pilot. Pilotage only compulsory for vessels berthing alongside Queen Elizabeth 2nd Quay or Kissy Oil Jetty. Upon Master's request, Pilot available at Fairway Buoy with 24 hours notice. Normally only at daylight hours. Port entrance is between Cape Sierra Leone to South and Fairway Buoy to North. Is approximately 1 mile wide and minimum draft 36 ft. To West harbour is protected by sand shoals, nearest to entrance is O'Farrell Shoal about 1½ mile North of Cape Sierra Leone.

Pilots board from a launch painted black, with white superstructure, with letter "P" on each bow.

Aberdeen Signal Station will give an anchorage to every vessel arriving or, if a vessel is berthing on arrival, will advise where the Pilot is boarding. This is normally off the quay. The Signal Station is equipped with VHF, standing-by on Channel 16, switching to Channel 12 for communication.

The Pilot Office, Queen Elizabeth II Quay, is also equipped with VHF, standing-by on Channel 16, switching to Channel 12 for communication. The Port Operations Manager is available on this link.

**ANCHORAGE:** With Falconbridge Point Beacon bearing as follows (all bearings true): Note: Falconbridge Point Beacon circular steel tower 8 ft. high, painted white with two horizontal black bands; F1. white every 2 seconds.

| *Anchor Berth* | *Bearing (T)* | *Distance (Cables)* |
|---|---|---|
| E. 3 | 138 | 10.5 |

|---|---|---|
| D. 1 | 232 | 5·5 |
| D. 2 | 253 | 7 |
| D. 3 | 253 | 3 |
| D. 4 | 273 | 5·5 |
| C. 1 | 244 | 4 |

With Kissy Oil Jetty bearing as follows (T):

| | | |
|---|---|---|
| B. 2 | 235 | 1 mile |

No draft restriction at anchorage, also no length and beam restrictions and vessels can arrive and sail any hour day and night.

**RESTRICTIONS:** Only draft, recommended maximum 48 ft. at 5 hours flood tide.

**HEALTH:** Pratique by radio or on boarding. See "Agents Cable Requirements".

**RADIO:** Watch maintained on 500 kc/s from 0700 to 2100 GMT on week-days and 0800 to 1000 hours and 1600 to 1800 hours GMT on Sunday, Christmas Day, Good Friday and other holidays.

| *Time GMT* | *VPU freq.* | *Search-band for reply* |
|---|---|---|
| 1230–1245 | 17175 | 16708 to 16748 kc/s |
| 1330–1400 | 6411 | 6265·5 to 6280·5 kc/s |
| 1600–1630 | 13042·5 | 12531 to 12561 kc/s |
| 1800–1830 | 13042·5 | 12531 to 12561 kc/s |
| 1939–2000 | 8710 | 8354 to 8374 kc/s |

On Sundays and other Holidays HF schedule as follows:

| | | |
|---|---|---|
| 0830–0900 | 0710 | 8354 to 8374 kc/s |
| 0930–1000 | 13042·5 | 12531 to 12561 kc/s |
| 1600–1630 | 13042·5 | 12531 to 12561 kc/s |
| 1700–1730 | 8710 | 8354 to 8374 kc/s |

Traffic lists broadcast at commencement of every HF schedule, and repeated at intervals during schedule.

*Ships' Radiotelephone and Harbour Service:* Watch kept on 2182 kc/s for casual R/T traffic from 0730 to 2000 hours GMT on weekdays and 0800 to 1730 hours GMT on Sundays and holidays. Ships advised arrange calls in advance by W/T where possible order ensure called party available take call. Calls can be connected to or from any number on Freetown telephone exchange. Longer range contacts should be in 8 mc/s maritime band, frequency of VPU in this band being 8768·9 kc/s.

*Other Services:* Navigational warnings broadcast on W/T. GTC beacon signals transmitted upon request. Spoken telegrams accepted at ordinary W/T rates on R/T.

**VHF:** Watch is kept 24 hours on Channel 16, switching to Channel 26 for communication. Calls can be connected to Freetown telephone exchange. Masters advised that fullest use should be taken of this service, particularly after office hours and during early hours of morning or late at night when no cable service available.

**AGENTS CABLE REQUIREMENTS:** Masters requested cable ETA as early as possible. Following information required:

(*a*) For vessels working cargo: 1 Discharge or Loading Hatch distribution. 2 Gangs required. 3 If Explosives on board for Freetown or in transit.

(*b*) For vessels bunkering: 1 Bunkers and water required.

(*c*) For Tankers discharging: 1 Total Displacement. 2 Draft. 3 Cargo particulars (quantity and grade).

(*d*) For vessels embarking/disembarking krooboys: 1 If krooboys provisions required and for how long. 2 Cash requirements. 3 If service on arrival if arriving between 10 p.m. and 7 a.m., bearing in mind the high costs for Customs overtime and port service.

(*e*) In general: 1 Cash requirements. 2 Water requirements. 3 Medical attendance, if required on arrival.

When ETA received and confirmed agent will cable vessel informing despatch prospects and if not berthing on arrival, anchor berth.

*Note:* For vessels returning to Freetown from round trip to coast, information should be cabled if any over-carried cargo, etc., to be discharged.

**TUGS:** Two tugs available, *Sewa* (2,000 h.p.) which is sea-going and *Fourah* (1,000 h.p.). Both are twin-screw with diesel engines and are equipped for salvage having fire-fighting equipment and a 10-ton derrick. Normally one tug used for berthing and unberthing operations, but if necessary two. Charges for berthing and unberthing include use of one tug, whether required or not. Tugs' lines £3.50.

**BERTHING:** All alongside berths: between hours of 0630 and 2330. Kissy Oil Jetty: vessels of 15,000 tons and upwards, berthing flood-tide only.

Queen Elizabeth II Quay No. 1: Berthing length: no restriction; breadth: no restriction; maximum draft 31 ft. 6 in. At this draft vessels must be 180 ft. from steps East end of quay. Vessels up to draft not exceeding 24 ft. may berth as far east as steps. Unberthing not permitted from 1 hour after high water until 1 hour after low water.

Pilots may at their discretion, under favourable conditions, extend these times.

Berth No. 2: As for Berth No. 1, maximum draft 31 ft. 6 in.

Berth No. 3: Berthing and unberthing, length and breadth no restrictions. Maximum draft 31 ft. 6 in. No tidal restrictions.

Berths 4, 5, and 6, Maximum draft 33 ft.

Quay is equipped with 3 electric travelling cranes, the maximum lift being 5 tons. The port is not equipped with any heavy-lift equipment. Produce is loaded from both berths and transported by trailers to ship's side from shipper's shed, close to port area. Facilities for loading Palmkernel Oil available only at Berth No. 1.

Grain discharge facilities also only at Berth No. 1.

Kissy Oil Jetty: Berthing and unberthing restricted as follows: length 600 ft. Pilots at discretion extend this length, taking into account mooring facilities on vessel being available. Breadth no restriction. Maximum draft 32 ft. Jetty restricted to 30,000 tons displacement. Regulations: 18,000 tons to 30,000 tons displacement must berth bows West at slack water or when flood tides does not exceed 2 knots at approach route and alongside jetty. 15,000 tons to 18,000 tons displacement berth slack water or anytime during flood tide, must berth bow West. 15,000 tons displacement or less anytime during flood or ebb tide, bows East or West. Ship's anchor must be used for all vessels.

Pilotage also undertaken to and from Kissy Cold Store Jetty, a private jetty, but pilotage not compulsory.

Kissy Cold Store Jetty: Berthing or unberthing (daylight hours only) maximum length 270 ft. breadth no restriction. Weather must be calm, no swell in harbour, no wind of more than force 2 to 3. Maximum draft 14 ft. 6 in. These vessels can be berthed under less favourable conditions at Pilot's discretion. Berthing and unberthing only 1 hour after high water.

During discharging and/or loading, Customs Officers, normally 2, as well as 2 Port Authority Discrepancy Clerks (only when discharging) will be on board. In accordance with regulations same should be provided with food during normal meal hours. Recommended that vessels provide food in order not to encounter unnecessary delays.

*Loading of Transhipment Cargo:* Due extremely lengthy procedure and consequently high cost in having transhipment cargo released and brought alongside ready for shipment, officers requested accept this cargo (when consisting of a small number of packages) immediately upon its release from Custom's Warehouse order minimise transhipment expenses.

*Sherbro River:* Anchorage daylight only. Length of vessel up to 470 ft. Breadth, no restrictions. Max. draft, 24 ft. 6 in.

The Channel between Buoy Point and Yangsai Tree must be navigated only during period two hours to high water, and on a rising tide, buoy point being area which restricts draft. Bagru River Anchorage Buoy 8, length and breadth unlimited. Maximum draft 24 ft. 6 in. Limitations as regards vessel's dimensions, drafts and times at which movements may be carried out should not be deviated from without prior permission of the Harbour Master.

**DANGEROUS CARGO:** Dangerous cargo, explosives, small arms, ammunition, *must not* be unloaded either alongside or into lighters unless Port Authority has been notified on approved form, and has given permission for cargo to be discharged. Vessels should cable prior arrival if dangerous cargo for discharge on board.

**LIGHTERAGE:** Sierra Leone Ports Authority operates lighter fleet, presently 2 lighters, 1 pontoon and 2 tugs for handling. Lighters mostly used order minimise berthing delays and generally only bulk cargo such as sugar in bags, etc., discharged by lighters. Lighterage effected 24 hours a day at anchorage, and capacity each lighter about 100 tons/5,000 bale. Lighterage fleet operated from former lighterage quay east of Queen Elizabeth II Quay. Lighterage will take place only at discretion of Port Manager, and condition of the lighterage fleet is rather poor.

**STEVEDORES:** (See "Agents Cable Requirements") ETA as soon as possible. Discharge/loading hatch distribution. Gangs required. Bunkers and water requirements information re explosives. For tankers discharging – total displacement and draught. Work ashore undertaken by Sierra Leone Ports Authority on cargo quay, Queen Elizabeth II Quay, whilst work on board as well as discharging and/or loading to or from lighters at stream undertaken by Sierra Leone National Shipping Co., stevedoring division.

Working hours alongside quay: Total hours: from 0800 to 2200 hours. Normal working hours from 0800 to 1200 hours, from 1300 to 1700 hours, Saturdays: from 0800 to 1200 hours.

No meal-break but the hour 1200 to 1300 counts overtime.

Working at Stream: Discharging and/or loading to or from lighters effected 24 hours a day. Gangs can be arranged at anytime between 0730 hours and 1800 hours week-days. On Sundays and holidays work must be arranged on the previous day.

**MEDICAL:** Hospital facilities available.

**TANKERS:** No special requirements. One berth, maximum length 600 ft. (may be extended by arrangement with Pilot). Maximum draft 32 ft. Maximum disp. tonnage 30,000.

**DENSITY:** 1018 to 1025.

**FRESH WATER:** Queen Elizabeth Quay 30 tons per hour; Water barge 30 tons per hour; Kissy Oil Jetty 12/15 tons per hour.

**FUEL:** Most grades 12 hours.

**BUNKERS AND FRESH WATER FACILITIES:** Each berth (Queen Elizabeth II Quay) gives opportunity for bunkering, suppliers Shell and Mobil, and also supplies fresh water. Vessels can also take bunkers and water at Kissy Oil Jetty as well as ex. barge. Fresh water ex. barge and on quay supplied by Ports Authority and 3 barges of 110/130 tons capacity available. Bunkers barge supplied by Texaco/Caltex/BP, by two barges, each with capacity about 700 tons d.w. Delivery rate for bunkers about 150/200 tons an hour, water between 20/35 tons.

**GANGWAY/DECK WATCHMEN:** Strongly recommended, av able through Agent.

**OPENING/CLOSING HATCHES:** By stevedores, except mecha cal hatches.

**CERTIFICATES:**

Ship's Register.
Deratisation Certificate.
Deck Passengers Certificate.
Radio Certificate.

**CUSTOMS ALLOWANCES:** Tobacco, 40 cigarettes or ¼ tobacco. Wine and/or Spirits, ¼ bottle of spirits. Master – 200 cigare and one opened bottle of spirit.

**IDENTIFICATION CARDS:** Not required.

**CONSULS:**

**REPAIRS:** All repairs if spares supplied.

**DRY DOCKS:** No dry docks in Freetown. Slipway of 500 to capacity.

**REPATRIATION:** Can be arranged.

**AIRPORT:** By bus and ferry to Lungi Airport, one hour journ Served by regular airlines.

**TIME:** GMT throughout year.

**HOLIDAYS:** Several religious and anniversary holidays. Port wo every day except Good Friday and Christmas Day.

**POLICE/AMBULANCE/FIRE:** Police 3001; Ambulance 20 Fire 2001; Emergency for all above No. 009.

**TELEPHONES:** Not available for placing on board.

**GENERAL:** Always confirm time of entering harbour with t Aberdeen Hill Signal Station to ensure turn for berthing. Drau should be indicated.

**SERVICES:** Tank cleaning. Tank and hull scaling.

**SHORE LEAVE:** Allowed.

**DELAYS:** Berthing, loading or discharging – up to 2 days. Bunk ing – up to 12 hours.

**AUTHORITY:** Sierra Leone Ports Authority, Queen Elizabet Quay, Cline Town, Freetown, Sierra Leone. Tel. Freetown 5 Cables "Portman, Freetown."

**AGENT:** Sierra Leone National Shipping Company, PO Box 8 Freetown, Sierra Leone. Tel. 5637. Telex 273. Cables "Leones Freetown".

## PEPEL: 08.34 N. 13.04 W.

On Sierra Leone River, 15 miles upstream from Freetown. Approa Channel between Freetown anchorage and Pepel is fully buoyed night navigation.

**DOCUMENTS:** See "Freetown".

**PILOTAGE:** Private pilotage undertaken by mining Compa Pilots who board Freetown anchorage, 48 hours ETA requi cable "Mags Freetown Sierra Leone", giving ETA Fairway bu quantity water/fuel required, asking free pratique, and if Pilot quired to Freetown anchorage.

**ANCHORAGE:** See "Freetown."

**RESTRICTIONS:** Draft only, decided at discretion of berth master. Entry daylight hours only. Channel between Pepel Freetown is now deepened so that depth in channel is 38 ft. p height of tide. According official tide tables, range of high tides from approximately 7 ft. to 11 ft. above Admiralty Chart Datum.

**MAXIMUM SIZE:** Length 840 ft., beam 128, depth water 38 ft. p height of tide which ranges from 7 to 11 ft. above Chart Dat September to December additional draft restrictions due chan silting.

**HEALTH:** See Freetown. 48 hours advance warning for free pratiq

**TUGS:** Not used.

**BERTHING:** Milton Margai Pier only. Loading up to 3,000 tons hour according to size of vessel.

New dolphin mooring system installed to permit handling lar ships. Depth alongside 45 ft.

Shiploaders maximum boom height when in horizontal posi is 71 ft. above Chart Datum, with maximum outreach 87 ft. fr berthing line. Loading rate now increased to 4,000 tons per hour

Under the new conditions, limiting dimensions for ships (wh must be equipped with satisfactory mooring equipment): Len overall 840 ft. Moulded breadth 128 ft.

Allowance must be made for safe navigation, permissible sa draft of all ships will, as at present, remain absolutely at discre of Berthing Master at Pepel or his deputy. It is possible that ye during the months of September to December an additional dr allowance will have to be imposed by reason of seasonal silting the channel, but it is intended to carry out annual mainten dredging.

Company will be prepared to consider acceptance of ships hav dimensions in excess of those above but only after specific appr of fully detailed plans of each ship concerned and, in any event, in excess of dimensions Length overall 870 ft. Moulded breadth 13 Moulded depth 73 ft.

Berthing displacement 63,000 tons on an even keel ballast draft of 23 ft. forward and aft on berthing.

**STEVEDORES:** Available.

**FRESH WATER:** Available, 48 hours notice required.

**FUEL:** Limited supplies available, 48 hours notice required.

**GENERAL:** See Freetown for all general information.

**TIME:** GMT throughout year.

**TELEPHONES:** None available.

**SHORE LEAVE:** Not allowed. Customs and Immigration regulations prohibit any member of crew from disembarking at jetty or other works.

**DELAYS:** First come first served.

**AUTHORITY/AGENTS:** Mining & General Services Ltd., PO Box 68, Freetown. Tel. Freetown 4427; Telex Freetown 226. Cables "Mags". Lloyds Agents.

## Singapore

**SINGAPORE** (incl. Jurong, Pulau Bukom, Pulau Ayer Chawan, Sembawang and Tanjong Penjuru): 01.16 N. 103.50 E.

**DOCUMENTS:**

4 Ships Passenger Lists.

10 Crew Lists.

5 Cargo Manifests.

Customs Declaration of duty free liquor and tobacco Form (C and E 117) to be furnished by Master to Customs boarding officers. Master, mate, or authorised officer required to furnish information asked for by Officer i/c of Customs Boarding Party for Boarding Officer's Report (this only required if ship is to be searched).

*Immigration:* Four copies Crew List and two copies each of Disembarking and Through-passenger Lists on arrival. At departure, two copies Crew List and two copies Passenger List.

Declaration regarding presence on board of any stowaway, unauthorised person and/or repatriate.

*Marine:* All vessels: General Declaration on arrival or departure.

*Port Health:* Entry Declaration. Deratisation or Exemption Certificate. Vaccination Certificate requirements – Cholera: from infected local areas, except children under 1 year of age. Smallpox: from all countries, except children under 1 year of age if they arrive from a non-infected area or under 6 months of age if they arrive from an infected area.

*Note:* Additional measures may be applied to unberthed passengers if ship comes from infected port or a port in free communication with infected areas.

Crew Lists. Passenger List.

*PSA* (The Port of Singapore Authority): Arms and Explosives, and Dangerous Goods and Petroleum Declaration.

**TRAFFIC LANES:**

1. *The Sisters Channel* defined as the navigable water contained between Sisters Island and West St. John's Island, extending from a line joining Beacon 15 (Terumbu Selegi) to the Northern end of Pulau Tekukor, and along the navigable channel margins projected tangential to the Eastern side of the Southern Sisters Island and the Western side of West St. John's Island until they meet a line joining the Southern extremity of West St. John's Island to Beacon No. 45, is designated an *Inwards Channel Only*.

2. *The Middle Channel* defined as the navigable water contained Eastwards of a line projected in a 131° direction from the charted position of the Sisters Buoy, to where it meets a line joining the Southern extremity of West St. John's Island to Beacon No. 45, thence along that line Eastwards, to where it intersects a line lying in a 131°–311° direction drawn through the charted position of a channel buoy laid in position bearing 266° at one mile from S.W. extremity of Southern Sisters Island. Thence 311° to the Southern limit of the Alternative Quarantine & Immigration Anchorage, thence along that limit to the charted position of the Sisters Buoy, is designated an *Inwards Channel Only*.

3. *The Sebarok Channel* defined as the navigable water contained westwards of a line projected in a 131° direction from the charted position of the Sisters Buoy to where it meets a line joining the Southern extremity of West St. John's Island to Beacon No. 45, thence Westwards along that line to where it meets a line joining Pulau Jong Trig. Station to Beacon No. 45, thence 313° to Pulau Jong, thence along a line extending from Pulau John Trig. Station to the charted position of the Sisters Buoy is designated an *Outwards Channel Only*, except for those inward bound ships of such draught as precludes their safe use of the aforementioned Middle Channel.

4. *The Southern Fairway* defined as the navigable water contained between lines joining Beacon No. 45 to the Southern extremity of West St. John's Island, thence to Peak Island Light Beacon, thence with Beacon No. 39 in transit with Peak Island Light Beacon to the Southern port limit, thence Westwards along the Port Limit until Beacon No. 45 bears 313°, thence along that line to Beacon No. 45 is designated a fairway for vessels intending to enter or leave the port via the Sisters Channel, Middle Channel, or Sebarok Channel, whether from or to sea, or from or to the Eastern sector of the port. The Southern Fairway is to be considered sub-divided by a median line extending from the Western limit to the Eastern limit of the fairway. All Westbound vessels are to keep Northwards of the median line, all Eastbound vessels are to keep Southwards of the median line.

**PILOTAGE:** Compulsory in Keppel Harbour, including East Lagoon, the Western Sector and Sembawang from Johore Shoal Buoy to the Causeway. Contact Pilot with not less than two hours' notice, telegraphic address "Singapore Port Operations". Vessels requested to report ETA when within 20 miles of the port. VHF safety and calling, Channel 16; port information, Channel 12; Pilots, Channel 20 and alternative Channel 12.

Vessels approaching from West pick up Pilot in approx. position 01° 12′ 24″ N., 103° 51′ 30″ E., and from East at approx 01° 13′ 4″ N., 103° 51′ 8″ E. Vessels bound for Jurong can obtain Pilot at West Jurong Anchorage by calling "Jurong Control" on Channel 21. Pilot ladder required.

**ANCHORAGES:** As indicated on BA Charts of port area. Note: Revision and realignment of anchorages is due; these will appear on the appropriate charts. Anchorage prohibited in vicinity of SBM moorings.

Masters are required to notify Port Authorities of anchorage bearings after anchoring using reference positions: Fullerton Lighthouse – (Eastern sector). Tg. Rimau Light (Beacon 47a) – (Western sector) Sultan Shoal Lighthouse – Gurong & special purpose anchorage. This may be passed to Mt. Faber Signal Station in the form of bearing and distance from the above, using VHF Channel 12, visual signalling, telephone 76021 ext. 652 or 600, or through Agents.

Ships changing their location within the port limits are also required to report their new positions. Ships leaving should report their departure time prior to leaving.

**MAX. SIZE:** Length, no restrictions. Breadth, no restrictions. Draft, Keppel Harbour 33 ft. at zero tide; Empire Dock 28 ft. at zero tide; Jurong Wharves being dredged to 38 ft. at zero tide.

*Oil Installations:* see "Tankers" page 594.

**CLEARANCE:** The Master of any vessel entering Singapore may apply for radio pratique to the Port Health Office through his local Agent, not less than 12 hours or more than 24 hours prior to arrival in Singapore.

All applications should be accompanied by answers to the Port Health Questionnaire.

Free Radio Pratique will not be granted in the following cases:

(*a*) Vessels with a case or suspected case of infectious disease on board.

(*b*) Vessels with a dead body on board.

(*c*) Vessel which has visited plague-infected ports during the current voyage.

(*d*) Passenger vessels, excluding cargo vessels with 12 or less passengers.

The provisional pratique by radio is a quarantine clearance by the Port Health Officer on duty. The clearance permits a vessel to proceed directly to berths or working anchorages and begin normal business activities without the inspection of the Port Health Officer.

The granting of radio pratique clears the vessel only as far as the Port Health Officer is concerned, and it neither exempts the vessel from the requirements of other government agencies prior to commencing operations, nor a vessel from quarantine inspection and other control measures, subsequently deemed necessary by the Port Health Officer.

Vessels wishing to communicate with the Port Health Officer should do so on VHF Channel 14.

All ships other than gazetted mail ships, arriving within 5 days of departure from a cholera infected port, or within 14 days of departure from a smallpox infected port, or from a Vietnam port, should await health clearance at Quarantine Anchorage displaying appropriate signals.

All ships with suspected infectious disease on board should radio information to Port Health Officer and await clearance at Quarantine Anchorages. All vessels upon arrival required to anchor in Eastern Principal Anchorage (alternatively Western Principal Anchorage during the N.E. monsoon, approx. December to March), unless Health and Immigration exemption has previously been granted. Vessels from non-infected ports can obtain free pratique. Vessels from infected ports must fly "Q" flag for Port Health. Vessels must also fly pennants 2 over 5 (alternatively 3 over 4 when there are passengers aboard) for immigration.

Corresponding night lights red over white for Port Health and two green for Immigration. Once vessel has been cleared by Port Health and/or Immigration she must proceed to allotted berth/anchorage. On sailing, unless exemption granted, vessels must return to Principal Anchorage for Immigration Clearance; 2 hours notice required of departure.

The Port Master, Port of Singapore Authority has issued the following regulations regarding vessels requesting Immigration and Port Health Clearance:

(1) All Masters, Owners and Agents are reminded that vessels when requesting Immigration and Port Health Clearance must anchor in the designated Immigration and Quarantine Anchorage and exhibit the appropriate signals.

(2) The Senior Health Officer has advised that delays have occurred due to ships not anchoring at the designated achorage or not displaying quarantine signals.

(3) Failure to comply with the above may result in action being taken against the vessels.

**RADIO:** Medium range (HF) telephone service is available continuously and normally provides satisfactory communication up to a range of about 800 miles. Ships wishing to contact Singapore radio may do so on any of the following carrier frequencies:

| Station | Call sign | Frequency kHz Coast | Frequency kHz Ship | Hours | Remarks |
|---|---|---|---|---|---|
| Singapore Radio | 9VG4 | 2182 | 2182 | 24 | Call, reply and safety |
| | 9VG40 | 4434·9 | 4136·9 | | |
| | 9VG8 | 6204 | 6204 | | |
| | 9VG5 | 2760 | 2527 | 24 | Working |
| | 9VG38 | 4364·7 | 4066·1 | | |
| | 9VG43 | 8751·2 | 8217·2 | | |

After establishing contact, the call will be booked and both stations will change to one of the following frequencies prior to connection with the Subscriber:

| Station | Call sign | Frequency kHz Coast | Frequency kHz Ship |
|---|---|---|---|
| Singapore Radio | 9VG39 | 4377·4 | 4078·8 |
| | 9VG44 | 8757·6 | 8223·6 |
| | 9VG45 | 8799·2 | 8265·2 |

**VHF:**

| Station | Hours of watch | Channel | Functions |
|---|---|---|---|
| Singapore Radio | 24 | 16 | Calling and distress Channel |
| Singapore Port operations | 24 | 12 | Port information other than in Keppel harbour limits |
| Berthing control | 24 | 20 | Berthing/unberthing in Keppel harbour limits only |
| Singapore Port Operations | 24 | 20 | Pilotage services and information |

Channel 22 is retained as an alternative for pilotage operations and ships should initially call Singapore Port Operations on Channel 20 to advise their respective ETAs and/or relevant communications.

**TUGS:** PSA operates 7 tugs – 6 of 1,100 bhp and 1 of 500 bhp. Three tugs of 3,000 bhp operational early 1974. Shell operates 2 tugs approximately 1,500 bhp. A number of privately owned salvage tugs make the port their base.

Tugs join anywhere in port limits by pre-arrangement with Pilots. Normally ship's line used. All PSA and Shell tugs carry tow ropes for use if required. PSA charge for use of tow rope.

**BERTHING:** Vessel's Agents should submit to Authority a Schedule "A" (Application for Berth) giving overall length, maximum draft alongside, ETA and ETD of, and list of dangerous cargo on board vessel at least 24 hours before berth required.

**CARGO-HANDLING FACILITIES:** Vessels working only general cargo will normally be berthed at PSA Wharves in Keppel Harbour. Adjacent to these Wharves is the East Lagoon Container Port.

*East Lagoon Container Port:* Length of quay, 3,000 ft. Depth 44 ft. at zero tide. Able to handle three large container vessels at one time. Four container gantries of 35 tons lifting capacity available. There is also a feeder berth for coastal vessels. Length of quay 700 ft. Depth 34 ft. at zero tide.

Bunkering facilities available. Bunker fuel pumped at a rate of 1,000 t.p.h. through 18-in. diameter mains. There are 11 outlets along the quay with 10-in. tap-offs. Marine diesel and fresh water also available.

*Sembawang Port:* Situated on the North side of Singapore. PSA operate two berths at the stores basin. Length of berths Nos. 1 and 2, 1,197 ft. Depth of water alongside 34 ft. at zero tide. The port is used extensively for loading bulk sawn timber and logs.

*Jurong Port:* The port is a new bulk-handling facility to serve the Jurong industrial estate. The marginal wharf has five berths. Total length 3,000 ft. and depth 38 ft. at zero tide.

The terminal has facilities for the discharge of grain (by elevator), sugar, fertilisers, cement, clinker, sulphur, etc. Shore bulk-handling cranes are used.

The equipment includes a kangaroo crane conveyor, unloading capacity of 300 t.p.h.

Two gantry type unloader cranes each with a capacity of 450 t.p.h.

An iron ore hopper/conveyor loading system with a capacity of 300 t.p.h.

Grain silos with capacities up to 20,000 tons.

Bulk grain suction-conveyor unloading system with discharge of 200 t.p.h. and loading rate of 100 t.p.h.

**STEVEDORES:** Labour should be ordered by 0900 hours for shift (1500 to 2300) on same day and by 1300 hours for 1st shift to 1500 hours) for next day, by 1100 hours for 3rd shift (2300 to on same day.

No work is performed during meal hours, 1100–1200 and 1830–

**MEDICAL:** When infectious disease not suspected, permission be granted by Port Health Officer to Agent to take doctor on and remove the case, if necessary, to hospital. Preferably as notice as possible. Several hospitals, General Hospital, Gleneag Mt. Alvernia. Cholera, smallpox, plague, etc., are not endemic Singapore.

**TANKERS:** Eastern and Western Petroleum anchorages or ins lations. Limited slop (residue) discharge facilities at Shell, P Bukom and Mobil, Jurong. Maximum i/d of discharge hose: 8 Smoking not permitted during period tanker alongside PSA wharve Grades permitted for discharge along PSA wharves: (*a*) mari diesel oil, (*b*) fuel oil.

**Shell**

Pulau Bukom – 10 berths and conventional buoy mooring.

| Berth | Draft (m.) | Max. length (m.) | Max. displacement (tons) | Remarks |

*S.B.M.*—A large orange coloured Single Buoy Mooring for discha ing VLCC's has been established at the western entrance to Se Sinki, exhibiting a quick flashing orange light in position Lat. 1° 51″ N., Long. 103° 41′ 29″ E., B. A. Chart No. 2165 and H. O. 3748. the sea bed, a submarine oil pipeline extends from the SBM to t southern shore of Pulau Ayer Chawan. A floating pipeline exten from the SBM for several hundred feet into the surrounding a The floating pipeline revolves around the buoy, and its direction fr the buoy at any time will depend on wind and tide. The floating l will be marked with a flashing blue light at its outer end from suns to sunrise. Mariners are advised to give the SBM a wide berth at times, and on no account to attempt to pass between the flashi orange coloured light and the flashing blue light.

*Pulau Ayer Chawan*

| Berth | Length | Draft |
|---|---|---|
| Berth 1 | length 82·4 m. | draft 7·6 m. |
| Berth 2 | length 189·1 m. | draft 10·7 m. |
| Berth 3 | length 225·7 m. | draft 12·8 m. |
| Berth 4 | length 250·1 m. | draft 15·9 m. |

**Caltex**

*Tanjong Penjuru* – Two berths (No. 1 and No. 2) accommoda vessels alongside up to 13·71 m. maximum draft.

**Mobil Jurong** – Maximum depth alongside:

| Berth | Depth |
|---|---|
| Berth 1 | 14·3 m. LWOST |
| Berth 2 | 12·8 m. LWOST |
| Berth 3 | 6·7 m. LWOST |
| Berth 4 | 6·1 m. LWOST |

**B.P. Refinery**

*Pasir Panjang* – Three berths at refinery. Small jetty inside harbo known as Jetty No. 2 and can receive small vessels up to 1,000 tonn as water depth only 6·1 m. below ACD.

No. 1 Jetty at South-west side of Tanjong Berlayer can acco modate vessels up to 33,000 tons at off-shore mooring where dredg channel 10·97 m. below ACD. Berthing cannot be effected for 43 da of year due strong tidal currents.

At Jetty No. 1A which is Northwards extension from Jetty No trunkway, vessels up to 5,000 tonnes can be berthed; water dep 7·62 m. below ACD. Simultaneous mooring of vessels at Jett Nos. 1 and 1A not allowed as floating hose used to connect Je No. 1 to ship at mooring buoys.

There are slop reception facilities at Pulau Sebarok, administe by the PSA, and at Sembawang Shipyard.

**DEVELOPMENTS:** *Dry docks:* Keppel: A new dry dock for vess of 150,000 tons dwt to become operational in 1975.

Mitsubishi Heavy Industries: are to develop a large shipyard. the first phase a 400,000 dwt repair dock is planned.

**DENSITY:** Usually between 1019 and 1022 unaffected by tide temperature variations. Variation due to periodic heavy run-of rain water.

**FRESH WATER:** Good pure water available at wharves Kepp Jurong, Pulau Bukom and Mobil Jurong. Also by PSA Waterbo Shore supply through hoses (2½ in. dia., approx. 20 to 25 tons hour outlet).

**FUEL:** All grades available alongside PSA wharves and ex instal tion, otherwise by barge. Marine diesel oil 40 sec. to 100 sec. Hea fuel oil 700 sec. to 1,000 sec. Thinned fuel 433 sec. to 450 sec. Blend fuel 200 sec. to 430 sec.

**FIRE PRECAUTIONS:** Normal precautions with respect to cargo vessels, vessels under repair, etc. Fire boats available. Oil companies apply own regulations at installations.

**GANGWAY/DECK WATCHMEN:** Recommended, particularly in Roads. Agents normally arrange. Cost varies.

**OPENING/CLOSING HATCHES:** Conventional hatches by stevedores. Mechanical hatches usually by ship's crew.

**CERTIFICATES:** If dangerous drugs on board, an export authorisation from country of origin and an import authorisation from country to which drugs being conveyed should be available for sighting and endorsement.

| | |
|---|---|
| *All vessels* | Certificate of Registry or Tonnage Certificate.<br>International Load-line Certificate or equivalent. |
| *Passenger ships* | Passenger Safety Certificate issued under International Convention for Safety of Life at Sea 1960 or the Simla Rules 1931. |
| *Cargo ships* | Safety Equipment Certificate (if over 500 tons gross) or equivalent.<br>Radiotelegraphy Certificate or Radiotelephony Certificate whichever is applicable. |

**CUSTOMS ALLOWANCE:** Tobacco: for crew and transit adult passengers. First day of arrival 50 cigarettes or 15 cigars or other tobacco 60 gms.; and for each subsequent day to the maximum of 7 days. 25 cigarettes or 7 cigars or other tobacco 30 gms.

Wine and/or Spirit: Wine allowance, one bottle per day to maximum of 8 days. Spirit allowance, $\frac{7}{8}$ reputed quart (in opened bottles) on first day of arrival and $\frac{1}{8}$ reputed quart per day for rest of 7 days.

**CARGO GEAR:** Possession of valid test certificates. At PSA wharves, if gear appears faulty, an inspection by competent Port Officer may be required.

**IDENTIFICATION CARDS:** Sect. 22 (1) (c) of Ordinance provides for issue of Seamen's Identification Card as set out in First Schedule to the Immigration Regs. 1966, but rarely issued nowadays. Normally accept passports, discharge books or any identification cards issued by masters of vessels for purpose of granting shore leave to crew members, provided these documents sufficiently identify person concerned.

Gate Passes issued against crew list at wharves and installations. No passes required from roads, although some form of identification advisable.

**CONSULS:** Consuls, Embassies and High Commissions. America, Argentina, Australia, Austria, Belgium, Brazil, Bulgaria, Burma, Denmark, Finland, France, Germany, Greece, Hungary, India, Indonesia, Ireland, Israel, Italy, Japan, Khmer Republic, Korea (North and South), Nepal, Netherlands, New Zealand, Norway, Pakistan, Panama, Philippines, Poland, Romania, Saudi Arabia, Spain, Sri Lanka, Sweden, Switzerland, Thailand, Trinidad, Turkey, Republic of China, Russia, U.A.R., U.K., Vietnam, Yugoslavia.

**REPAIRS:** All types of repairs (hull, engine and electrical including navigational aids) carried out. Facilities also available for repairs out afloat while vessel in anchorages.

**DRY DOCKS:** *Jurong:* Two dry docks. No. 1 length 270 m.; breadth, 40 m.; capacity 90,000 tons dwt. No. 2 length 350 m.; breadth 56 m.; capacity 300,000 tons dwt. One floating dock length 86 m.; breadth 18 m.; lifting capacity 2,000 tons.

*Keppel Shipyard:* largest dock, length 885 ft., beam 92 ft. 6 in., depth 33 ft.

*Sembawang Shipyard:*

| | *Length* | *Beam* | *Draft* | *Tonnage capacity* |
|---|---|---|---|---|
| King George VI | 1,045 ft. | 130 ft. | 40 ft. 9 in. | 95,000 dwt. |
| New Dock | 1,260 ft. | 210 ft. | 30 ft. | |

Five floating docks from 1,000 tons to 30,000 tons lifting capacity. Berth cranes up to 30 tons lift. Floating crane of 152·4 metric tons.

*Hitachi Zosen:* One dry dock for vessels of 300,000 ton dwt. (350 m. × 60 m.). Depth 11·5 m.

**REPATRIATION:** Ships' Agents responsible for repatriating seamen. Mercantile Marine Office undertakes repatriation of distressed British seamen on behalf of Board of Trade, United Kingdom, whenever necessary. Seamen who hold proper documents which ensure entry into their countries of origin, citizenship and destination are normally granted Special Passes after discharge for purpose of repatriation.

**AIRPORT:** Six miles from city. Regular and frequent services to all parts of the world.

**TIME:** Singapore time, GMT plus $7\frac{1}{2}$ hours. No seasonal change.

**HOLIDAYS:** Work can be arranged on all eleven Public Holidays. New Year's Day; Chinese New Year; Hari Raya Haji; Good Friday; Labour Day (1st May); Vesak Day; National Day (9th August); Deepavali; Hari Raya Puasa; Christmas Day.

**POLICE/AMBULANCE/FIRE:** City Police 999; Fire/Ambulance only, 28111; Flag signal: S over T. VHF Channels 12 or 16. PSA Police 222; Fire 209 or 333; Ambulance 76021.

Police assistance at anchorage:

For your information we quote the contents of Port Circular No. 28/73 issued by the Port of Singapore Authority:

(1) In circumstances arising on board ships at anchor within port limits which require the assistance of Marine Police, ships suitably equipped with VHF radio-telephony in the 156–174 mHz frequency band are to communicate this requirement on Channel 12 to "Singapore Port Operations" which maintains a continuous listening watch.

(2) In order to facilitate and arrange for police assistance to the ship, the following information shall be transmitted by the ship when radio contact has been established on Channel 12:
- (a) Name of ship.
- (b) Location (from a reference point).
- (c) Brief description of incident.

(3) The ship making this request for police assistance shall also as soon as possible hoist up the appropriate flag signals by day and light signals by night. Day signal: International Code Hoist "CB3". Night signal: Red-Red-White (Red at top).

(4) The ship is required to sound on her whistle or siren at intervals of about 1 minute three long blasts so that the police on patrol duties and other ships in the vicinity are alerted.

(5) Ships not equipped with VHF facilities may communicate with Mount Faber or Jurong Signal Station by means of directional morse lamp.

| | |
|---|---|
| *Mount Faber Signal Station:* | Lat. 1° 16′ 07″ N |
| | Long. 103° 49′ 29″ E |
| *Jurong Signal Station:* | Lat. 1° 18′ 26″ N |
| | Long. 103° 43′ 20″ E |

(6) Adherence to the procedures described in the above will enable assistance being given to the ships in the quickest possible manner.

**TELEPHONES:** Available on board vessel at PSA wharves only.

**GENERAL:** Master of any vessel in territorial waters of Singapore shall obey any signal from a preventive vessel and any instruction from officers of Customs. Customs officers shall have free access to any part of vessel and have powers to mark, lock or seal any dutiable goods on import including sea stores.

**SERVICES:** Following additional services available: Cleaning and preparing ship's tanks. Cleaning, scaling and painting. Insulation. Interior decorating and furnishing. Refrigeration and air-conditioning. Chemical cleaning of boilers, etc. SCAMP underwater cleaning service.

Services of following Classification Societies available: Lloyds Register of Shipping. Det Norske Veritas. American Bureau of Shipping. Bureau Veritas. Nippon Kaiji Kyokai. Germanischer Lloyd. Polski Register Stratkow. China Corporation Register of Shipping.

Compass adjusting and DF Calibration. Radar and Radio servicing depots.

**SHORE LEAVE:** No restriction on crews landing after Immigration and Health formalities have been satisfactorily completed. With rare exception (e.g. CPG Crew), all *bona fide* crew of a vessel allowed shore leave on strength of their passports, discharge books or identification cards.

The following circular was issued in May 1973 by the Singapore Port Authority.

"In line with the Government's decision that action should be taken to deal with the 'long-hair' problem as part of a campaign against undesirable alien influences, the Port of Singapore Authority would be most grateful for your co-operation in implementing this decision by advising all your employees, including ships' officers and crew members, wishing to come ashore to be more tidy in their general appearance.

"To assist you to decide whether an individual's hair is long, the following definition of long hair may be used as a guide:

(i) Hair reaching below an ordinary shirt collar;
(ii) Hair covering the ears;
(iii) Hair falling across the forehead and touching the eyelashes."

**POLLUTION:** No oil or mixture containing oil shall be discharged into Singapore waters from any vessel. The Master or person in charge of the vessel committing such an offence shall be liable on conviction to a fine not less than 500 dollars and not exceeding 500,000 dollars or to imprisonment for a term not exceeding two years or to both such fine and imprisonment.

No refuse, garbage, waste matter, substance of a dangerous or obnoxious nature or trade effluent is to be discharged from any vessel into Singapore waters. The Master or the person in charge of the vessel committing such an offence shall be liable on conviction to a fine not exceeding 10,000 dollars or to imprisonment for a term not exceeding two years or to both such fine and imprisonment.

Any person who puts, throws, casts or deposits into Singapore waters, or causes to be put, thrown, cast or desposited there into, any oil mixture containing oil, refuse, garbage, waste matter, carcase, substance of a dangerous or obnoxious nature, or trade effluent, shall be guilty of an offence and shall be liable on conviction to a fine not exceeding 10,000 dollars or to imprisonment for a term not exceeding two years or both such fine and imprisonment.

If any oil or mixture containing oil is discharged into Singapore waters:

(*a*) for the purpose of securing the safety of the vessel or of preventing damage to the vessel or her cargo, or of saving life; or

(*b*) is found to be escaping, or to have escaped into Singapore waters from a vessel in consequence of damage to the vessel, or by reason of leakage, the Master or the person in charge of the vessel shall report the occurrences to the Director of Marine and the Port Master. Failure to do shall be an offence and shall be liable on conviction to a fine not exceeding 5,000 dollars.

**DELAYS:** Normally none. Occasional congestion due to prolonged rainy weather or other abnormal conditions.

**AUTHORITY:** Port of Singapore Authority (PSA), POB 300 Singapore. Tel. 76021. Telegraphic: "Tanjong" Singapore.

The Marine Department is administered by the Director of Marine (who is also Port Master).

**AGENT:** Intrasea (Pte) Ltd., Faber House, 5th Floor, 234 E/236 E Orchard Road, Singapore 9, Tel. 375-688. Telex. 21617 ASIBOIS.

## Society Islands

### BORA BORA (Vaitape): 16.31 S. 151.45 W.

**DOCUMENTS:** All vessels arriving in French Polynesia must first call for clearance at Papeete, or at Uturoa, or at Taiohae. See "Papeete" for documents required.

**PILOTAGE:** There is no pilotage station at Bora Bora; a Pilot will be provided at Papeete. Vessels are requested to advise their Agents at least 15 days before arrival of their ETA, length and draft of ship. In addition, Masters should confirm their ETA to the Port Captain of Papeete at least 3 days before arrival. Telegraphic address is Capitaine de Port, Papeete.

**ANCHORAGE:** Vessels may anchor in the port roads in depths of 34–21 metres. Good holding ground in sand and coral.

**RESTRICTIONS:** Night pilotage is impracticable due to the absence of lighted navigation marks.

**MAX. SIZE:** Lengths 220 metres, beam 30 metres, draft 9·60 metres.

**HEALTH:** Vessel should ask for free pratique by radio message to Santé Maritime Papeete, via coast station Mahina. This message to be sent 24 hours before arrival.

**RADIO:** Mahina Radio, call sign FJA, operating 24 hours per day on 500, 2,182 and 8,230 kHz.

**TUGS:** No tugs available at Bora Bora.

**BERTHING:** One quay, 132 metres length, situated in Faanui Bay. Depth alongside 7·30 metres. This quay was constructed during the 2nd World War and is in poor condition, only used by small warships and yachts. One other quay 40 metres long and with depth alongside 4 metres. Situated at Vaitape. Used by barges.

**MEDICAL:** No doctor available, but there is a local infirmary.

**FRESH WATER:** Not available.

**FUEL:** Not available.

**CUSTOMS ALLOWANCES:** No restrictions for crew members, but all tobacco and alcohol must be declared. Crew men going ashore may not take more than 2 packets of cigarettes.

**AIRPORT:** Situated 7 kms. from Vaitape, only inter-island services.

**TIME:** GMT minus 10 hours. No change during the year.

**HOLIDAYS:** See "Papeete".

**SHORE LEAVE:** Allowed.

**AUTHORITY:** Chef de Post, Bora Bora.

### PAPEETE: 17.33 S. 149.34 W. (See Plan)

**DOCUMENTS:**
Required by Port Health:
  Maritime Declaration of Health (form provided by the Pilot).
Required by Police:
  Crew List.
  List of Passengers Disembarking.
  List of Passengers in Transit.
Required by Customs (2 copies of each):
  Manifest of Cargo for Discharge.
  Provisions List.
  Mail List.
  Crew Personal Effect List.
  Bonded Stores List.
  Ship's Spares List.
  Crew List.
  List of Passengers Disembarking.
  List of Passengers in Transit.
  List of Animals Disembarking.
  List of Animals in Transit.
  Complete Cargo Manifest.
Required by Port Captain:
  Entry Declaration (from supplied on arrival).
  Crew List.
  List of Passengers Disembarking.
  List of Passengers in Transit.

**PILOTAGE:** Vessels are requested to advise their Agents at least 3 days before arrival giving their ETA, length and draft of the ship, amount of cargo for discharge and any other requirements. In addition, Masters must give their ETA 24 hours before arrival to Capitaine de Port, Papeete. Pilot station and pilot launches are equipped with VHF and may be contacted on Channel 16 when within 30 miles. Pilot launches have grey painted hull with a white band, with wheelhouse on the fore part. The pilot flag is described as the colours of code flag "W" upside-down. International code flag signals may be used to call Pilot. Pilot boards about 1½ miles from the entrance channel. There is no anchorage outside the port for ships awaiting a Pilot.

Pilotage is effected from 0500 to 2200 for entering vessels. For departing vessels, pilotage available up to 2400 hours.

**ANCHORAGE:** Vessels up to 170 metres length can anchor in the port roads in depths of 18–25 metres. Good holding ground in mud.

**MAX. SIZE:** Length 245 metres, beam 30 metres, draft 10 metres.

**HEALTH:** Vessels should ask for free pratique by radio to Santé Maritime Papeete, via Coast Station Mahina Radio. This message should be sent 24 hours before arrival. Pratique is automatic for vessels coming from another Polynesian port.

**RADIO:** Mahina Radio, call sign FJA, operating 24 hours per day on 500, 2,182 and 8,230 kHz.

**VHF:** The Port Captain's Office is equipped with VHF. Watches are kept on Channel 16 when a ship is expected.

**TUGS:** Tugs join ships as soon as they are in the entrance channel. Generally, tow-lines are not required, as tugs push the vessels only. There are three tugs available up to 1,200 h.p. belonging to the Port Authority, and in addition, there are two naval tugs up 700 h.p. which may assist if required.

**BERTHING:** Passenger Quay: 233 metres length, two bert depth alongside 9 metres.

Cargo Quay: 450 metres length, depth alongside 10·50 metres

**STEVEDORES:** Cargo information should be confirmed to t Agents with ETA 48 hours before arrival.

**MEDICAL:** Advance notice required if medical attendance need on board. Two hospitals available. Passengers disembarking mu present a valid vaccination certificate.

**TANKERS:** One tanker berth, 105 metres long. Max. allowed dr 9·60 metres. Discharging hoses are: Mobil Oil 8 in., Standard 6 in.

**FRESH WATER:** Available from pipe-lines on all quays. Loadi rate is 50 tons per hour at passenger and cargo quays and 30 to per hour at the tanker berth.

**FUEL:** Diesel and light fuel available subject to one week's notic

**DEVELOPMENTS:** Construction of a new quay for passeng vessels up to 300 metres length.

Dredging harbour entrance to widen channel to 160 metres wi 12·50 metres depth.

A quay is to be constructed in the fishing harbour, length 100 depth 6 m. (1974–1975).

A Container Quay is to be constructed, length 200 m., dep 12 m. (1977–1978).

**WATCHMEN:** Services of shore watchmen are necessary. Hatche opened and closed by crew if they are of mechanical type, othe wise the stevedores will perform this operation.

**CUSTOMS ALLOWANCES:** No restrictions for crew membe but all tobacco and alcohol must be declared. Crew members goi ashore must not take more than 2 packets of cigarettes. Passenge disembarking may take 200 cigarettes or 50 cigars or 400 gramm of tobacco and one bottle of alcohol.

**CONSULS:** The following countries maintain representatives Papeete:

Austria
Belgium
Chile
Denmark
Italy
Finland
Netherlands
Norway
Sweden

**REPAIRS:** Woodwork, electrical and welding repairs can effected. There are 2 floating docks for vessels up to 3,500 tons.

**REPATRIATION:** Can be effected.

**AIRPORT:** Tahiti – Faaa Airport is situated 6 kms. from the po Regular international flights.

**HOLIDAYS:** 1st January, Easter Monday, 1st May, Ascension Da Whit Monday, 14th July, 15th August, 1st November, 11th Novembe 25th December. No work is carried out on Sundays or on 1st Ma All other holidays can be worked on double overtime rates.

**TIME:** GMT minus 10 hours. No alterations during the year.

**POLICE/FIRE/AMBULANCE:** Police 17; Fire 18; Ambulan 2 96 74.

**TELEPHONES:** Can be installed on board vessels at all quays.

**SHORE LEAVE:** Allowed without restriction.

**AUTHORITY:** Capitaine de Port, Papeete. Tel. 20189.

## Solomon Islands

### GIZO: 08.05 S. 156.52 E.

Gizo is the copra and cocoa receiving centre for Western Solomon Situated on Gizo Island West of New Georgia. Entrance to harbo is beaconed and a jetty with depth alongside of 9ft. Sheltered ancho age available in 16 fathoms. The British Solomons Trading Compa Ltd. provides stevedores and conducts a lighterage handling a warehousing service to Importers and Exporters. Framework war ing stations at foot of 300 ft. hill near Eastern end of township. Wh one board displayed, vessel occupying timber loading wharf. Wh two boards displayed, vessel occupying copra loading/general d charge anchorage. When three boards displayed, approaches mu be kept clear as vessel is preparing to leave.

### HONIARA: 09.25 S. 159.58 E. (See Plan)

**DOCUMENTS:**

*Special Documents*
  Store List, Form C1.
  Crew's Store List, Form C2.
  List of Unmanifested Cargo, Form C3.
  Ship's Report Inward, Form C4.
  Entry Outwards/Content Ship, Form C13.
*Legalised Documents*
  None.
*Advance Documents*
  None.
*Landing Cards*
  Finally landing passengers need special l.c.
*Health Officer*
  1 Transit Passenger Manifest.
  1 Landing Passenger Manifest.
  1 Crew List.
  1 Maritime Declaration of Health.
  1 Rhinocerus Beetle Free Certificate from Suva.
    Deratisation Certificate.
    Health Certificate.

*Immigration*

2 Crew Store Lists, Form C2.
2 Ship's Reports Inwards, Form C4.
2 Lists of Unmanifested Cargo, Form C3.
2 Entry Outwards/Content Ship, Form C13.

*Agents*

1 Transit Passenger Manifest.
1 Landing Passenger Manifest.
1 Crew List.

**PILOTAGE:** 24 hours notice ETA stating number of passengers, dangerous cargo, etc., to Harbour Master, Honiara, via Honiara Radio. Usual signals. Pilot boards from launch marked PA about ¾ mile N.E. Pelope Shoal. Vessels normally berthed port side to. Pilot uses port gangway in calm weather.

**ANCHORAGES:** East of Port Main Leading Lights. F1. white and fixed green, in about 20 fathoms; coral bottom.

Local boats are not available for transporting crew from anchorage to the shore, and ship's boats have to be used. The landing stage is at Joanna Jetty on the east side of the main pier at Point Cruz. Height above water level is 2 ft. at high tide and 5 ft. at low tide.

**APPROACHES:** Approaches free from dangers provided vessels keep at least 2 cables off Point Cruz Beacon, identified by quick flashing red light. On foreshore in front of Shell Oil Storage Tanks is beacon with fixed green light, and above on Vavaya Ridge is white light flashes every 5 seconds from car on radio station building. When in line these two lights give correct approach to anchorage in 20 fathoms on, or East of, the line. Prevailing winds during South-east season blow from North-easterly direction sometimes reaching force 4 to 5 in early afternoon. During North-west season direction and force variable generally between North and West up to force 4 and occasionally force 5.

**RESTRICTIONS:** Berthing in daylight hours only – departure any time.

**MAX. SIZE:** New Wharf, up to 600 ft. long and max. 27 ft. draught. Old Wharf, up to 200 ft. long and max. 13 ft. draught. Tankers, mooring at buoys, 600 ft. long and 32 ft. draught.

**DRY DOCKS:**

*Sturrock Graving Dock:* Situated at South-eastern end of Duncan Dock:

| | |
|---|---|
| Dimensions—Overall docking length | 360·0 m. |
| Length on keel blocks (first to last keel block) | 338·3 m. |
| Length on bottom (dock floor) | 350·4 m. |
| Width at coping | 47·5 m. |
| Width at entrance top | 45·1 m. |
| Maximum width at bottom | 38·4 m. |
| Depth on entrance sill, HWOST | 13·7 m. |
| Depth on inner sill, HWOST | 15·1 m. |

A docking length of 369·6 m. can be obtained by placing the caisson in the emergency stop at the entrance.

The dock can be divided into two compartments of either 132.5 m. and 216·1 m. or 205·7 m., and 142·9 m. respectively.

One 50-ton and one 10-ton electric cranes on 7·6 m. gauge track, two 5,080·2 kg. electric cranes on 4·9 m. gauge track and two 4-ton electric cranes on 4·9 m. gauge track are available.

The dock can be emptied in four hours.

A landing wharf 548·6 m. in length is provided on the port side of the graving dock to facilitate the dry-docking of ships.

A repair pier 343·5 m. in length with a depth along both sides of 10·7 m. at LWOST is provided off M berth. One 15-ton electric crane on 9·1 m. gauge track is available.

*Robinson Graving Dock:* Situated in Alfred Basin:

| | | |
|---|---|---|
| Dimensions— | Overall docking length | 161·2 m. |
| | Length on keel blocks (first to last keel block) | 142·6 m. |
| | Length on bottom | 152·4 m. |
| | Width at coping | 27·4 m. |
| | Width at entrance top | 20·7 m. |
| | Maximum width at bottom | 17·2 m. |
| | Depth on entrance sill, HWOST | 8·3 m. |
| | Depth on inner sill, HWOST | 7·9 m. |

Two 4-ton electric cranes on 4·1 m. gauge track and one 15-ton electric crane, on 4·1 m. gauge track are available.

The dock can be emptied in three hours.

*Floating Dock No. 2:*

| | | |
|---|---|---|
| Dimensions— | Extreme length | 62·8 m. |
| | Length on bottom | 61·0 m. |
| | Length on keel blocks | 58·2 m. |
| | Extreme width | 19·2 m. |
| | Width at entrance | 13·7 m. |
| | Height of keel blocks | 1·2 m. |
| | Draft on keel blocks, HWOST | 5·6 m. |
| | Lifting capacity | 1,016 tons |

A 4-ton electric crane is mounted on a side wall of the dock.

*Syncrolift* (under construction)*:*

| | | |
|---|---|---|
| Dimensions— | Lifting capacity | 1,778 tons |
| | Maximum length of vessel | 61 m. |
| | Maximum width of vessel | 15 m. |

*Slipways:*

There are four boat slips for yachts and small craft.

**REPATRIATION:** All facilities available.

1. *Vessels docking*
   - (*a*) Any personnel arriving to join a vessel at Capetown should possess a valid travel document and a brief letter of introduction. Entry Permits can be extended if the vessel is late in arriving.
   - (*b*) Application to spend time (longer than 48 hours) in South Africa prior to repatriation should be made to the local immigration authorities.
2. *Vessels calling off Port Limits*
   - (*a*) The same requirements apply as for 1(a) with the exception of personnel who have entered the country from a vessel calling off Port Limits.
   - (*b*) The following applies to all personnel disembarking from vessels calling off Port Limits.
     - (i) Repatriation must be made within 48 hours from time of offsigning.
     - (ii) In order to comply with local immigration authorities the agency requires the following details, for each individual, at least 72 hours before disembarkation:
       - (*a*) Full name and nationality.
       - (*b*) Rank and, if Technician, name of employers.
       - (*c*) Passport number, place and date of issue.
       - (*d*) Place and date of birth.
       - (*e*) Destination and class of travel.
       - (*f*) If air ticket held on board, full details of routing.
       - (*g*) Reasons for disembarkation.

In the case of personnel transferring from one company vessel to another, the same conditions apply except the maximum time permitted for such transfer is 78 hours. If they have not joined the vessel within this period, repatriation must be arranged forthwith.

There are no difficulties for any personnel disembarking for medical reasons.

**AIRPORT:** D.F. Malan Airport – 15 miles: from harbour. Daily flights to Johannesburg connecting with overseas flights by regular airlines.

**TIME:** GMT plus 2 hours.

**HOLIDAYS:** New Year's Day (1st January); Van Riebeeck Day (6th April); Good Friday, Easter Monday, Ascension Day (date varies); Republic Day (31st May); Family Day (2nd Monday in July); Settlers' Day (1st Monday in September); Kruger Day (10th October); Day of the Covenant (16th December); Christmas Day (25th December); Boxing Day (26th December). Cargo is not worked on Christmas Day and New Year's Day.

**POLICE/AMBULANCE/FIRE:** Police, 38–3471; Ambulance, 51–5151; Fire, 438–2978 or 438–3431.

**TELEPHONES:** Telephones can be supplied at all berths. Arrange through Agents.

**SHORE LEAVE:** Allowed.

In 1977 two berths Pier No. 2 will be fully equipped for containers.

**CRANES:** *Floating Cranes:* Two, lifting capacities of 25 tons and 40 tons, respectively.

*Mobile Cranes:* Diesel-electric road cranes: One 6·5 tons, four 12·5 tons, four 15/35 tons, one 15/43 and one 33-ton crane. Two 25-ton side-loaders (for container handling).

**BULK HANDLING FACILITIES:** *Grain Elevator:* One terminal elevator of 38,100 tons storage capacity, with shipping gallery. Intake capacity of elevator, 1,271 tons per hour; shipping capacity 1,271 tons per hour.

*Privately owned facilities:*

(1) Manganese Ore Loading Facilities. Electrical conveyor plant at Congella. Shipping capacity 318 tons per hour.

(2) Sugar Terminal. At Maydon Wharf. Storage capacity of 400,000 tons and a shipping rate of 711 tons to 762 tons per hour.

(3) Alumina Handling Facilities. At the Crossberth. Storage capacity of 33,000 tons and conveyor system with discharge rate of 160 tons per hour.

(4) Bulk Soda-Ash Facilities. At Maydon Wharf. Storage capacity of 20,865 tons and conveyor system with discharge rate of 91 tons to 136 tons per hour.

*Bulk-loading Facilities:* Electrically-driven appliances for the loading of coal, pig iron, manganese ore, iron ore, etc., are provided at the Bluff. There are three dumpers with capacity of 1,220 tons, 711 tons and 1,220 tons per hour, respectively. Two belt loaders capable of loading at the rate of 610 tons per hour and three bucket transporters with an aggregate capacity of 1,220 tons per hour are available. The overhead storage bins have a capacity of 10,160 tons, while concrete bins are provided for ground storage with the following capacities:

1. Anthracite throughout—64,630 tons.
2. Mixture of anthracite and pig iron: Anthracite—48,000 tons.
   Pig iron—43,345 tons.

*Anthracite Storage Facilities:* Concrete ground storage bins of 18,290 tons capacity at Salisbury Island.

**STEVEDORES:** Stevedoring undertaken by private enterprise stevedores appointed by ship's Agent.

**MEDICAL:** Unrestricted hospital facilities. Medical assistance must be arranged through Agents.

**TANKERS:** Off-shore Single Buoy mooring suitable for tankers up to 200,000 tons situated in position 30° 0′ 30″ S., 30° 58′ 29″ E.

Mooring Master boards in position 2 miles East of SBM. Rope messengers should be available on forecastle, and manifold prepared to connect two 16-in. hoses ASA 150 flanges. Stores launch can be arranged for up to 30 tons stores, provided that vessels anchor outside port and territorial limits. No bunkers, no fresh water, and no shore leave for vessels at single buoy mooring.

In harbour four tanker berths, for vessels of max. length 800 ft.. max. draft 38 ft. Slop tanks available. Crude discharge through 10 in, hoses, white oil 8 in. hoses, loading products through 8 in. hoses.

Additional Crude Oil Discharge Berth with depth alongside of 42 ft. under construction, but maximum permissible draft 38 ft.

**DENSITY:** 1025.

**FRESH WATER:** Delivery by hose ex-wharf hydrants. Rate of delivery 100 tons per hour.

**FUEL:** All grades of fuel available. 48 hours notice required. Fuel may be obtained alongside berths or by barge. No barging outside harbour area.

**OPENING/CLOSING HATCHES:** Mechanical hatches opened/closed by crew. Other types of hatches by stevedores.

**CERTIFICATES:**

Safety Certificates in respect of construction and gear.
Radio Certificate.
Load-line Certificate.
Deratisation Certificate.
Certificate of competent officers (passenger ships only).

**CUSTOMS ALLOWANCES:** The following are allowed for Master, officers and crew respectively: Tobacco in any form, 8 oz., 6 oz., 4 oz. Spirits: 26·7 fl. oz., 26·7 fl. oz., nil. Wine: 106·6 fl. oz. each. Beer: 106·6 fl. oz. 106·6 fl. oz., nil.

**CARGO GEAR:** All cargo handling equipment must be in good condition and certificates available for inspection.

**IDENTIFICATION CARDS:** Required, otherwise National Identity Cards, if available.

## RICHARDS BAY: 28.50 S. 32.06 E.

This is a new harbour, situated approximately 200 kilometres North of Durban and will cover a large area. The initial purpose of the port is to provide an outlet for large tonnages of coal mined in the Eastern regions of South Africa, and later will provide facilities for the export of other minerals and ores, and to cater for bulk imports such as bauxite, etc., required for the aluminium factory situated at Richards Bay. In due course other similar industries will be located in that area.

By April 1976 two dirty berths (coal) will be operative for the bulk export of coal. Adequate bulk cold storage facilities adjacent to the berths will be provided, as well as the required rail links with the coal mining area in the Eastern Transvaal, also a modern bulk coal loading appliance. These coal berths are situated on the South side of the harbour.

On the North side of the harbour two clean general bulk cargo berths will be provided, the first being available early 1977 and the second later that year or early 1978. These berths will have adequate back-up areas, railway lines, roads, etc., but it is not intended that they should be provided with cranes or sheds.

Each of the aforementioned berths will be approximately 350 metres long and the minimum draft will be 19 metres. Initially the port will handle up to 150,000 bulk carriers but the port is being constructed to handle vessels up to 250,000 tons.

As with all South African ports, Richards Bay will be controlled by the S.A.R. & H. and the usual pilot services, tugs, shore facilities (water, bunkers) will be provided.

The above embraces stage 1 of the Richards Bay Harbour Development plan and later stages will include further berths, dry dock, repair facilities, etc. Extension of the town and surrounding areas will be rapid and large-scale industrial and commercial developments are taking place now.

## WALVIS BAY (South West Africa): 22.57 S. 14.30 E. (See Plan)

**PORT LIMITS:** Seaward limits are a line drawn due North from Pelican Point Lighthouse for 4 km, thence due East to the mainland.
**DOCUMENTS:** As for "Durban."
**PILOTAGE:** Compulsory. One hour advance notice to be given to Port Captain through VHF radio. Port operation calling Channel 16, working Channel 12. Motor pilot boat – black hull, white housing. Pilot taken aboard North-west of Fairway Buoy.
**ANCHORAGE:** To avoid fishing boat traffic vessels should not anchor East of the fairway buoy.
**RESTRICTIONS:** Entrance channel 440 ft. wide, depth 33 ft. LWOST. Vessels not permitted to enter unless agents have been appointed. Oil tankers and ships carrying explosives or dangerous goods restricted to daylight hours.
**MAX. SIZE:** Max. length 630 ft. overall and draft 31 ft.
**HEALTH:** Pratique granted at first port of entry in South Africa. Pratique message 24 hours prior to arrival to "Port Health" at port of entry. If radio pratique not granted "Q" flag to be flown until ship has been cleared.

Valid certificates must be held for smallpox and yellow fever. Ships have valid certificates for cholera and typhoid.
**RADIO:** Walvis Bay Radio. Call sign ZSV.
**TUGS:** Two tugs available each 2,500 h.p. Join vessel in entrance channel. Tug's wires used at no extra charge.
**BERTHING:**

Berths 1, 2 and 3; 1600 ft. length, 33 ft. depth
Berths 4 and 5; 1250 ft. length, 35 ft. depth
Berths 6, 7, and 8; 1750 ft. length; 35 ft. depth
Tanker berth: 630 ft. length; 33 ft. depth

**CRANES:** *Berths 1, 2 and 3:* 1 crane at 3 tons capacity. 9 cranes at 4 tons capacity and 1 crane at 7 tons capacity.

*Berths 4–8:* 17 cranes at 4 tons capacity, 1 crane at 15 tons capacity and 1 crane at 3 tons capacity.

There is also a mobile crane of 15 tons capacity.
**SPECIALISED CARGO-HANDLING FACILITIES:** No. 3 Berth is equipped with a belt conveyor loader for loading ore concentrates, max. loading speed 300 t.p.h. This loader is owned by Tsumeb Corp.

No other special facilities are available for loading or discharging. Cargo is worked by shore cranes except under special circumstances. Twenty-seven 4-ton, one 7-ton and one 15-ton cranes are available.
**MEDICAL:** Unrestricted hospital facilities. Medical assista must be arranged through Agent.
**DENSITY:** S.G. 1025.
**FRESH WATER:** Delivery by hose ex wharf hydrants. Rat delivery 15 tons per hour. Also available by tug at 40 tons per hou
**FUEL:** Light diesel oil only, but special prior arrangements mus made as supply is effected ex-tank wagons. Coal bunkers available in an emergency only.
**CUSTOMS ALLOWANCES:** 200 cigarettes per man.
**CARGO GEAR:** All cargo handling equipment must be in g condition and certificates available for inspection.
**IDENTIFICATION CARDS:** Required. Otherwise Natio Identity Cards, if available.
**REPAIRS:** Major boiler and engine room repairs can be car out at anchor.
**TIME:** GMT plus 2 hours.
**HOLIDAYS:** New Year's Day (1st January); Van Riebeeck Day April); Good Friday, Easter Monday, Ascension Day (dates va Republic Day (31st May); Family Day (2nd Monday in July); Settl Day (1st Monday in September); Kruger Day (10th October); Da the Covenant (16th December); Christmas Day (25th Decemb Boxing Day (26th December).

(*a*) Vessel may leave/enter port and cargo may be worked at o time rates: 1st January (New Year's Day) 23rd May (Ascension D 31st May (Republic Day), 16th December (Day of the Covenant)

(*b*) Vessel may leave/enter port between 0600 and 0900 bu cargo will be handled: 12th April (Good Friday), 25th Decem (Christmas Day). Please note that 6th April (Van Riebeeck D and the 2nd Monday in July (Family Day) are to fall away as from beginning of 1974.
**SHORE LEAVE:** Allowed.
**AUTHORITY:** South African Railways. Port Captain, Walvis B

**AGENT:** Freight Services Ships Agency Co., Third Street E POB 4, Walvis Bay. Tel: 2211. Telex: 48–747. Cables: Seafre Walvis Bay.

# South Atlantic Islands

## ASCENSION ISLAND, GEORGETOWN: 07.5 14.20 W.

**DOCUMENTS:** Crew and Passenger lists, Health docume Manifests and Bills of lading if discharging cargo.
**PILOTAGE:** No pilots are available and not required as it i open anchorage. Require 48 hours of ETA. VHF 16, and Ascen radio operated by Cable & Wireless will reply.

**FRESH WATER:** None available.
**FUEL:** None available.
**WATCHMEN:** Not necessary.
**OPENING/CLOSING HATCHES:** Usually done by stevedor
**CONSULS:** No Consulates. British Administrator attends t requirements.
**REPAIRS:** Only minor repairs can be effected.
**REPATRIATION:** No facilities for crew changes. Repatri can be arranged but only in the case where a person has b hospitalised. If a ship puts in with a medical case on board an will visit the ship. Fees paid to the Cable & Wireless represent If the patient is hospitalised the Master must guarantee in wr that all hospital fees and the air fare to Antigua will be honour his shipping line Agent. As so few ships call at Ascensio hospitalised patients can be evacuated by sea. All patients rece from ships are evacuated on M.A.C. flights to Antigua. These fl are run weekly.
**AIRPORT:** Airport 2 miles. U.S.A.F. No civil airlines call her
**TIME:** Always GMT.
**HOLIDAYS:** Cargo vessels are discharged during public holid no night work.
**GENERAL:** There are no facilities for visitors on the island. Anchorage must be vacated when a mail vessel is due.
**SHORE LEAVE:** Not permitted.
**AUTHORITY:** The Administrator, Ascension Island. S Atlantic Ocean.

## ST. HELENA, JAMESTOWN: 15.56 S. 05.40 W.

**DOCUMENTS:**
3 copies of Crew List.
3 copies of Passenger List.
10 copies of Manifest.
1 Health form.

**PILOTAGE:** No official pilot. Agents sometimes hire a pilot (retired Union Castle Captain) for ships requiring one.

**ANCHORAGE:** The harbour consists of an open roadstead with anchorages shown on charts.

**MAX. SIZE:** Any size vessel can anchor in the roadstead. Depth up to 20 fathoms.

**HEALTH:** Pratique will be granted by the boarding party or by telegram from Port Health Officer. If suspected disease or fever, the Port Health should be informed by telegram in advance of anchoring so that the necessary precautions can be taken.

**RADIO:** ETA message should be relayed through Cape Town Radio. Agents have VHF service.

**TUGS:** None. There are 3 towing launches (from 16 to 28 h.p.) for harbour use only.

**BERTHING:** Vessels anchor in 18–20 fathoms offshore, in open roadstead. There is deep water (sufficient for ocean-going vessels) right in to the area where cargo lighters and other small craft are moored.

**STEVEDORES:** 48 hours notice required by Agent, also particulars of tonnage of cargo.

**MEDICAL:** Agent should be notified if medical attention required. A resident staff of three doctors, plus nursing staff, in a well-equipped modern hospital. The basic requirements for intending visitors is a certificate of vaccination against smallpox.

**FRESH WATER:** Delivered by floating pipeline at a rate of approximately 14 tons an hour.

**FUEL:** No stocks of marine fuel. Ordinary diesel oil is available in drums of 45 gallons (supplied ex South Africa) and only limited stocks for local needs are held.

**OPENING/CLOSING HATCHES:** Stevedores can do this, but preferable for crew to open on arrival so that work can start as soon as stevedores arrive on ship.

**CERTIFICATES:** Vaccination certificates required for all crew. Derating certificate should be valid.

**CUSTOMS ALLOWANCES:** No restrictions. Free use on board.

**CARGO GEAR:** All discharge carried out by vessels derricks into lighters. Agents provide own cargo nets, etc.

**CONSULS:** French Consul. Appointed representatives for Denmark and Norway.

**REPAIRS:** Small repairs can be carried out (welding or turning pipes, etc.).

**REPATRIATION:** No facilities for crew changes. Only for those left behind for hospitalisation.

**AIRPORT:** No airport on St. Helena.

**TIME:** GMT throughout the year.

**HOLIDAYS:** New Year's Day (1 January); Good Friday; Easter Monday; St. Helena Day (21 May); Whit Monday; Queen's Official Birthday; August Bank Holiday; Christmas Day (24th December); Boxing Day (25 December). Cargo work can be arranged except on Christmas holidays.

**POLICE/FIRE/AMBULANCE:** No telephone nos. Must ring exchange.

**SHORE LEAVE:** Allowed. No restrictions provided vessel has free pratique.

**DELAYS:** No delays in berthing, loading or discharge can be delayed by bad weather due to swell alongside wharf.

**AUTHORITY:** Harbour Master, Colonial Treasurer's Office, The Castle, St. Helena, S.A.O.

**AGENT:** Solomon and Company (St. Helena) Ltd., Jamestown, St. Helena. Cables: "Solomon St. Helena."

# Spain

## AGUILAS and HORNILLO: 37.24 N. 01.35 W. (See Plan)

**DOCUMENTS:** See "Almeria".

**PILOTAGE:** Hornillo port has no Pilot. The Pilot of port of Aguilas which is less than a mile from Hornillo, does pilotage services of both. To enter both ports Hornillo and Aguilas, anchor a mile or a mile and half distance from entrance of Aguilas. Wait for Pilot with engine stopped. To call Pilot give three long blasts several times. Pilot's launch is small motor boat painted white, with letter "P" painted on both sides of boat. During night it carries white light on top of mast, and 8 ft. lower a red light, besides the usual lights.

**RESTRICTIONS:** It is not possible to enter Hornillo port during dark. Wait till dawn outside Aguilas.

**MAX. SIZE:** Length up to 110 metres, draft about 22 ft.

**HEALTH:** See "Almeria".

**TUGS:** None in port. Not necessary for either port.

**BERTHING:** Aguilas port has a commercial quay with a berth area about 200 metres and depths of between 8–12 metres. Hornillo port has a pier to handle minerals with berth area of 90 to 100 metres and depths between 6–10 metres.

**BULK HANDLING:** Two conveyor belts each of 100 tons grain per hour capacity. May be used for other bulk cargoes.

**STEVEDORES:** Team of stevedores who belong to "Port Workers' Trade Unions" (Sindicato de Obreros Portuarios).

**MEDICAL:** Captain can send cables to consignee requiring this kind of service. There are a number of doctors and a hospital.

**FRESH WATER:** In Aguilas port are small supplies of water. It is supplied by the town hall by means of tank lorries.

**FUEL:** There are no supplies of fuel in either port.

**GANGWAY/DECK WATCHMEN:** Not necessary, usually this is done by crew.

**OPENING/CLOSING HATCHES:** Usually this is done by crew.

**CONSULS:** There is only Vice-Consul of Norway in Aguilas. Tel. 411035.

**REPAIRS:** No facilities.

**REPATRIATION:** Facilities for effecting crew changes exist. Repatriation can be done by train to Madrid and by plane from there.

**TIME:** GMT plus 1 hour.

**HOLIDAYS:** See "Almeria".

**POLICE/AMBULANCE/FIRE:** Ambulance and fire services can be requested from Port Authority. If the police services are required call to "Caseta de Vigilancia" of the Civil Guard in either port.

**GENERAL:** Hornillo port is used only for loading and discharge of minerals, and for this purpose a pier is provided with a railway. The nearest port of Aguilas, less than a mile distant on the West, is the commercial port, with a quay for loading/discharging and a crane of 10 tons capacity.

**SHORE LEAVE:** Crew members are allowed ashore.

**AUTHORITY:** Ayudante de Marina o Capitan del puerto (Port Authority or the Assistant) tel. Aguilas 411074. Cable address Ayudmar, Aguilas. Hornillo port is in this respect subordinated to Aguilas.

## ALGECIRAS: 36.07 N. 05.26 W.

**DOCUMENTS:**
Maritime Declaration of Health.
5 Crew Lists.
2 Manifests of Cargo for the Port.
2 Manifests of Cargo in Transit (if coming from Spanish port a Manifest is sent by the Customs officials of that port).
1 Bill of Lading of cargo for the port.
2 Ship's Stores Lists.
2 Lists of Crew Personal Effects.
If the vessel carries passengers the following are required:
8 Lists of Passengers Disembarking with baggage declaration for each passenger.
5 Lists of Passengers in Transit.
2 copies of Arrival Report.
1 Manifest of Vehicles belonging to Passengers Disembarking.
If the vessel is a tanker the following are required:
Certificate of Quantity of Cargo.
Certificate of Quality of Cargo (or Ballast Certificate).

**PILOTAGE:** Vessels entering the port call Pilot by international code signals, sound or light. Notice of ETA should be radioed to Agent 72, 48 and 24 hours before arrival. Pilots cannot be contacted by radio, and are ordered by Agents on the basis of Master's ETA.

Pilot boat is painted white with a letter "P" in black on both sides. By day they carry a blue flag with the letter "P" in white. By night they carry regulation pilot lights. The pilot boarding zone is a circle of $\frac{1}{2}$ mile radius with centre 1 mile East of the Northern breakwater head (red light).

**ANCHORAGE:** Vessels waiting for a Pilot may anchor North of the parallel of the Barranco beacon in depths of 30 m.

**RESTRICTIONS:** Vessels may enter by day or night.

**MAX. SIZE:** Puerto de Algeciras – no length restrictions, maximum draft 29 ft. Refineria Gibraltar – maximum length 283 m. Draft up to 65 ft.

**HEALTH:** Free pratique is obtained automatically when authorities board on arrival and Maritime Declaration of Health is completed. In case of suspected disease or fever on board full details should be sent by radio to Sanidad Maritima, Algeciras, before arrival.

**RADIO:** Aranjuez Radio and Cadiz radio. Vessels proceeding to Refineria Gibraltar should announce their arrival by VHF to the Capitania of the port using Channel 16 for calling and Channel 13 for communication.

**TUGS:** Four tugs are available up to 1,500 h.p. and assist according to Pilot's directions. Ship's tow lines used.

**STEVEDORES:** Ordered by vessel's Agent on basis of Master's ETA.

**MEDICAL:** Doctors and hospital facilities available. International vaccination certificates only required if vessel is proceeding from an infected area.

**TANKERS:** Refineria Gibraltar – 5 berths for tankers up to 283 metres length, two of which can accept draft up to 65 ft. The other three berths can accept vessels up to 57 ft. draft. Loading/discharge lines are 12 in., 10 in., 8 in., 6 in. and 4 in. Refineria Gibraltar has two slop tanks each of 600 cubic metres capacity which can accept oily residues.

**FRESH WATER:** Available from all berths in Algeciras and at Refineria Gibraltar at a rate of 40 tons per hour. Can also be supplied by barge at the rate of 15 tons per hour.

**FUEL:** All grades can be supplied with three hours notice. Loading rate 250 tons per hour for fuel and 150 tons per hour for diesel and gas oil. Supply is effected by barge at all quays which are not connected by pipe-line.

**DEVELOPMENTS:** In Algeciras Commercial Port a new berth is under construction in the South part of the dock for vessels up to 9 metres draft. It is planned to dredge the whole commercial port to 10 metres depth.

**WATCHMEN:** Not available from shore.

**HATCHES:** Are opened and closed by ship's crew.

**CUSTOMS ALLOWANCES:** Maximum quantity of tobacco permitted in ship's stores is 3 kilos per crew member and two kilos per passenger. The quantity that may be held out of bond is 40 grammes tobacco per person per day. Wine/Spirits. One decilitre per person per day may be held out of bond.

**CONSULS:**

Norway, Italy, France, all tel. 67.27.20.

**REPAIRS:** Small repairs afloat can be effected. No dry docks.

**AIRPORT:** Nearest is at Malaga, 120 kms. from Algeciras.

**TIME:** GMT plus one hour all the year round.

**HOLIDAYS:** New Year's Day, 6th January, 19th March, Maundy Thursday, Good Friday, Easter Saturday, 1st May, Ascension Day, Corpus Christi, 29th June, 18th July, 25th July, 15th August, 1st October, 12th October, 1st November, 8th December, 25th December.

**POLICE/FIRE/AMBULANCE:** *Algeciras:* Police, tel. 67.15.55; Fire, tel. 67.20.20; Ambulance, tel. 67.22.90. *Refineria Gibraltar:* Police, tel. 67.15.55; Fire, tel. 76.17.00; Ambulance, tel. 76.12.47.

**SHORE LEAVE:** Crew members are permitted to go ashore subject to police control.

**AUTHORITY:** Comandancia de Marina. Telephone: 67.14.60. Cables: Comtemar Algeciras.

## ALICANTE: 38.23 N. 0.28 W.

**PORT LIMITS:** The line drawn from Cabo de las Huertas and Cabo de Santa Pola.

**DOCUMENTS:**

3 Crew Lists.
6 Passenger Lists.
2 Manifests for Cargo, including cargo in transit as well as cargo for Alicante. Tobacco and Cargo Manifests to be visaed by Spanish Consulate in port of origin.
3 Stores Lists, for Customs.

*For the Agent*

4 Manifests of cargo destined for Alicante, with one copy of each Bill of Lading.

**PILOTAGE:** Pilotage service is permanent and Pilots are summoned by displaying international code flag "G", (same signal at night-time by light), or by sounding three long blasts on ship's whistle.

Pilot launch is a white-painted motor launch with a black letter "P" on both sides. The launch flies a black flag with white letter "P" by day, and shows usual pilot lights at night. The launch will meet arriving vessels about one mile from breakwater entrance in good weather.

In bad weather from the East, the launch goes out as far as the breakwater and meets vessel opposite the green light at the breakwater head. Pilot boards on the lee side, which is generally the port side.

**ANCHORAGE:** Vessels waiting to enter port may anchor at a distance of half a mile east of the breakwater in depths of 16 metres.

**MAX. SIZE:** Vessels of up to 225 metres length and 33 ft. draft can be berthed alongside. For tankers, max. draft 29 ft.

**HEALTH:** Report in advance to Pilot if there is any problem. If situation is normal, then after ship berths the health inspector boards and quickly grants pratique. In the event of any suspected disease or fever on board the Pilot (without boarding) will show the anchorage area then Health Inspectors and Authorities will board and give necessary instructions.

Vessels entering after calling at another Spanish port have no problems obtaining pratique.

**RADIO:** Radio-telephone communication through Radio La Costera, Alicante, medium range approx. 220 miles and short range approx. 40 miles.

Port Radio station situated at the Western end of Muelle B, is equipped only to receive messages by R/T. Messages received by this station are passed to destinations within the port by telephone lines. VHF communication in operation.

**TUGS:** Only one tug available to assist berthing of 176 g.t. and 1295 h.p. Normally ship's lines used for connection with tug.

**BERTHING:** The breakwater extends in a South-westerly direction and vessels berth within the breakwater. Maximum depth being available at the outer end of the breakwater, decreasing in the North-easterly direction.

*Muelle 14*: Extends along the length of the N.E./S.W. breakwater and depths vary alongside the berth from 11 metres at the South-west end to 8 metres at the North-east end. Depths in the outer port vary from 12 metres at the South-west end to 9 metres at the North-east end.

*Muelle 12*: Depth alongside 7·5 metres, depth for the berth 9 metres.

*Muelle 10*: Depths alongside the berth vary from 6 to 8·75 metres.

*Muelle 9*: Depth alongside berth 8·75 metres.

*Muelle 7*: Depth alongside the berth 8·75 metres.

*Muelle 11*: A combined tanker and dry cargo berth. Depth alongside berth 8·75 metres.

**STEVEDORES:** Agents should be advised of ETA and shore cargo gear requirements.

*Grain Discharge*: effected by grabs normally at Muelle 11. Disc three to four tons per gang per hour.

*General Cargo*: discharge about 10 tons per gang per hour.

*Bagged Cargo*: discharge about 150 tons per gang per hour.

**MEDICAL:** Many hospitals and medical services available.

**TANKERS:** Tankers discharge takes place at Muelle 11 "Berthing"). There is no refinery and the only products unlo are fuel oil, diesel oil, gasoline and aviation spirit. There are pipe-lines available for cargo discharge.

**DENSITY:** 1025.

**FRESH WATER:** Available from hydrants at the quays at the of 10 tons per hour, per hydrant.

**FUEL:** Supplied by Campsa. Vessels requiring fuel are reque to berth alongside Muelle 11 and will incur delays if that ber already occupied. Maximum advance notice is essential. Owne vessels requiring fuel are required to pay a bank deposit in for currency.

**CUSTOMS ALLOWANCES:** Total tobacco allowed on bo three kilos per crew member, two kilos per passenger. All mus declared in ship's provision list and any in excess of these amo declared in a separate visaed manifest as tobacco in transit "Documents").

**DEVELOPMENTS:** Two new tanker berths expected to be avai about 1974.

**GANGWAY/DECK WATCHMEN:** Agent normally arra watchmen.

**OPENING/CLOSING HATCHES:** Normally opened by crew closed by stevedores using cranes.

**CARGO GEAR:** All berths have cranes, varying from about 6 capacity. There is one heavy lift crane capacity 30 tons, and capacity 10 tons.

**REPAIRS:** Only minor repairs available. If dry docking, or un taking major repairs, vessels should proceed to Cartagena.

**AIRPORT:** About 8 km distance from Alicante, and service international flights.

**IDENTIFICATION CARDS:** Additional identification cards required by crew members of communist-flag ships.

**TIME:** GMT plus one hour.

**TELEPHONES:** Telephones may be connected, provided suffic notice is given, subject to payment of installation costs of ab 7,500 Pts. plus the cost of calls.

**AUTHORITY:** Comandante Militar de Marina. Tel. 211514. T 66026 (A/B Marale).

## ALMERIA: 36.52 N. 02.30 W.

**DOCUMENTS:**

4 Crew Lists.
4 Passenger Lists or negative.
2 Cargo Manifests of goods destined to Almeria, as well as o cargoes in transit.
Store List in duplicate, including tobacco, spirits, radios, belonging to vessel.
Details list in duplicate of all personal effects of crew and pass gers (tobacco, spirits, cameras, radios, etc.).

*Note:* Tobacco. In case vessel carries more than 3 kilos of toba per man, excess must be declared in a separate manifest, w must be visaed by a Spanish Consul. In absence of Consul, document will have to be visaed by an Authority of former por clearance. Otherwise, the vessel would be fined.

**PILOTAGE:** Is compulsory and service is permanent. Pilots bo vessels by motor-boat in roads, near entrance formed by two br waters. This entrance is 287 metres wide. Pilot boats are pai white and letter "P" is painted in black on each bow. Also b have a blue flag hoisted on mast, with letter "P" in white on sides of flag. At night, boats have white light, under this light red light. When weather is bad vessels approach as close as p sible to entrance so that Pilot can easily board the vessel.

**ANCHORAGE:** When harbour is congested, vessels can anc at West Mole while waiting for berth.

**MAX. SIZE:** Only limitation is draft (maximum 30 ft.).

**HEALTH:** Pratique is obtained immediately after berthing, w Health Officer boards vessel. In case of suspected disease of on board Master must send a radio message to Agents, in or that they advise the Health Officer. Following documents are re red by Health Officer upon berthing: Maritime Declaration of Hea Deratisation Certificate, 1 Crew List.

**RADIO:** Nearest important radio stations are Cadiz-Radio Palos-Radio.

**TUGS:** One available but not compulsory, is employed acco to Master's requirements.

**BERTHING:** Prior to ship's arrival and in accordance with Mas ETA Agent attends port Authorities to procure a proper avai berth. Commercial quays have a length of 500 metres with do sheds, 360 metres with single shed with maximum depth 24– and about 700 metres uncovered for goods in bulk with dept tween 24–30 ft.

**STEVEDORES:** It is necessary that Master sends ETA so Agent can inform Receiver's stevedores accordingly and arra for proper reception of cargo and berth. Timetable of shifts avai at the port; Daytime, normal working hours, from 08.00–12.00 14.00–18.00 (one shift), 08.00–14.00 (one intensive shift), 14.00– (one intensive shift). Night time, from 18.00 to 24.00; Sundays holidays, from 09.00 to 12.00 and 14.00 to 18.00.

**MEDICAL:** Medical facilities are available; only it would be ap ciated for Master to send a radio message if a crew member is in need of urgent medical attention.

**FRESH WATER:** Always available. Deliveries from quay available at all berths, supplying about 30 tons per hour.

**FUEL:** Ordinary fuel oil and gas oil is available at local refinery of "Campsa". It is advisable that Shipowners stem bunkers through their own Contractors, with an ETA of 48 hours, so that the order can be received in time.

**FIRE PRECAUTIONS:** Tankers perform their operations at the berth of "Campsa" at East Pier, which has the necessary fire precautions. No special precautions at other piers.

**GANGWAY/DECK WATCHMEN:** Available but not compulsory.

**OPENING/CLOSING HATCHES:** This work normally carried out by crew.

**CERTIFICATES:** Vessel should have the usual documents on board, but only the Safety Wireless, Safety Equipment and Deratisation Certificates are required by Authorities.

**CUSTOMS ALLOWANCES:** The quantity allowed per each crew member is 3 kilos tobacco. (See "Documents".) Wine and/or Spirits: Only one bottle for each crew member.

**CARGO GEAR:** All commercial piers are served by electric shore cranes able to lift 3/6 tons (18 cranes in total), and one crane with a lifting capacity of 15/25 tons situated on Pier Costa.

**IDENTIFICATION CARDS:** Not required.

**CONSULATES:**

## AVILES: 43.35 N. 05.56 W.

**DOCUMENTS:**

3 Crew Lists.
2 Passenger Lists or a negative.
1 Cargo Manifest of goods destined for the port.
Another Manifest covering transit cargo.
2 Store Lists, including tobacco, cigars, cigarettes, coffee, spirits, radios, cameras, etc., in possession of crew. In all cases make and number of radios to be indicated.
Safety Wireless Certificate and Safety Equipment Certificate.

If vessel carries over 3 kilos tobacco per man, the excess to be declared in a separate manifest, which must be visaed by the Spanish Consul at the last port, otherwise vessel exposed to heavy fine.

**RESTRICTIONS:** Entrance channel 90 m. wide, 1,000 m. long up to San Juan de Nieva Dock. Depth at low water from 6 to 9 metres.

**MAX. SIZE:** Length 150 m. draft 9 m.

**HEALTH:** If vessel proceeds directly to berth, pratique can be obtained immediately after berthing. Otherwise, at anchorage at vessel's arrival.

If vessel has sickness on board of a contagious nature Master should advise Health Authorities by radio, and they will examine patients immediately upon arrival, to enable vessel to be granted free pratique.

**TUGS:** Five tugs available up to 1,200 h.p.

**BERTHING:** Muelle de Raices, length 823 m., depth alongside 8 m. San Juan de Nieva length 776 m., depth alongside 6 m.

*San Agustin,* Ensidesa East, length 300 m., depth alongside 9 m. Ensidesa South, length 715 m., depth alongside 7 m.; length 108 m., depth alongside 5 m.

*San Balandran,* Endasa East length 133 m., depth alongside 7 m.

**CUSTOMS ALLOWANCE:** Normally Customs permit to have 200 cigarettes per man out of bond. Additional quantities needed on the stay of ship in port. One bottle of spirit per man.

**DRY DOCKS:** one dock at Las Canteres, owned by Entrecanales Y Tavora, length 50 m., width 9.50 m.

**FRESH WATER:** Can be supplied from Ensidesa berths at 40 cu.m per hour. Supply from other berths at a low rate.

**FUEL:** Fuel and gas-oil can be supplied by barge at 200 tons per hour.

**TIME:** Always GMT plus 1 hour.

**HOLIDAYS:** Work can be arranged on the following holidays: 6th January; 19th March; Easter Monday; Ascension Day; 29th June; 28th August (San Augustin); 8th September (Nuestra Senora de Covadangoa); 12th October (La Hispanidad).

Work not done on the following holidays: 1st January; Good Friday; 1st May (San Jose); 1st November (All Saints); 8th December (Immaculate Conception); 25th December (Christmas); Trade Union holiday, 16th July.

**AUTHORITY:** Junta del Puerto Ria de Aviles, Juan Ochoa 9, Aviles.

## BARCELONA: 41.25 N. 02.10 E. (See Plan)

**DOCUMENTS:**

(1) Manifest of Barcelona cargo: one set covering all loading ports; make sure that this manifest is in perfectly good order before ship's berthing, as Customs will board the vessel immediately and take it away as it is; thereafter any omission or excess of pages may lead to a fine. It is important that the Master has copies as Manifests mailed by Agents in loading ports sometimes arrived too late or not at all.
(2) Manifest of Transit Cargo: two sets (same recommendations as above).
(3) 3 Crew Lists.
(4) 1 Negative of Passengers.
(5) 2 sets of Bills of Landing of the Barcelona cargo.
(6) 2 Provisions Lists.

Of items (3), (4) and (6) above several copies will be required for distribution among various authorities, therefore it would be well for the Master to have at least three copies of each ready at hand on arrival. Tobacco allowed per crew member is 3 kg.

All tobacco in excess of the 3 kg. allowed by the Spanish authorities should be manifested and signed by the Spanish Consul at the last port of call before Spain. If there is no Spanish Consul at the last port before calling at Spain, then the consulate of a country friendly to Spain or the port authorities could carry out the same formality. The same procedure must be followed when the vessel loads a cargo of tobacco for discharge in Spanish ports, or when the tobacco cargo is loaded in transit.

If any item of cargo manifested for Barcelona should be discharged in error at any other port in the ship's itinerary before arrival at Spain, there would be a fine imposed here for shortage of goods if no advice of such shortage is given before arrival.

**PILOTAGE:** Pilot boats painted black, with letter "P" in white on each bow. Telegraphic address: "Pilot Station-Barcelona". Required notice of ETA 24 hours before arrival. Signals to be made by vessels requiring Pilot: the letter "G" in sound and/or light.

Pilot boats have no radar and are reluctant to venture more than just outside port entrance in poor visibility. Pilots give priority to vessels nearest port entrance. Pilotage is compulsory and the service is permanent. In case of port congestion vessels remain at anchor at the roads.

**ANCHORAGES:** In the Outer port for small vessels only, with depths over 50 ft. Also at the roads ½ mile away from breakwaters where vessels usually remain at anchor.

**MAX. SIZE:** Only limitation is draft; max. 39 ft.

**HEALTH:** Pratique obtained immediately after berthing, when Health Officer boards vessel. In case of suspected disease or fever on board Master must send a message to Agent, to advise Health Office. Following documents are required by Health Officer upon berthing: Maritime Declaration of Health, Deratisation Certificate, 1 Crew List.

**RADIO:** Aranjuez Radio, call sign EAD.

**TUGS:** Tugs join vessel at entrance of port. Usually use ship's lines; if tug's lines used usual charge 10% of official tariff. It is normal for two tugs to be used for vessels from 5,000 to 15,000 grt.

Ten tugs available, from 300 to 900 h.p.

**BERTHING:** Commercial quay, length 11,300 metres and depths minimum 8 metres, max. 14 metres dependent location. Depth alongside Grain Elevator in Pier Contradique is 32 ft. Pier Barcelona, berths for transoceanic maritime passenger traffic, depths 26 ft. and 31 ft. Shore fenders keep vessel about 1 metre off quay.

**CARGO-HANDLING FACILITIES:** For unloading grain, there is a silo with a 65,000 ton storage capacity, provided with four suction pumps capable of unloading vessels at a rate of 400 tons per hour and loading rail or road trucks at the rate of 200 tons per hour.

Liquid methane reception and gasification plant with a storage capacity for 249,000 cubic metres of liquid gas. Potash reception and loading plant with mechanical loading bridges which can load up to 450 tons per hour of this product.

General cargo handling is fully mechanised and, apart from the pier cranes, there are fork-lift trucks, truck cranes and a palletisation process.

A container wharf with a berthing frontage of 400 increasing to 650 metres, 14 metres water depth, 9·8 acres surface area, with a capacity for 1,250 20-foot containers. Two cranes available at 50 tons and reach of 35 metres. There will be a terminal with berthing space for six ferries for operating a roll-on/roll-off service.

**TANKERS:** There are six berths for oil tankers, max. size 60,000 dwt., discharge rate 1,000 tons per hour, depth alongside 12 metres (2), 11 metres (2), 8·5 metres (2). Diameter of loading lines 4 in. and 8 in., diameter of discharge lines 10 in., 12 in. and some of 18 in.

There is one natural liquid gas berth, depth alongside 12 metres.

There are five berths for inflammable liquids, asphalt, vegetable oil and tallow, depth alongside 12 metres.

**STEVEDORES:** (*a*) Daytime, normal working hours, from 08.00–12.00 and 14.00–18.00 (one shift); (*b*) 08.00–14.00 and 14.00–20.00 (two "intensive" shifts). Night time, from 20.00–02.00 and 02.00–08.00

(two intensive night shifts). Extra costs are involved for intensive shifts. Nightwork is paid on an overtime basis. Average rates for discharge of grains in bulk are about 7,500/8,000 tons per day of 24 consecutive hours; for general cargo a rate of 100 tons within normal working hours.

**MEDICAL:** All medical facilities are available; it would be appreciated for the Master to advise in advance if a crew member is in need of urgent medical attention.

**FRESH WATER:** All piers have water available by shore pipes or by barge. Rate of delivery about 16/20 t.p.h. Rate 150 t.p.h. by barge.

**FUEL:** Fuel oil and gas oil available at "Campsa", installation. It is advisable that Shipowners stem bunkers through their own contractors, with advance notice of 48 hours. Delivery either by barge, or at the bunkering pier of "Campsa". Bunker barges allowed alongside vessel during cargo-handling.

**DEVELOPMENTS:** Lengthening under construction of breakwater Dique del Este, and pier Contradique. A wharf or 6 berths for tankers only, plus 4 berths for vessels loading/unloading crudes in bulk with a depth of 39 ft. Dry dock planned for vessels up to 215 metres length and 40,000 tons.

**GANGWAY/DECK WATCHMEN:** Available but not compulsory.

**OPENING/CLOSING HATCHES:** Normally carried out by crew, except in liner vessels which is contracted for by stevedores.

**CERTIFICATES:** Vessels should have all usual certificates aboard but only the Safety Wireless, Safety Equipment and Deratisation Certificates are required by authorities.

**CUSTOMS ALLOWANCE:** Quantity allowed for each crew member is 200 cigarettes and one bottle wine/spirits.

**CARGO GEAR:**

58 Quay cranes up to 3 tons
52 ,, ,, ,, 6 tons
6 ,, ,, ,, 10 tons
4 ,, ,, ,, 15 tons
146 Mobile cranes 1–50 tons
4 Floating cranes up to 160 tons

**AUTHORITY:** Junta del Puerto de Barcelona, Puerto de la Paz 1, Barcelona 2. Tel. 2219306.

## BILBAO: 43.17 N. 02.55 W.

**DOCUMENTS:**

3 Cargo Manifests.
2 Negative Passengers.
3 Crew Lists.
2 Stores Lists.
2 Crew Personnel Effects Lists.

The maximum quantity of tobacco and/or cigarettes allowed per crew member, Master included, is 3 kilos. Any surplus must be separated and manifested as cargo in transit and the manifest duly visaed by a Spanish Consular Representative at the loading port. Should there be no Spanish Consular Representative of a friendly nation, Port Authority (Custom House) or Chamber of Commerce in the sailing port. In case a vessel carrying an excess amount of tobacco or cigarettes and not in possession of a Manifest duly visaed by the competent Authority is diverted at sea to a Spanish port while on voyage to another, the Master should cable to the Administrator de Aduanas of Bilbao, notifying the diversion and the excess of tobacco manifested without official visa. On arrival the Master should submit the Manifest and other documents to the Custom Authorities.

**PILOTAGE:** Pilotage is compulsory for vessels entering and leaving Bilbao Port. Pilot will board incoming deep laden or ballast tankers in a position about 1 mile South-West of Punta Galea Lighthouse. The pilot ladder for boarding is usually rigged off port side. If the Pilot is unable to board on account of bad weather, the pilot boat will display the signal "follow in my wake" and lead the vessel into the sheltered harbour.

Pilots keep on watch 24 hours on Channel 12.

**ANCHORAGE:** Good anchorage in Outer Harbour inside breakwaters. Depths at LW about 26–33 ft. Also anchorage outside breakwaters, lightening operations sometimes performed when weather good. The recommended anchorage zone for deep-laden vessels is 1·3 miles South-west of Punta Galea Lighthouse in 12 fathoms, sand.

**RESTRICTIONS:** None, except when draft exceeds 13–14 ft. and proceeding to berths inside river, which case must await tide. See "Max. Size".

**MAX. SIZE:** No restrictions length or breadth. Maximum advisable draft 30–31 ft. Tankers: The entrance channel and oil berths are dredged to 44 ft. lowest normal LW, deepest draft recommended to incoming tankers is 43 ft. and vessel must be on pilot station at least 2 hours before HW.

**HEALTH:** If proceeding direct to berth, pratique obtained immediately after berthing. Otherwise, at anchorage on arrival. Case suspected disease or fever on board, Master must radio Agent, to advise Health Office. On berthing Health Authorities require Health Declaration, Derat Certificate and Crew List.

**RADIO:** Cabo Mayor Radio.

**TUGS:** No tugs required for entering port, only for berthing or shifting inside river. Ship's lines used, the tug employed according Pilot's advice.

**BERTHING:** Canal de Deusto 26 ft. alongside. Tankers: Vessels will berth day and night, but vessels deep laden must be on pilot station two hours before HW. Mooring lines should be of polypropylene or fibre, etc.; if wires are used they should have a fibre pennant. For average weather conditions 18 mooring lines are recommended, five head ropes, five stern, four breasts and four springs.

**STEVEDORES:** Very important send advance messages giving ETA. Agent then inform Shippers or Receivers' stevedores. Official working hours Monday/Saturday 0800–1200; 1400–1800 hours.

**MEDICAL:** Medical service must be arranged by the Agent. In emergency send cable in advance to Agent.

**TANKERS:** "Campsa" have private berths at Santurce and Zorrosa. Cargo manifest must be visaed by Spanish Consul, or in absence of Consul by Authority at loading port. Petronor Terminal is located at Santurce, at the entrance of Abra Bilbao. There is a pier of 64 metres with two berths, No. 1 (West) and No. 2 (East). Both berths are fitted with good rubber fenders. The pier is dredged to 14 metres in LW. For crude vessels to discharge, there are four booster pumps on the jetty, reaching a rate of about 1,000 LT per hour.

The West berth is equipped with a bank of five metallic arms, 2–12 in. for unloading crude oil/ballast-deballasting/loading fuel oil; 2–8 in. for loading white products and 1–6 in. for bunkering.

The East berth is equipped with a bank of 4 metallic arms; 2–12 in., 1–8in. for loading white products, 1–6 in. for bunkering.

Masters are requested to advise "Petronorbilbao" by cable on departure and 72 hours in advance and if any changes in the vessel's ETA additional advice is required. Petronor Terminal keeps watch 24 hours on VHF Channels 16 and 12.

**DENSITY:** 1025.

**FRESH WATER:** Always available. Delivery by tugs. Minimum 10 tons.

**FUEL:** Ordinary fuel oil and gas oil available at local "Campsa" refinery. Advisable that Shipowners stem bunkers 48 hours prior arrival. Delivery by barges, or at the bunkering pier. Bunkers available at Petronor. Advise Agent in advance.

**DEVELOPMENTS:** Oil refining plant under construction (Petronor) and completion expected by 1975. Crude oil discharging terminal will be constructed for vessels of up to 200,000 dwt. at that time.

**GANGWAY/DECK WATCHMEN:** Not necessary.

**OPENING/CLOSING HATCHES:** Normally by crew, except in liner vessels, when contracted by stevedores.

**CERTIFICATES:** Have usual documents on board, but only Safety Radio, Safety Equipment and Deratisation Certificates required by authorities.

**CUSTOMS ALLOWANCES:** Normally, customs permit 200 cigarettes, and one bottle wine/spirits per man.

**CARGO GEAR:** Usually shore cranes employed in loading or discharging but if require lightening then ship's derricks used as only one floating crane is available.

**IDENTIFICATION CARDS:** Not required.

**REPAIRS:** Good repair facilities, and several important shipyards.

**DRY DOCKS:** Five graving docks. Biggest: length 152 metres breadth: 20 metres (naval shipyard).

**REPATRIATION:** Good facilities.

**AIRPORT:** About 10 km. from town. Regular services to Madrid and Barcelona. Also direct flights London and Paris.

**TIME:** GMT plus 1 hour (permanent).

**HOLIDAYS:** 1st January; 6th January; 19th March (St. Joseph); Good Thursday afternoon; Good Friday; 1st May (Labour Day); Ascension Day; Corpus Christi; 29th June (St. Peter and St. Paul); 18th July (National Holiday); 31st July (local holiday); 15th August; 12th October; 1st November; 25th December.

**POLICE/AMBULANCE/FIRE:** Police 091; Ambulance (hospital) 41.87.00; Fire 21.30.00.

## CADIZ: 36.30 N. 06.20 W.

**DOCUMENTS:**
Entrance Declaration.
Health Declaration.
List of Crew on Arrival.
List of Crew on Departure.
List of Passengers on Arrival (if applicable).
List of Passengers on Departure (if applicable).

All vessels must be represented by a local Agent who will be responsible for completing the required Customs, Health and Port Authorities documentation.

**PILOTAGE:** International Code Signals used to call pilot. Pilot can be contacted by VHF or through telegraphic address "Praticos Cadiz". Six to eight hours notice of ETA preferred.

Pilots operate a steam launch and a diesel launch both painted black with yellow funnel on which letter "P" is painted in white on both sides. Pilot boat does not remain at station but comes out when ordered. Pilot boards in an area between the Rota light and San Sebastian light. In case of bad weather the pilot will board nearer Los Cochinos shore and meanwhile signal instructions to the vessel until the pilot is able to board.

**ANCHORAGE:** Vessels waiting for a Pilot may anchor in any safe position according to draft and weather conditions. Tankers or deep draft vessels may anchor West of the Diamante buoy in 16–18 metres depth where the Pilot boards at first opportunity.

**RESTRICTIONS:** Entry is restricted only by the depth of the entrance channel, maximum safe draft 30 ft.

**HEALTH:** Master should radio, not more than 50 hours and not less than 5 hours before arrival, the following information to the port authority: name and nationality of ship, date and time of arrival, last port of call, number of passengers and crew aboard, if doctor on board and details of any sickness noted on voyage. Message to be addressed to "Sanidad Maritima Cadiz". International code quarantine signals to be shown on arrival when free pratique will be given provided health situation is satisfactory.

**TUGS:** Normally join vessel off the berths. 7 tugs available, up to 1,500 h.p.

**BERTHING:**
Mole No. 1. 220 metres length, depth alongside 10 metres. L.W.
Mole No. 2. 460 metres length, depth alongside 10 metres. „
Mole No. 3. 440 metres length, depth alongside 10 metres. „
Generalisimo Franco Mole: 365 metres length, depth alongside 10 metres.
Muelle Armamento: 200 metres length, depth alongside 9·50 metres.
Muelle Embacadura: 110 metres length, depth alongside 9·50 metres.

**TANKERS:** 3 tanker berths for vessels up to 27 ft. draft at the piers in the Zona Franca, operated by Campsa. Hoses: Fuel oil 10 in., gas oil 8 in., gasoline 8 in. No slop discharge facilities.

International Terminals Corp. Berth, length 170 metres, depth 9·50 metres.

**FUEL:** Fuel, gas oil and several types of marine diesel can be supplied.

**REPAIRS:** There are three shipyards – Astilleros Espanoles SA, at Cadiz and Matagorda. Empresa Nacional Bazan–Carraca, and several workshops of Auxiliar de la Construccion Naval. All types of repairs can be effected.

**DRY DOCKS:** Largest is 245 metres long, 57 metres wide. In addition Astilleros Espanoles have two floating docks, one of 231 metres length, 24 metres breadth, lifting capacity 39,400 tons, and the other 100 metres length, 17·54 metres breadth lifting capacity 4,500 tons.

At Matagorda, there is a dry dock of 150·97 metres length, 19 metres width, and 6·23 metres max. draft.

**OPENING/CLOSING HATCHES:** This work is normally effected by the stevedores.

**CONSULS:**
Argentina, Belgium, Bolivia, Colombia, Denmark, France, Germany, Greece, Italy, Liberia, Netherlands, Norway, Sweden and Finland, Portugal, Venezuela.

**CUSTOMS ALLOWANCES:** Maximum of three kilos of tobacco for each person on board. All to be declared. Wine or spirits, one decilitre per man per day.

**AIRPORT:** Nearest at Seville, about 150 kms. away. Daily flights to Madrid, Barcelona and overseas.

**TIME:** GMT plus 1 hour all the year round.

**TELEPHONES:** Connection to vessels can be arranged by Agents.

**SHORE LEAVE:** Crew are permitted to go ashore subject to police control.

**DEVELOPMENTS:** Astilleros Espanoles is building a new dry dock to accommodate vessels up to 400,000 tons.

**AUTHORITY:** Comandante Militar de Marina, Comandancia Marina Puerto de Cadiz. Telephone 233902/233903. Cables: Comtemar Cadiz.

## CARTAGENA: 37.35 N. 00.59 W.

**DOCUMENTS:**

6 copies of the Crew List.

6 copies of the Passenger List, or 2 negative copies as the case may be.

2 sets copies Manifests covering cargo destined to Cartagena and carried in transit.

Store Provision List, in duplicate, including items such as: tobacco spirits, radios, coffee, tea, bunkers, and any other items belonging to the vessel.

2 copies of all Personal Effects Lists, from passengers and ship's crew.

The amount of cigarettes allowed for each member of crew/passenger is 3 kilos; any amount over has to be manifested as tobacco in transit, and this manifest must be visaed by a Spanish Consul in the last loading/discharging port. If there is no Spanish Consul in the port of call before Cartagena, the Master is requested to send a cable to: Direccion General de Aduanas, Madrid, quoting as follows: "m.v.'. . .' coming from . . . order to proceed to Cartagena tobacco manifest unlegalised = Master."

This cable to be inserted in the radio log-book, and copy of same to be delivered to local Customs Authorities when boarding the vessel.

**PILOTAGE:** Compulsory. Position of pilot station 37° 34.6′ N. 0° 59′ W. Position with green light of Dique de Curra bearing 000°, and the white light of Las Losas bearing 090°. This is the position at which Pilot normally boards.

Vessels bound for Escombreras wait for Pilot in position 37° 34.2′ N. 0° 59′ W., with green light of Dique de Curra bearing 000° and the green light of Dique Bastarreche bearing 090°.

Pilot launch is a motor-boat with cabin, about 9 metres long, white hull, red below water line, black letter "P" painted on both sides.

When bad weather prohibits Pilot boarding in the above position, vessel may be required to embark Pilot inside the harbour breakwaters.

Vessels call Pilot in daytime by code flag "G", or by sounding three prolonged blasts on the whistle.

At night, Pilot may be called by flashing code signal "PT", or by three prolonged blasts on whistle.

Radio messages, with ETA, may be sent direct to PRACTICOS CARTAGENA with 24 hours notice, and confirmed 12 hours before arrival, messages should include vessel's seawater draft and, if calling for the first time, vessel's length overall. Pilot station equipped with VHF.

**APPROACHES:** Escombreras bank with datum depth of 9·5 metres situated West of Escombreras Island, extends from 200 to 400 metres West of the Eastern tip of the island. This bank is unmarked.

Area of underwater obstructions exists between the coast, the meridian of Santa Ana buoy, and the parallel of Las Losas beacon.

There is a zone used for submarine exercises which is marked on the charts. Occasionally, naval divers carry out exercises in the vicinity of the port entrance. These are accompanied by naval vessels showing appropriate signals.

Ships bound for Escombreras, to enter the port, should steer for a point situated at the intersection of the N.S. line of the red light at the extremity of Curra Pier, and the E.W. line through the green light at the extremity of the Bastarreche Pier, at which point, approximately, the Pilot boards the vessel.

The least recorded depth in the entrance to the port is 25 metres. The approaches to the port of Escombreras do not present any difficulties.

**ANCHORAGE:** Vessels anchored within the port limits should not carry out repairs affecting main engines as the possibility of sudden storms in winter may make it necessary to move to a sheltered anchorage North of Cabo Tinoso, or to put to sea.

Vessels under 29 ft. 6 in. draft may anchor inside the breakwater provided they do not obstruct other vessels' movements.

Anchorage for larger vessels in Cartagena Roads, approx. position 37° 35′ N., 0° 59′ 30″ W. in depths of 40 metres.

Anchorage for tankers off Escombreras in approx. position 37° 34′ N., 0° 58′ 23″ W., in depths of 42 metres.

**MAX. SIZE:** No length limitations. For Cartagena max. draft 31 ft. 6 in. For Escombreras max. draft 68 ft.

**HEALTH:** Free pratique is immediately obtained when vessels berth any time from sunrise to sunset. Port Health Officers, require Maritime Health Declaration, Deratisation Certificate, and copy of crew and passenger lists.

**RADIO:** Cabo Palos Radio, Aranjuez Radio, and/or Gibraltar Radio.

**TUGS:** Three tug-boats 500–1000 h.p. with fire-fighting capabilities. All three tugs on duty 24 hours duly equipped, with two shifts of crew.

Tugs join vessels in vicinity of port entrance, vessel's lines normally used.

The tugs available to assist berthing tankers in Escombreras are all diesel tugs, equipped with fire-fighting equipment. Five tugs available of up to 2,400 h.p.

**STEVEDORES:** In the case of a vessel calling at Cartagena at night time, Sundays or holidays, it is important that Master cable 24 hours in advance to advise his ETA in order that Agents are able to arrange stevedores' operations. Gangs can be called on as follows: on weekly working days 08.00 and 13.30 hours. On Sundays/holidays 08.00 hours (with prior advice to Union by 12.00 hours on Saturdays or day preceding holidays. The official working hours are: Monday/Saturday 08.00 to 12.00 and from 13.30 to 17.30 hours – Sundays/holidays: from 08.00 to 14.00 hours.

**MEDICAL:** Medical services rendered as soon as requested but, in case of emergency, Master required to send urgent cable in advance.

**TANKERS:** These vessels call at port of Escombreras 2 miles away from Cartagena port, this port owned by Refineria de Petroleos de Escombreras S.A. Slop discharge facilities available at Escombreras.

For ships of 250,000 dwt. Berth Number 7, of recent construction, consists of four dolphins, in a line parallel to Bastarreche Pier. Between the first and the third dolphin is situated a loading platform with loading/discharging lines. The centre of this platform is situated at a distance of 230 metres from the head of Bastarreche Pier, bearing 140°.

The least depth in Berth No. 7 is 21·45 metres or 70 ft. 4 in. at the extreme South of the berth. The rest of the area has a depth of between 24 to 28 metres.

The maximum length foreseen for tankers of 250,000 tons dwt. is 250 metres or 1,145 ft., since the total length of the berth is 430 metres.

The maximum allowable draft is 21 metres or 68 ft. 1 in.

Shore lines for crude oil are one of 40 in. diameter and 3,500 metres length, and another of 24 in. diameter and 3,500 metres length.

The Woodfield hose-handling gantry has four 16-in. hoses of which the two outside hoses should be used for loading bunkers as well as for discharging. Connecting flanges of 16 in. diameter, type 150 ASA.

Fresh water can be supplied by pipe-line at all berths at a rate of 45 tons per hour.

Only vessels up to about 100,000 dwt. may be berthed at night.

Eight berths suitable for tankers from 29 ft. 6 in. to 43 ft. draft.

Two berths for LPG carriers up to 29 ft. 6 in. draft.

**FUEL:** At Cartagena, only gas oil available from tank trucks. At Escombreras all grades of fuel available subject to advance notice given.

**FRESH WATER:** Available from quay by hose connections, only on working days. On Sundays/holidays notification to be required before 1400 hours preceding day.

**FIRE PRECAUTIONS:** The port area has its own Fire Department under Supervision of Port Director. Although there is no water-borne equipment available, tug "Brio" will assist as required as well as Cartagena City Fire Department.

**DEVELOPMENTS:** There is a big programme to increase berthing-places by building new piers close to breakwaters, available for three vessels, provided with 4 shore cranes, capacities 3–6 tons each.

**CONSULS:** The following countries are represented in Cartagena:

Finland
France
Sweden
Panama
Peru
Italy
Denmark
Greece
Norway
Holland
Belgium

**GANGWAY/DECK WATCHMEN:** Not compulsory, only used when required by Master under Immigration Police Supervision.

**OPENING/CLOSING HATCHES:** Usually by ship's crew.

**CUSTOMS ALLOWANCES:** 200 cigarettes per each crew member, out of bond. The excess to be declared as cargo in transit. Wine and/or Spirit: One bottle for each crew member or passenger.

**CREW IDENTIFICATION CARDS:** Not required.

**REPAIRS:** There are very good repair facilities. A private shipyard "Empresa Nacional Bazan" and two other private repair shops.

**DRY DOCKS:** One dry dock can accept vessels of 566 ft. length and 73 ft. beam. Two floating docks for vessels up to 333 ft. length.

**REPATRIATION:** All facilities available.

**AIRPORT:** San Janvier airport situated 27 miles from Cartagena with daily service to Madrid, Barcelona and Almeria.

**TIME:** GMT plus 1 hour.

**HOLIDAYS:** 1st January; 6th January; 19th March (St. Joseph); Good Thursday from 14.00 hours; Good Friday; 1st May (Labour Day); Ascension Day; Corpus Christi; 29th June (St. Peter and St. Paul); 18th July (national holiday); 15th August; 12th October; 1st November (All Saints' Day); 25th December.

**POLICE/AMBULANCE/FIRE:** Police tel. 501456; Ambulance 503470; Red Cross 501727; Fire Department 501111; Port Fire Department 503100.

**AUTHORITY:** Capitan de Navio, Comandante Militas de Marina de Cartagena, Comandancia de Marina, tel. 501653.

**AGENT:** Daniel Gomez Gomez, S.A. Mayor, 6–1°, PO Box 100, Tel. 505750 (3 lines)–500156 and 503333. Cables "Frutera", Cartagena. Telex: 68013 Dago.

## CASTELLON DE LA PLANA: 39.58 N. 00.01 W.

**(See Plan)**

**DOCUMENTS:**

Manifest of Castellón cargo: 1 set covering all loading ports; make sure that this manifest is in perfectly good order before ship's berthing, as the Customs will board the vessel immediately and take it away as it is; thereafter any omission or excess of pages may lead to a fine.

Manifest of the Transit cargo: 2 sets (the same recommendations as above).

3 Crew Lists.
2 Negative of Passengers.
2 sets of Bills of Lading of Castellón cargo.
2 Provisions lists.
2 Manifests of personal effects.

**PILOTAGE:** Compulsory, and service is permanent. Pilots board vessels by a cutter in roads near entrance formed by the two breakwaters.

Pilot cutters are painted white and have the letter "P" in black o each bow. Cutters have a blue flag, with letter "P" in white. Signa to be made by vessels requiring Pilot: three long blasts. Telegraphi address: "Praticos, Comandancia Marina, Castellon".

**ANCHORAGE:** Vessels can remain at anchor at the roads. Recommended anchorage: ½ a mile East of lighthouse in depth of 12 metres

**RESTRICTIONS:** Maximum draft 22 ft. for vessels of about 110–12 metres length. For vessels of more 120 metres, to 140 metres lengt maximum draft is 20–21 ft.

**HEALTH:** Pratique obtained immediately after berthing, whe Health Officer boards vessel. In case of suspected disease or feve on board Master must radio Agent to advise the Health Office. Following documents are required by the Health Officer upon berthing Maritime Declaration of Health, Deratisation Certificate, 1 Crew Lis

**RADIO:** Aranjuez Radio, call sign EAD, 36–48 hours prior arriva nearest radio station is El Grao Radio, call sign EAV.

**TUGS:** Tugs join vessels at entrance of port. Vessels of more tha 100 metres length normally use one or two tugs. Ship's ropes used

**STEVEDORES:** Very important that Master sends in advance sho radio notice regarding vessel's ETA so Agent can inform Shippers or Receivers' stevedores accordingly. Official working hours of po are: Monday/Saturday 0830–1230 – 1400–1800 hours.

**MEDICAL:** All kinds of medical services can be arranged. In case crew member needs medical attendance urgently, it is advisable th Master sends a radio message in advance.

**TANKERS:** "Campsa" berth in Muelle Serrano Lloberes.

Esso Petroleos Espanoles, S.A. Refinery Terminal. Breasting Island: Lat. 39° 56′ 7″ N. Long. 00° 01′ 6″ E. for tankers with unlimited length. Depth of water in the berth is about 12·5 m. (41 ft.).

Vessels berth heading either E. or W. The Breasting Island i built on piles. A central platform about 70 m. (230 ft.) long and 15 m (49 ft.) wide will accommodate the loading arms and the island services. Two mooring dolphins are located at about 128 m. (420 ft from the centre of the platform. They are linked with the main pla form by a walkway. The platform elevation from the sea level is a average of 6·8 m. (22 ft.).

Both sides of the Breasting Island central platform and the Easter dolphin are provided with a resilient fendering system. No fendering system is installed on the Western dolphin. Vessels can be docke at both sides of the Breasting Island.

Two "swamped" breasting wires are anchored about 200 m (640 ft.) off both sides of the Breasting Island. Quick-release hooks are provided on the platform corners and on both mooring dolphins.

*Hoses:* Two loading arms of 10″—150 lbs/ASA and two 8″ loadin arms 150 lbs/ASA.

Any vessel from 3,000 dwt. through 37,000 dwt. can be accepte at the Breasting Island having a deepest draft of 37 ft. 6 in.

*Sea berth:* For crude oil cargoes with submarine pipe-line Lat. 39° 56′ 4″ N. Long. 00° 02′ 7″ E. Unlimited length.

Depth of water in the berth is about 25 m. (82 ft.). Vessels ber heading 075/080 true using both anchors forward, with about 280 m (900 ft.) of chain out on each anchor and two swamped mooring leg if it is necessary.

The stern is secured to five lamgar buoys equipped with tw release hooks on each. These buoys have flashing lights.

One navigational range consisting of two lighted buoys, is used t proceed to the sea berth and drop the anchors.

Any vessel from 27,000 dwt. to 165,000 dwt. can be accepted in th sea berth.

Bunkering available. Water available by barge. Provisions availab Pilotage compulsory – Esso Pilots. Tugs: two tugs compulsory.

**BALLAST:** All ballast must be discharged to shore tanks, n exception will be made to this rule. A total of 17,000 cubic m (110,000 bbls) can be received by the Refinery ballast tanks.

**FRESH WATER:** All piers have water available by shore pipe The rate of delivery is about 8–9 tons per hour.

**FUEL:** Available with five days notice and subject to "Campsa berthing availability.

**GANGWAY/DECK WATCHMEN:** Available but not compulsor

**OPENING/CLOSING HATCHES:** Normally carried out by crew

**CERTIFICATES:** Vessels should have usual documents o board, but only the Safety Wireless, Safety Equipment and Der tisation Certificates are required by authorities.

**CUSTOMS ALLOWANCES:** Normally, Customs permit 200 cig rettes per man out of bond and one bottle of spirit per man.

**CARGO GEAR:** All commercial piers served by electric sho cranes able to lift 3, 6 and 8–9 tons.

**CREW IDENTIFICATION CARDS:** Not required.

**CONSULS:** Italian, postal address Plaza Huerto Sogueros, 2-3º- tel. 212288; France, Plaza Borull, 9, 220180; Sweden, Maestro Ripoll 28, 220053; Norway, Trinidad 85, 224511.

**REPAIRS:** Work shop for small repairs.

**REPATRIATION:** Good facilities exist.

**AIRPORT:** Valencia, 70 km. away.

**TIME:** Always GMT plus 1 hour.

**HOLIDAYS:** 1st January; 6th January; 19th March, St. Josep Good Thursday after 2 p.m.; Good Friday; 1st May, Labour Da Ascension Day; Corpus Christi; 14th June, local holiday; 29th Ju St. Peter and St. Paul; 18th July, National holiday; 25th July, S James; 15th August; 12th October; 1st November; 8th Decemb 25th December; and two or three local holidays more, variable.

**POLICE/AMBULANCE/FIRE:** Police: tel. 220516; Ambulan 213944; Fire 221222.

**AGENT:** Gerónimo Mallach Pachés, General Aranda, 22, Castell De La Plana. Telegrams "Gemapa". Tel. 220061, 220064, 222806, 22 (Shipbroker and Stevedore.) Telex: 65541–Gemap–E.

## CASTRO-URDIALES: 43.24 N. 03.14 W.

**DOCUMENTS:**
3 Cargo Manifests. One visaed by the consular authority.
3 Cargo Manifests for other ports if the vessel has called at and loaded in other ports.
3 Ballast Manifests (if the vessel has arrived in ballast).
5 Passenger Lists (if passengers are carried).
5 Captain's Certificates to the effect of "No Passengers" if no passengers are carried.
5 Crew Lists.
5 Stores Lists.
5 Crew's Store Lists – cameras, radios, spirits, cigarettes, etc.
Health Certificate.
Certificate of Derating and fumigation against insects.
4 Bills of Lading.
International Freeboard certificate.
International Safety Certificate.
International Radio Certificate.
Certificate of Stowage of cargo.

**PILOTAGE:** *To request pilotage:* 1. Advise the arrival of the vessel 24 hours in advance. 2. Hoist flag G of the International Flag Code. 3. Anchor within the pilotage limits of the port.

*Port pilotage limits:* Coastal zone comprised between the Onton meridian and that of the Punta del Rabanal at one mile from the coast. The Pilot goes out to a limit of one mile outside the port. There are no means of radio communication with the pilot boat or pilot station. ETA to be given 24 hours in advance. Sound signals to summon the Pilot – three long blasts. In the event of bad weather, the Pilot does not proceed to sea, and the vessel must enter the port and anchor in the bay.

*Anchorage to await Pilot:* In the mouth of the port at one mile distant. The pilot boat carries a blue flag with the white letter "P" upon it. The pilot boat is blue and is a small motor-launch.

**ANCHORAGES:** The best anchorage is 045°–800 m. from the green coloured beacon of the breakwater at the port entrance, in a depth of 12 metres.

**RESTRICTIONS:** There are no entry restrictions. Vessels with a draft greater than six metres cannot enter the port.

**MAX. SIZE:** Length 105 m., draft 5 m., depth at the entrance 9·14 m.

**HEALTH:** The Health Official boards the vessel as soon as it is berthed alongside. In the event of suspected illness or fever, advise Agent by radio and anchor near the port until the Health Doctor authorises entry.

**RADIO:** The best radio station to pass the ETA telegram to consignees or Agents is Santander radio station call sign "EAS". Frequency 500 kHz.

**TUGS:** None available.

**BERTHING:** Irrespective of tide. The S.E. pier has a total length of 980 ft., of which 500 ft. forms the commercial wharf, mainly for coasters sundry cargoes. No cranes. Fresh water supply. Depth 17 ft. at low water.

Iron ore loading tips: Along open coast adjoining Castro-Urdiales are several cantilever piers connected with the Iron Ore Mines, partly sheltered in creeks or small coves. All vessels bound to load iron ore there should clear and apply at Port of Castro Urdiales. Steamers cannot remain at these berths during rough weather but may find good anchorage in roads, or immediate shelter at the port of Castro-Urdiales, or better at Bilbao Harbour 9 miles East.

The Iron Ore Loading Berths (no length limit) are as follows:

| Name | Situation | Approx. ebbtide draft | Loading rate per working hour |
|---|---|---|---|
| Dicido | 1 mile E. | 21 ft. | 800 tons |
| Saltacaballo | 1½ miles E. | 22 ft. | 800 tons |
| Onton | 2 miles E. | 21 ft. | 1,000 tons |

**STEVEDORES:** Ordered by Agent or Shipper. No ETA to stevedores necessary.

**MEDICAL:** It is not necessary for Agent to receive advance notice that medical attention is required. In the port there is a corps of doctors and one of them is always on duty for any emergency. Furthermore, there is a permanent Spanish Red Cross service with ambulances to transport any patient to a large hospital centre. There is also a hospital in this town.

In the case of serious illness, patients are taken by ambulance to the Cruces Medical Aid Centre (province of Vizcaya-Bilbao) 18 kilometres from Castro Urdiales.

International Vaccination Certificates are required.

**DENSITY:** 1016.

**FRESH WATER:** Water may be taken on board at the San Luis Quay (also known as the Ocharan Mazas Quay). By means of hoses and at a rate of delivery of about forty tons per hour.

**FUEL:** Not available.

**GANGWAY/DECK WATCHMEN:** Not necessary.

**OPENING/CLOSING HATCHES:** Carried out by crew.

**CERTIFICATES:** Safety Wireless, Safety Equipment, and Deratisation generally inspected.

**CUSTOMS ALLOWANCE:** Normally 200 cigarettes per man. For longer stay, new allotment out of bond obtainable. Wine/and/or Spirit: one bottle per man.

**CARGO GEAR:** At the small commercial wharf ship's derricks are used. At the iron ore loading berths along the coast with Cantilever Piers, conveyor belt employed with spout at the tip.

**IDENTIFCATION CARDS:** Not required.

**CONSULS:** None.

**REPAIRS:** Limited.

**REPATRIATION:** Crew changes and repatriation can be effected, bearing in mind that any consular negotiation must be made in Bilbao, since there are no Consulates in this port.

**AIRPORT:** Nearest Sondica (Bilbao) 40 km. by road.

**TIME:** Always GMT plus 1 hour.

**HOLIDAYS:** Sundays; 1st January; 19th March (Saint Joseph); April, Holy Thursday and Friday (variable each year); 1st, 23rd May; 13th and 29th June; 18th and 25th July; 15th August; 12th October; 1st November; 25th December. On holidays, work may proceed if requested.

**POLICE/AMBULANCE/FIRE:** Police C.G. tel. 861146; Ambulance Red Cross 861147 and 861191; Hospital 860196; Fire 861294.

**TELEPHONES:** No arrangements for placing telephones on board.

**SHORE LEAVE:** Crew allowed ashore.

**DELAYS:** The only delay that can normally be expected are those due to bad weather.

**AUTHORITY:** Military Marine Adjutant – Port Captain. Tel. 861147. Telegraphic Address: "Ayudamar Castro Urdiales". No telex.

**AGENT:** J. Ibanez, Castro-Urdiales, Muelle 6. Tel. office 860193, home 861176. Telegraphic address "Ibanez".

## CEUTA: 32.54 N. 05.17 W.

**DOCUMENTS:**
Health Declaration.
2 Cargo Manifests.
2 Stores Lists.
4 Crew Lists.
5 Passenger Lists.

**PILOTAGE:** Radio Agent advising ETA 24 hours in advance. International code signals used to call Pilot, or give three long blasts. Sound signal used day and night. Pilot boards within one mile of the breakwater. Pilotage compulsory.

**ANCHORAGE:** N. W. of the harbour in depths from 10 to 12 fathoms, at about 2¼ cables off breakwater but vessels should leave this anchorage with strong winds from E. or W. The bottom off the N. W. side of Muelle de Poniente is mostly rocky. The existence of submarine cables is marked by a hemispherical buoy painted in white, moored at about 3¼ cables bearing 74° from the red light at the head of Muelle de Levante. No light is exhibited. For this reason, anchorage is prohibited to the North of a line extending from the root of Muelle de Levante bearing 298° to position of the buoy already mentioned.

**MAX. SIZE:** Length, 220 metres. Maximum draft, 33 ft. 6 in.

**HEALTH:** Pratique obtained immediately after berthing when vessel boarded by health officials.

**RADIO:** Tangier, or Cadiz Radio.

**TUGS:** Usually two available of 1,200 h.p. Tugs use ship's lines.

**BERTHING:** West Mole five berths for vessels up to 33 ft. 6 in. draft. East Mole: two berths for vessels up to 31 ft. draft. Dato wharf, 2 berths, up to 20 ft. draft.

**STEVEDORES:** Accurate advance notice of ETA necessary to order gangs required. Gangs are ordered at 0730, and 1630 hours. For Sundays and holidays, gangs ordered before 1730 previous day. Average cargo handling rates: General cargo, 7 tons per gang/hour; bagged cargo, 10 tons per gang/hour; drums, 13 tons per gang/hour. Overtime from 2000 hours, Sundays and holidays, 40% surcharge.

**MEDICAL:** Advance notice by radio preferred. Hospital facilities available.

**DENSITY:** About 3·64%.

**FRESH WATER:** Available, but may be some restriction in Summer months.

**FUEL:** All grades available, to be ordered in advance.

**GANGWAY/DECK WATCHMEN:** Available but not essential.

**OPENING/CLOSING HATCHES:** Performed by stevedores.

**CUSTOMS ALLOWANCES:** Maximum 3 kilos tobacco for each crew member. Normal daily consumption of wine and spirits allowed.

**IDENTIFICATION CARDS:** Not required.

**CONSULS:**

**AUTHORITY:** Junta del Puerto Gijon.

## HUELVA: 37.16 N. 06.55 W.

**DOCUMENTS:**

3 Crew Lists.
2 Passenger Lists or a negative.
1 Cargo Manifest of goods destined to Huelva.
Another Manifest covering transit cargo.

2 Store Lists, including tobacco, cigars, cigarettes, coffee, spirits, radios, cameras, etc., in possession of crew. In all cases make and number of radios to be indicated.

Safety Wireless Certificate and Safety Equipment Certificate.

If vessel carries over 3 kilos tobacco per man, the excess to be declared in a separate manifest, which must be visaed by the Spanish Consul at the last port, otherwise vessel is exposed to heavy fine.

**PILOTAGE:** Compulsory. Services from middle to high tide, depending on draft of vessel on arrival or departure. Pilot's motor-boat painted white. Letter "P" in black at both bows. Agent must be in close contact with Pilot Office. Pilots are informed by Agent of ETA at bar. In rough weather Pilots will not be available for entries or sailings. Depths of water depend on location, ranging from 15 ft. to 30 ft. in high tide. Pilot station equipped with VHF Channel 16.

Telegraphic address of Pilots – "Practicos–Huelva", 24 hours notice of ETA required.

At night the regulation lights are exhibited. Contact must be made by VHF to take Pilot on board. Regulation ladder required.

In the event of bad weather the Pilot will board at Cascajera.

**MAX. SIZE:** Max. length for entry to Cascajera, 200 metres. Max. length for entry from Punta del Sebo to Tharsis Quay, 180 metres. Max. draft, at spring tides up to 28 ft. 6 in. entering and 30 ft. sailing to or from Cascajera.

The entry to port is always subject to tides and maximum sizes of vessels able to proceed to inner quay berths will depend upon the berth and the tidal constant.

For max. sizes of tankers, see below.

**PRATIQUE:** As long as Captains of vessels notify Medical Office by cable that there are no sick on board and that the ship proceeds from an area free from contagious diseases as specified by the International Sanitary Regulations, free pratique will be granted to the vessel, although this does not eliminate all the sanitary measures specified in the Exterior Sanitary Regulations in force.

Notice should be given en-route towards the Port of Huelva and sufficiently in advance to permit the free pratique to be granted.

When there is any sickness on board, no operation will be carried out until the vessel or its personnel have been inspected by the Medical Authorities.

The granting of free pratique does not signify that the Yellow Flag may be lowered. This will be done once the Medical Authorities have carried out their inspection or are in possession of the Maritime Health Declaration Form signed by the Captain.

**RADIO:** Nearest Radio Station, Cadiz. Station most used for shipping business Radio Aranjuez, due to larger range, unless vessel within 400/500 miles distance to Cadiz.

**TUGS:** Only used inside harbour. Ship's lines employed, four tugs available. Number required to assist vessels at the discretion of the Pilot in charge.

**BERTHING:** Berths available, depths alongside 15–30 ft.

**STEVEDORES:** 48 hours advice to Agent necessary to engage labour.

**MEDICAL:** Agent must give at least 24 hours advance notice where medical aid is required. There is a provincial hospital. Vaccination certificates against fevers and cholera are issued by the Provincial Health Authority.

**TANKERS:** Rio Gulf de Petroleos operate a SBM tanker-mooring 7 miles offshore, about 20 miles distant from Huelva. Mooring is suitable for vessels 900 ft. long with draft up to 70 ft. salt water. Mooring 66 ft. is used for discharging only. Discharge rate is about 1,300 tons per hour through two 12-in. lines and a 30 in. submarine line.

Within Huelva port, Rio Gulf have two tanker berths, and Campsa have one. The two berths at the "Torre Arenillas" quay permit a draft of 12 metres at low water but the maximum length permitted at the oil quay is 200 metres.

Berth No. 1 (North) loading/discharging:

| | |
|---|---|
| LPG | 8 in. line |
| Gasoline | 10 in. ,, |
| Naphtha | 10 in. ,, |
| Diesel | 10 in. ,, |
| Fuel oil | 10 in. and 12 in. lines |

Berth No. 2 (South) loading/discharging:

| | |
|---|---|
| Benzine | 8 in. line |
| Cyclohexan | 8 in. ,, |
| Gasoline | 10 in. ,, |
| Diesel | 10 in. ,, |
| Distillates | 10 in. ,, |
| Fuel oil | 10 in. and 12 in. lines |

Residues: there is a receiving station near the oil quay for tank residues, together with a product separator. Connection lines are 10 in.

| *Product* | *S.G.* | *A.P.I.* |
|---|---|---|
| Propane | 0·507 | — |
| Butane | 0·573 | — |
| Gasoline 85-Ron | 0·693 | 72·68 |
| Gasoline 96-Ron | 0·735 | 61·02 |
| Campsa G.O. | 0·832 | 38·57 |
| R.D. 2494 | 0·789 | 47·84 |
| Industrial F.O. | 0·945 | 18·24 |

**DENSITY:** Water at this port is salt water. Fresh water, in quantity of 1 in. to 7½ in., only present in heavy rainy weather.

**FRESH WATER:** The supply of drinking water is made at the Eastern (Levante) quay at the rate of 20 tons per hour per vessel. This can also be provided by means of tugs at a rate of 50 and 30 tons per hour.

**FUEL:** Fuel oil and diesel available in main port. Not available at offshore tanker terminal.

**DEVELOPMENTS:** Projects are in being to increase depth of water down to 35 ft. for tankers using the Rio Gulf berths, but this implies dredging of bar and channel, a distance of 8–9 miles; it is not known when the project will be completed.

**GANGWAY/DECK WATCHMEN:** The employment is at the discretion of Masters, who are free to either employ or do without any watchmen.

**OPENING/CLOSING HATCHES:** Normally effected by crew, liner vessels excepted.

**CERTIFICATES:** Safety Wireless, Safety Equipment and Deratisation Certificates should be at hand for production if requested.

**CUSTOMS ALLOWANCES:** 200–300 cigarettes per man out of bond. If necessary permit may be obtained from Customs Authorities to open bond and provide crew with fresh supplies, if stay in port justifies procedure. Wine and/or Spirit Allowances: One/two bottles per man.

**IDENTIFICATION CARDS:** Not necessary.

**CONSULS:**

Belgium
Denmark
Germany
Holland
Norway
Panama
Portugal
Sweden

**REPAIRS:** Any kind in engine room, and hull above water.

**DRY DOCKS:** Only one small dry dock available for vessels up to 3,500 GRT.

**REPATRIATION:** No difficulty in this respect.

**AIRPORT:** The nearest is at Seville – San Pablo, a distance of 100 km. from Huelva.

**TIME:** GMT plus 1 hour.

**HOLIDAYS:** 1st January; 6th January; 20th January; 19th March; Thursday preceding Good Friday as from 2 p.m. Good Friday; 1st May; Corpus Christi; 29th June; 18th July; 3rd August; 15th August; 1st October; 12th October 1st November; 8th December; 25th December.

Permit to work on any of the mentioned holidays (1st January Good Friday and 25th December excepted) can be obtained, but sufficient reasons must be given to justify permission.

**POLICE/AMBULANCE/FIRE:** Police and Civil Guard 216000, 213136; Fire-brigade 214421; Customs 215174.

**SHORE LEAVE:** Permitted.

**TELEPHONES:** No arrangements exist, for the time being, to place telephones on board vessels.

**AUTHORITY:** Marine Military Commandant, Plaza de la Marina, Huelva. Tel. 213700 (3 lines). Telex 75503.

## IBIZA: 38.54 N. 01.28 E. (See Plan)

**DOCUMENTS:** *Passenger Liners:*

5 Crew Lists (Customs, Comandancia de Marina, Health, Police and Consignee).
6 Passenger Lists (Customs, Police, Guardia Civil, Obras del Puerto, Health and Consignee).
2 Lists of crew and passengers personal effects (Customs).
2 Store Lists (Customs).
Health Certificate (Health Department).
2 Cargo Manifest, if any. (Customs).
2 Negative Cargo manifest, if no cargo.

*Cargo Ships:*

5 Crew Lists.
2 Lists of crew personal effects.
2 Store Lists.
Health Certificate.
2 Cargo Manifests.

**PILOTAGE:** Pilotage compulsory. No ships allowed to go further than imaginary line between Botafoch lighthouse and Isla Negra del Este, without a Pilot. Advisable to give 24 hours notice of ETA. Shortly VHF will be installed in Pilot Station and boats. Pilot's boat is of the canoe type with white sides and letter "P" in black on both sides. Vessels requiring a Pilot must give three long whistles. By night flash morse "G".

Pilot will board between Botafoch lighthouse and Isla Negra del Este. In bad weather vessel should follow Pilot's canoe till he is able to board.

**ANCHORAGES:** Anchorage area situated inside of imaginary line: Botafoch–Negra del Este with depths of 40 to 50 ft. Pilot required to anchor.

**MAX. SIZE:** Maximum length for berthing, 135 metres. Maximum draft 21 ft.

**HEALTH:** Report in advance to Pilot if there is any problem. If situation is normal, then, after ship berths the health inspector boards and quickly grants pratique. In event of any suspected disease or fever on board, the Pilot (without boarding), will show the anchorage area, then health inspectors and authorities will board, and give necessary instructions.

Vessels entering after calling at another Spanish port have no problems obtaining pratique.

**TUGS:** Not available.

**STEVEDORES:** Available, ETA required 24 hours in advance.

**MEDICAL:** Civil hospital, military hospital, and three private clinics available.

**TANKERS:** Load/discharge lines 10 in. and 8 in. No facilities for discharging residues. One berth. Maximum draft of the ship is 21 ft.

**FRESH WATER:** Available at the quays. 9 metric tons per hour.

**FUEL:** Available. Notice required, 24 hours.

**FIRE PRECAUTIONS:** Tankers should have a rope over bows, at water level while the ship is berthed.

**DEVELOPMENTS:** Increasing depths in the port to 7 metres. It has also been approved to enlarge berthing quays to 220 metres and 7 metres depth, and build a fishing dock.

**GANGWAY/DECK WATCHMEN:** Performed by crew.

**OPENING/CLOSING HATCHES:** There are no fixed rules on this matter: it varies according to the circumstances.

**CUSTOMS ALLOWANCE:** Quantity permitted for each crew member to be held out of bond: 1,000 cigarettes and 100 cigars. 2 litres of alcohol (whisky, cognac, etc.)

**IDENTIFICATION CARDS:** Required.

**REPAIRS:** There are good work shops and engineers but with limited possibilities. There is a shipbuilder's yard where they build and repair yachts and canoes.

**REPATRIATION:** Facilities for effecting crew changes and arranging any necessary repatriations.

**AIRPORT:** 8 kilometres away, served by scheduled flights daily.

**TIME:** GMT plus 1.

**HOLIDAYS:** Cargo work can be arranged on the official holidays with an extra charge of 40% to the workmen.

New Year; Epiphany (6th January); Saint Joseph (19th March); Maundy Thursday: half-day (the evening); Good Friday; Ascension of our Lord (40 days after Resurrection); Saint Joseph the Artisan (1st May); The Holy Heart (last Friday of June); Exaltation to work (18th July); Santiago, Lord of Spain (25th July); Our Lady of the Snows, Lord of Ibiza (5th August); Ascent of Blessed Virgin Mary to Heaven (15th August); Feast of the Hispanicism (12th October); All Saints' Day (1st November); Festival of the Immaculate Conception (8th December); Christmas Day (25th December).

Although not yet official there will be introduced as a holiday Easter Monday and 26th December.

**POLICE/AMBULANCE/FIRE:** Police 301131; Ambulance 301214; Fire telephone call to the Comandancia de Marina, tel. 301190.

**SERVICES:** Compass adjusting.

**SHORE LEAVE:** Crew members are allowed ashore.

**AUTHORITY:** Comandante de Marina de Ibiza, Comandancia de Marina, tel. 301190.

## MAHON: Minorca, 39.52 N. 04.18 E.

**DOCUMENTS:** *Health Department:*

Health Document.
Crew List.
Passenger List.
Disinfect and Deratisation Certificates.

*Port Authorities:*

Crew, Passenger List.
Ship characteristics and other details.
Cargo.
Indication of previous Port and destination.
Muster Roll, to be produced.

*Customs:*

Cargo Manifest.
Bill of Lading.
Crew List and Passenger List.

Also the Captain will produce, if required, Log book and passports of crew.

**PILOTAGE:** Compulsory to take Pilot in entry, departure and any movements within port. On approaching port, during day, ships will hoist flag corresponding to International Code "I need a Pilot". By night, by means of lights, according to International Code.

During day Pilot's boat is recognised by a square blue flag with letter "P" (painted white) in centre of flag. Pilotage area comprises all the estuary, from inside port to outside Capes of La Mola and San Carlos.

**ANCHORAGES:** Inside are good anchorages, for instance Cala Llorga and Plana de Cala Figuera.

**MAX. SIZE:** Unlimited length and width, but draft is limited to commercial port, 25 ft.; and to anchorage, 43 ft.

**HEALTH:** Hoist correct flags of International Signals Code to indicate health situation of ship. Before pilot boards, he should ask for health situation. If ship suspected, he will lead it to Lazareto anchorage and once anchored Pilot will report by means of Port Authority to Health Department. Port is provided with service of disinfection and means to kill rats.

Ships coming from Middle East and East Africa should carry certificate of anticholeric vaccination, antivariolic, antimarilic and antityphus. Also from North Africa and South America. All others only antivariolic and antityphus.

**TUGS:** A military tug, from Naval Station, can give private services if required with 24 hours notice, payment in advance.

**BERTHING:** Allocated in South of port, in front of Naval Station, The commercial berth is 216 metres long, 25 ft. depth. Berth of Cala Figuera only for oil, limit of draft 25 ft.

**STEVEDORES:** Stevedores available. Loading/discharge rates 200 metric tons per day. They should be notified before 8 a.m., those ships that berth first having preference or priority.

**MEDICAL:** In case of accident or illness of any member of crew medical assistance and hospitalisation will be in civil hospital.

**FRESH WATER:** One supply in Cala Figuera, two in Maritime Club and three in Commercial berth. The minimum supply is 2 metric tons.

**FUEL:** Available from Campsa at Cala Figuera.

**DEVELOPMENT:** Scheme to increase Commercial Quay by another 60 metres, towards the West.

**OPENING/CLOSING HATCHES:** Carried out by crew.

**IDENTIFICATION CARDS:** Not required.

**CONSULS:** No consuls, but consular agents: France, tel. 351907; Holland tel. 351167; Italy tel. 351264.

**REPAIRS:** Small repairs available.

**DRY DOCKS:** Military floating dock of 2,000 metric tons.

**AIRPORT:** Mahon, 5 kilometres distance, with daily flights Peninsula.

**TIME:** GMT plus 1 hour.

**HOLIDAYS:** Work can be arranged on holidays, provided wor men are paid extra.

**POLICE/AMBULANCE/FIRE:** Police 351095; Hospital 3510 Airport firemen 351193.

**TELEPHONES:** No facilities available.

**AUTHORITY:** Capitan de Navio, Comandante Militar de Mar de Menorca; tel. 352394 Estacion Naval de Mahon, tel. 351600.

## MALAGA: 36.43 N. 04.23 W. (See Plan)

**DOCUMENTS:**

5 Crew Lists.
5 Passenger List or Negative.
1 Cargo Manifest of goods destined to Malaga, as well as of oth cargoes in transit.

Store List in duplicate, including tobacco, spirits, radios, et belonging to vessel.

Details list in duplicate of all personal effects of the crew an passengers (tobacco, spirits, cameras, radios etc.). For vesse bigger than 499 grt., Safety Equipment Certificate.

*Note:* Tobacco; In case vessel carries more than 3 kilos of tobacc per man, the excess must be declared in a separate manifest, whi must be visaed by Spanish Consul. In absence of Consul, said doc ment will have to be visaed by an Authority or Consul of a friend nation at the former port clearance. Otherwise, vessel may be sever fined.

**PILOTAGE:** Pilotage is compulsory and service is permane Pilots board vessel by cutter in roads, near entrance formed by tw breakwaters. Pilot cutters are painted white and have letter "P" black on each bow. Cutters have a blue flag hoisted on mast, wi the letter "P" in white, at both sides of flag. At nights, cutters ha white light, and under this light, red one. Entrance between bre waters is 320 metres wide and easily accessible. When weather the roads is rather bad, which seldom happens, vessels approa as close as possible to entrance in order that Pilot can board easi

**ANCHORAGE:** Vessels can anchor outside of breakwaters, roads in depths of 60–70 ft. Anchoring is prohibited in vicinity tanker moorings, the pilot will advise best position. Weather is ba occasionally when East wind blows, during Winter.

**MAX. SIZE:** No restrictions in respect of length or breadth. Ma mum advisable draft to enter port is 31–32 ft. Vessels like "Ne Amsterdam" and "Cristoforo Colombo" enter regularly.

The tanker sealine berth can accept vessels up to 300,000 dwt.

**HEALTH:** If vessels proceed directly to berth, pratique can obtained immediately after berthing. In case of any suspecte disease or fever on board, Master must radio to Agents, in orde that they can advise Health Office.

**RADIO:** Nearest important radio station is Cadiz, or Gibraltar an Aranjuez. Master's messages should be received at least 24 hou before arrival.

**TUGS:** Ship's lines are used, tug-boats are employed accordi to Pilot's advice, and upon request. There is one 600 h.p., anoth 1,000 h.p., and two of 1,500 h.p.

**BERTHING:** Pilots will advise Masters whether vessel has a fr berth or not. Also if she has to anchor in roads. Further particula can also be obtained from Pilot. Berth depths at L.W. from 26 tp 3

**SPECIALISED CARGO-HANDLING FACILITIES:** Quay No includes 15,000 tons silo for grain, and two new electric cranes being set up at present for pneumatic loading and unloadi holding approximately 100 tons per hour.

Quay Number 6 can handle all cargo in bulk. Also three ton fo lifts and a Hyster 620 capable for handling containers up to 26 to There are regular car ferries for passenger and cargo, roll-on/roll-plying daily with Tangiers and weekly with Genoa, Marseilles a Casablanca, all of them direct. For butane gas a special pier bu outside the port Westward, along the beach in front of the dep For LPG and chemicals the inner side of the Western breakwa can be used, though loading and unloading has to be done i tank trucks. 20 ft. containers can be handled with a Hyster fork with appropriate spreader, eventually 30 ft. containers too.

By the end of 1973 it is expected that a 35-ton gantry crane will available at Quay Number 1.

**STEVEDORES:** It is important that Master sends advan message regarding the vessel's ETA. Agents can inform Shipp or Receivers' stevedores accordingly, to arrange operatio properly. Official working hours of port are: Monday/Saturday 08 1200, 1400–1800 hours.

**MEDICAL:** Any kind of medical service can be arranged. In cas crew member needs medical attendance urgently, it is advisab that the Master radio in advance.

**TANKERS:** Petrol pier in the port can take ships of 30,000 to and 31 ft. draft. Ships up to 300,000 dwt tons, can unload at priv sealine berth, a five point buoy mooring in depth of 70 metres.

**DENSITY:** 1025.

**FRESH WATER:** Always available. Deliveries are perfor directly from the quay or occasionally by tugs. Minimum tonna 17 tons, occasionally supplies by tank-barge.

**FUEL:** Ordinary fuel oil and gas oil are available at local refinery "Campsa". It is advisable that Shipowners contract bunkers thro their own contractors, with anticipation of 48 hours, so that or

can be received in time. Delivery can be performed at bunkering pier or by car tankers.
**FIRE PRECAUTIONS:** Tankers perform their operations at the private berths of "Campsa" which have necessary fire precautions.
**DEVELOPMENTS:** An extensive plan to increase facilities of port, and for building new piers. Other important work being effected at breakwater, to erect new piers for large passenger ships.
**GANGWAY/DECK WATCHMEN:** Available but not compulsory.
**OPENING/CLOSING HATCHES:** This work effected normally by crew, except in liner vessels, which is contracted by stevedores.
**CERTIFICATES:** Vessels should have the usual documents on board, but only Safety Wireless, Safety Equipment and Deratisation Certificates are required by authorities.
**CUSTOMS ALLOWANCES:** Normally, customs permit to have 200 cigarettes per man out of bond. One bottle of spirit for each crew member.
**CARGO GEAR:** Usually shore cranes are 2–3–6–15 tons lifting power employed in loading or discharging operations, if vessels require any lightening then vessel derricks are employed, as only one floating crane is available at the port of 25 tons and 15 m. height.
**IDENTIFICATION CARDS:** Not required.
**CONSULS:** Practically all countries have consulates at Malaga.
**REPAIRS:** Facilities of a limited nature.
**DRY DOCKS:** There is a floating dock for vessels up to 2,000 tons.
**REPATRIATION:** Good facilities.
**AIRPORT:** The airport is about 8 km from town. Daily services with Madrid, Barcelona, Seville, Valencia, Tangier and Melilla. Also direct flights to London, Paris, Amsterdam, Brussels, Frankfurt, Stockholm, Helsinki, Geneva, Zurich, Nice.
**TIME:** GMT plus 1 hour.
**HOLIDAYS:** 1st January; 6th January; St. Joseph (19th March); Good Thursday afternoon; Good Friday; Labour Day (1st May); Ascension Day; Corpus Christi; St. Peter and St. Paul (29th June); national holiday (18th July); 25th July; 15th August; 12th October; 1st November; 8th and 25th December.
**POLICE/AMBULANCE/FIRE:** Police, tel. 211302; Ambulance, tel. 275250; Fire, tel. 234567.

## MOTRIL: 36.43 N. 03.30 W. (See Plan)

**DOCUMENTS:**
Health Certificate.
5 Passenger Manifests (1 Health, 2 Customs, 1 Police, 1 Agent).
4 Crew Manifests (1 Health, 2 Customs, 1 Agent).
2 Store Lists (for Customs).
**PILOTAGE:** Arranged by Agent basis ETA given 24 hours in advance. Pilot boat distinguished by painted "P". Night pilotage possible approx. 40% extra. Vessels await Pilot just outside port. Pilot compulsory for all foreign vessels and Spanish vessels arriving from abroad. Pilot should be requested when 1 mile from the port by means of international signals.
**ANCHORAGE:** Area near port. The roads to the East of the port have very little depth. The sea is rough in this area and vessels can run the serious risk of beaching. The best location for anchorage is outside the port 0·25 miles from the port entrance, in 14 to 15 metres of water, mud bottom.
**RESTRICTIONS:** None, vessels may enter day or night.
**MAX. SIZE:** Maximum draft 23 ft. Length maximum 150 metres.
**HEALTH:** Free pratique given on board.
**RADIO:** Telegraph office, no radio.
**TUGS:** Available. One tug 500 h.p.
**CARGO-HANDLING FACILITIES:** Berths equipped with shore cranes, 6-ton capacity, for handling bulk cargoes (grain, ore, fertilisers, etc.).
**STEVEDORES:** No ETA advice necessary. Agents arrange gangs. Work normal hours except holidays.
**MEDICAL:** No advance notice required. All facilities available.
**TANKERS:** Vessel about 8,000 tons. No special requirements.
**DENSITY:** Normal Mediterranean.
**FRESH WATER:** Available.
**FUEL:** Available from Malaga.
**GANGWAY/DECK WATCHMEN:** Agent arranges.
**OPENING/CLOSING HATCHES:** Crew open and close hatches.
**CUSTOMS ALLOWANCE:** Tobacco: About 100 cigarettes per man. Wine and or spirit. None.
**IDENTIFICATION CARDS:** Not necessary.
**CONSULS:** None in Motril. The nearest Granada or Malaga.
**REPAIRS:** No repairs possible.
**REPATRIATION:** Facilities available.
**AIRPORT:** The nearest airports Malaga 105 km. Granada 75 km.
**TIME:** Local time GMT plus 1 hour.
**HOLIDAYS:** see "Malaga."
**POLICE/AMBULANCE/FIRE:** Police 601221; Ambulance 600200; Fire 600200.
**TELEPHONES:** No facilities for placing telephones on board.
**SHORE LEAVE:** Crew members are allowed ashore.
**AUTHORITY:** Harbour Master, Capitan de Corbeta, Ayudantia Militar de Marina, Puerto de Motril (Granada). Tel. 601059.

**AGENT:** Munoz Chapuli, Iribane y Garvayo Asociados S.A., Port Avenue, POB 55, Motril (Granada). Tel. 600627. Cables: Muirigar Motril.

## PALAMOS: 41.50 N. 03.08 E.

**DOCUMENTS:**
3 Crew Lists.
1 Passenger List or negative.
Manifest of goods destination Palamos and in transit.
Store List in duplicate, including tobacco, spirits, radios, etc., belonging to vessel.
Detailed list in duplicate of all personnel effects of crew and passengers (Tobacco, spirits, camera, radios, etc.).
Tobacco – any excess over 3 kilos per person must be stated on a separate manifest duly visaed by Spanish Consul.
If on inspection differences are found in more or less, articles removed and heavy fine imposed.
**PILOTAGE:** Pilotage is compulsory and service is permanent. Often no berths available between 2400 and 0600 owing to port occupied by fishing boats. Pilot is informed by Agent of vessels ETA given 24 hours in advance. When vessels approach the breakwater, pilot will board. Pilot boat is white with a black "P" painted on the side.
**BERTHING:** Depth of water in centre of harbour 42–52 ft. Commercial Wharf length: North 689 ft., depth 18–26 ft. South 246 ft., depth 15–24 ft. Pier Wharf or breakwater: not available for commercial traffic. Length 2,100 ft.
**RESTRICTIONS:** None but for draft. Vessels carrying dangerous cargo should get authorisation for berthing prior to arrival of the ship.
**MAX. SIZE:** No restrictions in respect of length. The maximum advisable draft for berthing is 24 ft. stern, 20 ft. bow.
**HEALTH:** Pratique is obtained immediately after berthing. In case of suspected disease or fever on board the master must radio to Agent in order inform Health Office in time.
**RADIO:** Radio Costera of Barcelona.
**TUGS:** None but Barcelona's tugs could be hired should the vessel's size make it necessary.
**STEVEDORES:** Information about ETA time is advisable to get gangs ready.
**MEDICAL:** Any kind of medical services can be arranged if information received in time.
**FRESH WATER:** Plentiful supply of water by means of hoses from the pier to vessel.
**FUEL:** Can be supplied if required.
**DEVELOPMENTS:** Steps are being taken to get the breakwater in condition to berth tankers and liners.
**GANGWAY/DECK WATCHMEN:** It is not compulsory but advisable at night.
**OPENING/CLOSING HATCHES:** Normally opened/closed by the crew, otherwise according to Charter Party.
**CERTIFICATES:** Usual documents on board. Safety Wireless, Safety Equipment, Deratisation and Registered Tonnage Certificates are the only ones required by the Authorities.
**CUSTOMS ALLOWANCES:** Crew: 3 Kilos tobacco per person. Passengers: 2 kilos per person. Any excess on this amount must be declared on a separate Manifest as in transit. Wine and/or Spirit: Only one bottle per man. Any excess, must be declared on a separate Manifest as cargo in transit and stowed apart from the tobacco and spirits carried under the Provisions List. This Manifest must be visaed by the Spanish Consul at the last port of call. Any infringement of this regulation will subject the vessel to the immediate imposition of heavy fines and confiscation of the excess tobacco.
**IDENTIFICATION CARDS:** Not required.
**CONSULS:**

| | | | |
|---|---|---|---|
| France | Tel. 314472 | Portugal | Tel. 320148 |
| Denmark | ,, 314400 | Sweden | ,, 320850 |
| Italy | ,, 320200 | | |

**REPAIRS:** Only small ones.
**REPATRIATION:** There exist good facilities.
**AIRPORT:** Gerona Airport situated at 40 km. distance and half an hour time by car from Palamos. Regular flight services with Madrid, Barcelona, Palma Mallorca, London, and all over the world with transhipment at Madrid and/or Barcelona.
**TIME:** Always GMT plus 1 hour.
**HOLIDAYS:** New Year's Day (1st January); The Three Wise Men (6th January); St. Joseph (19th March); Good Thursday – afternoon only; Good Friday; Easter Monday; Whit Monday; Labour Day (1st May); Ascension Day; Corpus Christi; Main Holiday (24th June); St. Peter and St. Paul (29th June); National holiday (18th July); St. James (25th July); Our Lady's Assumption (15th August); Columbus Day (12th October); All Saints Day (1st November); Immaculate Conception (8th December); Christmas Day (25th December); Second Christmas Day (26th December).
**POLICE/AMBULANCE/FIRE:** Police 31 41 87; Ambulance 31 43 50; Fire 31 43 50.
**AUTHORITY:** Captain of the Port.

## PALMA, Majorca: 39.34 N. 02.38 E.

**PILOTAGE:** Compulsory. Order through Agent.
**ANCHORAGE:** In outer harbour in depths up to 13 metres.
**RESTRICTIONS:** Depth in harbour entrance up to 15 metres.
**TUGS:** Available if required.
**VHF:** The Spanish Telephone Company has established a station for ship-to-shore communications.
**BERTHING:** Quays at Puerto Pi with 12 metres depth alongside. Quays at Puerto de Palma with up to 10 metres depth alongside.
**FUEL:** Supplied at the quays, rate 150 tons per hour.

**FRESH WATER:** Available at the quays.
**AIRPORT:** Palma Airport well connected with the Peninsula (mainland) and with foreign airports.

## PASAJES: 43.21 N. 01.54 W. (See Plan)

**PORT LIMITS:** In this port a vessel is considered to be an "arrived ship" (subject to C/P Terms) when the Pilot leaves the vessel once she is inside the harbour. Can be on the roads awaiting for berth or alongside the quay. The laytime will commence when the Master has delivered by writing the notice of readiness.

**DOCUMENTS:**
4 Crew Lists.
2 Passenger Lists or negative.
2 Cargo Manifests with an individual copy of each Bill of Lading for parcels to be discharged at port of Pasajes.
Copy of Manifest covering other cargo on board in transit for other ports.
Stores List in duplicate, including tobacco, cigarettes, spirits, radios, etc., belonging to the vessel.
Detailed Crew's Stores List, in duplicate, of all personal effects pertaining to crew and passengers (tobacco, cigarettes, spirits, cameras, radios, arms, etc.).
For vessels exceeding 499 tons grt Safety Manifest Certificate; Safety Equipment Certificate, Deratisation Certificate should be on board ready for production.

**PILOTAGE:** Pilot service is compulsory and permanent. Pilots board vessel in an area about one-and-a-half miles out from leading lights of entrance of port. The telegraphic address is: Corporacion Practicos, Pasajes. Notice should be given 24 hours before arrival; generally Agents keep Pilots informed of vessel's time of arrival when they are advised by Masters. VHF service in operation.

Pilots' cutter is painted in naval-grey with letter "P" painted in white on both sides of bridge; flag with letter "P" in white, is hoisted on cutters' mast.

International pilot signals are used by Pilots, by means of Aldis lamps, when approaching vessel at night. International light and sound signals to be made by vessel when requiring the Pilot.

In event of bad weather Pilots cannot board vessel at usual one/one-and-a-half miles location. Then vessel has to wait for instructions (VHF or radio) for coming in port.

With respect to boarding and safety measures the international safety regulations are to be carried out.

**ANCHORAGES:** A limited number of vessels may anchor in roads inside the port, in good shelter. Depth in area of anchorage is 25–30 ft.

**RESTRICTIONS:** The entrance channel has a length of 1,200 metres, breadth 80–120 metres and a depth of 20 metres LWS. Vessels over 130 metres length must enter at high water and in daylight.

**MAX. SIZE:** 170 metres length and 28 ft. draft. When dredging works are completed in the entrance channel, the port will be able to accept vessels of up to 180 metres length and 30 ft. draft.

**HEALTH:** If vessels proceed directly to berth pratique can be obtained immediately upon berthing. Vessels anchored in bay, pratique can be obtained after anchoring. In case of any suspected disease or fever on board, the Master must advise the Agents, by radio, in order they inform the Sanitary Authorities in advance.

**RADIO:** Nearest Radio Station is Cabo Mayor Radio. Messages by radio-telephone can be transmitted via Radio Arcachon (France). Notice of ETA should be sent to Agent 24 hours before arrival.

**TUGS:** No tug-boats required for vessels of normal steering when entering port. Tug-boats are required for berthing or shifting to and/or from quays Muelle De Ancho, Muelle De Molinao, Muelle De Capuchinos for vessels from 80 metres length on. Ship's lines are used and tug-boats are employed according to Pilot's advice.

Eleven tugs available, the largest being 800 and 1,250 h.p. respectively.

**BERTHING:** Berths are appointed by Port Aurhorities after notice of arrival and information regarding cargo given by Agent. Pilots inform Masters of location of berth appointed, if any. No tidal difficulties for berthing or shifting inside the port.

Berths belonging to Port Authority.

| *Name* | *Length* (m.) | *Depth* (m.) |
|---|---|---|
| Ancho | 305·40 | 10·00 |
| Molinao | 348·60 | 10·00 |
| Capuchinos | 298·30 | 10·00 |
| Petroleos | 159·50 | 10·00 |
| Lezo. 1 | 298·40 | 10·00 |
| Lezo. 2 | 163·20 | 10·00 |
| Transatlantic | 234·10 | 8·00 |
| Avanzado (North) | 63·60 | 6·00 |
| ,, (East) | 114·60 | 6·00 |
| ,, (West) | 120·30 | 6·00 |
| Petrol Basin | 50·00 | 6·00 |
| Herrera | 422·80 | 5·00 |
| Reloj | 240·00 | 5·00 |

**CARGO HANDLING:** Berth equipped for containers with two cranes of 12 tons. A new quay under construction for roll-on/roll-off traffic. There are two berths for discharging through pipe-line; tallow, codfish-oil, etc.

Whenever a vessel arrives with inflammable products, such as gas, propane, etc., the quey where vessel is discharging is fenced off.

**CRANES:**

| *No.* | *Capacity* (metric) |
|---|---|
| 8 | 3 tons |
| 13 | $3\frac{1}{2}$–6 tons |
| 13 | 6 tons |
| 1 | 6–10 tons |
| 7 | 12 tons |
| 2 | 30 tons |

**STEVEDORES:** ETA advice should be received by Agent 24 hours before arrival in order arrange loading/unloading operations with stevedores. The official working time in the port is: Monday/Saturday 0800 to 1200 and 1330 to 1730 hours.

**MEDICAL:** Any kind of medical assistance is available. In case urgent surgical or medical assistance required on vessel's arrival, Agent should be timely informed for making the necessary arrangements.

No particular inoculations required or vaccination/fever certificates to be produced unless epidemic at port wherefrom vessel is proceeding or has called during voyage.

**TANKERS:** Slop discharge to shore possible under agreement. Oil/tallow/asphalt-carriers berth alongside quays with 30 ft. of water. Diameter of discharge shore-lines are 6 in. and 8 in.

**FRESH WATER:** Fresh water available at all wharves. Rate of delivery 70 cu/m. per hour.

**FUEL:** Fuel supplied at Ancho, Molinao, Capuchinos and Petroleos Wharves by CAMPSA. Rate 100 t.p.h. Owners should stem the bunkers with CAMPSA 48 hours before delivery.

**FIRE PRECAUTIONS:** No specific precautions required unless the vessel carries inflammable cargo. Special harbour fire-fighting corps.

**DEVELOPMENTS:** Extensive developments respecting the construction of new quays and amelioration of the entrance channel are actually under way. The works in the entrance channel will permit a draft and length increase.

**GANGWAY/DECK WATCHMEN:** Not compulsory. Shore watchmen available.

**OPENING/CLOSING HATCHES:** Normally carried out by crew.

**CERTIFICATES:** To be produced if required, specially Safety Wireless, Safety Equipment and Deratisation Certificates.

**CUSTOMS ALLOWANCES:** In case the vessel carries more than three kilos tobacco per each crew member and more than two kilos per passenger, the excess must be declared in a separate Manifest which must be legalised by the Spanish Consular Authorities. In absence of Spanish Consular Authorities that Manifest will have to be legalised by an Authority of last port of clearance wherefrom the vessel proceeds. Prudent, limited amount of spirits allowed per man.

**IDENTIFICATION CARDS:** Not required.

**CONSULS:** Consulates/Vice-Consulates at San Sebastian and/or Pasajes:

Argentina
Belgium
Brazil
Columbia
Costa Rica
Chile
Denmark
El Salvador
Finland
France
Germany
Great Britain
Greece
Italy
Netherlands
Norway
Panama
Paraguay
Peru
Portugal
Sweden

**REPAIRS:** Repair shops and shipyards available, where repairs or overhauls may be carried out.

**DRY DOCKS:** One floating dock 66·27 metres long, 23·25 metres wide, 9·125 metres draft. with lifting power of 1,900 tons. Two slipways (one for vessels of up to 1,000 tons – one for vessels of up to 300 tons).

**REPATRIATION:** Good facilities for repatriation.

**AIRPORT:** Airport of Fuenterrabia is situated at 15 km. from Pasajes. Regular daily services with Madrid and Barcelona.

**TIME:** GMT plus 1 hour.

**HOLIDAYS:** 1st January; 6th January; 19th March; Maundy Thursday (afternoon); Good Friday; 1st May; Ascension Day; Corpus Christi; 29th June; 7th July; 18th July; 25th July; 31st July; 15th August; 12th October; 1st November; 8th December; 25th December.

**POLICE/AMBULANCE/FIRE:** Police 351841; Ambulance 41414 Fire from 08.00 to 19.30 tel. 351400, from 19.30 to 08.00 tel. 352391; Red Cross (local) 351032; Hospital, San Sebastian, 423632.

**TELEPHONES:** No possibility of placing telephones on board.

**SERVICES:** Divers, compass adjusting.

**SHORE LEAVE:** Crew allowed to land immediately upon arrival.

**AGENT:** Sobrinos De. M. Camara Y Compania, Telegrams "Camara". Tel. 357045, 357046 and 357047. Telex 36241.

(Shipbrokers, Customs/Forwarding Agents, Chartering Agents Lloyd's Sub-Agents.)

## RIBADEO: 43.33 N. 07.05 W.

**DOCUMENTS:**
Manifest of Cargo, including cargo in transit.
3 Crew Lists.
2 Passenger Lists or negative.
2 Stores Lists.
If vessel carries over 3 kilos tobacco per man, the excess to be declared in a separate manifest which must be visaed by Spanish Consul at last port, otherwise is exposed to heavy fine.

**PILOTAGE:** Prior advice of ETA required by Pilot, who boards at the mouth of the river at the time advised by Agent. Pilot boat is white-painted motor launch, carrying international pilot signals.

In case of bad weather, Pilot will instruct vessel by signals to proceed to anchorage or to berth.

The Pilot always boards on the lee side, in the latitude of Isla Pancha.

**ANCHORAGE:** At Ensenada de Arneo, approx. position 43° 33′ N. 7° 01.6′ W. in depth of 9 metres LW.

**RESTRICTIONS:** Vessels enter night and day, limited only by draft and state of tide.

**MAX. SIZE:** Length and beam not limited. Max. draft 15 ft.

**HEALTH:** Pratique given on arrival on production of clean Bill of Health. International quarantine signals to be used. Port Authorities to be advised if any case of suspected disease or fever on board.

**RADIO:** Messages may be routed through coastal stations at Vigo, La Coruna or Gijon.

**TUGS:** None available.

**STEVEDORES:** Stevedore services operated only by Servicio de Trabajadores Portuarios.

**BERTHING:** Vessels may berth at the mole at any time, or state of tide, according to draft.

**MEDICAL:** There are two clinics and one hospital locally. Advance notice not essential.

**DENSITY:** 1025.

**FRESH WATER:** Water connections exist along the length of the mole. Rate, 20 tons per hour.

**FUEL:** There is a gas oil supply for small vessels, rate 5 tons per hour.

**GANGWAY/DECK WATCHMEN:** None required.

**OPENING/CLOSING HATCHES:** Performed by crew.

**CUSTOMS ALLOWANCES:** 200 cigarettes and one bottle wine/spirits per man.

**CONSULS:** Nearest at La Coruna.

**REPAIRS:** Minor mechanical repairs can be effected. Slipway for vessels up to 200 tons.

**AIRPORT:** Nearest at La Coruna, 150 km. away, or Aviles, 165 km. away, with regular services to Madrid.

**TIME:** GMT plus one hour all year round.

**POLICE/AMBULANCE/FIRE:** Tel. Ribadeo 110650.

**AUTHORITY:** Ayudante Militar de Marina, C/San Roque 12. Tel. 110005.

## ROSAS: 42.14 N. 03.10 E.

**DOCUMENTS:**

Crew List.
Passenger List.
(One of each) Ship's Papers.

**PILOTAGE:** No pilots in this port.

**ANCHORAGE:** Bay of Rosas is anchorage area.

**MAX. SIZE:** Draft in Commercial Port is 4 metres, which berths cargo ships of about 1,000 metric tons of net register.

**HEALTH:** Once ship is anchored in the bay it requires pratique by means of signals, and by raising the yellow health flag. When vessel entering after calling at another port in the same country, this procedure is not required; health inspector boards at the quay side.

**RADIO:** No radio station in the port, but can contact Coastal Radio Station of Barcelona (1730 kc/s. – 173·4 m.), power 150 W.

**TUGS:** None.

**BERTHING:** Advisable during daylight only.

**MEDICAL:** Port Health Doctor available. Hospitals 18 kilometres distance.

**FRESH WATER:** Available at Commercial Port at rate of 8 to 10 metric tons per hour.

**FUEL:** None available.

**POLICE/AMBULANCE/FIRE:** Police Service 25–62–72; Ambulance Service 24–21–20; Fire Service 24–10–00.

**AUTHORITY:** Ayudante Militar de Marina de Rosas. Tel. 25–63–23

## SAGUNTO: 39.42 N. 00.14 W.

**PORT LIMITS:** The East/West line through the point of Cape Escollera de Levante.

**DOCUMENTS:**

2 copies Entrance Manifest.
4 copies Crew List.
Passenger List disembarking at this port.
Passenger List in transit.

Refer to "Barcelona" for other important information concerning Documentation.

**PILOTAGE:** Port is privately owned, and Pilots employed by Altos Hornos de Viscaya S.A. As Pilots are employed in Consignees office, no separate ETA is necessary. They are sent out to meet vessels as required. Pilot boat is not fitted with radar or VHF. Boat displays signals in accordance with international regulations.

**ANCHORAGE:** Bearing 073° from Cape Escollera de Levante.

**RESTRICTIONS:** Delays may be caused by berth being occupied. Larger vessels may be delayed by bad weather (the Levante), as dredged channel is narrow.

**MAX. SIZE:** Draft 29 ft. 5 in. No other limitations.

**HEALTH:** Pratique can be arranged at any time by Consignees.

**RADIO:** Cadiz Radio-EAC, Cabo Palos Radio-EAP.

**TUGS:** Normally join vessel either in anchorage or ½ mile from entrance. Ship's lines are used. Tugs should be ordered in ETA message also mentioning vessels length and cargo.

**BERTHING:** Subject to berth occupation and to berthing priority that Altos Hornos gives to different cargoes. Overnight berthing is allowed, in cases of emergency, or for ship safety.

**STEVEDORES:** Employed by consignees.

**MEDICAL:** Medical assistance should be ordered in advance. All kinds of medical assistance available. One hospital owned by Altos Hornos.

**TANKERS:** No facilities.

**DENSITY:** Salt water.

**FRESH WATER:** Available.

**FUEL:** None available.

**FIRE PRECAUTIONS:** Fire service organised by Altos Hornos.

**GANGWAY/DECK WATCHMEN:** Usually by crew. The Civil Guard keep watch on all ships for contraband.

**OPENING/CLOSING HATCHES:** Effected by ship's crew.

**DEVELOPMENTS:** Port to be expanded during the next five years to accommodate 300,000 tonners, at specialised cargo handling facilities.

**CUSTOMS ALLOWANCES:** 200 cigarettes only. One bottle spirits per man but bottle should be opened. Spanish spirits allowed; one bottle per man. No control of Spanish wines.

**IDENTIFICATION CARDS:** Passport only.

**CONSULS:** Nearest at Valencia.

**REPAIRS:** No facilities exist.

**REPATRIATION:** Facilities for effecting crew changes and arranging repatriation.

**AIRPORT:** Manises Valencia, 40 kilometres away.

**TIME:** GMT plus 1 hour.

**HOLIDAYS:** On religious festivals or Sundays no cargo work can be arranged. These are as follows: Our Lady of the Marine (16th July) no cargo work; National Festivity (18th July) no work; National Festivity (25th July) no work; Hispanic Festivity (12th October) no work; Maundy Thursday, work can be done till 1400 hours; Good Friday, no work.

**TELEPHONES:** None on board. Telephones placed in Boat house and Pilots' office.

**SHORE LEAVE:** Crew members allowed ashore.

**AUTHORITY:** Ayudante Militar de Marina, Calle General Mola No. 75. Tel. No. 5.

## SAN FELIU DE GUIXOLS (Gerona): 41.46 N. 03.01 E.

**GENERAL:** Refer to Palamos for all general information.

**PILOTAGE:** Pilotage is compulsory. Service between 07.00 to 24.00 hours.

**ANCHORAGE:** Vessels arriving after midnight or due to port congestion are anchored outside the breakwater.

**MAX. SIZE:** The maximum advisable draft for berthing is 25 ft. and up to 115 metres length.

**TUGS:** No tugs available.

**BERTHING:** Due to the fact that a few vessels can work at the same time, it is advisable to know as soon as possible the ETA for berthing arrangements.

| | | |
|---|---|---|
| Commercial Wharf. | Length 108 m. | Depth 24–25 ft. |
| Breakwater | Length 116 m. | Depth 27–28 ft. |

A pier for coasting vessels with a maximum draft of 18 ft.

**MEDICAL:** Any kind of medical services can be obtained in San Feliu or Gerona hospital.

**FRESH WATER:** By means of hoses from the pier.

**FUEL:** Can be supplied in small quantities.

**CARGO GEAR:** Commercial pier is served by an electric crane able to lift up to 6 tons. Normally vessels derricks are used.

## SANTANDER: 43.28 N. 03.49 W.

**PORT LIMITS:** Between Cabo Menor and Punta Galizano.

**DOCUMENTS:**

5 crew lists.
7 passenger lists, or 3 negative.
3 cargo manifests of the goods destined to the port of Santander, two sets of manifests for cargoes in transit.
Store list in triplicate, including tobacco, spirits, radios, etc., belonging to the vessel.
Detailed list in triplicate of all personal effects of crew and passengers (tobacco, spirits, cameras, souvenirs, radios, etc.).
For vessels exceeding 499 grt: Safety wireless certificate and Safety equipment certificate.

Legalisation required for manifests covering tobacco and tobacco products. This legalisation to be effected at the port prior to the first Spanish port of call.

Master and each member of crew of vessel can carry for his own consumption up to 3 kilos of tobacco in whatever form, and, if passengers are carried, up to 2 kilos per passenger, all of which must be declared in provisions list (1 kilo of tobacco = 1,000 cigarettes = 100 cigars). If Masters carry greater quantity than stated above, it cannot be manifested as tobacco for consumption on board, but must be included in Consular Manifest as being in transit, and as such must be separated in the holds from other cargo and hatches or lockers will be sealed by Customs until ship leaves Spanish waters. This Consular Manifest has to be legalised by a Spanish Consul. In the absence of Consul, said document will have to be visaed by an Authority of the former port of clearance. Otherwise, vessel would be severely fined.

**PILOTAGE:** Compulsory and service is permanent. Pilots board vessel by a cutter at the road, near the entrance off Mouro Island.

Pilot cutters are painted white and have the letter "P" in black, on each bow. Cutters have blue flag with letter "P" in white, at both sides of flag. At night cutters have a white light, under this a red one. VHF available.

**ANCHORAGES:** The harbour consists of a large bay which provides good anchorage.

**RESTRICTIONS:** Entrance is well marked and there is no bar. Depth at entrance is at max. (dependent on tides) 33 ft.

**MAX. SIZE:** No restriction in respect of length or breadth, the maximum advisable draft to enter port is 33 ft.

**HEALTH:** If the vessels proceed directly to berth, pratique can be obtained immediately after berthing. Otherwise, at anchorage at vessel's arrival.

If vessel has sickness on board of a contagious nature Masters should advise Health Authorities by radio, and they will examine patients immediately upon arrival, to enable vessel to be granted free pratique. If vessel has to be fumigated or deratised a charge is made.

**RADIO:** Nearest important radio station is Cabo Mayor Radio, and it is advisable that messages received at least 24 hours before arrival.

**TUGS:** No tug-boats required for entering the port, only for berthing or shifting when in port. Ship's lines are used, and tug-boats are employed according to Pilot's advice.

**BERTHING:**

| | *Length* | *Depth* |
|---|---|---|
| Calderon quay | 650 ft. | 12 ft. |
| Maura/Albareda quay | 423 ft. | 12 ft. |
| Bloques quay | 3,940 ft. | 30 ft. |
| Anaos ,, | | 32 ft. |
| Maliaño ,, | | 27 ft. |
| Maliaño ,, North Section | 1,500 ft. | 32 ft. |
| Campsa quays | 900 ft. | 24–28 ft. |
| Nueva Montaña quay | 350 ft. | 18 ft. |

All depths of water quoted above correspond to LWOST and 13–14 ft. should be added for depths at HWOST. Bottom is generally soft. Calatrava Wharf: for discharge of chemicals. Depth alongside 34 ft. with overall length limitation of 980 ft. Up River, at Astillero, beyond the harbour area, there is one spout called Orconera Tip for loading iron ore. Vessels up to 260–270 ft. length are allowed with a maximum draught, fully loaded, of 19 ft. Loaded vessels can only sail from that place at high water. A modern installation for dismantling and scrapping vessels is operating up river, on the way to Astillero.

**CARGO-HANDLING FACILITIES:** There are berths for handling bulk cargoes, grain, ore, coal, etc. There are also berths for handling bulk liquids chemicals. Berth available for roll-on/roll-off traffic.

**STEVEDORES:** It is very important that Masters send advance notice regarding vessel's ETA. With this notice, Agents can inform Shippers or Receivers' stevedores accordingly. Official working hours of port, are: Monday/Saturday: 0800–1200; 1400–1800.

**MEDICAL:** Any kind of medical services can be arranged.

**TANKERS:** "Campsa" (Spanish State Monopoly) has private berths. Installation is served by two identical concrete wharves situated in Nueva Montaña Basin, berthing space of which is 500 ft. with a depth alongside of 29 ft. New wharf under construction for tankers up to 35,000 dwt.

**DENSITY:** Sea water.

**FRESH WATER:** Always available. Supply is performed by tug-boats and from shore connections at various quays.

**FUEL:** Ordinary fuel, diesel and gas oil are available at "Campsa". Advisable that shipowners stem bunkers through their own Contractors, with an anticipation (at least )of 48 hours. Delivery can be performed either by tank-trucks or at bunkering pier.

**DEVELOPMENTS:** There is an extensive plan to increase the facilities of port, and also for building new piers. A new basin named Puerto de Raos is under construction (19,000 ft. of new quay line) including container terminal.

**GANGWAY/DECK WATCHMEN:** Not compulsory but available upon request.

**OPENING/CLOSING HATCHES:** Effected normally by crew, except in liner vessels, which is contracted by stevedores.

**SHIP'S CERTIFICATES:** Vessels should have the usual documents on board, but only the Safety Wireless, Safety Equipment and Deratisation Certificates are required by Authorities.

**CUSTOMS ALLOWANCE:** Normally, Customs permit to have 200 cigarettes per man out of bond. Additional quantities needed depend on the stay of ship in port. One bottle of spirit per man.

**CARGO GEAR:** Shore cranes are usually employed in loading/discharging operations.

| | | |
|---|---|---|
| 1 | fixed electric crane on Maura concrete quay | 30 T. |
| 4 | movable electric cranes on Maura quay | 3–6 T. |
| 9 | ,, ,, ,, Bloques quay | 3–6 T. |
| 11 | ,, ,, ,, Maliaño quay | 3–6 T. |

**TELEPHONES:** On very special instances, can be arranged.

**SERVICES:** Available for tank cleaning, washings, compass adjusting, hull cleaning whilst floating, radio installation repairs, etc.

**SHORE LEAVE:** Crew allowed ashore at any time.

**AGENT:** Modesto Pineiro y Compania, S.R.C. PO Box 14, Paseo de Pereda, num. 27, Santander.

Telegrams "Pineiro-Santander". Tel. 273600. Telex 35832. (Shipbrokers, stevedores and chartering Agents, Lloyd's Sub-agents. Greek, Netherlands and Peruvian Consulates.)

## SEVILLE: 37.25 N. 06.00 W.

**DOCUMENTS:**

3 Crew Lists.
3 Passenger Lists.
2 Cargo Manifests, including cargo for discharge and in transit.
Declaration of Health
2 Lists of Provisions and Stores.
2 copies of Bills of Lading.

If vessel carries over 3 kilos tobacco per man the excess to be declared in a separate manifest which must be visaed by Spanish Consul at last port, otherwise is exposed to heavy fine.

**PILOTAGE:** *At the Bar:* Vessels may commence to enter and leave the river one and a half hours after low water. Bar Pilots are stationed at Chipiona and come out to board vessels when requested, 2 miles North of Chipiona Lighthouse.

Pilot motor launches about 9 metres long, painted white with black "P" on sides. They carry regulation lights and signals day and night.

*River Pilots:* Vessels should radio their ETA at least 24 hours in advance to "Practicos Sevilla". River Pilots are stationed at the pier at Bonanza, 36.48 N. 06.20 W. Sound signal to call Pilot is three long blasts. Pilot boards from white-painted launch marked by black letter "P" and carrying regulation signals. Pilots require means of embarkation in accordance with International Conventions.

**ANCHORAGE:** At Bonanza, in depth of 20 ft. below chart datum.

**RESTRICTIONS:** Navigation in the river above Bonanza is prohibited at night to vessels of more than 115 metres length, and 18 ft. draft, and to tankers or vessels with dangerous cargoes.

Draft is controlled by height of tide and this should be ascertained by Owners or Agents in advance for the probable date of entry.

**MAX. SIZE:** Length 185 metres, beam 24 metres, maximum draft about 24 ft. dependent on height of tide. Tankers are required to have an additional 1 ft. keel clearance.

**HEALTH:** Pratique is obtained on arrival at Bonanza, on presentation of International Health Certificates.

**RADIO:** Coastal stations of Cadiz, EAC, or Aranjuez, EAD 3.

**TUGS:** Normally join vessel in the anteport. Ship's tow line is used.

**BRIDGES:** Vessels berthing at Delicias Quay must pass through the Alfonso XIII drawbridge. May be opened at any time of day.

**STEVEDORES:** 24 hours notice should be given by Agents and confirmed 12 hours before vessels arrival.

**MEDICAL:** All medical and hospital facilities available.

**TANKERS:** There are two berths, depth alongside 20 ft.

At Quay No. 2, hoses 8-in. diameter
At Quay No. 3, hoses 8 and 10-in. diameter.

**DENSITY:** Fresh water. The tide has no influence at Seville.

**FUEL:** All grades available.
**GANGWAY/DECK WATCHMEN:** Not considered necessary. All quays are watched by the Guardia Civil.
**OPENING/CLOSING HATCHES:** Performed by ship's crew.
**CUSTOMS ALLOWANCES:** 3 kilos tobacco per crewman, and 2 kilos per passenger; this includes tobacco in bonded stores. No restriction on wines/spirits.
**IDENTIFICATION CARDS:** Not required.
**CONSULS:** The following countries are represented at Seville:

Belgium
Bolivia
Colombia
Cuba
Chile
Denmark
Dominican Republic
W. Germany
Great Britain
Greece
Honduras
Italy
Liberia
Nicaragua
Netherlands
Panama
Peru
Portugal
Sweden
Uruguay
Venezuela
United States

**REPAIRS:** All types of repairs can be effected.
**DRY DOCK:** Astilleros Espanoles S.A. have one dock, length 149 metres, breadth 25 metres.
**REPATRIATION:** All facilities available.
**AIRPORT:** Situated 12 km. away, regular daily flights to Madrid, Barcelona, other parts of Spain. Some transatlantic flights.
**TIME:** GMT plus one hour, all year round.
**HOLIDAYS:** 1st January; 6th January; 19th March; Maundy Thursday; Good Friday; 1st May; Ascension Day; Corpus Christi; 29th June; 12th October; 1st November; 8th December; 25th December. All holidays may be worked with overtime.
**POLICE/AMBULANCE/FIRE:** Police: 091; Fire Brigade: 232123; Ambulance: 231945.
**TELEPHONES:** Can be installed on board if requested ten days in advance.
**SHORE LEAVE:** No restrictions.
**SERVICES:** Fresh provisions and stores available, refuse collection, correction of compasses.
**AUTHORITY:** Comandancia Militar de Marina, Avenida de Molini, Seville. Tel. 232527. Telex 72075.

## SOLLER: Majorca, 39.47 N. 02.46 E.

**DOCUMENTS:** See "Bilbao".
**PILOTAGE:** None available. Two intermittent lights situated on the Mola indicate the Entry Channel.
**MAX. SIZE:** Advisable length and draft 60 and 4·50 metres respectively.
**TUGS:** None available.
**MEDICAL:** It is advisable to give advance notice if medical attention is required. There are no hospitals. Medical service is available 5 kilometres from the port.
**FRESH WATER:** Not available at the quay.
**FUEL:** None available. If required the order should be placed to Campsa through the Agent.
**GANGWAY/DECK WATCHMEN:** Crew do this operation.
**OPENING/CLOSING HATCHES:** Crew.
**IDENTIFICATION CARDS:** It is advisable to have these available.
**CONSULS:** None.
**REPAIRS:** No facilities exist.
**AIRPORT:** The airport is situated 40 kilometres away; the island is well connected with the Peninsula (mainland) and with foreign airports.
**TIME:** GMT plus 1 hour.
**SHORE LEAVE:** Allowed.
**AUTHORITY:** Jefe Encargo del Despacho de Buques, Oficianas del Destacamento de la Comandancia Militar de Marina en Soller.

## TARRAGONA: 41.06 N. 01.17 E.

**DOCUMENTS:** Cargo Manifest of all goods in ship, stating any foreign port from where those goods come. This procedure should always be done in the first Spanish port.

In first Spanish port ship should produce an Itinerary Manifest; and those ships which carry goods to discharge should produce this Manifest in those ports in which they will discharge the goods.

Supplies Certificate for those ships that not having any goods to discharge in any Spanish port, had previously being in other Spanish port.

Register of the Supplies and Equipments in ship.
Register of the Crew's Belongings, if the ship comes directly from a foreign port.
Passenger List (if there are passengers). Negative Passenger List (if there are not passengers)
Crew List.
Health Certificate, if the ship comes from another Spanish port.

**PILOTAGE:** Every ship upon arrival should note following signals: During day, hoist flag letter "G" of International Signals Code. Acoustics signal, three long whistles. During the night, flash signal letter "G" of code or the letters "PT". Cable Address: Practicos Puerto Tarragona. No VHF station.

Pilot boats: White colour with letter "P" painted on both sides. Lights: according to International Regulations. Pilotage area begins at a maximum distance of two miles from port entrance. Ships awaiting for Pilot anchor in the Rada and East of the lighthouse. If weather does not allow, Pilot will meet ship at port entrance. Ladder for Pilot to be placed at leeward side.
**ANCHORAGE:** The West limit is marked by imaginary line between lighthouse and cathedral tower. East limit is marked by imaginary line between the Paseo de Sta. Clara with the cathedral tower. Depths in Rada are 16 metres and 30 metres; quite good for anchoring (mud and sand).
**RESTRICTIONS:** No restrictions to enter port during day or night. No tides.
**MAX. SIZE:** Maximum length 230 metres, maximum draft 32 ft. Outside port the plant of Pantalán de Assesa, one mile West of lighthouse, allows berth of tankers up to 30,000 tons dwt.
**HEALTH:** Hospitals and clinics available. There is a doctor service in health department of port, which is authorised to vaccinate, and give certificates against yellow fever authorised by the OMS.
**RADIO:** No radio station.
**TUGS:** Four tugs. Tugs join vessel outside port. Ship's lines are used.
**BERTHING:** All berths are made of stone with rubber protection every 20 metres in the port. In Pantalán de Assesa, quays over iron pillars and berth is on the platform.
**STEVEDORES:** Advisable to report ETA, in order to have all the necessary equipment and necessary number of workmen required for operations. If there are not enough cranes at a given time, own ship equipment is used.

General Cargo: Estimated speed of 80–100 tons per person in a working day of 8 hours, except in particuar cases due to the nature of the cargo.

Cargo in Bulk: Speed varies according to the nature of the goods. For instance:

Minerals 500–800 tons per person in a working day of 8 hours.
Grains: 400–600 tons per person in a working day of 8 hours.
Goods in bags: 150–200 tons per person in a working day of 8 hours.

**GANGWAY/DECK WATCHMEN:** Not compulsory, if Master requires them he is provided with specialised staff for this purpose.
**OPENING/CLOSING HATCHES:** Although this work is normally carried out by crew it can be done as well by the stevedores if required at extra charge.
**TANKERS:** Outside the port is the Pantalán of Assesa for berthing oil carriers.

Storage of residues: There is a plant for slop (residue) discharge facilities connected with all platforms of the Pantalán and plant of residues disposal is available to all vessels.

There are three platforms to berth with the following draughts: Platform "A" – 38 ft. Platform "B" – 29 ft. Platform "C" – 23 ft. In inner port there are berths to discharge refined goods available to the tankers of the Compania Arrendataria of the Oil Monopoly.
**FRESH WATER:** Supply of fresh water by means of an underground pipe in all the commercial quays of the port.
**FUEL:** Available. The grade of viscosity available is below 20 E. to 50 C. Request of this supply should be done with 24 hours notice through the Commercial Agent of Campsa.
**DEVELOPMENTS:** Building of quay in Levante Dock, with a length of 550 metres and 12 metres draft, with a probable extension of another 300 metres of quay with 14 metres draft. The draft in the port will then be 12·70 metres and in the entrance channel 13·40 metres.
**CUSTOMS ALLOWANCES:** It is permitted to have a packet of tobacco per person per day. Unlimited allowance with national drinks.
**CREW IDENTIFICATION CARDS:** Not required.
**CONSULS:** Various available.
**REPAIRS:** Small repairs available.
**DRY DOCKS:** None.
**REPATRIATION:** Facilities exist.
**AIRPORT:** The town of Reus 12 kilometres distance has a military airport that is also used for charter flights.
**TIME:** GMT plus 1 hour.
**POLICE/AMBULANCE/FIRE:** Police 20–11–29; Ambulance at local hospitals; Fire 20–19–50.
**SHORE LEAVE:** Allowed.
**AUTHORITY:** Capitan del Puerto en Comandancia Militar de Marina, telephone 20–16–22.

## TORREVIEJA: 37.58 N. 00.40 W.

**DOCUMENTS:**

2 Crew Lists.
Customs Documents.
Health Declaration.
Manifests.
Bills of Lading are done by Agents.

**PILOTAGE:** Requested by Agent. Permanent service. White-painted boat with letter "P" on sides. Pilot goes out of port as far as one mile.
**ANCHORAGE:** Outside, 0·5 mile off lighthouse of Eastern quay. Inside, according to Pilot's judgement.
**MAX. SIZE:** Unlimited length and breadth; limiting draft 27 ft.
**RADIO:** Alicante Coastal Radio.
**TUGS:** None available.
**BERTHING:** West quay is 220 metres long with a depth of 10 metres used only for loading salt, 200–400 tons metric tons per hour.
**STEVEDORES:** Available, employed by the consignees.
**MEDICAL:** Hospital situated 45 kilometres distance. Medical services and Emergency Clinic in port.
**DENSITY:** 1034.
**FRESH WATER:** Available at the quay. Price 50 pesetas per metric ton.
**FUEL:** None available.

**GANGWAY/DECK WATCHMEN:** If required can be contracted.
**OPENING/CLOSING HATCHES:** Carried out by crew.
**CUSTOMS ALLOWANCES:** 200 cigarettes. Two bottles wine.
**IDENTIFICATION CARDS:** Not necessary but convenient.
**CONSULS:** Sweden Vice-Consul 101; Norway, Denmark and Liberia Vice-Consul 135.
**REPAIRS:** Small repairs in engines, electrical, etc.
**REPATRIATION:** There are no problems in this respect.
**AIRPORT:** 30 km. distant at Alicante. Regular flights to Madrid.
**TIME:** GMT plus 1 hour.
**HOLIDAYS:** See Huelva.
**POLICE/AMBULANCE/FIRE:** Police tel. 99, Ambulance and Firemen tel. 83.
**TELEPHONES:** There are no connections on board. One on the quay.
**SHORE LEAVE:** No restrictions.
**AUTHORITY:** Ayudante Militar de Marina and Captain of the Port, Telephone 42.

## VALENCIA: 39.27 N. 00.19 W.

**DOCUMENTS:**

3 Crew Lists.
2 Passenger Lists or a negative.
1 Cargo Manifest of goods destined for the port.
Another Manifest covering transit cargo.
2 Store Lists, including tobacco, cigars, cigarettes, coffee, spirits, radios, cameras, etc., in possession of crew. In all cases make and number of radios to be indicated.
Safety Wireless Certificate and Safety Equipment Certificate.

If vessel carries over 3 kilos tobacco per man, the excess to be declared in a separate manifest, which must be visaed by Spanish Consul at the last port, otherwise vessel is exposed to heavy fine.
**PILOTAGE:** Pilotage is compulsory for this port. The pilot launch is painted black with a letter "P" painted in white on the sides.
**ANCHORAGE:** There is a good anchorage outside the port, vessels are required to keep the entrance channel clear.
**RESTRICTIONS:** Entrance to the port faces S.S.E. and is 260 m. wide, with a low water depth of 12 m.
**MAX. SIZE:** Length 250 m. draft 11 m. Vessels with greater draft have berthed in the Port.
**HEALTH:** If the vessels proceed directly to berth, pratique can be obtained immediately after berthing. Otherwise, at anchorage at vessel's arrival.

If vessel has sickness on board of a contagious nature Master should advise Health Authorities by radio, and they will examine patients immediately upon arrival, to enable vessel to be granted free pratique.
**RADIO:** Coastal radio station with international frequencies 1580 kHz.
**TUGS:** Not compulsory for entering port. 7 tugs available up to 900 h.p. Two tugs normally used for berthing and unberthing.
**BERTHING:** *Espigon Del Turia:* Berths for 8 vessels, depth alongside 9–11 metres.

*Muelle de Poniente:* 3 berths, depths alongside 7–11 metres.
*Muelle de Levante:* 3 berths, depth alongside 8–9.5 m.
*Inner Dock:* Berths for 6 vessels, depth alongside 7 m.
*Turia Quay:* 3 berths with 9 metres depth of water.
*South Quay:* 5 berths (600 m.) with 14 metres depth of water.

**CARGO-HANDLING FACILITIES:** Grain, coal, fertilisers, etc., in bulk are handled at Espigon del Turia and Muelle del Turia. Also at Muelle del Turia is a chemical-handling installation, depth alongside 9·25 metres.

*Containers:* Two berths at the Turia pier, North side, with crane of 30 metric tons capacity, also, and using conventional means, they are discharged at the Western quay.

There are two work-points for roll-on/roll-off vessels at the Eastern transversal quay and the Western transversal quay.
**TANKERS:** Berth at Muelle de Poniente, up to 30 ft. draft.
**MEDICAL:** All medical services available in the port and in the city.
**REPAIRS:** All types of hull and machinery repairs can be effected.
**FLOATING DOCK:** 1 floating dock available, owned by Union Naval de Levante. Interior length 143 m., interior width 24.60 m. Lifting capacity 8,000 tons.
**CUSTOMS ALLOWANCE:** Normally Customs permit to have 200 cigarettes per man out of bond. Additional quantities needed depend on the stay of ship in port. One bottle of spirit per man.
**FRESH WATER:** Available at all main berths at the rate of 30 tons per hour.
**FUEL:** Campsa can supply by pipelines at the Turia berths, at the rate of 750 tons per hour and at Muelle de Poniente at the rate of 200 tons per hour.
**TIME:** Always GMT plus 1 hour.
**AIRPORT:** Situated at Manises, 10 kilometres away from the port.
**CONSULS:** The following countries are represented in Valencia:

West Germany
Argentina
Belgium
Bolivia
Brazil
Colombia
Costa Rica
Chile
Denmark
Dominican Republic
Ecuador
U.S.A.
El Salvador
Finland
France
Great Britain
Greece
Guatemala
Honduras
Iceland
Italy
Nicaragua
Norway
Netherlands
Panama
Portugal
Sweden
Switzerland
Uruguay
Venezuela
Yugoslavia

**POLICE/AMBULANCE/FIRE:** Police 091; Fire 271234; Ambulance 230304.
**HOLIDAYS:** Work can be arranged on following holidays. New Year's Day (January 1 full day); Epiphany (January 6 full day); Saint Joseph (March 19 full day); Easter (two days); Saint Joseph Artisan (May 1 full day); Saint Peter & St. Paul (June 29 full day); Labour Day (July 13 full day); Patron Saint of Spain (July 25 full day); Assumption Day (August 15 full day); Martyrs' Day (August 30 full day); Holiday of Hispanicism (October 12 full day); All Saints (November 1 full day); Christmas Day (December 25 full day).
**AUTHORITY:** Direccion del Puerto de Valencia, Muelle de la Aduana, Valencia.

## VIGO: 42.14 N. 08.40 W. (See Plan)

**DOCUMENTS:**

Maritime Declaration of Health.
Crew List.
Passenger List.
Manifest of Cargo for the Port.
Manifest of Cargo in Transit.
Ship's Stores List.
Crew's Personal Effects List.
Ship's Particulars Declaration.

*Note:* Tobacco. In case the vessel carries more than 3 kilos of tobacco per man, the excess must be declared in a separate manifest, which must be visaed by a Spanish Consul. In the absence of the Consul, said document will have to be visaed by an authority of the former port of clearance. Otherwise the vessel would be severely fined.
**PILOTAGE:** Pilotage at Vigo is compulsory and the service permanent day and night. Pilots board in auxiliary motor-boats with a letter "P" in white at both sides of the hull and a blue flag with the letter "P" in white, near the entrance of the harbour, in the zone included inside Punta Lameda-Cabo Vicos on the channel of the South entrance and inside Punta Caballo-Subrido, on the channel of the North, both situated to the West of the harbour. At night the pilot boats have a white light visible around the horizon and under this light another red one, also visible around the horizon. International code signals used to call Pilot, or four long blasts on the whistle. Pilot station situated at Cabo de Mar. Three pilot boats normally on station on a line connecting Borneira and Cabo de Mar.
**ANCHORAGE:** Several suitable anchorages in the Vigo River, naturally sheltered, in depths of more than 35 metres. The main anchorage opposite the port on the South side of the river has depths of 15–25 metres.
**MAX. SIZE:** No limitation for length and beam, unlimited deep water approaches.
**HEALTH:** If vessels proceed directly to the berth, pratique can be obtained immediately after berthing. Otherwise, at the anchorage on vessel's arrival. In case of suspected disease or fever on board the Master must send a radio message to the Agent in order that they advise the Health Office.
**RADIO:** The nearest Radio Station is Vigo Radio, situated in the limits of Vigo port.
**TUGS:** No tug-boats are required for entering the port. Only used for berthing ships from 120 metres length upwards according to Pilot's advice. At Vigo there are 2 modern tugs of 1,000 h.p. each. Tugs join vessel off the berth. Tug's line used at no extra charge.
**BERTHING:** The commercial piers to load or unload have a depth of about 28 ft. and the Transatlantic Pier, depth of about 40 ft. at LW. The tide difference between high water and low water is about 3·50 metres.

At Rande, in the lower harbour, there are very modern special loading installations for mineral ore, at an average rate of 2,000 tons per hour. The depth alongside this installation is 36 ft. LW.

Containers are handled at Muelle de Arenal by cranes of 15 and 20 tons capacity. Depth alongside 10 metres.

Roll-on/roll-off traffic berths, depth 6 metres, situated inside Transatlantic Pier.
**TANKERS:** Tankers berth at a pier depth alongside 11 metres at low water. Tankers up to 300 metres length acceptable. Inner berth suitable for vessels of less than 100 metres length with a draft of 6 metres. Discharge lines 12 in., 10 in. and two of 8 in. diameter.
**STEVEDORES:** It is very important that Masters send advance notice regarding the vessel's ETA. With this notice, Agents can inform Shipper's or Receivers' stevedores accordingly, so that they arrange operations properly. The official working hours of the port are: Monday/Saturday, 0930/1300 – 1400/1800 hours.
**MEDICAL:** Doctors and hospital facilities available. Advance notice preferred in urgent cases.
**DENSITY:** Average 1026.
**FRESH WATER:** Available from the quays at the rate of 50-80 tons per hour. Can also be supplied by tugs at 500 tons per hour.
**FUEL:** Available from the Oil Pier or delivered by barge. 24 hours notice of requirements recommended.
**DEVELOPMENTS:** Bulk carrier berth under construction suitable for vessels up to 300 metres length and 16 metres draft.
**WATCHMEN:** Available from shore if required.
**HATCHES:** Opening may be done by crew to avoid delays. Closing hatches usually performed by crew.
**CUSTOMS ALLOWANCES:** 200–250 cigarettes or three kilos of tobacco and 2 bottles spirits may be held out of bond for each person. Wine not restricted.
**IDENTIFICATION CARDS:** Shore passes are provided by the Agent.
**CONSULS:** Practically all countries have consulates at Vigo.

**REPAIRS:** All types of deck and engine repairs are possible.
**FLOATING DOCKS:** One floating dock available: length 128 m., breadth 22·40 m.
**REPATRIATION:** Crew changes and repatriation can be arranged without difficulty.
**AIRPORT:** Local airport, situated 8 kms. from the port, has at least one daily flight to Madrid. International airport of Santiago de Compostela is 100 km. away.
**TIME:** GMT plus 1 hour all the year round.
**HOLIDAYS:** 1st January; 6th January; 19th March (St. Joseph); Good Thursday afternoon; Good Friday; 28th March (local holiday, Reconquest Day); 1st May (Labour Day); Ascension Day; Corpus Christi; 29th June (St. Peter and St. Paul); 18th July (National Holiday); 25th July (St. James' Day); 15th August; 12th October; 1st November; 25th December.
**POLICE/FIRE/AMBULANCE:** Police, tel. 21.00.00; Fire, tel. 21.20.00; Ambulance, tel. 21.25.09.
**TELEPHONES:** No arrangement for connecting on board.
**SHORE LEAVE:** Allowed without restriction.
**AUTHORITY:** Director del Puerto, Junta del Puerto y Ria de Vigo, Plaza del Puerto. Tel. 21.13.24.

# Spanish Sahara

## EL AAIUN: 27.04 N. 13.28 W.

**LOCATION:** Lighthouse at phosphate terminal in position 27° 03′ 55″ N. 13° 27′ 45″ W.
**DOCUMENTS:** See "Villa Cisneros".
**APPROACHES:** There is a light located at the end of the bulk phosphate terminal in position 27° 03.9′ N. 13° 27.7′ W. at the top of mineral silos, at a height of 180 ft. One flash every 5 seconds, range 10 miles.

There is also a fixed green light located at the Northern part of the terminal range 10 miles, and a fixed red light at the Southern part of the terminal, range 10 miles.

The phosphate terminal installations give a good radar target at a distance of 25 miles. Vessels approaching from the North should keep 10 miles off the coast until the pier is bearing 090° and then steer towards the pier.

At nights the installation lights are always visible and with a clear atmosphere can be seen from 25 miles off the coast.
**PILOTAGE:** Compulsory. Pilot boards about 0·75 miles off the pier head.
**ANCHORAGES:** Good anchorages can be found in 10 fathoms of water. When waiting for the Pilot it is recommended to anchor 0·75 miles Westward of the pier. No shelter in strong winds. Service of powerful auxiliary boats is available when standing at anchor.
**MAX. SIZE:** Depth 17·5 metres at LWL at the phosphate terminal berth, and 9·5 metres LWS at the berth for general cargo ships, located at the middle of the pier.
**QUARANTINE:** Valid smallpox, yellow fever and cholera certificates are required. Otherwise, usual clearance.
**RADIO:** Via Tenerife Radio on HF, call sign EAT. Via Las Palmas Radio on MF, call sign EAL.

There is no coast radio station in Spanish Sahara for communication with El Aaiun. VHF radio communication is being placed at the phosphate terminal to work in future on Channels 12 and 16.

Ships calling at the terminal are required to send ETA cables 72, 48 and 24 hours prior arrival to "Cargadero Fosbucraa el Aaiun" and "Fosbucraa Madrid".
**TUGS:** 2,000 h.p. tugs are called from Las Palmas to assist whenever the ship requires their service. Assistance has to be requested by Master or Owner 60 hours prior arrival.
**BERTHING:** Aaiun Mineral Terminal located approximately 6·5 miles South of El Aaiun City.

The terminal head is in a North–South direction. Vessels are moored alongside dolphins that cover the three loading stations for 100,000, 40,000 and 20,000 tons dwt. ships. The loading pier has a height above water of 50 ft. and the dolphins approx. 20 ft.

Facilities consist of modern equipment available for handling phosphate in bulk at a loading rate of 4,000 tons per hour in two of the stations, and 2,000 tons per hour at the third. The phosphate is loaded by means of moveable loading machines with telescopic spouts to permit perfect trimming.

Facilities at the general cargo berth available for vessels up to 8,000 tons dwt. are two cranes of 6 tons each, and one derrick of 150 tons capacity.

No gangway to be rigged at this terminal. Communication from ship-to-shore is by means of elevator from the loading machines.
**AIRPORT:** Aaiun (30 km. from harbour).
**REPAIRS:** No repairs can be effected at this port.
**BUNKERS:** No bunkers available.
**PROVISIONS:** Provisions may be obtained if requested by vessel 48 hours prior arrival.
**OPERATORS:** Fosfatos de Bucraa S.A. (Fosbucraa), Boix y Morer 6, Madrid 3. Cables: "Fosbucraa Madrid". Telex: 27356. Tel.: 2–33–36–00.

## VILLA CISNEROS: 23.42 N. 15.55 W.

**DOCUMENTS:** *Foreign Vessels*
Crew List.
Health Pratique.
Passenger List.
Cargo Manifest.
*Spanish Vessels,* in addition to the above:
Safety Equipment Certificate.
Radio Safety Certificate.
Seaworthiness Certificate.
**PILOTAGE:** Pilot is necessary to cross the bar and for river navigation. Pilot joins at anchorage. Pilotage compulsory for all vessels over 50 grt. Contact Pilot by radio-telephone, via Puerto de Villa Cisneros Radio operating on 2182 and 2626 kHz. from 0800 to 1300 and from 1500 to 2000 hours GMT.
**ANCHORAGE:** In depths of more than 10 metres about 0·6 mile East of the breakwater head. This situation is well protected from swell from the S.W. but open to winds from the N.E. which are frequently strong creating difficult conditions for very small vessels. There are no mooring buoys.

Vessels loading trans-shipment cargo anchor in position with Punta Galera Light bearing 030° T, 1·2 miles off. The prevailing winds blow mostly from the north up to force 3 with a long low swell mostly from a north westerly direction.
**MAX. SIZE:** Length 100 metres, beam 12 metres, draft 5 metres.
**HEALTH:** Masters are required to complete a health certificate for the Comandancia declaring that the vessel has not called at any infected ports.
**TUGS:** None available, only one small launch which may assist.
**BERTHING:** Breakwater of 750 metres length extends towards the S.E., berths alongside the last 200 metres, one concrete pier for small vessels, three small jetties enclosing two docks, can be used by vessels of medium size.
**STEVEDORES:** Employed by Port Authority and engaged by ship's Agent.
**MEDICAL:** Hospital available for any kind of medical attention; doctors and ambulance service available.
**TANKERS:** Moor at jetty No. 2. Pipelines 4 in. diameter.
**FRESH WATER:** On the quays are 3 hydrants, capacity 3 tons per hour and 4 of 2 tons per hour.
**FUEL:** Atlas Company can supply fuel subject to advance notice.
**HATCHES:** Opened and closed by crew.
**CUSTOMS ALLOWANCES:** Crew are allowed to take only sufficient tobacco ashore for their own consumption. It is not permitted to take alcohol ashore.
**IDENTIFICATION CARDS:** Seamen going ashore must take an identity card or a shore pass, issued by the Master.
**CONSULS:** No local representation.
**REPAIRS:** Only facilities for very minor repairs.
**REPATRIATION:** Can be arranged provided that documentation is in order.
**AIRPORT:** Situated 1 kilometre from the port. Iberia Airlines have 5 flights per week. In case of emergency, military aircraft may be used.
**TIME:** GMT is used all year round.
**HOLIDAYS:** 1st January; 6th January; Maundy Thursday; Good Friday; Corpus Christi; Ascension Day; 29th June; 16th, 18th and 25th July; 15th August; 12th October; 1st November; 25th December.

Mohammedan Holidays: Aid el Queber (2 days); Aid el Mulud (1 day); Aid el Seguer (2 days).
**POLICE/FIRE/AMBULANCE:** Police Station situated 100 metres from the quays. Fire: tel. 18. Ambulance: tel. 17.
**SHORE LEAVE:** Allowed without restriction.
**AUTHORITY:** El Comandante, Militar de Marina.

# Sri Lanka (formerly Ceylon)

## COLOMBO: 06.56 N. 79.50 E.

**DOCUMENTS:**
5 each of Crew and Passenger Lists.
8 Manifests.
1 Arrival Report for Pilot.
1 Master's Declaration for Immigration, and same for Police.
2 Private Property Lists of officers and crew for Customs.
2 copies of Preliminary Report by Master for Customs.
1 Maritime Declaration of Health for Port Health Officer.
1 Master's Declaration of Cargo for Quarantine Department.
**PILOTAGE:** Vessels approaching port apply for Pilot by flying the G flag by day or two red lights at night. They can, in addition, flash the pilot station or use VHF Channel 16. The telegraphic address of pilot station is "Pilot Station Port Commission Colombo" and a provisional ETA 24 hours ahead is advisable with corrections thereafter. However, these are best channelled through the vessel's Agent. Pilot boat is a wooden motor launch with the word "Pilot" on its side. It flies the H flag by day or red and white lights by night according to the international code. The Pilot boards within an area of about 1 mile of the harbour entrance. Advice of where to anchor can be obtained from the Pilot by VHF or signal light.
**ANCHORAGES:** The usual anchorage off port is within 3 miles of

the harbour mouth where up to 14 fathoms of water is available. 18 fathoms of water is available within 6 miles.

**RESTRICTIONS:** Entry may take place at all hours of the day and night but it is unusual for the Pilot to board vessel between midnight and 0400 hours.

**MAX. SIZE:** For entering harbour, max. draft 36 ft. and a length of 800 ft. is permissible. Beam is not critical. There is no appreciable rise and fall of tide.

Tankers' max. dimensions for berthing alongside: length 750 ft., draft 34 ft.

**HEALTH:** The vessel entering port must fly the Q flag until boarded by the Port Health Officer to grant pratique. Pratique may be granted by radio if there is a doctor on board provided the ship is not calling from a port in India. A radio message should be sent within 24 hours of the vessel's ETA in the following terms "Last port —— no quarantinable disease on board – Doctor on board" and the Port Health Officer will reply to the Agent confirming pratique being granted by radio. Pratique is automatic if the vessel enters after calling at another port in Sri Lanka. If any quarantinable disease on board double Q flags must be hoisted prior to entering harbour.

**RADIO:** "Colombo Radio" with a call sign 4PB is the usual channel for communicating with Colombo.

The pilot station is presently available on VHF Channel 16 and the Port (Cargo) Corporation on VHF Channel 11.

**TUGS:** Tugs normally join the vessel at the harbour mouth and use their own lines.

**BERTHING:** There are no specific requirements relating to berthing space but early advice of draft is most advisable.

**STEVEDORES:** The stevedores at Colombo are the Port (Cargo) Corporation, a nationalised concern having the monopoly of stevedoring and lighterage. ETA at least 24 hours in advance if possible. Gangs for the day shift which commences at 0730 hours must be ordered by 0700 hours and gangs for the evening shift, commencing at 1630 hours, by 1600 hours. This excludes the Poya Day on which only the day shift is worked, and gangs must be ordered by 0930 hours on the previous day.

**MEDICAL:** Although advance notice of medical assistance required is helpful, particularly when port stay is limited, it is not essential. Comprehensive hospital facilities are available either in private nursing homes or in the Government hospitals. The following inoculations are required: Smallpox and cholera, yellow fever if calling from ports in East Africa and Mozambique.

**TANKERS:** There are 3 tanker berths, one for importing crude oil suitable for tankers of 750 ft. length, max. draft 34 ft. One berth for white oil tankers with max. draft 33 ft. One berth for fuel oil imports for vessels with a max. draft of 31 ft., and this same berth is used for exports when permissible draft is 33 ft.

The diameter of discharge lines;

| | | |
|---|---|---|
| Crude oil, | 24 in., | giving capacity 1,000 tons per hour. |
| White oil, | 10 in., | capacity 250 tons per hour. |
| Gasoline, | 10 in., | capacity 170 tons per hour. |
| Furnace oil, | 14 in., | capacity 500 tons per hour. |
| Naphtha, | 12¾ in., | capacity 450 tons per hour. |

Pumping will not be commenced after nightfall. No residue discharge facilities are available.

**DENSITY:** 1025.

**FRESH WATER:** Fresh water is readily available by barge. The rate of delivery is approximately 40 tons per hour. The water is of good quality.

**FUEL:** Furnace diesel and gas oil available. Advance notice of at least 24 hours is advisable as the bunker requirements of the port often exceed the ability of the oil companies to supply immediately. Supplies are by barges which can pump at 300 tons per hour.

**DEVELOPMENTS:** One new alongside dry-cargo berth with a draft of 34–42 ft. should be ready by 1976 and there are plans for further development.

**GANGWAY/DECK WATCHMEN:** Watchmen are available and are to be recommended unless members of the crew are available to provide this service.

**OPENING/CLOSING HATCHES:** This work is normally carried out by the stevedores except in the case of McGregor or similar hatch covers which they will not handle.

**CERTIFICATES:** Register showing vessels name, port of registry, gross and nett tonnages and owner. Safety Equipment Certificates quadrennial and annual, Ship's Articles (British) and clearance from previous port and deratisation Certificate.

**CUSTOMS ALLOWANCES:** Cigarettes 25 per man per day. Tobacco 1 oz. per man per day. Snuff 1 oz. per man per day. Spirits ¼ bot. per man per day. Wine 1 bot. per man per day. Beer 2 bots. per man per day.

**IDENTIFICATION CARDS:** These are not essential but the crew is expected to carry some form of identification with a photograph on it when they leave the vessel.

**CONSULS:**

America
Belgium
Burma
China
Czechoslovakia
France
Germany
Greece
Indonesia
Indonesia
Italy
Japan
Maldives
Netherlands
Philippines
Poland
Denmark
Thailand
Rumania
Soviet Union
Switzerland
United Arab Republic
Yugoslavia

**REPAIRS:** Most main engine and boiler repairs and minor hull repairs can be effected.

**DRY DOCKS:** Maximum length 630 ft. overall 72 ft. breadth deepest draft 30 ft. Maximum possible notice required for booking.

**REPATRIATION:** There is no difficulty in arranging repatriation and crew change.

**AIRPORT:** It is 18 miles to the international airport which is serve by regular airlines.

**TIME:** Ceylon standard time is 5½ hours in advance of GMT, and n alterations are made during the year.

**HOLIDAYS:** Cargo work can normally be arranged on all excep the following holidays:

1st January; Sinhalese & Tamil New Year 1 day in April; 1st May; Wesak Full Moon in May; Republic Day 22nd May; 26th September; Christmas Day.

**POLICE/AMBULANCE/FIRE:** Harbour Police tel. 21075; Ambulance 20428; Ambulance launch: Exhibit A.L. flags; Port Fire Brigade 32331.

**TELEPHONES:** None are available for placing on board.

**GENERAL:** Ships should not discharge oil within territorial waters dispose any waste into harbour or on to quays, immobilise mai engines without prior permission, use radio for transmission i harbour. Ships should hoist national flag during daylight hours.

**SHORE LEAVE:** There is no restriction on crew members bein allowed ashore.

**DELAYS:** Delays for vessels working cargo are seldom over 2 hours. However, it is very unusual for vessels calling for bunkers fresh water, stores, etc., to be delayed for more than a few hours.

**AUTHORITY:** Colombo Port Commission, POB 528, Colombo 1 Tel. 21201.

**AGENT:** Aitken, Spence & Co. Ltd., Lloyd's Building, Sir Baro Jayatilaka Mawatha, PO Box 5, Colombo 1. Tel. 27861–7 (7 lines Telex 1142. Cable Address "Aitken Colombo."

## GALLE: 06.01 N. 80.14 E.

**PORT LIMITS:** To the Eastward Unawatuna Point, to the Westward Gindurah Point, to the Southward the usual sea league fro the line between these points.

**DOCUMENTS:** Pilot brings on board:

Arrival Report and Maritime Declaration of Health.

Port Health Officer boards vessel after berthing and collect Crew List, Passenger List, Maritime Declaration of Health. Examine crew, passengers and International Certificates of Vaccination.

*Customs.* Manifests, Bonded List, Passenger List, Cargo Lis List of Currency, Port Declaration.

*Immigration.* 3 Crew Lists.

**PILOTAGE:** Apply for Pilots via local Agents. Send ETA not mo than 24 hrs. prior arrival via Colombo Radio. Vessels telegrap direct to Master Attendant, Galle, via Colombo Radio. Vesse advised listen-in on Channel 16, VHF.

Pilot launch about 60 ft. long with white hull carrying word "Pilot" Pilot launch proceeds to vessels from Master Attendant's Offic and Pilot will board about ¼ mile to South of bell buoy. Vesse should anchor until pilot launch arrives and heave-up on approac of pilot launch; due to heavy swell prevalent *essential* vessels provide good lee for Pilot. Proper pilot ladder and two man ropes shoul be ready. Vessels anchoring should do so to the South or East o bell buoy. See "Anchorages".

**ANCHORAGES:** Best anchorage lies to Eastward of bell buo where depth 9 fathoms. To Southward of bell buoy depth increase to 15 fathoms. Vessels should anchor about ½ mile from bell buoy.

**RESTRICTIONS:** Vessels should not proceed north of bell buo Entry prohibited after 1700 hrs. and may be delayed by bad weathe Generally a wind force of over 25 kts. and a swell of over 4 ft. dela entry.

**MAX. SIZE:** North-east Monsoon. 1 vessel of 500 ft. up to 30 f draft, 2 vessels of 500 ft. up to 26 ft. draft, 1 vessel of 450 ft. up to 23 f draft, 1 vessel of 350 ft. up to 20 ft. can be berthed at stream berth South-west Monsoon. 1 vessel of 475 ft. up to 25 ft., 1 vessel of 450 f up to 21 ft., 1 vessel of 350 ft., up to 18 ft. can be berthed at strea berths.

Two alongside berths available for vessels up to 350 ft. length an 18 ft. draft. 750 ft. of quay space available.

**HEALTH:** The International Declaration of Health, handed t Master by Pilot, must be completed and returned to Port Heal Officer, who boards after berthing. PHO also requires 2 Crew List synopsis of Vaccination Certificates, Deratisation Certificate an examines Certificate of Vaccination.

**RADIO:** Colombo Radio.

**TUGS:** At present only one tug of 250 h.p. available throughout yea If sufficient notice given (over 24 hrs.) an additional tug could be se from Colombo (only available during N.E. Monsoon). Tug mee vessel at berth, tugs lines used. Charges for tugs included in po (pilotage) charges irrespective of ownership of towing lines.

**BERTHING:** Vessel berthing in stream lies to both anchors an picks up 4 to 6 mooring lines from buoys aft. To pick up moori lines, vessel should have ready at stream two messenger wires t 2½ in. diameter and 60 fathoms length.

**STEVEDORES:** All stevedoring carried out by Governme Corporation. Gangs, lighters etc., are all arranged by Port (Carg Corporation. 16 lighters of approx. 15 dwt capacity available f working vessels in stream berths.

**MEDICAL:** Vessels arriving in Galle and requiring medical attentio should cable Agent and Port Health–Galle at least 12 hrs. in advanc

**DENSITY:** 1025.

**FRESH WATER:** In cases of emergency up to 20 tons fresh wa could be supplied daily in stream in 400 gallon tanks conveyed b lighters. Alongside main quay up to 50 tons per night could b supplied by Bowser.

**FUEL:** Bunkering Division of Ceylon Petroleum Corporation, Kolonnawa (off Colombo) can service vessels with small quantities of fuel. 5 days prior notice required.

**DEVELOPMENTS:** Building of breakwater and all dredging operations stopped indefinitely.

Dredging main quay to 30 ft. depth, and channels to 33 ft. depth.

**GANGWAY/DECK WATCHMEN:** Ceylon police station two policemen aboard every vessel in harbour. For vessels berthed alongside policemen stationed aboard through day. For stream vessels policemen stationed only during hours when cargo worked.

**OPENING/CLOSING HATCHES:** Shore labour, but there is no objection to hatches being opened prior to labour boarding.

**CUSTOMS ALLOWANCES:** Present allowance 200 cigarettes/week, 2 bottles beer/day. Others proportionally.

**CONSULS:** All consular officers in Colombo, 72 miles away, 2 hours by train, 2½ hours by road.

**REPAIRS:** No repairs possible as Galle open to S.W., essential that vessels have engines ready at all times. No shutdown permitted.

**REPATRIATION:** Sub-collector of Customs acts as Shipping Master and will sign on/off properly authorised crew changes.

**AIRPORT:** Colombo.

**TIME:** Standard Time GMT plus 5½ hrs.

**HOLIDAYS:** Non-working days in the port (dates variable yearly): Sinhala and Tamil New Year in April; Good Friday, 1st May; Wesak Full Moon in May; 22nd May; 26th September; Christmas Day.

**POLICE/FIRE/AMBULANCE:** Harbour Police 3222; Ambulance 2861. No fire brigade available.

**TELEPHONES:** No telephones available aboard.

**SHORE LEAVE:** Crew allowed ashore.

**AUTHORITY:** Assistant Master Attendant, Master Attendant's Office, Galle, tel. 2824.

**AGENT:** Clark, Spence & Co. Ltd., PO Box 11, "Clan House", 24 Church Street, Fort, Galle. Tel. 2083 (after hours 2392). Cables Spence, Galle. Lloyd's and Steamship Agents.

## TRINCOMALEE: 08.36 N. 81.15 E.

**DOCUMENTS:**

International Maritime Declaration of Health.
6 copies Crew List.
6 copies Passenger List.
Smallpox Vaccination Certificates are compulsory.
Cholera or Yellow Fever Certificates required if vessel is arriving from an infected port.

**PILOTAGE:** No means of communication between Pilot Station and vessels calling at port. Vessels should indicate ETA through Colombo Radio, either to Agent or direct to Deputy Master Attendant, Trincomalee, at least twenty-four hours before arrival. No night pilotage. Pilot boards incoming vessels between hours of 0600 and 1800 about 2 cables Northward of Round Island (8° 30′ 48″ N. 81° 13′ 24″ E.). Vessels embarking pilot should whenever possible lower an accommodation ladder; if this is not practicable should let down a pilot ladder and provide two man ropes not less than three inches in circumference. Vessels awaiting a pilot should anchor half a mile North-eastward of Round Island light tower in depths from 11 to 13 fathoms.

Vessels arriving between 1800–2100 hours may be brought in at Deputy Master Attendants discretion if they come to anchorage 5 cables North-East of Round Island.

**ANCHORAGES:** Trincomalee Harbour is the only entirely sheltered natural harbour in Sri Lanka. Good anchorage may be found in almost any part of harbour in good weather.

**RESTRICTIONS:** Vessels may enter during hours of daylight only. Range of tide is very small and does not restrict entry.

**MAX. SIZE:** Almost unlimited length and draft can be accommodated in anchorage. Only one berth which can accommodate up to 600 ft. length, and 32 ft. draft. This jetty used for discharging tankers and bunkering.

**HEALTH:** The Port Health Officer boards vessels after arrival at anchorage to grant pratique. Pratique automatic for vessels arriving from another port in Sri Lanka.

**RADIO:** All cables to Deputy Master Attendant, Agents, Receivers, etc., should be routed through Colombo Radio; call sign 4 PB.

Pilot carries a portable VHF set, Channel 16, with about 2 miles range.

**TUGS:** One tug attends when required. Tow-lines generally not used; but if required tug lines used.

**STEVEDORES:** Stevedoring operations have been nationalised and are carried out by the Port (Cargo) Corporation, Trincomalee.

**TANKERS:** One tanker berth at which vessels of 600 ft. length and 32 ft. draft are discharged.

**DENSITY:** Salt water.

**FRESH WATER:** Available, supplied by water lighters, and from bunkering jetty.

**FUEL:** Marine heavy diesel and furnace oil can be supplied at 24 hours notice.

**GANGWAY/DECK WATCHMEN:** Watchmen are provided by the Port Tally and Security Services Corporation.

**OPENING/CLOSING HATCHES:** Carried out by stevedores.

**CUSTOMS ALLOWANCE:** Tobacco issued as required. Wine and/or Spirit issued as required.

**IDENTIFICATION CARDS:** Identity Cards or Passports are required to be carried by crew members ashore.

**CONSULS:** All Consular officers are in Colombo.

**REPAIRS:** Only minor repairs can be carried out.

**REPATRIATION:** Crew changes and repatriation can be effected.

**AIRPORT:** No International flights through Trincomalee. Internal service of Air Ceylon operates daily flights between Trincomalee and Colombo.

**TIME:** GMT plus 5½ hours.

**HOLIDAYS:** Dates of holidays are not fixed. Cargo work can generally be arranged on any holiday.

**TELEPHONES:** Police 308; Ambulance 448; Fire 335. There are no telephone connections for ships.

**SHORE LEAVE:** Allowed.

**AUTHORITY:** Deputy Master Attendant, Port Commission, Trincomalee. Tel. Dockyard 212.

# Sudan

## PORT SUDAN: 19.37 N. 37.14 E.

**DOCUMENTS:**

Port Sudan Harbour Master's Declaration.
Sudan Customs Declaration.
Quarantine Form.
(All above forms to be filled by Master on arrival).
3 Crew Lists.
3 Passengers Lists.
1 Crew Declaration.
1 Dutiable Stores.
4 copies Manifest.
1 copy B/Lading.
1 Provisions List.

**PILOTAGE:** 24 hours notice ETA. VHF. Channel 16. Pilot boards South of South Wingate Beacon. Pilotage compulsory.

**ANCHORAGES:** Towartit Anchorage, approx. 8 km. S.E. of harbour.

**RESTRICTIONS:** No restrictions providing berth available.

**MAX. SIZE:** Length 850 ft. maximum. Draught at Oil Terminal 37 ft., other berths 34 ft. 6 in.

**HEALTH:** Radio pratique obtainable if message sent not more than 24 and not less than 8 hours before arrival to "Quarantine, Port Sudan", with following information: Name of ship and ETA; Name of Agent; Whether surgeon carried or not; Whether illness on board, if so, what illness; Port of departure and last port of call. On receipt the Quarantine Medical Officer will inform ship by wireless whether pratique is granted or not.

**RADIO:** Port Sudan Radio (call sign STP). Operates daily on High Frequency as follows: 8652 Mcs from 0400 hours to 1600 hours GMT; 4356 Mcs from 1600 hours to 0400 hours GMT; 0500 kcs – continuous listening watch for first ten minutes of every hour. Radiograms may be handed in at Port Sudan Post Office at all times and at Port Sudan Quays Post Office during office hours.

**TUGS:** About one mile from harbour entrance. Either ship's or tug's lines at Pilot's discretion.

**BERTHING:**

| Berth | Length | Depth<br>Winter | <br>Summer |
|---|---|---|---|
| Nos. 1 to 5 main berths | 456 ft. | 30 ft. | 28/33 ft. |
| No. 5 | 426 ft. | 35 ft. | 33 ft. |
| Nos. 6 & 7 | 606 ft. | 35 ft. | 33 ft. |
| Nos. 8 & 9 | 600 ft. | 37 ft. | 35 ft. |
| No. 15 | 642 ft. | 37 ft. | 36 ft. |
| No. 16 | 230 ft. | 37 ft. | 35 ft. |
| Nos. 17 & 18 | 908 ft. | 39 ft. | 37½ ft. |

**CARGO HANDLING:** Grain silo of 50,000 tons capacity situated at Berth No. 15. Heaviest lift normally acceptable is 30 tons; special arrangements necessary for heavier items.

Span of coal transporters is 420 ft.

**TANKERS:** At berth No. 16 vessels up to 600 ft. length can berth with overhang. Max. draft 34 ft. 6 in.

Berths 17 and 18 accommodate tankers up to 37 ft. draft. Berths connected by pipe-line to refinery 8 km. South of Port Sudan.

Used for discharging crude oil and loading refined products.

**STEVEDORES:** Require 24/48 hours advance notice of ETA and stowage of cargo. Rate of Discharge and Loading: General cargo, 5–10 tons per hook per hour. Bagged cargo, 15–20 tons per hook per hour.

Exports. Main exports, cotton, cottonseed, gum Arabic, oilcakes, MOP shells, trocas shells, senna, beans, domnuts, oilseed, hides, skins, salt, beeswax, durra, wheat bran, chick peas, karkadeh and castor seed.

Tea. Following exports should not be stowed with tea: castorseed, hides, linseed, edible oil, oilcake. Cottonseed may be stowed with tea with separation of 3 ft. but it is preferable to stow in separate compartment from tea.

Cotton. Gum should never be stowed with cotton.

Transhipment cargo. Is normally not accepted at Port Sudan without prior permission, except in very small quantities.

Weight. Deadweight of cargo is expressed per ton of 1,000 kilos.

**MEDICAL:** Advance notice advisable. Hospital facilities available. Crew and passengers must have International Health books valid.

**DENSITY:** 1025.

**FRESH WATER:** Available ex quay and ex barge.

**FUEL:** Marine Fuel oil (normally 1000 secs.); marine diesel oil (42/45 secs.); gas oil (35 secs.). 24/48 hours advance notice advisable Name of suppliers is required.

**GANGWAY/DECK WATCHMEN:** Recommended.

**OPENING/CLOSING HATCHES:** Normally by stevedores.
**CUSTOMS ALLOWANCES:** Tobacco, 200 cigarettes per person. Wine and/or Spirit, two bottles of different kinds per person. Only personal requirements may be taken ashore.
**IDENTIFICATION CARDS:** Not required.
**CONSULS:** UAR and Nigeria.
**REPAIRS:** Minor deck and engine repairs.
**DRY DOCKS:** None.
**REPATRIATION:** Not recommended. Formalities take 2/3 days.
**AIRPORT:** 3 miles away. Flights 4 days per week Port Sudan to Khartoum. 2 days per week Port Sudan to Cairo.
**TIME:** GMT plus 2. In summer, GMT plus 3 hours.
**HOLIDAYS:** The following government holidays for the year 1974 will be considered as port holidays (The dates may vary in other years): 1st January (Independence Day, 1 day); 3-7th January (Kurban Bairam, 5 days); 24th January (Mohammedan New Year, 1 day); 3rd March (National Unity, 1 day); 5th April (Mulid el Nabi, 1 day); 15th April (Sham el Naseem, 1 day); 25th May (Revolution Day 1 day); 12th October (Republic Day, 1 day); 16–19th October (Ramadan, Bairam, 4 days); 23–27th December (Kurban Bairam, 5 days); 25–27th December (Christmas, 3 days).

The port will not work on the following days: 1st January (Independence Day); 4th January (First Day Kurban Bairam); 24th January (Mohammedan New Year); 5th April (Mulid El Nabi); 25th May (Revolution Day); 17th October (First day of Ramadan Bairam); 24th December (First day of Kurban Bairam); 25th December (Christmas Day).

Overtime will be worked on all other days.
**POLICE/AMBULANCE/FIRE:** Police 2424; Ambulance 2400; Fire 3001.
**TELEPHONES:** No arrangements exist for placing telephones on board.
**GENERAL:** No foreign currency allowed ashore. Crew are permitted to go ashore with any amount Sudanese Currency.

**AGENT:** May Trading and Services Co., PO Box 17, Port Sudan. Telegraphic address: "Mayo" Portsudan. Telex: No. 6. Tel. (during office hours) 2437; 2029, 2389; after office hours 2652, 2040.

# Surinam

## MOENGO: 05.38 N. 54.25 W.

A bauxite mining town about 70 miles up the Cottica river, a tributary of the Commewijne river, which latter joins the Surinam river at Fort Nieuw Amsterdam.
**DOCUMENTS/PILOTAGE/GENERAL INFORMATION:** refer to "Paramaribo."
**TUGS:** Two tugs are available, the larger is 1,750 h.p.
**MAX. SIZE:** Ships of 525 ft. can be accommodated. Ore vessels call daily. Draft depends on bar draft Surinam river.
**BERTHING:** Moengo has two piers at which ore is loaded by a transporter at the rate of 800/1,000 tons per hour. One pier is 430 ft. long and has a depth of 24ft. alongside. Both will accommodate ships of 525 ft. length. Tracks are laid on the 430 ft. pier and a 25 ton crane is available.
**PROVISIONS:** Not available.
**FUEL:** Small quantities can be supplied.
**FRESH WATER:** Small quantities can be supplied.
**AIRPORT:** About 5 km. from docks.
**AUTHORITY:** District Commissioner acts as Harbourmaster.
**AGENT:** Alcoa Shipping Co.

## NEW NICKERIE: 05.57 N. 56.59 W.

**DOCUMENTS:**

2 copies Crew List.
2 copies Passenger List.
Customs Documents; Crew Declaration Lists; for instance, souvenirs, electric apparatus, etc.
2 copies Ship's Store Lists.
3 copies Manifests of Import.
3 copies Manifests of Export.
1 copy Transit Manifest.
2 copies Manifests of Coastal Cargo.
Ship's Papers to be shown on request.

**PILOTAGE:** Pilotage is compulsory for the Nickerie River for ships bigger than 50 gross tons. There is always a pilot available; ETA to be sent 48 hours before arrival and 12 hours before arrival give necessary correction message to the Agent.

Ships can only enter the river at or about the time of high water.

The Pilot boards near the sea buoy (buoy No. 1). The pilot boat is a small wooden, grey and white painted vessel. The pilot boat does not use the international red-white pilot lights at night. It is not possible to make radio telephone contact with the boat. There is a signal lamp on board.

Send ETA-message to Agent who will order the Pilot. Awaiting high water the vessel can anchor about 3 miles N.N.E. of the sea buoy.
**ANCHORAGES:** With a draft of 15 ft. the ship can safely anchor 3 miles N.N.E. of the sea buoy. It is not advisable to anchor in the Nickerie river for a long time, the river is too narrow.
**MAX SIZE:** With springtide the maximum draft must not excee 14 ft. 9 in. and at neaptide 12 ft. The vessel has to use the high-i while passing the bar.

Maximum permissible length of vessel is 130 metres (426 feet). A low water ships are seated in the mud without consequence to hul rudder or propeller alongside the wharf. There are berths for o carriers.
**HEALTH:** There is no pratique-procedure. Only in the event of a suspected disease or fever on board a doctor must be called.
**RADIO:** Send ETA cables to Paramaribo Radio. The pilot office Nickerie has a radio telephone transmitter. Frequency 8233·9 kH listening hours: 07.00, 12.00, 18.00 local time. SSB and VHF equipmen also used.
**TUGS:** No strong tugs available.
**STEVEDORES:** The Agent orders the gangs (maximum thre gangs available).
**MEDICAL:** No advance notice required for medical treatmen There is one hospital in Nickerie with a surgeon.
**TANKERS:** There are three piers in Nickerie: Esso, Shell an Texaco pier. Maximum permitted draft 14 ft. 9 in. at springtide.
**DENSITY:** In the dry season the density on the river near Ne Nickerie is 1015. In the rainy-season the density is 1005 near HW, an 100 near LW. These all depend upon springtide or neaptide.
**FRESH WATER:** Fresh water is available alongside the wharf o New-Nickerie. It is loaded from shore by hose.
**FUEL:** Small quantities of fuel available from Esso or Shell, als grease and petrol.
**DEVELOPMENTS:** In the future a bigger and deeper port will b built in the Corentyne river, about 20 miles up the river.
**GANGWAY/DECK WATCHMEN:** It is recommended to have watchmen during the night.
**OPENING/CLOSING HATCHES:** Patent hatches must be ope ed by the crew, other hatches by the stevedores.
**CUSTOMS ALLOWANCES:** Captain included: for every 72 hou staying in port: 15 cigars or 60 cigarettes or 30 cigarillos or 150 g tobacco plus ½ bottle spirits or 5 bottles beer or 1 bottle wine.
**IDENTIFICATION CARDS:** Not needed.
**CONSULS:** No consuls in Nickerie.
**REPAIRS:** Small engine repairs and shaft repairs and some wel ing repairs can be done.
**REPATRIATION:** Is possible via Paramaribo.
**AIRPORT:** The airport is 10 miles from the port of Nickerie. Tw times per day there is a flight to Paramaribo arranged by a loc company, called S.L.M.
**TIME:** Local time is GMT minus 3.30 hours. No alteration in tim
**HOLIDAYS:** New Year's Day; Good Friday; Phagwa; Queen Birthday (April 30); Ascension Day; Labour Day (May 1st); Day o Liberties (July 1st); Idul Fitre; Christmas Day and Boxing Day. O these days work can be done by paying overtime.
**POLICE/AMBULANCE/FIRE:** Police 356; Ambulance 241; Fi 333.
**TELEPHONES:** No arrangements can be made for a telepho connection on board.
**SHORE LEAVE:** Without reserve.
**DELAYS:** Delays in berthing: there are only two wharves with total length of 700 ft. Banana ships have priority. Delays in loadi and discharging: there are only three gangs of stevedores. Thes can be enlarged to five "small gangs".
**AUTHORITY:** District Commissioner acts as Harbour Master.

## PARAMARIBO: 05.49 N. 55.09 W.

**PORT LIMITS:** The seaward boundaries of the port, within whic a vessel is considered to be "arrived" is the entrance of the Surina Matowijne, Coppename, Corantijn and Nickerie rivers. Laytim commences to count after vessel has anchored or berthed.

On the left bank of the Surinam river about 8 miles above Ne Amsterdam and 21 miles from light-vessel at river entrance.
**DOCUMENTS:**

5 Incoming Cargo Manifests (if any cargo), otherwise three copies
1 Cargo Transit Manifest.
4 Outward-going Manifests.

These above-mentioned must be sent ahead to the Agent so th they can be translated into Dutch.

4 Crew Lists.
2 Store Lists.
2 Crew Declaration Lists.
6 Passengers Lists.

**PILOTAGE:** Compulsory. All ships are requested to amend th estimated time of arrival in local time, at least twelve hours in advan by special message through the wireless station to their Agents to the Harbour Master. Arrival message should include draft vessel and other requirements. Six hours prior to arrival the ET has to be confirmed and if necessary corrected. The pilot will b dispatched after receiving the confirmed ETA. As there is n shipping but in the Surinam river, the Commenwijned river, th Cottica river and the Nickerie river, all Pilots except one for Nicke are stationed at Paramaribo. Paramaribo Pilots board the vess at the light-vessel of the Surinam river. All vessels have to stop the light-vessel.
**ANCHORAGE:** Anchorage off town in 18–35 ft. of water at LWS Government officials board vessels immediately on arrival for ward clearance. Vessels which are required to anchor off the port wait for berths may be boarded at the anchorage.
**RESTRICTIONS:** Bar has minimum depth of 15 ft. 5 in. Rise ne tide 6 ft. 7 in. springtide 8 ft. 10 in. Due to the fact that the b

consists of very soft mud, vessels regularly leave the ports with a draft of 25 ft. (by springtide).

**RADIO:** There is a 24 hours radio telephone service at the Harbour Department on SSB and VHF. The coast station, PZN, also maintains a 24-hour radio telegraph (500 kc.) and telephone service in the 2182 kc. band. The lightvessel *Surinam River* is equipped with VHF Channel 12.

**HEALTH:** Port doctor will visit an arriving ship only if there is a case of contagious disease aboard, or if one of the preceeding ports of call has been declared to harbour contagious disease. No bill of health is required. A ship with an infection on board must advise the Harbourmaster by special message through the wireless station before arrival.

**BERTHING:** *O.G.E.M. wharf*, 120 ft. long least depth 18 ft. Oil/gas discharge for public undertakings.

*B.E.M. wharf*, 110 ft. long, least depth 18 ft. Private cement and gravel discharge wharf, Moorings 450 ft. apart.

*Banana export pier*, 297 ft. long, least depth 18 ft. Fresh water can be supplied.

*New Oil terminal*, Moorings 570 ft. apart. Least depth 18 ft.

*Flour pier*, Long 36 ft. Moorings 160 ft. apart. Least depth 16 ft. Only possible to discharge flour with a grain elevator.

*Vensur Cement wharf*, 180 ft. long, least depth 14 ft. Moorings 600 ft. apart.

*New Wharf Ltd.*, 1,815 ft. long. Least depth 19 ft. at LWS. Fresh water can be supplied.

*Belwaarde:* 3 miles above Fort Nieuw Amsterdam on the right bank of the Surinam river. Length of pier: 279 ft., least depth 18–20 ft. Loading sugar.

*Shell Oil Terminal:* Moorings 540 ft. apart. Least depth at LWS 21 ft. exclusively for oil and gas.

**MEDICAL:** Excellent medical and dental attention is available to crew members of all vessels.

**FRESH WATER:** The water is of excellent quality. Available at most berths as mentioned above.

**FUEL:** Ship's bunkers are available in most ports of Surinam in limited quantities. Advice regarding quantities and specifications of oil should be given to Agent's representative immediately after docking.

**CUSTOMS ALLOWANCES:** 60 cigarettes or 15 cigars or $\frac{1}{2}$ pound of tobacco. $\frac{1}{5}$ litre of spirits, $\frac{1}{3}$ litre of wine, 2 litre of beer, for each crew member. All quantities in excess of the above, will be put under seal.

**REPAIRS:** No facilities for major ship repairs. Local workshops can do repairs of minor nature. There are two floating dry docks and one floating derrick owned and operated by the Surinam Drydock Co. Lifting capacities dry docks: 400–650 tons.

**WATCHMEN:** The customs board the vessel while riding at anchor or alongside one of the docks. All vessels are required to make a proper gangway available to the custom boarding officer.

The local authorities assign one or more custom guards to each vessel during its stay in port. The charges for guarding are for the account of the vessel. These officials must be provided with meals on board at regular meal hours, and rooms if necessary.

**REPATRIATION:** Under special circumstances vessels may sail without all crew members on board (sickness, etc.). The Master furnishes a letter to his Agent authorising him to accept responsibility for the missing seaman or seamen.

**CONSULS:**

U.S.A.
Britain
Norway
Venezuela
Brazil
Guyana
Belgium
Denmark
Dominican Republic
West Germany
Indonesia
Ecuador
France
Austria
Portugal
Sweden

**TIME:** Local time is 3 h. 30 m. slow of GMT. Vessels are required to use local time in ETA messages and when dealing with Agents.

**HOLIDAYS:** 1st January; Good Friday; Easter Sunday; Queen's Birthday (April 30th); 1st May; 1st July (Freedom Day); 25th and 26th December; Holy Pagwha and Idul Fitre.

**SHORE LEAVE:** Under normal circumstances no restrictions are imposed by the Government Immigration Authorities on shore leave.

**GENERAL:** While alongside vessels must maintain engines and propulsion machinery in readiness to leave the pier under full power on short notice. No repairs are permitted which should interfere with this requirement. While alongside, oil tankers should have their offshore anchor out about 50 ft.

All vessels except ships of war, must furnish a statement, of the amount and character of explosives carried, also a certificate to show how they are stored and manner of packing.

Special anchorage areas are provided in the harbour for vessels with dangerous cargo.

All fire-arms and ammunition must be manifested on store lists and must remain in bond on board during vessel's entire stay in territorial waters of Surinam. Any violation of this regulation renders the vessel subject to fines and confiscation of fire-arms and ammunition.

**BALLAST:** Vessels must arrive with sufficient ballast to permit safe handling. All vessels should enter port with clean ballast water that may be pumped overboard while in the harbour, as it is prohibited to pump dirty ballast water or oil residue or sweepings into the harbour.

**AUTHORITY:** Harbourmaster, P.O. Box 888, Paramaribo.

**AGENT:** Alcoa Steamship Co., PO Box 1842, Paramaribo. Tel. 72941. Cables: "Alcoaship Paramaribo".

### PARANAM: 05.38 N. 55.05 W.

A bauxite mining town, located on the left bank of the Surinam river, about 40 miles from the entrance.

**DOCUMENTS/PILOTAGE:** and all General Information: refer to "Paramaribo".

**MAX. SIZE:** Vessels can load to outer bar draft and usually top off at Trinidad.

**HEALTH:** Health officer does not board unless there are quarantinable diseases aboard.

**TUGS:** Not available.

**BERTHING:** There is a concrete dock of about 350 ft. Mooring 660 ft. apart. Least depth 30 ft.

*New Pier:* Least depth 30 ft. length 680 ft. Capable of handling ore carriers up to 40,000 tons.

*Equipment:* 75-ton crane.

Loading Capacity: Bauxite 2,000 tons per hour. Alumina 850 tons per hour. Loading by conveyor.

**FUEL:** Small quantities can be supplied.

**FRESH WATER:** Can be supplied.

**REPAIRS:** None can be effected.

**AIRPORT:** At Zanderij 45 km. from dock.

**AUTHORITY:** District Commissioner acts as Harbourmaster.

### SMALKALDEN: 05.38 N. 55.05 W.

A bauxite mining town on the left bank of the Surinam river about 20 miles upstream from Paramaribo.

**DOCUMENTS/PILOTAGE** and all General Information; refer to "Paramaribo".

**TUGS:** None available.

**BERTHING:** Wharf with length of 218 ft. Moorings, 535 ft. apart, least depth 30 ft. Ships can load to outer bar draft. Bauxite loaded by two conveyors with an average of 800 tons per hour.

**DEVELOPMENTS:** New wharf under construction capable of handling ore ships up to 40,000 tons deadweight. Moorings 680 ft. apart.

**FUEL:** None available.

**FRESH WATER:** Small quantities can be delivered by trucks.

**REPAIRS:** None.

**AIRPORT:** At Zanderij, 45 km. from dock.

**AUTHORITY:** District Commissioner acts as Harbour Master.

## Sweden

### ÅHUS: 55.56 N. 14.19 E. (See Plan)

**DOCUMENTS:** See "Stockholm".

**PILOTAGE:** Pilots meet vessels at Pållagrund. Telegraphic address: "Sjöfartsstyrelsen, Åhus". Tel. 044-240027. VHF. Channel 16 call sign: "Pilot station, Åhus." Awaiting Pilot, anchor outside "Pållagrund". Depth 15–20 metres. (Also see "Stockholm".)

**ANCHORAGE:** Anchorage forbidden in dredged entrance channel.

**RESTRICTIONS:** No special regulations.

**MAX. SIZE:** Maximum length 150 metres, maximum draft 7·6 metres.

**HEALTH:** No special regulations.

**RADIO:** Karlskrona Radio, call sign SAA.

**TUGS:** Tugs only used in harbour basin, when turning.

**STEVEDORES:** Åhus Stevedore A/B.

**RADAR/VHF:** Radar on pilot station. VHF call sign: Pilot station, Åhus. Channel 16.

**FRESH WATER:** Delivered from pipe-line.

**FUEL:** Available day and night.

**FIRE PRECAUTIONS:** No special regulations.

**GANGWAY/DECK WATCHMEN:** If wanted, watchmen available.

**OPENING/CLOSING HATCHES:** Normally by the crew.

**CUSTOMS ALLOWANCES:** See "Stockholm".

**CARGO GEAR:** Normally loading or discharging with cranes.

**IDENTIFICATION CARDS:** Crew list needed. No cards.

**CONSULS:** Danish Vice-Consul: Vasagatan 17B, 29153 Kristianstad. Tel. 044-114841. Norwegian Vice-Consul Mast. Bonggatan 2, 29154 Kristianstad. Tel. 044-115605.

**REPAIRS:** Minor repairs only.

**DRY DOCKS:** No dry dock. Nearest dry dock Sölvesborg.

**AIRPORT:** Nearest airport about 10 miles away. Two flights per day.

**TIME:** GMT plus one. Permanent.

**HOLIDAYS:** See "Stockholm".

**POLICE/AMBULANCE/FIRE:** Police 242030; Ambulance 90000; Fire 90000.

**TELEPHONES:** No arrangements for placing telephone on board. Two public telephones on quays.

**AUTHORITY:** Harbour Office, 290 20 Åhus. Tel. 044-240014.

### GÄVLE: 60.41 N. 17.11 E. (See Plan)

**PORT LIMITS:** A line from Utvalnäs (approx. 60° 45.2 N. 17° 21.4 E.) over Båkharen to Långharen (approx. 60° 41.0 N. 17° 17.5 E.).

**DOCUMENTS:**

4 Crew Lists (for European vessels).
2 Crew Lists (for other vessels).
2 Manifests.
2 Bills of Lading.

1 Tobacco List.
1 Stores List.
Following documents supplied by Agent and signed by Master:
On arrival from foreign port:
1 Maritime Declaration of Health.
4 Report of Arrival (customs).
1 Declaration of Master (of persons on board).
1 Declaration of living animals (if any).
On arrival from any port:
1 Report of Arrival (Harbour Office).
1 Report of Receivers (Harbour Office).
1 Cargo List (or Manifest).
1 Transfer.
On departure to foreign port:
4 Report of Departure.
1 Declaration of Master (of persons on board).
On departure to any port:
1 Report of Shippers (Harbour Office).
1 Declaration by foreign Master.

**PILOTAGE:** (*a*) Sea Pilots: Pilot station: Bönan Telephone Nos. 991 10 and 992 20. Telegraphic address: Pilotstation, Gävle. Five hours advance notice of ETA pilot station. Notice of ETA can be given over any Swedish coastal radio station or free of charge on VHF over any Swedish pilot station or Grundkallen lighthouse.

VHF: Channels 16: Calling and Safety } Pilot station and Pilot
13: Pilotage traffic } boats.

All pilot boats orange. International signals for calling pilot. Pilot boards: South-east of Gråsjälsbådan 60° 43′ N., 17° 27′ E., and on request South of Eggegrund Lighthouse, 60° 43′ N., 17 34′ E. In° case of bad weather closer to pilot station. Anchorages: Gråberget roadstead North-east of Bönan Lighthouse (approx. 60° 44.8′ N. 17° 20.5′ E.), about 350 metres (0·2 m.) from shore and in 18–21 metres (10–13 fathoms) deep. Open for Easterly winds. (*b*) Harbour Pilots: Available for moving within harbour area on application to Port Administration, Telephone Nos. 12 49 10 or 11 31 56 or by VHF to Gävle Port Radio, channels 16, 14 and 13.

**ANCHORAGES:** See "Pilotage". Outer roadstead situated inside of Northern entrance and in red sector of Fredriksskans light. Outer roadstead well protected, depth of 15–11 metres (8–6 fathoms).

Anchoring forbidden:

(*a*) In dredged channel between lights in Northern channel and to a point 800 metres (875 yds.) West-south-west of Light No. 4.

(*b*) In white sector of Fredriksskans light East-north-eastward within a distance of 2,000 metres (2,190 yds.) from same.

(*c*) In navigable channel from Fredriksskans Light to Gävle Dolphin Light.

(*d*)In Fredriksskans Harbour basins.

(*e*) In Gävle River from berth No. 18 to berth No. 10.

**RESTRICTIONS:** Two fairways lead to harbour. Northern fairway is 11, 1 m. (36 ft. 6 in.) deep and has bottom width of 60 m. (196 ft. 11 in.) Day-time: maximum draft 10·6 m. (34 ft. 5 in.); maximum length 210 m. (689 ft.); maximum breadth 28 m. (91 ft. 10 in.). Night-time: maximum draft 7·55 m. (24 ft. 5 in.); maximum length 172 m. (565 ft.). Southern fairway (daylight only) permits draft of 3 m. (9 ft. 9 in.). All depths are referred to mean water level. Ships on way from outer roadstead or passing from Fredriksskans Harbour to Inner Harbour shall give way to vessels proceeding in opposite direction. This shall not apply to vessels with tow unless vessel approaching also has tow.

**MAX. SIZE:** Maximum permissible draft (at mean water) as follows:

| | *Maximum metres* | *Draft feet* | *Real depth metres* | *Allowance metres* |
|---|---|---|---|---|
| *Fredriksskans Harbour* | | | | |

**HEALTH:** Pratique always automatic. If any suspected disease or fever on board, notify ship s Agent.

**RADIO:** Stockholm Radio (SDH) or Härnösand Radio (SAH).

**RADAR/VHF:** No port radar service, but Bönan pilot station, Eggegrund Lighthouse, and one pilot cutter equipped with both radar and VHF and assists any ship approaching pilot station on request. After calling pilot station on VHF Channel 16, ships will be given assistance on Channel 13, 12, or 6.

**TUGS:** Join vessel outside Fredriksskans Lighthouse or outside Korsnäs Works for berthing, and outside Northern entrance channel for passage through same. Ship's lines always used.

**CARGO HANDLING:** Container berth, maximum draft 9 metres. One crane with 30-ton capacity.

Roll-on/roll-off berth, maximum draft 4·7 metres.

**STEVEDORES:** 24 hours notice (if possible) order arrange gangs.

**MEDICAL:** Notice of medical attention to Agent as early as possible. All kinds of medical and hospital facilities available. Smallpox vaccination required on arrival from non-European ports. Other vaccinations necessary on arrival from diseased areas. (Common for all Swedish ports.) Quarantine station established at Gävle with quarantine anchorage on outer roadstead.

**TANKERS:** Tanker berth No. 21 Maximum length: 210 metres (689 ft.). Maximum draft (at mean water) 10·5 m. (34 ft. 5 in.). Discharge lines for all products diameter 200 mm. (8 in.) at ships' connections. Pipe-lines connecting berth with oil depots have diameters as follows: Heavy fuel oils, 450 mm. (18 in.); gas oil, 400 mm. (16 in.); gasoline, 350 mm. (14 in.); kerosene, 250 mm. (10 in.). Tanker berth No. 1: Maximum length 200 metres (656 ft.). Maximum draft (at mean water): 7·45 m. (24 ft. 5 in.). Discharge lines for different products have diameter at ships connections as follows: All fuel oils, 250 mm (10 in.); gasoline, 200 mm. (8 in.); kerosene, 200 mm. (8 in.). Pipe-lines connecting berth with oil depots diameters as follows: All fuel oils, 350 mm. (14 in.); gasoline, 300 mm. (12 in.); kerosine, 250 mm. (10 in.). Tanker berth No. 2 and 3: Maximum length: 125 metres (407 ft.). Maximum draft (at mean water): 5·3 m. (17 ft. 5 in.). Discharge lines for all products 150 mm. (6 in.) at ships connections. Pipe-lines connecting berth with oil depots 150 mm. (6 in.). Tanker berth No. 105-106 (or 107–108) if the draft is more than 6·6 m. (21 ft. 8 in.) at Karskär (Korsnäs Works). No. 105–106: Maximum length: 195 m. (640 ft.). Maximum draft (at mean water) 6·6 m. (21 ft. 8 in.). Discharge lines for all products: 200 mm. (8 in.) at ships connections. Pipe-lines connecting berth with oil depots 250 mm. (10 in.). No. 107–108 Maximum length: 195 m. (640 ft.). Maximum draft (at mean water): 7·9 m. (25 ft. 11 in.). Same dimensions as above.

**DENSITY:** Fresh water.

**FRESH WATER:** Delivered from water posts at all quays in Fredriksskans Harbour. Inner Harbour, at Korsnäs Works and on roads fresh water delivered by water boat.

**FUEL:** All kinds of fuel oils available either from pipelines at oil berths or by lorries at all other quays. Following viscosities (Redwood I) normally in stock: 35, 225, 650, 1500, and 3500 secs. Other viscosities can also be delivered. Notice of delivery is required day before.

**DEVELOPMENTS:** New shipping terminal for coal and coke where discharging capacity will be very high.

The Port of Gävle is at present negotiating with two big forest industries concerning the building of a port terminal at Granudden which is situated opposite Fredriksskans Harbour. The terminal will comprise 350 m. of quay with a roll-on/roll-off berth, having draft of 10 m., two warehouses each having an area of 22,000 m.², as well as extensive storage space. The total terminal areas will be 150,000 m². and it will have an annual maximum capacity of 1·2 million tons forest products. The terminal will have very good connections with both main roads and the railway system. The terminal is expected to come into operation during 1977.
